It is interesting to note that Ma-con-a-qua is buried in Indiana, and not in her family's adopted State of Pennsylvania, because she refused to return to her brothers' home in that State when she was discovered by her family late in life. She is buried in Indiana and not in Oklahoma or Kansas because of an act of Congress which allowed her to stay in the land of the Miamis which she so loved, when other members of the tribe were moved to reservations in the West.

Within the next several years, a flood control project of the Corps of Engineers will cause a reservoir to flood the Slocum cemetery in which she is buried. In the development of the project, the Engineers will move her grave along with the graves of others buried in the reservoir area.

According to the procedures of the Engineers in a situation of this kind, the heirs of Frances Solcum will be contacted to seek from them an indication as to the place in which her remains should be reinterred. They will then proceed to purchase land for the new gravesite, remove and rebury the remains and to replace the monument in the new site.

In this regard, I have on file in my office a letter from Mrs. Eva Bossley, the secretary-treasurer of the Miami Indians of Indiana speaking in behalf of the tribal council and the great grandchildren of Frances Slocum which says in part:

> We feel the most sensible decision to be made * * * is to respect the wishes of Frances Slocum when she herself was asked by her brothers to go back with them to live. She chose to remain in Indiana with the people she loved and with the ones she knew were her own. We hope and pray that her remains will stay in the State of Indiana.

A great, great granddaughter of Frances, named Little Princess Macanaquah, after her illustrious ancestor, wrote me and expressed similar sentiments, "She should be left in Indiana. Let her rest in peace in her own land."

At a meeting of the descendants of Frances Slocum in the city park in Wabash, Ind., on August 20, the question of her grave removal was raised. More than 100 of her descendants voted to demand that her grave be retained near her former home. Only two members of the family did not vote affirmatively on question. They abstained.

Both the Wabash and the Miami County Historical Societies have gone on record favoring a new gravesite in Indiana. They have, in fact, begun work on securing such a new gravesite as might be appropriate, and to develop a plan for further tribute to this great historical figure. The local sentiment is quite clear, as is the sentiment of those who are the next of kin to Frances Slocum. They want to have her grave moved to a place in Indiana close to the present site.

The Federal Government will follow a procedure to reestablish a grave and monument to this great figure in Indian history. I offer today a bill which will establish the new Government-purchased gravesite and the monument, erected thereon at the expense of the Government as a consequence of the flood control project, as a national monument.

Frances Slocum is a national figure. She was born in the State of Rhode Island. Her family moved to the Wyoming Valley of Pennsylvania when she was a child. She was taken from her parents' home there and migrated west with the Delaware Indians across Ohio and Michigan and into Indiana where she lived and died. Her influence on the Indians contributed to the peaceful settlement of the entire Northwest Territory.

Her contributions to the Indian-white relations of the period are legendary. She became, in her own way, a leader and a force for good among the Indians. She became one of them, but she remembered her white culture and blended elements of it into her life and the life of her Indian community. She was a white woman, but she chose the life of the Indian when she could have returned to her family home. In these ways, she developed a better understanding between the cultures which she had bridged. In this manner, she contributed as much to the development of the Northwest Territory as many of the great military leaders which we honor.

In my bill, I indicate that the monument should be established in Indiana near the site of her present grave. I make no specific designation of the site because there are two fine suggestions which have been made concerning the new location of the memorial.

One site suggested is the Frances Slocum State Forest. This State operated game and forestry preserve is on the North Bank of the Mississinewa River, adjacent to the section of land ceded to Ma-con-a-qua's descendents and just across from the site of her present grave. The Conservation Director of the State of Indiana, Mr. Don Foltz, has indicated that his department would be agreeable to such a plan. The area is being developed into more of a recreational area and the inclusion of the Frances Slocum memorial would add to the historical significance of the area. The thousands of annual visitors to the facility would be reminded by the memorial of the contributions of this great woman and the honor to her would thus be increased.

Another suggestion is that the remains of Frances Slocum be reinterred in the last remaining tract of Indian land. This area, a part of that ceded to the last chief of the Miami Indians, is the only land in the area which has never been in the possession of anyone other than the Indians and their leaders. It was held for the Indians for the welfare of their people and it would, of course, be fitting to establish the new gravesite here, also.

Both of these plans have merit and the proper course can be determined in time by the proper authorities. My concern is that the remains of Frances Slocum be reintered in the area which she so loved and that the new gravesite be established as a national memorial.

There are those who would want the Federal Government to assist in the rekidnaping of this famous woman. There are those who would want to return her remains to the area of Pennsylvania in which she lived for 2 or 3 years of her early life. Others would want her moved to Ohio, through which she passed on her way to her home. I have not heard from the citizens of Rhode Island, but there may be a movement afoot there to have this great lady returned to the place of her birth and further memorialized there.

There is no case whatever for moving the grave of Frances Slocum out of the area of her life. There is strong evidence of her personal sentiments in this matter, and we must take heed of it.

Ma-con-a-qua had not related the story of her life to any white settler, although she had ample opportunity to communicate with them, until 1835, when she was sick and thought that she might be dying. Only then did she tell a young merchant, George Washington Ewing, and asked that he not relate her story to anyone while she was still alive. She was afraid, she told him, that some of her relatives might come and make her return with them to her family's home.

But Ewing could not keep his secret, and within 2 years her family had been contacted and they made plans to visit her. Two brothers, Joseph and Isaac Slocum, and their sister, Mary Towne, went to Peru and visited with their sister, Frances, for several days. Several times they asked her to return with them to their homes. She refused. They asked that she return for just a visit. She replied that something might happen that she would not return and, in that way, she refused. She was concerned that she live her remaining years in the happy, peaceful Mississinewa Valley.

In 1838, the United States made a treaty with the Miami Tribe, making land grants to certain ranking members of the tribe and making dispositions of claims. Among the Indians granted land were Frances Sloucum's two daughters, O-zah-wah-shing-qua and Ke-ke-

se-qua. The land was given to them since Frances, as a white woman, was not theoretically a member of the tribe, nor was she entitled to Indian benefits. The grant in the treaty was awarded to the family as descendants of a principal chief of the tribe, Frances' husband and the girls' father, She-pun-can-ah. This is the first incident of Federal action to assure Frances Slocum a home in the State of Indiana. It defined her land as "one section of land on the Mississinewa River, to include the improvements where they now live."

When the treaty of 1840 stipulated that the Miamis should abandon their land in the Wabash Valley and move to the reservations in the Kansas territory, many of them dreaded the move. Among those wishing to remain were Frances Slocum and her family. In January of 1845 she memorialized Congress in this fashion:

To the Honorable the Senate and House of Representatives of the U.S. Congress assembled:

Your memorialist, Frances Slocum, a resident of Wabash County, in the State of Indiana, would to your honorable body most respectfully represent: That at the age of 6 years, about the close of the Revolutionary War, she was taken captive in the State of Pennsylvania by the Indians, and has ever since lived among them, and is now, and for the last 30 years has been, recognized as a member of the Miami Tribe. That, from the time she was taken captive as aforesaid, she heard nothing of her white relatives and friends (the greater portion of whom reside at the place where she was taken, in the said State of Pennsylvania, and others in the State of Ohio, and the said State of Indiana) until about 7 years since. That she has entirely lost her mother tongue, and can only enjoy the society of her adopted people, with whom she intermarried, and became the mother of a family, and with whose manners and customs she has assimilated. That she is informed that the greater portion of the Miamis will be obliged to emigrate to the home assigned them west of the Mississippi in the course of 1 or 2 years, where their annuities will thereafter be paid them. That she is too old to endure the fatigue of removing; and that, under any circumstances, she would deplore the necessity of being placed beyond the reach of her white relatives, who visit her frequently, and have extended their kindness toward her since she was discovered by them. That her children are the owners of a section of land granted to them by the treaty between the United States and said tribe of Indians of the 6th of November, A.D., 1838, who now reside upon and cultivate the same, and with whom your memorialist now lives; and that it is the wish and design of her children and their families, if it be the pleasure of the Government, to continue to reside upon and cultivate the same.

Your memorialist further shows, that a portion or the annuities of said tribe, in pursuance of the 14th article of said treaty, is to be paid at Fort Wayne, after said tribe shall emigrate to the country assigned them west of the Mississippi; and that the payment of the annuities due your memorialist and her family at Fort Wayne or Peru, in said State, would not increase the expense or add any inconvenience to the Government of the United States.

"Your memorialist therefore prays that Congress may by law direct that the following persons, to wit: (1) Ke-ke-na-kush-wa, (2) We-saw-she-no-qua, (3) Te-quoc-yaw, (4) Ki-po-ki-na-mo-qua, (5) Ki-no-suck-qua, (6) Wa-pu-noc-she-no-qua, (7) Ching-Shing-gwaw, (8) Pe-tu-loc-a-te-qua, (9) Sho-quang-gwaw, (10) Waw-pop-e-tah, (11) So-eel-en-ji-sah, (12) No-ac-co-mo-qua, (13) Coch-e-no-qua, (14) Po-con-du-maw, (15) Tah-ki-qua, (16) Ki-ki-o-qua, (17) Te-quoc-yaw, Jr., (18) Soc-o-chu-qua, (19) Peem-y-o-ty-maw, (20) So-eel-en-ji-sah, Jr., (21) Pun-ge-she-no-qua, children and grandchildren of your memorialist, as also your memorialist, and such children as they may hereafter have, shall hereafter receive their annuities at Fort Wayne, or at Peru, Ind., as to your honorable body may seem most expedient and proper. And, as in duty bound, your memorialist will ever pray, &c.

FRANCES SLOCUM.

JANUARY 17, 1845.

On the 28th of January 1845, Mr. Cave Johnson—Tennessee—from the Committee on Indian Affairs, reported a joint resolution for the benefit of Frances Slocum, her children and grandchildren, of the Miami Tribe of Indians, and it was read a first and second time.

Hon. Benjamin A. Bidlack, of Pennsylvania, who represented the Wyoming district in Congress at that time, said he hoped "no motion or resolution would intervene to prevent the passage of this resolution. The memorialist was taken prisoner in the Valley of Wyoming at an early age, during the trials and difficulties to which the early settlers were subjected."

Her relatives are among the most worthy and meritorious of my constituents—they are my neighbors and friends; they searched after the captive with zealous and praiseworthy efforts and diligence, from the time of her capture until within a few years, and they have found her in the condition set forth in the memorial and report. The incidents set forth and connected with her eventful history would afford a beautiful theme for elucidation and remark.

But as debate is not now in order, I will not trespass on the indulgence and courtesy of the House. What I desire is not to make a speech, but to ask the unanimous consent of the Members for the immediate passage of the resolution.

If the resolution is sent to the Committee of the Whole I fear it will never be reached, and this earnest request of the memorialist will never be reached and granted.

The proposition is intended to extend to her as the widow of an Indian chief, the same privileges in relation to the payment of annuities due her and her family, and are provided for by treaty stipulation in regard to certain of the Miami chiefs.

Frances Slocum was taken from her white friends when a child. She is now desirous of dying among her red friends where she has lived for half a century, without being compelled to remove west of the Mississippi. Let her first and last request be granted.

The resolution then passed.

Then Mr. White, chairman of the Committee on Indian affairs, to whom it had been referred, made the following Senate committee report under date of February 21, 1845:

That the joint resolution provides for the payment in Indiana of the annuities due this family, instead of requiring them to receive payment with the Nation in the emigrant territory west of the Mississippi River. The reasons assigned are that former treaties have made similar provisions in favor of the other families of this Nation; that lands have been by treaty reserved to them in Indiana, to the personal enjoyment of which they have a right that cannot be embarrassed by requiring them to go west of the Mississippi for their annuities; and, thirdly, that the petitioner is by birth a white woman, who more than 40 years ago, in her infancy, was captured by the Indians, transferred to their country, lost her mother tongue, affiliated and intermarried with the Miamis, has by this marriage reared a large family of children (who are named in the joint resolution), but some 7 years ago was for the first time discovered by her white relations (who reside in Pennsylvania), whom she has refused to accompany because her whole nature has been changed by her strange destiny; and life out of the woods, and away from her husband and children, would have no charms. Yet these white relatives do frequently visit her, and minister to her wants, which they could not do if she were removed 600 miles to the west.

The committee cannot resist the force of these reasons, although in a conversation with General Milroy, the late intelligent agent of the Miamis, he expressed a fear that the adoption of the joint resolution might disincline other Miamis to remove to their new homes.

This case has such a thrilling interest, that the committee beg leave to append to their report the petition itself, with the letter of Mr. Cole that accompanied it.

They recommend that the resolution be adopted.

On the 3d of March 1845, the joint resolution passed.

So, by an act of Congress, Frances Slocum was allowed to stay in Indiana.

These are the significant facts of the case. Frances Slocum wanted to live in Indiana. She certainly wanted to be buried there. There is no other course than to have her reintered in a location close to her home. Let these people from Michigan, Ohio, Pennsylvania, and Rhode Island, who have so little claim to share the honor of Frances Slocum, accede to her own wishes with regard to her burial site. And let them join with us who seek to honor her memory further by establishing her new grave as a national monument.

I have heard several times lately a word or two of protest at establishing monuments at a cost to the Government during these trying times. Let me explain that this monument will cost the Government nothing extra. The Corps of Engineers are forced to move the grave and reestablish the monument at a new gravesite. In establishing the new grave as a national monument the Government actually gets more for its money. In fact, if plans can be worked out, we stand to save money, because there is a good chance that the land for her new grave can be donated. This is a very good possibility in either of the locations which I mentioned earlier.

I ask, then, that we honor the wishes of the White Indian Princess and direct that she be reinterred in a location close to her beloved home. And further, let us pay tribute to this lady who bridged the white and Indian civilizations and aided in the peaceful settlement of the Indiana territory. She is a symbol of the peaceful relations which developed with the Indians in so many areas. We see and hear so much of the violence associated with the settlement of the West and Midwest, especially since westerns became so popular on television. I think it is important that we take this opportunity to recognize Frances Slocum as a national symbol of the fine, peaceful pattern of living which developed between the great majority of Indians and their white settlers in early America.

The Week That Shook the World

EXTENSION OF REMARKS
OF
HON. ROMAN C. PUCINSKI
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 7, 1961

Mr. PUCINSKI. Mr. Speaker, recently the Columbia Broadcasting System, in its excellent Sunday afternoon telecast, "Twentieth Century," presented the American people a dramatic opportunity to view in detail the tragic events that preceded the beginning of World War II on September 1, 1939. This particular chapter of the "Twentieth Century," narrated in a most skillful manner by Mr. Walter Cronkite, was appropriately titled "The Week That Shook the World."

Here was television at its very best. The Columbia Broadcasting System deserves the highest commendation for bringing to the American people this graphic description of the various conferences, negotiations, and meetings between world leaders in an effort to dissuade Hitler from launching the barbaric attack on Poland in 1939.

The producers of this particular program, through the use of film clips of that tragic week in 1939 preceding the invasion of Poland by the Nazi Wehrmacht, gave millions of Americans an opportunity to understand fully the tragedy of appeasement. It was fitting that the Columbia Broadcasting System should have produced this particular program at this time when our own President and the entire free world is trying so desperately to chart a course which will preserve peace and retain the dignity of free men.

The Columbia Broadcasting System has demonstrated what a tremendous contribution television can make toward helping Americans understand the complex nature of the present world situation by providing this sobering reminder that the appeasement used by world leaders in 1939 only garnished the insatiable lust for conquest of power-crazed dictators of that era.

If the American people today are standing firmly behind President Kennedy in his determination to deal forcefully with Khrushchev, I am confident that this type of unity among our people has been greatly enhanced by realistic programs such as the one that the Columbia Broadcasting System produced.

We are living in an era that tries the strength and courage of men. If our Nation had been as thoroughly alerted to the dangers of appeasement in 1939 as our people are today—thanks to the contributions of information media as demonstrated by CBS—World War II might well have been avoided and the millions of people who died in that struggle might still be alive today.

This particular program, "The Week That Shook the World," so dramatically showed how the American people—the man in the street—were completely oblivious to what was going on in Europe and how Hitler's brutal destruction of nation after nation was laying the seeds for World War II.

I particularly congratulate the producers of this CBS telecast for using the film clips of average Americans who, with monotonous repetition, insisted that what was happening in Europe was of no concern to the United States and that America should stay aloof to foreign entanglements.

The Columbia Broadcasting System has helped us turn back the clock and today, in retrospect, realize why barbaric dictators like Hitler could sow their seeds of mass destruction while the free world slept in the security of its own local communities.

Watching this particular program in retrospect, we could at once understand why President Roosevelt's gallant plea for permission to stop the dictators of Europe before they started their harvest of death fell on deaf ears in this country. Here in this half-hour presentation, so excellently compiled by Columbia Broadcasting System, millions of Americans could at once understand how and why World War II occurred. But more important, Mr. Speaker, in this half-hour presentation, CBS helped weld this Nation together into a resolute determination that never again can we engage in blind appeasement.

If America stands ready to meet the great challenge of international communism, it is only because networks like the Columbia Broadcasting System have done such an excellent job in alerting our people to the mistakes of the past.

Here in Washington, D.C., within the shadow of this Capitol on Pennsylvania Avenue, stand two monuments in front of the National Archives Building. On one are inscribed the words: "What is past is prologue"; and on the other: "Study the past." By reaching into the past and presenting it in such dramatic manner to millions of Americans, the Columbia Broadcasting System, through its project, "Twentieth Century," is helping all of us Americans understand the genesis of war and the anatomy of destruction.

I am indeed proud that the Chicago affiliate of the Columbia Broadcasting System, television station WBBM, carried this and other programs of the "Twentieth Century" series. Here is television at its finest, and I hope that those who would be so quick to criticize and denounce American television would ponder the effect and results of efforts such as we see manifested in this particular CBS project.

I believe the Prudential Insurance Co., which sponsors this particular series, should be commended for playing such an important role in helping Americans better understand the complex world in which we now find ourselves. Here is a shining example of private enterprise in America playing its role toward a better understanding among Americans of the responsibilities that they must bear as free people, and through the medium of television reminding them that freedom is everybody's business.

Great civilizations have collapsed in the past, and freedom has been turned into slavery only because the people failed to contribute their own individual effort toward preserving their liberties by failing to understand the responsibilities of freedom.

I am confident that so long as we have media such as the Columbia Broadcasting System and sponsors who are willing to underwrite programs such as "Twentieth Century," our people will be kept fully aware that they can enjoy freedom only so long as they are willing to defend it.

The House Vote on the Conference Committee Report Containing the So-Called Hanford Compromise Is Scheduled for Wednesday, September 13, 1961

EXTENSION OF REMARKS
OF
HON. JAMES E. VAN ZANDT
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 7, 1961

Mr. VAN ZANDT. Mr. Speaker, I wish to call attention to the House schedule for next week, which includes consideration of the conference committee report on the Atomic Energy Commission authorization bill. It is important that every Member of the House who voted to instruct conferees to delete the Hanford electric power provision from that bill, and all other Members in sympathy with this position, be present when this legislation comes to the floor.

I am certain that some of my colleagues are discouraged at the long delay incident to the handling of this legislation. The growing resentment at the way in which it has been batted about is quite understandable.

After having deleted the Hanford powerplant provision from the Joint Committee bill, the House found it necessary to take the unusual step of instructing its delegates following the Senate's reinsertion of the provision. If you will recall, the motion to instruct conferees to delete the project carried by 235 to 164, a majority which one might assume would be adequate to notify our friends in the Senate that we are unqualifiedly opposed to the project.

If proponents of this measure are of the opinion that Hanford will become more palatable as this session nears to a close, it is my opinion that they are in for a big surprise. There is not going to be any flexibility on a matter of such importance to the national welfare.

Actually, by dragging out final action, proponents may very well be building up greater opposition to their project. While the bill is collied across the Capitol, tension mounts in Berlin. Anyone who might have had a tendency to be apathetic about the international crisis heretofore is now getting his daily jolts from newspaper headlines. As the gravity of the situation comes into focus, ap-

peals for junk projects that would deprive the defense structure of necessary funds have far less chance of reaching sympathetic ears. The Hanford generating station has no place in the defense program. There is absolutely no room for it in the national budget.

Just to keep the record straight, I want to notify my colleagues that, while this legislative breakdown has been persisting, the case against the Hanford powerplant has been building up among those who suffer most from it. I refer to representatives of the coal industry and residents of mining communities as well as regions throughout the country which would be placed in an unfair competitive position in area development work. The coal industry—the National Coal Association, the United Mine Workers of America, coal company officials, and members of families who depend upon this industry for their livelihood—these groups have worked tirelessly in opposition to the threat of subsidized heat and power that would eventually take bread and butter from the people who help pay the tax bills.

In reply to an erroneous published report that miners in the Northwest were not aware that a Hanford powerplant would take away their jobs or remove whatever chances they have of getting back to work, Sam Nicholls, president of District 10, UMWA, sent a letter to Members of Congress, a copy of which follows:

UNITED MINE WORKERS OF AMERICA,
Renton, Wash., September 1, 1961.

Hon. Catherine May, and Other Congressmen and Congresswomen, and Senators:

I read in the House CONGRESSIONAL RECORD that you, Congresswoman CATHERINE MAY, asked consent to have printed in the House RECORD, an editorial from the Tri-City Herald of Pasco, Wash., on August 21, as follows: "Coal Industry Bites Hand That Feeds It," stating also that neither private power nor coal mining interests from the Northwest, were in opposition to the Hanford, Wash., dual reactor and only the Eastern States were in opposition.

This editorial was not correct in its statement, for the officers and members of the United Mine Workers, District No. 10, State of Washington, and their international officers, have made known their opposition to the Senators HENRY JACKSON and WARREN G. MAGNUSON, both by telegrams and letters, and the United Mine Workers Journal. The United Mine Workers of this State are opposed to this dual reactor at Hanford as we believe the reactor is a threat to the welfare of the coal industry and the continuance of coal mining in the Pacific Northwest, and this project is a waste of taxpayers' money.

The Bonneville Power Authority have a power surplus of nonsalable hydroelectric power, and are now losing millions of dollars a year, and they are still building hydroelectric dams. This surplus power could be firmed up and sold by using the millions of tons of coal that we have in this State and open up the depressed mining areas and put the unemployed miners, railroad men, and truckers, to work. We fail to see any help for the coal industry by placing such high cost project in a State that has the cheapest power in the United States and has millions of tons of coal, and hundreds of experienced miners unemployed.

This reactor is a very high cost power provided for by Government subsidies. It will produce 800,000 kilowatts of power a year, this is equivalent of over 2 million tons of coal a year, this production of coal would be a great help for this State. At one time King Coal was a major industry of this State, and for years it has been necessary for the coal industry to fight for an existence, against out of State and foreign Canadian oils and natural gas. We feel that our elected Congressmen and Congresswomen and Senators should help us to build the economic conditions of this State, and help open up our coal mines and put the unemployed to work. We are also opposed to the compromised bill to be offered to the House. This would provide for 400,000 kilowatts of power for Bonneville public power system by releasing the power now used by Hanford and used in other industries.

Yours very truly,
SAM NICHOLLS,
President, District No. 10.

Nor has the coal industry been lulled into believing that cutting the Hanford capacity in half, as proposed in the conference committee report, would lessen the economic danger. Stephen F. Dunn, president of the National Coal Association, expressed the coal industry position on the compromise in the following letter sent to me after the conferees' action last week:

NATIONAL COAL ASSOCIATION,
September 1, 1961.

Re Hanford compromise.
Hon. JAMES E. VAN ZANDT,
U.S. House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN VAN ZANDT: Last Thursday the Senate and House conferees adopted a so-called compromise in connection with consideration of the AEC authorization bill (H.R. 7576) by recommending one 400,000 kilowatt generator at Hanford instead of two. This was agreed upon by the House conferees notwithstanding the specific House instructions to exclude Hanford by a vote of 235 to 164 on August 8.

The purpose of this note is to express the hope that you will stand by your previous vote against Hanford and will not accept the so-called compromise which would reduce the project by half. Of course it is impossible to compromise with principle and our view is that the proposal actually constitutes approval of an unnecessary public power project at Hanford on the installment plan basis.

We appreciate the position you have taken in the successive votes against Hanford and hope that you will find that the compromise is unacceptable when the conference report is presented for House consideration.

Sincerely,
NATIONAL COAL ASSOCIATION,
STEPHEN F. DUNN,
President.

No, Mr. Speaker, none of us who has a basic interest in a free competitive economy is going to back down on this issue. The strategy of bringing this $58 million package before us is actually ludicrous. A generating station at Hanford is unacceptable regardless of its size. But no one who has had any experience with the operations of a bureaucracy would be so credulous as to believe that proponents of Hanford would be satisfied to stop there. This unit is only a part of one of the most unnecessary and extravagant programs ever conceived by the Government.

The plan is already in operation. The Secretary of the Interior yesterday announced the appointment of a community of 26 leaders in Pacific Northwest economic development to work with the Bonneville Power Administration in connection with a 2-year study of basic resources and potential industrial growth. Here is what the BPA administrators had to say about this study:

"Predicted expansion in basic industries will provide a means of estimating growth in production, employment, and population of the region, as well as future power needs so intelligent plans can be made to meet future requirements," Luce pointed out.

"Pooling of all available information on a regional basis," Luce stated, "will supplement present information gathered by State and local organizations and also make possible an expanded and coordinated development effort by the individual States."

Now, Mr. Speaker, there is not a Member of Congress who does not admire the ambition and diligence of our many civic, business, and labor leaders who devote considerable time and effort toward attracting new plants and factories. We want the Northwest to prosper, just as we hope the rest of the Nation will prosper. The area development program has created a new concept of competition among our States and localities. It is a healthy sign. It develops ingenuity and has even been responsible for entire new lines of consumer goods. It is bringing for general consumption many products that not long ago were so expensive that only the highest income families could afford them.

The State of Pennsylvania and the congressional district which I represent have invested years of time and millions of dollars trying to lure new industry. The anthracite region, while still far from normal, would be in much worse condition economically were it not for the foresight and devotion of residents who recognize the value of redevelopment programs.

Philipsburg, Bellefonte, State College, Clearfield, Du Bois, Altoona—these and a score of other communities within my constituency are making every sacrifice to attract new industry. Electric power is one of our basic attractions because of our abundant coal reserves, and because the coal and electric industries have employed research and development programs to keep costs down. We look to these commodities to grow in importance as this age of power, which we have entered comparatively recently, moves into high gear—where more and more homes are electrically heated and electrically cooled, and where a multitude of electrically controlled devices will increase our standard of living.

We cannot look forward to the substantial improvement of the economy of our districts if competition is going to come from areas which can outbargin us because their electric power is subsidized by the Federal Government. We are never going to get out of our own end zone if the weight of the Federal Government is used to reinforce our opposition.

I appeal to you to run this game on a fair set of rules. For the protection of your district and mine, I urge you to be ready to join with us in sending the conference report—indelibly stamped "unsatisfactory"—back to committee next week. I shall keep you informed of the time schedule as closely as possible.

Why Should Federal Funds Be Used To Help Make Possible the Building of $325-a-Month Luxury Apartments in Federally Assisted Urban Renewal Projects Which Have as Their Purpose the Rehousing of Slum Dwellers?

EXTENSION OF REMARKS
OF
HON. CARROLL D. KEARNS
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 7, 1961

Mr. KEARNS. Mr. Speaker, why should Federal funds be used to provide $325-a-month luxury apartments in federally assisted urban renewal projects which have as their purpose the rehousing of slum dwellers?

The Washington (D.C.) Post reports today, September 7, that the contest-winning design for residential development of an 8.4-acre urban renewal site in southwest Washington will provide rental apartments from $120 to $325 a month.

The Congress has provided nearly $70 million for the southwest urban renewal project, and has further sweetened the project with a number of Federal office buildings, without which the project would not even have been started.

I am indeed touched by the concern of this administration for the poor and the underprivileged, but how can a slum dweller afford a $325-a-month apartment even under the Democrats?

I am, of course, interested to know that the President and his administration is moving so decisively to rid the Nation's Capital of noisome slums and to build in their place $325-a-month luxury apartments to rehouse the slum dwellers who lived in those slums.

Of course, if it should turn out that the slum dwellers who formerly lived in the southwest urban renewal project area have simply moved to new slum areas in other parts of the city in these New Frontier days then the poor downtrodden taxpayer should not be condemned if he were to feel as bilked as the slum dweller.

He would be justified in objecting to the use of his tax money to provide $325-a-month luxury apartments for people who, if they are able to pay that much money in rent each month, should be able—even in the Nation's Capital—to find suitable living quarters in privately financed apartment houses.

Several of my colleagues have joined me in introducing legislation to provide for the protection of residential and business realty which is not substandard and which is held by homeowners and small businessmen in urban renewal project areas in the District of Columbia, to encourage and assist private owners of commercial and residential realty to undertake the renovation and modernization of such realty, thereby reducing the necessity for huge expenditures for publicly supported urban renewal programs.

That this new, far less costly, and much more human approach to urban renewal is not a partisan matter is shown by the fact that I have been joined in its sponsorship by the brilliant, courageous and distinguished gentlemen from New York [Mr. MULTER], Delaware [Mr. McDOWELL], and Iowa [Mr. KYL].

I invite all of my colleagues, who are really concerned with the mounting and unjustified expense of urban renewal in the Nation's Capital—which has been estimated to cost more than $400 million under present and projected programs—to help save this vast amount of Federal funds by introducing legislation similar to my House Joint Resolution 532, the text of which is included along with the text of the Washington (D.C.) Post article to which I referred earlier in my remarks:

[From the Washington Post, Thursday, Sept. 7, 1961]

WINNING BUILDING DESIGN IN SOUTHWEST WASHINGTON UNVEILED BY REDEVELOPMENT LAND AGENCY

(By Morton Mintz)

The contest-winning design for residential development of an 8.4-acre site in southwest Washington was unveiled and approved by the Redevelopment Land Agency yesterday.

The design was prepared by the Washington architectural firm of Keyes, Lethbridge & Condon. One of 11 entries in an RLA-sponsored competition, it won the unanimous acclaim of a panel of five famed architectural and planning critics.

FOUR 9-STORY TOWERS

The design calls for construction of 384 apartments in four 9-story towers and 86 row houses on the Area C site bounded by the proposed Washington channel waterfront park and M, N, and Fourth Streets SW.

The land, which has been cleared of blighted buildings, is valued at more than $1.1 million. Construction will cost an estimated $8.6 million.

The design was prepared for the Tiber Island Corp., the development firm which was formed by the W. C. & A. N. Miller Development Co., Berens Real Estate Development Corp., and Frederick W. Berens, Inc.

RLA Executive Director John R. Searles, Jr. said the developer could begin construction within 4 months and complete it 13 months later—in February 1963.

PRICED UP TO $32,500

The contemplated range of rentals for the apartments—efficiencies and one- and two-bedroom units—is $120 to $325 a month. A decision has not been made whether the row houses will be sold, but the projected sales prices range from $22,500 to $32,500.

The row houses, grouped in four quadrants of the site, will be connected to the elevator buildings by covered walks and arranged around small landscaped courts. In the center of the project will be a large paved square. Under it will be a 260-car, two-story garage.

The RLA set the land price at $3.10 per square foot. In 1953 real estate tax revenues from the site totaled $9,800. After redevelopment, they will amount to $161,000.

The architectural review panel consisted of Louis Justement, Washington; Jacob L. Crane, Annapolis; Carl Koch and Hideo Sasaki, both of Cambridge, Mass., and G. Holmes Perkins, Philadelphia.

In its report recommending the Keyes, Lethbridge & Condon design, the panel said it is the only one of the submissions that would be wholeheartedly accepted by a majority of the panel.

"The panel was most favorably impressed by the relationship of the main building masses with the approved projects to the north (the Town Center commercial and residential development) and south (the Harbor Square residential project) and with the relationship to the waterfront."

Searles said that the panel's decision was concurred in by the RLA staff, the Federal Housing and Home Finance Agency, the National Capital Planning Commission, and the District Department of Licenses and Inspections.

H.J. RES. 532

Joint resolution to provide for the protection of residential and business realty which is not substandard and which is held by homeowners and small businessmen in urban renewal project areas in the District of Columbia, to encourage and assist private owners of commercial and residential realty to undertake the renovation and modernization of such realty, thereby reducing the necessity for huge expenditures for publicly supported urban renewal programs, and for other purposes

Whereas the President has asked the Congress to give industry tax abatements of up to $1,700,000,000 as an incentive to modernizing plant and equipment to keep them competitive with rivals in Europe and Japan; and

Whereas American cities and their residential and commercial areas are deteriorating further and faster than factory plant and equipment, even though these are just as much a part of the economic capital of the Nation as are factories; and

Whereas instead of giving tax rebates or otherwise providing incentives for modernizing residential and commercial structures in slum areas, most cities increase taxes on property that has been improved, and a slumlord who buys property and lets it deteriorate is benefited by being given depreciation allowances while a property owner who maintains and improves his property is penalized by tax increases; and

Whereas such publications as the Christian Science Monitor and House and Home and Look magazines have pointed out that today's taxes make misuse of land more profitable than good use and that slums are subsidized by undertaxation while developments are penalized by overtaxation and speculators are subsidized by public improvements for private profit; and

Whereas some Scandinavian and Caribbean countries, as well as France and Italy, put higher taxes on land to encourage people to use it for productive purposes instead of speculation; and Australia and New Zealand lighten taxes to encourage home and private improvements, and have made land cheaper and have removed tax penalties for improvements; and

Whereas the repair, improvement, renovation, and restoration of residential and commercial property by the owners of such property should be encouraged by all means and should not be penalized by higher taxes; and

Whereas such publications as Life magazine have declared editorially that "The housing problem requires many different solutions; but the roles of the bulldozer, the big project, and the professional 'housers' have long been overdone" and have called for tax reforms, better incentives for private landlords, and easier credit for rehabilitation; and

Whereas studies by the American Council To Improve Our Neighborhoods, the Citizens Housing and Planning Council of New York, and other groups, both private and public, have documented the fact that rehabilitation of basically sound structures is usually less costly than new construction on the same site; and

Whereas such publications as the Saturday Evening Post have editorially declared that the Teapot Dome scandal of the 1960's may turn out to be the urban renewal program, and that in "cities from coast to coast, areas of historic interest, pleasing architecture, and gracious living are being condemned as 'substandard, blighted, deteriorating' or plain 'slum' "; and

Whereas destruction of many fine homes, as well as homes which should have been salvaged, has already taken place in the southwest urban renewal project area in the District of Columbia; and a study commissioned by the National Conference of Catholic Charities declares that urban renewal in southwest Washington has not met the clear purpose of the Federal urban renewal program, that responsible civic opposition was not honestly accommodated, that undue pressure was exerted by experts with a vast knowledge of ways and means of bypassing those whose interests and vision extended beyond the immediate project into which concrete could be poured, and concluded that "our shining new cities cannot and must not be built on the suffering of our less fortunate citizens"; and

Whereas the Washington Real Estate Board of the District of Columbia has declared that more than seventeen thousand families—perhaps as many as eighty-five thousand persons—may be removed from their homes in the next five years by urban renewal and highway construction programs, that such programs should be moderated and appraised from a humanitarian aspect, and has called for the creation of an office in the District of Columbia government charged with the responsibility of keeping displacement activity in tune with availability of adequate shelter, and has further recommended that the Board of Commissioners of the District of Columbia should issue a rule requiring "agencies causing displacement to certify that adequate shelter is available to displacees prior to the time when these agencies move in with their bulldozers"; and

Whereas $325-a-month luxury apartments should have no place in urban renewal programs in the District of Columbia designed to rehouse slum dwellers, and individual homeowners and businessmen in the District of Columbia have successfully reclaimed, at no cost to the Federal Government, such areas as Georgetown, Foggy Bottom, Kalorama Triangle, Lanier Heights, Mount Pleasant Village, and Capitol Hill from decay and obsolescence thereby saving the taxpayers many millions of dollars for urban renewal programs which would have, otherwise, had to be undertaken by the District of Columbia Redevelopment Land Agency; and

Whereas, in spite of widespread citizen dissatisfaction expressed by organizations of citizens such as the Kalorama Citizens Association, and the Lanier Place Protective Association, as well as by individuals and groups deeply concerned with the preservation and restoration of commercial and residential realty, officials have refused to change the Adams-Morgan urban renewal plan which declares that the Kalorama Triangle area, Crescent Place, and Lanier Place in the northwest section of the District of Columbia are "blighted", even though they are generally recognized as among the finer residential areas of the Nation's Capital, and proposes to clear Lanier Place to establish a parking area, and on the basis of such haphazard planning by officials charged with urban renewal functions in the District of Columbia the Housing and Home Finance Agency has already approved an application for Federal planning advance funds and has made a capital grant of more than $460,000, a glaring example of the inappropriate use of some of the funds made available for urban renewal: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 6 of the Act of August 14, 1894 (D.C. Code, sec. 47–705), is amended by inserting "(a)" after "SEC. 6.", and by adding at the end thereof the following new subsection:

"(b) Notwithstanding any other provision of law, any increase in the value of the tract or lot of real property, on which the taxpayer's personal residence is located (or of the improvements thereon) which is the result of the repair, alteration, renovation, or restoration of such residence shall be disregarded in making the valuation of the property under subsection (a) for the fiscal year in which such repair, alteration, renovation, or restoration is completed and for the four succeeding fiscal years. As used in the preceding sentence, the term 'taxpayer's personal residence' means real property which is owned by the taxpayer or his spouse or both at the time of the repair, alteration, renovation, or restoration involved and is occupied by them or either of them as their personal residence at such time or within six months thereafter."

(b) The amendments made by subsection (a) shall apply only with respect to repairs, alterations, renovation, and restoration completed in fiscal years ending after the date of the enactment of this Act.

SEC. 2. (a) Section 3(a) of title III of the District of Columbia Income and Franchise Tax Act of 1947 (D.C. Code, sec. 47–1557b (a)) is hereby amended by adding at the end thereof the following new paragraph:

"(16) EXPENSES OF HOME REPAIR MAINTENANCE, ALTERATIONS, AND ADDITIONS.—In the case of an individual, the expenses paid during the taxable year for the repair and maintenance of, or alterations or additions to, the personal residence of the taxpayer. The deduction under this paragraph shall be allowable only to the extent of the aggregate of such expenses actually paid by the taxpayer, and in no case shall it exceed $2,000. Such deduction shall be applicable only to expenses which are not otherwise allowable as deductions in computing net income under section 1 of this title. As used in this paragraph, the term 'personal residence of the taxpayer' means real property which is owned by the taxpayer or his spouse or both at the time of the repair, maintenance, alterations, or additions involved and is occupied by them or either of them as their personal residence at such time or within six months thereafter."

(b) The amendment made by subsection (a) shall apply only with respect to expenses paid during taxable years beginning after the date of the enactment of this Act.

SEC. 3. Section 7 of the District of Columbia Redevelopment Act of 1945 (D.C. Code, sec. 5–706) is hereby amended by adding at the end thereof the following new subsection:

"(j) Notwithstanding any other provision of this Act—

"(1) structures (including both residential and commercial structures) which are not substandard in any project area shall be preserved and shall not be demolished or included in the acquisition and assembling by the Agency of the real property in such area; and

"(2) the owner of any substandard structure (residential or commercial) which can be rehabilitated or restored to good condition in a project area shall be encouraged and assisted by the Agency to undertake and carry out such rehabilitation or restoration, and such structure shall not be demolished or included in the acquisition and assembling by the Agency of the real property in such area unless such owner, after having had a reasonable time following notification by the Agency to complete such rehabilitation or restoration, has failed to do so; and in the case of any such failure the Agency, after acquiring the structure, shall itself provide for such rehabilitation or restoration whenever it determines that such rehabilitation or restoration is desirable or appropriate and shall dispose of the structure so rehabilitated or restored at such time and on such terms and conditions as it may determine to be in the public interest."

SEC. 4. The Act entitled "An Act providing for the zoning of the District of Columbia and the regulation of the location, height, bulk, and uses of buildings and other structures and of the uses of land in the District of Columbia, and for other purposes", approved June 20, 1938, as amended (D.C. Code, sec. 5–413 et seq.), is amended by redesignating section 17 as section 18 and by inserting after section 16 the following new section:

"SEC. 17. The provisions of this Act shall apply to chanceries and other business-type buildings of foreign nations in the District of Columbia, so as to conform with the general practice among nations of requiring the observance (by countries with which they maintain diplomatic relations) of their laws and zoning regulations in the location of such buildings; and the Zoning Commission shall accordingly include in its regulations under the first section of this Act such provisions as may be necessary to insure that such buildings are hereafter located only in areas appropriately zoned for such purposes."

SENATE

FRIDAY, SEPTEMBER 8, 1961

The Senate met at 10 o'clock a.m., and was called to order by the Vice President.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

O Thou God of life and light, we pray that Thou wilt enable, with the strength of Thy might, those who in these fear-haunted times are here entrusted with the stewardship of the Nation's life.

In all their words and actions in this Chamber help them to remember that we are a part of the past, of the present, and of the future.

It is our honor to belong to all those who in the yesterdays condemned oppression and fought the good fight for freedom. In the present we feel our kinship with those who, across all frontiers and borders, and despising all shackles of the mind, however imposed, strive to enthrone the brotherhood of man under the fatherhood of God.

As by that faith we live, may those who here speak for America sow the seeds of a golden harvest for all mankind in a peaceful world that beckons.

In the Redeemer's name we ask it. Amen.

THE JOURNAL

On request of Mr. HICKEY, and by unanimous consent, the reading of the Journal of the proceedings of Thursday, September 7, 1961, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nomina-

tions were communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed the bill (S. 2237) to permit the entry of certain eligible alien orphans, with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House had agreed to the concurrent resolution (S. Con. Res. 14) saluting "Uncle Sam" Wilson, of Troy, N.Y., as the progenitor of America's national symbol of "Uncle Sam," with amendments, in which it requested the concurrence of the Senate.

The message further announced that the House had passed the following bills and joint resolution, in which it requested the concurrence of the Senate:

H.R. 7692. An act to amend the Tariff Act of 1930 to require certain new packages of imported articles to be marked to indicate the country of origin, and for other purposes;

H.R. 8876. An act to amend the Internal Revenue Code of 1954 to permit the use of identifying numbers; and

H.J. Res. 558. Joint resolution providing for printing copies of "Cannon's Procedure in the House of Representatives."

The message also announced that the House had agreed to the following concurrent resolutions, in which it requested the concurrence of the Senate:

H. Con Res. 12. Concurrent resolution authorizing the printing of additional copies of House Document No. 412, 85th Congress;

H. Con. Res. 364. Concurrent resolution to print as a House document the publication "World Communist Movement—Selective Chronology 1818–1957. Volume 1," and to provide for the printing of additional copies;

H. Con. Res. 384. Concurrent resolution authorizing the printing of additional copies of the report "Communist Target—Youth—Communist Infiltration and Agitation Tactics"; and

H. Con. Res. 385. Concurrent resolution authorizing the printing of a manuscript entitled "History of the House of Representatives."

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following bills and joint resolution were severally read twice by their titles and referred as indicated:

H.R. 7692. An act to amend the Tariff Act of 1930 to require certain new packages of imported articles to be marked to indicate the country of origin, and for other purposes; and

H.R. 8876. An act to amend the Internal Revenue Code of 1954 to permit the use of identifying numbers; to the Committee on Finance.

H.J. Res. 558. Joint resolution providing for printing copies of "Cannon's Procedure in the House of Representatives"; to the Committee on Rules and Administration.

HOUSE CONCURRENT RESOLUTIONS REFERRED

The concurrent resolution (H. Con. Res. 12) authorizing the printing of additional copies of House Document 412, Eighty-fifth Congress, was referred to the Committee on Rules and Administration, as follows:

Resolved by the House of Representatives (the Senate concurring), That there shall be printed for the use of the House of Representatives five hundred thousand additional copies of House Document Numbered 412, Eighty-fifth Congress, second session, with emendations.

The concurrent resolution (H. Con. Res. 364) to print as a House document the publication "World Communist Movement—Selective Chronology 1818–1957, Volume 1," and to provide for the printing of additional copies, was referred to the Committee on Rules and Administration, as follows:

Resolved by the House of Representatives (the Senate concurring), That the publication entitled "World Communist Movement—Selective Chronology 1818–1957, Volume 1," released by the Committee on Un-American Activities, House of Representatives, Eighty-sixth Congress, second session, be printed as a House document; and that there be printed for the use of said committee fifteen thousand additional copies of said document.

The concurrent resolution (H. Con. Res. 384) authorizing the printing of additional copies of the report "Communist Target—Youth—Communist Infiltration and Agitation Tactics," was referred to the Committee on Rules and Administration, as follows:

Resolved by the House of Representatives (the Senate concurring), That there be printed for the use of the Committee on Un-American Activities one hundred thousand additional copies of the report "Communist Target—Youth—Communist Infiltration and Agitation Tactics", Eighty-sixth Congress, second session.

The concurrent resolution (H. Con. Res. 385) authorizing the printing of a manuscript entitled "History of the House of Representatives," was referred to the Committee on Rules and Administration, as follows:

Resolved by the House of Representatives (the Senate concurring), That the manuscript entitled "History of the House of Representatives", by George B. Galloway, be printed under the supervision of the Committee on House Administration as a House document, and that there be printed two thousand additional copies for the use of the House of Representatives.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. HICKEY. Mr. President, under the rule, there will be the usual morning hour for the transaction of routine business. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

Is there morning business?

Mr. HICKEY. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. HICKEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. HICKEY. Mr. President, I ask unanimous consent that the Subcommittee on Flood Control, Rivers, and Harbors of the Senate Committee on Public Works be permitted to sit during the session of the Senate today. This has been approved by the minority.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. HICKEY. Mr. President, I ask unanimous consent that the Constitutional Amendments Subcommittee of the Committee on the Judiciary be permitted to sit during the session of the Senate today. This also has been approved.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. HICKEY. Mr. President, I ask unanimous consent that the Committee on Interior and Insular Affairs be permitted to sit during the session of the Senate today.

Mr. WILLIAMS of Delaware. Mr. President, this request has not been approved, and by request I object.

The VICE PRESIDENT. The Senator objects to the meeting of the Committee on Interior and Insular Affairs.

Mr. HICKEY. Mr. President, I ask unanimous consent that the Judiciary Committee be permitted to sit during the session of the Senate today to consider an immigration matter and nominations.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

EXECUTIVE SESSION

Mr. HICKEY. Mr. President, I move that the Senate proceed to the consideration of executive business, to consider the nominations on the Executive Calendar, beginning with the new reports.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGES REFERRED

The VICE PRESIDENT laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF COMMITTEES

The following favorable reports of nominations were submitted:

By Mr. HILL, from the Committee on Labor and Public Welfare:

Harold C. Woodworth, and sundry other candidates, for personnel action in the Regular Corps of the Public Health Service.

By Mr. JOHNSTON, from the Committee on the Judiciary:

James Robert Martin, Jr., of South Carolina, to be U.S. district judge for the eastern and western districts of South Carolina; and

David W. Dyer, of Florida, to be U.S. district judge for the southern district of Florida.

By Mr. KERR, from the Committee on Public Works:

Col. Arthur H. Frye, Jr., Corps of Engineers, to be president and senior member of the California Debris Commission.

The VICE PRESIDENT. If there be no further reports of committees, the nominations on the Executive Calendar, beginning with the new reports, will be stated.

U.S. ATTORNEY

The Chief Clerk read the nomination of H. Moody Brickett, of Montana, to be U.S. attorney for the district of Montana for a term of 4 years.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

U.S. DISTRICT JUDGES

The Chief Clerk read the nomination of Albert Lee Stephens, Jr., of California, to be U.S. district judge for the southern district of California.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

The Chief Clerk read the nomination of Raymond E. Plummer, of Alaska, to be U.S. district judge for the district of Alaska.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

The Chief Clerk read the nomination of William H. Becker, or Missouri, to be U.S. district judge for the western district of Missouri.

Mr. LONG of Missouri. Mr. President, President Kennedy has pledged that he would appoint to the Federal bench the most able and best qualified men. He has without question fulfilled this pledge in his appointment of Mr. William Becker to be Federal district judge for the western district of Missouri.

Mr. Becker is one of the most able trial lawyers in the State of Missouri, indeed, in the United States. He is one of our Nation's foremost authorities on trial procedures. The Supreme Court of Missouri named him as chairman of the special committee to draft the rules of procedure which were adopted and became effective in Missouri on April 1, 1960. He presently is a member of the pretrial practices committee appointed by the U.S. Eighth Circuit Court of Appeals.

Mr. Becker graduated from the University of Missouri Law School in 1932 at the head of his class and was made a member of the Order of Coif. In the same year, he was admitted to the Missouri bar. In 1937, he was admitted to the Supreme Court of the United States and argued his first case before that Court in 1939. He served on the board of governors of the Missouri bar from 1954 to 1959. He has served as chairman of several of the committees of the Missouri bar.

Mr. Becker's extensive experience in the law, particularly in the courtroom, well qualifies him for the position of district judge. I have known Bill Becker for many years and am confident that he will render outstanding service to the Nation. The President is to be commended for this selection and I urge the Senate to confirm this nomination.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

Mr. HICKEY. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The VICE PRESIDENT. Without objection, the President will be notified forthwith.

LEGISLATIVE SESSION

Mr. HICKEY. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

Mr. HICKEY. Mr. President, is there morning business?

The VICE PRESIDENT. Is there morning business? If not, morning business is closed.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following letters, which were referred as indicated:

REPORT ON CONSTRUCTION OF TELESCOPE AT THE UNIVERSITY OF TEXAS, AUSTIN, TEX.

A letter from the Administrator, National Aeronautics and Space Administration, Washington, D.C., reporting, pursuant to law, on the construction of a 16-foot telescope at the University of Texas, Austin, Tex.; to the Committee on Aeronautical and Space Sciences.

REPORT ON RESEARCH AND DEVELOPMENT PROCUREMENT ACTIONS, U.S. NAVY

A letter from the Chief of Naval Material, Washington, D.C., transmitting, pursuant to law, a report on research and development procurement actions of $50,000 and over, covering the period January 1 through June 30, 1961 (with an accompanying report); to the Committee on Armed Services.

PUBLICATION OF NOTICE OF PROPOSED DISPOSITION OF CERTAIN CASTOR OIL

A letter from the Administrator, General Services Administration, Washington, D.C., transmitting, pursuant to law, a copy of a notice to be published in the Federal Register of a proposed disposition of approximately 155,676,000 pounds of castor oil now held in the national stockpile (with an accompanying paper); to the Committee on Armed Services.

PAYMENT OF CERTAIN CLAIMS PRESENTED BY GOVERNMENT OF THE POLISH PEOPLE'S REPUBLIC

A letter from the Secretary of State, transmitting a draft of proposed legislation to authorize the Secretary of the Treasury to effect the payment of certain claims presented by the Government of the Polish People's Republic against the United States (with accompanying papers); to the Committee on Foreign Relations.

REPORT ON REVIEW OF SELECTED ACTIVITIES OF FEDERAL-AID HIGHWAY PROGRAM IN STATES OF MAINE, NEW HAMPSHIRE, AND VERMONT

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of selected activities of the Federal-aid highway program in the States of Maine, New Hampshire, and Vermont, Bureau of Public Roads, Department of Commerce, dated August 1961 (with an accompanying report); to the Committee on Government Operations.

AUDIT REPORT ON HELIUM OPERATIONS OF THE BUREAU OF MINES

A letter from the Assistant Comptroller General of the United States, transmitting, pursuant to law, an audit report on helium operations of the Bureau of Mines, Department of the Interior, March 31, 1960 (with an accompanying report); to the Committee on Government Operations.

BACK PAY ACT OF 1961

A letter from the Chairman, U.S. Civil Service Commission, transmitting a draft of proposed legislation to provide for the payment of compensation and restoration of employment benefits to certain Federal officers and employees improperly deprived thereof, and for other purposes (with accompanying papers); to the Committee on Post Office and Civil Service.

PROCEEDINGS OF 40TH MEETING OF CONVENTION OF AMERICAN INSTRUCTORS OF THE DEAF

A letter from the president, Gallaudet College, Washington, D.C., transmitting, pursuant to law, a copy of the proceedings of the 40th meeting of the American Instructors of the Deaf, held at Oregon School for the Deaf, Salem, Oreg., June 25–30, 1961 (with an accompanying document); to the Committee on Rules and Administration.

DISPOSITION OF EXECUTIVE PAPERS

A letter from the Administrator, General Services Administration, Washington, D.C., transmitting, pursuant to law, a report of the Archivist of the United States on a list of papers and documents on the files of several departments and agencies of the Government which are not needed in the conduct of business and have no permanent value or historical interest, and requesting action looking to their disposition (with accompanying papers); to a Joint Select Committee on the Disposition of Papers in the Executive Departments.

The VICE PRESIDENT appointed Mr. JOHNSTON and Mr. CARLSON members of the committee on the part of the Senate.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the VICE PRESIDENT:

A resolution adopted by the 27th biennial supreme convention of the Order Sons of Italy in America, at Washington, D.C., relating to certain amendments of the Immigration and Naturalization Act; to the Committee on the Judiciary.

A resolution adopted by the National Baptist Convention of America, Inc., at Kansas City, Mo., favoring the enactment of House Joint Resolution 110, for commemoration of the work of Dr. George Washington Carver; to the Committee on the Judiciary.

DELAWARE RIVER BASIN COMPACT—RESOLUTION

Mr. JAVITS. Mr. President, I present a resolution adopted by the Regional Chamber of Commerce Council, of Middletown, N.Y., relating to the Delaware River Basin compact. I ask unanimous consent that the resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION ON DELAWARE RIVER BASIN

Whereas the people of the Delaware River Basin need the assurance that the Government will provide protection so that a flood

like that of 1955 should never happen again; and

Whereas the growing need for water is evident from the population explosion predicted in the immediate future in the river basin and in the cooperating metropolitan areas; and

Whereas the industrial expansion along the Delaware has been hampered by the salination of the lower reaches of the Delaware, which the basin program will eliminate; and

Whereas the recent studies of the Delaware River Basin have provided for national park sites bordering the Tocks Island Dam Reservoir, which would, it is expected, bring some 7 million people to the tri-States area during the summer months; and

Whereas the Regional Chamber of Commerce Council, composed of chambers of commerce in and bordering the area favor the compact and its many ramifications, we urge your support of the Delaware River Basin project which will aid the economic expansion and development of an area in which you and the council are most vitally interested.

Sincerely yours,

REGIONAL CHAMBER OF COMMERCE COUNCIL,
RALPH C. FREDERICK,
Basin Study Chairman.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. EASTLAND, from the Committee on Agriculture and Forestry, without amendment:

H.R. 4682. An act to authorize the Secretary of Agriculture to sell and convey certain lands in the State of Iowa (Rept. No. 905); and

H.R. 6193. An act to authorize the Secretary of Agriculture to convey certain lands in the State of Wyoming to the county of Fremont, Wyo. (Rept. No. 904).

By Mr. JORDAN, from the Committee on Agriculture and Forestry, without amendment:

H.R. 3879. An act to authorize and direct the Secretary of Agriculture to convey to the State of Wyoming for agricultural purposes certain real property in Sweetwater County, Wyo. (Rept. No. 906); and

H.R. 3920. An act to authorize an exchange of land at the Agricultural Research Center (Rept. No. 907).

By Mr. JOHNSTON, from the Committee on Post Office and Civil Service, with an amendment:

S. 188. A bill to grant civil service employees retirement after 30 years' service (Rept. No. 909).

By Mr. YARBOROUGH, from the Committee on Post Office and Civil Service, without amendment:

H.R. 2555. An act to authorize pay with respect to civilian employees of the United States in cases of emergency evacuations, to consolidate the laws governing allotment and assignment of pay by such employees, and for other purposes (Rept. No. 910).

AMENDMENT OF WELFARE AND PENSION PLANS DISCLOSURE ACT—REPORT OF A COMMITTEE—SEPARATE VIEWS (S. REPT. NO. 908)

Mr. McNAMARA. Mr. President, from the Committee on Labor and Public Welfare, I report an original bill to amend the Welfare and Pension Plans Disclosure Act with respect to the method of enforcement and to provide certain additional sanctions, and for other purposes, and I submit a report thereon.

This bill would provide far greater protection to millions of Americans, whose future security depends upon the integrity of their pension and welfare funds. At a later time, I will have more to say about this important measure.

I ask unanimous consent that the separate views of the Senator from Texas [Mr. TOWER] be printed with the report.

The VICE PRESIDENT. The report will be received, and the bill will be placed on the calendar; and, without objection, the report will be printed, as requested by the Senator from Michigan.

The bill (S. 2520) to amend the Welfare and Pension Plans Disclosure Act with respect to the method of enforcement and to provide certain additional sanctions, and for other purposes, reported by Mr. McNAMARA, from the Committee on Labor and Public Welfare, was read twice by its title, and placed on the calendar.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SALTONSTALL (by request):

S. 2518. A bill for the relief of Carnetta Germaine Thomas Hunte; to the Committee on the Judiciary.

By Mr. CAPEHART:

S. 2519. A bill for the relief of Mladen Carrara, Tonina Carrara, Ante Carrara, and Zvonko Carrara; to the Committee on the Judiciary.

By Mr. McNAMARA:

S. 2520. A bill to amend the Welfare and Pension Plans Disclosure Act with respect to the method of enforcement and to provide certain additional sanctions, and for other purposes; placed on the calendar.

(See the remarks of Mr. McNAMARA when he reported the above bill, which appear under the heading "Reports of Committees.")

By Mr. GORE:

S. 2521. A bill to amend the act of May 16, 1958, providing for the conveyance of certain lands in Shiloh National Military Park, State of Tennessee, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. CASE of South Dakota:

S. 2522. A bill to defer the collection of irrigation maintenance and operation charges for calendar year 1962 on lands within the Angostura unit, Missouri River Basin project; to the Committee on Interior and Insular Affairs.

By Mr. EASTLAND:

S. 2523. A bill to amend section 7 of the War Claims Act of 1948; to the Committee on the Judiciary.

EXTENSION AND IMPROVEMENT OF NATIONAL DEFENSE EDUCATION ACT OF 1958—AMENDMENTS

Mr. GOLDWATER submitted amendments, intended to be proposed by him, to the bill (S. 2345) to extend and improve the National Defense Education Act of 1958, and for other purposes, which were ordered to lie on the table and to be printed.

PARTICIPATION IN RESETTLEMENT OF CERTAIN REFUGEES—AMENDMENTS

Mr. SMATHERS submitted amendments, intended to be proposed by him to the bill (H.R. 8291) to amend the act of July 14, 1960, enabling the United States to participate in the resettlement of certain refugees, and for other purposes, which were ordered to lie on the table and to be printed.

ENTRY OF CERTAIN ELIGIBLE ALIEN ORPHANS

Mr. EASTLAND. Mr. President, I ask the Chair to lay before the Senate the amendments of the House of Representatives to S. 2237.

The VICE PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 2237) to permit the entry of certain eligible alien orphans, which was, to strike out all after the enacting clause and insert:

That section 101(b) of the Immigration and Nationality Act (8 U.S.C. 1101) is hereby amended by adding the following new subparagraph (6):

"(6) The term 'eligible orphan' means any alien child under the age of fourteen at the time at which the visa petition is filed pursuant to section 205(b) who is an orphan because of the death or disappearance of both parents, or because of abandonment, or desertion by, or separation or loss from, both parents, or who has only one parent due to the death or disappearance of, abandonment, or desertion by, or separation or loss from the other parent, and the remaining parent is incapable of providing care for such orphan and has in writing irrevocably released him for emigration and adoption."

SEC. 2. Section 101(b)(1) of the Immigration and Nationality Act (8 U.S.C. 1101) is hereby amended by adding the following:

"(F) a child who is an eligible orphan, adopted abroad by a United States citizen and spouse or coming to the United States for adoption by a United States citizen and spouse: *Provided*, That no natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage be accorded any right, privilege, or status under this Act."

SEC. 3. (a) Section 205(b) of the Immigration and Nationality Act (8 U.S.C. 1155) is hereby amended to read as follows:

"(b) Any citizen of the United States claiming that any immigrant is his spouse or child and that such immigrant is entitled to a nonquota immigrant status under section 101(a)(27)(A), or any citizen of the United States claiming that any immigrant is his parent or unmarried son or unmarried daughter and that such immigrant is entitled to a quota immigrant status under section 203(a)(2), or any alien lawfully admitted for permanent residence claiming that any immigrant is his spouse or his unmarried son or his unmarried daughter and that such immigrant is entitled to a quota immigrant status under section 203(a)(3), or any citizen of the United States claiming that any immigrant is his brother or sister or his married son or his married daughter and that such immigrant is entitled to a preference under section 203(a)(4) may file a petition with the Attorney General. No petition for quota immigrant status or a preference in behalf of a son or daughter under paragraph (2), (3), or (4) of section 203(a) of the Immigration and Nationality Act shall be approved by the Attorney General unless the petitioner establishes that he

is a parent as defined in section 101(b)(2) of the Immigration and Nationality Act of the alien in respect to whom the petition is made, except that no such petition shall be approved if the beneficiary thereof is an alien defined in section 101(b)(1)(F). No petition for nonquota immigrant status in behalf of a child as defined in section 101(b)(1)(F) shall be approved by the Attorney General unless the petitioner establishes to the satisfaction of the Attorney General that the petitioner and spouse will care for such child properly if he is admitted to the United States, and (i) in the case of a child adopted abroad, that the petitioner and spouse personally saw and observed the child prior to or during the adoption proceedings, and (ii) in the case of a child coming to the United States for adoption, that the petitioner and spouse have complied with the preadoption requirements, if any, of the State of such child's proposed residence. The petition shall be in such form and shall contain such information and be supported by such documentary evidence as the Attorney General may by regulations prescribe. The petition shall be made under oath administered by any individual having authority to administer oaths, if executed in the United States, but, if executed outside the United States, administered by a consular officer."

(b) The second sentence of section 205(c) of the Immigration and Nationality Act (8 U.S.C. 1155) is hereby amended to read: "Not more than two such petitions may be approved for one petitioner in behalf of a child as defined in section 101(b)(1)(E) or (F), unless necessary to prevent the separation of brothers and sisters."

SEC. 4. The first sentence of section 221(c) of the Immigration and Nationality Act (8 U.S.C. 1201) is hereby amended to read: "An immigrant visa shall be valid for such period, not exceeding four months, as shall be by regulations prescribed, except that any visa issued to a child lawfully adopted by a United States citizen and spouse while such citizen is serving abroad in the United States Armed Forces, or is employed abroad by the United States Government, or is temporarily abroad on business, shall be valid until such time, for a period not to exceed three years, as the adoptive citizen parent returns to the United States in due course of his service, employment, or business."

SEC. 5. (a) Title I of the Immigration and Nationality Act (8 U.S.C. 1101) is hereby amended by adding the following:

"JUDICIAL REVIEW OF ORDERS OF DEPORTATION

"SEC. 106. (a) The procedure prescribed by, and all the provisions of the Act of December 29, 1950, as amended (64 Stat. 1129; 68 Stat. 961; 5 U.S.C. 1031 et seq.), shall apply to, and shall be the sole and exclusive procedure for, the judicial review of all final orders of deportation heretofore or hereafter made against aliens within the United States pursuant to administrative proceedings under section 242(b) of this Act or comparable provisions of any prior Act, except that—

"(1) a petition for review may be filed not later than six months from the date of the final deportation order or from the effective date of this section, whichever is the later.

"(2) the venue of any petition for review under this section shall be in the judicial circuit in which the administrative proceedings before a special inquiry officer were conducted in whole or in part, or in the judicial circuit wherein is the residence, as defined in this Act, of the petitioner, but not in more than one circuit;

"(3) the action shall be brought against the Immigration and Naturalization Service, as respondent. Service of the petition to review shall be made upon the Attorney General of the United States and upon the official of the Immigration and Naturalization Service in charge of the Service district in which the office of the clerk of the court is located. The service of the petition for review upon such official of the Service shall stay the deportation of the alien pending determination of the petition by the court, unless the court otherwise directs;

"(4) except as provided in clause (B) of paragraph (5) of this subsection, the petition shall be determined solely upon the administrative record upon which the deportation order is based and the Attorney General's findings of fact, if supported by reasonable, substantial, and probative evidence on the record considered as a whole, shall be conclusive;

"(5) whenever any petitioner, who seeks review of an order under this section, claims to be a national of the United States and makes a showing that his claim is not frivolous, the court shall (A) pass upon the issues presented when it appears from the pleadings and affidavits filed by the parties that no genuine issue of material fact is presented; or (B) where a genuine issue of material fact as to the petitioner's nationality is presented, transfer the proceedings to a United States district court for the district where the petitioner has his residence for hearing de novo of the nationality claim and determination as if such proceedings were originally initiated in the district court under the provisions of section 2201 of title 28, United States Code. Any such petitioner shall not be entitled to have such issue determined under section 360(a) of this Act or otherwise;

"(6) if the validity of a deportation order has not been judicially determined, its validity may be challenged in a criminal proceeding against the alien for violation of subsection (d) or (e) of section 242 of this Act only by separate motion for judicial review before trial. Such motion shall be determined by the court without a jury and before the trial of the general issue. Whenever a claim to United States nationality is made in such motion, and in the opinion of the court, a genuine issue of material fact as to the alien's nationality is presented, the court shall accord him a hearing de novo on the nationality claim and determine that issue as if proceedings had been initiated under the provisions of section 2201 of title 28, United States Code. Any such alien shall not be entitled to have such issue determined under section 360(a) of this Act or otherwise. If no such hearing de novo as to nationality is conducted, the determination shall be made solely upon the administrative record upon which the deportation order is based and the Attorney General's findings of fact, if supported by reasonable, substantial and probative evidence on the record considered as a whole, shall be conclusive. If the deportation order is held invalid, the court shall dismiss the indictment and the United States shall have the right to appeal to the court of appeals within thirty days. The procedure on such appeals shall be as provided in the Federal rules of criminal procedure. No petition for review under this section may be filed by any alien during the pendency of a criminal proceeding against such alien for violation of subsection (d) or (e) of section 242 of this Act; and

"(7) nothing in this section shall be construed to require the Attorney General to defer deportation of an alien after the issuance of a deportation order because of the right of judicial review of the order granted by this section, or to relieve any alien from compliance with subsections (d) and (e) of section 242 of this Act. Nothing contained in this section shall be construed to preclude the Attorney General from detaining or continuing to detain an alien or from taking him into custody pursuant to subsection (c) of section 242 of this Act at any time after the issuance of a deportation order.

"(8) it shall not be necessary to print the record or any part thereof, or the briefs, and the court shall review the proceedings on a typewritten record and on typewritten briefs.

"(9) any alien held in custody pursuant to an order of deportation may obtain judicial review thereof by habeas corpus proceedings.

"(b) Notwithstanding the provisions of any other law, any alien against whom a final order of exclusion has been made heretofore or hereafter under the provisions of section 236 of this Act or comparable provisions of any prior Act may obtain judicial review of such order by habeas corpus proceedings and not otherwise.

"(c) An order of deportation or of exclusion shall not be reviewed by any court if the alien has not exhausted the administrative remedies available to him as of right under the immigration laws and regulations or if he has departed from the United States after the issuance of the order. Every petition for review or for habeas corpus shall state whether the validity of the order has been upheld in any prior judicial proceeding, and, if so, the nature and date thereof, and the court in which such proceeding took place. No petition for review or for habeaus corpus shall be entertained if the validity of the order has been previously determined in any civil or criminal proceeding, unless the petition presents grounds which the court finds could not have been presented in such prior proceeding, or the court finds that the remedy provided by such prior proceeding was inadequate or ineffective to test the validity of the order."

(b) This section shall take effect on the thirtieth day after its approval and, notwithstanding the provisions of any other law, including section 405 of the Immigration and Nationality Act, shall then be applicable to all administrative proceedings involving deportation or exclusion of aliens notwithstanding (1) that the person involved entered the United States prior to the effective date of this section or of the Immigration and Nationality Act or (2) that the administrative proceeding was commenced or conducted prior to the effective date of this section or of the Immigration and Nationality Act. Any judicial proceeding to review an order of deportation which is pending unheard in any district court of the United States on the effective date of this section (other than a habeas corpus or criminal proceeding in which the validity of the deportation order has been challenged) shall be transferred for determination in accordance with this section to the court of appeals having jurisdiction to entertain a petition for review under this section. Any judicial proceeding to review an order of exclusion which is pending unheard on the effective date of this section shall be expedited in the same manner as is required in habeas corpus. All laws or parts of laws inconsistent with this section are, to the extent of such inconsistency, repealed. If any particular provision of this section, or the application thereof to any person or circumstance, is held invalid, the remainder of this section and the application of such provision to other persons or circumstances shall not be affected thereby.

SEC. 6. Section 222 of the Immigration and Nationality Act (8 U.S.C. 1202) is hereby amended by deleting from subsection (a) the language "race and ethnic classification;", and by deleting from subsection (c) the language "his race and ethnic classification:".

SEC. 7. (a) Section 101(d)(1) of the Immigration and Nationality Act (8 U.S.C. 1101) is hereby amended by inserting immediately after "December 31, 1946," the following: "or from June 25, 1950, to July 1, 1955,".

(b) Section 101(d)(2) of the Immigration and Nationality Act (8 U.S.C. 1101) is hereby amended (1) by striking out "and (C)" and inserting in lieu thereof "(C)", and (2) by inserting immediately after "December 31, 1946" the following: "; and (D) the term 'Korean hostilities' relates to the period from June 25, 1950, to July 1, 1955".

SEC. 8. (a) Section 329(a) of the Immigration and Nationality Act (8 U.S.C. 1440) is amended by inserting after "December 31, 1946," the following: "or during a period beginning June 25, 1950, and ending July 1, 1955,".

(b) Section 329(b)(4) of the Immigration and Nationality Act (8 U.S.C. 1440) is hereby amended by inserting after "December 31, 1946," the following: "or during a period beginning June 25, 1950, and ending July 1, 1955,".

SEC. 9. Section 202(e) of the Immigration and Nationality Act (8 U.S.C. 1152) is hereby amended to read as follows:

"(e) After the determination of quotas has been made as provided in section 201, revision of the quotas shall be made by the Secretary of State, the Secretary of Commerce, and the Attorney General, jointly, whenever necessary, to provide for any change of boundaries resulting in transfer of territory from one sovereignty to another, a change of administrative arrangements of a colony or other dependent area, or any other political change, requiring a change in the list of quota areas or of the territorial limits thereof. In the case of any change in the territorial limits of quota areas, not requiring a change in the quotas for such areas, the Secretary of State shall, upon recognition of such change, issue appropriate instructions to all consular offices concerning the change in the territorial limits of the quota areas involved. Whenever one or more colonies or other component or dependent areas overseas from the governing country, or one or more quota areas have been subject to a change of administrative arrangements, a change of boundaries, or any other political change, the annual quota of the newly established quota area or the number of visas authorized to be issued under section 202(c)(1), notwithstanding any other provisions of this Act, shall not be less than the sum total of quotas in effect or number of visas authorized for the area immediately preceding the change of administrative arrangements, change of boundaries, or other political change."

SEC. 10. Section 205(c) of the Immigration and Nationality Act (8 U.S.C. 1155) is hereby amended by adding at the end thereof the following new sentence: "Notwithstanding the provisions of this subsection, no petition shall be approved if the alien previously has been accorded, by reason of marriage determined by the Attorney General to have been entered into for the purpose of evading the immigration laws—

"(1) a nonquota status under section 101(a)(27)(A) as the spouse of a citizen of the United States, or

"(2) a preference quota status under section 203(a)(3) as the spouse of an alien lawfully admitted for permanent residence."

SEC. 11. Section 212(a)(6) of the Immigration and Nationality Act (8 U.S.C. 1182) is hereby amended to read as follows:

"(6) Aliens who are afflicted with any dangerous contagious disease;"

SEC. 12. Section 212 of the Immigration and Nationality Act (8 U.C.S. 1182) is hereby amended by adding the following additional subsection:

"(f) Any alien afflicted with tuberculosis in any form who (A) is the spouse or the unmarried son or daughter, or the minor unmarried lawfully adopted child, of a United States citizen, or of an alien lawfully admitted for permanent residence, or of an alien who has been issued an immigrant visa, or (B) has a son or daughter who is a United States citizen, or an alien lawfully admitted for permanent residence, or an alien who has been issued an immigrant visa, shall, if otherwise admissible, be issued a visa and admitted to the United States for permanent residence in accordance with such terms, conditions, and controls, if any, including the giving of a bond, as the Attorney General, in his discretion after consultation with the Surgeon General of the United States Public Health Service, may by regulations prescribe."

SEC. 13. Section 212(a)(9) of the Immigration and Nationality Act (8 U.S.C. 1182) is hereby amended by changing the semicolon at the end to a period, and adding thereafter the following: "Any alien who would be excludable because of the conviction of a misdemeanor classifiable as a petty offense under the provisions of section 1(3) of title 18, United States Code, by reason of the punishment actually imposed, or who would be excludable as one who admits the commission of an offense that is classifiable as a misdemeanor under the provisions of section 1(2) of title 18, United States Code, by reason of the punishment which might have been imposed upon him, may be granted a visa and admitted to the United States if otherwise admissible: *Provided*, That the alien has committed only one such offense, or admits the commission of acts which constitute the essential elements of only one such offense."

SEC. 14. Section 212 of the Immigration and Nationality Act (8 U.S.C. 1182) is hereby amended by adding the following additional subsection:

"(g) Any alien, who is excludable from the United States under paragraph (9), (10), or (12) of this section, who (A) is the spouse or child, including a minor unmarried adopted child, of a United States citizen, or of an alien lawfully admitted for permanent residence, or (B) has a son or daughter who is a United States citizen or an alien lawfully admitted for permanent residence, shall, if otherwise admissible, be issued a visa and admitted to the United States for permanent residence (1) if it shall be established to the satisfaction of the Attorney General that (A) the alien's exclusion would result in extreme hardship to the United States citizen or lawfully resident spouse, parent, or son or daughter of such alien, and (B) the admission to the United States of such alien would not be contrary to the national welfare, safety, or security of the United States; and (2) if the Attorney General, in his discretion, and pursuant to such terms, conditions, and procedures as he may by regulations prescribe, has consented to the alien's applying or reapplying for a visa and for admission to the United States."

SEC. 15. Section 212 of the Immigration and Nationality Act (8 U.S.C. 1182) is hereby amended by adding the following additional subsection:

"(h) Any alien who is the spouse, parent, or child of a United States citizen or of an alien lawfully admitted for permanent residence and who is excludable because (1) he seeks, has sought to procure, or has procured, a visa or other documentation, or entry into the United States, by fraud or misrepresentation, or (2) he admits the commission of perjury in connection therewith, may be granted a visa and admitted to the United States for permanent residence, if otherwise admissible, if the Attorney General in his discretion has consented to the alien's applying or reapplying for a visa and for admission to the United States."

SEC. 16. Section 241 of the Immigration and Nationality Act (8 U.S.C. 1251) is hereby amended by adding the following:

"(f) The provisions of this section relating to the deportation of aliens within the United States on the ground that they were excludable at the time of entry as aliens who have sought to procure, or have procured visas or other documentation, or entry into the United States by fraud or misrepresentation shall not apply to an alien otherwise admissible at the time of entry who is the spouse, parent, or a child of a United States citizen or of an alien lawfully admitted for permanent residence."

SEC. 17. Section 310 of the Immigration and Nationality Act (8 U.S.C. 1421) is hereby amended by adding the following additional subsection:

"(e) Notwithstanding the provisions of section 405(a), any petition for naturalization filed on or after the enactment of this subsection shall be heard and determined in accordance with the requirements of this title."

SEC. 18. (a) Section 340(a) of the Immigration and Nationality Act (66 Stat. 260; 8 U.S.C. 1451(a)) is hereby amended by inserting, following the language "that such order and certificate of naturalization" the language "were illegally procured or".

(b) Section 340(b) of the Immigration and Nationality Act (66 Stat. 260; 8 U.S.C. 1451(b)) is hereby amended by inserting, immediately preceding the word "procured", the language "illegally procured or".

SEC. 19. Section 349 of the Immigration and Nationality Act (8 U.S.C. 1481) is hereby amended by adding the following subsection:

"(c) Whenever the loss of United States nationality is put in issue in any action or proceeding commenced on or after the enactment of this subsection under, or by virtue of, the provisions of this or any other Act, the burden shall be upon the person or party claiming that such loss occurred, to establish such claim by a preponderance of the evidence. Except as otherwise provided in subsection (b), any person who commits or performs, or who has committed or performed, any act of expatriation under the provisions of this or any other Act shall be presumed to have done so voluntarily, but such presumption may be rebutted upon a showing, by a preponderance of the evidence, that the act or acts committed or performed were not done voluntarily."

SEC. 20. Section 354(4) of the Immigration and Nationality Act (8 U.S.C. 1486) is hereby amended to read as follows:

"(4) who has attained the age of sixty years, and has had a residence outside of the United States and its outlying possessions for not less than ten years, during all of which period he has been engaged in an occupation of the type designated in paragraph (1), (2), or (4) of section 353, or paragraph (2) of this section, and who is in bona fide retirement from such occupation; or who is the spouse or child of the national described in this paragraph and who has his residence abroad for the purpose of being with such American citizen spouse or parent; or".

SEC. 21. The language "CHAPTER 3—ISSUANCE ON ENTRY DOCUMENTS" of the table of contents of the Immigration and Nationality Act, as amended, is hereby amended to read as follows:

"CHAPTER 3—ISSUANCE OF ENTRY DOCUMENTS"

SEC. 22. (a) The title preceding section 212 of the Immigration and Nationality Act, as amended, is hereby amended to read as follows:

"GENERAL CLASSES OF ALIENS INELIGIBLE TO RECEIVE VISAS AND EXCLUDED FROM ADMISSION; WAIVERS OF INADMISSIBILITY"

(b) The title preceding section 329 of the Immigration and Nationality Act, as amended, is amended to read as follows:

"NATURALIZATION THROUGH ACTIVE-DUTY SERVICE IN ARMED FORCES DURING WORLD WAR I OR WORLD WAR II OR THE KOREAN HOSTILITIES"

SEC. 23. (a) The table of contents (TITLE I—GENERAL) of the Immigration and Na-

tionality Act is hereby amended by adding the following:

"Sec. 106. Judicial review of orders of deportation."

(b) Section 212 of the table of contents of the Immigration and Nationality Act is hereby amended to read as follows:

"Sec. 212. General classes of aliens ineligible to receive visas and excluded from admission; waivers of inadmissibility."

(c) Section 329 of the table of contents of the Immigration and Nationality Act, is hereby amended to read as follows:

"Sec. 329. Naturalization through active-duty service in Armed Forces during World War I or World War II or the Korean hostilities."

SEC. 24. (a) The following Acts and all amendments thereto and parts of Acts and all amendments thereto are repealed:

(1) Section 4 of the Act of September 3, 1954 (68 Stat. 1145; 8 U.S.C. 1182a);

(2) Section 4 of the Act of September 11, 1957 (71 Stat. 639–640; 8 U.S.C. 1205);

(3) Sections 5, 6, and 7 of the Act of September 11, 1957 (71 Stat. 640–641; 8 U.S.C. 1182b; 8 U.S.C. 1182c; 8 U.S.C. 1251a);

(4) Section 15 of the Act of September 11, 1957 (71 Stat. 643–644; 50 U.S.C. App. 1971a, note);

(5) Sections 9 and 12 of the Act of September 11, 1957 (71 Stat. 641–642; 8 U.S.C. 1255a; 8 U.S.C. 1153, note);

(6) Section 2 of the Act of August 21, 1958 (72 Stat. 699; 8 U.S.C. 1255; 8 U.S.C. 1153, note);

(7) Sections 4 and 6 of the Act of September 22, 1959 (73 Stat. 644–645; 8 U.S.C. 1153, note).

(b) Paragraphs (5), (6), and (7) of subsection (a) of this section shall take effect upon the expiration of the one hundred and eightieth day immediately following the date of enactment of this Act.

SEC. 25. (a) Any alien eligible for a quota immigrant status under the provisions of section 203(a) (2) or (3) of the Immigration and Nationality Act on the basis of a petition approved by the Attorney General prior to June 30, 1961, shall be held to be a nonquota immigrant and, if otherwise admissible under the provisions of that Act, shall be issued a nonquota immigrant visa: *Provided*, That upon his application for an immigrant visa, and for admission to the United States, the alien is found to have retained his relationship to the petitioner, and status, as established in the approved petition.

(b) At any time prior to the expiration of the one hundred and eightieth day immediately following the enactment of this Act a special nonquota immigrant visa may be issued to an eligible orphan as defined in section 4 of the Act of September 11, 1957, as amended (8 U.S.C. 1205; 71 Stat. 639, 73 Stat. 490, 74 Stat. 505), if a visa petition filed in behalf of such eligible orphan was (A) approved by the Attorney General prior to June 30, 1961, or (B) pending before the Attorney General prior to June 30, 1961, and the Attorney General approves such petition.

And to amend the title so as to read: "An Act to amend the Immigration and Nationality Act; and for other purposes."

Mr. EASTLAND. Mr. President, I move that the Senate disagree to the House amendments to S. 2237, request a conference with the House of Representatives thereon, and that the Presiding Officer appoint the conferees on the part of the Senate.

The motion was agreed to; and the Vice President appointed Mr. EASTLAND, Mr. JOHNSTON, Mr. MCCLELLAN, Mr. ERVIN, Mr. DIRKSEN, Mr. KEATING, and Mr. FONG conferees on the part of the Senate.

AID TO FEDERALLY IMPACTED AREAS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that Calendar No. 867 (H.R. 9000) be taken off the calendar and referred to the Committee on Labor and Public Welfare.

The VICE PRESIDENT. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 9000) to extend for 2 additional years the expired provisions of Public Laws 815 and 874, 81st Congress, and the National Defense Education Act of 1958, and for other purposes.

The VICE PRESIDENT. Is there objection to the request of the Senator from Montana? The Chair hears none, and it is so ordered.

NOTICE CONCERNING NOMINATION BEFORE COMMITTEE ON THE JUDICIARY

Mr. EASTLAND. Mr. President, the following nomination has been referred to and is now pending before the Committee on the Judiciary:

Alton A. Lessard, of Maine, to be U.S. attorney, district of Maine, term of 4 years, vice Peter Mills.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in this nomination to file with the committee, in writing, on or before Friday, September 15, 1961, any representations or objections they may wish to present concerning the above nomination, with a further statement whether it is their intention to appear at any hearing which may be scheduled.

NOTICE OF HEARING ON NOMINATION OF PAUL D. SHRIVER TO BE JUDGE FOR THE DISTRICT COURT OF GUAM

Mr. CARROLL. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that a public hearing has been scheduled for Friday, September 15, 1961, at 10:30 a.m., in room 2228, New Senate Office Building, on the nomination of Paul D. Shriver, of Colorado, to be judge for the district court of Guam, for a term of 8 years, vice Eugene R. Gilmartin, deceased.

At the indicated time and place persons interested in the hearing may make such representations as may be pertinent.

The subcommittee consists of the Senator from Michigan [Mr. HART], the Senator from Hawaii [Mr. FONG], and myself, as chairman.

U.S. DISARMAMENT AGENCY FOR WORLD PEACE AND SECURITY

The VICE PRESIDENT. The Chair lays before the Senate the unfinished business, which will be read by its title.

The CHIEF CLERK. A bill (S. 2180) to establish a U.S. Disarmament Agency for World Peace and Security.

VIEWS OF DR. RALPH K. WHITE ON PROPAGANDA

Mr. DODD. Mr. President, from time to time, people who have made a study of U.S. propaganda have told me that our propaganda effort is flaccid and defeatist, that in our broadcasts, in particular, we seemed to believe that propaganda consists of nothing more than music and colorless news.

Although I have found the time to examine our propaganda effort in only a few instances, I have seen things that have alarmed me. For example, the film which the U.S. Information Agency made of Premier Khrushchev's visit to America was far more effective as an instrument of Soviet propaganda than the film the Soviets themselves produced under the caption "Nikita Khrushchev in America."

The most alarming evidence I have yet noticed of the weakness in our propaganda effort was the speech made on Monday, September 4, by Dr. Ralph K. White, Chief of the Soviet Bloc Division of USIA's Office of Research and Analysis.

This speech advanced the general theme that we are not too different from the Communists, after all. At the conclusion of my remarks, I shall insert in the RECORD the text of Dr. White's speech; but at present I should like to give a brief and, I believe, fair description of its contents.

Dr. White contends the following:

That we and the Communists are waging a joint battle against mutual suicide.

That we err in not recognizing that the Russians are afraid of us and that many of their seemingly aggressive policies originate in this defensive fear.

That while the Soviets may appear aggressive in Berlin, they have a genuine desire to stabilize the situation there, based upon a sincere fear of aggression by the West.

That we are too inclined to look upon Communist leaders as villains and that we overestimate the evil of Communist dictators.

That we are too ready to dismiss the words of the Soviet leaders as lies when most of the time they are saying what they really think.

Then, in what surely must number among the great understatements of this century, Dr. White throws in these bromides:

He says that, in a sense, Soviet leaders are "less representative" of their own people than we are. He points out that their meaning of democracy is "rather different" from ours and that they are, therefore, "less democratic" than we are. He concedes that we are "less aggressive" and "less imperialistic" than they are. He ventures that "relatively speaking" we are more truthful than the Communists.

Dr. White, in conceding that we are more truthful than the Communists, implies that this difference is only in degree rather than in kind. He condemns the U–2 incident and our assistance to the Cuban freedom fighters as matters for which we should be blamed.

In another portion of his speech, Dr. White credits Khrushchev with having

knocked "large holes" in Stalin's Iron Curtain, apparently unaware that a few weeks ago Khrushchev closed the largest hole in the Iron Curtain by building a concrete wall across the center of Berlin that is more literally an Iron Curtain than Stalin ever erected.

These are strange statements indeed to come from a man who is responsible for advising USIA on the most effective means of winning the ideological conflict with the Communists.

Apparently Dr. White feels there is not much of a conflict after all and that differences between us and the Communists are mere delusions and misunderstandings.

It is, I feel, a matter of shame for a Senator to have to refute on the floor of the Senate such statements from a U.S. official.

First, we are not engaged in any joint battle at the side of the Communists against mutual suicide. They, and they alone, threaten the world with destruction. If we are to have a nuclear holocaust, it is they who will cause it and nothing could be more false than the assumption that, somehow, we and the Communists are struggling together against the threat of nuclear annihilation, as though that threat had some independent status, some autonomous power of its own.

Second, I cannot believe that the brutal aggression of the Communists in East Berlin, in Tibet, in Laos, in South Vietnam, in Indochina, in South Korea, and other places, or the similar aggression which swallowed up all of Eastern Europe and China, is motivated by fear of the West. It is, rather, a logical and systematic implementation of the frequently declared aim of the Communists to subjugate the entire world. I hope that, after the fall of 1 billion persons to Communist tyranny since 1945, there are only a few left who maintain that these patently aggressive and inhuman acts were defensive, natural acts based upon fear. The fact that such a thesis is still being advanced by one of our leaders in psychological warfare is to me a cause of shock and almost of despair.

Third, Dr. White's thesis that Soviet actions in Berlin are based upon a genuine desire to stabilize the situation there, thus fending off Western aggression in the future, is incredible in view of the facts.

The Communists have forced crisis after crisis in Berlin with the objective of forcing us out, gobbling up Berlin, and so undermining the free world position there as to cause all of Germany and all of Europe to fall within the Communist orbit.

The Communist purpose in Berlin is aggression and no other. And if the leaders of our own USIA cannot grasp this fact, if they do not have the comprehension to understand our enemy and his motives, whom can we expect to understand?

Fourth, Dr. White feels that the American people are too inclined to look upon the Communist leaders as villains and that we overestimate their evil.

Here is a group of men in Moscow who have deliberately murdered 20 million people, through planned starvation, through assassination, through mass executions, through the slow living death of concentration camps and slave labor camps.

Here is a group of men who have enslaved 1 billion human beings and turned them into faceless cogs in the Communist machine.

Here is a group of men who have waged systematic warfare upon the basic tenets of our religious and philosophic heritage, men who will embrace any evil if it advances the Communist cause.

In the face of this, what can be said for a division chief in our USIA who feels that we overestimate the evil of our enemies?

Fifth, Dr. White chides us for being too ready to dismiss the words of Soviet leaders as lies when most of the time "what they say is fairly close to what they really think." What a remarkable statement this is.

Does Dr. White believe that the Soviet charges against us of germ warfare in Korea were made in good faith?

Does he believe that they were saying what they really thought when they tied us up in nuclear test ban negotiations while at that very time they were setting up the series of nuclear tests which are now taking place?

Does he believe that they were acting in good faith when they broke more than 1,000 solemn treaties which they had entered into?

The list of their perfidy is infinite.

It need not be recounted here.

What is unbelievable is that an American USIA official could make the statement that most of the time Soviet leaders are saying what they really think.

Sixth, the understatements of Dr. White to which I previously referred are actually incredible misstatements.

The Soviets are not merely "less representative" of their people than we are. They are not representative of their people at all in any real sense. They are enemies and enslavers of their people.

They are not "less democratic" than we are. They are not democratic in any sense; they are totalitarian in every sense.

Their meaning of democracy is not "rather different" from ours, as Dr. White alleges. There is no room for democracy at all in their ideology and they are avowed enemies of it.

I suppose we should be grateful to Dr. White that, after years of scientific research and evaluation, he can proclaim that we are "less aggressive" and "less imperialistic" than the Soviets. But the truth is that we are not aggressive at all and they are completely aggressive. The truth is that we are not imperialistic at all and they are the most imperialistic clique that ever existed.

Seventh, as for Dr. White's condemnation of the U–2 flights and our assistance to the Cuban freedom fighters, I have this to say.

The truth is that the U–2 flights were not only blameless but highly praiseworthy and necessary actions that contributed substantially to the security of this Nation and to its protection against surprise attack by the Soviets.

The truth is that our error in assisting the Cuban freedom fighters was that we did not give enough help to those who were striving to rescue their country from the grim oppression of a Communist dictatorship, maintained in power by Communist arms.

We can expect our enemies to attack us on these points; we can expect neutralists and those who are more committed to vague concepts of internationalism than they are to the life or death question of national security to find fault with these actions. But should we expect an official of our own U.S. Information Agency to make such attacks? If USIA is not for us, who can we expect to be for us?

Throughout his remarks, Dr. White repeatedly identifies the Russian people as having the same basic outlook and beliefs as their Communist leaders. The uncritical acceptance of this myth by a man who is supposed to be one of our principal experts on the Soviet Union is really astounding. Dr. White apparently has more confidence in this than the Kremlin.

If the Russian people essentially share the outlook of their leaders, why is it necessary for the Kremlin to spend a billion dollars a year jamming radio broadcasts from the free world? Why did the Soviet troops in Hungary desert to the Hungarian patriots on a mass scale at the time of the Budapest uprising in 1956? Why does the Kremlin find it necessary to suppress books such as "Dr. Zhivago"?

There is massive evidence that the Russian people, like their fellow victims in Hungary, Poland, East Germany and throughout the Soviet prison house of nations are seething with discontent and hostility toward their Communist rulers. One of the principal tasks of the U.S. Information Agency is to keep this feeling alive, to nourish it and strengthen it with the truth.

Surely we cannot expect USIA to do this when key officials such as Dr. White have already thrown in the sponge and go around proclaiming that the Soviet people are more or less united under their Communist leaders and share their attitude toward world affairs.

Dr. White's speech purports to combat great delusions which are causing misunderstanding between us and the Soviets, delusions which he feels are endangering world peace. Yet in his speech he unwittingly propounds the real delusions that have cost us defeat after defeat in the cold war.

It was the delusion that the Soviets were democratic and peace loving that caused us to conduct our war strategy against Hitler in a way which permitted Russia to emerge as the principal victor of World War II.

It was the delusion that the Soviets were trustworthy and had legitimate fears of Western aggression that caused us to barter away the freedom of 100 million people in Eastern Europe.

It was the delusion that the Chinese Communists were sincere reformers and were representative of the Chinese peo-

ple that caused us to sit idly by while half a billion Chinese were enslaved by communism.

It was the delusion that perhaps they were saying what they really thought that caused us to fritter away the past 3 years in nuclear test ban negotiations, dismantling our own nuclear development while the Soviets forged ahead in theirs.

It was delusions such as Dr. White propounds that have caused one catastrophic conference with the Soviets after another, one propaganda defeat after another, one humiliation after another and the loss of one free nation after another.

After all that has happened, that a man with such ideas could still be occupying a vital position in our cold war command, that his words could be quoted approvingly and featured prominently by many of our outstanding newspapers, is a commentary on our Nation which casts the gravest doubt upon our capacity to comprehend the nature of the enemy, a comprehension which alone will lead us to the hard and bitter choices that are necessary if we are to save our country.

In my judgment, Dr. White should be summarily dismissed from his post for he has revealed himself as not only unable to effectively present to the world the American position and the position of freedom in this mortal struggle for survival between decency and evil, he apparently is unable even to understand and embrace it.

Beyond this, I believe it is time for the appropriate committees of the Congress to thoroughly investigate the U.S. Information Agency to find out if Dr. White's philosophy is an isolated phenomenon within the Agency or whether it represents a consensus of opinion among those who are charged with bringing to the world the American message. If our USIA leaders share the approach to the cold war of the Chief of the Soviet Bloc Division of the Office of Research and Analysis, then this entire Agency must be either cleaned up or dismantled because under present conditions it cannot effectively further the cause of human freedom.

Mr. President, I ask unanimous consent that the address "Mirror Images in the East-West Conflict," delivered before the American Psychological Association convention on Monday, September 4, 1961, by Dr. Ralph K. White, be printed at this point in the RECORD, together with a Washington Post feature article on the speech, by Eve Edstrom, dated September 5, 1961.

There being no objection, the address and article were ordered to be printed in the RECORD, as follows:

MIRROR IMAGES IN THE EAST-WEST CONFLICT

(Address by Ralph K. White)

As this paper has evolved, it has changed its title. The new title is "Mirror Images in the East-West Conflict." The reason is that I have been more and more fascinated by the similarities—the mirror-image similarities—between our own thinking and that of the Russians. An American who explores the psychological world of the Russians begins to feel that he is in a kind of looking-glass world, where all sorts of things have a familiar look, and yet they appear in a reverse perspective; their shape is often almost exactly the opposite of the shape they have in the "real" world as we Americans perceive it.

I don't know who first spoke about a mirror image in this context. Probably the two psychologists whose use of the term is now most well known are Urie Bronfenbrenner and Charlie Osgood. Actually I suspect that this is one of those terms that are so natural, so much in the air at a particular time, so true, that they have independently cropped up in the minds of quite a number of different people, including several of the people in this room (and, of course, including myself). If so, it is all to the good insofar as it leads us to take a long, hard look at the mirror-image phenomenon, to try to disentangle the kernels of truth from the misconceptions and distortions on both sides, to try to disentangle the political factors from the psychological factors in distortion, and then to settle down to our own proper psychological business of understanding the psychological reasons for distortion. But it would not be all to the good if the mirror-image concept should become a fad and if, like many other terms in the history of psychology, it should begin to be invoked indiscriminately, as if it were an explanation in and of itself. With that danger in mind, I will try today to present to you a balanced picture of the mirror-image in Soviet and American thinking, with due attention to the limitations of the concept as well as to its essential validity and its very great importance.

The investigation on which this talk is largely based consists of an effort to describe the main elements in what the Soviet leaders and the Soviet people think about us, what we think about them, what they think about themselves, and what we think about ourselves. In other words, it is a study of enemy images and of self-images on both sides of the East-West conflict. It is presented here (in a paper that I have some extra copies of, for those who are interested) in the form of parallel columns. The parallel-column technique is a useful one in that it immediately brings out both similarities and differences. Where a particular American idea has a Soviet mirror-image counterpart, that counterpart appears beside it, while the ideas that don't have Soviet counterparts have blank space opposite them, and the absence of a mirror image is just as obvious as its presence is in the other cases.

Of course, any investigation of the psychological world of the Russians can be only the roughest sort of approximation. It is beset by many difficulties, of which the most important, probably, is the obvious question of sincerity. When a Russian is talking with an American, is he speaking sincerely and frankly? Does he dare to speak frankly? These methodological problems will be considered at greater length in the chapter I am writing for the SPSSI handbook on international behavior, edited by Herb Kelman. At this point I will only say that several different kinds of evidence have been used to arrive at a composite picture of Soviet thinking, and that the evidence is a good deal better than it was even 5 years ago. However we may feel about Premier Khrushchev in other respects, we have to give him credit for the large holes he has knocked in Stalin's Iron Curtain.

Five years ago we had, for example, the big Harvard study of Soviet escapes, directed by Bauer, Inkeles, and Kluckhohn, studies of the psychology of the inner core of the Communist Party such as those by Nathan Leites and Gabriel Almond, various reports by westerners in the U.S.S.R. (including Harrison Salisbury), and historical studies of the actions as well as the words of Communist leaders. Now we have in addition a USIA study of 164 repatriates from the Soviet Union, a radio liberty study of 107 especially qualified westerners in the U.S.S.R., and a greatly increased number of reports by American tourists, American guides at our exhibit in Moscow 2 years ago, and American students who have attended Soviet universities. With such an abundance of material it is possible to reduce error by checking one kind of evidence against another. That has been done in arriving at the composite picture presented in these parallel columns.

Here are a few of the similarities:

First, and most fundamental: Each side looks on the other as a dangerous aggressor and a breaker of the peace. We in America, of course, see the Russians that way. The amazing thing is that most of them regard us—or rather our ruling circles—in the same way.

That is pretty hard to believe, and I don't expect you to believe it without evidence. Of course we all have known for a long time that that is their propaganda line. It has been the propaganda line of the Communist leaders since 1948, when Vishynski first began talking in the U.N. about American warmongers. But most of us, I suspect, found it hard to believe that the Russian people believed him. That was certainly my feeling. For several years I felt that whatever the Russian people might swallow in the propaganda of their leaders they could hardly swallow this myth of American aggression. It was so obvious—to us—that America just wasn't aggressive.

But the facts have forced me, gradually and reluctantly away from that consoling idea. In recent years a large amount of evidence has accumulated indicating that in this respect most of the Soviet people do swallow the mythology of their leaders. For instance, Bauer, Inkeles, and Kluckhohn, describing the opinions expressed by Soviet citizens to Western visitors inside the Soviet Union, say: "In the majority of instances they indicated a complete acceptance of official propaganda with regard to foreign affairs. There are some people who categorically reject the picture of America as an aggressor, but indications are that they are very much in the minority." And Urie Bronfenbrenner, after his extensive conversations inside the Soviet Union last summer, said, "With few exceptions, they saw the world in the Kremlin's terms. Above all, America is the warmonger, its people the unwitting victims of the ruling capitalistic-militaristic clique."

Corresponding to this, another basic belief of the people on each side is that their own country is wholly peaceful. Of course, we in America assume that we are wholly peaceful. The strange thing is that most of the Russians think the same thing about their own country and their own government.

It is really a very strange thing, this calm assumption of innocence on their part. It seems almost inconceivable that they could ignore the historical record of Soviet aggression as much as they do. We think of the cynical Nazi-Soviet pact, the Soviet attack on Finland the absorption of the Baltic States, the takeover of almost all of Eastern Europe after World War II, the Berlin blockade, the Korean war, Hungary, Tibet, Laos, and now again Berlin. But these things hardly come into the mind of a Soviet citizen at all, when he thinks about the peacefulness of his country, or if they do come into his mind he interprets them in such a way as to preserve his image of Soviet innocence. What does come into his mind, so vividly and so powerfully that it sweeps all of these things aside, is his memory of the horrors of World War II. To him, the implication of these horrors is that everyone in the world must now realize that after such an experience the Soviet Union must be one of the most peaceloving countries in the world.

I think one of our greatest American blindspots with regard to Soviet thinking is our tendency to forget what a tremendous emotional experience the Second World War was, and still is, in their lives. But Americans who go to the Soviet Union get over this particular misconception in a hurry. For instance, one of the guides at the American exhibit in Moscow in 1959 says, "They are not allowed to forget their war for a day. Their suffering was terrible. Perhaps they could not forget it even if allowed, but officially it is enforced so much that even the very young, who didn't know it (at the time), are tremendously and emotionally aware of it. * * * A frequent question is: 'How do you conduct the battle for peace there (in America)?' Often it is strict party line propaganda even to the words used, but very often it is fervently believed. There were many, many tearful eyes when this subject was up."

There is, I suggest, a close psychological relationship between their conviction that they are innocent and their convictions that we (or our rulers) are guilty. They not only assume they are innocent; they assume we know they are innocent, and in the light of that assumption all of our military activity looks to them suspiciously aggressive. They see us building military bases around them, for instance, and sending U–2 planes over their territory, and rearming West Germany. In our eyes—taking the danger of Soviet aggression for granted—these things are obviously defensive in purpose. But to the Soviet people—taking their own innocence for granted—our plea of self-defense has a hollow sound. They ask themselves: "Who, or what, is America defending herself against? Surely not us—the Soviet Union—the most peaceloving country in the world. Surely the Americans must know that, after what we suffered in World War II, we could never deliberately start a war. And yet they are building bases around us. They are even allying themselves with the Germans—the very country that attacked us in World War II. There is only one explanation: Somebody in America must want a war."

In this deluded but completely logical train of thought, please notice the importance of our alliance with the Germans. The vividness of World War II in their memories has, as a necessary consequence, an almost obsessive fear of Germany. For us to ally ourselves with the West Germans, whom they regard as more or less re-Nazified, therefore seems to them almost like an open alliance with aggression. Another guide at the American exhibit says: "On German rearmament my discussion was constantly interrupted by emotional outbursts that relived the horrors and sufferings of World War II." And Urie Bronfenbrenner quotes a Soviet citizen as saying to him: "'We know the Germans better than you do. Twice in the life of our country we have had to defend ourselves against German aggression. We can't allow this again. And the West German Government is letting Nazis back to power.' And then, in a much louder voice as he lost control, 'I see, for you an airplane is just something to take pretty pictures out of, and do you know what it means to me when I look up and see an airplane? It means the death of my mother, the death of my father, the death of my brothers and sisters and all those that were dear to me.'"

Those two are, I think, the two most fundamental of the mirror-image similarities: a feeling of being threatened on both sides, and a feeling of innocence on both sides. They want war; we want peace.

A third similarity is the resemblance between the values invoked by us and the values invoked by the Russians. It is true that their meaning of democracy is somewhat different from our meaning. But with this major exception and a few minor ones the avowed goals and values of the Russians are pretty much the same as ours. We say we want peace, friendship, national independence, equal opportunity, help for the unfortunate. So do they. They say they value truthfulness, unselfishness, material well-being, strength, unity, courage. So do we. We rate America high and the Soviet Government low, in terms of these values. They rate the Soviet Union high and the American "ruling circles" low in terms of the same values. We say "good" where they say "bad" and vice versa. But what we both mean by "good" and what we both mean by "bad" is to a remarkable extent the same.

A fourth similarity is that we and they both tend to cherish what might be called a black-top image of the enemy—that is, a belief that the mass of the people in the enemy nation are ordinary peace-loving human beings like ourselves, and that the moral evil is concentrated in a handful of criminals at the top. We, of course, regard the Russian people as comparatively innocent, while the Communist Party leaders are a privileged group, oppressing the mass of the people and, with their fanatical belief in Communist expansion, endangering the peace of the world. We know that it is the rulers of the Soviet Union, not the people, who are to blame. But they think they know, equally well, that it is the rulers of America, not the people, who are to blame. It is Wall Street, it is the Pentagon, it is the small band of capitalists who profit from the arms race, that is endangering the peace of the world. Of course we are all familiar with this as the Communist propaganda line, and of course the Soviet people don't necessarily believe the propaganda line. But as I've said, there is now a great deal of accumulated evidence that most of them do believe this particular propaganda line. They cling to their black-top image of us almost as firmly as we cling to our black-top image of them.

A fifth mirror-image similarity is the belief on each side that since the enemy usually tells lies, he is not worth listening to. We, of course, don't trust what they say, and a great many of them, I'm afraid, are almost equally distrustful of what our official spokesmen say.

These, then, are five major mirror-image resemblances. They can be summarized in five sentences, all five of which could be said with conviction by either a typical Russian or a typical American:

1. They are aggressive.
2. We are peaceful.
3. We believe in all of the good things: national independence, democracy, equal opportunity, and so on.
4. They have evil rulers.
5. They tell lies.

So much for the mirror-image similarities. But if we are to keep things in proper perspective, and not make a fetish of this mirror-image concept, we had better notice some of the differences. Six differences seem to me to be important:

On the American side, the viewpoints of leaders and public are so similar that there seemed to be no need to distinguish between them. On the Soviet side leaders and public are much more likely to have different (though not necessarily contradictory) attitudes. In other words, the Soviet leaders are less representative of their own people; in this sense, at least, they are less democratic.

The Soviet leaders apparently see themselves as leading a process of mighty, inevitable and desirable Communist expansion, and as being ready, with no sentimental moral qualms, to use force in the interest of Communist expansion whenever its costs and risks are not too great. In this cause the rational use of force is taken for granted; "force is the midwife of every old society that is pregnant with the new." For this there is no real American analog. While we are quite prepared to use force in what we see as short-term or even long-term self-defense, its rationale for us is necessarily defensive; we lack the Communist leaders' expansionist impetus, and with it their readiness to use force when its only justification, even in their eyes, is the rational implementation of expansion. In this sense we are less aggressive and less imperialistic than they are.

Similarly, rational and skillful deception seems to be a more accepted part of the Soviet leaders' self-image than of the self-image of most Americans. Of course we are not blameless on this score and many of us know it. "Our halo was loused up" in both the U–2 and the Cuban incidents. But there have been no official American lies that begin to compare with the Soviet leaders' claim that the "people's democracies" are actually independent, or their claim that we started the Korean war. And the sense of outrage in many American minds when our self-image of a truthful America was impaired by the U–2 and Cuban incidents testifies to the reality of that image, and to the reality of the forces resisting its impairment. Relatively speaking we are more truthful.

If you have been made a little uneasy by the dogmatic flavor of the above statements that we are more democratic, nonexpansive, and truthful than the Soviet leaders, your uneasiness is itself a reflection of a more fundamental difference: most Americans are more openminded than most Communists. And as a result our world picture is more realistic than theirs.

This is perhaps the most crucial question raised by the parallel-column presentation. At every point of contrast the question comes up: Which is closer to the truth? Every reader will provide his own set of answers to these questions. A paper of this length can hardly consider them at all. But it can at least suggest the danger of leaning over backward in an effort to be objective, and point out that some highly objective people have reached the conclusion that the overall balance sheet is very strongly in our favor as far as realism is concerned. George Kennan, for instance—one of the least chauvinistic and most evidence-oriented of American scholars—says that the Communists have "viewed Western society through an ideological lens as distorted as any men have ever used."

While the parallel images described in this paper do not in themselves prove anything about realism, they do throw a spotlight on some articles of the Soviet faith that we, even after making allowance for our own naturally one-sided viewpoint, can scarcely fail to regard as flagrantly distorted. Consider, for instance, the Soviet leaders' view of American bases as self-evidently aggressive (though we did not drop atomic bombs on Moscow even when we had a monopoly of them), or their conception of the extent and villainy of "American imperialism" (though Western "imperialism," especially that of America, has been mellowing and more or less voluntarily retreating for 40 years), or their picture of the revival of nazism in West Germany (though Adenauer had been in a Nazi concentration camp), or the amount of exploitation, deception and subversion they attribute to the actually rather human leaders of the West, or their total whitewashing of their own record of aggression and domination (though it includes the take-over of East Europe, the war in Korea, the intervention in Hungary, and many others).

We are obligated to challenge our own world picture as rigorously as we challenge theirs. We are obligated, perhaps, to conclude that, from their point of view, they are as logical as we are and feel as righteous as we do. We are not obligated to conclude

that their point of view is as close to reality as ours.

On the Soviet side there is an ominously greater amount of military self-confidence.

Our meaning of democracy is rather different from theirs. They give at least lipservice to government by the people and government for the people, but seldom mention individual freedom, which is extremely prominent in the American ideology.

Not all the differences, however, are in our favor. One clearly is not: the warm feeling of friendliness toward America that apparently exists in most of the Soviet people and even, perhaps, as a component in the attitude of many of their leaders. For instance, the themes, "they are like us" and "America is a wonderful, fascinating country" have little or no parallel in the thinking of most Americans about the Russian people. Our feeling toward the Russian people, though conscientiously friendly, is pallid in comparison with their feeling toward us. Their readiness to reach out a hand toward us is perhaps the chief departure, on either side, from the grimness of the black-and-white picture. It would be our misfortune as well as theirs if, blinded by our own black-and-white picture, we failed to recognize it.

But, as we have seen, the similarities unquestionably outweigh the differences. This is represented statistically by the fact that 43 percent of the ideas on the American side have almost identically worded counterparts on the Soviet side, and another 34 percent have counterparts that are similar if not identical. Only 23 percent—about one-quarter—have no recognizably similar counterparts at all.

In other words, the mirror image is an abundantly demonstrated fact.

The next question is: How can we explain it?

One set of reasons is clearly political. Any political leaders—those in the Soviet Union, for example—are likely to want to stay in power. And we know that the political leaders in the Soviet Union have a peculiarly intense desire to stay in power. We know, too, that they are more able to manipulate the psychological environment of their followers than are, for example, the political leaders in the United States. Stalin could say "We are struggling for peace" and stack the cards, in the information media inside the Soviet Union, in such a way that most of the people would have very little basis for disagreeing. He would want to stack the cards, in order to gain popular approval and consolidate his own power, and he would be able to stack them effectively, because he was the dictator in a totalitarian society. Perhaps in some degree similar factors have operated on our own side of the Iron Curtain.

These political factors are the proper study of the political scientist and the historian. We can properly leave them to Merle Fainsod and George Kennan. But, after giving due emphasis to such political factors, it is our proper business as psychologists to focus on, to describe, and then to try to explain the psychological factors. For example, what were the psychological factors, in the minds of the Soviet people, that Stalin felt he could make use of in the process of winning approval and consolidating his power? Did he feel that if he depicted himself and his enemies in a certain way he would strike a responsive chord in the people, and that if he described himself and his enemies in a different way he would not strike a responsive chord? And do these psychological factors in Soviet minds have certain counterparts in American minds?

The evidence suggests that they do. The evidence suggests that there is a more or less standard pattern toward which political imagery tends to gravitate, and that this standard pattern varies remarkably little, even in cultures as different as the Soviet Russian culture and the American culture. There is a more or less standard self-image toward which all self-images tend to gravitate, and there is a more or less standard enemy image toward which all enemy images tend to gravitate. There is also a more or less common value system in terms of which all political approval and disapproval tends to be expressed. To recapitulate, we and the Russians—and many other political groups throughout human history—have subscribed to something not very different from the following creed:

"We are human beings. We have our faults, but on the whole we are humane and sensible. We would like nothing better than to live at peace, and to cultivate our land, raising our children as they should be raised, not disturbing others and not being disturbed. But we are disturbed. Out there beyond our own land are enemies. They have evil rulers who oppress them and who even want to take our land away from us, and to oppress us, as they oppress their own people. They come to us with sweet words saying that they too want peace, but we cannot believe them, for their actions speak louder than their words. Therefore we must be strong, since the only language our enemy understands is the language of force. And we can be strong because, though too often tempted by the soft ways of peace, we are men, not slaves."

This, the evidence suggests, is the more or less universal, more or less standard pattern of imagery whenever human groups are in conflict. Sometimes it is close to reality; sometimes it is rather far from reality. But always there are psychological forces pulling human imagery in the direction of something like this. It is up to us, then, to understand what those psychological forces are. We have some good clues. We can talk about rationalization, and projection, and a strain toward consistency, and consonance and dissonance and various other things. It behooves us—if we want to contribute to peace—to use our best clues, and to get down to brass tacks in research on this problem.

But in the meantime it is impossible to resist the temptation to speculate as to how the Russians are deluded, and how we ourselves are deluded. At what points have the image-making forces taken the Russians furthest from reality, and at what points have they taken us furthest from reality?

My own personal hunch is that the Russians are most dangerously deluded on three points:

First, they do not see that we are afraid of them. They think of us as ruled by capitalists who are afraid of the spread of socialism, but they do not think of the American people as afraid of the spread of Soviet power. Not recognizing our fear, and assuming that they themselves are obviously one of the most peace-loving countries in the world, they are unable to interpret our bases, and our reconnaissance flights, and our rearming of Germany, as having any intelligible purpose except aggression.

Second, they have firmly fixed in their minds the delusion that there are evil forces in America that deliberately want war. There are "ruling circles" in Wall Street and the Pentagon who are the "bad guys" both in terms of oppressing the American people and in terms of threatening war. This "black-top image" has for them the function of preserving their basic assumption that there are some bad buys in America from any revision on the basis of discovering that individual Americans are ordinary peace-loving human beings like themselves. They can always say to themselves, "Of course, my American friend John Smith is all right; he's only duped by the capitalists and militarists who rule, behind the scenes, in American society." We know that hostility to the Soviet Union is distributed throughout all levels of American society, and that most of our leaders, whatever their other faults may be, are as peace-loving as ourselves. But the Russians don't know it.

Third, as we have seen, they are inclined to assume that we Americans, or rather our "rulers," are such unscrupulous propagandists that listening to us will expose them to the danger of being taken in and becoming our unwitting dupes. This is also a particularly unfortunate delusion from the standpoint of peace, because it puts a psychological obstacle in the path of good two-way communication and almost insures that we cannot make much headway in eliminating the other dangerous delusions in their minds.

As for us Americans, I'm going to stick my neck way out and suggest—as a football for you and the discussants to kick around—three delusions, or partial delusions, or partial misconceptions, that seem more dangerous to peace than any others. Not surprisingly, they are the mirror images of the three Soviet delusions mentioned above.

First, like the Russians, we find it hard to believe that they are afraid of us. But if anything is demonstrated by all of the abundant evidence accumulated during the past 5 years, it is that the Russian leaders and people are afraid of us, at least when we are allied with Germans, as we are today. Take the Berlin situation, for instance. The Communists are clearly wrong if they make a power play to take the city, and we are clearly obligated to prevent that. But negotiations are still possible, and our negotiations are likely to be more skillful and successful if our negotiators are fully aware that the Soviet desire to stabilize the situation has in it an element of genuine fear. In this connection it is noteworthy that even in the earlier stages of the crisis, before attitudes had hardened as they have today, few Americans paid much attention to this Soviet fear. Walter Lippmann did, especially in his report of his interview with Khrushchev, in which Khrushchev expressed a strong desire to stabilize the situation before the West Germans are fully armed with nuclear weapons. Walter Lippmann felt that this fear was genuine and urgent. But few Americans paid much attention to him. Like the Russian people, we Americans are so sure of our own peacefulness that we find it hard to believe that anyone could sincerely, honestly be afraid of us.

Second, are we, like the Russians, too ready to see our enemy in terms of villains at the top and ordinary well-meaning people down below? I would say yes. Of course our picture has large elements of truth, but it overestimates how diabolical the Soviet leaders are (since the death of Stalin), and it underestimates how largely the delusions which make the Russians dangerous are now shared by the people as well as their leaders.

Third, are we too ready to dismiss anything the Soviet leaders say as being lies and therefore not to be listened to? Again, I would say yes. Most of the time, according to my hunch, what they say is fairly close to what they really think. We need to study their actions much more than their words, but, taken in conjunction with their actions, their words are often illuminating. And certainly we don't pay much attention, now, to what they are trying to tell us. Let me ask you: How recently have you listened to Radio Moscow's broadcasts in English? How recently have you read a book, or even an article, written from the Soviet point of view? Have you read, for instance, any of the collection of Khrushchev's speeches that was put out in this country by E. P. Dutton & Co.? Well—since this group obviously represents the intellectual cream of America—if that kind of listening to the enemy is unusual even here, think how rare it must be in the country as a whole.

This third point suggests another way in which we as psychologists might contribute to a bridging of the gulf of incomprehension that now separates the American people from the Soviet people. We are supposed to know something about the process of communication and about factors that clog the channels of communication. Perhaps we can do something to find out specifically what is clogging the channels of communication between us and the Russians, and what can be done about it.

For instance, one reason why we Americans don't really listen to Russians and try to understand their viewpoint could be a fear that in doing so we might be, or might be regarded as, "soft on communism." If so, then a still more basic need for us as psychologists is to clarify, in our own minds, what we think the basic attitude of the American people toward communism ought to be. I suggest that the attitude we should cultivate, in ourselves and others, can be best characterized as tough-minded empathy, or empathic tough-mindedness.

The American attitude needs to be tough-minded if it is going to support the efforts that are necessary in order to stop the forcible expansion of communism. Many of you probably feel—as I do—that in the present state of the world we need more military strength, not less; more determination to use force if necessary to stop Communist aggression; more determination to win the battle of ideas. These things all call for toughness of mind, including a critical awareness of the flaws in the Communist logic and the flaws in the factual premises on which that logic is based.

But at the same time it should be an empathic tough-mindedness, meaning by empathy not a sneaking sympathy for the Communist cause but a realistic, imaginative understanding of how the whole world looks from a Communist point of view, as a preliminary to a critical dissection of that point of view. This is a difficult combination psychologically, but it is essential. The first step of empathy is as essential as the second step of stringent criticism. Only a combination of the two can give us the depth of understanding that we need. And we do need depth of understanding, if we are to win either our ideological battle against communism or the joint battle that we and the Communists are fighting against mutual suicide.

[From the Washington Post, Sept. 5, 1961]

EXPERT NOTES DELUSIONS THAT FORM BLOCK TO UNITED STATES-SOVIET UNDERSTANDING

(By Eve Edstrom)

NEW YORK, September 4.—It is a looking glass world that we live in—we and the Russians—and, while familiar, it is distorted, producing three delusions more dangerous to peace than any others.

These delusions were outlined today by Ralph K. White, Soviet-bloc specialist for the U.S. Information Agency, at the American Psychological Association convention.

He warned that while the American attitude must be tough minded to stop the forcible expansion of communism, it must be based on realism if we are to win either our ideological battle against communism or the joint battle that we and the Communists are fighting against mutual suicide.

The first delusion, White said, is that we, like the Russians, are so sure of our own peacefulness that we find it hard to believe that they are afraid of us.

While we are clearly obligated to prevent the Communists from making a power play to take Berlin, White warned that our negotiations are likely to be more skillful and successful if our negotiators are fully aware that the Soviet desire to stabilize the situation has in it an element of genuine fear.

Before attitudes had hardened as they have today, White noted, columnist Walter Lippmann, in his interviews with Premier Nikita S. Khrushchev, had observed that the fear, based on our alliance with the Germans, was genuine and urgent, but few Americans paid much attention to him.

The second delusion, White said, is that we, like the Russians (are), too ready to see our enemy in terms of villains at the top and ordinary well-meaning people down below.

While this picture had large elements of truth, he said, it overestimated how diabolical the Soviet leaders are (since the death of Stalin) and it underestimates how largely the delusions which make the Russians dangerous are now shared by the people as well as their leaders.

The third delusion, White continued, is that we are too ready to dismiss anything the Soviet leaders say as being lies and therefore, not to be listened to.

Most of the time, according to my hunch, what they say is fairly close to what they really think, he said. We need to study their actions much more than their words, but, taken in conjunction with their actions, their words are often illuminating.

White said the mirror images of the three delusions in the Soviet mind, are these:

While they believe we are ruled by capitalists afraid of the spread of socialism, they do not think the American people are afraid of the spread of Soviet power. Not recognizing our fear, they are unable to interpret our bases, reconnaissance flights and rearming of Germany as having any intelligible purpose except aggression.

Secondly, it is the "gang of capitalists and militarists in the Pentagon and Wall Street" who deliberately want war and not the ordinary peace-loving individual American. The Russian people just do not know that our leaders are as peace loving as ourselves.

Finally, our rulers are such unscrupulous propagandists that listening to them will expose the Russians to the danger of becoming our unwitting dupes.

White cautioned that the mirror image does not apply in these areas of importance:

On the American side, the viewpoints of leaders and the public are so similar that there is no need to distinguish them. But the Soviet leaders are less representative of their own people, in this sense, less democratic.

Soviet leaders accept the use of aggression if it is to further the cause of communism. This had quite a bearing on the Berlin situation. Americans are prepared to use force only in self-defense. Therefore, we are less aggressive and imperialistic than they are.

Skillful deception is accepted to a greater extent the Soviet leaders' self-image. While our "halo was loused up" in both the U–2 and Cuban incidents, these do not compare with the Soviet claims that the "people's democracies" are independent or that we started the Korean war. Relatively speaking, we are more truthful.

Most Americans are more openminded than most Communists and as a result our world picture is more openminded than most Communists and as a result our world picture is more realistic than theirs. Their viewpoint is flagrantly distorted, as in the total whitewashing of their record of aggression and domination.

On the Soviet side there is an ominously greater amount of military self-confidence.

Finally, our meaning of democracy is rather different from theirs. While they give lipservice to "government by the people" and "government for the people"—thereby showing their ideology is not as diametrically opposed to ours they seldom mention individual freedom, which is a cornerstone of our ideology.

White's speech was based on a 64-page comparison of Soviet and American images. Of these, 43 percent of the ideas on the American side had almost identically worded counterparts on the Soviet side and another 34 percent were similar. Only 23 percent had no recognizably similar counterparts.

PROTEST HUMBLE OIL VICE PRESIDENT APPOINTMENT TO HEAD OFFICE OF OIL AND GAS

Mr. PROXMIRE. Mr. President, the "long black hand of oil" is reaching out again in our Government.

On September 5, an Humble Oil & Refining Co. vice president, Mr. Jerome J. O'Brien, of Midland, Tex., was appointed Director of the Interior Department's Office of Oil and Gas.

Mr. O'Brien brings 27 years of service to the oil and gas industry to a post in which he will be required to provide the principal leadership for the coordination of oil and gas programs and policies of all Government agencies. These policies O'Brien will coordinate include—oil import decision, oil research, public land use for oil, and many others directly affecting the Nation's millions of oil consumers.

The President owes the country an explanation for this latest in a string of appointments which wholly ignore the consumer and give the petroleum industry a stranglehold on U.S. Government policy affecting oil and gas.

Confidence in the impartiality of our Government where oil is concerned has been severely shaken by the appointment of New Mexico oil millionaire, John Kelly, still a holder of vast oil interests, as Assistant Secretary of the Interior for Mineral Resources, and Mr. O'Brien's boss, John Connally, still executor of one of the biggest private oil estates in the world, as Secretary of the Navy—the biggest buyer of petroleum fuels in the country—Lawrence O'Connor, former vice president of Goldston Oil, and an active officer in a large oil and gas trade association, to the Federal Power Commission, which regulates the rates natural gas companies may charge for gas. Big oil boys Connally, Kelly, O'Connor, and O'Brien are now the four keymen in our Government in setting the policies that help determine the price the American consumer pays for oil.

The influence of oil and gas on American politics is greater than ever. Such willful appointments only increase the power wielded by our most politically potent private interest group. When will it be recognized that the American consumer has a stake in the regulation of the oil industry?

Once again, with the O'Brien appointment, the Kennedy administration's otherwise fine public service record is blackened by oil influence.

Wednesday oil consumers had their day in the Senate when many Senators protested the effect of oil import restrictions in shoving up consumer prices. The consumers got the oratory. But can there be any doubt in view of these appointments that the big oil boys will get the Government oil policies they want?

ANTICOMMUNISM STRATEGY SEMINAR

Mr. GOLDWATER. Mr. President, I ask unanimous consent to have printed at this point in the RECORD an address by Dr. Stefan T. Possony, professor of international politics, Georgetown University, and associate, Foreign Policy Research Institute, University of Pennsylvania, at the anticommunism strategy seminar held at the U.S. Army Command and General Staff College, Fort Leavenworth, Kans., Saturday, July 29, 1961.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SPEECH OF DR. STEFAN T. POSSONY

Mr. Stevenson, General Johnson, ladies and gentlemen, recently questions have been raised by high political personages whether there is a possibility that the United States could, or should win, victory or try to achieve ultimate success in the struggle against communism. The implication of asking this question, of course, is a doubt about the American record, the American achievement, American moral convictions, American purposes, and the strength of the United States.

In struggle, the better side wins. If this be true, and the statement reflects a historical experience, then we have to ask ourselves: Which is the better side? For example, is the Soviet Union superior in intellect, morality, economic effectiveness, political structure, freedom, value systems? The answer to that question is, generally speaking, No.

Is the Soviet Union superior in military strength? The answer is: Heretofore it was not; it is not now, but it might be in future. Yet the Soviet Union doesn't have to become stronger. The United States can remain in the lead indefinitely—if it makes the effort.

Is there, then, another area where the Soviet Union really is superior to the United States? I think there is. We can generalize by saying that the Soviet Union is superior in cunning, deceit, and singleness of purpose. The Soviet Government works at this conflict for 24 hours a day, every day in the year. The conflict and the winning of this victory over the United States is practically the sole, and certainly the overriding, purpose of Soviet statecraft.

The Soviet Union also is superior in its willingness to take risks.

Last, but not least, it is superior in its conflict organization which it has been building for over 40 years—designed for the specific purpose of fighting and winning this struggle against freedom.

None of these elements of superiority on the Soviet side is of a nature such that we could not equal or better our opponent. If we readjust ourselves so that we will be superior in the fields where, at the present moment, there is some doubt about our effectiveness, then there won't be any question that the conflict can be won by ourselves and—this implies a legitimate question—it can be won without destroying our form of government. In fact, I would wager that as we fight this conflict, and win it, democracy will get stronger, more effective, and more attractive.

The subject I am to discuss is "Communist Vulnerabilities." A vulnerability exists, or does not exist, depending on what the opponent does, or does not, do. Vulnerability is a relational term; it is not something like our weight, which is unrelated to the weight of other people. A vulnerability is a weakness, but it doesn't necessarily have to be a weakness: It must be some factor which the other side can do something about, which it can exploit, and which, like in judo, it can turn against the opponent.

Remember the old legend about Achilles' heel? Achilles was supreme until Hector opposed him, and shot at this little spot in his left hindfoot. Up to that moment, there was no point in talking about Achilles' vulnerabilities. The vulnerability was entirely on the side—or in the head—or his opponents who were too cowardly, or not resolute enough, to take him up in struggle. But as soon as one opponent took heart and aim, the "invulnerable" bully was stopped.

There is another side to this Greek story: Achilles was vulnerable in a spot which we would consider to be quite unimportant. It wasn't said that Achilles had lost an arm or a leg, or suffered from heart disease, nothing of the sort. It was a little spot on his heel, which remained uncovered by his protective coating. A single attack on that minor deficiency knocked him out of business.

When you discuss the vulnerabilities of the Soviet Union, you hardly will identify one key vulnerability which tops everything, on which we can go to town and which, if we just push it, would bring down the whole edifice. It isn't that simple.

The Soviet Union has a large number of very significant vulnerabilities but, as I said, those are vulnerabilities only if we take advantage of them. None of these vulnerabilities in itself is too significant. Together, though, they keep the Soviets down to the 6-foot level. But even if not a single vulnerability were deadly, it would not follow that the Soviet Union is invincible.

Let me interpolate that it is one of the most pertinent experiences of all conflicts that at one point or the other, the aggressor creates a myth of invincibility. This myth is supposed to cow and paralyze the defender and, usually, it is developed and propagated systematically by the aggressor's psychological warfare machine. When you go through the Napoleonic wars, for example, Napoleon was considered to be "the man who cannot be beaten." For a long while, Hitler was considered the man who could not be beaten. But all the great "world conquerors" were defeated. It always was a bloody and difficult task, but there is no such thing as an invincible man.

When Napoleon was called out to command in the Battle of Borodino, he fell sick. He didn't fight the battle, his lieutenants did, and they displayed a considerably lesser cut of generalship. They won the battle in a way, but it was not a good enough victory. When Napoleon was out to fight the Battle of Waterloo, he had another little affliction—not significant, just a case of piles—but sufficient so that he didn't show up early enough on the battlefield. It was his last battle.

This is the very essence of the problem: When you talk about human beings and you get the idea that another human being or another human structure is invincible, you don't talk about human beings. You talk about gods, but this is a completely fictional and mythical idea. Be strong yourself, and the other fellow no longer looks like a giant.

The Soviet Union has a lot of vulnerabilities in the stomach area. I won't go through them; I will just list them. Agriculture has been the bane of Soviet existence ever since the Communists took over, and it doesn't show too many signs of improving. The Communists got into power promising paradise on earth in terms of human progress, consumer goods, wellbeing, and more concretely, housing and electrification. None of these promises have been redeemed. Consumer goods, of course, increased a little bit—there is no doubt about it—but you cannot really consider that the hunger of the Soviet consumer for commodities has been stilled, or will be stilled for a long time to come.

Wages are low for many professions, and work conditions are poor in practically all jobs. I want to call your attention to this point because the Communists exploit stomach issues in our orbit. When there is a wage dispute in France or Britain or in the United States, the Communists are perfectly able to take advantage of such trouble by agitation and strikes; yet the wage levels, the income levels, and consumption levels of the most poorly paid Western workers are infinitely higher than those of the most highly paid Soviet workers.

I want to stress that these are relative matters. The fact that the Soviet consumer goods industry may have been producing a little bit more this year than last year, or 10 years ago, does not mean that you cannot exploit the obvious shortages that persist in the Soviet economy—just as little as our great opulence and our great investments in underdeveloped countries prevent the Communist from exploiting whatever difficulties arise in free economies.

The planning structure in the Soviet Union has shown itself to be quite effective in the areas of armament production and heavy industry. In the rest of the economic life, it is not so effective, but it is very good at juggling statistics. On that basis, I think we fall a little bit behind; we could do a better job at juggling of statistics, too, but we really don't have to. People don't eat figures which are published in a book. Consequently, while the Communists are very adept in hailing the contributions they allegedly are making to human welfare—many people in Africa, Asia, and Latin America and some Americans believe them—the Russians themselves know it's a bunch of bunk. The Communists, though, remain the world's leading advertising and make-believe specialists.

The national structure of the Soviet Union is a crucial weakness, in two ways. First, the Soviet Union itself is a multinational state. Many Americans live under the misapprehension that it is a national or uninational state. It's nothing of the sort. The Soviet Union, like the old Hapsburg monarchy, is a multinational structure. Second, the Soviet bloc, i.e., the Soviet Union and the satellites, is the last really surviving empire in the world.

We are very anxious, on our side, to see to it that the former French Empire and the former British Empire are reorganized gradually into modern federative or commonwealth structures. But the Soviet Empire is moving in the opposite direction. Even if there were developing a bicentral structure based on Moscow and Peiping, surely, the model of "Austria-Hungary" should enable us to understand such historical processes.

We uphold, the whole history of the United States has been to uphold, the principle of self-determination. The Declaration of Independence, among other things, is the first state document proclaiming the principle of self-determination. The Monroe Doctrine assured the self-determination of Latin American nations. President Wilson advanced the cause of self-determination during World War I in central Europe and the Ottoman Empire. He refused, incidentally, to uphold it in the case of Russia, for reasons which are not too clear, but which were influenced by his unfamiliarity with the national problem in Russia.

In the Atlantic Charter of World War II, the principle of self-determination was reasserted. Through the Marshall Plan, the United States defended the principle of self-determination in Europe. In the underdeveloped areas our aid programs are inspired by the thought that nations and peoples ought to control their own destinies.

There are in American foreign policy few traditions nobler than the essential commitment of the United States to self-determination, or to national freedom. Yet the Soviet Union is the one area to which we have not

applied the principle of self-determination. In the Soviet Union only about half of the population are Great Russians; the other half is split about evenly between the Ukrainians and White Russians, and non-Slavic groups, including the Turkic and the Caucasian peoples. Some are Islamics, and farther to the east some are Buddhists. On the Western frontier there are the various Baltic peoples. According to the latest Soviet census, 2 million Germans now are living in the Soviet Union, just as many as in West Berlin. Where did they come from? There are Finns, Poles, Rumanians, etc. and also Jews who are not among the favorite sons of the Kremlin.

The national question always has been a major problem, whether in the tsarist or in the bolshevik Russian empire. By overemphasizing the social content of the bolshevik revolution of 1917, our books have falsified its meaning. It was a social revolution in many ways, but the national question had an enormous, if not decisive, impact on the revolution of 1905, and the two revolutions of 1917. In World War I, the Finns, a very small group really, played a great role in undermining the tsarist regime, and they did so strictly for reasons of nationalism. The mutinies in Petrograd which toppled the tsar were mutinies by Ukrainian regiments and by Estonians, for example. These facts often are glossed over, but yet it is important to recognize these modern versions of the story of Achilles' heel.

We often hear it said that the spirit of nationalism is dead in the Soviet Union, notably among the non-Russians who are run by the Russians. We are obviously talking nonsense. All over the world, the spirit of nationalism is alive, and has proved to be the strongest of all political creeds. The Communists recognized this themselves in their own 50-year-old doctrine on self-determination (which was a departure from Marx), in their phony "federal" constitution, and by their current support of "national liberation movements." What does this term mean? It means nationalist movements. The Communists try to capture those. For example in Africa, they don't go in there with communism, per se. They go in there behind the wings, behind the cloak of nationalism. The Communists conceal themselves behind nationalism, for the obvious reason that the national idea has greater appeal than communism.

We are talking about the China squabble. I won't go into this problem; it takes too much time and I'm not sure that current stories—some clearly planted—are not highly exaggerated. But, suppose there is trouble between China and Russia: I want to stress that we rarely mention the numerous national struggles in the Soviet Union which have been taking place for generations. There still are purges in the Soviet Union. For example, there was a series of purges only a short while ago, in Kazakstan. The Kazaks are not necessarily the greatest or strongest nation in the Soviet Union, and I don't believe we should place our hopes on the Kazak national movement.

Nevertheless, there has been trouble in Kazakstan, and it was nationalistically codetermined.

As to the political formula of the Soviet Union, it is very clear that communism did not bring paradise. Why should anyone expect any system to bring paradise on earth? This is a naive expectation but many westerners incline to believe in miracles of the East. We know how difficult it is to make our own system work—on principles we have good reason to think are superior to the principles of the opponent. We have our troubles, but on the record that can be inspected, we have been most successful. Yet we turn around and assume that the system on the other side is twice or thrice as successful—the biggest show on earth. The Soviet Union has been successful in certain segments and most of these segments bear on military preparations and strength. Communism is successful in the power struggle, but it is not succesful in terms of human affairs. After all, the power struggle is a subordinate part of the overall human and humane task.

The Soviet regime is an oppressive regime. It has several spectaculars thrown in and, of course, if you were a Russian, you would enjoy it when your nation has startling successes, irrespective of the regime. Under Hitler, German science made great progress—German scientists discovered uranium fission, others built the first useful rockets, they were ahead in jet propulsion and without German-invented atarbine, our American forces would have had trouble staying in Guadalcanal. What does this prove for Hitler or nazism? Don't make the mistake to assume that because the average Russian is going to applaud Major Gagarin, and applaud him with good reason for his pioneering deed, that therefore, ipso facto, this same Russian believes that Mr. Khrushchev is just what the doctor ordered for him in terms of income, in terms of career, in terms of security, in terms of peace, in terms of freedom, in terms of happiness—in terms of anything. To believe that Russians like dictatorship is to display contempt of the Russian nation. And to believe that a genuine Communist does not see through Stalin's and Khrushchev's fraud is to display contempt of communism as a political concept.

The Soviet regime has some support; there is no doubt about it. But who is the main support? The Soviet regime, which supposedly has been fashioning a classless society, has created a class and caste society all its own, a society more stratified than any in Europe and North America. You don't have to take my word for it. Read the analysis which the Yugoslav Communist, Milovan Djilas, wrote about this very point.

It is inevitable that the upper class of the Soviet society is going to be sympathetically inclined to the Kremlin. Those are the fellows who won and who moved ahead of the crowd. Those are the fellows who are profiting from this regime. Every system must benefit some individuals and some groups, otherwise it could not survive. Most of the Russians who come over here as travelers are members of that upper class or are trying to move upward. It's rather surprising that so many of them are not so ostentatiously enthusiastic about the paradise. Incidentally, have you yet seen many non-Russian Soviet tourists?

The regime gets a certain amount of mass support, provided it is moderate in its policies and provided it does something for the citizens. If it doesn't do that, the support is of the type attainable from terror.

The old terror system still is in force, though the Kremlin now makes efforts to display the carrot more often than the stick.

Russians have no freedom of speech, they have fraudulent elections, they have an all-pervasive dictatorship which tells the individual what to do and which does not allow much recourse. This looks pretty orderly in a textbook, maybe. In practice, though, the little people in Russia are being confronted by petty bureaucrats who order them around. It is not the idea that rules—even assuming the idea of communism still holds attraction. It is the little irresponsible tyrant who cracks the whip.

Functionally, this is the same system which characterized the czarist regime 100 years ago or 80 years ago, only the present version is worse. The Russians, the Ukrainians, the Caucasians, and the Turkic peoples didn't like it then. They like it even less now.

Now, some by standards assume that all this has changed and that basic aspirations of human nature—which include are that man wants to be left alone and live his own life as he sees fit—have been suspended under the glories of the Communist regime. Certainly, there are masochists and careerists, adulators of power and lovers of oppression. But if you believe in democracy, if you believe in a representative form of government, if you believe in a basic and unextinguishable freedom urge—and you have good reasons for those beliefs—then you shouldn't suspend those beliefs when you are talking about the Soviet Union.

This does not mean that the history, or the cultural background, of the Russians is comparable to ours, that there are no differences between East and West, and that what we consider democratic, is necessarily what they would consider to be democratic or practical. This is a second level of debate which we will ignore today. Fundamentally, though, if you pose as a general principle that individual freedom is a highly appreciated value everywhere, that everywhere people want a procedure through which governments can be changed and improved painlessly, and that no dictator anywhere can intellectually, physiologically, or morally qualify for omnipotence, why do you assume that all this does not apply to the Russians?

Insofar as Soviet strategic leadership is concerned, I pointed out to you that they are extremely clever and effective in terms of conflict management, but in terms of what they are claiming, they are in business for—which is to carry out the greatest reform of history, to abolish all human ills and make the pursuit of happiness successful—they are not. The inhabitants of the Kremlin are old-fashioned men, persons of one idea, one assumption, one experience and no audit capability. They are operating on a theory which never had more than partial validity and which after 100 years of rabbulistic debate is completely out of date To the extent that it is still being applied, this theory is wrong, and to the extent that it is not being applied, it is irrelevant. The fact that the Communists really do not implement communism, or develop the concept creatively, isn't avowed.

You have a fantastic setup in which problems are explained in terms of deductions based on unverified and disproved premises. Scores of untenable deductions are woven together and pyramided into an integrated "creed" which has the "cohesion" typical of paranoid constructs.

The political formula and the political concept of Soviet communism are dead. Don't make any mistake about it: They want you to believe the opposite. Indeed, they have no choice, for if they were to acknowledge ideological bankruptcy, their political hold would slip. When a political formula becomes inapplicable, a social revolution, or a political revolution at any rate, is more or less impending.

Communism is a system which we can debate in our schools, with enthusiasm, criticism, and footnotes, and we might look eagerly into all of its historic and theoretical ramifications. But in the Soviet Union, where people are exposed to it in compulsory indoctrination courses, communism has become a bore. I have talked to quite a number of those who did go through this ordeal of indoctrination. The students have to pass an exam, hence they bone up on communism. This doesn't mean anything. They sleep through most lectures and with the exception of a few rote phrases, they never think about "Marxism-Leninism-Stalinism-Khrushchevism-Maoism-Titoism." This is the fate of most ideologies and ideologists: after a while they lose credibility and can't hold audience interest. This is what happened in the Soviet Union.

The Soviet Government is engaged in incessant intrapower struggles. They fight against one another constantly. The ideologists are trying to come back. They are a

group of people who want to hang on; but they cannot refurbish their own thinking because a dogmatic ideology is change-resistant.

They are panicky because they know that their appeal has been lost. On the other hand, there are lots of pragmatists who are afraid the ideologists might ruin the show. The pragmatists present their programs in terms compatible with the old Marxist formulas but this type of papering over creates difficulties. Subtle redefinitions of political formulas in the past have brought down big empires. You have to evaluate this in a historical perspective. But don't assume, years before the change will have occurred, that the Soviet system has changed already.

Only 2 or 3 years ago, the collective leadership principle was reasserted in Pravda every day. You will not find it mentioned much now. At this moment, the collective has been steamlined down to a one-man collective: Mr. Khrushchev embraces all the collective leaders in his own body. The system cannot exist without a dictator. When the old dictator dies, the aspirants make an arrangement like in Rome, a triumvirate. But a little later, only one guy is left: Beria was shot, Malenkov is in Siberia, Molotov is in Austria, Bulganin and Zhukov are retired, and Mikoyan has lost his speech. Next time around, it won't be different: they just are unable to develop a succession procedure.

If this type of system were a good system, why don't we adopt it? If we believe it is a wrong system, and if we are convinced that no people ever should put into one single man's hands the responsibility for vital, life-and-death decisions because he is bound to make wrong decisions, and because his errors may endanger world peace far more significantly than any other single factor, then, by all means, let's stand on our convictions and proclaim them. Let us at least try to make the Russians see this point.

This question with which I started out, often unconsciously is prompted by the thought that the Communist regime is here to stay—it is solid; it is going to last forever. Nothing lasts forever, least of all political structures whose leaders have lost the sense of proportion. We should not argue ourselves into this type of rot of an a priori assumption. Let me give you a pertinent quote from Lenin:

"There is not yet a revolutionary people in Russia," said Mr. Peter Struve in 1905, "leader of the Russian liberals, 2 days before 'Bloody Sunday.' To this highly educated, supercilious and extremely stupid leader of the bourgeois reformists the idea that an illiterate peasant country could give birth to a revolutionary people seemed utterly absurd. The reformists of those days—like the reformist of today—were profoundly convinced that a real revolution was impossible."

Lenin made this comment in a speech of January 1917. This "highly educated" expert in revolution closed his remarks by saying, "we of the older generation may not live to see the decisive battles of this coming revolution in Russia." Six weeks later the February revolution overthrew the Tsar. Let us in this country, learn at least one historical lesson: the future remains unpredictable. We cannot bet on the lucky break, but Khrushchev can bet even less on the impossibility of a revolutionary tornado sweeping the Kremlin clean of bolsheviks.

The Russian revolution has been going on for about 120 years. It is still unfinished because the basic goals of the Russian revolutionary movement—and I am talking about the revolutionary movement of all the peoples living in the Russian empire—the basic desires, the basic motivations and objectives creating this movement, have not been satisfied or reached. The Russian revolution goes on, albeit in a muted way, in the basements and above all, in the minds. In East Europe, moreover, the Communists effected a counterrevolution. Eastern Europe was free after World War I, it became unfree after World War II. The non-Russian peoples inside the Soviet Union want to have self-determination properly acknowledged, not in this phony way in which the Soviet constitution sets up a federation from which 14 union republics alleged can secede, provided some later constitution spells out the requisite procedures. Soviet citizens proposing secession would be executed as bourgeois nationalists and traitors.

Are we justified in thinking that communism works? Does it work as military conquest or as a human progress system? You will not find advertising agencies which would go out of their way to tell the customer the faults of the merchandise they are paid to praise. When Lenin died, he knew that communism was a failure and he stated so privately to some people. Since Lenin understood the failure of communism, other Communist leaders must have understood the lesson too.

I wouldn't be surprised if some of the people around Stalin, or Stalin himself, also realized that communism as conceived by the theoreticians never could be installed, let alone be made to work. Don't take this as an excuse for complacency—quite to the contrary.

It means the idealists must fight a never-ending war to attain what never can be reached. The very impracticability of communism causes total conflict to become protracted and even eternal, so long as the idealists possess the means to fight. There also are the power practitioners. Insofar as they are concerned, the power struggle, the power conquest, and the advance on a world scale must continue for the glory of the Kremlin power elite.

In my judgment, the secret and presumably private and individual comprehension of the failure of communism and of the impracticability of the Communist idea explains why, since Stalin, the Soviet Union has become a Fascist State. The Soviet Union indeed, has all the outward and inward characteristics of a Fascist state. It is a dictatorship. It is commanded by an exclusive and self-regenerated ruling class. This ruling clique claims to be infallible. It is mendacious. It is strongly militaristic. It is strongly nationalistic. It is anti-Semitic. It believes in class stratification. It is maintaining and ascerbating social stratification. It is ideologically cynical. Whatever idealogical clothes it needs, it puts on, only to discard them when they become bothersome. It is using self-serving propaganda under false flags. It is imperialistic and expansionistic. It aims to embrace the whole world, and to rule ueber alles. This is basically the definition of a Fascist state.

Parading under the heading of the great messianic movement of communism, the Soviet Union is nothing but a more effective and dangerous Nazi system. There are differences: I don't want to underplay them, but the differences are small and, if anything, have been vastly overplayed. We should realize that Nazi Germany was a most successful state, not in peace, not in longevity—it lasted only 12 years—but in conflict and war. Nazi Germany was militarily well organized; it was after war, and it fought the war at the moment when it was propitious for them to fight. The same threat of deliberate aggression coupled with political conquest confronts us today—only the Soviet Union is relatively more powerful than Nazi Germany, and it has learned from Hitler's mistakes and tricks.

The danger of war may arise from at least three factors, but possibly from more. There is first, the internal pressure within the Soviet Union. Any time a system is cleaved by contradictions, to use Marx' term, especially dynamic contradictions, it has a tendency to explode outward. Second, Communist strategy is tied in with the power struggle. Whenever one faction takes the line of peace, or no war, there will be, on the basis of formal sociological interrelationships between political groups, a counterparty which must proclaim the need for war. These parties, mind you, exist within the Communist Party itself. Whether the war party wins or forces its line on the no-war party, or vice versa, depends on fortuitous, unpredictable, and perhaps trivial circumstances.

In a semireligious State, and the Soviet Union is a quasi-religious organization, policies, and strategies must be advocated by means of ideological justification. No one has the opportunity to avoid dogmatic expostulation. He must pretend to live up to ideological criteria. In order to be able to maintain himself in power, the Communist leadership type may have to adopt the most abstruse, or the most radical interpretation of the writ. This third factor, the forward impulsion, together with overconfidence, may lead to war.

Khrushchev now exults: "heretofore, history has worked for socialism; henceforth socialism is going to make history." Such phrases occur in his January 6 speech. Hitler asserted that providence had asked him to go the road of destiny, that he was walking with the sure footedness of a sleepwalker, that only he could save Germany. Khrushchev of 1961 displays the same type of psychology. Irrespective of ideological characteristics if a man has full power; if he's politically—albeit temporarily—omnipotent; if his power and prestige are increasing; if he's getting into a hurry because he's growing older; and if there are physical pressures on him as well as the desire to enter history as the augmenter of the realm: then he invariably will develop the psychology of overconfidence and aggressiveness. He becomes absolutely sure that he can make it, he is convinced he can win, and only he can really lead his people to victory. Consequently, he should take the plunge now, and not wait till he is older. He must be victor ante mortem.

This psychology befell Napoleon in 1812. Fouché told him, "You're going to get licked in Russia." Napoleon replied, to this effect, "I know the difficulties, but a war between France and Russia is inevitable. I'm the only man who can fight and win that war. My son isn't going to be a general like myself. I know I am a very good general, better than any other living general, hence, I must go." What he didn't know was that he already was sick: his pituitary gland was failing him—one ten-thousandths of his body weight, even smaller than Achilles' heel. An insidious disease he did not even know he had and which had not yet been identified by medical science took his genius away from him.

During the Nuremberg trial Goering drew the conclusion that "Hitler had tried to do too much too fast. He tried to force in 10 years what might have been achieved in 100 years, because he was afraid that anybody who came after him might not have the energy and persistence to see it through." The conqueror can't wait.

Stalin, it was said, had infinite patience. This did not prevent him from provoking World War II, but without Hitler's accompliceship, he might have waited.

Khrushchev is impatient. He sees an opportunity—today's.

Communists expect that the West will be demoralized because of fear of nuclear weapons. They hope that we are going to collapse because we cannot bear the thought of nuclear devastation. They may believe that this opportunity is as unique as it is fleeting.

Let me go briefly into Soviet military vulnerability. I want to reemphasize that

the Soviet military posture is extremely strong and is growing. The Soviet State is a garrison State and moves in the direction of ever greater psychopolitical and material power, greater power in all arms and weapons systems, ranging from space through ICBM's, IRBM's, aircraft and submarines to tanks and infantry. Nothing is left out. This system includes an ever-growing arsenal of nuclear weapons. We, of course, don't sit still either.

Some of our contemporaries sometimes console themselves with the thought that the United States and the Soviet Union really are not on a collision course because, in the last minute, the Communists would shy away from firing the signal. This problem, "to strike or not to strike," has been recurrent in Bolshevik history, and in most instances, certainly in the crucial moments, the decision was to attack. As early as 1905, the comrades debated whether they would dare to gain victory. Lenin summed up the discussion by saying that an army (by which he meant the overall revolutionary force) "cannot be energetically and successfully recruited and guided unless we are sure that we dare win." The Communists, like good strategists, never lack caution; nor did they ever lack daring.

The big question is, however, whether the Communists ever can get to a position where they can knock out the United States without being knocked out themselves through the retaliatory blows which we will strike against them. That, however you slice the cake, is extremely unlikely. Let me put it this way: if I were to make this calculation as a Soviet general staff officer, I would not presume a very high probability that retaliation can be preempted or be kept down to acceptable levels.

The nuclear threat is pretty bad for us and for everybody else in the free world. But it also is pretty bad for the Soviets. In fact, in some ways, this threat may be infinitely worse for them than for the rest of the world. This is so because their regime, after 44 years, has not achieved legitimacy, because their regime rules over many nations who are anxious to get out from Kremlin clutches, and because the Communist regime is hated by the oppressed. In the United States, you can be fairly certain that even if the main centers were destroyed, the country as a whole would continue to function as a political unit. The legitimacy of the U.S. Government is not at all in doubt. In a nuclear war culminating in a broken-back contest, this may be a decisive factor.

The Soviets, we must suppose, understand this problem. They try to gain advantages in, and to win, the technological race of arms quality. They may succeed to move ahead substantially in future—in the past they haven't surpassed us in weapon technology. Naturally, they also attempt to outarm us in numbers of missiles, aircraft, troops, etc.

Suppose they have a chance of winning a Pyrrhic victory. In this case Pyrrhic victory would mean that they knock us out all right but only at the price of very great damage to themselves.

Remember now that our strategic task in the United States is to ward off surprise nuclear blows. Our problem is to neutralize the Soviet threat. But, neutralization isn't their problem. They are not going to launch a world war just to ward off or neutralize an American threat. Their intent in provoking war is to conquer and hold the entire world, and that is an entirely different and a far more exacting task than defense.

There are not enough Russians to survive and run the globe and there are not enough Communists to accomplish the installation and construction of global communism. Even if there were a large number of Europeans, African and even American Communists getting into the act, to carry on where the Russian party fell by the wayside, it is most unlikely, as we have seen from previous examples, that these Communists will obey the orders emanating from an obliterated Moscow. The various Communist parties and systems may celebrate their victory by fighting each other. Possibly, the Kremlin still is faithful enough to sacrifice itself for the glory of foreign Communists—I doubt it.

I'm not prophesying. I just want to stress the elementary and very significant difference between the strategic goals of the two chief antagonists. The United States simply does not want to be destroyed; in case of war, it merely wants to destroy Soviet military power. It does not want to take over foreign countries, let alone implant its own political system. We can leave it to the Russians to reorganize themselves, after the fight. We don't want to run their country in the first or last place. We believe in self-determination.

But the Kremlin's problem is far more difficult—and I don't want to minimize our own task. The Communists have to take over the whole world, keep control, and reorganize it according to their ideas, which are contrary to the ideas of almost everybody else. That is the ultimate point where their whole operation is going to be shipwrecked.

If they attack militarily, they knock themselves out as world conquerors. If they restrict themselves to political conquest, which is slow, uncertain and limited in potentiality, they won't be able to get physical control of the main geographic areas.

Consequently, it is really impossible for the Soviets to win the struggle in the end. I think this is a partial answer to the question of whether we can win. This may be a good question, but actually the more significant question is this: Can they win? The answer is "No."

You might compare the present situation with that of the World Wars of 1914 and 1939. In both cases, the Germans initially were very successful; they knocked out a number of their weaker opponents. When they were tired from that effort and came across strong opponents, they couldn't make it. I think the Communists are just about in the same situation as the Germans were in 1915 and 1943 and, consequently, we should not be disheartened.

We have lost and won a number of rounds but since 1945, I don't think we have won ground. Whenever a new crisis comes along, we are very hesitant about it and wish it would go away. I don't think the final outcome is in doubt at all. What is in doubt—and this is very significant for all Americans—is the cost. It makes a great deal of difference whether we pay with twice as many casualties or with half as many casualties, or whether—the ideal case—we can win without war. This is our main problem. If we are at all smart, we will try to fight this battle, as much as we can, in such a way that we won't have to pay the maximum price. Khrushchev says he wants to win at the bargain rate of no blood. Are we less intelligent so that we cannot conceive of a winning free world strategy sans war?

There is an implicit argument that we could partake as much or as little of the conflict as we care to. Here we are traveling on a streetcar but we just don't want to make the whole ride. Do we get out at the next station or after three or four stations? The underlying theory is one which, I think Lord Bacon formulated a few centuries ago for British seapower. If this theory still applied, we could get off the streetcar called modern conflict. This is the hope of those who suggest that we surrender in order to avoid nuclear war. Unfortunately, the drama of history must be played out and recasting is not possible.

Let us visualize how the United States would surrender. Suppose you are the Russian chief of staff. You must insist that all American weapons be broken up or be delivered to the Soviet Union. That is a lot of weapons and a lot of things that would have to be destroyed or delivered across the oceans. If you think this through, it will occur to you readily that the Soviets won't have enough troops, and cannot get them here, to supervise the disarming of the United States. It will occur to you readily that the Kremlin won't trust our leaders and soldiers. They won't rely on mere promises. They must make absolutely sure that American weapons will not disappear in caves somewhere, to reappear at an inopportune moment when Americans will reject the surrender and return to the Declaration of Independence. Consequently, the U.S. surrender cannot be performed through pledges and paper. There is only one way in which the Kremlin can achieve a safe and dependable American surrender, and that is: After the political surrender, to attack American military bases and resources with nuclear weapons and destroy our power physically.

I put it to you, ladies and gentlemen, the United States has no choice. We did not seek the conflict and we are ready to compose it. But the conflict has been imposed upon us and we can't get out of it by unilateral action. Hence, it will be just as costly to win this conflict as to lose it—the course of victory, in fact, may be our cheapest course. How to win? Let me start with a few don'ts, and then mention a few do's.

Don't disarm. Don't lose the technological race. Don't negotiate about unnegotiables. Don't abandon allies. Don't renege on promises. Don't fall for propaganda lies and deception. Don't give "world public opinion" first priority in security policies. Don't help communism. Carry this out and you are already 50 percent down the road to victory—on an entirely "negative approach."

Now, a few illustrative do's. Get a strong 1 to 2 military technological superiority. Accept the challenges. Pose challenges to the Soviets. Support self-determination strongly, not only in our areas, but in the Communist bloc. Reassert freedom and the goal of genuine democracy in Russia, in terms of their own democratic traditions and concepts, and on their own historic basis. Back strong and resolute allies and arm them effectively. Assist and educate our more irresolute friends.

Above all, Napoleon again: Morale is three times more important than materiel. Victory, therefore, depends on our own morale. How do we strengthen our morale and resolution? A change of atmosphere would be decisive, especially after the President has made the commitment to stop the erosion of freedom.

Let me give you an illustrative example. We have the Berlin crisis today.

Mr. Khrushchev says he is not planning anything which in any way would undermine the rights of the Western Powers to stay in the city. Why, if he doesn't want to undermine Western rights he is provoking the crisis in the first place, I don't know. But here is Marshal Chuikov, who speaking immediately after Khrushchev—I think on the 21st or 22d of June—argued that the Western Powers have no right to Berlin. Specifically, he denied our rights of conquest. If I may paraphrase his words: "I conquered the place and there wasn't an American, French, or British soldier anywhere within a hundred kilometers, except those prisoners of war we released. The right of conquest is ours and the West better get out of Berlin."

Well, here is a falsification of history. The American and British forces conquered Germany up to the Elbe River; Saxony and Thuringia, and the former Prussian province of Saxony west of the Elbe, were con-

quered by us. We committed ourselves in Yalta to let the Soviets occupy the present Eastern zone, and also agreed on four-partite occupation of Berlin. We conquered more of Germany than we were to occupy and the Soviets less. After hostilities ended, we evacuated the areas which we had conquered for the Soviets. In return, we assumed responsibility for West Berlin. The only thing that was forgotten in that swap was to negotiate proper rights of access to Berlin—we relied on a "gentlemen's agreement" with the Communists.

So, if we have no rights to Berlin, the Soviets surely have no rights of conquest to Saxony and Thuringia. If they want to undo the swap, I dare say that it might be a perfectly good idea.

Secretary Rusk recently referred to the fact that Western forces conquered half of what is now Ulbricht's domain.

The next point is that we surely have an abnormal situation in Berlin. But what's the abnormality? We do not have a corridor under our full control but our access is subject to foreign control. This abnormality ought to be renegotiated, and we should insist on absolutely free access.

But let's go one step farther. Khrushchev talks about a free city in Berlin, which means West Berlin only. Senator MANSFIELD proposed a free city for East and West Berlin. Khrushchev replied, "Don't complicate this complicated situation any more. Let's just concentrate on West Berlin." Well, ladies and gentlemen, Berlin could be declared an all-German city. The West has come out for unification; the East allegedly is for unification.

All right, as a first step, why not unify Berlin as an all-German city?

Mr. Khrushchev has invited us to compete. "Let's have peaceful competitive coexistence. Let's see who is doing the better job, who is going to win the economic race." A fine suggestion—if he really meant it.

If we want to compete, we almost would have to invent Berlin if it did not exist. Berlin is an excellent arena for competition and the most obvious place where the race could be watched.

Let each side build a showcase in Berlin: The Soviets have the Eastern, we have the Western sector. Both sides have completely free access; and let's go to work and do the best job we can. The Soviet Union, which aims to outproduce us within 10 years, has all the assets necessary to win this particular competition. If they took their own recent program seriously, they would jump at the opportunity to prove the superiority of communism in Berlin. Or is the fabrication of the Berlin crisis proof that the Kremlin neither believes in the advertised production goals nor in peaceful competition?

This is the type of proposal I would throw into the debate when we negotiate with Mr. Khrushchev. I am sure far better concepts have occurred to many of those who are closer to the problem than myself. Negotiation to be an effective tool of statecraft, must be based, by and large, on the quid-pro quo principle. Negotiation on the notion, "heads I win, tails you lose," cannot be a protracted technique, hence it cannot be a tool suitable to compose the protracted conflict. In such a conflict, too, effective and growing military strength is a prerequisite of successful negotiation.

I don't think the Soviets are ready to fight a major war today. They would be foolish to do this, on Mr. Khrushchev's own statistics. In his speeches, he assured us that the Soviet Union is going to overtake the United States—"economically" he says, I read it to mean as "technologically"—some time in the late 1960's or early 1970's. Consequently, to fight a major war now, would be a basic mistake in staff planning. However, as I pointed out, Khrushchev shows increasingly the signs of the Hitlerian psychological syndrome.

One of the more melancholy pieces of military literature is the initial entry of the German Navy's war diary. Admiral Raeder noted that the Fuehrer promised war with England would not occur before Germany had 15 battleships, 15 carriers, 100 submarines, or some figures to that effect. Hence the German Navy had been planning on the assumption that war would not come before 1944. After this follows a dry statement, approximately as follows: "The British have declared war on us today, September 3, 1939. We have two battleships under construction, a few old battleships which aren't worth very much, no carriers, and two dozen submarines."

Clearly the admiral did not expect Germany to win. Nevertheless, political leaders often become overconfident. Goebbels was overconfident in 1940 when he said the Wehrmacht would defeat Britain like one kills a chicken, by twisting its neck. Churchill replied, "What a chicken. What a neck." Churchill was right, but it is this type of bad judgment which ushered in wars before and which can cause war again. Khrushchev is only one in a long series of politicians who were sure they had mastered strategy.

To sum it all up, this is the problem: We are reluctant to accept the fact that the conflict will go on unabated as long as the Soviet Government stays in power, and as long as it has an enormous force and a chance to win.

This protracted conflict will get worse in proportion as Soviet relative power increases. But it may come to an end if and when the United States succeeds in undermining Communist confidence.

The United States is and remains, and can remain for all foreseeable future, the strongest power. This is one rock foundation of our ultimate victory; our principles of free government are another. Our main vulnerabilities are that we are extraordinarily susceptible to propaganda and wishful thinking, and that we act indecisively. We must regain a firmer conviction that Fascist communism need not, and should not, destroy the principles, accomplishments, and hopes of free government. The inner secret of the world crisis has been that the Soviets are too sure of themselves and we too unsure of ourselves.

We have the will to do good, and courage never to submit or yield; but we need a far stronger will to resist evil. Schopenhauer said, "intellect is invisible to the man who has none." Similarly, will is invisible to the resolute and victory inconceivable to the man who has no will. The American philosopher, Emerson, has left pertinent advice to his bewildered latter-day compatriots: "The education of the will is the object of our existence."

PROTECTING THE AMERICAN CONSUMER

Mr. WILEY. Mr. President, 2 months ago I welcomed the Senate Antitrust and Monopoly Subcommittee's investigation into current packaging and labeling practices. The 3 days of hearings, conducted under the able chairmanship of my colleague, Senator HART, of Michigan, have been most productive, and indeed received much widespread attention.

I welcomed these hearings because I believed that the investigation could perform an invaluable service not only to many millions of American consumers, but also to the strengthening of our free enterprise economy.

In the opening statement which I made before the Antitrust Subcommittee on June 28, 1961, I said:

The value of weights and measures to healthy economic life was recognized in historic days.

Labeling and packaging are indeed merely parts of our system of weights and measures—in modern dress. Today, the scales and the weights are only rarely seen by the purchaser. Instead, he picks up a prepackaged parcel, can, box or other container—often judging them in a hurry on external appearances. We have long recognized the legal doctrine of "let the purchaser beware"—but it is another thing to require the buyer to become a part-time detective.

Charges have been heard that labeling and packaging practices have been abused. We are here to listen to the evidence. If some modern packaging practices do not clearly and adequately inform the buyer of what he gets, if they result in unfair exploitation—it may become necessary for the Government to apply more stringent supervision. Because the damage is done not only to the consumer, the housewife, the laborer, you and I—but indeed such practices may breed lack of faith and lack of respect for the workings of our old economic system.

Economic freedom, under our system, does not mean anarchy, neither does it mean dog eat dog, or man eat man. To me it means widespread public and individual responsibility, and an endeavor to bring the greatest benefits of freedom to the greatest number possible. The leading exponent of capitalism, Adam Smith, stated: "Consumption is the sole end and purpose of all production". Let us make sure that it is not the consumer who loses out in this system of ours.

I want to commend Senator HART for the outstanding and impartial way in which he conducted these hearings. It is noteworthy that both consumer interests and trade papers representing the advertising and packaging industries have praised his work. There has appeared in the recent issue of Consumer Reports an article describing the three days of hearings into deceptive and misleading packaging. I believe this article summarizes the facts very clearly. I ask unanimous consent, therefore, that this article which appeared in the Consumer Reports, September 1961 issue, be inserted at this point of my remarks in the CONGRESSIONAL RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A SENATE COMMITTEE HEARS ABOUT THE CHAOS RESULTING FROM DECEPTIVE PACKAGING

The widespread interest in Senator PHILIP A. HART'S investigation into deceptive packaging surprised nearly everybody except Consumer Reports and its readers. The mail from Reports readers about this problem has been particularly heavy for over a year now. In fact, this very mail—of which the Senate investigating committee was very well aware—was a factor in the committe's consent current interest in packaging. Without such accounts from hundreds of readers of what was happening in the marketplace, neither CU nor the Senate committee itself would have been aware of the nature and extent of the problem. In the bitter battle for self-service shelf space, frequent package changes have become almost standard merchandising practice for brand advertisers. But since old packages disappear rapidly from supermarket shelves, the record of the change is lost to the public unless consumers have made a note of what happened. It was

from a compilation of these individual experience records sent in by readers that CU drew the basic material for its widely quoted articles on deceptive packaging in the Reports (September 1960 and January 1961).

Senator HART is now getting letters, too—hundreds of them. And, like the communications sent in to CU, the accounts he is getting are often accompanied by old and new boxes, old and new labels, before and after price tags, and samples of slack-filled packages. "We obviously have hit on something where the need for correction is far greater than I had at first thought," commented Senator HART. As head of a special committee of the Subcommittee on Antitrust and Monopoly of the Senate Judiciary Committee, he had been authorized to "examine, investigate, and make a complete study of the nature and extent of trade practices affecting consumers." He chose deceptive packaging as the opening subject and began the investigation with a preliminary 3-day hearing. What happened then made front page headlines across the Nation. No specific consumer issue in recent years has met with such immediate response.

The first hearings were designed to outline and to evaluate the overall situation with regard to packaging. Other hearings slated for this fall will probe deeper. As a prolog, the 3-day performance was impressive. It began with the statements of three Senators.

Declaring that the consumer "has a right to be able to find out what he is buying—how much he is buying—what it is costing on a per unit basis," Senator HART, of Michigan, said that he was not proposing to throw large stones at the free enterprise system, but was, rather, intending to find out "whether the system is suffering because every day millions of grains of sand are being thrown in consumers' eyes."

Senator ALEXANDER WILEY, of Wisconsin, gave the next statement. Quoting Adam Smith's pronouncement, "Consumption is the sole end and purpose of all production," he went on to observe:

"Economic freedom, under our system, does not mean anarchy; neither does it mean dog eat dog, or man eat man.

"Labeling and packaging are indeed merely parts of our system of weights and measures in modern dress. Today the scales and the weights are only rarely seen by the purchaser. Instead, he picks up a prepackaged parcel, can, box or other container, often judging them in a hurry on external appearances. We have long recognized the legal doctrine of 'let the buyer beware'—but it is another thing to require the buyer to become a part-time detective."

Senator MAURINE B. NEUBERGER, of Oregon, followed Senator WILEY and HART. She pointed out that when the consumer is deceived or betrayed, his income has been docked. Until the money paid for labor has been exchanged for goods, she emphasized, the living for which the wages were earned has not been realized. Hence, to the extent that the consumer receives less than full value at the retail counter, the wages of labor are taxed. She reminded the committee that the packaging problem seemed most grievous in the food industry and that the cost of food was of particular importance in the family budgets of low-income groups where careful shopping was especially necessary. But the careful shopper today, she said, "stands in the supermarket aisle, twisting and turning the package, looking over all four sides to try to find a guide to contents and weight."

Another witness, Mr. Wayles Brown, economist on the staff of the subcommittee, confessed that he took a magnifying glass to market with him in order to read the tiny net-weight print. He also took along a slide rule to compute the cost per ounce of packages with such contents as 3⅜6 ounces. One witness, Mrs. Sarah Newman, representing the National Consumers League, had brought with her to the hearing room a measuring tape and an abacus—"because some people can use an abacus even if they cannot a slide rule"—together with a magnifying glass and a slide rule so that the committee could check her exhibits of what she had found on the marketplace. In addition to testifying on behalf of the league, Mrs. Newman said she also wanted to speak as a housewife with 30 years of shopping experience who found that she now spent more time shopping than ever before, became more exhausted doing it, and had increasing feelings of frustration.

Mrs. Newman passed around for inspection a number of packages of competing brands: chocolate chip cookies (with net weights of 7¾ and 8½ ounces); tuna fish (6½ and 9¼ ounce cans); detergents (five regular sized packages ranging from 15 ounces to 21¾ ounces); crackers (five packages ranging from 8 to 10 ounces); instant coffee (5 and 6 ounce jars which both looked the same size); cola (12 and 16 ounces in look-alike bottles); paper napkins (60 in one package, 80 in the other); soap pads (10 in one, 12 in the other); shredded wheat cereal (10¼ and 12 ounces); cottage cheese (32 and 30 ounce cartons); baby food (3½ and 4¼ ounce jars); vinegar (old bottle, 16 ounces; new bottle, 12 ounces); cigarettes (2 different king sizes); waxed paper (125 feet and 75 feet looking the same size).

At the committee's request, in deference to the tender sensibilities of brand advertisers, the brand names on all of Mrs. Newman's examples had been carefully concealed.

HAZARDS AND OBSTRUCTIONS

Mrs. Newman concluded her testimony thus:

"Now, if we had time, there are thousands of examples that could be shown to you which face the housewife every time she goes to the supermarkets.

"Therefore, I feel I speak for the overwhelming majority of consumers when I ask that something be done to eliminate some of these so-called progressive and modern practices in the marketplace, which are in reality hazards and obstructions for the consumer.

"The confusion, obscurity, and complication of so-called modern packaging practices is strangely reminiscent of the chaos that prevailed in the Middle Ages when each country, each province, each city used a different type of measure in trading goods."

Other witnesses also found likenesses between modern packaging techniques and unsavory practices of old. Dr. Persia Campbell, chairman of the Department of Economics of Queens College (New York City), a member of CU's board of directors, and former consumer counsel to the Governor of the State of New York, compared today's packaging with coin clipping:

"When chiselers began chiseling from the old New England pine shilling, it was given a beveled edge for protection. We also gave early constitutional recognition to the importance of standards for weights and measures. As in the case of money, this involves not only setting up the original unit designations, but also the continuing protection of their integrity in operation; they also need a beveled edge. Unless we maintain confidence in our basic units of measurement for economic transactions, at retail as well as at other levels of our functioning economy, we are headed toward trouble, instead of toward a strong and satisfying growth pattern."

CU's president, Prof. Colston E. Warne, of Amherst College, said the rampant competition in packaging deception, which seemed to have supplanted price competition, brought to mind an example of a still older deception:

"Actually, it seems to be like the old British pound sterling which started out with a certain weight and with the nibbling of monarchs, came to be a much smaller coin. We today aren't finding 16-ounce packages. We aren't encountering 8-ounce packages. The nibbling is downward—it goes from 8 to 7 to 6 ounces. I don't know where we are going to arrive ultimately as this continues. They [brand packagers] are trying to sneak by on that supermarket shelf a smaller quantity of goods at an effective higher price per ounce."

Most of the witnesses in this first hearing were people with backgrounds of particular pertinence to the subject—economists, consumer spokesmen, weights and measures officials, and packaging consultants. One witness, however, the journalist Marya Mannes, described her qualifications as "dubious," because "writers are notoriously considered unreliable" and because "as a housewife I buy what is sold to me—it is packaged—I buy it on faith." But it was her testimony from which the newspapers quoted most generously. A sample tells you why:

"That great American institution, the supermarkets—those gleaming palaces of convenience and bounty—have come to be the greatest exercise in planned confusion since the bazaars of Samarkand. If you don't believe me, climb into my pushcart and come around with me, shelf by shelf.

"For now, you see, there is no salesman any more to tell you what you are getting. In supermarkets, the package is the salesman. The more space he takes up on the shelf the louder his letters scream at you, the sooner you'll notice him. But while he shouts 'Buy me,' at you, he also talks double talk out of the side of his mouth. And while you put him in your cart, he picks your pocket.

"Why? Because you're dumb? Because you're gullible? Because you're careless? Some of us are all of these. But most of us are simply too busy or too tired or too harassed to take a computer, a slide rule, and an MIT graduate to market and figure out what we're buying. And the makers of the goods we buy know this. In fact they know far more about us than we know about them. They have spent millions of dollars studying us—the consumer. They know what colors and what sizes and what shapes and what words we go for. Compared to them the big brother in George Orwell's '1984,' who knows all and sees all, is a piker. The big brothers in our society today are not government dictators—they are the sellers and their brainwashing handmaidens, the behavioral scientists. Together, and under the banner of free choice and open competition, they have made us believe that we are getting what we pay for. Their purpose is that innocent goal of free enterprise—to make an extra buck. But when their profit becomes our loss, how innocent is that goal?"

On the next day of the hearings, one of the outstanding experts in Marya Mannes' big brotherism, Dr. Ernest Dichter, president of the Institute for Motivational Research, appeared before the committee. The contrast between his testimony and that of all the other witnesses could hardly have been more pronounced. Both explicitly and implicitly, all the other witnesses made the point that deception of the consumer is a double-edged evil: (1) the individual loses his power of rational choice; (2) the honest packager is penalized by losing customers to the dishonest packager. Thus, irrational consumer choice rewards the unworthy seller to the detriment of the economy as a whole. Senator HART had expressed it this way:

"The importance of this subject matter is rooted in our free enterprise system itself. The consumer, as a result of his purchases in the marketplace, ultimately determines what goods shall be produced and in what

amounts. For the system to operate soundly requires that this choice by the purchaser be a rational one. To make an intelligent choice the consumer necessarily must have accurate information, readily available, and truthful descriptions of the products being offered."

As Dr. Dichter views the world, however, if the free-enterprise system is built on rational consumer choice, it now teeters dangerously. "Unfortunately, I must report," he told the Senate committee, "we talked to tens of thousands of consumers [and] about the only label that a consumer ever reads is the content and proof on the liquor bottle." Consumers do not make rational choices, according to Dr. Dichter. "What people actually spend their money on are the psychological differences, brand images, permitting them to express their individuality." And they don't really care about the duller facts of life, he thinks. In this "psychoeconomic era" when people seek "illusory brand differences" society does not require us "to carry the cross of honesty" to great lengths. "Maybe someday there will be this really 100 percent rational, ethical, moral society," speculated Dr. Dichter, but, "maybe it would be a very horrible society."

Dr. Dichter did make one concrete suggestion. In order to startle consumers into the idea that honest packaging was desirable, he proposed that supermarkets and other retailers sponsor an "honesty week"—a week during which the retailer would guarantee that any customer would get his money back, or a $50 or $100 prize, if he could point to any merchandise that was not properly labeled.

For all other witnesses, however, an "honesty week" was not enough. They asked for appropriate legislative measures now to assure more honest packaging for years to come. And in their testimony they named a number of specific practices in need of corrective action:

Packaging to price: This is the device of dropping net-weight contents without notice and without a corresponding drop in price. It constitutes a concealed price increase.

Using misleading quantity terminology: Packages are described with such words as "jumbo quart," "imperial quart," etc., when each of these is simply a quart. Other confusing quantity adjectives listed were sizes described as: "regular," "super," "giant," "king size," and "home laundry."

Concealing net weights: Some packagers abide by the letter of the law but violate the spirit by printing the net-weight declaration in tiny, inconspicuous type, by placing it on the bottom or some other unlikely part of the package and by printing it in colored ink on a similarly colored background.

Packaging in odd sizes: This practice includes not only resort to the hungry (15 ounce) pint, or the stingy (30 ounce) quart, but the use of fractions of ounces which render it difficult to make price comparisons.

Packaging in misleading sizes and shapes: Through the skillful use of color, elongated bottles, indented containers, etc., a number of packages look larger than they are. In cola bottles, for example, there are only a few full quart sizes. The less-than-a-quart competing brands, however, look just as big.

Packaging in oversized containers: This is an old evil known as slack fill that appears to be flourishing.

Using misleading art on packages: The picture on the package shows full fish slices; the contents are odd-shaped pieces of frozen fish. The picture shows a heavily fruited cake; the cake contains only a few lonely raisins.

Misrepresenting the package contents on the label: Beef stew is described as "meaty and delicious" when the can contains less than an ounce of meat. Other examples given by witnesses were of the chicken noodle soup in a 1-to-1 ratio—one chicken to one carload of noodles; almonette cookies without almonds; banana fingers without banana puree; and butter cookies minus butter.

Using "cents off" sales legends as an integral part of the package: If the "cents off" deal is printed on the package it is, obviously, not a sale in the usual sense of the term. A sale price that is maintained month after month becomes the price, not a sale price. And a rise from that price is a price rise. The "cents off" packaging legends not only serve to compound the already overcomplicated job of trying to make rational price-quality decisions but also cause confusion at the checkout counter.

Remedies for these practices were not described in detail by any of the witnesses, but some general suggestions were made. Most witnesses felt that a law should require that the net weight contents of packages be on the front panel, in large and conspicuous type, and in some standard relation to the other material on the label—just below the brand name, for example. Several witnesses asked for greater standardization of package sizes. And all except Dr. Dichter felt that the Federal Government should step up its interest in enforcing fair packaging practices.

All in all, the preliminary packaging hearings might be called Consumers' Day along the Potomac. But the reaction from sellers was not a jealous one. The trade paper Advertising Age, for example, editorialized:

"There are a good many things about governmental probes that we don't like, and we have the continuing feeling that the investigators can do better with their time and energies, in most instances, than by fooling around with relatively minor points in marketing or advertising.

"Yet we must confess that, as consumers, our sympathy lies with the statements of Senator HART'S subcommittee which concerns deception, and particularly deceptive packaging. It would be nicer, we think, to live in a simple world in which pound packages contained 16 ounce, and not 15 or 14½; in which quart bottles were actually quarts, and not fifths, or even maybe 25 ounces; in which packages containing the same weight or volume didn't look as though one were twice as big as another, and so on.

"Individual sizes and shapes, we suspect, have been created to the point where they no longer serve any useful purpose, even as merchandising devices. A little standardization might help everyone."

RESUMPTION OF NUCLEAR WEAPONS TESTING

Mr. McCLELLAN. Mr. President, in my remarks here on the floor of the Senate last Wednesday, September 6, concerning the Arkansas Legislature's action in endorsing a resumption of nuclear weapons testing, I called attention to the Southwest Seminar on Management and Uses of Nuclear Energy. This seminar was held at Hot Springs, Ark., from August 31 through September 2. The chairman of this conference was Mr. Winthrop Rockefeller, a distinguished citizen of my State, and the principal speaker was Dr. Edward L. Teller, one of the world's most eminent authorities in nuclear weapons technology.

Dr. Teller's most informative and interesting address not only puts to flight some of the fantasies and fears that beset many of our citizens regarding the resumption of nuclear testing, but it also substantiates and documents the absolute necessity for adding to our knowledge and capabilities in this field. In addition, Mr. President, Dr. Teller's remarks are in complete accord with President Kennedy's action earlier this week in ordering the resumption of nuclear testing.

I am, indeed, proud to request unanimous consent that Dr. Teller's outstanding speech, together with the introductory remarks of the Southwest seminar's chairman, Mr. Rockefeller, be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY DR. EDWARD L. TELLER

Mr. ROCKEFELLER. Ladies and gentlemen, I have a heavy heart this afternoon because our seminar is coming to a close. I think that we here in this room are an expression of the fact that this seminar has been particularly stimulating to all of us. And, so it is with regret that I realize that this afternoon our conferences are going to stop and we are not going to have further opportunity to talk "shop," you can call it, with the distinguished people who have served at this conference.

Our speaker today at lunch is a man that certainly needs no introduction, Dr. Edward L. Teller. However, I am going to presume upon my role as chairman of this conference to say a few words about Dr. Teller.

Some of you may have read or heard or speculated about a series of studies that were undertaken by the Rockefeller Brothers Fund. The Rockefeller Brothers Fund put together a panel of people who could evaluate what is going on around us. In putting together that panel it was not necessarily a question of, do all of the panelists agree with any of the ideas that any one of us five brothers might have. This is a panel to evaluate and to speak out in terms of what the individual members of the panel felt about the world situation. It ranged from defense to economic education, a vast field. In putting together this relatively small panel, the Rockefeller Brothers invited Dr. Teller to serve as one of the panelists. Dr. Teller and I have been talking back and forth here today at lunch and we agree that in putting together the panelists we did not always agree with everything they all said, and I am sure that Dr. Teller, in talking and working with the panel found that he did not always agree with them about what they said.

But the important thing was to get active minds, curious minds working together. And, when you think of Dr. Teller you think of an active mind, of a curious mind, of a mind with the courage to express what he thinks. I am so happy to have Dr. Teller here today—because of the close family relationship that has developed over the past few years. I know him well enough to know that you are all going to find today that Dr. Teller has been concerned with the morning news. I think Dr. Teller will probably want to comment on the morning news. Dr. Teller will speak from his heart. He will say what he believes and I know, Dr. Teller, that we are extraordinarily fortunate to have you here on this particular occasion to express your comments and views to the gathered group and to the radio audience.

So, without further ado, ladies and gentlemen, I present to you Dr. Edward L. Teller.

Dr. TELLER. Mr. Rockefeller, thank you very much for your gracious words. Ladies and gentlemen, I am indeed proud that I have served on this panel where I learned, and all of us learned, a very great deal from each other. Throughout the discussion in which

we tried to look into the next 10 years, we realize that the survival of our country and the survival of the free world is at stake; that we need strong and imaginative leadership if we want to stay alive. This is clearer today than it ever has been.

I want to talk to you about the topic of discovery, about nuclear energy and its uses. You have heard many wonderful things about the many outstanding accomplishments of the last two decades. These accomplishments we have gained under an outstanding leadership in Washington.

But, with all that, I have to tell you that the great head start we had in 1945 over the rest of the world in atomic energy matters, is no more.

Why?

I will tell you something about my own personal experience. Forty years ago when I was considerably younger and quite a bit smaller, I liked to read science fiction. My favorite author was Jules Verne. I no longer read science fiction. This is not because I have become particularly more wise or clever. Science fiction has changed. When I was young, science fiction said, "How wonderful." Today, science fiction says, "How horrible."

Our greatest danger, our greatest reason why we did not make enough progress is fear. We are afraid of the power which man now holds in his hands.

My main topic today is fear. The first time I ran into this fear was a little more than 10 years ago when the necessity arose that we work on the hydrogen bomb. At that time the fear of many of my outstanding and conscientious colleagues had almost—had almost—persuaded our Government not to go ahead with the hydrogen bomb. In their alarm they said things they never should have said. They said, for instance, a hydrogen bomb could not be built. They were wrong because they were afraid.

Fortunately we were permitted at that time to go ahead and for the time being the United States retained its leadership. One of the many consequences, I would say the most psychological consequence of this progress, was that we became very much interested in the peaceful uses of nuclear fusion energy * * * a difficult project which required containment of a very hot gas in a strange contraption which I like to call a magnetic bottle. This magnetic bottle, on the construction of which a great future energy thrust depends, unfortunately turned out to be leaky again and again. But, I am glad to tell you that some of us in our own laboratory and probably other people, too, are beginning to find somewhat more leakproof bottles and in the course of time, this great source of energy will be available to all of us. Now, those of you who like nuclear reactors, should not get scared. We won't make competition until, let us say, the year 2000; because the research is difficult and will take a little time.

There is progress all around us and some of this progress we have not completely or properly utilized. A lot has been done and quite a bit has been said here about the use of isotopes. You know I can't help mentioning it, yet in view of the fallout scare, this fear again has deterred many of us from the full industrial and biological utilization of radioactive energy.

We could place into the hands of educated farmers radiation sources by which in a reliable and controlled manner, they can induce mutations in the vegetables and animals with which they are working. In millions of experiments they can then do what no laboratory could perform—look for the chance occurrence of something really useful in the biological and agricultural fields. We are making slow progress because we are afraid.

Ladies and gentlemen, I am going to now read a few sentences concerning a topic about which probably not all of you have heard; the peaceful use of nuclear explosions (Project Plowshare). These sentences say: "Right now, we are utilizing atomic energy for our economic needs, in our own economic interests; we are razing mountains, we are irrigating deserts, we are cutting through the jungle and the tundra, we are spreading life, happiness, prosperity, and welfare in places wherein the human footsteps have not been seen for a thousand years." I am not quoting an American statement from the year 1959; I wish I were. I am quoting a statement of Mr. Vishinsky of the year 1949.

In the year 1956, there had been announcements of several explosions in China—the biggest one—9,200 tons of TNT in Hankow (?)—the announced purpose—uncovering deep-lying ore bodies for cheap surface mining—cheap strip mining.

In the years 1957 and 1958 there had been announcements of three explosions on the river Kolongo near the Urals for diverting this river—again with explosives amounting to thousands of tons of TNT. The Russians said they did all this with normal high explosives. When we said we were interested—will you please show us—we got an answer which even I with my limited Russian vocabulary could understand. The answer was "Nyet."

We therefore know that these explosions have been conventional explosives on the "good authority" of Russian words and on no authority other than that.

In the meantime, we have gone ahead and explored, at least on paper, the possibilities of using nuclear explosives for peaceful purposes. We have found that we can make harbors anywhere in the world at a cost we used to pay merely to equip a harbor. We can make water fill a canal. We can multiply, not add to—but multiply—the available raw material supply in the most essential items of coal and iron throughout the world. In other words, we can divert rivers, make them flow into arid regions and greatly increase agricultural capabilities.

Yet, our administration did not want to interefere with the discussions in Geneva, and told us not to go ahead with these plans. So, we are still waiting.

There are many other possibilities in "Plowshare"—some of them real—which I have mentioned—some of them dreams. If you will attend our discussions, which will start at 2:15, you will hear more about these possibilities.

But if the Russians should indeed develop these methods; and if they should announce the availability of these methods to backward countries which need the minerals * * * which need the water * * * which need the means of transportation which they can open up, they will have accomplished a propaganda advantage which will dwarf sputnik and an economic lever equal to a hundred Aswan Dams.

We have not done that * * * we have not gone ahead and what has held our hand was fear.

We are talking about the future, which could be bright. But the future will not exist for us unless we remain strong enough to defend ourselves and to defend the free world. Power today depends on the basically strongest weapon—nuclear explosives. You know that we have been wishing and dreaming that we might turn back the clock—that we might somehow stop the development of nuclear weapons. You know that this wish and this dream today looks a little different after Khrushchev has announced that they can and will test nuclear explosives of 20 megatons or 50 megatons or 100 megatons.

I would like to tell you a few facts relating to nuclear weapons and relating to the nuclear moratorium. I cannot talk about the future without discussing these facts. Because the future depends—our future depends—on our wise behavior.

The first fact relates to the danger of an all-out war. You have heard words and these words said something like this: "Man holds in his mortal hands the power to destroy all forms of human life." Let me tell you a fact. These words were based on a misunderstanding—a misunderstanding that has to be cleared up. An all-out nuclear war—if it ever comes—will be a dreadful thing, but it will not destroy all form of human life. Most certainly not.

What man now holds in his hands is far short of what would endanger all human life. If you try to indulge in fantasies about the end of the world, the possibilities are many. The greatest danger probably would arise from somebody really going to work on bacteriological warfare. As far as the known facts of worldwide radio active fallout is concerned—because that is the danger to which the quoted words refer—we do know tests have produced the fallout. This fallout can be clearly shown at present not to be dangerous. But, in case of an all-out war, fallout would be dangerous in certain areas, but not throughout the whole world.

In order to endanger everyone on the globe, one would have to explode millions of megatons—millions of bombs—each one carrying a million ton equivalent. Even then there would be methods for people to escape if they but tried seriously to escape. Humanity certainly will survive an all-out war.

Some organization with enormous efforts, if it had billions of dollars at its command might invent something that would endanger all of us. But, in order to do so it would have to depend not on winning the war, but on defending themselves, not on power, not on conquest—these things will not destroy humanity. It can be done only if somebody tries to do just one thing—destroy all humanity. People never will try to do it. I think even if they try they will not succeed.

Although an all-out war will not destroy humanity—an all-out war very easily could destroy the United States and could destroy the free world and could destroy the very idea of human dignity. This could happen, because, scared by exaggerated dangers we have neglected to defend ourselves. We have not built shelters, we have not done the things that could save us and that could, by the very fact of our defensive strength, insure peace.

Fact No. 1: Humanity will survive, but we shall survive only if we defend ourselves.

Fact No. 2 concerns the nuclear test moratorium. After many years of careful discussion every responsible person is now agreed that the Russians could have tested all along during the last 3 years without being able to detect any trace of such tests. Furthermore, everyone is agreed that tests up to reasonably great sizes could continue into the indefinite future secretly, even if the Russians agreed to all our demands—to all our reasonable proposals; even then they could continue systematically and effectively to cheat on the test ban. This situation will continue into the indefinite future barring a very great and unexpected development in our ability to detect the tests.

Fact No. 3: We know that we stopped nuclear tests almost 3 years ago. We have nothing but the statement from Russia that they have not tested in the meantime. Today, we are told by the Russians themselves, that they want to test 100 megatons. This sounds like a lot. It's not much bigger than what we had and what we have every reason to know that they have. I think the statement was put out for the simple purpose to frighten us and we have given every indication that we can be frightened. What the statement means is, that if the Russians

are so confident in saying what more they can achieve, they probably by now have accumulated an enormous amount of knowledge and there is every reason to believe that this knowledge could have been accumulated by their steady testing for the past 3 years. We doubt our knowledge. If this is so, and I don't know whether it is, but if it is so, then by now instead of a missile gap, there exists an atomic gap and we may be on the way of becoming a second-class power.

Now you may have heard that more testing is useless, because we already have so much. The same people who have been telling us that the hydrogen bomb is not feasible are now trying to tell us that further development is not important. I can assure you that it is. By further development you can produce a disparity such that a weaker nation when attacked lacks even the power to strike back and if that situation ever should occur, at that time our freedom would be lost. By further testing one can develop tactical weapons of the greatest possible use in localized countries, which can be kept localized by the old and time-honored method of restricting the area and the aims of the countries. Not by the senseless procedure of trying to restrict the weapons. Because what type of weapons are being used is very hard to be sure about. In an age where the technological development is rapid and where Khrushchev even, 20 months ago, has boasted that he has great surprises in store for us. If there is a great surprise it will be very hard having suffered a defeat in a local area to find out what have you got.

But we do know that nuclear weapons are the most powerful agent. And, we know that if we want to defend our own country, if we want to defend our allies, if we want to be able to respond to each aggression with the proper countermeasures on the same scale and nevertheless sufficient to stop aggression if we want to do all that, it is necessary that we be prepared.

Ladies and gentlemen, on the 31st of October 1958, we stopped the development of our most essential strength. In the meantime, the Russians may have made giant strides. There is no doubt that the hour is late, I cannot tell you how late it is—I don't know. I hope and I believe, that it is not yet too late if we act now and if we act with determination and if we do no more than acquire more knowledge.

If the Russians want to test a 100 megaton in the atmosphere, this will add to the fallout throughout the world. This additional fallout, like the past fallout, will not be dangerous. But we do not need to make such big tests, because real progress does not consist in a big bang. Real progress consists in added knowledge and we have been negligent in developing this added knowledge of our nuclear explosives for defense and for peaceful purposes to increase the wealth of the world.

If we are willing to do the obvious, to resume testing on a reasonable scale, without much fanfare, but doing the essential things with care and with diligence, I feel sure that freedom will survive.

Thank you very much.

ROSH HASHANA, 5722

Mr. BYRD of West Virginia. Mr. President, I wish to take this occasion to associate myself with Members of the Senate who are of the Jewish faith, and with my constituents in the State of West Virginia who are of that faith, in celebrating the happy and holy festival of Rosh Hashana in the Jewish calendar year of 5722.

The holy holiday of Rosh Hashana stems from the word of the Lord, as given to Moses:

In the seventh month, in the first day of the month, shall ye have a sabbath, a memorial of blowing trumpets, an holy convocation.

In all of these many centuries, people of the Jewish faith throughout the world have obeyed the Lord's word, despite the most servile and horrible forms of tyranny. For the Jews, the word of the Lord has been ever more powerful than the worst inflictions of the tyrant.

It is no coincidence that the chief enemies of humanity today are at the same time conspicuously the chief enemies of the Jewish people. Dictatorships, whether to the left or to the right, find their designs thwarted, and their opinions countered, by the individualism and the intellect that are the traditional characteristic of the Jewish race.

I stand with my Jewish friends in opposition against all enemies of human freedom—enemies of individual dignity, enemies of the rule of divine law. I stand with my Jewish friends for the forward-looking, freedom-loving spirit, exemplified both by this great land of liberty, America, and by that new land of liberty, Israel.

On Rosh Hashana morning, my thoughts will be with you, hoping that God may hasten the time when wickedness and tyranny shall pass away like smoke into a clear, bright sky. I shall be thinking with you that the tyrant is mortal, and that God is eternal, and that goodness on earth shall yet prevail.

Mr. HICKEY. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The absence of a quorum has been suggested, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HICKEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the Committee on Interior and Insular Affairs be permitted to meet in executive session at 2 o'clock this afternoon, to receive testimony from the Commissioner of Indian Affairs.

Mr. GOLDWATER. Mr. President, will the Senator from Minnesota yield?

Mr. HUMPHREY. I yield.

Mr. GOLDWATER. Is it possible that the committee might have some other business to attend to? Would not the Senator wish to enlarge the purpose for the meeting of the committee? I believe we have some other business to attend to.

Mr. HUMPHREY. Mr. President, I shall restate the unanimous-consent request. I ask unanimous consent that the Committee on Interior and Insular Affairs be permitted to meet in executive session at 2 o'clock this afternoon to receive testimony from the Commissioner of Indian Affairs, and also to consider other matters which the committee may wish to undertake.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. HUMPHREY. Mr. President, I also ask unanimous consent that the Committee on Public Works may be permitted to sit during the session of the Senate today.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

On request of Mr. HUMPHREY, and by unanimous consent, the Juvenile Delinquency Subcommittee of the Committee on the Judiciary was authorized to meet during the session of the Senate today.

U.S. DISARMAMENT AGENCY FOR WORLD PEACE AND SECURITY

The Senate resumed the consideration of the bill (S. 2180) to establish a U.S. Disarmament Agency for World Peace and Security.

Mr. HICKEY. Mr. President, I ask unanimous consent that the committee amendments be considered and agreed to en bloc, and that the bill, as amended, be considered as original text for the purpose of amendment.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

The committee amendments agreed to en bloc are as follows:

On page 2, at the beginning of line 10, to insert "Disarmament policy, being an important aspect of foreign policy, must be consistent with national security policy as a whole."; on page 3, at the beginning of line 4, to strike out "(1)" and insert "(a)"; in line 5, after the word "policy", to strike out "formulation," and insert "formulation"; at the beginning of line 7, to strike out "(2)" and insert "(b)", and in the same line, after the word "and", to strike out "direction" and insert "management"; in line 9, after the word "disarmament", to strike out "field." and insert "field;"; at the beginning of line 10, to strike out "(3)" and insert "(c)"; in line 11, after the word "concerning", to strike out "disarmament." and insert "disarmament; and"; at the beginning of line 13, to strike out "(4)" and insert "(d)"; in line 22, after the word "international", to strike out "agreement or measure," and insert "agreement,"; in line 23, after the word "steps", to strike out "in connection with disarmament" and insert "taken under such an agreement to establish an effective system of international control or"; on page 4, line 12, after the word "Agency", to insert "for World Peace and Security"; after line 12, to strike out:

"(d) The term 'person' means (1) any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, Government agency other than the Agency, any State or any political subdivision thereof, or any political entity within a State, any foreign government or nation, any international organization, or other entity, and (2) any legal successor, representative, agent, or agency of the foregoing."

On page 5, line 4, after the word "established", to insert "within the Department of State an agency to be known as"; in line 5, after the amendment just above stated, to strike out "the United" and insert "the "United"; in line 7, to strike out "Security."

and insert "Security".", after line 7, to strike out:

"SEC. 22. The Agency shall be headed by a Director. He shall be appointed by the President, by and with the advice and consent of the Senate. He shall receive compensation at the rate of $22,500 per annum. The Director shall serve as the principal adviser to the President on disarmament matters. Under the direction of the President and the Secretary of State, the Director shall have primary responsibility within the Government for disarmament matters."

And, in lieu thereof, to insert:

"SEC. 22. The Agency shall be under the direction of an Under Secretary of State for Disarmament, who shall serve as the principal adviser to the Secretary of State and the President on disarmament matters. In carrying out his duties under this Act the Under Secretary of State for Disarmament shall, under the supervision and direction of the Secretary of State, have primary responsibility within the Government for disarmament matters. He shall be appointed by the President, by and with the advice and consent of the Senate, and shall receive compensation at the rate of $22,500 per annum. For the purposes of this Act, he shall be referred to as the 'Director'."

On page 7, line 2, after the word "Director", to insert "under the supervision and direction of the Secretary of State"; in line 10, after the word "President", to insert "by and with the advice and consent of the Senate"; after line 19, to strike out:

"SEC. 31. The Director is authorized and directed to exercise his powers in such manner as to insure the conduct of research, development, and other studies relating to disarmament, by private or public institutions or persons, and to assist in the acquisition of a fund of theoretical and practical knowledge in this field. To this end, the Director, under the direction of the President, is authorized and directed to coordinate the research, development, and other studies conducted in this field by or for other Government agencies in accordance with procedures established under section 37 of this Act. To the same end, the Director is authorized and directed to make arrangements (including contracts, agreements, and grants) for the conduct of research, development, and other studies relating to disarmament, including:".

And, in lieu thereof, to insert:

"SEC. 31. The Agency is authorized and directed to exercise its powers in such manner as to insure the acquisition of a fund of theoretical and practical knowledge concerning disarmament. To this end, the Agency is authorized and directed (1) to conduct research, development, and other studies in the field of disarmament; (2) to make arrangements (including contracts, agreements, and grants) for the conduct of research, development, and other studies in the field of disarmament by private or public institutions or persons; and (3) to coordinate the research, development, and other studies conducted in the field of disarmament by or for other Government agencies in accordance with procedures established under section 34 of this Act. In carrying out its responsibilities under this Act, the Agency shall, to the maximum extent feasible, make full use of available facilities, Government and private. The authority of the Agency with respect to research, development, and other studies shall include participation in the following insofar as they relate to disarmament:".

At the top of page 11, to strike out:

"RESEARCH FACILITIES

"SEC. 32. The Director is authorized (1) to conduct and support research, development, and other studies of the types specified in the preceding section through use of the Agency's own facilities, and (2) to use, with their consent, the facilities of other Government agencies or those of outside organizations. In carrying out his responsibilities under this Act the Director shall, to the extent feasible, make full use of available facilities, Government and private, and may construct such new laboratories as he deems necessary."

And, in lieu thereof, to insert:

"PATENTS

"SEC. 32. No appropriated funds may be expended pursuant to authorization given by this Act for any technological research or development activity unless such expenditure is conditioned upon provisions effective to insure that all information, uses, products, processes, patents, and other developments resulting from that activity will (with such exceptions and limitations as the Director may determine to be necessary in the interest of the national defense) be made freely and fully available to the general public. Nothing contained in this section shall be construed to deprive the owner of any background patent relating to any such activity of any right which he may have under that patent."

At the top of page 12, to strike out:

"POLICY FORMULATION

"SEC. 33. The Director is authorized and directed to prepare for the President, the Secretary of State, and the heads of such other Government agencies as the President may determine, recommendations concerning United States disarmament policy.

"NEGOTIATION OF INTERNATIONAL AGREEMENTS

"SEC. 34. Under the direction of the Secretary of State, the Director may (a) consult and communicate with or direct the consultation and communication with representatives of other nations or of international organizations for the purpose of conducting negotiations concerning disarmament or for the purpose of exercising any other authority given to the Director by this Act; and (b) communicate in the name of the Secretary with diplomatic representatives of the United States in this country and abroad.

"PUBLIC INFORMATION

"SEC. 35. Under the direction of the Secretary of State, the Director shall perform functions pursuant to section 2(c) of Reorganization Plan 8 of 1953 with respect to the dissemination abroad of information concerning United States disarmament activities.

"INSPECTION AND CONTROL

"SEC. 36. The Director is authorized (1) to formulate plans and make preparations for the establishment, operation, and funding of inspection and control systems which may become part of the United States disarmament activities and, (2) as appropriate, to put into effect, direct, or otherwise assume United States responsibility for such systems."

And, in lieu thereof, to insert:

"POLICY, NEGOTIATIONS AND RELATED FUNCTIONS

"SEC. 33. Under the supervision and direction of the Secretary of State—

"(a) the Director shall prepare for the President, the Secretary of State, and the heads of such other Government agencies as the President may determine, recommendations concerning United States disarmament policy.

"(b) the Director, for the purpose of conducting negotiations concerning disarmament or for the purpose of exercising any other authority given him by this Act, may (1) consult and communicate with or direct the consultation and communication with representatives of other nations or of international organizations and (2) communicate in the name of the Secretary with diplomatic representatives of the United States in this country and abroad.

"(c) the Director shall perform functions pursuant to section 2(c) of Reorganization Plan 8 of 1953 with respect to providing to the United States Information Agency official United States positions and policy on disarmament matters for dissemination abroad.

"(d) the Director is authorized (1) to formulate plans and make preparations for the establishment, operation, and funding of inspection and control systems which may become part of the United States disarmament activities, and (2) as authorized by law, to put into effect, direct, or otherwise assume United States responsibility for such systems."

On page 14, line 15, to strike out "Cooperation And"; in line 16, to change the section number from "37" to "34", and in the same line, after the word "The", to strike out "Director, in consultation with other appropriate Government agencies and subject to approval by the President, shall develop suitable procedures to assume cooperation, coordination, and a continuing exchange of information among affected Government agencies on" and insert "President is authorized to establish procedures to (1) assure cooperation, consultation, and a continuing exchange of information between the Agency and the Department of Defense, the Atomic Energy Commission, the National Aeronautics and Space Administration and other affected Government agencies, in"; on page 15, line 3, after the word "and", where it appears the second time, to strike out "programs. The Director and such Government agencies shall keep each other fully informed, currently and prospectively, of policy decisions, activities, statements, studies, research, and other matters which are within the scope of their respective responsibilities and which affect disarmament matters." and insert "programs, and (2) resolve differences of opinion between the Department of State and such other agencies which cannot be resolved through consultation."; in line 14, after the word "of", to strike out "his" and insert "its"; at the beginning of line 15, to strike out "Director" and insert "Agency"; in line 16, after "(a)", to strike out "with the consent of the Secretary of State or other officer or agency concerned,"; in line 18, after the word "of", to strike out "the Department of State, or"; at the beginning of line 20, to insert "with the consent of the agency concerned,"; in line 22, after the word "desirable.", to strike out "It is the intent of this section that the Director rely upon the Department of State for general administrative services in the United States and abroad to the extent agreed upon between the Secretary of State and the Director."; on page 17, line 16, after "(5 U.S.C. 73b–2):", to insert "*Provided*, That no such individual shall be employed for more than one hundred days in any fiscal year unless the President certifies that employment of such individual in excess of such number of days is necessary in the national interest: *And provided further*, That"; on page 18, after line 2, to strike out:

"(f) employ, with the prior approval of the President, not to exceed three retired commissioned officers of the Armed Forces who are experts in military strategy or weapons systems and whose service shall not be considered as employment or holding of office or position bringing such individuals within the provisions of section 2 of the Act of July 31, 1894 (5 U.S.C. 62); section 13 of the Civil Service Retirement Act, as amended (5 U.S.C. 2263); section 212 of Public Law 72–212, as amended (5 U.S.C. 59a); or any other law limiting the reemployment of such officers or governing their simultaneous receipt of compensation and retired pay or annuities;".

At the beginning of line 16, to strike out "(g)" and insert "(f)"; in line 17, after the word "the", to strike out "Director and insert "Agency; after line 21, to strike out:

"(h) make such investigations and obtain such information as the Director may deem necessary or proper to assist him in exercising any authority provided in this Act;

"(i) acquire, purchase, lease, and hold real and personal property, including patents, as agent of and on behalf of the United States, subject to the provisions of section 355 of the Revised Statutes, as amended (40 U.S.C. 255), and sell, lease, grant, and dispose of such real and personal property in accordance with the Federal Property and Administrative Services Act of 1949, as amended;

"(j) accept in the name of the Agency and to hold and administer any conditional or unconditional gifts, devises, bequests, grants, or other donations or contributions of money, securities, or real or personal property, for use in the furtherance of the purposes of this Act. The Director shall not accept any conditional gift, devise, bequest, grant, or other donation or contribution which is conditioned upon any expenditure not to be met therefrom or from the income thereof unless such expenditure has been approved by Act of Congress;

"(k) delegate, as appropriate, to the Deputy Dierctor or other officers of the Agency, with power to redelegate as needed, any authority conferred upon the Director by the provisions of this Act; and

"(l) make, promulgate, issue, rescind, and amend such rules and regulations as may be necessary or desirable to the exercise of any authority conferred upon the Director by the provisions of this Act."

On page 20, after line 2, to strike out:

"FOREIGN SERVICE RESERVE AND STAFF OFFICERS

"SEC. 42. The Secretary of State may authorize the Director to exercise, with respect to Foreign Service Reserve officers and Foreign Service Staff officers and employees appointed or employed for the Agency, the following authority: (i) The authority available to the Secretary of State under the Foreign Service Act of 1946, as amended, (ii) the authority available to the Secretary under any other provision of law pertaining specifically, or generally applicable, to such officers or employees, and (iii) the authority of the Board of Foreign Service pursuant to the Foreign Service Act of 1946, as amended. The appointment or employment of Foreign Service Reserve officers pursuant to this subsection may be made without regard to the term or terms of appointment or employment prescribed by section 522 of the Foreign Service Act of 1946, as amended."

In line 20, to change the section number from "43" to "42"; in line 24, after the word "disarmament", to insert "and security"; on page 21, line 2, to change the section number from "44" to "43"; on page 22, after line 3, to strike out:

"SEC. 45. (a) The Director shall establish such security requirements, restrictions, and safeguards as he deems necessary in the interest of national security. The Director may arrange with the Secretary of State or with the Civil Service Commission for the conduct of such security or other personnel investigations of the Agency's officers, employees, consultants, persons detailed from other Government agencies, and its contractors and subcontractors and their officers and employees, actual or prospective, as he deems appropriate; and if any such investigation develops any data reflecting that the individual who is the subject thereof is of questionable loyalty, the matter shall be referred to the Federal Bureau of Investigation, the results of which shall be furnished to the Director."

And, in lieu thereof, to insert:

"SEC. 44. (a) The Agency shall establish such security and loyalty requirements, restrictions, and safeguards as it deems necessary in the interest of the national security and to carry out the provisions of this Act. The Agency shall arrange with the Federal Bureau of Investigation for the conduct of full-field background security and loyalty investigation of all the Agency's officers, employees, consultants, persons detailed from other Government agencies, members of its General Advisory Committee, advisory boards, contractors and subcontractors, and their officers and employees, actual or prospective. In the event the investigation discloses information indicating that the person investigated may be or may become a security risk, or may be of doubtful loyalty, the report of the investigation shall be turned over to the Office of Security of the Department of State for final determination. No person shall be permitted to enter on duty as such an officer, employee, consultant, or member of advisory committee or board, or pursuant to any such detail, and no contractor or subcontractor, or officer or employee thereof shall be permitted to perform any services under the contract or to have access to any classified information relating thereto, until he shall have been investigated in accordance with this subsection and the report of such investigation made to the Agency, and it shall have been determined that such person is not a security risk or of doubtful loyalty. Standards applicable with respect to the security clearance of persons within any category referred to in this subsection shall not be less stringent, and the investigation of such persons for such purposes shall not be less intensive or complete, than in the case of such clearance of persons in a corresponding category under the security procedures of the Government agency or agencies having the highest security restrictions with respect to persons in such category."

On page 24, line 15, after the word "the", where it appears the second time, to strike out "Director" and insert "Atomic Energy Commission"; at the beginning of line 18, to strike out "Agency" and insert "Commission"; in line 20, after the word "the", to strike out "Director" and insert "Atomic Energy Commission"; on page 25, line 10, after the word "and", to strike out "(b)" and insert "B"; after line 12, to strike out:

"(c) Any and all of the functions of the Director described in this section may be the subject of an agreement between the Director and the Secretary of State under section 41(a) of this Act."

After line 16, to strike out:

"COMPTROLLER GENERAL AUDIT

"SEC. 46. No moneys appropriated for the purpose of this Act shall be available for payment under any contract with the Director, negotiated without advertising, except contracts with any foreign government, international organization or any agency thereof, unless such contract includes a clause to the effect that the Comptroller General of the United States or any of his duly authorized representatives shall, until the expiration of three years after final payment, have access to and the right to examine any directly pertinent books, documents, papers, and records of the contractor or any of his subcontractors engaged in the performance of, and involving transactions related to such contracts or subcontracts: *Provided, however,* That no moneys so appropriated shall be available for payment under such contract which includes any provisions precluding an audit of the General Accounting Office of any transactions under such contract: *And provided further,* That nothing in this section shall preclude the earlier disposal of contractor and subcontractor records in accordance with records disposal schedules agreed upon between the Director and the General Accounting Office."

On page 26, after line 13, to strike out:

"PRESIDENTIAL AUTHORITY TO TRANSFER CERTAIN FUNCTIONS

"SEC. 47. The President may transfer to the Director any functions (including powers, duties, activities, facilities, and parts of functions)".

After line 18, to insert:

"TRANSFER OF FUNCTIONS TO AGENCY

"SEC. 45. (a) The United States Disarmament Administration, together with its records, property, personnel, and funds, is hereby transferred to the Agency. The appropriations and unexpended balances of appropriations transferred pursuant to this subsection shall be available for expenditure for any and all objects of expenditure authorized by this Act, without regard to the requirements of apportionment under section 665 of title 31."

On page 27, at the beginning of line 3, to insert "(b) The President, by Executive order, may transfer to the Director any activities or facilities"; in line 6, after the word "may", to strike out "provide for appropriate transfer of funds, records, property, and for necessary civilian and military personnel to be made available from the agency from which the transfer is made" and insert "under this section or other applicable authority, provide for appropriate transfers of records, property, civilian personnel, and funds. No transfer shall be made under this subsection until (1) a full and complete report concerning the nature and effect of such proposed transfer has been transmitted by the President to the Congress, and (2) the first period of sixty calendar days of regular session of the Congress following the date of receipt of such report by the Congress has expired without adoption by either House of the Congress of a resolution stating that such House does not favor such transfer"; in line 22, to change the section number from "48" to "46", and in the same line, after the word "made", to strike out "to the Director"; in line 23, after the word "to", to strike out "him" and insert "the Agency"; in line 25, after the word "to", where it appears the first time, to strike out "him" and insert "the Agency"; on page 28, line 1, after the word "granted", to strike out "him" and insert "it"; in line 2, after the word "this", to strike out "Act:

"(1) rent of buildings and space in buildings in the District of Columbia: *Provided,* That to the extent feasible, the Director shall rely upon the General Services Administration for this purpose.

"(2) administrative expenses incident to carrying out the purposes of this Act, including, without limitation, expenses of printing and binding without regard to the provisions of section 11 of the Act of March 1, 1919 (44 U.S.C. 111);

"(3) purchase or hire of one passenger motor vehicle for the official use of the Director without regard to the limitations contained in section 78(c) of title 5 of the United States Code or any other law relating to the purchase or use of Government-owned motor vehicles;

"(4) entertainment and official courtesies (not to exceed $25,000 in any fiscal year except as may otherwise be provided in an appropriation);

"(5) expenditures (not to exceed $50,000 in any fiscal year except as may be provided in an appropriation) of a confidential character other than entertainment: *Provided,* That a certificate of the amount of each such expenditure, the nature of which it is considered inadvisable to specify, shall be made by the Director and every such certificate shall be deemed a sufficient voucher for the amount therein specified;

"(6) expenses authorized by the Foreign Service Act of 1946, as amended, not otherwise provided for;

"(7) expenses in connection with travel of personnel outside the United States, including transportation, expenses of dependents, and transportation of personal effects, household goods, and automobiles of such personnel, and including all such expenses when any part of such travel or transportation begins in one fiscal year pursuant to travel orders issued in that fiscal year, notwithstanding the fact that such travel or transportation may not be completed during the same fiscal year;

"(8) expenditures necessary to make grants for, and to pay expenses incident to, training and study;

"(9) expenditures in connection with participation in international conferences for the purposes described in section 3 of this Act, including, but not limited to, rental of quarters by contract or otherwise." and, in lieu thereof, to insert "Act including, without limitation, expenses of printing and binding without regard to the provisions of section 11 of the Act of March 1, 1919 (44 U.S.C. 111); purchase or hire of one passenger motor vehicle for the official use of the Director without regard to the limitations contained in section 78(c) of title 5 of the United States Code; entertainment and official courtesies to the extent authorized by appropriation; expenditures for training and study; expenditures in connection with participation in international conferences for the purposes of this Act; and expenses in connection with travel of personnel outside the United States, including transportation expenses of dependents, household goods, and personal effects."; on page 30, line 11, to change the section number from "49" to "47"; in line 12, after the word "appropriated", to strike out "to the Agency such sums as may be necessary and appropriate to carry out the purposes of this Act. Sums appropriated pursuant to this section for research development and studies shall remain available until expended" and insert "not to exceed $10,000,000, to remain available until expended, to carry out the purposes of this Act"; on page 31, line 2, to change the section number from "50" to "48", and in the same line, after the word "The", where it appears the first time, to strike out "Director" and insert "Agency"; at the beginning of line 3, to strike out "President" and insert "Secretary of State"; in line 5, after the word "The", where it appears the second time, to strike out "Director" and insert "Agency"; in line 6, after the word "in", to strike out "his" and insert "this", and in the same line, after the word "as", to strike out "he" and insert "the Secretary of State"; at the beginning of line 8, to strike out "such", and in the same line, after the word "legislation", to strike out "as he deems" and insert "deemed".

The VICE PRESIDENT. The bill is open to further amendment.

Mr. RUSSELL. Mr. President, I desire to make a few observations with respect to the pending bill. I had been of the opinion that the ingenuity of mankind had been almost exhausted in proposing new agencies of Government, and that the Congress of the United States has acquiesced in the creation of most of them. This proposed that we reestablish a U.S. Disarmament Agency at this particular hour in our history shows how greatly I had underestimated the resourcefulness of my colleagues. I am well aware of the many reasons why this Nation should be at all times prepared to go more than halfway in bringing about a program of controls that would remove the clouds that threaten mankind from extinction through the use of nuclear weapons. We have at the present time, and have had for some years, a disarmament branch in the Department of State. I doubt very much that our efforts will be more successful or that we will be able to make a greater contribution to world peace through the creation of a new agency by the Congress of the United States at this particular time, particularly one generating any suspicion we are planning unilateral disarmament.

While I have not had an opportunity to study the bill, since it was agreed to by the committee only yesterday, the committee bill does seem to be a great improvement over the original proposal, in that it would place the proposed agency in the Department of State, where the present disarmament body is located, and under the direction of an Under Secretary of State. To the extent it does not create another new and independent agency the measure is an improvement over the original proposal.

I do not deem this to be an appropriate time in world history for us to create a statutory body, and for the Congress of the United States to take the proposed action, at the same time we are calling on the American people to increase defense spending to the tune of $6 billion over and above the $40 billion that was contained in the original budget and are calling more than a quarter of a million more young Americans to the military service.

We are urging those associated with us all over the world to increase their military strength in order that we may turn back the menace of Communist aggression. I submit that it would be absolutely impossible to explain to all the peoples of the world—those associated with us and those who call themselves neutralists—that we are serious in our determination to defend liberty and the institutions of our Government and the rights of freemen everywhere with a vast arms program, while at the same time we are creating a disarmament agency. We may be able to explain it to most of our own people, but I do not think even all the American people will understand. It looks very much as if we are going in both directions at the same time. Of course, it is nothing new for the Congress of the United States to mount a horse and dash off madly in all directions. But this is a very poor time for us to take such action in this delicate field.

There are other reasons why I think the bill should be deferred. Of course, I am under no illusions that it will be, but I think it should be. As I have said, we now have a disarmament section in the Department of State that can perform any proper function relating to gathering data that would enable us to advise our President or his representatives if the time should ever come, an hour for which all mankind is yearning, when we can sit down and really negotiate in good faith in the effort to bring about an era of permanent peace.

But the bill goes far beyond that objective. It adopts the policy that has been ever the policy of bureaucracies since the beginning of time, endeavoring to reach out and assume powers that are already located in other agencies, and to perform work that is a direct duplication of that which is being done today in other agencies.

As I have stated, I have not had an opportunity to study the bill, but I notice that the agency is authorized to carry out a vast program of research and development and to enter into contracts and grants for research and development projects.

What is the nature of the research and development projects the agency would be authorized to institute and carry to a conclusion? On page 9 of the bill are listed some of the projects as to which research will be made and development undertaken. I note among them:

> The detection, identification, inspection, monitoring, limitation, reduction, control, and elimination of armed forces and armaments, including thermonuclear, nuclear, missile, conventional, bacteriological, chemical, and radiological weapons. * * *

Today the Department of Defense and other agencies are spending vast sums of money in research and development in the detection, identification, and monitoring of thermonuclear and nuclear missiles and in bacteriological, chemical, and radiological weapons. So also research and development in these areas in some measure is likewise being carried on in the Atomic Energy Commission.

Now it is proposed under the bill that we create a third agency which would duplicate all of this research and development.

On the same page, in line 10, the agency is authorized to carry on a program of research and development in "the techniques and systems of detecting, identifying, inspecting, and monitoring of tests of nuclear, thermonuclear, and other weapons."

We have spent almost countless millions of dollars through the Atomic Energy Commission and through the Department of Defense in developing techniques and systems of detecting, identifying, inspecting, and monitoring of tests of nuclear, thermonuclear, and other weapons.

Yet we propose to give to this agency the very broadest powers to enter into contracts or to carry on their own research programs. We are therefore creating a new agency to do work that is already being done at great cost to the American taxpayer.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. RUSSELL. I am glad to yield.

Mr. SPARKMAN. The Senator is pointing out something that received a great deal of attention in committee, I can assure him. I see on the floor the Senator from Iowa, who had perhaps the leading part in constructing the bill, as we considered these many things. If the Senator will notice in line 3 of page 9, we rewrote that whole section. The key word in line 3 on page 9 is "participation." It calls for participation in these various activities. I assure the Senator from Georgia that we gave a great deal of attention to the idea of duplication.

If the Senator will refer to section 34 on page 14 of the bill—it was section 37, but is now section 34—beginning with line 16, he will note that we

amended that provision also. We provided for the President of the United States to coordinate this program, to make certain that there is coordination, exchange of information, and consultation. Certainly it is our idea that there shall be eliminated, so far as possible, needless duplication. I believe the Senator will agree with me that if we are to have an agency of this kind it ought to have some way of getting this information. Otherwise they cannot proceed.

Mr. RUSSELL. Of course, any such agency should have authority to secure information from other agencies of Government, but that is contained in another provision of the bill. The Agency now in existence has ample authority to obtain this information from other agencies.

Mr. SPARKMAN. We still have the sense of that contained in the bill. Its being stricken out was a matter simply of rewriting it. Certainly it is our idea that this Agency shall make use of the other agencies and departments of Government in obtaining this information, and the President is directed to coordinate matters to that end.

Mr. GOLDWATER. Mr. President, will the Senator yield, so that I may ask a question of the Senator from Alabama?

Mr. RUSSELL. I was not on the committee, and this print of the bill was presented here this morning. I have not had an opportunity even to read it consecutively. However, I submit that the argument of the Senator is not applicable at all when he comes here and says that the authority shall include "participation in the following," because that is in addition to the direct authority in the preceding part, contained in section 33, providing authority for the carrying on of the research and development in all the fields enumerated. Therefore, it means that they will carry on at the same time the same research that the Atomic Energy Commission is carrying on and that the Defense Department is carrying on, and that they may also participate with these two agencies in carrying on similar research.

Mr. SPARKMAN. I would suggest that the Senator read beginning at line 23 on page 8: "In carrying out its responsibilities under this act, the Agency shall, to the maximum extent feasible, make full use of available facilities, Government and private."

As I have said, we changed the language in the original bill, so as to make it clear that the language meant participation and not exclusive action in that field.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. RUSSELL. I shall be glad to yield in a moment. If the Senator from Alabama desires to carry out what he indicates, it should read that this Agency shall be "limited to participation in the following" insofar as they relate to disarmament.

Mr. SPARKMAN. Mr. President, will the Senator repeat that, please?

Mr. RUSSELL. It should limit the authority of the Agency with respect to research, development, and other studies to "participation in the following" insofar as they relate to disarmament.

Mr. SPARKMAN. As a matter of fact, it seems to me that there is no difference, that that is exactly what it says.

Mr. RUSSELL. Then I will offer that as an amendment. I believe that would be a vast improvement. I therefore offer the amendment that "the authority of the Agency with respect to research and development and other studies shall be limited to participation in the following insofar as they relate to disarmament," and then list subparagraphs (a), (b), (c), and so forth.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. RUSSELL. I yield.

Mr. GOLDWATER. I was going to suggest that the Senator's amendment might go further than that, to strike out everything down to the word "facilities" on line 25, and through the rest of that section. I cannot imagine any agency of Government not being able to use the facilities of every other agency.

Mr. RUSSELL. That is provided in another provision of the bill.

Mr. GOLDWATER. Then it would be provided here too.

I agree with the Senator from Georgia that this would create a vast new bureau that would immediately become engaged in research in all these fields, whether we put a limitation on it or not, and that we would credit another agency interested in detection and techniques and analysis, and so forth and so on. I suggest that these things are being performed today, and we have an agency already in the Department of State that is taking care of disarmament. I agree with the Senator from Georgia that we do not need another governmental agency to handle this matter. We already have one. The Agency has access to the facilities. The bill would provide for the training of scientists and technicians and other personnel for manning the control systems which may be created by international disarmament agreements. We have already available the means of training these people. I believe the Senator's whole approach is one of being of the opinion that it is not needed because it would be repetitious, and is action that the Senate should not take.

Mr. RUSSELL. With respect to certain aspects of research and development, we have spent monumental sums of money. I realize that some of my brethren are inclined to look with disdain on any statement that expresses concern over spending tax money. However, we have spent monumental sums of money in research in these various areas through both the Atomic Energy Commission and the Department of Defense.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. RUSSELL. I yield.

Mr. SPARKMAN. I ask unanimous consent that Miss Morella R. Hansen, of the staff of the Committee on Foreign Relations, be permitted the privilege of the floor of the Senate during the discussion of the pending bill. She has been quite active in preparing the bill.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. GOLDWATER. Mr. President, I ask the distinguished Senator from Georgia, who is chairman of the Committee on Armed Services, if it would not be rather incongruous for the United States to assume that we may now go into some activity such as is proposed, placing the full strength of our Government behind disarmament, while at the same time we are increasing our expenditures for defense.

Mr. RUSSELL. I first undertook to make that point earlier in my remarks, which, I may say, I had intended to limit to my stating that I intended to vote against the bill, because at this time a disarmament administration exists in the Department of State, and we should not confuse the issue by creating another. The Secretary of State can assign to that agency any number of people he wishes to, or any person whom he wishes to. Using his authority as Secretary of State, he can get any information he desires from any other agency in the Government for that administration.

Not only is the bill incongruous; it will also cause great confusion and misunderstanding among the peoples of the earth to have the Congress of the United States solemnly legislating to create a disarmament agency, when it is really not necessary to do so, and at a time when we are summoning the freemen of the world to arm themselves, rather than to disarm, to resist the threat of Soviet aggression.

I realize the importance of avoiding a nuclear war. I would submit to almost any sacrifice which would insure its avoidance. However, I think this proposal is more likely than not to promote war, because our adversaries will say that the American people are so confused that they are going in both directions at the same time and are incapable of uniting to provide for our security.

Mr. GOLDWATER. I suggest to the Senator from Georgia that the surest way to bring full nuclear war to the world would be for the United States to appear weak or unwilling to fight. This view has been developed beyond any question of doubt. It is a historic fact that when a country appears to be weak, it loses; and in losing, there are bound to be those patriotic members of the Armed Forces who will say, "We will not give in"; and off will go the missiles. I think that will be the surest way in the world to assure a full-scale themonuclear war.

On the other hand, if we build up our military potential, our military strength, as we are doing, I think that is a good way—in fact, the only way—to insure the absence of a thermonuclear war.

I was reading only this morning in the U.S. News & World Report an interesting article relevant to this issue. I realize that that publication is not an official military document; still, its sources of information are usually valid. The article compared the weapons of the ground forces of the Soviet Union with our own. I was rather surprised to learn of a number of areas in which

the Soviets are admittedly ahead of us in the development of modern ground weapons. At this time, when we are just beginning to produce superior weapons, it would be wrong for us to say to the world that we are going to disarm, that we will stop making weapons, while the Soviet has an advantage over us in this field.

I am very glad the Senator from Georgia has raised this question this morning. I realize that he intended only to comment on it briefly. Nevertheless, I do not believe this is a bill which should pass the Senate without a thorough discussion.

Mr. RUSSELL. I have other matters pending which deny me the opportunity to discuss the bill thoroughly. At one time I had intended to move that the bill be committed to the Committee on Armed Services.

Mr. GOLDWATER. I think it should be so committed.

Mr. RUSSELL. I thought it cut very broadly across the field of operations of the Committee on Armed Services; but the Committee on Foreign Relations, which eventually handled the bill—it was originally referred to the Committee on Government Operations—vastly improved the bill in two respects. One was that while, in essence, a new agency was created, it was placed clearly and definitely within the Department of State. Likewise, the Committee on Foreign Relations greatly strengthened the security provisions of the bill. For that reason, I shall not make a motion to refer the bill to the Committee on Armed Services.

I am heartily in favor of the objectives of the bill, but I cannot conceive of a more unfortunate time to consider it than when the Russians are popping thermonuclear bombs; and threatening the peace, and when we are trying to increase the stamina of our people to resist the threat of atomic holocaust; when Mr. Khrushchev is talking about wiping civilization off the face of the globe, which may well be done; and when we know that there are in this country large groups of the school which had rather be "Red than dead," as they say; who disagree with those who say they would rather die on their feet than live on their knees, groveling to some Communist master.

Mr. President, I cannot conceive of a more unfortunate time to pass such a bill as this.

Mr. HICKENLOOPER. Mr. President, will the Senator from Georgia yield?

The PRESIDING OFFICER (Mr. BIBLE in the chair). Does the Senator from Georgia yield to the Senator from Iowa?

Mr. RUSSELL. I yield.

Mr. HICKENLOOPER. We should all be grateful to the Senator from Georgia for raising this particular phase of the issue this morning. As a member of the Committee on Foreign Relations, I voted to report the bill. However, as the bill was originally sent here from the administrative department of the Government, I was greatly concerned about it.

I wish to make my position clear. I took the position in the committee, and I still take the position, that if one reads the original bill, he will see that it provides for creating, indeed, no super agency, but a supra agency, an agency which was an overall, superior agency, independent and autonomous, an agency which would command the services and the fealty of all the other agencies of Government. In this field, I thought that was not only extremely dangerous, but very ill advised. Other members of the committee had the same feeling.

The Committee on Foreign Relations did some arduous work on the bill. Also, some of the amendments which were adopted by the committee were adopted over the strenuous objections of bureaucrats who wanted to administer the bill, which is understandable. I believe the bill is a much better bill now than when it came from the administrative department. However, I find myself in general agreement with the Senator from Georgia. While on the question of the passage of the bill as it now stands, if it is fully discussed and understood by the Senate, I shall probably vote for it because I believe it is now in such shape that it provides for a cooperative agency; nevertheless I do not see the burning necessity for the proposed legislation at this time.

Furthermore, I believe the bill should be of great interest to the Committee on Armed Services, of which the Senator from Georgia is the chairman. I may say to the Senator from Georgia frankly that I am not disloyal to my Committee on Foreign Relations, but because I feel deeply that this is of great and vital interest to the Committee on Armed Services, if the Senator from Georgia during the course of the debate moves to refer the bill to that committee, I will support his motion. I think the bill is so vital that I do not believe its consideration should be limited. I would support the theory that its consideration should not be limited to one committee alone. When its purpose cuts across the line of foreign relations, it also cuts across the line of the defense posture of our country.

I am not trying to coerce the Senator from Georgia—no one can coerce him—into any activity; but I assure him that if his judgment is that the bill ought to be referred to his committee for consideration, I believe that would be a proper motion, and would be greatly in the interest of the United States and the future security of our country. I think the Committee on Armed Services should have a serious part in this discussion. Again I say that I would support such a motion if it were made by the Senator.

I said a moment ago that the bill is a better bill than when it came to the committee. The evidence of that is that when the bill came here, there was substantial objection to parts of the verbiage of the bill, to its provisions, and to the supra agency it created, to the uncertainty of its responsibility, of its reporting, and its lines of authority.

There was substantial opposition to many of those provisions. The committee went to work; and finally the committee unanimously voted to report the bill; and I believe that the committee unanimously believes that the bill as reported is in fact a better bill.

But, although, as I have stated, I supported the reporting of the bill, I am not persuaded that there is a burning necessity for this measure at this time; and I can see many areas of confusion which actually we tried to correct in the committee, but which undoubtedly we have not fully corrected all the way through.

However, I believe this measure is so important that it should receive the serious consideration of the Members of the Senate; they should know what they are voting on; and I earnestly hope the bill will receive such consideration, because this measure will indeed set up an agency whose tentacles could extend into every department and agency of the Government. What disruption would be caused, I do not know; I hope none would result. I hope the Agency would contribute constructively to the study of disarmament and its potentials and all of this, that, and the other thing in that connection. But certainly the question asked a moment ago by the Senator from Arizona, in regard to the general psychology of this legislation, should be discussed.

We are right now probably in the greatest peril that we in this country have ever been in, with the ominous threats which overhang us. On the one hand, we are increasing our armaments and our strength, in order to be able to counter this threat from the Kremlin. On the other hand, it is here proposed that we establish an agency which many persons would interpret as being a move toward disarmament. I do not think it is, but it could be interpreted in that way. Certainly we should be sure what we are doing. So if the Senator from Georgia wishes to make the motion to which he has referred, I certainly will vote for it, even if he and I are the only two Senators who do vote for it.

Mr. RUSSELL. Mr. President, I appreciate the statement and the support of the Senator from Iowa, particularly in view of the fact that he is a member of the committee which reported the bill to the Senate. But I do not know how long the Senate will be in session. The agenda of the Armed Services Committee is very crowded at this time, and I would not wish to take the responsibility for having the bill referred to the committee and also the responsibility for giving assurance that the bill would be reported at this session. For that reason, and in view of the fact that the principal sponsor of the bill has agreed to limit the conflicts between the Defense Department and the proposed Agency to participation in these activities which clearly are within the purview of the Atomic Energy Commission and the Armed Services Committee, I do not propose to make such a motion.

Mr. HICKENLOOPER. Mr. President, if the Senator from Georgia will

yield, I merely suggest—and I am not trying unduly to urge anything on the Senate—that the bill has not yet passed the Senate, and certainly it has not passed the House, and I do not know whether the House committee has held hearings on the bill. So I do not see how it will be possible in the few remaining days of this session for an appropriation for this Agency to be made this year.

I think this is a very vital matter, and it should be given very full consideration.

Mr. RUSSELL. I agree with the Senator from Iowa; and, as I have told him, I intend to vote against this bill at this time. But I do not wish to try to bring into my committee bills which had been referred to other committees, unless there is a very clear assumption of the power which is given to the Armed Services Committee under the Legislative Reorganization Act. If this bill limit the proposed new Agency to participating with existing agencies in the field of military research and development I shall not make that motion.

But I will say I think it would be unfortunate and incongruous for the Senate to pass the bill under the circumstances existing today.

Mr. HICKENLOOPER. I will say that the inclusion of the word "participation" was deliberate and by design, because as the measure was originally constituted, it might have been contended that this Agency would have overriding authority over other agencies.

Mr. RUSSELL. Undoubtedly so; and without the amendment I believe the new Agency could have equal right with any existing agency to inaugurate on its own such very vital tests in research and development, which now are being carried on, and have been in existence for years, at enormous cost to the taxpayers of the United States in the Department of Defense and the Atomic Energy Commission.

We found from sad experience in the Department of Defense that within that one Department alone, with its various subdivisions—the Army, the Navy, and the Air Force—competing in the field of missiles, our scientists were spread so thin that we were falling behind, because we had them working in three separate compartments. This measure, unless the amendment is adopted, would spread them even thinner, by means of the new Agency now proposed.

I am not too much impressed by the protection pointed out by the Senator from Alabama in section 34, formerly section 37. It has become very popular in Congress to include in various bills provisions to the effect that the President is authorized to establish procedures, and the like. However, not only every Member of the Senate, but also every thinking citizen of the country, knows that in view of the burdens on the President of the United States at the present time, all he could possibly do would be to accept the opinions and plans of the man in whom he had the most confidence among those presenting plans and procedures.

It would be an utter impossibility for the President of the United States—beset, as he is, on all sides by vast international issues including the threat of war, and with his responsibility to raise the Armed Forces of the United States and to be their Commander in Chief—to sit down, read, and study out every detail involved between the Atomic Energy Commission, the National Aeronautics and Space Administration, and the other affected Government agencies. While writing such a provision constitutes a convenient escape hatch for the Congress, and would relieve Congress from the responsibility of making the decision—I refer to a provision to the effect that the President shall do thus and so—yet we must realize that we have already placed so many burdens on the President that the very thought of any one man considering all of them becomes absurd. As a practical matter, all he could do would be to accept the views and the plans of the one in all these agencies in whom he had the most confidence.

Mr. President, I intended to speak for only about 2 or 3 minutes, and to say that I think the bill should not be enacted at this time, and that for that reason I shall vote against it. I did not intend to engage in prolonged debate.

I believe that the amendment I have offered is pending. Is that correct?

The PRESIDING OFFICER (Mr. BIBLE in the chair). That is correct.

The question is on agreeing to the amendment of the Senator from Georgia. The Chair is informed that the amendment in written form is not now at the desk.

Mr. RUSSELL. Mr. President, I have seen the time, before, when the clerks have been able to reduce amendments to writing. But if they have not done so, I shall undertake to get pencil and paper and write out the amendment.

The PRESIDING OFFICER. The Chair is now advised that the written amendment of the Senator from Georgia is now at the desk.

The amendment of the Senator from Georgia will be stated.

The LEGISLATIVE CLERK. On page 9, in lines 2 and 3, after the word "shall", it is proposed to strike out the word "include", and to insert the words "be limited to".

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Georgia.

Mr. CASE of South Dakota. Mr. President, will the Chair have the amendment stated again? I was trying to find the place for the amendment in the bill.

The PRESIDING OFFICER. The amendment submitted by the Senator from Georgia will be stated again.

The LEGISLATIVE CLERK. On page 9, in lines 2 and 3, it is proposed to strike out the word "include", and to insert the words "be limited to".

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. CASE of South Dakota. Mr. President, I do not know that I have any objection to the amendment. Having the floor, however, I should like to make a few remarks on the bill.

Mr. HUMPHREY. Mr. President——

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Georgia.

Mr. CASE of South Dakota. Mr. President, is the Senator from South Dakota recognized?

The PRESIDING OFFICER. The Senator was recognized.

Mr. HUMPHREY. Mr. President, the Senator from Georgia has the floor, has he not?

The PRESIDING OFFICER. No. The Senator from South Dakota has the floor. The amendment was called up, and the Chair recognized the Senator from South Dakota. If the Chair understood the Senator from South Dakota, he was speaking on the amendment of the Senator from Georgia.

The Senator from South Dakota is recognized. He has the floor.

Mr. CASE of South Dakota. Mr. President, I do not know that I shall oppose the amendment, but I do want to make some observations which relate to the bill itself and, by implication, to the amendment.

The junior Senator from South Dakota is aware of the fact that this is a most important bill, and also agrees with the observations that have been made about the duties of the President at this particular time.

One of the most important responsibilities resting upon the President has to do with the questions that are involved in the matter of disarmament. It is my conviction that the bill should be passed. If the chairman of the Committee on Armed Services wanted to have the Committee on Armed Services consider the bill, I would certainly have no objection to it, being a member of the committee. But if the President is to meet the responsibilities he has today, he needs the information that can be developed by the Disarmament Agency.

On page 7 of the bill, section 26 reads as follows:

> The President, by and with the advice and consent of the Senate, may appoint a General Advisory Committee of not to exceed 15 members to advise the Director on disarmament policy and activities. The President shall designate one of the members as Chairman. The members of the committee may receive the compensation and reimbursement for expenses specified for consultants by section 41(d) of this Act.

Mr. President, I do not know how the President can meet the responsibilities he has and make the decisions he must make in the months ahead unless he has someone to advise him in the field of disarmament and on the matter of disarmament policy.

I do not know how the President could expect to have this Agency or an advisory committee provide him with the counsel he should have, unless he would have the authority that is proposed in section 34, on pages 14 and 15.

So, far from fearing the results of having procedures that would assure cooperation between the several agencies, I think they are most desirable.

Section 34, beginning on page 14, as amended by the committee, reads:

The President is authorized to establish procedures to (1) assure cooperation, consultation, and a continuing exchange of information between the Agency and the Department of Defense, the Atomic Energy Commission, the National Aeronautics and Space Administration and other affected Government agencies, in all significant aspects of U.S. disarmament policy and related matters, including current and prospective policies, plans, and programs, and (2) resolve differences of opinion between the Department of State and such other agencies which cannot be resolved through consultation.

Mr. President, within my lifetime we have many times come to the brink of war. Three times we have gone over that brink. The whole question of war and peace for the future is one that hangs heavily over the whole world today. If there is any prospect of averting going over the brink, it necessarily involves questions that are related to disarmament.

It seems to me that such an Agency as is here proposed and such an advisory committee as is here proposed, are part of the equipment which the President of the United States needs at this time. So I wholeheartedly express support of the enactment of the legislation.

Mr. SPARKMAN. Mr. President——

The PRESIDING OFFICER. The amendment has not been placed to a vote yet.

Mr. SPARKMAN. I think we would like to defer that for a few moments.

The PRESIDING OFFICER. The Senator from Alabama is recognized.

Mr. SPARKMAN. In the normal course of procedure, the Senator from Minnesota, who is the principal sponsor of the bill, would make the opening statement. However, he has consented to my making a brief statement ahead of time because of an appointment that will require my leaving the floor shortly.

It is with considerable gratification that I today support S. 2180, a bill to establish a U.S. Disarmament Agency. It was in 1951, on the initiative of Senator Flanders, of Vermont, that I joined with him and a good number of other Senators in introducing one of the first bills in the Senate calling for a more rapid movement toward arms control which might lead to disarmament. It would be interesting to look up that bill to see how many Senators sponsored it; as I recall, there must have been 2 dozen.

By the way, let me say at this point that I think a much better term in describing the objectives sought in this bill is "arms control." I sometimes think the term disarmament may be misleading quite a number of people.

Mr. RUSSELL. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. RUSSELL. I agree with the Senator that it would be better to call it arms control. What disturbs me is that all the American people are in favor of arms control and disarmament.

Mr. SPARKMAN. Looking toward disarmament.

Mr. RUSSELL. Yes, looking toward disarmament. I am in favor of disarmament. I am sure if it could be done universally, all over the world, with a foolproof system of inspection, the American people would be unanimously in favor of disarmament. But the man who has to be convinced is not affected by the law, and that is Mr. Khrushchev, in another country, and unless we can convince him, all of this action is futile. While the proposal cites desirable aims and hopes and prayers—and, indeed, the chances for survival of mankind depend on some agreement—with the reluctance of Mr. Khrushchev to agree on any disarmament, it has seemed to me that, desirable as this policy might be, it was rather poorly timed to bring it up right now.

Mr. SPARKMAN. I am in complete agreement with the statement the Senator has made except the conclusion he has drawn. Yes, certainly the man we have to work with is Mr. Khrushchev, and he is not bound by this legislation. However, unless we make a start, we will never have any hope of making any headway. Certainly, the force of world opinion is a terrific force. Probably some day it will be even with Mr. Khrushchev. Let us hope it will.

Mr. RUSSELL. I share that hope.

Mr. SPARKMAN. Before the Senator asks me to yield, let me throw in a thought which crossed my mind. A good many years ago, when Gen. George J. Marshall was Secretary of State, a number of us went to meet with him to talk about this very problem. Here was a man whose whole life had been spent in the military, in which force and power were the principal terms.

I shall never forget a statement General Marshall made. He said:

I say to you people that the greatest single force among men in this world is the force of public opinion—world public opinion.

He also said:

Some day it will influence Russia.

I do not know when that "some day" will arrive, but we must do all we can to get world public opinion on our side. I think we help in doing so when we show to the world the willingness to try to do something which might some day—even though that day may be way off in the future—eventuate in a reasonable program of arms control.

As the Senator from Georgia says, eventually we seek disarmament.

I yield to the Senator from Georgia.

Mr. RUSSELL. Mr. President, at one time I had great faith in the force of world opinion and the effect it would have on rulers of Russia. There was a time when it seems that the views of the man in the street—the peasant in India, the barber in Oslo, the average man throughout the world—would influence the rulers of Russia in some of the decisions they made. I have been compelled to change my view in that regard. The present dictator of Russia ordered the resumption of nuclear tests coincident with the Belgrade Conference with the neutralists in attendance. These are people we are told daily we must undertake to attract to our support. We are told we must undertake to convince them to form a good opinion of the United States. The Conference was in session. These people were considering the questions which plague and threaten mankind. Khrushchev made the announcement that he was going to resume atomic testing, something all of us had hoped to avoid, and something about which we had hoped we could come to an agreement to prevent.

What happened? That Conference condemned the United States more than it condemned Russia, in its resolutions.

I have been forced to the very disturbing and ugly conclusion that fear is the thing which motivates mankind and which causes decisions to be made in the chancelleries of the earth. Mr. Khrushchev apparently was of the same opinion, because he did not care what these men thought about him. He announced the resumption of atomic tests. The fear which motivated the representatives of the nations meeting at Belgrade evidently deterred them from making the scathing denunciation that decision deserved.

Mr. WILEY and Mr. CASE of South Dakota addressed the Chair.

Mr. SPARKMAN. I yield to the Senator from Wisconsin.

Mr. WILEY. Mr. President, I have enjoyed the interchange of ideas. I think to a large extent the Senator from Alabama and the Senator from Georgia are both correct. The human mind is such that fear operates and causes individuals and nations to do things which are not in line with the moral precepts as we know them.

I have received pounds and pounds of correspondence in respect to the disarmament bill. I am a cosponsor of the bill.

I cannot permit what appears to be a very serious situation—that is, people being blinded by the term "disarmament"—to continue, without commenting upon it.

Passing the bill will provide no miracle weapon. It will not do what we would like to see done. As stated by the Senator from Georgia, Khrushchev is an example of the human mind in action on this globe today.

A good many people who have written me have forgotten all about what happened after the First World War. Definitely we entered into an agreement. We scrapped all the war wagons. We said, "Now the war is over." But it was not. We destroyed our battleships and we had faith in those who made the agreement, but they broke faith.

We have had 50 agreements with Khrushchev, and he has broken all but one.

Mr. SPARKMAN. Mr. President, if the Senator will permit——

Mr. WILEY. May I continue? I shall soon be through.

Mr. SPARKMAN. I yielded for a question.

Mr. WILEY. I did not hear the Senator say "question." I am asking a courtesy now, that I may continue my thought.

Mr. SPARKMAN. For how long? I have an appointment. I stated when I

began that I wished to complete my statement because I had an appointment. How much time does the Senator desire?

Mr. WILEY. Three minutes.

Mr. SPARKMAN. I yield 3 minutes to the Senator from Wisconsin, if I may.

Mr. WILEY. I thank the Senator. The Senator from Alabama is always courteous.

Mr. SPARKMAN. Will the Senator cease and desist long enough that we may have a vote on the amendment proposed by the Senator from Georgia?

Mr. WILEY. I thought the vote had been taken.

Mr. SPARKMAN. No.

The PRESIDING OFFICER (Mr. BIBLE in the chair). The question is on agreeing to the amendment offered by the Senator from Georgia [Mr. RUSSELL].

The amendment was agreed to.

Mr. SPARKMAN. Mr. President, I ask unanimous consent that I may be permitted to yield 3 minutes to the Senator from Wisconsin, without losing my right to the floor.

Mr. WILEY. Mr. President, the reason why I suggested what I have stated is that I wish to make it clear the passage of a Disarmament Agency bill, which would create an agency to operate under the President and the Secretary of State, will be no miracle performance or miracle vehicle, nor will it create something which could straighten up the minds of Khrushchev and others, for, after all, agreements involve the moral responsibility of the contracting parties.

Mr. President, the enactment of S. 2180, now before the Senate, would, in my judgment, provide Uncle Sam with a new, effective instrument in our efforts toward control and ultimately reduction of armaments, if the minds of mankind were available. I say "available." Ordinarily the minds of mankind are filled with fear, as suggested, and will not permit the operation, as they did after the First World War, of a disarmament measure.

Realistically, the outlook for progress is not too bright—at the present time. Why? Principally, because Mr. Khrushchev—while giving lip service to the idea of arms reduction—continues to add new, bigger weapons to the arsenal of communism.

For this reason, then, we must be careful not to delude ourselves, either into apathy or passiveness. Rather, we must continue to maintain a strong, effective military deterrent to aggression.

At the same time, however, I believe it is not inconsistent that we continue—in fact, expand—our efforts to find agreements on control, and ultimately, reduction of arms.

Even though the Communists may continue to obstruct progress, such an agency, I believe, would give us a stronger, clearer voice in presenting U.S. policies to the world.

As the East-West deadlock continues, the power and influence of world opinion may indeed be a significant factor in the outcome of the freedom verus communism struggle.

Recently, I was privileged to review background factors of the disarmament picture in a television interview. I request unanimous consent to have excerpts of my comments printed at this point in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR WILEY

Around the globe, man is hungering for peace—for a world in which the war clouds, and an omnipresent fear of nuclear annihilation fade away; in which the resources of earth—including the genius of man—can be concentrated upon conquering the age-old foes of illiteracy, disease, prejudice; in which the standards of living can be raised to levels of dignity and respectability—if not luxury; and the whole family can dedicate its best efforts to constructive, not destructive goals.

As a nation, we are dedicated to serving these goals. By contrast, communism—controlling one-third of the people, and one-fourth of the land of earth—aims at conquering the world; enslaving all people to an atheistic political-social-economic system; destroying freedom; and utilizing the manpower and resources of the earth—not mainly to serve the people, but to perpetuate a communistic global dictatorship.

This sharp clash between East-West ideology involves a struggle on ideological, political, economic, and military fronts.

The arms race, particularly, results in grave dangers for world peace. How? By reason of the possibility of either accidental or premeditated war.

In addition, it is extremely costly.

Today, the United States, for example, is spending about $47 billion on arms. By contrast we invest about $100 million—or slightly more than one-fifth of 1 percent of that amount—on our disarmament program.

Globally, the dollar cost of armaments—for all nations, east and west—is estimated to exceed $110 billion annually. Think of it. By comparison, this roughly doubles the gross national products for all goods and services produced annually in nations such as France, United Kingdom, and the Federal Republic of Germany. In addition it amounts to about one-half of the gross national product of the Soviet Union, and about one-fifth of that of the United States—now about $517 billion.

Because of the economics alone—secondary, of course, to peace—a stepped-up effort to attain reduction of armaments would be a worthwhile investment.

We recognize, of course, that arms controls is an integral—not an isolated—aspect of our overall foreign policy.

Our planning, and negotiations, must then take into account: First, and foremost, the security of the United States; and second, our responsibilities and obligations as leader of the free world.

Because of the Communists' aggressive policies, of course, it is extremely difficult to get enforcible, safeguarded agreements.

Consequently, we—and the free world—will need to continue to maintain a strong, deterrent power. At the same time, we must exhaust all avenues of finding a peaceful solution to East-West differences.

Despite the dim outlook for miracle-type progress the creation of a peaceful climate in the world is so promising, and the occurrence of a devastating nuclear-missile war would be so catastrophic, that we, as the leader of the free world, can do no less than dedicate the necessary manpower, brainpower, and resources, to creating and presenting the best, and the most workable plan possible for control and reduction of armaments.

By so doing, we will best serve not only the interests of our own country, but of humanity and of posterity.

Mr. WILEY. I thank the distinguished Senator from Alabama.

Mr. SPARKMAN. I am very glad the distinguished Senator from Wisconsin has made the remarks he has submitted. He is one of the sponsors of the bill and was an able participant in the discussion in the Foreign Relations Committee which resulted in the reporting of the bill by a unanimous vote.

Mr. President, prior to reporting the proposed legislation the committee heard an outstanding list of distinguished American citizens from both parties support the legislation we now have before us. After concluding our hearings the committee spent 4 days in analyzing the bill section by section, and I believe the bill we report is a much better bill than that which was originally introduced.

I wish to take this opportunity, Mr. President, to commend those members of the Foreign Relations Committee, particularly the Senator from Iowa [Mr. HICKENLOOPER], and the Senator from Missouri [Mr. SYMINGTON], who, with the sponsor of the bill [Mr. HUMPHREY], spent many hours of hard work on the proposal now before the Senate.

The Committee on Foreign Relations was objective and nonpartisan in its work and as a consequence the bill is reported to the Senate with unanimous support by members of that committee.

The most significant change which the committee made in S. 2180 involved a change in the concept of the Agency from that of an independent unit in the executive branch to an agency located within the Department of State.

We gave the Agency considerable autonomy. I believe we arrived at a good solution. The Director of the Agency would occupy a new position as Under Secretary of State for Disarmament. In that position he would be the principal adviser to the Secretary of State and to the President on the subject of disarmament.

He would have the power to select his own personnel. Also provided in the measure is a separate authorization for an appropriation for the support of the Agency. Those two items particularly, together with his right to report directly to the President, would go a long way toward making the Agency an autonomous organization, and yet it would be under the supervision and direction of the Secretary of State.

The committee made it clear in the bill and in the report that although the new Agency is to have certain limited elements of autonomy, in fact it is to operate under the general direction and supervision of the Secretary of State. The committee thinking in establishing the Agency within the Department of State is summed up by a single sentence in the statement of purpose reading as follows:

Disarmament policy, being an important aspect of foreign policy, must be consistent with the national security policy as a whole.

Committee members recognized the need for an agency devoting full time to the study of methods of arms control leading toward disarmament. Although much work is now being done in such agencies of the Government as the Defense Department, the Atomic Energy Commission, the National Aeronautical and Space Administration, and elsewhere within the Government, no single individual or agency has been charged with responsibility for assuring that work done in these various agencies may be brought together to serve as a basis for the development and carrying out of disarmament policy. This bill now clearly fixes responsibility for activities of this kind in the Disarmament Agency.

The committee was very careful in providing the the President should establish procedures to assure cooperation and consultation among the agencies. At the same time the committee made it clear that the Disarmament Agency is to participate in studies in a wide area of governmental activities so long as they relate to the subject of disarmament. Thus, in section 31, Members will find that the new Agency has been authorized to participate in studies relating to the development of new weapons, systems for detecting nuclear tests, the control and reduction of armaments, the elimination of surprise attack, and so forth.

At this point I wish to say a word about the amendment offered by the distinguished Senator from Georgia [Mr. RUSSELL] which was agreed to. I wish to make clear that our understanding is not, as some have seemed to feel, that there be some other agency working with the proposed Agency at any particular time on any one of the projects, but it merely means that exclusive control is not to be given to the proposed Agency over those particular activities in conducting research and development, and that the proposed Agency will be authorized to participate in programs.

If other agencies are acting in programs, there shall be cooperation and coordination, which is provided in a subsequent section of the bill, which would give to the President of the United States the task of setting out procedures to provide for cooperation and coordination. That subject is fully covered in that section of the bill.

I wish it clearly understood that we are not placing shackles upon the proposed Agency, but have indicated the clear intent of Congress that there is not to be any exclusive occupation of the field in these particular activities in which other agencies may be engaged or may have authority to engage.

It is obvious that the scope of the Disarmament Agency activities is such as to require very careful selection of personnel to be employed by or to work with the Agency. The committee was not satisfied with the security requirements set forth in the draft bill and spent a substantial amount of time drafting a new section which requires a full field investigation by the Federal Bureau of Investigation before any person may obtain access to any classified information. Language of the bill specifies that investigations are to be directed not only toward the loyalty of an individual employee but toward his security qualifications. I am satisfied that the security provisions we have written in the bill are among the most thorough that appear in any Federal legislation.

We recognize the organization as a sensitive one, and we have strengthened the security requirements. I believe that no other agency in Government has more strict security requirements than we have provided in the bill for the personnel who will be employed by the proposed Agency, including the members of the advisory committee, and including contractors and subcontractors. Everyone dealing with the classified information of this proposed Agency will be placed under the same strict security requirements.

As indicated earlier, the Agency is to be under the direction of the Under Secretary of State for Disarmament. However, the appropriations authorized in the pending bill are not required to be made to the Department of State. The funds authorized could be appropriated to the Agency itself as a separate portion of the State Department overall budget. The committee authorized the appropriation of not to exceed $10 million to remain available until expended to carry out the purposes of the act. Thus it will be possible for the authorizing committees within the next year or so to examine again the effectiveness of the Agency created by this bill.

Before concluding my remarks, I wish to emphasize two points. First, the creation of the Disarmament Agency is not a panacea for our ills.

That is one point I think the American people should keep in mind. We do not propose this system as something that will solve our problems overnight.

Second, the creation of the proposed Agency is a logical step by this Government at this time.

I wish to stress that point because the timeliness of the program is one question which was raised in the minds of many people. The distinguished Senator from Georgia said that he did not believe it was timely.

It was pretty well brought out by some of our distinguished witnesses who appeared before the committee that it can never be more timely than at the present time.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. HUMPHREY. I should like to point out a remark of a distinguished general who has symbolized America's position of firmness and determination at Berlin—Gen. Lucius Clay. I have not had the privilege of knowing General Clay except as a public figure. I have not known him as a personal friend, though I would consider it a high privilege if his friendship were afforded to me. Only because he knew of the widespread interest in the bill, General Clay came out strongly for the bill in a statement under date of August 24. After reviewing the Berlin situation, he said very frankly:

I believe the agency charged with conducting the studies and making recommendations in this field should have statutory authority, a budget of its own, and confirmation of its high officials by the Senate and submit a yearly report to the Congress. I do not believe that this highly important subject is one which should be dealt with in a bureau, subjecting it to all the layers of authority which that involves.

Then he went on to tell us:

I would strongly urge the committee to recommend it to Congress so that favorable action can be taken during this session.

Interestingly enough, every general who testified, including Gen. Al Gruenther, General Eisenhower, and General Lemnitzer, testified that this is the time to establish the Agency.

Mr. SPARKMAN. Yes.

Mr. HUMPHREY. I gather that the distinguished soldiers I have named know something about the international situation.

Mr. SPARKMAN. I appreciate the remarks of the Senator from Minnesota. I am glad he brought up that point.

I believe it is extremely important for members of the public who supported the creation of the Disarmament Agency to realize that its creation does not mean that we are to achieve a substantial degree of arms control overnight. A number of members of the committee received communications suggesting that the peace of the world depended upon the creation of the Disarmament Agency. I must stress that disarmament is not something which can be achieved merely by expressing the wish for it. Painstaking examination not only of our own military posture but that of other great powers is required. Systems must be developed which will enable this Government to assure itself that the activities of other governments in the field of disarmament are consistent with treaties which they may make. In short, arms control requires more than words; it requires work.

The second question to which I now address myself relates to the timing of Senate action on the pending bill. From the beginning of committee consideration of this proposal doubts have been expressed as to the wisdom of its creation during a period of rising tension. How can the Senate consistently support increased budgets for defense and during the same session support the creation of a Disarmament Agency?

If there is any man who is alert to the present world-disturbing situation revolving around Berlin, it is this man whom the Senator has quoted, Gen. Lucius Clay. We have had some great Secretaries of Defense, and I was going to point to the statement of one of the greatest Secretaries of Defense this country has ever had, Thomas S. Gates, who served as Secretary of Defense during the later portion of the Eisenhower administration, or at least during a good part of the Eisenhower administration. He testified very strongly in favor of the pending measure. I read what he said, from page 142 of the hearings.

I would like to say something on timing, Mr. Chairman.

When you are engaged in a cold war with an adversary who has unchanged objectives for world domination, there is never going to be a good time. We are going to live

with crises, depending on what kind of tactics our adversaries want to use.

I think it is a good time under stress to assert our moral responsibilities and to stand up for our long-term principles for peace and world law and justice, and I take some comfort in the fact that we can do so from a position of great strength, both political and military, today.

So I think that timing is an asset, and the timing is good.

That is a strong statement, and as strong as could have been made on the bill with respect to timing.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. HUMPHREY. On that very point, the Senator commented with respect to some statements by our colleagues. During the hearing I asked General Gruenther the following question, which appears at page 137 of the transcript:

As a general of the Army, one who served his country in the military, do you feel that this proposal that we are discussing today weakens us in terms of our posture in the world of firmness to Mr. Khrushchev? Or do you feel that this proposal lends itself toward appeasement on the part of our people or a lack of firmness in our attitudes?

Mr. GRUENTHER. I do not. On the contrary, I feel that it strengthens us, and I would like to say one thing in connection with that, sir.

I noticed a statement in the paper this morning saying that it is improbable because of the crowded calendar that the Congress is going to be able to act on this bill.

It would be most unfortunate, again from the standpoint of impact, if the bill were allowed to lapse because of the press of other business.

I feel very strongly it will strengthen us, and I think a delay or a failure to act on it, pass it, will have a weakening effect.

Mr. SPARKMAN. Yes. Without further quoting from the testimony, that was the general tone of all of those who have been so closely connected with this problem. It included General Gruenther, who was so long associated with General Eisenhower in Europe; General Clay, who also was with General Eisenhower and connected with the Berlin situation. I believe this is particularly significant in view of the statement by the distinguishd chairman of the Committee on Armed Services with respect to the need for this kind of agency and the proper timing for it. I wish merely to name some of the witnesses who testified before our committee: Trevor Gardner, former Assistant Secretary of Defense for Research and Development; Roswell L. Gilpatric, Deputy Secretary of Defense; Alfred M. Gruenther, whose record we know, and who is now the president of the American Red Cross; Leland J. Haworth, a member of the Atomic Energy Commission, and a member of one of these sensitive agencies, and who said he testified on behalf of the Atomic Energy Commission; Christian A. Herter, former Secretary of State; Gen. Lyman L. Lemnitzer, Chairman of the Joint Chiefs of Staff. He testified that he was testifying on behalf of the Chiefs of Staff, and that they had been brought into full consultation in the development of this legislation.

Someone mentioned Henry Cabot Lodge, our former permanent representative in the United Nations, who formerly served in the Senate, was a member of the Committee on Foreign Relations, and with whom I had the pleasure of serving as a delegate in the United Nations during the Fifth General Assembly. Robert A. Lovett, former Secretary of Defense. John J. McCloy, who has served the Government in many different positions, and who is now adviser to the President on disarmament. James J. Wadsworth, the son of the distinguished former Senator and former Member of the House of Representatives, Jim Wadsworth. Jerry Wadsworth is his son and worthy successor. He served our Government in the United Nations and in the disarmament talks.

That is quite a list of military experts who have urged us to report the bill and report it now, and who have said it was timely now.

Mr. HUMPHREY. The Senator knows that at this moment Mr. McCloy, at the direction of the President of the United States, is meeting in New York with Mr. Zorin, the Soviet representative, on the subject of arms control. The prospects are not very reassuring, but at least we are meeting. The need for preparation is quite obvious.

Mr. Frederick M. Eaton, who was appointed by President Eisenhower as the Ambassador of the United States to the Ten-Nation Conference on Comprehensive Disarmament, made a very fine statement. He made the statement without any written preparation. He came before the committee and he asked to come before it, because he said he wanted to tell of his experiences. This is what he said. I read from page 148 of the hearings:

I am glad to have the opportunity to testify before your committee in strong support of S. 2180. I say that in spite of the feeling of many that this is not an opportune time to have fruitful talks with the Soviets in the disarmament area.

There may never be a fruitful time, but I am hopeful that there will be. At such time we must be prepared. Without an agency such as proposed we will have difficulty. We will find ourselves unprepared in the future, as we have in the past, to meet the deadlines as they come up.

My interest in disarmament stems not only from my interest as a citizen, but from the months I spent in Geneva talking with the Soviets in this general field.

I believe it is crucial that the committee act favorably on this legislation at this time, even though international tensions do not make negotiations with the Soviets particularly propitious.

LACK OF ADEQUATE ORGANIZATION AND STAFF TO HANDLE DISARMAMENT MATTERS

The executive branch has never been adequately organized or staffed to handle the complicated problem of disarmament.

From firsthand experience I know that extremely competent men are engaged in disarmament work in our Government. Their number is inadequate, their authority undefined, and their effectiveness severely limited by lack of any central direction.

My point is that as long as we are going to engage in these talks—and, of course, we are going to do so—we ought at least to go prepared. I believe in military preparedness. I have as good a record in the Senate for voting for military preparedness as any other Senator. I have not voted at any time to cut our Military Establishment. I have voted for military assistance abroad. However, the other side of the national security coin, as former Secretary of Defense Gates pointed out, is the matter of arms control and disarmament.

The Senator has recited a list of these distinguished military leaders, the greatest military leaders that this country has ever had, the men in whom we as Senators and as citizens put our faith and confidence. They have testified that we should do it now, to establish this Agency now, that it is vital to our national security. These are not pacifists. These are not people who say, "I would rather be Red than dead." These are the people who say, "I would rather be dead than Red." They come and say that this is the time to do it.

Mr. SPARKMAN. And they have said it without exception.

Mr. HUMPHREY. Yes; not one witness testified to the contrary. Some of the greatest men in America have said it without dissent.

Mr. SPARKMAN. Mr. President, the answer to this question is to be found in an understanding of the fact that if we do not begin to limit armaments, we shall surely continue the present path toward mutual destruction. Mutual destruction is almost certain to be our fate unless the suspicions which now underlie so many of our negotiations can be allayed. It is my hope, and I believe I speak for the committee, that the Disarmament Agency may develop plans and procedures and proposals that will make it possible to start the arms spiral downward.

We believe the bill is a start in that direction and I urge the Senate to support the proposed legislation.

Mr. JAVITS. Mr. President, will the Senator from Minnesota yield?

Mr. HUMPHREY. I yield to the Senator from New York.

Mr. JAVITS. Mr. President, I support the bill for a reason which is implicit in everything which has been said, but which if not expressed might not make it clear to my own constituents, as well as to the people of the country and the world, what the bill is really all about.

I support the measure on the hardheaded basis that preparation for disarmament today is as complex in terms of policy and technique, and the application of technology, as anything which we are doing in preparing for war. Unless we understand that, I do not believe we can properly get the impact of the proposed Agency. Also, unless we understand that, I do not believe we will back this Agency sufficiently with law and money to enable it to do its work.

I have been in Washington a long time, as have most of my colleagues. We know that any law or directive is good for 2 weeks to a year, and may then fall flat on its face, unless it receives implementation. Unless we understand that the bill we shall pass today is not some pleasant, do-good measure, sponsored by those of us who aspire to a world where the rule of law rather than the rule of force obtains, but that we are creating a hardheaded, critically important agency

of government, which will ultimately be entitled to the same attention, the same care and finances comparable with those which we lavish upon the agencies which are established for our defense and security, we will, in my opinion, not be doing justice to this Agency.

The people of the United States are deeply disquieted about what disarmament would mean. They are deeply disquieted to think that the wily Russian opponent, whom we may find working against us in terms of disarmament, may work out a deal in which we will find ourselves at a disadvantage before we wake up to what is going on around us. That is precisely why expertise in this field, of the highest order, adequately financed, with adequate research, with the same care, attention, and concern for security which we lavish upon our agencies which deal with war, should be inherent in the passage of the bill.

Second, and equally important, as I think Senators know, I am deeply concerned with the economy of the country. I have the honor to serve on the principal economic committees of Congress—the Joint Economic Committee and the Committee on Banking and Currency. The United States spends something in the area of $26 billion to $30 billion for various types of procurement for war purposes. When we consider the tangible part of our gross national product in terms of hard goods produced, we find this figure is 10 percent—perhaps more—of the very basis of the American economic system. In saying that we have a $500 billion gross national product, only a little more than half of it is in goods. The rest of it is in services and in various other contributions to the gross national product.

It has been quite properly said that we are greatly concerned about what will happen if we pull out a very large part of the amount which is spent for defense without providing a substitute for it. Another thing which commends itself to me very highly about the proposed Agency is that one of its powers, which is subsection (c), on page 9 of the bill, calls for an analysis of the national budgets, levels of industrial production, and economic indicators to determine the amounts spent by various countries for armaments.

I hope the Agency will find it possible within the particular ambit of one of its powers, to give us a clear blueprint as to what we must do in terms of our own development and in terms of an urgently needed development of the free world to substitute for defense goods production, a peacetime production. This, too, is a critically important element of the work of the proposed Agency.

So I believe we must understand that we shall go into this project with our eyes wide open. It is not some eleemosynary, gracious, or "work harder" venture, in which Senators are engaged who are noted for their humanitarianism desire to improve the welfare of mankind, as well as the welfare of our own people. This is a hardheaded, serious business. We shall be inaugurating an agency which deserves to rank, in the extent of our care and in the relative character of its financing, with the Department of Defense. Unless we understand that, I do not believe we will be doing justice to what we shall do today; nor will we have the serious purpose of implementing it.

I for one pledge myself to the serious purpose of implementing this very serious legislation.

Mr. GOLDWATER. Mr. President, I send to the desk an amendment to S. 2180.

Mr. HUMPHREY. Mr. President, will the Senator from Arizona yield? I desire to make my opening statement on the bill. I have the floor. Would the Senator permit me to do that?

Mr. GOLDWATER. Mr. President, I ask that the amendment lie on the table. I shall defer to the Senator from Minnesota.

Mr. HUMPHREY. I thank the Senator from Arizona.

Mr. President, I wish to address to myself to the text of Senate bill 2180 and its purpose.

I ask unanimous consent that the text of the bill as reported from the committee be printed at this point in the RECORD, and I ask that in printing the bill, the names of the sponsor and the cosponsors of the bill likewise be printed.

There being no objection, the bill (S. 2180) to establish a United States Disarmament Agency for World Peace and Security, introduced on June 29, 1961, by Mr. HUMPHREY (for himself, Mr. SPARKMAN, Mr. WILEY, Mr. COOPER, Mr. HART, Mr. CLARK, Mr. ANDERSON, Mr. RANDOLPH, Mr. MCGEE, Mr. CASE of New Jersey, Mrs. NEUBERGER, Mr. JAVITS, Mr. PELL, Mr. PASTORE, and Mr. PROXMIRE) and on September 6, 1961, reported from the Foreign Relations Committee by Mr. HUMPHREY, with amendments, was ordered to be printed in the RECORD in the form in which it was reported from the committee, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—SHORT TITLE, PURPOSE, AND DEFINITIONS

Short title

SECTION 1. This Act may be cited as the "Disarmament Act for World Peace and Security".

Purpose

SEC. 2. An ultimate goal of the United States is a world which is free from the scourge of war and the dangers and burdens of armaments; in which the use of force has been subordinated to the rule of law; and in which international adjustments to a changing world are achieved peacefully. It is the purpose of this Act to provide impetus toward this goal by creating a new agency of peace to deal with the problem of disarmament.

Disarmament policy, being an important aspect of foreign policy, must be consistent with national security policy as a whole. The formulation and implementation of United States disarmament policy in a manner which will promote the national security requires a central organization charged by statute with primary responsibility for this field. This organization must be so placed within the Government that it can provide the President, the Secretary of State, other officials of the executive branch, and the Congress with recommendations concerning United States disarmament policy, and can assess the effect of these recommendations upon our foreign policies, our national security policies, and our economy.

This organization must have the capacity to provide the essential scientific, economic, political, military, psychological, and technological information upon which realistic disarmament policy must be based. It must be able to carry out the following primary functions:

(a) The conduct, support, and coordination of research for disarmament policy formulation;

(b) The preparation for and management of United States participation in international negotiations in the disarmament field;

(c) The dissemination and coordination of public information concerning disarmament; and

(d) The preparation for, operation of, or as appropriate, direction of United States participation in such control systems as may become part of United States disarmament activities.

Definitions

SEC. 3. As used in this Act—

(a) The term "disarmament" includes the elimination, reduction, control, limitation, inspection, verification, or identification, of armed forces and armaments of all kinds under international agreement, including the necessary steps taken under such an agreement to establish an effective system of international control or to create and strengthen international organizations for the maintenance of peace.

(b) The term "Government agency" means any executive department, commission, agency, independent establishment, corporation wholly or partly owned by the United States which is an instrumentality of the United States, or any board, bureau, division, service, office, officer, authority, administration, or other establishment in the executive branch of Government.

(c) The term "Agency" means the United States Disarmament Agency for World Peace and Security.

TITLE II—ORGANIZATION

United States Disarmament Agency for World Peace and Security

SEC. 21. There is hereby established within the Department of State an agency to be known as the "United States Disarmament Agency for World Peace and Security".

SEC. 22. The Agency shall be under the direction of an Under Secretary of State for Disarmament, who shall serve as the principal adviser to the Secretary of State and the President on disarmament matters. In carrying out his duties under this Act the Under Secretary of State for Disarmament shall, under the supervision and direction of the Secretary of State, have primary responsibility within the Government for disarmament matters. He shall be appointed by the President, by and with the advice and consent of the Senate, and shall receive compensation at the rate of $22,500 per annum. For the purposes of this Act, he shall be referred to as the "Director".

Deputy Director

SEC. 23. A Deputy Director of the Agency shall be appointed by the President, by and with the advice and consent of the Senate. He shall receive compensation at the rate of $21,500 per annum. The Deputy Director shall perform such duties and exercise such powers as the Director may prescribe. He shall act for, and exercise the powers of, the Director during his absence or disability or during a vacancy in said office.

Assistant Directors

SEC. 24. Not to exceed four Assistant Directors may be appointed by the President, by and with the advice and consent of the Senate. They shall receive compensation at the rate of $20,000 per annum. They shall per-

form such duties and exercise such powers as the Director may prescribe.

Bureaus, offices, and divisions

SEC. 25. The Director, under the supervision and direction of the Secretary of State, may establish within the Agency such program and staff bureaus, offices, and divisions as he may determine to be necessary to discharge his responsibilities under this Act, including, but not limited to, an Office of Public Affairs and an Office of the General Counsel.

General Advisory Committee

SEC. 26. The President, by and with the advice and consent of the Senate, may appoint a General Advisory Committee of not to exceed fifteen members to advise the Director on disarmament policy and activities. The President shall designate one of the members as Chairman. The members of the committee may receive the compensation and reimbursement for expenses specified for consultants by section 41(d) of this Act.

TITLE III—FUNCTIONS

Research

SEC. 31. The Agency is authorized and directed to exercise its powers in such manner as to insure the acquisition of a fund of theoretical and practical knowledge concerning disarmament. To this end, the Agency is authorized and directed (1) to conduct research, development, and other studies in the field of disarmament; (2) to make arrangements (including contracts, agreements, and grants) for the conduct of research, development, and other studies in the field of disarmament by private or public institutions or persons; and (3) to coordinate the research, development, and other studies conducted in the field of disarmament by or for other Government agencies in accordance with procedures established under section 34 of this Act. In carrying out its responsibilities under this Act, the Agency shall, to the maximum extent feasible, make full use of available facilities, Government and private. The authority of the Agency with respect to research, development, and other studies shall include participation in the following insofar as they relate to disarmament:

(a) the detection, identification, inspection, monitoring, limitation, reduction, control, and elimination of armed forces and armaments, including thermonuclear, nuclear, missile, conventional, bacteriological, chemical, and radiological weapons;

(b) the techniques and systems of detecting, identifying, inspecting, and monitoring of tests of nuclear, thermonuclear, and other weapons;

(c) the analysis of national budgets, levels of industrial production, and economic indicators to determine the amounts spent by various countries for armaments;

(d) the control, reduction, and elimination of armed forces and armaments in space, in areas on and beneath the earth's surface, and in underwater regions;

(e) the structure and operation of international control and other organizations useful for disarmament;

(f) the training of scientists, technicians, and other personnel for manning the control systems which may be created by international disarmament agreements;

(g) the reduction and elimination of the danger of war resulting from accident, miscalculation, or surprise attack, including (but not limited to) improvements in the methods of communications between nations;

(h) the economic and political consequences of disarmament, including the problems of readjustment arising in industry and the reallocation of national resources;

(i) the disarmament implications of foreign and national security policies of the United States with a view to a better understanding of the significance of such policies for the achievement of disarmament;

(j) the national security and foreign policy implications of disarmament proposals with a view to a better understanding of the effect of such proposals upon national security and foreign policy;

(k) methods for the maintenance of peace and security during different stages of disarmament;

(l) the scientific, economic, political, legal, social, psychological, military, and technological factors related to the prevention of war with a view to a better understanding of how the basic structure of a lasting peace may be established;

(m) such related problems as the Director may determine to be in need of research, development, or study in order to carry out the provisions of this Act.

Patents

SEC. 32. No appropriated funds may be expended pursuant to authorization given by this Act for any technological research or development activity unless such expenditure is conditioned upon provisions effective to insure that all information, uses, products, processes, patents, and other developments resulting from that activity will (with such exceptions and limitations as the Director may determine to be necessary in the interest of the national defense) be made freely and fully available to the general public. Nothing contained in this section shall be construed to deprive the owner of any background patent relating to any such activity of any right which he may have under that patent.

Policy, negotiations and related functions

SEC. 33. Under the supervision and direction of the Secretary of State—

(a) the Director shall prepare for the President, the Secretary of State, and the heads of such other Government agencies as the President may determine, recommendations concerning United States disarmament policy.

(b) The Director, for the purpose of conducting negotiations concerning disarmament or for the purpose of exercising any other authority given him by this Act, may (1) consult and communicate with or direct the consultation and communication with representatives of other nations or of international organizations and (2) communicate in the name of the Secretary with diplomatic representatives of the United States in this country and abroad.

(c) The Director shall perform functions pursuant to section 2(c) of Reorganization Plan 8 of 1953 with respect to providing to the United States Information Agency official United States positions and policy on disarmament matters for dissemination abroad.

(d) the Director is authorized (1) to formulate plans and make preparations for the establishment, operation, and funding of inspection and control systems which may become part of the United States disarmament activities, and (2) as authorized by law, to put into effect, direct, or otherwise assume United States responsibility for such systems.

Coordination

SEC. 34. The President is authorized to establish procedures to (1) assure cooperation, consultation, and a continuing exchange of information between the Agency and the Department of Defense, the Atomic Energy Commission, the National Aeronautics and Space Administration and other affected Government agencies, in all significant aspects of United States disarmament policy and related matters, including current and prospective policies, plans, and programs, and (2) resolve differences of opinion between the Department of State and such other agencies which cannot be resolved through consultation.

TITLE IV—GENERAL PROVISIONS

General authority

SEC. 41. In the performance of its functions, the Agency is authorized to—

(a) utilize or employ the services, personnel, equipment, or facilities of any other Government agency, with the consent of the agency concerned, to perform such functions on behalf of the Agency as may appear desirable. Any Government agency is authorized, notwithstanding any other provision of law, to transfer to or to receive from the Director, without reimbursement, supplies and equipment other than administrative supplies or equipment. Transfer or receipt of excess property shall be in accordance with the provisions of the Federal Property and Administrative Services Act of 1949, as amended;

(b) appoint officers and employees, including attorneys, for the Agency in accordance with the civil service laws and fix their compensation in accordance with the Classification Act of 1949, as amended, except that, to the extent that the Director deems such action necessary to the discharge of his responsibilities, not to exceed forty-five scientific, technical, administrative, and professional personnel may be appointed, compensated, and removed without regard to the provisions of any other law, of whom not to exceed twenty may be compensated at annual rates not more than $500 in excess of the compensation now or hereafter fixed by law for grade 18 of the General Schedule, and of whom not to exceed two may be compensated at annual rates not more than $1,500 in excess of that now or hereafter fixed by law for grade 18;

(c) enter into agreements with other Government agencies, including the military departments through the Secretary of Defense, under which officers or employees of such agencies may be detailed to the Agency for the performance of service pursuant to this Act without prejudice to the status or advancement of such officers or employees within their own agencies;

(d) procure services of experts and consultants or organizations thereof, including stenographic reporting services, as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), at rates not to exceed $100 per diem for individuals, and to pay in connection therewith travel expenses of individuals, including transportation and per diem in lieu of subsistence while away from their homes or regular places of business, as authorized by section 5 of said Act, as amended (5 U.S.C. 73b–2): *Provided*, That no such individual shall be employed for more than one hundred days in any fiscal year unless the President certifies that employment of such individual in excess of such number of days is necessary in the national interest: *And provided further*, That such contracts may be renewed annually;

(e) employ individuals of outstanding ability without compensation in accordance with the provisions of section 710(b) of the Defense Production Act of 1950, as amended (50 U.S.C. App. 2160), and regulations issued thereunder;

(f) establish advisory boards to advise with and make recommendations to the Agency on United States disarmament policy and activities. The members of such boards may receive the compensation and reimbursement for expenses specified for consultants by section 41(d) of this Act;

Contracts or expenditures

SEC. 42. The President may, in advance, exempt actions of the Director from the provisions of law relating to contracts or expenditures of Government funds whenever he determines that such action is essential in

the interest of United States disarmament and security policy.

Conflict of interest and dual compensation laws

SEC. 43. The members of the General Advisory Committee created by section 26 of this Act, and the members of the advisory boards, the consultants, and the individuals of outstanding ability employed without compensation, all of which are provided in section 41 of this Act, may serve as such without regard to the provisions of section 281, 283, 284, or 1914 of title 18 of the United States Code, or of section 190 of the Revised Statutes (5 U.S.C. 99), or of any other Federal law imposing restrictions, requirements, or penalties in relation to the employment of individuals, the performance of services, or the payment or receipt of compensation in connection with any claim, proceeding, or matter involving the United States Government, except insofar as such provisions of law may prohibit any such individual from receiving compensation from a source other than a nonprofit educational institution in respect of any particular matter in which the Agency is directly interested. Nor shall such service be considered as employment or holding of office or position bringing such individual within the provisions of section 13 of the Civil Service Retirement Act (5 U.S.C. 2263), section 212 of the Act of June 30, 1932, as amended (5 U.S.C. 59a), or any other Federal law limiting the reemployment of retired officers or employees or governing the simultaneous receipt of compensation and retired pay or annuities.

Security requirements

SEC. 44. (a) The Agency shall establish such security and loyalty requirements, restrictions, and safeguards as it deems necessary in the interest of the national security and to carry out the provisions of this Act. The Agency shall arrange with the Federal Bureau of Investigation for the conduct of full-field background security and loyalty investigation of all the Agency's officers, employees, consultants, persons detailed from other Government agencies, members of its General Advisory Committee, advisory boards, contractors and subcontractors, and their officers and employees, actual or prospective. In the event the investigation discloses information indicating that the person investigated may be or may become a security risk, or may be of doubtful loyalty, the report of the investigation shall be turned over to the Office of Security of the Department of State for final determination. No person shall be permitted to enter on duty as such an officer, employee, consultant, or member of advisory committee or board, or pursuant to any such detail, and no contractor or subcontractor, or officer or employee thereof shall be permitted to perform any services under the contract or to have access to any classified information relating thereto, until he shall have been investigated in accordance with this subsection and the report of such investigation made to the Agency, and it shall have been determined that such person is not a security risk or of doubtful loyalty. Standards applicable with respect to the security clearance of persons within any category referred to in this subsection shall not be less stringent, and the investigation of such persons for such purposes shall not be less intensive or complete, than in the case of such clearance of persons in a corresponding category under the security procedures of the Government agency or agencies having the highest security restrictions with respect to persons in such category.

(b) The Atomic Energy Commission may authorize any of its employees, or employees of any contractor, prospective contractor, licensee, or prospective licensee of the Atomic Energy Commission or any other person authorized to have access to Restricted Data by the Atomic Energy Commission under section 2165 of title 42, to permit the Director or any officer, employee, consultant, person detailed from other Government agencies, member of the General Advisory Committee or of an advisory board, contractor, subcontractor, prospective contractor, or prospective subcontractor, or officer or employee of such contractor, subcontractor, prospective contractor, or prospective subcontractor, to have access to Restricted Data which is required in the performance of his duties and so certified by the Director, but only if (1) the Atomic Energy Commission has determined in accordance with the established personnel security procedures and standards of the Commission, that permitting such individual to have access to such Restricted Data will not endanger the common defense and security, and (2) the Atomic Energy Commission finds that the established personnel and other security procedures and standards of the Agency are adequate and in reasonable conformity to the standards established by the Atomic Energy Commission under section 2165 of title 42, including those for interim clearance in subsection (b) thereof. Any individual granted access to such Restricted Data pursuant to this subsection may exchange such data with any individual who A is an officer or employee of the Department of Defense, or any department or agency thereof, or a member of the Armed Forces, or an officer or employee of the National Aeronautics and Space Administration, or a contractor or subcontractor of any such department, agency, or armed force, or an officer or employee of any such contractor or subcontractor, and B has been authorized to have access to Restricted Data under the provisions of section 2163 or 2455 of title 42.

Transfer of functions to Agency

SEC. 45. (a) The United States Disarmament Administration, together with its records, property, personnel, and funds, is hereby transferred to the Agency. The appropriations and unexpended balances of appropriations transferred pursuant to this subsection shall be available for expenditure for any and all objects of expenditure authorized by this Act, without regard to the requirements of apportionment under section 665 of title 31.

(b) The President, by Executive order, may transfer to the Director any activities or facilities of any Government agency which relate primarily to disarmament. In connection with any such transfer, the President may under this section or other applicable authority, provide for appropriate transfers of records, property, civilian personnel, and funds. No transfer shall be made under this subsection until (1) a full and complete report concerning the nature and effect of such proposed transfer has been transmitted by the President to the Congress, and (2) the first period of sixty calendar days of regular session of the Congress following the date of receipt of such report by the Congress has expired without adoption by either House of the Congress of a resolution stating that such House does not favor such transfer.

Use of funds

SEC. 46. Appropriations made for the purposes of this Act, and transfers of funds to the Agency by other Government agencies for such purposes, shall be available to the Agency to exercise any authority granted it by this Act, and shall also be available for the following uses to carry out the purposes of this Act including, without limitation, expenses of printing and binding without regard to the provisions of section 11 of the Act of March 1, 1919 (44 U.S.C. 111); purchase or hire of one passenger motor vehicle for the official use of the Director without regard to the limitations contained in section 78(c) of title 5 of the United States Code; entertainment and official courtesies to the extent authorized by appropriation; expenditures for training and study; expenditures in connection with participation in international conferences for the purposes of this Act; and expenses in connection with travel of personnel outside the United States, including transportation expenses of dependents, household goods, and personal effects.

Appropriations

SEC. 47. (a) There are hereby authorized to be appropriated not to exceed $10,000,000, to remain available until expended, to carry out the purposes of this Act.

(b) Funds appropriated pursuant to this section may be allocated or transferred to any agency for carrying out the purposes of this Act. Such funds shall be available for obligation and expenditure in accordance with authority granted in this Act, or under authority governing the activities of the agencies to which such funds are allocated or transferred.

Report to Congress

SEC. 48. The Agency shall submit to the Secretary of State, for transmittal to the Congress, not later than January 31 of each year, a report concerning activities of the Agency. The Agency shall include in this report, and shall at such other times as the Secretary of State deems desirable submit to the Congress, recommendations for additional legislation deemed necessary or advisable.

Mr. HUMPHREY. Mr. President, I am very grateful to the Senator from Alabama [Mr. SPARKMAN] for his presentation in regard to the bill and for his great and splendid work in the Foreign Relations Committee, as a result of which the bill has now been brought to the floor of the Senate.

As has been recorded, the bill was unanimously ordered reported by the Foreign Relations Committee, after extensive hearings, after long deliberation in executive session. The original bill was amended and modified in committee in order to meet some of the criticisms and suggestions which resulted from the testimony and the observations of members of the Foreign Relations Committee and members of the Armed Services Committee. The Senator from Washington [Mr. JACKSON] particularly offered constructive comments, and several of his suggestions were embodied in the bill. The Senator from Georgia [Mr. RUSSELL] offered very constructive comments relating to the organizational structure of the Disarmament Agency, and those constructive suggestions were embodied in the bill.

Mr. President, the proposed U.S. Disarmament Agency for World Peace and Security, as provided by Senate bill 2180, under the direction and supervision of the Secretary of State, prepare for international negotiations and conferences dealing with disarmament and arms-control matters. The Director of the Agency would be the Secretary of State's and the President's principal adviser on disarmament matters. He would have authority, under the guidance of the Secretary of State, to prepare recommendations concerning U.S. disarmament policy, to handle disarmament negotiations, to conduct re-

search and studies affecting disarmament, and to formulate plans for the installation and operation of any control system which may be established as a result of U.S. disarmament activities.

Mr. President, President Kennedy has requested that the bill be passed by Congress at this session.

The Senate Foreign Relations Committee held hearings on the bill on August 14, 15, and 16, and, on September 6, unanimously—by a vote of 17 to 0—ordered the bill reported to the Senate, and urged its prompt passage by the Senate.

Senate bill 2180 has the firm backing of the chief advisers of the President in the field of national security. It has the backing of the Secretary of State, Dean Rusk; the President's disarmament adviser, John J. McCloy; the Secretary of defense, represented by Roswell Gilpatric, Deputy Secretary of Defense; the Atomic Energy Commission, represented before our committee by Leland Haworth, one of its distinguished Commissioners; the Chairman of the Joint Chiefs of Staff, Gen. Lyman L. Lemnitzer; and Adlai Stevenson, U.S. Representative to the United Nations.

In addition, the proposal to create a U.S. Disarmament Agency for World Peace and Security has the approval of former President Dwight D. Eisenhower and the emphatic and enthusiastic endorsement of key national security advisers who served under him. These advisers include President Eisenhower's Secretary of State, Christian Herter; his Secretary of Defense, Thomas Gates; his Ambassador to the United Nations, Henry Cabot Lodge; his other Ambassador to the United Nations and chief negotiator at the test ban conference, James Wadsworth; former Supreme Commander of NATO, Gen. Alfred Gruenther; also Gen. Lucius Clay, presently our special Ambassador in Berlin; our disarmament negotiator during 1960, Frederick Eaton; the former head of the U.S. Information Agency, Arthur Larson; and Herbert York, former Director of Defense Research and Engineering. Also, the former Secretary of Defense, Robert Lovett; and the former Assistant Secretary of the Air Force for Research and Development, Trevor Gardner, testified in support of S. 2180. All of these distinguished gentlemen and dedicated public servants testified before the committee and asked for Senate passage of S. 2180. All of them, without exception, emphasized the timeliness of this measure and the urgent necessity for its enactment during the 1st session of the 87th Congress. All these distinguished gentlemen and dedicated public servants testified before the Senate Foreign Relations Committee, and one of them testified before the House committee; and all of them requested that the Senate pass Senate bill 2180.

Mr. President, when President Kennedy sent to the Congress his message relating to this measure, he asked for prompt action. I should like to call attention to several paragraphs of his letter of transmittal of June 29. The President's letter reads, in part, as follows:

JUNE 29, 1961.

HON. LYNDON B. JOHNSON,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: I am transmitting herewith for consideration by the Congress a draft of legislation to carry out the recommendation contained in my May 25 message for the establishment of a strengthened and enlarged Disarmament Agency to make an intensified effort to develop acceptable political and technical alternatives to the present arms race.

Today, ability of man to master his environment threatens to outpace his ability to control himself. The world is more and more interdependent, and the people of the earth can now look beyond this planet to a new age of discovery, but they have not yet been able to banish the primitive threat of war. The ingenuity that has made the weapons of war vastly more destructive should be applied to the development of a system of control of these weapons.

Then the President wrote:

But peace cannot be brought about by concentrating solely on measures to control and eliminate weapons. It must also encompass measures to sustain and strengthen international institutions and the rule of law. A disarmament program must take into account the national security, our foreign policy, the relationships of this country to international peacekeeping agencies, including the United Nations, and our domestic, economic, and other policies. It should drive toward the creation of a peaceful world society in which disarmament, except for the forces needed to apply international sanctions, is the accepted condition of international life.

In another paragraph in the letter, the President wrote:

For the past 5 months, Mr. John J. McCloy, my adviser on disarmament matters, has been conducting, at my request, an extensive study of the governmental effort and organization necessary to give effect to our national purpose in this field.

Then the President listed the many officers of this Government who have been consulted; and thereafter the President wrote:

Following Mr. McCloy's recommendations, I am therefore proposing that a new U.S. Disarmament Agency for World Peace and Security be established. Enactment of the proposed legislation will permit this Agency to deal broadly with the whole range of disarmament matters, including research, policies, and programs.

Mr. President, the President of the United States, whoever he may be at any given time, has heavy burdens. When two Presidents—former President Dwight Eisenhower, who served the people of the United States both as General of the Armies and as Commander in Chief, and President Kennedy—both call upon the Members of Congress to pass legislation of this type, I think that is rather compelling evidence.

Furthermore, it is interesting to observe that in the body of testimony in regard to this particular proposal, there is not one word in opposition to the bill from any responsible public official who has been entrusted with the defense or the foreign policy of the United States or the negotiations of the United States with the Soviet Union.

Mr. BUSH. Mr. President, will the Senator from Minnesota yield for a question?

The PRESIDING OFFICER (Mr. HICKEY in the chair). Does the Senator from Minnesota yield to the Senator from Connecticut?

Mr. HUMPHREY. I yield.

Mr. BUSH. What opposition was there?

Mr. HUMPHREY. There was opposition from some private citizens.

Mr. BUSH. Generally, upon what did they base their opposition?

Mr. HUMPHREY. Primarily on the statement that we cannot trust the Russians and that therefore this is no time to be talking about disarmament measures.

But the fact is that we are literally compelled to talk with the Russians. At this very hour Mr. McCloy—who, by the way, has a record of service to his country which makes him an outstanding patriot—sits with Zorin, of the Soviet Union, and discusses disarmament. Will Mr. McCloy make any progress? We pray that he will. But certainly we can trust Mr. McCloy, because he is a wise and a prudent man.

Mr. BUSH. Mr. President, will the Senator from Minnesota yield again to me?

Mr. HUMPHREY. I yield.

Mr. BUSH. I could not agree more with the Senator from Minnesota. I have known Jack McCloy for, I suppose, 30 years; and I have watched with the greatest admiration and approval his record of public service. So I would not want anyone to be under any misapprehension about my feeling about our former Assistant Secretary of War and Ambassador. He is one of the greatest public servants our Nation has ever had.

I agree with the Senator that his sponsorship and leadership in connection with this bill are among the most persuasive elements connected with it.

Mr. HUMPHREY. I thank the Senator. Mr. McCloy has been so deeply interested in this matter that he has gone far beyond what might be expected from a Government official. I suppose the Senator knows he is making a great personal sacrifice. He just got started in business when the President asked him to come to work for the Government for practically nothing. He has not only spent months studying the matter, but has gone to Senator after Senator, and Representative after Representative, and has said, "I need your help. If I am going to have this responsibility, I need your help."

I have not had the privilege of knowing Mr. McCloy as a close personal friend, but my admiration for him is not new. I remember when he was High Commissioner in Germany and his great record as Assistant Secretary of War. When I first met him in connection with this particular project he said, "Senator HUMPHREY, I have been up here all my life asking people to arm. Now I ask you to help me with the machinery, the tools, the instruments, so we can control these armaments before they destroy

us." He made a most persuasive argument in connection with this project as it relates to our national security.

Mr. BUSH. Since the Senator is speaking of his accomplishments, I may add that Mr. McCloy was President of the World Bank, which was no insignificant job. He put that Bank on its feet and made it a very significant organization in the field of international finance.

Mr. HUMPHREY. I thank the Senator very much. I mention these witnesses, just as the Senator from Alabama [Mr. SPARKMAN] did. I wish Senators could have heard Fred Eaton, a very distinguished citizen. President Eisenhower had appointed him as a member of the 10-member disarmament conference. He came into the room without a prepared statement. He just happened to be in the room. He was not scheduled as a witness. He merely asked to be heard. He said, "Look, we have never been prepared. It is nobody's fault. We have not had time to put an organization together. We made a beginning when President Eisenhower suggested the disarmament conference, under Secretary of State Christian Herter." Mr. Eaton went on to explain how important it was to have a director of such an agency with responsibilities for an independent study, research, and advice. It was moving testimony.

Mr. BUSH. The Senator will recall that Mr. Eaton, with rank of Ambassador, represented us in connection with the disarmament conferences in Geneva.

Mr. HUMPHREY. Very well.

Mr. BUSH. I recall that when Christian Herter was Secretary of State, Douglas Dillon was Under Secretary. In fact, it was he who got Fred Eaton into this.

Mr. HUMPHREY. I agree.

Mr. BUSH. His testimony was one of the most persuasive and qualified bits of testimony the Senator had before his committee.

Mr. HUMPHREY. I thank the Senator.

Mr. CASE of South Dakota. Mr. President, will the Senator yeld?

Mr. HUMPHREY. I yield.

Mr. CASE of South Dakota. The quality and character of the witnesses who testified on the bill before the Committee on Foreign Relations were most persuasive in connection with support for the bill. When reference is made to the work of John McCloy, we ought not to forget that, as High Commissioner to Germany in the postwar period, he and Gen. Lucius Clay—first it was General Clay and then Mr. McCloy—probably developed the most practicable grassroots grasp of the German problem.

It is impossible to suppose that those men, who served their country with distinction and honor in these crucial, formative years, would support the formation of an agency of this character unless, on the basis of their own experience, they regarded it as in the best interests of the United States and the security of the United States.

Mr. HUMPHREY. That surely was my view.

Mr. CASE of South Dakota. There is one thought I wanted to bring up at this time, and I may develop it a little later during the consideration of the bill. It is whether or not the concept of the agency would be better communicated to the public and to the world if, instead of using the name "U.S. Disarmament Agency for World Peace and Security," we were to have it designated as "U.S. Advisory Agency on Arms Control, Peace, and Security."

I merely mention that at this time. I would like to have the Senator give it some thought, for the reason that today the news tickers are filled with dispatches about the speech which Mr. Khrushchev made last night, in which he talked about the subject of disarmament and the matter of control. The Senator has made reference to the fact that Mr. McCloy is meeting with Mr. Zorin at this time. It seems to me that anyone who really looks at the world picture recognizes that any foreign policy question today brings up the question of arms control and disarmament.

My basic support for the bill stems from the fact that I do not see how the President can meet his responsibilities unless he is prepared to face questions which arise concerning disarmament and arms control. How can one make the decisions that he must make today unless he can effectively appraise proposals either for disarmament or arms control? It seems to me specific knowledge, and not merely attitudes, are necessary, if one is to deal with specific proposals on the question of arms limitation.

Mr. HUMPHREY. I thank the Senator for the statement, and for his obvious knowledge of this complicated question. It is true that merely to have attitudes or opinions is not enough. In fact, it might be injurious.

Mr. CASE of South Dakota. It might be hazardous.

Mr. HUMPHREY. It might be hazardous. What we need is the technical, factual information that is required for sensible judgments that relate to the complicated question of arms control and disarmament.

(At this point Mrs. NEUBERGER took the chair as Presiding Officer.)

Mr. MANSFIELD. Madam President, will the Senator from Minnesota yield?

Mr. HUMPHREY. I yield.

(At this point Mr. MANSFIELD addressed the Senate, and the ensuing colloquy appears elsewhere under its appropriate headline.)

Mr. HUMPHREY. Madam President, I was citing the quality of the witnesses who had testified in behalf of the bill before us. The general comment of my colleagues was to the effect that the quality of the witnesses and their reputations and their background and their experience surely did commend the bill because of their support of it.

Finally, a number of our very prominent and respected national organizations submitted testimony calling on the United States to establish this proposed U.S. Disarmament Agency, including the Catholic Association for International Peace, National Council of Churches of Christ, the Federation of American Scientists to name only a few.

There is a greater need and urgency today than ever before to create the type of agency which is embodied in S. 2180. The clouds of war hang heavy over all of mankind. Each day brings new threats and steps by the Soviets which could result in war. We are required to take countermeasures to protect the cause and rights of free people everywhere. The recent moves by the President and the Congress to strengthen our defenses, to reassure our allies that our obligations to them will be met, and to meet Soviet bellicosity with calm but firm resolve, should tell the world, and particularly the Soviet Union, in no uncertain terms that we will not be appeasers. I would hope that these steps will convince Premier Khrushchev and other leaders of the Soviet Union and its allies that war or the threat of war is no solution to any nation's problem or aspirations. We shall not shirk in our duty to prevent aggressors from trampling over the territory and the rights of countries which are weaker than they.

It is my belief, which I think is shared by everyone in this Chamber, that the United States must remain strong at all times in order to deter aggression.

At the same time I believe, along with the great witnesses who testified before our committee, and those who sent us so many communications, that national security requires not only preparedness for defense, but also preparedness in the field of negotiation and in the field of diplomacy. A continued race between ourselves and the Soviet Union to build and strengthen armaments can be only a temporary and highly dangerous response to the very fundamental differences which exist between our respective ways of life. We must work for conditions of peace and freedom and be prepared for any opportunity which may relieve the world of the terrible threat of war and the enormous burden of armaments which the people of the major powers particularly must bear.

Mr. SALTONSTALL. Madam President, will the Senator yield?

Mr. HUMPHREY. I am happy to yield.

Mr. SALTONSTALL. As a member of the Committee on Armed Services I should like to ask the distinguished Senator in charge of the bill several questions. On page 2 of the bill the purpose of it is stated, and reference is made to:

> The formulation and implementation of the U.S. disarmament policy in a manner which will promote the national security requires a central organization.

Mr. HUMPHREY. Yes.

Mr. SALTONSTALL. Mr. Nitze is in the Department of Defense. He has four agencies or groups under him. It was my understanding that one of these agencies was working more or less on this problem.

Mr. HUMPHREY. Yes. The work of Mr. Nitze, as well as the work of the State Department, would be coordinated by this particular Agency that is sought to be set up. It would not be obliterated; it would be coordinated. That is what every witness said. I wish every Senator could have heard these men testify. They have all been responsible for our

negotiations. Henry Cabot Lodge, Ambassador Wadsworth, Fred Eaton, General Lemnitzer, Thomas Gates, former Secretary of Defense—every one of them said that the glaring weakness today in U.S. foreign policy is the confusion in its methods and in its means and in its machinery in arriving at any disarmament policy. Gen. Lucius Clay in his statement said:

I do not believe, however, that this highly important subject is one which should be dealt with in a bureau of a Department of the Government, subjecting it to all layers of authority which that involves.

Though the foreign relations of the country are involved, so is defense policy. I would, therefore, recommend that this Agency should not become a part of the Defense Department, even though close cooperation and consultation with the defense agencies of the Government is essential.

Then he goes on to describe the importance of this point.

Mr. SALTONSTALL. It is very difficult to argue against Mr. McCloy and Mr. Lodge and all the other witnesses the Senator has mentioned. I have the same regard for Mr. McCloy, whom I have known for many years, and the other persons who have been mentioned. What I am getting at is that on page 3 there appears the language:

The preparation for and management of the U.S. participation in international negotiations in the disarmament field.

Mr. Nitze is in the Defense Department, which is considering the subject of disarmament. Then, too, the State Department is considering the subject. Now we would create this new Agency in the State Department and we would give it the management of U.S. participation in international negotiations in the disarmament field.

Where does that leave the armed services and Mr. McNamara and his Defense Department?

Mr. HUMPHREY. Section 21 at page 5 states that this Agency is established within the Department of State:

The Agency shall be under the direction of the Under Secretary of State for Disarmament, who shall serve as the principal adviser to the Secretary of State and the President on disarmament matters. In carrying out his duties under this Act the Under Secretary of State for Disarmament shall, under the supervision and direction of the Secretary of State, have primary responsibility within the Government for disarmament matters.

Then we go a little further in the bill, to section 33, at page 13:

Under the supervision and direction of the Secretary of State—

(a) the Director shall prepare for the President, the Secretary of State, and the heads of such other Government agencies as the President may determine, recommendations concerning U.S. disarmament policy.

Then again, under the direction and supervision of the Secretary of State—

(b) the Director, for the purpose of conducting negotiations concerning disarmament or for the purpose of exercising any other authority given him by this Act, may (1) consult and communicate with or direct the consultation and communication with representatives of other nations or of international organizations and (2) communicate in the name of the Secretary with diplomatic representatives of the United States in this country and abroad.

What this means, coming back to page 3, where we say "the preparation for and management of United States participation in international negotiations in the disarmament field," is that under the direction of the Secretary of State this agency shall prepare the work that is required and make the preparations that are required for negotiations, and that when negotiations take place, this professional, technical agency will be in charge under the Secretary of State's direction and supervision for negotiations. That is what Mr. McCloy is doing. That is what Arthur Dean is doing. Mr. Dean has been in Geneva under the direction of the Secretary of State. Mr. McCloy is the President's chief adviser on disarmament matters, and today he is conducting negotiations at the United Nations under the direction of the Secretary of State. We are asking to bring some order out of this confusion.

Mr. SALTONSTALL. I am heartily in favor of that.

Mr. HUMPHREY. Yes; I know that. The Senator merely wanted some clarification.

Mr. SALTONSTALL. I was on the Senator's original committee dealing with this subject. I do question, however, what the Senator has just said, that the Secretary of State shall conduct negotiations. That is what we expect. He shall conduct negotiations, presumably with the advice of the Defense Department.

Mr. HUMPHREY. Yes.

Mr. SALTONSTALL. And advise the Secretary of Defense, who has Mr. Nitze and his group.

Mr. HUMPHREY. Yes.

Mr. SALTONSTALL. Is it necessary to use the word "management"? Why can it not be limited to preparation for U.S. participation? If we put in the word "management," we are taking it away, to a certain extent, from the Secretary of State. I would rather leave it with the Secretary of State, and omit the word "management."

Mr. HUMPHREY. This matter was given considerable thought in committee. Originally the word was "direction." Our experience is very clear that we need specialists in this matter, even though the Secretary of State may go to a meeting. Even though he may attend it, sometimes he cannot stay for the weeks and months required in these negotiations. So we want the Director of this agency to be responsible for the management of our negotiations under the supervision and direction of the Secretary of State.

We wished to make it quite clear that we are not going to reach out willy-nilly and pick up anybody, because this is a highly complicated business. This section was given considerable thought. I was at first of the opinion that possible preparation was what was needed. We discussed that question with Mr. McCloy. He said, "No, it takes more than simple preparation, because you can have persons who are GS–10's or GS–12's make the preparation for it, but someone must manage it, someone who will be responsible for setting up the conference, responsible for the agenda, someone who will be there day in and day out."

For example, Arthur Dean is our chief negotiator, so far as the Geneva Conference is concerned. His deputy at Geneva is Charles Stell. Mr. Dean is responsible for the management of the negotiations.

Mr. SALTONSTALL. I would be very much more relieved if there were language similar to this—perhaps it can be improved upon—"preparation for and participation in international negotiations on behalf of the United States in the disarmament field." The Senator from Minnesota is an able, thoughtful, well prepared gentleman. Perhaps he could devise language along that line. We cannot always have a man like Mr. McCloy, whom we all respect and in whom we all have much confidence. Suppose a new man took the position. What we seek to do is to make laws. The word "management" might be misinterpreted as meaning that the authority will be taken away from the Secretary of State or from the Secretary of Defense. The Senator from Minnesota and I agree that we wish to leave the authority in the hands of the Secretary of State and the Secretary of Defense.

Mr. HUMPHREY. I wish to reassure the Senator from Massachusetts on this point. It is manifestly clear in the bill that the Agency will be under the direction and supervision of the Secretary of State. We did not put that language into every paragraph simply because it would have made the bill rather clumsy to have kept repeating it. So in the report we spelled out that every function which the Director or the Agency undertakes will fall under the general supervision and direction of the Secretary of State. This was the big argument in the committee.

The original bill contained language to the effect that the Director had responsibilities under the supervision of the Secretary of State and under the Secretary of Defense. Under the circumstances, he could have gone directly to the President. It was on this point that the Senator from Georgia [Mr. RUSSELL], the Senator from Washington [Mr. JACKSON], the Senator from Missouri [Mr. SYMINGTON], and other Senators said that that would be bad management; they did not favor such a proposal. So the bill was changed to make it positively clear that wherever there was any responsibility placed upon the Agency or its Director, it falls back immediately upon the Director who is, first of all, an Under Secretary of State. He and his Agency are within the State Department.

Second, he is under the direction of the Secretary of State. But the bill also provides that he must coordinate his activities under the provisions of section 34 of the bill, with other agencies of the Government. In the preparation of the original text of the bill, the executive branch did not spell that out. The senior Senator from Minnesota, together with other Senators, said he did not want any doubt to arise, so the committee

spelled out exactly what the responsibilities of the Director would be. So section 34 of the bill, at page 14, line 21 provides:

The President is authorized to establish procedures to (1) assure cooperation, consultation, and a continuing exchange of information between the Agency and the Department of Defense, the Atomic Energy Commission, the National Aeronautics and Space Administration, and other affected Government agencies, in all significant aspects of U.S. disarmament policy and related matters, including current and prospective policies, plans, and programs.

Mr. SALTONSTALL. So the Department of Defense, in which I am particularly interested, simply becomes a consultant agency for the purpose of the exchange of information on all significant aspects, but the Secretary of Defense would have no responsibility beyond being a consultant?

Mr. HUMPHREY. Oh, no; he will continue his activities, but he also will work with the Director of the Disarmament Agency and make certain that the programs which are interdependent among the Department of Defense, the Atomic Energy Commission, and the National Aeronautics and Space Administration fit into the general framework of what the President of the United States desires from an institution to help formulate disarmament policies.

For example, Paul Nitze, in his operation, will still continue to function, but he will not continue to function in a vacuum. His Agency will continue as a part of the total policy and a part of the framework in which the Atomic Energy Commission, the National Aeronautics and Space Administration, possibly the Bureau of Standards, if research projects are considered, and the Department of Defense would all find their way into the general pattern. At the same time, it is necessary to have one person do the general work of coordinating the entire program. It was on that basis that many witnesses testified that the Director should not be in the State Department alone; he should be there for negotiating purposes; but in order to have coordinating authority, he ought to report directly to the President. This proposal promoted great discussion and genuine differences of opinion. So the committee resolved the problem. We resolved it in consultation with officers of the Government. Each one of the officers of the Government feels he can work with the Under Secretary of State who will have the prime responsibility for advising the President and the Secretary of State on questions relating to disarmament policy. He will be able to draw from the other agencies such information as he needs and work with them, principally in the field of research, and have contact with them, so that all the activities can be drawn up for recommendation to the President.

Mr. SALTONSTALL. The Secretary of State shall be responsible for the Director and his Agency?

Mr. HUMPHREY. That is correct.

Mr. SALTONSTALL. But the ultimate decision will rest with the Secretary of State?

Mr. HUMPHREY. And with the President.

Mr. SALTONSTALL. Yes.

Mr. HUMPHREY. The Senator is correct.

Mr. SALTONSTALL. I wish to ask another question, which relates to section 32, page 11, the subject of "Patents." I have some ideas as to how that section got into the bill.

Mr. HUMPHREY. Yes; the Senator from Louisiana [Mr. LONG] was the sponsor.

Mr. SALTONSTALL. The Committee on Armed Services had problems in that connection in the setting up of the National Aeronautics and Space Administration. Why should it be necessary to include a patents section in the bill? I say that not in criticism of the Senator from Louisiana, because I know he is very much interested in the subject of patents. However, there is the problem of interpreting patent law and of making the present law effective, when so large an amount of Government money goes into the field of new patents. Why should there be a section in this bill?

Mr. HUMPHREY. I will give the Senator a frank answer. It is because the committee wanted it.

Mr. SALTONSTALL. Did the Senator from Minnesota want it?

Mr. HUMPHREY. The Senator from Minnesota went along with it. The executive branch did not recommend it, but the committee unanimously voted for it. The Senator from Louisiana is a keen student of this subject.

The committee considered an alternative proposal, but the alternative proposal was rejected. This proposal was accepted. By the way, it contains the same language as is in the act which created NASA.

Mr. SALTONSTALL. The same language as is in NASA?

Mr. HUMPHREY. Yes.

Mr. SALTONSTALL. That gives me encouragement, because I helped to draft the act creating NASA.

Mr. HUMPHREY. The committee rejected other language which might have been far more rigid. There are one or two other acts creating agencies in which that language is included.

Mr. SALTONSTALL. I am not so familiar with patent law as to consider myself an expert, but I know it is a difficult, complicated problem.

Mr. HUMPHREY. I shall check the report. One thing which the Senator from Minnesota does not wish to do is to reassure any Senator on a subject, when that Senator places his trust in me, if I am not positively certain of the accuracy of my statement. However, the committee had such a long discussion of the question that I believe what I have just stated relating to NASA and to this agency concerning patents is correct.

Let me read from the report:

Section 32, which deals with patents, is based on the language recently adopted by the Senate in the bill to extend the saline water program. It provides that no appropriated funds may be expended under the bill for any technological research or development activity unless such expenditure is conditioned upon provisions effective to insure that all information, uses, products, processes, patents, and other developments resulting from that activity (with such exceptions and limitations as the Director may determine to be necessary in the interest of national defense) will be made freely and fully available to the general public. Nothing, however, in section 32 is to be construed as depriving the owner of any background patent relating to such activity or right which he may have under that patent.

Madam President, this language is identical with that contained in the saline water program bill and is similar to the language in the act creating NASA, because we had that language read to us in the committee. It was on that basis that the Senator from Iowa and other Senators agreed to this particular language.

Mr. SALTONSTALL. I thank the Senator from Minnesota for his answer. I still believe that the subject of patents perhaps would be better left out of this bill, because I cannot understand why the subject of patents would relate to disarmament.

Mr. HUMPHREY. The Senator from Massachusetts knows that the Senator from Louisiana [Mr. LONG] is very persuasive.

Mr. SALTONSTALL. The Senator from Massachusetts knows that.

Mr. HUMPHREY. I thank the Senator from Massachusetts for the question he has asked and for the part he has taken in the discussion.

Mr. ERVIN. Madam President, will the Senator from Minnesota yield?

Mr. HUMPHREY. I yield.

Mr. ERVIN. I had grave misgivings about some of the phraseology in the original bill. According to my interpretation, it was uncertain whether there was a division of power in this field.

In other words, I was afraid to have us get into a situation similar to that under the former administration, when the Secretary of State and Governor Stassen became involved in a situation in which there was much confusion as to where authority in this field lay.

But I wish to commend the Senator from Minnesota and the other members of the Foreign Relations Committee for the excellent job they did, by means of the committee amendments, to eliminate such uncertainty and to make it apparent that this bill harmonizes with the constitutional provision which entrusts the conduct of all our foreign policy to the President, whose first arm in carrying out that policy is the Secretary of State. I am very much pleased with the amendment which makes this Agency a part of the Department of State and makes very clear where the ultimate authority really lies.

The Senator from Minnesota and the other members of the committee are certainly to be congratulated on a job well done in clarifying the provisions of the original bill.

Mr. HUMPHREY. I thank the Senator from North Carolina.

Madam President, I ask unanimous consent that an excerpt from page 4 of the report, relating to sections 21 through 26, which deal with the structure to which the Senator has referred, be printed at this point in the RECORD.

There being no objection, the excerpt from the report (No. 882) was ordered to be printed in the RECORD, as follows:

Organization (secs. 21 through 26): Section 21 establishes within the Department of State the Disarmament Agency for World Peace and Security. Section 22 provides that the Agency shall be headed by the Under Secretary of State for Disarmament, appointed by the President, subject to confirmation by the Senate, whose compensation shall be $22,500 a year. The Under Secretary, referred to as the Director throughout the bill, is to be the principal adviser to the Secretary of State and the President on disarmament matters. Section 23 provides for a Deputy Director, also appointed by the President, subject to Senate confirmation, whose compensation is set at $21,500 a year. There are also provided, in section 24, four Assistant Directors to be appointed by the President, by and with the advice and consent of the Senate, whose compensation will be $20,000 a year. The compensation provided in sections 22, 23, and 24 corresponds to that of the present Under Secretary of State, the Deputy Under Secretaries of State, and the Assistant Secretaries of State, respectively. The salary of the Director is the same as that of the Chairman of the Atomic Energy Commission, the Director of the National Aeronautics and pace Administration, and the Deputy Secretary of Defense—officials with whom it is anticipated that the Director of the Disarmament Agency will have frequent contacts.

Section 25 provides that under the supervision and direction of the Secretary of State, the Director may establish such bureaus, offices and divisions as he may deem necessary, including, among others, an Office of Public Affairs and an Office of the General Counsel.

Creation of a General Advisory Committee is authorized by section 26. Fifteen members will be appointed by the President, subject to the advice and consent of the Senate. Its function is to advise the Director on disarmament policy and activities. The members of the General Advisory Committee are authorized to receive $100 per diem and travel expenses and will be subject to the security requirements of section 44.

Mr. HUMPHREY. Madam President, once it was said that arms themselves were no cause of war, not even a cause of rising tension among nations. The arms were not considered a cause, but merely a symptom of the basic disputes which prevented nations from living together in relative calm and peace. But the splitting of the atom, the penetration into outer space, and the other recent discoveries of science and technology have shattered this principle, which heretofore had been accepted as a governing factor in international relations. The weapons now being devised, built, and stored throughout many parts of the world have such destructive power, and in a sense are so uncontrollable by the men who must use them, that they, themselves, have become a source of tension. They are now a potential cause of war, not just a byproduct of the policital disputes among nations. We must not, therefore, ignore the weapons as being unimportant. The weapons themselves, as well as the disputes, have now become a great source of concern to us all.

It is because of these new developments that the creation of a special agency to deal with the control and reduction of armaments has become imperative. The creation of such an agency does not insure the success of its mission—this point has been emphasized here, today; but we can be sure that without such an effort, the mission will never be accomplished.

Furthermore, Madam President, as a peace-loving people and a people imbued with a sense of social justice, I think it fitting and appropriate that we in the United States take the lead in establishing in our Government a special agency for peace and security—a disarmament agency. I believe this matter surely relates to the great, historical traditions of the United States and emphasizes the sincerity of our purpose in striving to achieve peace with justice.

Very few of us can visualize at this time a world in which there are no arms or armed forces. If at all, this is a world of the far distant future. We can, however, picture the possibility of a world in which these weapons can be placed under control, and in which substantial numbers of them might be taken from national stockpiles and arsenals and dismantled or destroyed. But to take away or even control a nation's weapons is to tamper with the basic aspects of its national security and even its survival.

Proposals in this field of arms control should be made only after the most thorough consideration and detailed planning. Heretofore, we have not had in Government a group that could do this kind of study on a permanent and full-time basis. We have not been able to engage negotiators to go to disarmament conferences well prepared and knowledgeable of their subject as a result of many months of intensive preparation with all of the necessary policy planners and scientific and technical experts.

Madam President, this particular point was testified too repeatedly by witnesses such as Mr. Lodge, Mr. Eaton, Mr. Wadsworth, Mr. Herter, and others who told us of their experiences in the conduct of negotiations on disarmament.

Again I call the attention of the Senate to the words of Mr. Eaton, who, as an adviser, stated in his testimony before our committee that we were poorly prepared. I wish to quote some of his exact words, because he made such a splendid presentation. He said, as is recorded on page 149 of the hearings, when he testified before the Senate Foreign Relations Committee:

The absence of one central control authority over disarmament is one of our failures today.

The bill has been carefully worked out by Mr. McCloy and his staff. It represents months of work within the departments, with you, Senator, and with other members of the committee.

He went on to say that one of the weaknesses of our disarmament program had been its lack of preparations.

I read further from this point in the hearing:

Senator HUMPHREY. But you believe in preparations for those discussions—

Speaking of the disarmament discussions—

Mr. EATON. Yes; preparations against the day when discussions would be fruitful. We should, by diplomatic channels, continually impress upon the Soviets our desire to have agreement in the area of disarmament.

The statements made by Mr. Lodge, who for years, under the preceding administration, was our representative at the United Nations, are most important, and I want every Senator to study those statements. Mr. Lodge has been entrusted with some of the highest diplomacy of our times. He has testified unqualifiedly that one of the weaknesses of our procedure has been the failure to arrive on time at decisions in regard to important matters of foreign policy. For instance, often he had to wait so long for such decisions from the Department of State that by the time the response came, it had lost its meaning. In fact, that testimony was submitted by one witness after another. Mr. McCloy also reminded us of these matters.

Therefore, Madam President, during the coming months it is our duty to work for the resumption of disarmament negotiations. If they are not resumed in a serious manner, the world will be moved that much closer to total war. The bill now before the Senate is basically a means to organize our efforts to prepare and handle disarmament negotiations in the best possible framework. As Mr. McCloy stated at the hearings:

This subject (disarmament) is too serious not to have continuity of effort, not to have the means of employing the best minds that we can possibly bring to bear on the subject, and not to keep constantly struggling to try to find the proper solution between a nuclear disaster and a catastrophe of that character, and the security of the Nation and the peaceful settlement of our international disputes.

Madam President, I know that some will say—as some already have stated—that when an agency of this sort is established, its very establishment has a tendency to weaken our national resolve. But distinguished public servants, such as General Gruenther, believe to the contrary. They say the establishment of such an agency will strengthen us. Furthermore, these witnesses said the establishment of such an agency will prevent us from taking steps which later we might come to regret. After all, discussions of disarmament are not properly entrusted to children or to the ill-prepared or to the ill-informed. I shudder to think what might have happened if some of our representatives' suggestions which had not carefully prepared in advance or had not been the subject of sufficient preparation had been accepted. Furthermore, Madam President, I am not the only one to take this position; it is also taken by the best qualified witnesses whom it is possible to have testify on this subject. Apparently our representatives have gone to conference after conference almost entirely unprepared—in the hope that the Soviet Union would not agree to any of the proposals which might be made with the result that thus we would

be spared the results of our folly. For instance, Madam President, in that connection I think of the several conferences held in London, which were attended by our representatives with but poor preparations. I wish to distinctly understood that I do not charge that our representatives there did not work hard. They did work hard. Neither do I charge that they were not able. They were most able.

They were conscientious and dedicated persons. But, Madam President, it takes more than merely conscientious and dedicated persons to negotiate with the persons the Soviet Union sends to these conferences.

I see present on the floor the distinguished Senator from Tennessee [Mr. GORE], who was an adviser to our negotiating team at Geneva on the nuclear test ban discussions. It was my privilege to visit some of those meetings. I think the Senator will agree with me that when the Soviets come to these conferences, they come prepared, as if they were graduate students just finishing up their work for their Ph. D. degrees. They move their research work in from trucks. They come in, not with 5 or 6, but with 50, 60, or 70 experts trained in that field. We enter into these negotiations as if it were a sort of lost weekend. All too often we charge in, filled with good intentions and hopes, and filled with the love of mankind, and the desire to spare him from catastrophe. We are trying to establish an agency which will prepare us for diplomacy, just exactly as we have an agency which prepares us for the battlefield, if necessary. The proposed agency for disarmament, for world peace and security, is vitally needed at this critical time in history.

Mr. CASE of South Dakota. Madam President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. CASE of South Dakota. I have been following the talk of the distinguished Senator from Minnesota with a great deal of interest. I think he is presenting a persuasive argument for our doing something, and not going into conferences without a proper agency which can furnish us with appropriate advice.

I suggest that the Senator give some thought to the suggestion I shall make that the agency be known as the U.S. Advisory Agency for Arms Control, Peace, and Security, and that the head of the agency be known as the Under Secretary for Arms Control, rather than disarmament. I make that suggestion because I feel, in line with our national policy today, it would be somewhat misleading to use the term "Disarmament Act" or "Disarmament Agency" in view of the interpretation that is being placed upon that word by many persons.

As a practical matter, we can all hope for some reduction in arms under proper controls. I do not think we can expect immediately complete and universal disarmament.

I respectfully suggest to the Senator that I have drafted an amendment which would accomplish this purpose. While I am not offering it at this time, I shall furnish him with the text of it.

Mr. HUMPHREY. I shall be glad to consult with the Senator from South Dakota on it.

Mr. GOLDWATER. Madam President, will the Senator yield, so that I may comment on the amendment suggested by the Senator from South Dakota?

Mr. HUMPHREY. I yield.

Mr. GOLDWATER. I have read in the afternoon press that Premier Khrushchev has agreed to talk. I am concerned about the title of this bill and how it will be interpreted, not only by the people of the world, but our own people, particularly if the Senate passes the bill on the afternoon when the American people and the world have become cognizant of the fact that Khrushchev is willing to talk.

I have great fear that if the word is incorporated in the bill as it is now, it can have a very weakening effect, and actually do harm to the strength the Senator from Minnesota feels this would give us in the world today.

I think this recent happening should have a decided effect upon the thinking of the Senator from Minnesota concerning the suggested amendment of the Senator from South Dakota.

Mr. HUMPHREY. I appreciate the Senator's comment.

First of all, I may say that the Government agencies and those with whom Mr. McCloy discussed this matter gave the subject matter of title very careful consideration. In fact, there was a meeting at the White House of something like 40 representatives of this Government, in which the subject matter of the title was discussed. I do not see any reason why we should turn over to Mr. Khrushchev the honor of being for disarmament. He has gotten by with it. He goes before the United Nations and makes a speech for total disarmament. I know he is not sincere about total disarmament. That is my view of it, at least. But he gets up and talks about it. To talk about arms control is sort of backing into the subject matter being discussed.

How do we best say it? The word "disarmament" has a great worldwide appeal. People understand it. We talk in the bill about effective and controlled disarmament. We are not talking about unilateral disarmament. We are not talking about, as my speech made quite clear, and as the Senator from Alabama [Mr. SPARKMAN] made quite clear in his speech, the probability that there can be immediate total disarmament. I have made it clear that is a hope which is a long way down the path of history. But I do not believe in giving Mr. Khrushchev all of the psychological weapons to win the war; and if there is one thing Congress continues to do, it is to turn over to Mr. Khrushchev psychological victory after psychological victory. We insist upon it. We let him go out and "peddle his wares" all over the world. When Mr. Khrushchev goes before the United Nations, he does not go there weak-kneed. He does not go there with half proposals. He goes the whole way. We go up there and argue whether or not we should take this much of a step or that much of a step.

We shall go into the question of the title later. I think the Senator from South Dakota has raised points which are worthy of every possible consideration. But I say if we are to have as our ultimate objective effective and controlled disarmament—which is another way of saying arms control—then we had better use the best words we can to get our message across.

This country has conducted foreign aid operations. We have offices all over the world with signs on their doors, "USOM." What that means, even the makers of Campbell's soups do not know. "USOM."! There is not any such word in the dictionary. But some very good person said, "This will explain the technical meaning of "U.S. Overseas Mission."

Madam President, I am a more simple-minded fellow, and I am not ashamed of it. I asked that there be put in the foreign bill an amendment which would make it clear that this is American aid, so, in case one of us goes overseas, and sees a sign that says "American aid," he will know that inside the room there is something that has to do with the United States. There may be an American in there. He may get some aid. What is one going to do when he sees something that says "USOM"? What kind of language is that? Is it Ubangi?

I say we had better use words that have the most common meaning and the greatest acceptance. There are some suitable words in our language. We Americans are getting a little afraid of the word "peace." We are afraid we may be accused of appeasement. Well, there are some good scriptural references to that word. We will never read anywhere in the scriptures, "Blessed are the warmakers." I have never read it. We will never read the words, "Blessed are the defensemakers." But I have read, "Blessed are the peacemakers." I do not intend to let Khrushchev have the benefit of using it. "Disarmament" is a good word. I do not intend to let the man who would destroy the world, if he could, have that advantage handed to him. I will not be a part of it.

Mr. CASE of South Dakota. Madam President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. CASE of South Dakota. The Senator from South Dakota recalls the day when the Senator from Minnesota made his proposal that we use the term "American aid."

Mr. HUMPHREY. Yes.

Mr. CASE of South Dakota. I applauded the Senator for it.

Mr. HUMPHREY. I know the Senator did.

Mr. CASE of South Dakota. I think I offered the suggestion that wherever we could we ought to have an American flag, because some people do not read English but can recognize the American flag.

Mr. HUMPHREY. I am in favor of that. I am proud of the flag. Wherever there is anything relating to this country I am in favor of having an American flag.

Mr. CASE of South Dakota. I do not think we should get into any argument over semantics, which might destroy the purposes of the act. The suggestion I made was not made with any thought of destroying or harming the purposes of the act.

Mr. HUMPHREY. I know that.

Mr. CASE of South Dakota. I have participated in a few gatherings. It was my privilege to attend the meeting of the Interparliamentary Union on three different occasions. One was at an annual conference, and in addition I attended the conference on the agenda at Nice, where I served on the Committee on Disarmament and related matters.

I have a feeling, growing out of my experience, that among the peoples of the world—and we talk about this action being interpreted among the peoples of the world—the smaller nations of the world, or the weaker nations of the world, desire an effective police force somewhere in the world.

I am a little fearful, because of the way Mr. Khrushchev uses the term "disarmament," that he practically suggests one could sink all the battleships and abolish all the weapons of war and so forth. I do not believe that is regarded as a realistic proposal by the small nations of the world, or by the large nations of the world.

I am not suggesting that we change the purposes or the program, but I think it would commend itself to the people of our country and to the people of the world if we used the term "arms control" rather than "disarmament."

I do not fear the use of the word "peace," either. I would keep in "peace" and "security."

Mr. HUMPHREY. I noticed the Senator had done that.

Mr. CASE of South Dakota. Before we take any action I hope we will consider our position and not preclude the possibility of some improvement in nomenclature, if we can work it out.

Mr. CASE of South Dakota subsequently said: Mr. President, during remarks I made in the consideration of a disarmament agency bill, I referred to the fact that I had spoken at the Interparliamentary Union Conference in Tokyo, Japan, in October 1960, in which I had stated that complete and immediate disarmament is a mirage, and that the people demanded a secure peace.

I ask unanimous consent that the complete text of the remarks which I delivered at the Interparliamentary Union in Tokyo last October may be printed following the remarks I made this afternoon, and to which I have referred.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

REMARKS OF U.S. SENATOR FRANCIS CASE AT INTERPARLIAMENTARY UNION CONFERENCE IN TOKYO, JAPAN, OCTOBER 1960

Mr. Chairman and my colleagues of the Interparliamentary Union, I, too—I will say to my colleagues from Great Britain—came here with the idea of dealing in sweet reason. I have been tremendously surprised that representatives of a power which has big armies, submarines, aircraft, and rockets should worry about the simplest measures of self-defense when taken by a former defeated foe.

But if the delegates here may be a little divided on some things, there is one thing on which they have all been agreed, and that is that our hosts, the Japanese, have provided the finest possible setting for our deliberations. Never have arrangements been more complete. Never have people been more hospitable. The graciousness of the Emperor and Empress will be long remembered.

It is fitting that in this city the problems and prospects of disarmament should occupy our attention, for Tokyo, the metropolis of the world, was over 60 percent destroyed in the Second World War.

This land alone knows firsthand the complete devastation that comes with nuclear weapons. Last year, in Warsaw, we saw another ancient and beautiful city that had been 85 percent destroyed and its people decimated.

And between Warsaw and Tokyo, our Council met at Athens, where a brave nation was bled time and time again by the ravages of war. Against such a background, we should do our level best.

THE U–2 INCIDENT

The aftermath of Paris is a crisis in the United Nations at New York. Sharp words spoken there have had their echo here. We have heard sinister interpretations placed on the U–2 flight. May I remind everybody, however, that the purpose of the flight was only to provide safeguards against surprise attack. The plane carried no bombs. The pilot was only one man and not an army.

Harsh words should not dim the forthright conduct of the President of the United States. He could have let the blame fall on a clerk, he could have said nothing, but Mr. Eisenhower is a man of candor. He did not personally order the flight of May 1, but he had approved the securing of information to protect the peace; so he did not wash his hands of the matter. He accepted responsibility, and then he ordered the flights to stop.

U.S. RECORD OVER THE YEARS

The incident should not blind anyone to the overriding policies and longtime purposes of the United States, which through peace and war have been intended to make the world safe for democracy.

At the turn of the century, our blood and our treasure were spent to give Cuba her freedom and to put the Philippine people on the road to self-government. Twenty years later, our boys crossed the sea to help rescue freedom in France and to help Paderewski restore parliamentary government in Poland.

A generation later, they went again to all parts of the world—to India, China, and Australia—to aid beleaguered people.

Memories are short if Leningrad and Moscow have forgotten their calls for a second front.

Memories are short indeed if men have forgotten that food and clothing went to the families of the former enemy within hours wherever the flag of the United States went. Memories are short indeed if the efforts of the United States to establish the United Nations to maintain peace and to foster programs for the less developed nations are forgotten.

SEEK PEACE WITH FREEDOM

In concert with others, we now seek to maintain peace with freedom. The perils include fear, suspicion, and accident. Small nations rightly plead for consideration, because nuclear war would not recognize national boundaries. People are people wherever they live, whether in large countries or small.

Can fears be removed by words alone? They cannot. Will nations abolish arms without guarantees? They will not. Complete and immediate disarmament is a mirage.

People demand a secure peace; they want police to maintain order, effective controls to check disarmament.

The situation is not hopeless. Nations, like men, do not climb to mountaintops with a single bound. They get there one step at a time. Each step forward helps.

Your draft resolutions, Mr. Rapporteur, point the way. My own country's actions support you. On general disarmament, President Eisenhower has joined with Prime Minister Macmillan in asking the United Nations to resume work on disarmament. It was not my country that walked out at Geneva last June. We were ready with proposals intended to meet the suggestions of the Soviet Union. I am sorry that they did not wait to hear them.

The United States has suspended nuclear tests and has declared its willingness to continue that ban while seeking jointly to develop full detection methods.

On the manufacture of fissionable material, on August 10 Ambassador Lodge proposed to the United Nations Disarmament Commission that the United States and the U.S.S.R. agree to end the production of fissionable materials for weaponry and to transfer over 30 tons of the material to peaceful purposes.

EISENHOWER'S FOUR-POINT PROPOSALS

On the peaceful use of outer space, on September 23 President Eisenhower put a four-point program before the General Assembly of the United Nations.

He proposed that, "celestial bodies be not subject to sovereignty" and that, "subject to appropriate verification, no nation put into orbit or station in outer space, weapons of mass destruction." He would extend the principles of the Antarctic Treaty to outer space.

On effective controls, both as to conventional and nonconventional armaments, Mr. Eisenhower said: "I solemnly declare, on behalf of the United States, that we are prepared to submit to any international inspection, provided only that it is effective and truly reciprocal."

On protection against surprise attacks, in 1955 at Geneva, Mr. Eisenhower proposed open skies or aerial surveillance.

To us, inspection does not mean espionage, but only effective controls.

The United States does not ask for any inspection that it would not accept for itself.

On these points, my colleagues, we can go forward.

We may seem to be in a dark forest, but let us not storm and blame one another. Let us look for the paths that lead to the sunlight.

Let us take what steps we can take together and develop programs of good will and mutual exchange until, as confidence increases, people everywhere can live under governments of their own choice in freedom and in peace.

Mr. HUMPHREY. I thank the Senator. I wish to make it quite clear that anything I have said relating to the Senator's proposed amendment should not be interpreted as any indication of a lack of respect for the Senator's suggestion, or as an indication that the Senator wished to weaken the bill. I know he does not. I thank him for his position. It has been a very fine one. I am deeply indebted to the Senator, and so is the Congress.

Mr. COOPER. Madam President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. COOPER. I am loath to interrupt the Senator.

Mr. HUMPHREY. I am delighted to be interrupted by my good friend from Kentucky.

Mr. COOPER. The Senator is a most eloquent speaker. He thrills me, though I sit in the Senate and listen to speeches all day long. I wish we could send the Senator to the United Nations to speak when the United Nations meets to discuss disarmament.

I remember, as I am sure the Senator remembers, that when he introduced the bill he asked me to become a cosponsor.

Mr. HUMPHREY. I surely did.

Mr. COOPER. I was very happy to become a cosponsor. All of us would like to believe that disarmament with control and inspection were possible.

I am not very optimistic at this time but we hope that some day we may achieve our objective. There is nothing in the news today to indicate any immediate possibility of doing so.

But I know the possibility of achieving disarmament—limited or full—with adequate controls, will be lessened unless the United States is able to present plans which have been well thought out and formulated. This can only be done by the establishment of an agency which works continuously upon this great issue.

I wish to say something else to the distinguished Senator, concerning the understanding of our policies by other countries. I know he has engaged in disarmament conferences, as has the Senator from Tennessee [Mr. GORE].

I sat in the United Nations several times and listened to the exposition of our disarmament proposals. Of course, that was several years ago in 1949, 1950, and 1951, and our proposals had not developed as they have today. But even then, our proposals were not easily understood by other countries.

Further I do not believe the leaders of other countries have understood our disarmament proposals, either those which relate to general disarmament, or those which relate to nuclear tests.

It is the lack of understanding, of information by the leaders and governments of the newly developed countries, which has led them to accept too readily the Soviet position of treaties for general and complete disarmament without provisions for control and inspection. I do not think that is the only cause. I am very sorry to say, that I believe that the leaders of some countries are so frightened by the terroristic threats of the Soviet Union that they tend to equate the Soviet and United States positions.

I am very sorry that at the recent Belgrade conference the nonalined countries did not take a stronger position against the recent resumption of nuclear tests in the atmosphere by the Soviet Union.

Does not the Senator believe that our Government ought to make a greater effort to inform the leaders of other countries about our position in the general field of disarmament and also in the field of nuclear tests.

Mr. HUMPHREY. Yes.

Mr. COOPER. Perhaps some do not wish to understand it, but others do not understand, because our positions are very complicated.

How can one secure the general approval or support of other countries unless one is able to make clear to them our position and proposals? Our position for true disarmament with inspections is as important to them as it is to the United States.

Mr. HUMPHREY. I say first to the Senator from Kentucky that his knowledge of foreign affairs is, to my mind, one of the real sources of strength of the United States, as well as of himself. I deeply regret we are not able to have his contributions on a daily basis in the Senate Committee on Foreign Relations, to be very frank.

Mr. COOPER. I do not think I shall be in the Senate that long.

Mr. HUMPHREY. The Senator will be in the Senate for a long time. I say that as a Member on this side of the aisle.

There are some issues the Senator from Minnesota thinks are overriding. There are some issues far beyond partisanship. The Senator knows I feel that way from the depths of my heart. I am deeply grateful for his service to this country.

I feel that we have attempted in the field of nuclear test suspension to do a good job in making our position plain. I was one of those who liked the work of Ambassador James Wadsworth. I thought Ambassador Wadsworth was very sincere and very patient. He did a good job. I thought he made our position as clear as he could in the light of what was our position. We had not really gone the whole way.

Then, along in March, there was the work of Mr. McCloy, and Mr. Arthur Dean was brought back into Government service. I thought Arthur Dean, with the draft treaty he took to Geneva, did a remarkable job. For the first time we went on the offensive. We had the initiative against the Soviets. We have had the Soviets in retreat on this issue for a long time. They had hoped to drive the United States to nuclear testing first. They had hoped we would make the first move. Finally they gave up, and they made the first move.

The Soviets tried to obstruct the conference. They did a good job of obstruction. However, when it comes to the question of general disarmament, or even limited disarmament, we have had a poor show. We have never had an overall policy.

Now we are beginning to get an overall policy. But we shall need an agency that can gather and digest the information, and make overall recommendations to the Secretary of State, the President, and the Congress, so that we may understand what our policy is. I do not think we can expect people in other parts of the world to understand if we do not ourselves understand our policy.

Mr. COOPER. Madam President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. COOPER. I have no doubt that the Soviet Union knows our policies. I have no doubt that our allies, particularly those engaged in negotiations, know our policies. The point I wish to make is that I am sure other countries throughout the world, both in the U.N. and outside, whose leaders have not studied our proposals and who do not understand what they are, for various reasons have accepted too easily the generalities and glittering promises made by the Soviet Union of a treaty for complete disarmament without any assurance of inspection.

Mr. HUMPHREY. There is no doubt about it.

Mr. COOPER. Perhaps the Department of State could do more through our ambassadors and by other means to inform other countries, so far as they can. I do not see how we can expect great support for the proposals of the United States unless better information is furnished.

Mr. HUMPHREY. Our information program is vital. The best kind of information or, to use another word, the best kind of propaganda, is based upon a program or policy with respect to which we have taken the initiative.

All Senators were elected; none of us was appointed. None of us won an election by debating on the terms of another. We never win elections by discussing the other person's issues. One must take the initiative. The reason that some men are in the Senate and others are not is that those of us who are here got out in front, took the initiative, and were able to make our positions sufficiently plain to a large enough number of people to win a majority vote.

With all due respect, I say to Senators that I do not think we always discuss the issues on the public platform and with our constituents in the intricate detail with which we discuss certain bills in the Senate. If we did, doors would be closed. We must come forth with general statements and generalities that have application and meaning to the people.

Mr. COOPER. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. COOPER. I appreciate the Senator's yielding. I am glad that the Senator has introduced and supports strongly this bill. I point out that the Disarmament Agency had its beginning last year, when President Eisenhower established a small office in the Department of State, to work continually on disarmament.

Mr. HUMPHREY. The Disarmament Administration.

Mr. COOPER. The objection is raised that disarmament confuses and cuts across our program for national security. The objection is also raised by many that the success of such agency is not possible. I hold strongly that the United States must continue to make every effort it can toward disarmament and in the best possible way. The only possible way I see is to establish such an agency as the one proposed.

Today a comment was made that the passage of such a bill as the one proposed at this time would have unfortunate and even disastrous effects upon negotiations that may take place over Berlin. I do not believe this correct—or that Mr. Khrushchev will be strengthened by the passage of the bill, or that it will weaken our position. To the contrary I believe it will strengthen our position.

The United States has taken a very clear position with respect to Berlin. The President, supported by former President Eisenhower, former President Truman, Congress and the people, has made clear our commitments, and our willingness to defend them, even if it leads us into war.

Recently we have witnessed a progression of actions, started by the Soviet Union, which unless they can be interrupted by negotiation, could lead to more dangerous circumstances, and toward war. It is necessary that someone be able to break out of this circle, and I believe the United States should take the lead in moving toward negotiation.

I am glad that negotiations have evidently been proposed by the President of the United States. Negotiation does not mean appeasement. It means some honorable accommodation which would be consistent with our commitments. The passage of the bill would indicate, if not to Mr. Khrushchev, to our allies and other countries of the world that the United States, even in this crisis, is proposing a course of action which shows that we have hope for the future and that we have programs other than the development of our military might, necessary as it is, and we will keep strong, and grow stronger until agreements are reached, for the security of the United States stands above all else.

Mr. HUMPHREY. I thank the Senator. I fully concur in his statement, with the spirit of his remarks, and in what he has said with reference to our willingness to take the initiative in these questions of negotiation. No sign of weakness or appeasement is shown by having the courage to face one's adversary in negotiations.

One of the real weaknesses in American foreign policy through all the years is that everything we have done has been directed toward attempting to convince the Soviet Union. I suggest that there is a great portion of the world outside the Soviet Union, and that is the area of the world in which we can maximize our influence. It is the area in which we could make a better appearance; and we might be able to convince and persuade these peoples and governments to join us.

I return to an analogy that is not always accurate. I have seldom found that one is able to convince his opponent in a campaign or struggle. One who spends all his time trying to convince his opponent has lost the election. One does not try to convince the coach of the opposing football team that one has the better team. One tries to get busy and put the plays across.

I hope that we can practice a little commonsense in our foreign policy by taking the initiative whenever we can in seeking a path to a just and enduring peace. Those are not mere words. They are great challenges to the United States.

We say that we are the moral leaders of the world. We often speak of our being the political leaders or the military leaders of the world. The question is, are we the moral leaders of the world? I am not one of those who let people laugh off moral leadership, because the honor of having, deserving, and using moral leadership is the stamp of greatness. It sometimes represents the difference, in the long term of history, between the weak and the strong, between the successful ones and the failures.

I now yield to my good friend from Tennessee, who has a glint in his eye. I know he has a contribution to make to the debate.

Mr. GORE. Madam President, the glint in my eye, which my distinguished friend has detected, arises from the satisfaction of a curiosity which I fear has been developing. The senior Senator from Minnesota is aware of the story about the typical Senator who first is a bit bewildered about how he managed to become a Member of the most exclusive club in the world, but after being here a short time he begins to wonder how anyone else got here.

Mr. HUMPHREY. I have heard the story about the man who, having been elected, wondered how he made it, but after he had been here for 3 months he wondered how other Senators made it.

I know how the Madam President got here. It was through ability and hard work and intelligence and the high esteem of her constituents.

Mr. GORE. Now that the Senator from Minnesota has satisfied this curiosity, and he has explained the political tactics of how to achieve membership in this body——

Mr. HUMPHREY. It was only by observation of others.

Mr. GORE. Does not the Senator acknowledge a wee bit of lingering doubt?

Mr. HUMPHREY. Yes, Since the Senator asks from me the truth.

Mr. GORE. In a serious vein, after these pleasantries, I wish to congratulate my distinguished colleague from Minnesota for his able, successful, envisioned, and eloquent leadership in this very great cause.

Mr. HUMPHREY. I thank the Senator.

Mr. GORE. Sometimes he has been accused of being a visionary. I am not sure that that is an accusation which one should refute with great ardor. Vision is necessary. If one has vision he may by those who are less possessed of vision be accused of being a visionary. I think the distinguished senior Senator from Minnesota is truly possessed of vision and prescience, and I wish to congratulate him thoroughly and wholeheartedly upon the leadership he has provided and is providing in the field of disarmament and in undertaking to have this country's genuine desire for disarmament carefully prepared, carefully reasoned, carefully presented not only to our people and Government, but also to mankind, whose future is involved.

Mr. HUMPHREY. I am very grateful to the Senator from Tennessee. Lest it be though that we are merely being kind to one another, let me say briefly and very concisely that the Senator from Tennessee, as I said to the Senator from Kentucky, is a man who has worked with great determination and diligence and intelligence in this important area. He is a member of the Joint Committee on Atomic Energy, whose work is related to this subject. I am grateful to him for his more than generous remarks.

Mr. GORE. I wish to advert to a remark the distinguished senior Senator from Kentucky made. He spoke of the evidence that Khrushchev had successfully thrown fear into the hearts of the leaders in their recent conference in Belgrade. I must acknowledge that I believe that the senior Senator from Kentucky is correct in his observation. Perhaps one principal reason why this conference failed to make a significant contribution toward world conditions was their reaction of fear to the Russian trickery, epitomized by the resumption of nuclear weapons testing.

Though respect is sometimes associated with fear, though the lack of fear of the United States and fear of the Soviet Union create and intensify problems for us, I wish to say that I am proud that the leaders of the neutral nations of the world are not fearful of the United States. I regret that they are fearful of the Soviet Union, with its absolute dictatorship leadership. Though it creates problems for us and intensifies our difficulties, nevertheless in the end it will redound to our strength that they do not fear us.

Mr. HUMPHREY. The Senator is to be commended for that statement. It is not easy to be just. The road of the peacemaker is one that has many tortuous turnings and many pitfalls. The Senator has made quite clear what the objective of America is. The objective is the respect of friends, neutrals, and even enemies. We do not seek to inject fear. I thank the Senator for what he has said. I hope many people in the world will be able to read his statement and to know what was said here by a very responsible Member of this body.

Mr. LONG of Louisiana. Madam President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. LONG of Louisiana. As one who has served on the Special Subcommittee on Disarmament under the leadership of the Senator from Minnesota, I particularly want to congratulate him on the perseverance he has demonstrated in this field. Many times it looked as though the cause of disarmament was almost hopeless. Yet the Senator has persevered in this matter. He has been determined to demonstrate that while the eagle holds the arrows in one claw, as the President has said, he also holds the olive branch of peace in the other claw. Neither should be neglected. Unfortunately, there has been neglect of the olive branch.

Mr. HUMPHREY. Of both of them.

Mr. LONG of Louisiana. I regret to say it is true that actually both have been neglected. However, the olive branch has been neglected even more than the arrows. This Nation should always be taking the lead in this field, in the cause of peace, to seek universal disarmament. That is the goal toward which we should always be moving. We should try at all times to work with the Russians and try to persuade them to go along on this problem, so that humanity may have some relief from the fear in which it lives.

We could not have a better champion of this cause than the senior Senator

from Minnesota. I believe he is the only man who outtalked Khrushchev.

Mr. HUMPHREY. I tried.

Mr. LONG of Louisiana. This Nation could not have a better advocate to discuss a subject of this sort with Mr. Khrushchev. I say that with some element of pride, because I had something to do with recruiting the Senator from Minnesota, when he was a graduate student at the University of Louisiana, to lending his talents in debating with the British debating team, and it was the first time that we took the English to the cleaners.

I do not believe we could have found a better champion or advocate or a more persuasive advocate than the senior Senator from Minnesota. I wish to salute him for the tremendous time and effort he has devoted to this issue. I thank him for the magnificent work that he has done in this field.

Mr. HUMPHREY. I am grateful to the Senator from Louisiana, and I am deeply appreciative.

Mr. CASE of New Jersey. Madam President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. CASE of New Jersey. I join my colleagues in the Senate in expressing appreciation to the Senator from Minnesota for his effort in this field which has extended over many years, and for his persistence and intelligence and effectiveness.

As a cosponsor of the bill with the Senator from Minnesota, I am happy that this landmark has been reached through his hard work and effort.

I join with other Senators wholeheartedly in the words of praise they have bestowed upon the Senator from Minnesota.

Madam President, as a cosponsor of S. 2180, I should like to address myself to one of the objections which has been raised to it.

Some have contended that an expanded Disarmament Agency of this nature could only serve to foster the making of concessions by this country to its adversaries.

I submit, Madam President, that this misses the point entirely. The proposed Disarmament Agency would strengthen the hand of the United States in international affairs. It would do so by giving our Government the highest technical competence in the increasingly complex field of disarmament. We need such competence, from the standpoint of being able to present the most effective proposals for arms control we can devise, in the very interests of protecting our national security. This Agency would give the United States a means of knowing what we can safely do and what we cannot safely do in this field, a knowledge which has not always been available to us in the past.

Supporters of this legislation, men such as former President Eisenhower, Disarmament Adviser McCloy, former United Nations Ambassador Lodge, Chairman of the Joint Chiefs of Staff General Lemnitzer, and former NATO Commander General Gruenther, have no illusions about the nature of the enemy or about the requirements of defense. Rather the reverse is true. They are among the highest authorities on matters of national security, and their views are entitled to the highest respect. They have all spoken out vigorously in support of the proposed legislation.

I urge the passage of S. 2180 in the interest of our national security as well as America's longstanding commitment to explore every reasonable approach to peace with justice.

Mr. HUMPHREY. I thank the Senator from New Jersey. I know he supports the proposed legislation. I am grateful to him for his support and his advocacy of the bill, as I am grateful also to the Senator from Louisiana [Mr. LONG].

The proposed Agency on Disarmament for World Peace and Security would not be an agency separated and removed from the principal national security departments of the executive branch. It would be under the direction and supervision of the Secretary of State. I wish to make this very clear. The Agency and any of its officers would not be able to formulate policy on disarmament that was inconsistent with other established foreign policies of the United States or that was objected to by the Secretary of State. The Secretary of State would at all times be in a position to guide the efforts of this new Agency.

It is quite well understood that the President of the United States, who is our chief spokesman of foreign policy and the Commander in Chief, will make certain that the efforts of this Agency are directed toward the best interests of our national welfare.

Within these policy guidelines, the Agency would operate with a degree of autonomy that would be established by the legislative directives contained in this bill. The Agency would have the statutory authorization to formulate disarmament policy for the Secretary of State, for the President and for such other officials of the Government that the President may designate from time to time. It would have the statutory authority to conduct research in a variety of fields covering the political, economic, military, and scientific aspects of disarmament and arms control. It would be authorized, under the direction of the Secretary of State, to establish the guidelines of a public information program to be carried out abroad largely by USIA. It would also be responsible for keeping the Congress and the public at home informed of disarmament developments and activities.

The Committee on Foreign Relations wrote into the bill explicit language to insure proper coordination and cooperation between the Agency and other agencies and departments of the Government. The bill specifically authorizes the President to establish procedures "to assure cooperation, consultation, and a continued exchange of information between the Agency and the Department of Defense, the Atomic Energy Commission, the National Aeronautics and Space Administration, and other affected Government agencies, in all significant aspects of U.S. disarmament policy and related matters, including current and prospective policies, plans, and programs."

The President is also authorized to "resolve differences of opinion on disarmament matters between the Department of State and such other agencies which cannot be resolved through consultation." Thus, this bill as amended by the committee would assure that our military services, the Department of Defense, the Atomic Energy Commission, and other affected agencies would at all times have their own programs and their own interests coordinated and protected with respect to the activities of the new Disarmament Agency.

There are other important features of S. 2180 to which I wish to call the attention of the Senate.

Among its functions the Agency would "formulate plans and make preparations for the establishment, operations, and funding of inspection and control systems which may become part of the U.S. disarmament activities and, as authorized by law, to put into effect, direct, or otherwise assume U.S. responsibility for such systems." The report of the committee makes clear that this function with respect to the operation of the control systems cannot be exercised except as authorized by law or treaty. This does not mean, however, that the United States could not participate in a preparatory commission which might be established for the later operation and installation of a control system as a part of a disarmament agreement.

The Agency would be headed by a Director who would be the Under Secretary of State for Disarmament. He would be paid $22,500 a year and must be confirmed by the Senate. The Director of the Agency would be assisted by a Deputy Director, paid at the rate of $21,500 a year, and four Assistant Directors, each of whom would receive $20,000 a year. The Deputy and Assistant Directors would all be confirmed by the Senate. In addition, there would be authorized the creation of a General Advisory Committee, not to exceed 15 members. The members of this Committee would be expected to be of the highest caliber. They would be confirmed by the Senate.

The Committee on Foreign Relations redrafted the provisions of the bill covering security requirements. These are as tight or tighter than any agency of the executive branch.

The Senator from Alabama has made this quite clear. We have gone out of our way, we have gone the full way, to include security provisions in the bill to make certain that this highly sensitive Agency has only the most loyal personnel possible, persons who are not potential security risks. We know that it will be a sensitive instrument of the Government, so we want it to be strong and to consist of the very best personnel our country can offer.

The bill provides that—

Standards applicable with respect to the security clearance of persons within any category referred to in (this bill) shall not be less stringent, and the investigation of such persons for such purposes shall not be less intensive or complete, than in the case

of such clearance of persons in a corresponding category under the security procedures of the Government agency or agencies having the highest security restrictions with respect to persons in such category.

That is the language of the bill. It simply means that an officer or employee of the Agency who has contact with any officer or employee of any other agency relating to any activity of the other agency must have security clearance as high as the person with whom he is in contact, if not higher. It seems to me that this is a protection which will safeguard the proposed Agency from any possible difficulty with personnel who would not be worthy of our confidence.

The final provision of S. 2180 which I wish to mention concerns the authorization of funds to be appropriated. The bill provides an authorization of not to exceed $10 million, which would remain available until expended. This, I might add, is a modest sum by all standards of government. I might compare the $10 million with the $47 billion which will be spent for defense, exclusive of the amount provided for the Atomic Energy Commission, and exclusive of the almost $1,500 million for the National Aeronautics and Space Administration. The amount authorized in the bill is an infinitesimal amount for the purpose for which it is proposed to expend it. However, that amount will make a very significant contribution to a more orderly procedure of policy formulation.

The bill requires the submission to the Secretary of State, for transmittal to the Congress, not later than January 31 of each year, a report concerning activities of the Agency. In this way the Congress for the first time will receive systematic and detailed information on the progress of our disarmament efforts and the results of our disarmament studies.

Mr. President, it is with a sense of deep pride in my country that I ask the approval of the bill by the Senate. The passage of this bill by Congress would create the first agency of its kind in the world to work for disarmament under conditions of security and peace. The creation of this Agency will demonstrate to both our adversaries and our friends that the United States does seek peace, and is strong enough to contemplate the orderly stoppage of the arms race and the beginning of a process by which arms can be controlled and reduced.

At one of the most critical times in the history of the Nation, when we are faced with an awful enemy, we speak for peace and we speak for justice. We speak for a national effort to bring about a reduction in the burden of arms.

The passage of the bill by Congress will create the first agency of its kind in the world for disarmament under conditions of security and peace. The creation of this Agency will demonstrate both to our friends and our adversaries that the United States seeks peace and is strong enough to contemplate an orderly reduction of arms by a process under which arms can be controlled and reduced.

It is important that the United States intensify its efforts to achieve workable arms control plans and progress toward disarmament at this time in history. The tensions among nations are very great. Crises confront us constantly. The world is changing very fast and we cannot expect and should not want to maintain the status quo. But we must seek to bring change about peacefully, without the use of force. We must face the realization that the crises of today, even if they subside, will be replaced by different crises tomorrow. Our great task is to remain strong enough to deter aggression, have courage enough to prepare and work for peace, and be persuasive enough to have friends and enemies alike see the wisdom of removing war and the threats of force from among the instruments of national policy.

I urge the passage of the bill.

VISIT TO THE SENATE BY A MEMBER OF THE PARLIAMENT OF THE NETHERLANDS

Mr. SPARKMAN. Madam President, the Senate is honored today to have in the Chamber the Honorable J. G. Suurhoff, a Member of the Parliament of the Netherlands. Mr. Suurhoff is the leader of the Labor Party in his country, one of the largest of the parties. In fact, it lacks only one vote of being as large as the largest party.

Until 1958, Mr. Suurhoff was the Minister of Labor in his Government, a position comparable to that of the Secretary of Labor in the United States.

I am glad to welcome him to the Senate on behalf of all Senators of the United States, and to say that we are delighted that he is visiting our country. [Applause, Senators rising.]

Mr. HUMPHREY. Madam President, I wish to join with the Senator from Alabama in welcoming to the Senate our friend from the Parliament of the Netherlands. We are honored by his presence. Again, it reminds us of the close relationships which exist between our two countries.

I know that the Senator from Alabama feels as I do that there are no finer citizens of the United States than those whom the Netherlands has given to us. They are the finest and the greatest export of the Netherlands.

U.S. DISARMAMENT AGENCY FOR WORLD PEACE AND SECURITY

The Senate resumed the consideration of the bill (S. 2180) to establish a U.S. Disarmament Agency for World Peace and Security.

Mr. GOLDWATER. Madam President——

Mr. HUMPHREY. Madam President, before I yield to the Senator from Arizona, in just a moment—who has been most patient—I ask unanimous consent that a number of letters I have received in response to inquiries I have made and letters I have sent to many leading businessmen and other national leaders on the subject of the Disarmament Agency be printed at this point in the RECORD. These letters have come from such outstanding persons as John McCone, formerly Chairman of the Atomic Energy Commission; Rev. Theodore M. Hesburgh, president of Notre Dame University; the former Governor of New York and former U.S. Senator from New York, Herbert Lehman; and from other leading churchmen and national leaders, including Henry B. du Pont, vice president of E. I. du Pont de Nemours & Co., of Wilmington, Del.; Charles S. Rhyne, a leader of the American Bar Association, and one of the outstanding leaders in our Nation in terms of disarmament activities in the United States; Most Rev. Robert E. Lucey, archbishop of San Antonio, Tex.; William Zeckendorf, president of Webb & Knapp, of New York City, and a noted businessman; and many other outstanding Americans. The letters reflect outstanding support for this measure, and exemplify the tremendous public interest which has been evidenced in favor of the so-called Disarmament Agency bill.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

LOS ANGELES, *August 22, 1961.*

Senator HUBERT H. HUMPHREY,
Senate Office Building,
Washington, D.C.

DEAR SENATOR HUMPHREY: This letter will acknowledge yours of August 18 attaching a copy of the bill to establish a U.S. Disarmament Agency.

I should like an opportunity to study the attachments to your letter, which I will do at once and will write my comments within the next 2 or 3 days. However, since you indicated there was some urgency in this matter, and also I know through the press that your committee is conducting hearings on this particular bill, I hasten this reply to tell you that I believe a Disarmament Agency should be created as a permanent agency within the executive branch of the Government.

It is entirely possible for the President to create such an Agency and, of course, this has been done by President Eisenhower when he appointed Mr. Stassen as Adviser on Disarmament and gave him Cabinet rank, and later when he instructed the State Department to create such an Agency and Mr. Gullion was made Acting Director of the Agency.

Despite the fact that the Chief Executive can create such an Agency without legislation, I am inclined to believe that appropriate action on the part of the Congress would give a measure of authority to the Agency which would be greater than that derived from Executive order, and also I believe legislative action would be more convincing to the other nations of the world with respect to the depth of the sincerity on the part of the United States on this question of disarmament.

It is my opinion that a Disarmament Agency must be so established and constituted that it will be accessible to heads of Government departments such as the Secretary of State, Secretary of Defense, Chairman of the Atomic Energy Commission and others who carry important statutory responsibility for providing for the security of our country. For this reason I believe that any Disarmament Agency whether established as a part of the President's office or the State Department should receive policy guidance from an interdepartmental group such as the Committee of Principals which, as you know, is a committee that has functioned for the past few years in an advisory capacity to the President on questions of disarmament and nuclear testing—which will be the central issues of concern to a Disarmament Agency.

As I mentioned at the beginning of this letter, I will write you after I had an opportunity to review the attachments to your letter.

Yours most sincerely,

JOHN A. MCCONE.

UNIVERSITY OF NOTRE DAME,
Notre Dame, Ind., August 26, 1961.

Hon. HUBERT H. HUMPHREY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HUMPHREY: The fact that the Communist leaders have exploited the dove for their peace propaganda should not obscure the fact that it was the Judeo-Christian tradition within which that benign and beautiful creature was first hallowed as the symbol of peace. In furtherance of that tradition, no single more important work can be undertaken on behalf of our Nation by the Congress than to establish an effective organization for disarmament as the crucial step toward a lasting peace. Needless to say, I can give my wholehearted support to the principle embodied in the proposed legislation S. 2180, a Disarmament Act for World Peace and Security.

My own deep involvement with national and international agencies struggling with issues peripheral to peace and survival convinces me of the need to bring into sharp focus within a single, responsible organization all of the complex problems inherent in the disarmament issue. Thus, on the practical side, I can also endorse the operational provisions of your pending bill.

Certainly, the United States can no longer be caught unprepared at any international conference table considering the sensitive issue of disarmament. I sense that some of our past ineptness may have come from a lack of single-minded dedication on the part of negotiators schooled in the policies and practices of agencies within which disarmament had traditionally been either a secondary concern or even antithetical to their primary mission.

Judging from your annual budget estimate, I suspect you may be underestimating the tremendous research and training job needed for an effective disarmament effort. Certainly, this effort should provide all the resources needed by those in our Nation and throughout the world who are willing and able to contribute to it. Heaven only knows how few these people really are.

This suggests a further striking effect that the establishment of a disarmament organization will have. This act of faith in the principle and this practical creation of resources by our Government will undoubtedly attract many of our finest theoretical and practical politicians, scientists, lawyers, and administrators to the solution of this mighty issue.

Ultimately, what we are looking for in disarmament is national leadership. The act creates an organization within which men with appropriate capabilities can give us the kind of visible and dramatic leadership in disarmament that the world looks to our Nation to provide.

I hope you will find these comments helpful realizing, of course, that with respect to the details of the bill, I defer to the judgment of you and your experienced colleagues and staff.

With every best wish, I am

Cordially yours,

Rev. THEODORE M. HESBURGH, C.S.C.,
President.

NEW YORK, N.Y., *August 23, 1961.*

Hon. HUBERT H. HUMPHREY,
Senate Office Building,
Washington, D.C.

DEAR HUBERT: I have your letter of August 19.

In accordance with your suggestion, I have been very glad indeed to send you the attached letter. If you consider it desirable, I would be very glad indeed to have it inserted in the committee record of the hearings. I have kept it short, since I have no doubt that all the facts are by this time fully known and understood by the members of the committee.

I am sending it to you only as the personal opinion of one who is deeply concerned with the problems of disarmament which have confronted us for so long.

John McCloy called me up a few days ago and I am preparing a statement, possibly at greater length, for submission to the House Foreign Affairs Committee.

Yours,

HERBERT H. LEHMAN.

NEW YORK, N.Y., *August 23, 1961.*

Hon. HUBERT H. HUMPHREY,
Senate Office Building,
Washington, D.C.

DEAR HUBERT: I have your letter of August 18 enclosing a copy of a bill drafted by the administration and introduced in the Senate by you, to establish a U.S. Disarmament Agency.

I have studied the bill and have read the testimony of the Honorable John J. McCloy, Secretary of State Rusk, Gen. Lyman L. Lemnitzer, Commissioner Leland J. Haworth, Deputy Secretary Roswell L. Gilpatric, and others, before appropriate committees of the Congress.

I beg to advise you that I am strongly in favor of this bill, which I understand will serve as an agency in the State Department with access to the President, charged with the duty of formulating, carrying out and giving the necessary continuity to the Government's policy on disarmament. I understand too that it will also have the power to carry on research, although it will not supplant the other agencies in this regard. Many different agencies of the Government are concerned with one phase or another of our disarmament program and apparently there is very little coordination of their various activities.

There is no subject of greater importance to this country or to the free world than disarmament or the reduction and/or control of armaments. I believe that we should use every possible means to develop a unified policy and program and to place at the disposal of the President and the Secretary of State the greatest degree of expert data and knowledge. We dare not omit anything that would lessen the tension and ultimately bring about a peaceful world.

I would appreciate it if you would submit my views to the Foreign Relations Committee of the Senate.

With best wishes, I am

Yours very sincerely,

HERBERT H. LEHMAN.

PFIZER INTERNATIONAL, INC.,
Washington, D.C., August 31, 1961.

The Honorable HUBERT H. HUMPHREY,
U.S. Senate, Washington, D.C.

DEAR SENATOR: This is in acknowledgment of your letter of August 18, 1961, reference S. 2180, which proposes the establishment of a U.S. Disarmament Agency.

I have not had time to study this bill in detail, but I do support its basic purpose. The chief advantage would be to set up a permanent agency within the Government which should insure better continuity in our national policies toward disarmament.

In the past our approach to this vital question has been somewhat haphazard. A variety of temporary boards, committees, and other extemporaneous groups have studied this complex problem. But, with changing personnel, there has been little or no continuity to these studies. And, lacking an established agency in the Government, our negotiators in the past have been hampered by a lack of definitive plans and policies with respect to disarmament. Your bill will go a long way toward correcting this situation.

On the other hand I have no illusions that disarmament agreements with the Communists will solve the present world situation. I have never agreed with the thesis that armaments per se cause wars. They are merely the tools by which nations, for political or economic reasons, go to war. If these political and economic problems can be solved, then disarmament naturally follows.

However, we must determine the conditions under which we will be prepared to disarm or regulate armaments and for this reason I would support your bill.

With best wishes.

Sincerely yours,

J. LAWTON COLLINS,
Director.

E. I. DU PONT DE NEMOURS & CO., INC.,
Wilmington, Del., September 5, 1961.

The Hon. HUBERT H. HUMPHREY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HUMPHREY: I appreciate very much your courtesy in providing me with information on the proposal to establish a U.S. Disarmament Agency with responsibility for research and planning.

As a businessman, I thoroughly agree with your suggestion that the times require efficient coordination and effective preparations for disarmament negotiations.

Obviously, I am not in a position to judge whether this can best be achieved through the existing framework of the Government, or whether a new agency is required.

This is a decision which properly must be made by you and your colleagues in the Congress after full examination of the facts. I join with you in the hope that, whatever the means, fruitful and constructive accomplishments will be achieved.

Sincerely,

HENRY B. DU PONT,
Vice President.

RHYNE & RHYNE,
Washington, D.C., September 4, 1961.

Hon. HUBERT H. HUMPHREY,
Senate Office Building,
Washington, D.C.

DEAR SENATOR HUMPHREY: I regret that my absence in Europe where I have been talking with lawyers in various countries about the world peace through law program has prevented an earlier response to your much-appreciated letter of August 18. I hasten to advise that I wholeheartedly approve of the bill to establish a U.S. Disarmament Agency for World Peace and Security. Speaking from a background of 5 days in Berlin at the time the Khrushchev wall went up and the shocked reaction to the Soviets lifting of the nuclear testing ban, I believe it crucial that this legislation be enacted at the earliest possible time. Enactment would demonstrate to the whole world that while we intend to have overwhelming power through arms to maintain security, we at the same time are working to develop means to replace force as the controlling factor in the fate of humanity. I am certain that nations will not abandon the protections they now find in their arms until security is provided by another means. We should be first in looking for that other means. We cannot replace arms with nothing. We will get rid of arms only by replacing them with law rules and legal institutions plus a legally controlled international police force.

I do believe that establishment of the new Agency would be hailed all over the world by the thousands of lawyers who are now working on the world-peace-through-law program. The enclosed memorandum summarizes the activities and accomplishments of this program to date. Lawyers are refusing to accept the verdict of the past that operation of the world under the rule of law is im-

possible. They are asserting that killing is not required for the operation of governmental relations internationally anymore than it is within nations, and they are carrying out an all-out program to enable law to transcend arms just as law has transcended force within all civilized nations the world over.

Respectfully yours,

CHARLES S. RHYNE.

MEMORANDUM ON WORLD PEACE THROUGH LAW PROGRAM

The program began with an exhaustive survey in 1958–59 among the practicing lawyers, teachers of law, and the judiciary on how the rule of law and its institutions could be strengthened in world affairs so as to enable it to make a more meaningful contribution to the effort to achieve peace. More than 10,000 members of our profession at home and abroad received this inquiry. The questions were broadly phrased such as: What kind of order do we really want in the world? Upon what premises and principles should it be based? What kind of legal, political, economic, and other institutions must it contain? How can lawyers help organize the disorganized world? Can anything realistic be accomplished? Should lawyers undertake this task or should lawyers not help at all?

Responses were compiled and distilled by experts in the field of international law into a working paper which was then put before leading lawyers of our country in five regional meetings at which all States were represented. The questions posed at these meetings were: What do you think of the ideas set forth in the working paper? What other ideas do you have?

A program of education, research, and organized effort by the lawyers of the United States was one recommendation of these conferences. But perhaps the major conclusion was that working alone American lawyers could accomplish very little, that only through a concerted effort by the lawyers of all nations could we advance peace through law.

Committtees on world peace through law were then created by State and local bar associations throughout the country—they now total approximately 150 and are growing in number constantly. A junior bar liaison committee with members in each State was created. A special committee of the American Law Students Association was set up with representatives in most law schools.

Courses in international law were surveyed by the committee. Many law schools have at the urging of the committee improved existing courses. Others have offered new courses in the field.

Through Law Day, U.S.A., programs, speeches by lawyers and others, the promise and potential of a world ruled by law has been brought increasingly to the attention of the public on a broad basis. A community sense of the need for law has been developed.

Proclamations by Presidents of the United States, by Governors and mayors on Law Day, and foreign affairs speeches by Presidents Eisenhower and Kennedy and other high Government officials have emphasized the need to strengthen the rule of law internationally. President Kennedy in his inaugural address said that the ultimate hope for mankind is: "* * * a new world of law, where the strong are just and the weak secure and the peace preserved forever."

President Truman has said: "When Kansas and Colorado have a quarrel over the water in the Arkansas River they don't call out the National Guard in each State and go to war over it. They bring a suit in the Supreme Court of the United States and abide by the decision. There isn't a reason in the world way we cannot do that internationally."

Vice President Nixon has said: "* * * the time has now come to take the initiative in the direction of establishment of the rule of law to replace the rule of force. If we rule out, as we have and should, the use of force or threats of force as a means of settling differences where negotiations reach an impasse, the sole alternative is the establishment of the rule of law in international affairs."

Senator LONG of Missouri recently said: "Thanks to the American Bar Association, lawyers in many parts of the world are now working to formulate an action program designed to help move mankind nearer to the goal of peace through law. This increasing consciousness of international problems in the legal profession is a significant contribution to the efforts of the United States to strengthen the foundations of freedom throughout the world."

Senator HUMPHREY has, through his leadership in introducing the resolution to repeal the so-called Connally amendment to our reservation to the jurisdiction of the World Court, shown tremendous leadership in this field of world peace through law.

Many statements and other evidences of leadership by other leaders of our Nation could be cited.

Hundreds of newspaper editorials, articles, and news stories have been published on world rule of law and its various phases and facets. Many television and radio programs have highlighted this subject.

Church leaders, labor leaders, business leaders, and the lay public in general are mentioning and emphasizing the need to build a world ruled by law more and more in their speeches, comments, and activities.

World peace through law committees of the various States have been most active. Two or three nations of the world have been assigned to each State's committee with a request that they ascertain the number of lawyers in each, the number of law schools, courts, type of law used such as civil, common, Islamic, etc. Reports are flowing in and the end result is to be a book entitled "Law and Lawyers of the World." An intensified program of personal contacts between American lawyers and lawyers of other countries has also been inaugurated by furnishing names and addresses of lawyers in other nations to the State committees and other lawyers who visit foreign countries.

The American Bar Association has taken the lead in sponsoring continental conferences of lawyers of the Americas, Asia, Africa, and Europe, and a world conference to develop an action program to achieve and maintain world peace through law with the broad grassroots backing of the lawyers of the entire world. The Ford Foundation and the International Cooperation Administration are financing these conferences. The universally favorable reaction—even from behind the Iron Curtain, except Hungary—is giving great impetus to this program. We find that these lawyers of other nations are just as interested, concerned, and just as knowledgeable as we are about this movement and that they share our belief in the rule of law as a common resource of mankind ready for use to create more harmonious relations. Amazing amounts of legal research have been discovered in Mexico, India, Italy, Japan, and other nations on subjects important to this program.

The first of the continental conferences held in San Jose, Costa Rica, this June was a tremendous success. Its "Consensus of San Jose" setting forth the views of Western Hemisphere lawyers on some basic principles and a program to achieve our goal is being properly hailed as a great milestone on the road to world peace. The second continental conference will be held in September in Tokyo, the third will be in Lagos, Nigeria, in December, and the fourth some time in the early part of 1962 in Europe. The World Conference will also be held in 1962.

The same type of interest and activity now found in the United States is thus being generated in more than 100 nations by the legal profession. San Jose dramatically demonstrated that this direct involvement of the interests and energies of lawyers from these nations has given them a sense of responsibility, achievement, and participation in this program. The same attention by leaders in governmental and private affairs, law schools and other areas of interest is also found in many of these countries. Committees are at work in many nations and Law Days are being held in some countries with the same type of editorials, news articles, speeches, and other activity we have in our country. Despite different languages, traditions, cultures, and civilizations we find free lawyers agreed upon the moral principles of the rule of law as the world community's greatest common denominator.

It is certain that even at this stage of the law buildup the ever-increasing interest and efforts of lawyers in other nations has transformed the world peace through law program from a purely American effort into a worldwide effort of the legal profession. Not only have American lawyers contacted lawyers in other nations but lawyers of other nations are writing to and conferring with each other more and more on this program. And great leaders are rising up in other nations to push this program forward. The importance of this development cannot be overestimated. The San Jose Conference was presided over by the President of the Costa Rica Bar Association, the Tokyo Conference will be headed by the dean of the Japanese bar and the other conferences are expected to be headed by lawyers of other nations. The International Bar Association, the Inter-American Bar Association, and other international associations of lawyers have created special committees on world peace through law to cooperate with this program. The collective approach through private efforts to further a buildup in world law is thus spreading like wildfire.

What does it mean at this juncture of world history that so many lawyers are striving hard to search out and agree upon principles and a program for world peace through law? This marshaling of world legal resources, we believe, is a major achievement insuring positive concrete steps to our goal. Many imaginative ideas on new steps to advance the cause of peace through law have come out of the effort just outlined. A flood of fresh and constructive ideas for action is being generated, as witness the "Consensus of San Jose," a document based upon more than 100 different documents, resolutions, and ideas which were handed to the San Jose delegates during that conference, plus 3 days and nights of debate.

To summarize results of this program beyond the factual recitation just made is difficult because it covers the whole world, but let me try. This program has:

Brought general agreement among many lawyers that the best approach for our program is through United Nations, in strengthening its existing agencies, and creating under its framework the many new legal institutions and law rules needed by the world community. Examples of suggestions are:

Increased use of the World Court, with regional branches of World Court where feasible.

Creating more continental courts like the highly successful European Court of Justice.

Rules providing uniformity of organization and operation of its specialized agencies and more specific law rules to replace present informality which often leads to misunderstanding.

Making the International Law Commission a fulltime agency with the duty of a tremendous speedup in a program to codify international law in all areas.

Created a tremendous growth in mutual trust and confidence among lawyers of the world, a development directly in keeping with Pope John's recent encyclical which cited the "urgent necessity of mutual understanding and cooperation" among men and nations as essential to elimination of the arms race.

Emphasized practical things that can be worked on now such as drafting a treaty guaranteeing that outer space will be used only for peaceful pursuits similar to the Antarctica Treaty, a treaty guaranteeing foreign investment, and treaties undergirding with law rules the many informal agreements on such things as transnational sales of coffee, wheat, cotton, etc.

Created among lawyers of the Americas agreement upon some of the general rules of international law adhered to by civilized nations, a program which if extended worldwide will bring more certainty into this field thus encouraging greater acceptability and reliance upon world law rules.

Begun to develop a plan of education, research and organization to mobilize the manpower and brainpower of our profession behind positive realistic action to achieve the great objectives of this program.

Above all, this program's review of the past has brought home the fact that mankind has been groping for means to achieve civilized order in the world for a long time. And it has made crystal clear that such order will not come about simply by accident or by sheer undirected technological process. Something more is required, and law has been that something wherever man has been successful in transforming a society ruled by arms to a peaceful society based upon human liberty and dignity. Past failures in adequately articulating the idea that the world community can be organized into a system of order based upon freedom and justice under law are now being remedied.

We lawyers began this program to build up law in the world community with full knowledge that many great lawyers have espoused world peace through the rule of law from the time of Grotius in the 16th century and even before. So the idea is not new. Neither is the idea of failure new. The things that are new, and the things which provide an opportunity for success now in contrast with past failures are: (1) The peoples of the world realize that possession of power to destroy civilization (a power which has never existed before) makes resort to force so unthinkable they will give their wholehearted support to this plan, support which is essential to success; and (2) the rapid communications and transportation plus the wider educational opportunities of our day are enabling a worldwide welding together of the ideas and efforts of thousands of legal technicians who have the capacity to start at the grassroots and build a world of law.

This is therefore not another effort like the Kellogg-Briand Pact which with great fanfare and the support of nearly all nations outlawed war in 1928. That pact proved to be meaningless because it provided neither the law nor the institutions to accomplish that lofty objective.

Hardheaded practicing lawyers, who are accustomed to drafting, applying or building law for their city, nation or other clients on down-to-earth, practical problems of settlement agreements, contracts, city ordinances, State and National statutes and treaties are the prime movers here. These are lawyers who have devoted their lives to solving problems in human relations. They are not deluding themselves or the public as to what they can do. They realize they do not yet have all the answers. They are focusing upon the concrete things that must be done to create the thousands of new interrelated law rules and hundreds of new institutions needed to govern the ever-accelerating contacts and relations between people of different nations as well as between the nations themselves. They are identifying areas where rules of international law, although existing now, are antiquated and inadequate. They know that our development of lawful means to control the relations of men and nations has failed to progress with the needs of our times, and they are continually asking the questions: What do we have and what do we need? And how do we get what we need? They are initiating the essential research and concerted thinking which are preludes to sensible solutions of any legal problem. They are tapping resources few people knew we had. Such resources are illustrated by the studies in various areas of international law and relations which have been made by many great legal scholars over the years and then shelved to gather cobwebs and dust because their value was never before recognized.

The proposed Disarmament Agency and the program outlined go together. The Agency would put vast governmental resources to work doing things the private lawyers cannot do. Each should receive help and impetus from what the other does.

SAN ANTONIO, TEX., *August 18, 1961.*

The Honorable HUBERT H. HUMPHREY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HUMPHREY: Although clouds of war darken the horizon of human life in many parts of the world and our country must continue to be strong in order to defend freedom and the rights of man wherever they are threatened, we must nevertheless stand ready to join with other great powers to reduce the burden and the hazard of military armaments if and when prudence and wisdom permit such a course of action.

As long ago as December 31, 1918, His Holiness Pope Benedict XV, addressed a letter to the American people in which he expressed a fervent desire for an international organization which "by abolishing conscription would reduce armaments, by establishing international tribunals will eliminate or settle disputes, and by placing peace on a solid foundation would guarantee to all independence and equality of rights."

It is therefore a cause of satisfaction to all peace-loving men throughout the world that our administration in Washington has drafted a bill, introduced by you in the Senate, to establish a U.S. Disarmament Agency, the purpose of which shall be to make every possible effort in accord with other nations to bring about world peace and security through the reduction of armaments. This objective is sacred, holy, and imperative. May God grant that through your efforts and those of your associates the human race may be spared the dreaded holocaust of another devastating war.

Very sincerely yours,
Most Rev. ROBERT E. LUCEY,
Archbishop of San Antonio.

SAN ANTONIO, TEX., *August 28, 1961.*

Hon. HUBERT H. HUMPHREY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HUMPHREY: Thank you for your letter of August 21. Herewith I enclose a statement on the proposed U.S. Disarmament Agency which you may use as you see fit.

At a time when the free nations are rapidly arming to defend themselves against the unprovoked aggression of the Soviet Government, it may seem fantastic that intelligent men should seriously consider a program of disarmament but there are compelling reasons why all the great powers should attempt a mutual and fairly apportioned reduction of armament because the progress, prosperity, and survival of the world community are imperiled by the present formula of international relations based on a balance of terror and annihilation. It is the duty and privilege of our country as the last bulwark of human freedom to search out and make available to the world those imperatives of disarmament.

Very sincerely yours,
Most Rev. ROBERT E. LUCEY,
Archbishop of San Antonio.

SEPTEMBER 5, 1961.

The Most Reverend ROBERT E. LUCEY,
Archbishop of San Antonio,
San Antonio, Tex.

DEAR ARCHBISHOP: Thank you very much indeed for your letter of August 28, and the enclosed statement regarding S. 2180, the Disarmament Agency bill.

Your words of wisdom are a clear indication of why the establishment of an agency would be such a desirable step. I appreciate receiving your wonderful statements of support, and am grateful for your kindness in writing.

Sincerely,
HUBERT H. HUMPHREY.

WEBB & KNAPP, INC.,
New York, N.Y., August 22, 1961.

The Honorable HUBERT H. HUMPHREY,
U.S. Senate, Washington, D.C.

DEAR SENATOR HUMPHREY: It was very thoughtful of you to take the trouble to send me the information contained in your letter of August 18 and I am flattered that you asked for a comment about this legislation.

I heartily endorse the objectives of this legislation. It is recognized by men of intelligence all over the world that fantastic horrors await mankind as well as the planet itself unless a comprehensive and energetically pursued plan for disarmament is forthcoming from all nations of the world. This observation is obviously platitudinous, but the truth can't ever be repeated too often. Armament is becoming such a tremendous factor in the economic bloodstream of the Nation that labor and industry will no doubt fear the impact of large scale disarmament.

It is impotrant that particular stress be made on that aspect which is identified by No. 8 on page 4 of the draft concerning "Facts About the Proposed U.S. Disarmament Agency for World Peace and Security." Total comprehension by all facets of the American economy must be part of an education program to coincide with the effort. Ideas of disarmament must be sold to the American people not just based on fear of the consequences from nuclear war but also through explanation of the end result upon their standard of living. However, true it may be that moneys put into armament is wasted and therefore deflationary on the standard of living, the average person looks upon armaments more as a boom to the economy than any other factor. From the long range standpoint, this is obviously not the fact. The facts have to be sold to the every day citizen or the legislation will not get anywhere.

I extend every good wish to this new and most essential legislative effort on your part.

Kindest regards.

Sincerely yours,
WILLIAM ZECKENDORF,
President.

ASIATIC PETROLEUM CORP.,
New York, N.Y., August 25, 1961.

Senator HUBERT H. HUMPHREY,
U.S. Senate, Washington, D.C.

DEAR SENATOR HUMPHREY: Your letter of August 18 addressed to Mr. Barran was not forwarded to him as he has now resigned the presidency of this company to take up one of the managing directorships of the Royal Dutch/Shell group in London and, in the absence of his successor, Mr. A. S. C. Hulton, I am very pleased to acknowledge the interesting material which accompanied

your letter and which related to the formation of the U.S. Disarmament Agency for World Peace and Security.

Speaking on behalf of the Royal Dutch/Shell group of oil companies with its widespread international interests, I have no hesitation in saying that we shall welcome the new Agency, both for the concentration it will be able to effect of the U.S. effort toward securing general reduction of armaments, and for the evidence it will provide to the whole world that this country is dedicated to a reduction of international tensions, which are the inevitable concomitant of competitive armament establishments.

That the United States is able at this particular moment of heightened international strain, to devote its administrative capacity and legislative time to setting up the new Disarmament Agency, is further convincing proof of our objectivity and of our concern for the welfare of humanity.

If this company can be of assistance in providing statistical or technical data for the new Agency when it gets into its stride, we shall be happy to do so, and perhaps the director, when he is appointed, could be so imformed.

Very truly yours,

G. G. THOMSON, Jr.,
Vice President.

AMERICAN MACHINE & FOUNDRY CO.,
Washington, D.C., August 29, 1961.

Senator HUBERT H. HUMPHREY,
Committee on Foreign Relations,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HUMPHREY: Your letter August 18. I heartily agree with the necessity for a U.S. Disarmament Agency. In my experience with disarmament negotiations, and my observation of later attempts, I was struck by the lack of continuity of personnel and the absence of agreed policy. It is perhaps the case, as Walter Lippmann has pointed out, that progress in disarmament must await political settlements and softening of bellicose attitudes to the point where disarmament would take place automatically. This view implies that any disarmament conversations are presently futile, and perhaps this is the case. But such a conclusion should be reached, if at all, by a fully qualified group after exhaustive study of the problems involved. If it should not prove to be the conclusion, it would be wise to be thoroughly prepared to negotiate when an opportunity arises.

Surely we cannot expect the Russians to enter seriously into negotiations and refrain from using them as propaganda forums, if we continue to send "pickup" teams who have in many cases failed even to consult with their immediate predecessors and who are not equipped with agreed policy instructions.

It is significant that when Mr. Stassen was appointed, the Russians took him seriously and for nearly 3 years seemed to be negotiating in good faith. I have always attributed this to two facts: (1) That his title was Assistant to the President for Disarmament and (2) that, at that time, he enjoyed certain political stature in his own right. When his position was weakened, the Russians at once concluded that this was only a repeat performance of previous negotiations and went at once into an intense propaganda phase which excluded all practical results.

If continuity of effort can be assured by the Disarmament Agency as envisaged by you, it seems to me that it should be formed as promptly as possible and that every effort should be made to keep it dedicated to its worthy purposes.

Sincerely yours,

MOREHEAD PATTERSON.

CINCINNATI, OHIO, *August 28, 1961.*

The Honorable HUBERT H. HUMPHREY,
U.S. Senate,
Washington, D.C.

MY DEAR SENATOR HUMPHREY: I thank you for your courtesy in sending me information on the proposed legislation to establish a Disarmament Agency in the U.S. Government, and for your request in respect to favorable intervention in providing public support for the measure.

As indicated in your letter, the issue is a very complex one and does need penetrating study. Obviously it is inseparably related to the entire peace program, and, it seems to me, subordinate to and consequent upon political solutions in the first instance. That it deserves specific treatment, however, seems to me equally obvious. Timing is also a most important factor in securing favorable attention and action.

Not being familiar with the intricacies of the Government peace program and its correlation with other activities, I do not consider myself competent to express a sure or well informed judgment in the matter. I am wholeheartedly in favor of disarmament under proper conditions, but regret that my lack of adequate knowledge precludes a definite position as to the best methods to secure the desired objective.

Please give my greetings to Father Conway.

With best wishes, I am

Sincerely yours,

KARL J. ALTER,
Archbishop of Cincinnati.

THE CATHOLIC REPORTER,
Kansas City, Mo., August 28, 1961.

Hon. HUBERT H. HUMPHREY,
Committee on Foreign Relations, U.S. Senate, Senate Office Building, Washington, D.C.

DEAR SENATOR HUMPHREY: Thank you for the materials explaining the purpose and contents of S. 2180, the Disarmament Act for World Peace and Security, which you have introduced in the Senate. As a vice president of the Catholic Association for International Peace, a member of the International Relations Council of Kansas City, and as editor of the Catholic Reporter I wish to express unreserved support for the bill and urge its passage this session.

Policy needs instruments. We can proclaim forevermore that we value peace above all things, but unless we create tools adequate to the task of building peace, these proclamations will seem—and be—mere ritual pieties. Arms control will be of course most difficult of achievement; all the more reason, then, for pursuing it by the most effective means. From an examination of the materials you have provided, it is clear that the step you propose represents a great advance over previous conditions.

A single government agency provided with adequate staff and authority can meet many urgent needs; as an editor, I am most struck by the need for better information. Without greater public understanding of both the political and technical aspects of disarmament and arms control, our Government is seriously handicapped in negotiations, as well as in conveying to the world the true ends of American policy. The very existence of the agency which S. 2180 proposes will serve to focus the attention of journalists, and therefore of the public, on this complex problem.

We have already indicated our interest in and support for S. 2180. I enclose a tear sheet of the front page of our most recent issue, which gives prominent notice to the efforts of the Catholic Association for International Peace to obtain legislative and public support for the bill.

Also enclosed are clippings of articles by two of our columnists dealing with the necessity for coordinated governmental action in the field of disarmament. One of these articles, written by Norma Krause Herzfeld, was quoted from extensively in the testimony of Dr. William Nagle, representing the Catholic Association for International Peace before your committee.

We expect to give further editorial support for S. 2180. Thank you again for explaining so fully the background of this constructive and vitally needed piece of legislation.

Sincerely,

ROBERT G. HOYT,
Editor.

[From the Catholic Reporter, Aug. 25, 1961]

CATHOLIC PEACE GROUP FOR DISARMAMENT AGENCY BILL

WASHINGTON, D.C.—World tension over the Berlin crisis makes the creation of a U.S. Disarmament Agency more important than ever, a Catholic spokesman told Congress.

The spokesman said that quick congressional action toward coordinating U.S. disarmament efforts would have a salutary effect on world public opinion by giving evidence that even in a time of crisis American policy is to press for an end to the arms race.

Appearing before the Senate Foreign Relations Committee, Dr. William J. Nagle spoke on behalf of the Catholic Association for International Peace. He said the CAIP endorses "with enthusiasm" a bill (S. 2180) which would establish the agency.

Nagle is chairman of the association's committee on morality and warfare. He is director of a private research organization and editor of a recent volume of essays dealing with Catholic views on moral problems of modern warfare.

Nagle said the lack of clear-cut authority and responsibility for coordination of disarmament policies within the Government has proven a major handicap to our disarmament efforts. A single, central agency would also be able to make more effective use of disarmament studies carried on by university research centers, he said.

Setting forth the CAIP position, Nagle quoted frequently from a column by Norma K. Herzfeld, Washington correspondent for the Catholic Reporter. Mrs. Herzfeld is a former CAIP vice president and former committee secretary for the organization.

Mrs. Herzfeld wrote: "We have kept no more than a handful of experts working—usually part time—on disarmament proposals, implying that we give less importance to this subject on high Government levels than to the matter of starling removal in the District of Columbia."

She said that internal disagreements among the armed forces, CIA, Atomic Energy Commission, and the State Department have frequently kept the United States from making important policy decisions, and this at times when agreement seemed possible with Russia.

She charged also that Government authorities "have never sought to inform the U.S. public on the meaning of arms control and the degree of our own national sovereignty which would have to be given up for an enforcible system of inspection and control."

Nagle said the CAIP urges "as strongly as it can" that Congress pass the bill before the adjournment of the current session.

"Passage of the bill would provide an excellent complement to the President's speech on Berlin and to our present arms buildup. In our concern over Berlin, we must not lose sight of the long range advantage in world public opinion that would accrue to the United States if we passed the bill creating the disarmament agency within the next month."

U.S. DISARMAMENT AGENCY
(By Donald McDonald)

It may seem incredible, but it has taken our country 16 years—from the dropping of the first atomic bomb until now—to create a special, permanent agency for disarmament, thereby serving notice on the world that we propose to make a sustained, organized, and systematic effort leading to eventual universal disarmament.

The agency has not yet been established. But the necessary legislation has been introduced by Senator HUBERT HUMPHREY, of Minnesota, and Representative THOMAS E. MORGAN, of Pennsylvania. It has bipartisan support and seems assured of passage if the House can make room for it in the crowded, closing weeks of this session of Congress.

For 16 years the disarmament problem has been treated by both the Truman and Eisenhower administrations in a spasmodic, haphazard manner. It has at times been oversimplified, at other times distorted (e.g., certain propagandists have persistently deceived the American people by pretending that all American advocates of disarmament favor unilateral disarmament by the United States which would indeed, if true, be a foolish and dangerous position).

At one time, Mr. Eisenhower (or was it Sherman Adams?) found a little office in the White House for Harold Stassen and installed him as the nation's disarmament expert. But when Mr. Stassen began delving into some of the ramifications of disarmament and began seriously negotiating with Russia, Britain, and France in London, his job and his office were dissolved.

This is not, mind you, a matter of the disarmament sincerity of Mr. Eisenhower or the late John Foster Dulles, or of Mr. Truman who accomplished little more.

The deficiency, I think, has not been one of sincerity, but rather of imagination and intellectual power, together with conviction and confidence that what must be done—i.e., universal disarmament, and the establishing of world peace and world order—can be done.

All of these qualities of mind and heart must be present in any President and his administration if they are to overcome the inherent difficulty in disarmament—that is, the formidable psychological task of mounting and sustaining total disarmament effort at the same time that the nation must be totally committed, for sheer survival reasons, to an all-out armament program.

What a nation can accomplish in disarmament planning and negotiating is related, of course, to the climate of public opinion in the country. But the Government itself can influence that public opinion, for or against disarmament, by what it says, how it acts, how much official concern it shows for the problem.

If the proposed U.S. Disarmament Agency for World Peace and Security is merely the latest move in the international propaganda game, if it is to be staffed by people with anything less than total conviction about the urgency of universal disarmament, and if it is to be bypassed by Government officials who have for years dismissed disarmament as the dream of naive idealists, then we shall be no closer to realistic disarmament than we have been since 1945. And we shall leave public opinion both cold and uninformed about the possibilities and the urgency of disarmament.

I bring up these hypotheses not because I think they correspond to present reality but because they reflect some of the inhibiting conditions that surrounded our disarmament efforts in the past.

Secretary of State Dean Rusk's statement on the agency to the Senate Foreign Relations Committee encourages hope that at last the United States is going to take more than a stop-and-go interest in the No. 1 problem in the world today.

He avoided (properly, perhaps, in that context) the matter of whether universal disarmament can be negotiated and enforced outside a worldwide legal and juridical structure.

But Mr. Rusk is aware of the seeming paradox and internal conflict of working simultaneously for disarmament and armament. Aside from the political and ideological conflicts in the world, he said, "the arms race itself creates an element of instability and insecurity."

We cannot, he said, let the "recurrence of (political and military) crises prevent us from addressing ourselves to the kind of world we hope to see."

Our Disarmament Agency can be immensely useful on the technical level alone—for there is a vast amount of scientific, military, political, and economic matter that must be absorbed, sifted, correlated and passed along to Mr. Kennedy and Mr. Rusk.

But were the President and the Secretary to limit the agency's usefulness to the technical, they would limit disarmament itself and limited disarmament, like limited war, is a snare and a delusion. We have grounds, I think, to hope that this will not be the fate of our first permanent governmental agency for disarmament, world peace and security.

TIME, INC.,
New York, N.Y., August 22, 1961.

The Honorable HUBERT H. HUMPHREY,
U.S. Senate, Washington, D.C.

DEAR SENATOR HUMPHREY: Thank you for your letter about disarmament and for the informative material about pending legislation to provide for a U.S. Disarmament Agency.

It seems to me that the establishment of a U.S. Disarmament Agency is both proper and necessary.

This subject of disarmament is an immensely complicated one and therefore requires the continuous attention of experts. It also requires, from time to time, prompt decisions which can only be made by the President on the advice of a public office in whom he has confidence.

Your efforts to establish this much-needed Agency have my wholehearted support.

With kindest personal regards,

Sincerely yours,

HENRY R. LUCE.

FORD MOTOR CO.,
Dearborn, Mich., August 24, 1961.

The Honorable HUBERT H. HUMPHREY,
U.S. Senate Committee on Foreign Relations, Washington, D.C.

DEAR SENATOR HUMPHREY: I thank you for your invitation to express my views concerning S. 2180, the bill introduced by you and a bipartisan group of Senators to establish a U.S. Disarmament Agency. I do not, as you will understand, feel competent to comment on the specific provisions of the legislation, but I do support its underlying objectives.

In a world faced with the constant threat of annihilation, I believe we must do all in our power as a nation to develop techniques for the accomplishment and maintenance of disarmament in order to avoid the madness of nuclear war. Although we have been forced by threats to our security to step up our defense preparedness, I see no reason, either psychological or practical, to delay reasonable moves designed to improve and coordinate disarmament efforts.

Very sincerely,

HENRY FORD.

Mr. HUMPHREY. Madam President, I have before me a very large number of editorials in support of the proposed legislation which have been published in newspapers all over the country. I shall not ask that all the editorials be printed in the RECORD. Instead, I merely refer to them now; but I should like to have my colleagues read some of them. According to the Legislative Reference Service of the Library of Congress, the editorial comment published in the Nation's press runs overwhelmingly in favor of the bill. I ask unanimous consent that certain selected editorials be printed at this point in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Miami Herald, July 1, 1961]

WORLD ARMS AND A MAN

Great things sometimes come about through slow, patient, steady chipping away at obstacles in the path of human progress.

One of these could be some semblance of world peace with justice and security through effective disarmament. If such a thing should come to pass in our time its instrument might well be the U.S. Disarmament Agency for World Peace and Security.

President Kennedy has appointed John J. McCloy, his adviser on disarmament, to head the Agency and has asked Congress for approval.

In defining his objective the President said:

"Peace cannot be brought about by concentrating solely on measures to control and eliminate weapons. It must also encompass measures to sustain and strengthen international institutions and the rule of law. A disarmament program must take into account the national security, our foreign policy, the relationship of this country to international peace-keeping agencies, including the United Nations, and our domestic economic and other policies."

So the order is large for this distinguished soldier, lawyer, banker, and onetime U.S. military governor of Berlin. Mr. McCloy would not only keep tab on the world's weaponry and urge its eventual reduction but he would also help formulate policy and conduct negotiations.

At this uncertain juncture in world history talk of disarmament may seem futile.

By some gloomy but perhaps not unrealistic estimates, the United States and the Soviet Union are headed on a collision course over Berlin.

Yet it is the business of moral man to seek alternatives to force and violence if civilization may be saved from the ultimate weapons of destruction now available, let alone upgraded by disarmament.

This effort started in the Eisenhower administration and has been translated into greater from and substance by President Kennedy.

While it is unlikely to budge monolithic communism tomorrow or the next day, it does tell the world that the United States has no designs on anybody else but has instead an imaginative program which, bit by bit, could supplant the cruel arbitrament of war.

This will not fail to have an impression on nations, some of them in the Soviet bloc, which may well wish to be let alone.

If this indeed is its only immediate effect, it would merit the congressional seal of approval.

[From the Atlanta Journal and the Atlanta Constitution, July 2, 1961]

THE PROPER FOUNDATION

The loftiest aspiration of mankind is to realize a world without the burden and peril of national armaments. There have been some halfhearted and fatuous attempts to bring it about, but for the most part disarmament has been too utopian a concept

for serious consideration by a cynical and suspicious world.

The development of mass-destruction weapons has dragged disarmament discussion from the realm of the visionary to the plane of practical necessity. The wishful thinkers of today are those who believe the present nuclear stalemate can somehow last forever.

Disarmament experts believe that each time another nation joins the atomic powers, the danger of nuclear war increases in geometric proportion, i.e., it is a matter of multiplication, not simple addition. Herein lies the real danger of a continued arms race. It threatens the Communist world as much as the free world.

The world has been dabbling in disarmament discussions for the past few years, but nothing hopeful has emerged. President Kennedy's recommendation for a new agency to study arms control is a bold attempt to melt the glacier. Heretofore, disarmament talks have assumed the form of diplomatic bargaining sessions. They have lacked the technical or even theoretical knowledge to proceed wisely.

What is needed, according to the President's disarmament adviser, John J. McCloy, is data concerning "scientific and technical assessment of all aspects of arms control, detection, identification, inspection, monitoring, limitation, reduction, and control of armed forces and armaments."

This is the kind of serious study needed to put some flesh on the hitherto bony structure of disarmament talk.

[From the Atlanta Constitution, July 3, 1961]

WORTH SOME RESEARCH

President Kennedy's proposal to set up a "peace agency" to work toward a society in which disarmament would be "the accepted condition of international life" is worth a try. Certainly in a world in which a major war no longer would profit anybody, peace is a necessity for survival of mankind and all his painfully built institutions.

After more than a decade of negotiating with the Soviet Union, for instance, we are no nearer the goal of disarmament than before. The classic jockeying for position continues. The backbreaking burden diverts constructive energies and funds into destructive instruments of war.

While we spend billions on research and development of weapons to destroy our enemies and to protect ourselves, research into the problems of disarmament and of achieving peace has been negligible. Compared to most agencies, the disarmament commission itself is a skeleton crew. Our approaches remain the same.

"Today ability of man to master his environment threatens to outpace his ability to control himself," the President said in his special message to Congress. Unless a way is found to bring about such control, the end could be destruction of the human race.

[From the New York Times, June 30, 1961]

AN AGENCY FOR DISARMAMENT

Disarmament is not just a matter of passing resolutions and getting other governments to sign them. The process of laying down arms if ever the world arrives at it, will shake society to its foundations—beneficially but nonetheless vigorously. This is the problem that John J. McCloy has been studying for President Kennedy ever since last January, and for which the President proposed a new agency in the message he sent to Congress yesterday.

"Peace," as the President put it, "cannot be brought about by concentrating solely on measures to control and eliminate weapons. It must also encompass measures to sustain and strengthen international institutions and the rule of law. * * * It should drive toward the creation of a peaceful world society in which disarmament, except for the forces needed to apply international sanctions, is the accepted condition of international life."

Mr. McCloy, who is an old and wise hand in this field, drafted the pending bill after agreement with the Secretary of State, the Secretary of Defense and the heads of other interested agencies. It does not seem that there can be many agencies in the Government which might not be in some way affected. Disarmament is a part of foreign policy, a part of defense, a part of our economic life, a possible part of our whole way of living. It is not, as the President and Mr. McCloy make clear, a simple matter of stacking arms. There must be research, development of methods, studies of what William James long ago called the moral substitute for war. Disarmament involves all the physical sciences and most of the political and psychological sciences. It includes countless details—what Mr. McCloy calls the "detection, identification, inspection, monitoring, limitation, reduction, and control of armed forces and armaments and the development and test of weapons."

There is no comparable agency in the world. If this is authorized by law and supplied by adequate appropriations, it could be one of the keys to the future. A prompt and generous response by Congress might not wake the Russians and the Chinese from their monstrous dream of world domination. But it would say to all humanity that we reject the form of collective suicide called war and that we truly believe in the possibility as well as the desirability of peace.

[From the Washington Post, July 2, 1961]

AGENCY FOR PEACE

The Disarmament Agency for World Peace and Security which President Kennedy has asked Congress to create would embody American hopes in the same way that our atomic stockpile embodies our fears. Notably, there is broad bipartisan support for establishing an agency which would propose and negotiate arms control plans, and which would conduct research on the manifold implications of disarmament. In the breadth of its concern, the new agency would be unique in the world. It should have been created long ago.

At the moment, the prospects in Geneva for even so minimal a first step as a nuclear test ban are scarcely cheerful. This is no reason why the United States should not make an extra effort to demonstrate its earnest intent. Indeed, the present impasse provides all the more reason why the United States should try to lift the eyes of the world to a future in which the new agency's name would be more than a hollow slogan. Ideas planted now could be available for harvest in a saner future.

Americans do not need to be convinced of the bad faith and even perfidy of our Soviet adversaries. But to much of the world, it has often seemed that this country was as much afraid of a possible thaw as the Soviet Union. Too often, the United States has been in a negative position, and has abdicated to the Communists the initiative in proposing disarmament plans. The new agency offers a chance for America to make more emphatic its dedication to the proposition that there is nothing inevitable about war.

John J. McCloy, the President's disarmament adviser, is as aware as any American of the frustrations of trying to negotiate with the Soviet Union. That the outline for the new agency was prepared by Mr. McCloy offers assurance that there is realism as well as hope in the proposal. Prompt congressional approval could give new resonance to the voice of America, and impart new energy to the quest for peace.

[From the Denver Post, July 9, 1961]

PEACE AGENCY PLAN DESERVES SUPPORT

An important new bill, sent to the Congress last week by President Kennedy, begins with this declaration of purpose:

"An ultimate goal of the United States is a world which is free from the scourge of war and the dangers and burdens of armaments; in which the use of force has been subordinated to the rule of law; and in which international adjustments to a changing world are achieved peacefully. It is the purpose of this act to provide impetus toward this goal by creating a new agency of peace to deal with the problem of disarmament."

The "new agency of peace" contemplated in the bill would be called the U.S. Disarmament Agency for World Peace and Security. Its director would report directly to the President and the Secretary of State and meet with the National Security Council.

The Kennedy proposal, prepared after 5 months of study by the President's disarmament advisor, John J. McCloy, is a constructive move to bring new order and effectiveness into the U.S. disarmament effort.

The new agency would conduct and promote disarmament research; prepare for and conduct disarmament negotiations; disseminate public information on disarmament and participate in any international disarmament control machinery that may be developed.

Most important, it would coordinate the efforts of experts in Government agencies, universities, and private foundations to find answers to difficult disarmament problems.

Compared to the billions the United States has spent to build its military strength, the effort it has made to study steps toward disarmament has been relatively modest.

At this stage in the cold war, when the Soviet Union behaves with maximum intransigence, disarmament may not appear to be a fruitful field.

But the new agency is designed for the long pull. The studies and the planning it does now may prove useful at some point in the future when world conditions are more favorable.

If, through some sudden or gradual shift in policy, the Communists become serious about disarmament with adequate safeguards, the United States should have the facts on hand and the proposals in mind to make new disarmament negotiations productive.

Even as our country builds its military strength, it must continue to explore all avenues to peace.

The United States needs the new agency the President has proposed. We hope Congress will give the disarmament act a speedy approval.

[From the San Francisco Chronicle, July 5, 1961]

PLANNING AHEAD ON DISARMAMENT

President Kennedy has called for establishment of a U.S. disarmament agency for world peace and security, so constituted and staffed as to assure the most intensive assault ever made by this or any other nation on the diffuse and complex problems of disarmament and world peace.

The great and wide-ranging responsibilities of such an agency have been noted by John J. McCloy, the President's disarmament adviser in submitting the outline for its organization; "A disarmament program," he said, "must take into account the national security, foreign policy, the relationships of this country to international peacekeeping agencies including the United Nations, and our domestic economic and other policies."

Thus he recommends that the agency not only recruit its own staff of men skilled in these diverse fields, but that it also "utilize

private or public institutions" for research and development relating to disarmament, and that it further be provided with "an advisory committee of outstanding citizens."

It is conceded that such an organization, however well nourished by funds, talent and energy, constitutes no guarantee that its mission will be accomplished. But the attempt should certainly be undertaken. Congress will in no wise affront public opinion by providing the necessary authorization and appropriations. For the goal ("to prevent war, curb the arms race and create lasting conditions of peace," in the words of Mr. McCloy), is beyond price and well worth the seeking.

To succeed would be to confer upon the world the greatest single boon no conceivable—an end of war and threats of war and of the constant drain of treasury, talent and nervous energy that the primitive threat of war inescapably imposes.

Nor would lack of success constitute absolute failure. By the mere embarkation upon a vigorous quest for disarmament and peace, the United States will manifest the utter sincerity of its often professed yearning for a renunciation of war and a world order founded on the rule of law.

[From the Minneapolis Star, June 30, 1961]

A Good Way To Lead

Those who favor increased American efforts to work out an enforceable disarmament agreement with the other nations of the world often have criticized the lack of attention the United States has paid to this important subject.

They have emphasized that the United States has been spending more than $40 billions a year on various kinds of defense programs, but at the same time our Government has been devoting less than $1 million a year to disarmament studies.

Now, however, the United States will have the opportunity to put new emphasis on this important subject of disarmament if Congress accepts President Kennedy's request to establish a permanent U.S. disarmament agency.

This U.S. disarmament agency for world peace and security would be charged with the duty of finding methods to check the world arms race and the means to enforce any agreements reached. It would be a sub-Cabinet level organization, but responsible to the President. Thus it would occupy a more important role than the U.S. disarmament administration President Eisenhower created in the State Department.

The new proposal stemmed from studies made by John J. McCloy, President Kennedy's special adviser on disarmament. McCloy said the plan also is supported by the heads of the State and Defense Departments, the Atomic Energy Commission, and other interested Government agencies.

In view of the fact that the U.S. attitude toward the Soviet Union is stiffening on Berlin and perhaps on other issues, it is essential that the United States prove to the world at the same time that it still is devoted to the goal of arms control and disarmament.

One way to emphasize our peaceful intentions to the world would be for Congress promptly to accept the President's recommendations to establish the disarmament agency. If Congress acts soon, the United States could become the first nation in the world to set up such an agency on a permanent basis. This certainly would be a useful field in which to take the lead.

[From the Christian Science Monitor, July 1, 1961]

Emphasizing Peace Planning

This newspaper has long held that the United States should reduce the disparity between its arming and disarming efforts. Last year we pointed out that Congress was haggling over a project to spend $400,000 on better arms control plans at the same time it was ready to boost the $40 billion defense budget. Now we are pleased to see the President recommending a separate Disarmament Agency.

For the sake of honest labeling we should prefer to see it called an arms control agency. For disarmament usually suggests the chimerical "total and complete disarmament" which is one of Mr. Khrushchev's deceptive propaganda gambits. However, the essence of the new proposal is the increased stature and efficiency of American planning for peace. For while arms control is not a synonym for peace it can be one step toward peace.

The project is not as new as it may appear. President Eisenhower set up a less formal effort when he made Harold Stassen his special adviser on disarmament. Mr. Kennedy had already given the subject extra attention by enlisting the services of John J. McCloy, Paul Nitze, and Jerome Wiesner for work on arms control. The proposed Agency would go at least two steps further.

It would give the Agency direct access to the President and coordinate work now spread out in several departments. Its tasks are set forth as research into technical, economic, and political measures for arms control, the formulation of disarmament policy recommendations, and the conduct of negotiations. Presumably these functions would be carried out in close liaison with the State and Defense Departments and congressional committees.

Mr. McCloy and his aids are convinced the separate Agency plan has practical organizational advantages. In addition there is a symbolic gain in advancing the status and importance of the U.S. official instrument seeking arms control. In much of the uncommitted world and even among some allies too many people believe the United States is obsessed with weapons. It is well that more of the effort and ingenuity devoted to their development should be turned to devising means for their control.

To proposals for a Peace Department in Washington it has long been answered that the State Department is constantly engaged in peace seeking. But its prime commitment is to upholding America's position in the world, less visible to controlling the horrendous war instruments which shadow today's world.

The President sets a noble goal in saying that "a disarmament program * * * should drive toward the creation of a peaceful world society, in which disarmament * * * is the accepted condition of international life." We incline to the view that disarmament of the evil impulses which would launch the aggressive use of arms is even more vital than the physical control of arms. But peace should be pursued on both roads and we welcome this fresh emphasis on curbing weapons.

[From the Oakland (Calif.) Tribune, Aug. 16, 1961]

One Agency We Could Use

The Senate Foreign Relations Committee today ends hearings upon one major measure that is unique in at least one respect. It calls for a reduction in the number of agencies dealing with a single subject. It is, in a minor way, a reversal of the trend toward more bureaucracy.

The bill is that which calls for the establishment of a permanent Government Disarmament Agency, and is one asked for by President Kennedy, and earnestly supported before the committee by Secretary of State Rusk and Disarmament Adviser John J. McCloy. It would consolidate all disarmament activities under a single director and his staff. At present, at least seven different agencies have a voice in disarmament proceedings and policy.

We are inclined to agree that is six too many. If the proposal would serve the purpose its backers say it will, perhaps it could serve as a precedent and get things rolling toward cutting into the ranks of bureaucracy in other areas.

The Kennedy proposal does not exactly have bipartisan support, but GOP Senate Leader Everett Dirksen said the Republicans are agreed that something must be done. That is scarcely a direct endorsement of the measure but indicated there would be no organized GOP opposition.

It was McCloy who told the committee that trying to get something done toward a definite disarmament commitment "is like walking through deep mud" because of the number of agencies involved.

If this bill holds promise of taking us out of the disarmament slough then let's have it.

[From the Champaign-Urbana (Ill.) Courier, Aug. 18, 1961]

Disarmament Group Needed

The bipartisan support for President Kennedy's proposed high-level disarmament agency has been enthusiastic, but while the plan itself sounds good, its practical value has yet to be demonstrated.

There can be no doubt that the establishment of a Government agency devoted to disarmament is a good idea. Its list of supporters, including former President Eisenhower, Henry Cabot Lodge, former Defense Secretary Thomas Gates, and a host of Republican Congressmen as well as Democratic leaders, attests to the fact that hardly anyone is adverse to the idea.

But whether in fact it can accomplish anything is another question. As conceived by the administration the new department would be composed of approximately 250 scholars and scientists operating on a $6 million budget who would advise the President on disarmament policy and conduct negotiations with foreign powers. The agency's Director would sit with the National Security Council when disarmament matters were under discussion.

The difficulty with programs and planning of disarmament, however, is not the lack of method or a dearth of qualified negotiators. It is a matter of the Russians being unwilling to accept any plan not designed to further their ambitions.

Conceivably there are ways, yet unexplored, that might satisfy both sides. But the West should be at work now devising these. While a disarmament agency would bring a certain amount of expertness to the task, it would be just another voice to be heard by the President who is perhaps being counseled by too many voices with too many different ideas already.

It is difficult to take a negative attitude toward creation of an agency devoted to peace, especially with an imposing list of experienced public men favoring it and the necessity of bringing about an end to the arms race.

But in the United States the easy way out has always been to turn matters over to a new agency where important issues sometimes are shuffled aside in favor of clearing away minute details.

When someone offers facts rather than generalizations in the support of a disarmament agency, the real need for it can be properly evaluated. What has been said in its behalf thus far, that there is need for world disarmament and American leadership in it, are merely truisms that do not justify burdening the executive branch of Government with still another stable of experts.

[From the South Bend (Ind.) Tribune Aug. 16, 1961]

SEARCH MUST GO ON

If President Kennedy has his way, Congress will in its current session create a "national peace agency" bearing the formal title of the U.S. Disarmament Agency for World Peace and Security. It would have top-level responsibility for all U.S. disarmament activities. It would be semi-independent, under the direction of the President and Secretary of State.

Whether this new approach will be any more successful than previous efforts to start the ball rolling toward practical disarmament remains to be seen. There can be no doubt, however, over the question of whether this is the time for continued action along this line or whether further efforts aimed at disarmament should be abandoned until things quiet down on the international scene. The United States must champion the cause of disarmament at all times, even when it is beefing up militarily as it is now to face a potential emergency.

Democrats and Republicans are in agreement on this.

The proposed agency, in fact, would supercede one set up last September by President Eisenhower as a division of the Department of State. It would have a staff at least three times the size of the Eisenhower disarmament administration staff and, if President Kennedy's proposal is approved, have $6 million to work with compared with $800,000 as the yearly budget of the disarmament administration.

The presence of the agency is intended to make certain that research on inspection and detection systems and all political, military and economic aspects of disarmament continue on a planned and orderly basis. This is intended to guarantee that workable disarmament plans could be ready at any moment that tensions have eased or there is evidence of possibility of reaching substantial international agreements.

There is, of course, little if any evidence to indicate that a breakthrough may be forthcoming on the disarmament horizon. The Soviet Union and the West are poles apart on even a treaty to ban further nuclear weapons tests. And the Russians walked out of the 10-nation disarmament conference at Geneva. Red China, meanwhile, stands in the wings trumpeting the inevitability of war between capitalist society and the Communist bloc.

Nevertheless, the United States must keep trying. To give up would only encourage the Reds to crank up to a new high pitch their propaganda that the U.S.-led free world is a warmonger in peace's clothing. Somehow we must seize the initiative and hold it.

[From the Topeka (Kans.) State Journal, Aug. 12 1961]

KENNEDY'S PEACE AGENCY

Former President Eisenhower's support of President Kennedy's proposal to create a permanent Peace Agency may be just the boost needed to push it to reality.

An article copyrighted by the New York Times news service says "endorsement by the Republican leader is being regarded within the administration and among Capitol Hill Democrats as a key factor in the struggle to tip the balance in favor of congressional enactment * * * at this session of Congress."

As proposed by the Kennedy administration, a semi-independent agency would be created to have primary responsibility for drafting disarmament proposals and conducting research on arms control. It would be known as the U.S. Disarmament Agency for World Peace and Security.

We now have within the Federal Government the Department of Defense, with its subdepartments of Army, Navy, and Air Force. The addition of a "department of peace" would be a commendable force.

The movement has the mark of becoming a project for which the bipartisan support of both Republicans and Democrats may be obtained. This is as it should be, for peace and the goals of peaceful endeavor know no political boundary.

[From the Cambridge (Md.) Banner, Aug. 16, 1961]

DISARMAMENT AND THE BERLIN CRISIS

On the face of it there seems to be an inconsistency in the appeal to build up this country's military might and the appeal for more moves on the part of this country toward disarmament. However, Secretary of State Dean Rusk has pointed out that the Berlin crisis and the show of force there makes it even more imperative that Russia and this country jointly act to push toward disarmament.

Secretary Rusk has asked for a separate agency under joint direction of the President and the Secretary of State to place emphasis upon the eventual discarding of the awesome weapons that are now at the disposal of the big powers. Reason holds these weapons in check. But there is always the danger that desperation or fanaticism may turn them loose.

Progress toward disarmament has been at a pace hindered by many halts and the progress in building new and more terrifying weapons has outpaced the advances made toward keeping them in check. Secretary Rusk's appeal seems somewhat forlorn at this time. Yet the safety of the world rests in the possibilities that the nuclear weapons can be put out of reach of the desperate and the fanatic. Searching out any way for promoting disarmament is a course that must be promoted even when success seems to be most unattainable.

The Berlin situation calls for a mustering of military might. But even more it calls for any possible steps that might insure that the full force of this mustering be held in check.

[From the Boston (Mass.) Globe, Aug. 26, 1961]

MUCH NEEDED AT THIS TIME

The Berlin crisis makes it especially important at this time to convince the world the United States honestly desires peace and genuinely seeks to limit weapons by treaty. That was made clear by leading figures of the Kennedy and Eisenhower administrations who testified before the Senate Foreign Relations Committee in favor of the President's bill to create a semiautonomous Disarmament Agency.

Nikita Khrushchev's demands for total disarmament often sound in the ears of a world which seeks desperately to be relieved of the nuclear threat that the American insistence on inspection and other safeguards sometimes loses its appeal.

The establishment of a Disarmament Agency now would provide strong evidence that the United States means business, and would weaken Communist claims that the American policy in this field stems from the ambition of the Pentagon and arms manufacturers. If it should lead to the kind of comprehensive disarmament proposal that the Kennedy administration is preparing, with a view of an offer within a few months, the position of the United States before world opinion would be greatly improved.

Surely there is need of such an agency. With this country spending $47 billion on defense, the $600,000 it devotes to promoting weapons limitation looks very small. The appointment of Presidential disarmament advisers—Harold Stassen under Mr. Eisenhower and John J. McElroy under Mr. Kennedy—does not provide a balance. A permanent, continuing effort is needed.

The proposed Disarmament Agency would be subject only to the President and Secretary of State. It would offer salaries capable of attracting talent, but would cost only $6 million annually. It would keep records and plan a more positive approach—perhaps produce one providing effective guarantees that Russia might at some time accept. If there were undue military influence in promoting armament, such an agency could spot it. This bill should become law.

[From the Union, Springfield, Mass., Aug. 29, 1961]

TEST BAN STILL ON DEAD CENTER

The 337th meeting of the nuclear test ban negotiators at Geneva yesterday kept faith with the familiar pattern. The West, as it must, stuck to its demand for workable controls, and the Soviet Union was not impressed.

The United States and Britain shifted ground slightly in this latest resumption of the talks. Their offer to include even the small underground tests in the projected treaty was new. Previously, explosions below a given magnitude were to be excluded because of the difficulty, or impossibility, of detection by existing methods. But the new approach has the effect of further complicating the control issue, which has been the stumbling block during the 3 years of intermittent, fruitless talks. The Soviets still profess to fear that controls—with necessary inspection of suspected blast sites—amount to espionage. They insist on a veto power over inspections to be shared equally by the Communist, neutral and Western blocs.

President Kennedy did not send his negotiator, Arthur H. Dean, back to the Geneva conference table with any great hope of breaking the deadlock. Nor has he given any clear hints of response to mounting pressures for a resumption of American nuclear experimentation. He is staging a holding operation, keeping his man in Geneva and adhering to the voluntary moratorium so that the world cannot mistake which side is trying the harder to shape a world free from the threat of holocaust.

There is, apparently, no timetable; no designated point at which the administration will conclude that a treaty is hopeless and go ahead with fresh testing to advance the American nuclear arsenal and the peaceful uses of atomic energy. But the United Nations General Assembly reconvenes September 19, and the time-marking now should be geared to that schedule.

The United Nations as an agency and most of its members as individual nations have a vital stake in disarmament by the major powers. Their interest, unfortunately, is greater than their capacity to act in the face of Russian resistance. But the time is ripe to put the nuclear testing question before them with the utmost clarity and to make plain that if the United States resumes explosions in the future, it will not be because of our own reluctance to forge a workable, protected treaty.

Meanwhile, it is encouraging to note the support building up for the proposed U.S. Disarmament Agency and to hear less about shelving general disarmament altogether if a nuclear test ban fails. It is encouraging because disarmament should never drop from sight as a goal of civilized men, and the goal should be burnished frequently even in times of military stress.

The nuclear test-ban treaty will not flourish automatically by being transplanted

UNIVERSITY OF MICHIGAN LIBRARIES

from Geneva to New York. But the delegates in New York should know that peace and security are not flourishing either as long as they are dwarfted by a massive absence of desire in the East.

[From the New York Times, Aug. 17, 1961]

ARMING TO DISARM

Despite the new armament race precipitated by the Moscow-made Berlin crisis, the Kennedy administration urges Congress, with wide bipartisan support, to create a new Disarmament Agency for World Peace and Security. If that seems ironic at this moment, the irony lies not in the goals enumerated in the Agency's very name—that is, to state them in a different order, world peace, security, disarmament. These goals are now questions of life or death for all mankind.

The irony is rather that this new project must be launched in the face, even because of, the new menace emanating from Moscow, where a dictator hurls boastful threats of atomic annihilation against all standing in his way. This menace must be and is being met by increased Western armament designed not to wage war if we can help it but to maintain a balance of power adequate to deter reckless Soviet adventures and prepare the ground for disarmament.

For this menace cannot alter our basic policies and principles which aim, in the words of the United Nations Charter, "to save succeeding generations from the scourge of war." The Berlin crisis can only give new impetus to our longstanding efforts to reach that goal, and the new agency would be both a new proof of our sincerity and a valuable instrument.

Its purpose is to make broad-gaged studies of the complex political, technical and scientific problems involved in the three goals mentioned, to prepare new disarmament plans and to conduct disarmament negotiations with other nations. It is to be a semi-autonomous body of experts whose director would work under the overall direction of the President and, in matters of foreign policy, under the direction of the Secretary of State.

A good foundation for the Agency's work is already being prepared by John J. McCloy, the President's disarmament adviser, in the shape of a new "far-reaching and comprehensive" disarmament plan. But the first task of the agency would be, as it is of Government now, to break the deadlock on a nuclear test ban and general disarmament, on both of which the Soviets still seek to dictate their own terms in order to escape the first condition of any disarmament with security—namely, effective control.

But the Berlin crisis has again demonstrated that disarmament cannot be accomplished in a vacuum, that before it can even begin there must be at least a lessening of international tensions, and that after this it must go hand in hand with a peaceful solution of the world's major political problems. Disarmament is possible only in a world where peace prevails on the basis of just peace settlements, where the sanctity of international agreements, treaties and laws is respected, and where an international police force exists adequate to check any aggressor. That goal is still distant but not so distant as to warrant lack of effort to reach it.

[From the Trenton (N.J.) Times, Aug. 23, 1961]

DISARMAMENT AGENCY

Republicans testifying before the Senate Foreign Relations Committee have been unanimous in backing President Kennedy's proposal for a high-level Disarmament Agency as a permanent part of the executive branch of the Government. They are in agreement with the thesis that the recurrent crises in international affairs make it imperative that the search for disarmament and peace be elevated to the status of a major, continuing concern in the field of national policy.

One of the Republican witnesses was Gen. Alfred M. Gruenther, director of the American Red Cross and a longtime confidant of former President Eisenhower. A man who does a great deal of traveling about the world, General Gruenther said he had been much impressed by the impact the Soviet Union had made with such slogans as "complete and total disarmament."

Establishment of the proposed Agency, he said, would be a long step toward convincing the world of this Nation's sincerity in its search for disarmament.

The behavior of Soviet delegates to the disarmament talks in Geneva and the intransigence of Premier Khrushchev have been ample proof that the Kremlin call for complete and total disarmament is for propaganda uses only.

The U.S. effort for disarmament and peace must be genuine and any agency created for the purposes must be such as will, in General Gruenther's words, "convince the world of this Nation's sincerity."

[From the New York Herald Tribune, Aug. 21, 1961]

VOICES FOR DISARMAMENT

At a time of crisis in Berlin, impressive voices are speaking of disarmament.

There is no inconsistency in this. What makes any international crisis so frightening is that it may touch off the nuclear arsenals of East and West. The world would be safer if this potential for terror, and for mutual extinction, were reduced.

A parade of witnesses before the Senate Foreign Relations Committee, including members of the Eisenhower administration, has testified to the value of President Kennedy's proposal for a new Government agency to centralize all disarmament activities.

In Berkeley, Calif., Adlai Stevenson told an international gathering of astronomers that disarmament had bogged down in "deep conflicts of purpose and an even deeper mistrust." Effective disarmament, he said, will involve principles familiar to science—freedom of investigation, inspection, and verification.

In the past 15 years, the details of disarmament planning have become enormously complex, the more so with each scientific discovery. The purpose of the proposed disarmament agency is, for the first time, to pool the skills of scientists, scholars, and statesmen in a coordinated effort to disarm. Such a group should help give new direction, energy and thrust to our disarmament program, enable us more quickly to meet Soviet challenges, and even to take the initiative in a field where we have too often only been the nay-sayers to Soviet grandiose schemes for total disarmament.

The prospect of still another Government agency is a depressing one, but so—to put it mildly—is the thought of thermonuclear war.

The quest for disarmament may be an endless one, but we ought to show the world that we are ready to persevere in an exhausting search. Who knows, we may eventually reach the goal—with patience, fortitude, and trust.

[From the New York Times, June 30, 1961]

AN AGENCY FOR DISARMAMENT

Disarmament is not just a matter of passing resolutions and getting other governments to sign them. The process of laying down arms, if ever the world arrives at it, will shake society to its foundations—beneficially but none the less vigorously. This is the problem that John J. McCloy has been studying for President Kennedy ever since last January, and for which the President proposed a new agency in the message he sent to Congress yesterday.

"Peace," as the President put it, "cannot be brought about by concentrating solely on measures to control and eliminate weapons. It must also encompass measures to sustain and strengthen international institutions and the rule of law. * * * It should drive toward the creation of a peaceful world society in which disarmament, except for the forces needed to apply international sanctions, is the accepted condition of international life."

Mr. McCloy, who is an old and wise hand in this field, drafted the pending bill after agreement with the Secretary of State, the Secretary of Defense and the heads of other interested agencies. It does not seem that there can be many agencies in the Government which might not be in some way affected. Disarmament is a part of foreign policy, a part of defense, a part of our economic life, a possible part of our whole way of living. It is not, as the President and Mr. McCloy make clear, a simple matter of stacking arms. There must be research, development of methods, studies of what William James long ago called the moral substitute for war. Disarmament involves all the physical sciences and most of the political and psychological sciences. It includes countless details—what Mr. McCloy calls the "detection, identification, inspection, monitoring, limitation, reduction, and control of armed forces and armaments and the development and test of weapons."

There is no comparable agency in the world. If this is authorized by law and supplied by adequate appropriations, it could be one of the keys to the future. A prompt and generous response by Congress might not wake the Russians and the Chinese from their monstrous dream of world domination. But it would say to all humanity that we reject the form of collective suicide called war and that we truly believe in the possibility as well as the desirability of peace.

[From the Philadelphia (Pa.) Inquirer, Aug. 17, 1961]

FOR A DISARMAMENT AGENCY

Bipartisan support for the creation of a U.S. Disarmament Agency—voiced this week in hearings by the Senate Foreign Relations Committee—is encouraging indication that Congress may complete favorable action before adjournment.

A letter from former President Eisenhower and direct testimony by Secretary of State Rusk head the growing list of endorsements, from both parties, for the Kennedy administration's bill on disarmament. It would create a separate Disarmament Agency within the executive branch that would operate with a degree of independence but in close cooperation with the President and the State Department.

Intermittent efforts within the State Department or the White House to make some progress toward disarmament are too often tied in with general diplomatic negotiations on international issues of the moment. There is need for continuity—for long-range, carefully prepared, practical solutions to problems standing in the way of disarmament. Only in a separate agency, functioning somewhat apart from the rapidly running and swiftly turning main stream of foreign policy, can the job be done well.

It is noteworthy that Defense Department officials, civilian and military, have testified in support of the Disarmament Agency bill. There is no conflict whatever between the measure and the stepped-up defense preparations. The unhealthy state of present

world affairs underlines the need for making a meaningful start toward disarmament on an organized, authoritative basis.

[From the Pittsburgh (Pa.) Catholic, Aug. 24, 1961]

U.S. DISARMAMENT AGENCY

(By Donald McDonald)

It may seem incredible, but it has taken our country 16 years—from the dropping of the first atomic bomb until now—to create a special, permament agency for disarmament, thereby serving notice on the world that we propose to make a sustained, organized, and systematic effort leading to eventual universal disarmament.

The Agency has not yet been established. But the necessary legislation has been introduced by Senator HUBERT HUMPHREY, of Minnesota, and Representative THOMAS E. MORGAN, of Pennsylvania. It has bipartisan support and seems assured of passage if the House can make room for it in the crowded, closing weeks of this session of Congress.

For 16 years the disarmament problem has been treated by both the Truman and Eisenhower administrations in a spasmodic, haphazard manner. It has at times been oversimplified, at other times distorted (e.g., certain propagandists have persistently deceived the American people by pretending that all American advocates of disarmament favor unilateral disarmament by the United States which would indeed, if true, be a foolish and dangerous position).

At one time, Mr. Eisenhower (or was it Sherman Adams?) found a little office in the White House for Harold Stassen and installed him as the Nation's disarmament expert. But when Mr. Stassen began delving into some of the ramifications of disarmament and began seriously negotiating with Russia, Britain, and France in London, his job and his office were dissolved.

This is not, mind you, a matter of the disarmament sincerity of Mr. Eisenhower or the late John Foster Dulles, or of Mr. Truman who accomplished little more.

The deficiency, I think, has not been one of sincerity, but rather of imagination and intellectual power, together with conviction and confidence that what must be done—i.e., universal disarmament and the establishing of world peace and world order—can be done.

All of these qualities of mind and heart must be present in any President and his administration if they are to overcome the inherent difficulty in disarmament—that is, the formidable psychological task of mounting and sustaining total disarmament effort at the same time that the Nation must be totally committed, for sheer survival reasons, to an all-out armament program.

What a Nation can accomplish in disarmament planning and negotiating is related, of course, to the climate of public opinion in the country. But the Government itself can influence that public opinion, for or against disarmament, by what it says, how it acts, how much official concern it shows for the problem.

If the proposed U.S. Disarmament Agency for World Peace and Security is merely the latest move in the international propaganda game, if it is to be staffed by people with anything less than total conviction about the urgency of universal disarmament, and if it is to be bypassed by Government officials who have for years dismissed disarmament as the dream of naive idealists, then we shall be no closer to realistic disarmament than we have been since 1945. And we shall leave public opinion both cold and uninformed about the possibilities and the urgency of disarmament.

I bring up these hypotheses not because I think they correspond to present reality but because they reflect some of the inhibiting conditions that surrounded our disarmament efforts in the past.

Secretary of State Dean Rusk's statement on the Agency to the Senate Foreign Relations Committee encourages hope that at last the United States is going to take more than a stop-and-go interest in the No. 1 problem in the world today.

He avoided (properly, perhaps, in that context) the matter of whether universal disarmament can be negotiated and enforced outside a worldwide legal and juridical structure.

But Mr. Rusk is aware of the seeming paradox and internal conflict of working simultaneously for disarmament and armament. Aside from the political and ideological conflicts in the world, he said, "the arms race itself creates an element of instability and insecurity."

We cannot, he said, let the "recurrence of" political and military crisis prevent us from addressing ourselves to the kind of world we hope to see * * *."

Our Disarmament Agency can be immensely useful on the technical level alone—for there is a vast amount of scientific, military, political, and economic matter that must be absorbed, sifted, correlated, and passed along to Mr. Kennedy and Mr. Rusk.

But were the President and the Secretary to limit the Agency's usefulness to the technical, they would limit disarmament itself and limited disarmament, like limited war, is a snare and a delusion. We have grounds, I think, to hope that this will not be the fate of our first permanent governmental Agency for disarmament, world peace, and security.

[From the Newport News (Va.) Press, Aug. 19, 1961]

MORE REASON NOW FOR DISARMAMENT AGENCY

To some, it may seem strange to contemplate formation of a new Disarmament Agency at a time when we are building up our defenses in the face of a succession of Communist threats and aggressions.

But actually, as Secretary of State Dean Rusk testified at a Senate Foreign Relations Committee hearing this week, the developing Berlin crisis "brings into sharp focus the need" for prompt congressional action to centralize all Government disarmament efforts, as proposed by the administration.

The plan lay dormant for more than a month before it caught on; but former President Eisenhower's endorsement of the purpose of the proposed agency was obtained, and the administration has now begun applying the pressure. It now has high Senate priority, and hearings are slated next week by the House of Representatives Foreign Relations body.

Secretary Rusk was only one of several affirmative witnesses at the Senate hearing, but he was certainly the most effective, by all accounts. He pointed out that elimination of war as an instrument of policy is a primary goal of American foreign policy, and emphasized that progress in disarmament is a necessary prelude to realization of that goal. We cannot let the recurrence of military and political crises keep us from working for the kind of world we hope to see, he added.

John J. McCloy, the President's disarmament adviser, declared disarmament to be such a complex, ramified, and vitally important subject that it requires the service of a full-time technically trained staff and should not be entrusted to ad hoc State Department groups set up to deal with specific crises.

There's no reason why we can't keep our eyes open to the realities of all the aspects of the world situation while continuing this all-important effort by use of thoroughly professional and well-organized procedures and machinery. Such an approach to the disarmament problem does not mean we would be more apt to swallow whole the various peaceful coexistence proposals of Premier Nikita Khrushchev—rather the contrary. It means we would be better qualified, and more likely, to offer coherent, positive, well-reasoned, and irrefutable disarmament proposals of our own—and to work for their implementation.

Possibly Senator JOSEPH CLARK, Democrat, of Pennsylvania, gave the major plan a boost in Congress on Thursday when he suggested that ex-President Eisenhower be named to lead the disarmament advisory committee which would be set up under the proposed Agency. Senator CLARK noted such an appointment would give the Agency both "hope and status." Certainly Mr. Eisenhower's well-known devotion to the cause of world peace, and his stature in both civilian and military matters, should make him the best of choices.

And above all, formation of a disarmament body such as this in these troubled times would show the world our sincerity in seeking peace, even in a world torn by cold war and threats of a nuclear conflict. Such a move would make Khrushchev's propaganda peace moves pallied in comparison, and might even put the pressure on him to act constructively, too, toward relaxing world tensions.

[From the Seattle (Wash.) Times, Aug. 17, 1961]

ESSENTIAL TO MANKIND'S SURVIVAL

Impressive bipartisan support is developing in Washington, D.C., for a high-level Disarmament Agency. This Agency, proposed by President Kennedy, would keep our Government advised at all times on possibilities for disarmament moves.

Particularly important in the Republican support for this proposal is the testimony of Henry Cabot Lodge, who headed this country's delegation to the United Nations in the Eisenhower administration.

Equally interesting is the recent statement by John J. McCloy, now a Presidential adviser on disarmament, that the United States is planning a new presentation of Government position on this issue.

Throughout the years of the cold war repeated crises have developed—Quemoy and Matsu, Cuba, the Congo, Laos and now Berlin—to name only a few of the most recent.

On every occasion Premier Khrushchev seems able to interject the argument that disarmament should be the world's objective.

The stock American rejoinder is that any promise of disarmament without inspection would be meaningless. This is a perfectly valid point. But the manner of our statement has tended to become negative.

And since the dialog tends to bog down at this point, millions of persons in uncommitted nations, who have not heard the earlier detailed discussion or have forgotten it, hardly can be blamed if they get the idea that Russia is for disarmament and we are against it.

If the disarmament issue is to be reduced to simplest terms, a fairer statement would be:

"The United States wants disarmament. The Communists block it."

Unfortunately this country and its allies, over too long a period, have allowed Russia and its partners to take the affirmative position.

It is also true that changing conditions require constant reappraisals. Today's means of offense and defense are so varied and complex that if the world's wisest men, all dedicated to universal peace, and with full authority to take action, were to sit down together, many months probably would elapse before they could develop an effective disarmament plan.

In one way or another, however, the West should take the affirmative with a new, dynamic and realistic presentation of its position.

Broad-scale, effective disarmament may or may not be possible in the foreseeable future. McCloy, on the basis of his recent personal discussions with Khrushchev, apparently feels that the Russians may be softening somewhat their almost pathological objections to inspection. Arthur Dean, this country's representative in nuclear-test discussions, is less hopeful.

If there is any possibility of fruitful negotiations it should be seized.

There are skeptics who say disarmament never will be possible. Similar skepticism undoubtedly met Moses when he descended from the mountain with the Ten Commandments.

The Commandments still are being broken today. But over the centuries most individuals have learned to live under the laws that apply in their respective lands and substantial starts have been made in the field of international law.

It may be a long while before a feasible disarmament plan can be developed. But mankind had better be getting at the job if it wants to survive.

[From the Sharon (Wis.) Reporter, Aug. 17, 1961]

DISARMAMENT STUDY GIVEN WIDE SUPPORT

As all nations and peoples of the world continue to be primarily concerned these days with the subject of war and peace, it is encouraging to note that bipartisan support has been pledged in favor of the President's proposal to create a U.S. Disarmament Agency for World Peace and Security. The Foreign Affairs Committee of the Senate soon will begin hearings on the proposal, and the Republican and Democratic backers of the measure hope for congressional consideration before the end of the month.

In essence, the bill will create an agency which will conduct a continuing study of ways and means of reducing the terrible armament burden being borne by the nations of the world. The almost inestimable costs of armaments are depriving the peoples of most nations of the wherewithal to improve their standards of living. If only a portion of the amount spent for devices of war could be turned to peaceful pursuits, the needs of most of the unimproved nations could be satisfied.

Encouraging to all is the fact that some of our Nation's leaders believe that some effort should be expended in determining the ways by which the cost of armaments can be reduced. They should be given the support of all in this worthwhile endeavor.

Mr. HUMPHREY. Madam President, I thank the Senator from Arizona for his cooperation and courtesy. A little later I shall discuss his amendment.

Mr. GOLDWATER. Mr. President——

The PRESIDING OFFICER (Mr. PELL in the chair). The Senator from Arizona is recognized.

Mr. GOLDWATER. First, Mr. President, I wish to thank the Senator from Minnesota [Mr. HUMPHREY]. This has been one of the most delightful 20 minutes I have ever sat through. [Laughter.]

Mr. HUMPHREY. Let me say that with the cooperation of my colleagues, we were able to give the matter generous treatment.

Mr. GOLDWATER. I would say decidedly so.

Mr. President, it may surprise some Members of the Senate to learn that our national purpose today, at least as propounded by the distinguished chairman of the Senate Foreign Relations Committee, is the advancement of a process, rather than a victory to be won. From all I can gather from the remarks of my esteemed colleague before the National War College on August 21, the very thought of winning over an enemy bent on our destruction has become official anathema to the Kennedy administration; it is not to be thought about, much less mentioned by anyone in official capacity.

But if we cannot even think in terms of victory over the forces of international communism, perhaps we had better examine the process which our purpose is to advance. In what direction is it headed? How fast is it moving? And will it get anywhere in this enlightened age of so-called foreign policy maturity before the Communists enslave more of the world's people and take over what remains of freedom's land mass? If we heed the advice of the Foreign Relations Committee chairman and put away the toys of our reckless youth—such as strength, vigor, determination, courage, and resourcefulness—can we expect the tide to turn in our favor? Can we expect the uncommitted nations of the world to ignore Communist arms and threats and elect to join a process, recognizing that it is propelled by the mature judgment and foreign policy wisdom of peaceful coexistence?

Mr. President, the process with which the Foreign Relations Committee chairman would replace our historic and time-proven purpose of fighting to win over enemies dedicated to our destruction has been variously described. We are told that this process is "the defense and expansion of our democratic values, the furtherance of which rest ultimately on the wisdom, the mature judgment, and the moral fiber of a society of free individuals." We are told that this process is one "of civilizing international affairs." We are told that it is a process of making "a society rather than a set of barbarians out of the governments of the world."

This is a noble purpose. It presupposes that we can change the nature of man through spreading foreign aid around the world for the announced purpose of bringing about economic and social reform. It envisions a world of sweetness and light in which the Castros and the Khrushchevs bow meekly to our wisdom, maturity, and purpose of process.

Of course, it does not seem to bother the proponents of this well-intentioned dream that the purpose to which they blithely commit us has not gotten us anywhere, although expenditures in its name have run nearly $100 billion. But we must move on in the same rut, according to the self-anointed adherents of maturity. Why? Because, to quote the Foreign Relations Committee chairman, "The purpose of our foreign policy is the very gradual improvement of human life on earth."

Mr. President, I am sure that there is no Member of this body nor any other conscientious American who would oppose the improvement of human life on earth, any more than they would oppose mother love as a proper institution. But I wonder how many agree that in the promoting of this lofty aim we are to reject the spirit which has always led Americans to stand up to their enemies, no matter what the odds. In his War College speech, the chairman referred to the minutemen, the Alamo, the winning of the West, and to the charge up San Juan Hill as "exhilarating adventures," and he added this:

But that was in the days of our youth, and we live now in a far more difficult and more dangerous world—a world in which we must come of age.

I would remind our Foreign Relations Committee chairman that valor has no age and that youth, even among nations, is not the sole residing place of courage. If we must "come of age" in the world by sacrificing our national honor, our ability to act, our determination to defend freedom, then we shall be coming of age with a vengeance—we shall be coming to such an advanced age that we will die. In fact, when I hear national leaders referring to past American victories as "exhilarating adventures" associated with our brash youth, it makes me wonder if they have not already advanced to the stage of forgetting the courage needed in a world whose problems can only be solved with the Alamos, the San Juan Hills, and the minutemen.

Mr. Prcsident, the nature of man does not change with the passage of time, or with the alteration of conditions and tactics. It has remained the same down through the centuries. Let me refer to the words of a man who has studied the question very deeply over a prolonged period of time. I refer to the noted British historian, Arnold Toynbee, who, in a recent interview printed in Think magazine, observed as follows:

"If you want to understand the Sumerians in 3000 B.C., Kennedy and Khrushchev help bring them alive. I think human nature and the ways human beings deal with each other are the same as they have always been, at least as far back as records allow us to judge.

In this context it would seem that the actions of the minutemen and the men who fought and died in the Alamo and on San Juan Hill have a vital relationship to how we think and act in the crisis that confronts us today. Those men met threats and insults and aggression with strength. They fought when the need arose, and they fought to win, regardless of the risk and regardless of the odds stacked against them. They did not waste time trying to civilize a foe who held a knife to their throats.

They did not wait, as the Foreign Relations chairman would have us do, for what he terms "deeply rooted trends and gradually changing circumstances to foster conditions for solutions and accommodations." When an enemy confronted them with a fight-or-die ultimatum, they did not waste time trying to figure out how to reform the enemy's neighbors so that they could in turn convince the bully he was in the wrong. No; they saw clearly what their inter-

ests and America's interests demanded of them and they met the challenge without holding worldwide consultations to make sure that if they took action nobody's feelings would be hurt.

What is more, they did not think in terms of "accommodations." They realized just as all Americans realize today that, when one "accommodates" a sworn enemy he is yielding to a momentary demand that eventually will blossom into more and more demands and more and more accommodations. The end result of this kind of appeasement is surrender.

Now we are faced with such a problem in Berlin. In that situation, the Soviets have laid down a challenge. And they have been implementing that challenge almost daily with a series of moves all of which apparently have taken the New Frontier by surprise. If they had not, there would be no need for the endless series of hastily called White House conferences following the announcement of each new Communist move. While we are catering to what the administration calls world opinion and attempting to bring about the social, economic, and monetary reform of backward nations, the Communists are engaging in a calculated program of aggressive moves. They are making maximum use of their psychological warfare mechanism. They are "rattling their missiles." They are utilizing nuclear terror. They are flaunting world opinion in a fashion that certainly should lead American officials to reexamine their attitude on the entire question of international prestige or worldwide respect.

Mr. President, I feel compelled to ask, What are we engaged in, anyway—a popularity contest or a struggle to the death between freedom and slavery? That the Soviets are not bemused with the idea that they have to cater to world opinion is certainly evident. They made that very clear when they decided to announce their resumption of nuclear testing. And, let me add, that while the New Frontier is consoling itself with the idea that the Communists lost ground in the international popularity contest, it would be well advised to consider another effect of that nuclear testing bombshell. The effect is the fear that it has spread through the ranks of the world's so-called uncommitted nations and the results of that fear in terms of pressure on the United States.

I believe the President's decision to announce resumption of our own nuclear tests was the only course he could take under the circumstances. He had to do it or give the free world cause to wonder if we planned to keep up our capability in this all-important military sphere. Among other things, it was needed to overcome some of the damage caused by men like Chester Bowles who have been hinting that the United States was abandoning its policy of massive retaliation. And, Mr. President, let me emphasize that, if the adherents of sweetness and light succeed in selling this line at a time when the Russians are placing more and more emphasis on nuclear weapons, then the free world will find itself defenseless.

I want to emphasize, as strongly as I possibly can, that our present policy, which forecloses the idea of gaining victory over communism, which conditions every move with an exaggerated concern over risking war, which bleeds for worldwide social and economic reform at a time when there is a conflagration to be extinguished, which fears to act from strength because somebody's feelings might be hurt—this policy is giving us a posture of weakness. It is encouraging Khrushchev in the belief that he can do as he likes in any area of the world and we will not challenge him. The end result of such a policy is disaster for the United States and the entire free world.

From all I can gather, Mr. President, our official concern seems to be exclusively tied up with how Russia fares in the world of public opinion. And Khrushchev's concern is exclusively devoted to the total victory of international communism and the final destruction of freedom.

In assessing the situation we find ourselves in today, I find myself, perhaps strangely, in agreement with Mr. Chalmers Roberts of the Washington Post, who wrote on September 1 as follows:

> Power and a willingness to use it are fundamental to great nations. That the United States has the power is not doubted in Moscow, by every sign available here. But Khrushchev's latest actions indicate that he doubts the President's willingness to use it.

And Mr. President, this brings us right to the crux of what I am saying today, and what I have been saying for many months past. Unless we develop, once and for all, a willingness to win this struggle and a willingness to use the power we possess to that end—unless we convince the Russians beyond all question of a doubt that this willingness and determination exist—we are lost.

Not long ago we had the instrument to bring this home to the Russian dictator in a fashion he could understand. We had then the ability to take the initiative in resumption of nuclear tests in the face of Soviet bad faith and in the face of a strong suspicion that the Russians were engaging in clandestine testing. And if we had taken that initiative we would have served strong notice on Mr. Khrushchev that we meant business, that we were not completely preoccupied with the development of lesser weapons, that foreign economic aid was not the only weapon we were prepared to bring to bear on the world situation. The opportunity was there for the taking, but nothing was done because we were paralyzed in a phony disarmament stance assumed for the sake of world opinion.

Yes, I claim that we lost an advantage and the Russians gained one on the nuclear testing question. It is all well and good for the administration to talk gleefully about the Kremlin mistake, about how the world will hold the Russians responsible for increasing nuclear tension, about how stunned the neutral nations were at the Soviet test announcement. But after we note these things, then what? Can we expect the neutral nations to veer sharply to the Western position and go all out for the cause of freedom? Of course not. That is already apparent. What the uncommitted nations are doing now is exerting pressure on the United States to ease the Berlin tension by making concessions to Khrushchev. They want us to negotiate a situation where negotiation can only mean yielding to Communist terror tactics. In this situation, President Kennedy would be well advised to listen to his friend, President de Gaulle of France, and stand firm, regardless of what it takes to maintain that position.

Mr. President, allow me to say that if the world opinion which the New Frontier is courting is the kind of opinion which hails our humanitarian posture and at the same time urges us to accommodate our sworn enemy, then we shall either have to forget it or let it lead us down the miserable road to final appeasement. This is a kind of world opinion that applauds our good intentions and then suggests that we surrender on vital points. It is a kind of world opinion that weakens the United States and strengthens communism. We cannot afford it at this critical time in the history of the world.

That we cannot afford it is amply demonstrated by the attitude of people from Latin American countries with whom I come into contact. They are asking, in effect, "Have not you Americans really lost the struggle with communism?" They just assume that we have because we have failed to do anything but talk. We have not followed up our words with the action that befits them. And this is having a damaging effect. Contrary to what Mr. Adlai Stevenson reported after his 21-day orbit of South America, our friends down there would welcome the opportunity to applaud strong action in Cuba. They know that we cannot tolerate a Communist regime 90 miles off our southern shores forever without seeing the Latin countries reject us as a world leader—at first in a whispering way, and ultimately in a thundering departure from what they regard as a lost cause.

Mr. President, the removal of communism from Cuba, by whatever means required, would be the quickest and surest cement we could apply to freedom's structure in the Western Hemisphere. No people hold more respect for courage or more contempt for cowardice than do our friends to the south. No people are more determined to be free. And, even though we, in our processes, have difficulty envisioning a situation where the military engages in protecting democratic methods in a civil situation, that is precisely what the Brazilian army is doing today. It is meeting the challenge of communism with realism, an action which is likely to gain for the Brazilian military the appreciation of the entire free world.

Mr. President, I wish to call up the amendment which I submitted earlier, and have it read.

The PRESIDING OFFICER. The amendment offered by the Senator from Arizona will be stated.

The LEGISLATIVE CLERK. It is proposed, on page 8, line 14, to strike out, after the word "disarmament" all through the period following the word "act" on line 23.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arizona.

Mr. GOLDWATER. Mr. President, I shall be as brief as I can in explanation of the amendment. It strikes out the authorization to grant the Disarmament Agency the right:

(1) to conduct research, development, and other studies in the field of disarmament; (2) to make arrangements (including contracts, agreements, and grants) for the conduct of research, development, and other studies in the field of disarmament by private or public institutions or persons; and (3) to coordinate the research, development, and other studies conducted in the field of disarmament by or for other Government agencies in accordance with procedures established under section 34 of this Act.

Mr. President, if the Congress passes S. 2180, with the language contained in the bill which I am attempting to strike, it will set up one more agency of the Government with the power to conduct research and development in practically any field. I would go so far as to say the Agency could conduct research and development in any field in which it cares to engage, even though the amendment was passed this morning as offered by the Senator from Georgia [Mr. RUSSELL], which stated, on line 2 of page 9, "and other studies shall be limited to." In my opinion, that would not affect the other language in section 31.

Mr. President, about what are we talking? We are talking about giving to the Agency power to authorize contracts, to authorize expenditures of money, and in my opinion to grant fellowships and to grant study funds. I see no limitation placed on the amounts of money to be used for those purposes.

I suggest that this is clearly a duplication, and probably a triplication, of what the Government is doing.

Information which I have before me shows that in the new budget the expenditures for research and development under the Government will be over $10 billion. This is a vast amount of money, $10 billion for research and development. I do not like to go back into history, but it is an amount far greater than annual budgets of the United States only a few years ago.

I suggest we should be able to find out enough by having expenditures by the Defense Department of $6½ billion, by the Atomic Energy Commission of over $1 billion, by NASA of over $1 billion, by the Departments of Labor and Health, Education, and Welfare of nearly a half billion dollars, by the Department of Agriculture of a little over $154 million, by the National Science Foundation of $119 million, and by other agencies of $331 million. That totals over $10 billion. If we cannot learn enough from those expenditures, then these other agencies which are charged with research and development are not doing their jobs properly.

Mr. President, in addition to the amounts I mentioned previously, I understand that about $13 million is provided under the Office of Civil and Defense Mobilization for research and development.

These funds to which I refer are to be used not only for research but also for development.

In the language contained in the bill, which the amendment would strike, are included the words "research, development, and other studies in the field of disarmament;".

Mr. President, I wish to cite a few of the areas the Agency would be given authority to research, develop, and study "the detection, identification, inspection, monitoring, limitation, reduction, control, and elimination of armed forces and armaments."

Mr. President, I do not know how much study has to be done in order to come to the realization that one can do away with armed forces by agreement to do away with them or one can do away with them by conquering them and thereby destroying them. I see nothing new to be discovered. This is a subject which is as old as man. "Disarmament" is not a word which was thought up in the last century. It relates to the days when men first hit each other with their fists. There have been attempts to disarm and do away with warfare ever since.

The authority would also include "the thermonuclear, nuclear, missile, conventional, bacteriological, chemical, and radiological weapons."

The next field in which the Agency could work is "the techniques and systems of detecting, identifying, inspecting, and monitoring of tests of nuclear, thermonuclear, and other weapons."

If we eliminate the "other weapons," which I assume are the conventional type weapons, the United States already does this. We are spending a vast sum of money to establish devices around the world to detect the thermonuclear testing and atomic weapons testing by our enemies. These systems are very well developed and have been doing a good job. Why should we spend money to repeat this work, in a field in which we are already expert?

The next area is "the analysis of national budgets, levels of industrial production, and economic indicators to determine the amounts spent by various countries for armaments."

This is a very lofty idea. I wish it would work. It probably would work in every country except the country about which we wish to know something, which is Russia. I suggest that the economic figures put out by Russia are completely undependable. Whenever a dictator puts out information about his economy, the information will be only to his advantage. The truth of the matter is that in this particular field we have heard a lot of talk in the past year or so about the great economic strides made by Russia, yet in Khrushchev's latest manifesto he admits the Russian economy has not been producing for the people in the way it should.

We still observe the fact that 50 percent of the people of Russia are required to work on the farms in order to feed and to clothe the other 50 percent. A country which has not advanced any farther than that in economic standards, which at the same time puts out glowing figures as to what is being done, is not a country upon which we can depend for any kind of accurate figures.

I ask the question: How shall we determine the extent of the Russian economy, how much industrial production there is, and what the Russians are spending for armaments? This is an absolute impossibility, with the Government of Russia what is is today.

The next field in which the agency can work is "the control, reduction, and elimination of armed forces and armaments in space, in areas on and beneath the earth's surface, and in underwater regions."

Mr. President, if NASA and the agencies of the military are not devoting themselves to this problem today, I do not know what they are doing. I have heard briefing after briefing after briefing in which there has been a discussion of this subject, as I have mentioned—the elimination of armed forces and armaments in space. I think that is one of the most important fields on which the space scientists are working today.

Another field the Agency would get into is "the training of scientists, technicians, and other personnel for manning the control systems which may be created by international disarmament agreements."

Mr. President, we have the scientists. We have many others who are training them. There has been no shortage. They are available when we need them. I suggest, again, this would probably be a triplication, in such an area, when it is suggested that the Disarmament Agency should be authorized to spend money in this field.

The next area it is suggested the Agency get into is "the reduction and elimination of the danger of war resulting from accident, miscalculation, or surprise attack, including—but not limited to—improvements in the methods of communications between nations."

I read some interesting testimony in the report concerning the dangers of miscalculation and the possible urge to "push the button" to see what would happen. That is something which relates to human nature. I suggest that all the research and development we could do will not change man's personal habits or his personal nature.

The last part relates to "improvements in the methods of communications between nations." If I am not mistaken, both private and Government agencies are working very hard in that field already.

I am told that when the large reflectors are erected, a great step forward will be made in the area of world communications. This is an activity that is taking place. It is being done not only by one agency of the Government, but also probably by all the armed services. It is of extreme interest to NASA. It is of extreme interest to private communications systems.

I shall skip so as not to take too much time. Another study is proposed: "the

scientific, economic, political, legal, social, psychological, military, and technological factors related to the prevention of war with a view to a better understanding of how the basic structure of a lasting peace may be established."

If that is not one of the assignments of the State Department, I do not know what the State Department is supposed to do. In effect, we would have a subagency in the State Department repeating the work that is supposed to be done by the State Department. If they are not doing it—and many times some of us have questioned what they are doing—they ought to be asked about it. Certainly peace and the methods of obtaining peace are subjects which should interest the State Department, more than any other agency of our Government.

Then appears the catchall phrase: "such related problems as the Director may determine to be in need of research, development, or study in order to carry out the provisions of this Act."

I suggest that under that provision we could establish Federal aid to education, scholarships, and fellowships. There is no end to the study that could be made under that provision of the bill.

I know that the authors of the bill are sincere in wanting to provide the Agency with knowledge, but it is my suggestion that the information is available.

If I am correct in my memory of what the distinguished Senator from Minnesota has said, our men went to Geneva unprepared. They should not have gone unprepared, because the needed information in technical, nontechnical, theoretical fields and scientific fields was available.

If we must have a special agency for this problem, our present agencies have not been performing their jobs the way they should.

I know of no other country which has an agency for disarmament. There may be some. There may be one or there may be many. But I have not heard of it. Their representatives march up the hill to Geneva, but somehow they seem to come prepared.

I admit that our representatives go to such conferences with high hopes and strong hearts. Sometimes it seems that they go unprepared so that they are not equal to meeting the preparation of the representatives from other countries.

The crux of my argument is that by leaving the language in section 31, with the exception of the language I am trying to strike, which is all following the period on line 14 after "disarmament" down to the period following the word "act," on line 23, we would allow the Agency to work with other agencies of the Government, and we would not provide another bureau or agency with unlimited spending and expansion authority. We would still retain the provision that:

> The Agency is authorized and directed to exercise its powers in such manner as to insure the acquisition of a fund of theoretical and practical knowledge concerning disarmament.
>
> • • • • •
>
> In carrying out its responsibilities under this Act, the Agency shall, to the maximum extent feasible, make full use of available facilities, Government and private. The authority of the Agency with respect to research, development, and other studies shall include participation in the following insofar as they relate to disarmament.

Mr. President, I have stated my argument. I believe that the proposed Agency represents a repetition or duplication. We are asked to do something which we are already doing in many fields. I doubt the wisdom of it. In fact, I believe it would be a very bad mistake at this time to establish the proposed superagency with the suggested power.

Mr. CASE of South Dakota. Mr. President, will the Senator yield?

Mr. GOLDWATER. I am happy to yield.

Mr. CASE of South Dakota. I point out that on page 14, section 34, of the committee amendment there appears language which represents a great improvement in the bill and would be particularly important in the event the amendment of the Senator from Arizona were agreed to.

Section 34, page 14 of the original bill, was quite general and referred to the Director consulting with other appropriate agencies to develop suitable procedures to obtain cooperation.

The committee amendment, however, would strengthen that provision very importantly, by providing that the "President is authorized to establish procedures to (1) assure cooperation, consultation, and a continuing exchange of information between the Agency and the Department of Defense, the Atomic Energy Commission, the National Aeronautics and Space Administration, and other affected Government agencies, in all significant aspects of U.S. disarmament policy and related matters, including current and prospective policies, plans, and programs, and (2) resolve differences of opinion between the Department of State and such other agencies which cannot be resolved through consultation."

The specific direction to the several agencies that are working in this field—NASA, AEC, the Department of Defense, and other affected Government agencies—would make available to the contemplated new Agency the very information which the Senator from Arizona has mentioned, and would make it possible for the Director of the new Agency to count upon receiving the benefit of the information developed by existing agencies.

Mr. GOLDWATER. I agree with the Senator that the new section 34, which would replace the old section 37, is a decided improvement in the bill, and to strengthen the argument of the distinguished Senator from South Dakota, I point out that the language at the bottom of page 8, starting with line 23:

> In carrying out its responsibilities under this act, the Agency shall, to the maximum extent feasible, make full use of available facilities, Government and private.

I think the intention is stated strongly in two parts of the bill. I see no reason to establish another research and development agency in our Government to cover fields which are already covered. If the proposal were to cover some new areas, there might be some argument for it.

Mr. CASE of South Dakota. I agree with the Senator. I think the sentence he has read should be considered in relationship to the possibilities established by the amended section 34 on page 14.

Mr. GOLDWATER. Mr. President, I have no further argument to offer in behalf of my amendment. I am prepared to yield the floor.

Mr. SALTONSTALL. Mr. President, will the Senator yield for a question?

Mr. GOLDWATER. I yield.

Mr. SALTONSTALL. I was called to the telephone while the Senator was speaking. He emphasized the amount of research money available in the various departments. I invite his attention to the fact that in the Department of Defense alone, if my figures are correct, including the Army, Navy, and Air Force, a total of $1,154 million is provided for research and development, test and evaluation of space activities.

The Senator quite correctly used the figure of $10,679 million in the 1962 figures of research and development in the Defense Department, Atomic Energy, NASA, HEW, Agriculture, Science Foundation, and so on. So if we create another division in the State Department, and give it research authority, I cannot help but feel that there will be a great duplication.

As the Senator has pointed out, if we go one step further, as indicated on page 9 under subsection (f), reference is made to the training of scientists, technicians, and other personnel for manning the control systems which may be created by international disarmament agreements. Presumably that is what we are doing with other research funds. It seems to me that rather than duplicate those activities with personnel in the State Department, those in the State Department could get their information from those other departments and go forward from there rather than build up a large new research organization of their own.

Mr. GOLDWATER. The Senator is correct.

One further advantage comes to my mind. If we were to create another agency with research and development powers, it would mean one more agency to add to the evident troubles we now have in exchanging information between departments and agencies that are engaged in research.

If we add to the confusion, if we want to use that word, we are not going to help. It would be extremely simple for this Agency to acquire the information it needs in a most cooperative way from the agencies which are now engaged actively in research and development.

Mr. SALTONSTALL. If I may ask another question, the Senator's amendment cuts out on page 8 of the bill the wording from line 14 down through line 23. In other words, the Agency is authorized to conduct research and development on all these subjects that are mentioned on page 9. It has just occured to me during the course of this

debate why, rather than to have it conduct research alone, should we not require it to ask for authority to get information on these subjects from agencies which are now conducting such research?

Mr. GOLDWATER. I believe that is very strongly implied in the language starting in line 23:

> In carrying out its responsibilities under this Act, the Agency shall, to the maximum extent feasible, make full use of available facilities, Government and private.

On page 14, in section 34, the whole intent is to provide this.

In other words, if it does not exist, the President is authorized to establish procedures to assure cooperation, consultation, and so forth.

Mr. SALTONSTALL. So that the Senator's amendment would cut out not only the direction of research but also the development of these different subsections which are mentioned on page 9.

Mr. GOLDWATER. Yes; in addition to that, it would do away with the possibility of the Director getting into such related problems as he may determine, which, in my opinion, opens the barn door wide.

Mr. SALTONSTALL. That would mean that we would not hurt the work of the Agency, because it would be permitted to coordinate and cooperate and get the knowledge it needs on these specific subjects from the other departments in the Government.

Mr. GOLDWATER. It would not hurt it. In fact, I believe it would be helping it. I cannot think of a more healthy situation than to put an agency concerned with the control of armaments to work with the military and to work with the AEC and NASA with the domestic departments, such as Health, Education, and Welfare, and Labor, and Agriculture, and the National Science Foundation, and so forth, and it certainly would be a very healthy thing to do it that way.

What I am afraid of is that if we set it up as a separate authorized agency to conduct research and development, the first thing we know it will have a separate building someplace, detached from the State Department, and they will have their own little kingdom being built, with their own research and development. There is nothing that they cannot get into under the language of the bill, because everything is related to disarmament. There is not anything that I can think of that they could not get into that would not be related in some remote way, at least, with disarmament.

Mr. SALTONSTALL. I see on the floor the Senator from Kentucky, a former Assistant Secretary of State. Would it not put into the State Department the responsibility of doing research in an undertaking that would become completely apart from the State Department's duties which, except for the new purpose of disarmament, it could get elsewhere?

Mr. GOLDWATER. There is no question about it. It would be transferring to the Department something that has always been foreign to it. It is something that it has never been called upon to do.

Mr. SALTONSTALL. I agree that the Senator's amendment is a sound amendment.

Mr. GOLDWATER. I thank the Senator.

Mr. CASE of South Dakota. Mr. President, will the Senator yield?

Mr. GOLDWATER. I yield.

Mr. CASE of South Dakota. It would convert the State Department into an action agency, rather than into a policy agency.

Mr. GOLDWATER. That is correct.

Mr. MORTON. Mr. President, will the Senator yield?

Mr. GOLDWATER. I yield.

Mr. MORTON. What disturbed me most about the bill when it was introduced was that I was afraid it would be a sort of fifth wheel. If a man had the responsibility of turning to either the Secretary of State or the President, he would obviously take his problems to the President.

The bill has been improved by putting the head of it under the Secretary of State. It is still referred to as an independent agency. The functions of the Agency, however, do not gear in with the operations of the State Department, especially in the field of research. The argument of the late great John Foster Dulles against including ICA in the State Department's operations was that the State Department was not the type of agency that could deal with the letting of contracts, and the development of projects; that it was a policy development agency of Government.

The same thing applies here. I admit I want to see it put in the State Department, but I would like to strike from it certain operations and functions, such as research and some of these other things enumerated on page 9. For example, I read subparagraph (f):

> The training of scientists, technicians, and other personnel from making the control systems which may be created by international disarmament agreements.

That is clearly a military function. We would not only be putting up a new building, but we would be adding a new department and having the State Department operate it. The Senator's amendment is an excellent amendment. Certainly, from my point of view, if the amendment could be adopted, it would make it much easier for me to support the bill.

Mr. SALTONSTALL. Mr. President, will the Senator yield, so that I may ask a question of the Senator from Kentucky?

Mr. GOLDWATER. I yield.

Mr. SALTONSTALL. As a former member of the Department of State, would the Senator from Kentucky say that it would be just as easy for the new Agency in the Department of State to carry out its responsibilities without having to go into a great deal of research and development, rather than saying we will set up a new agency and we will define how it will hear when there is a missile coming over, and all that sort of thing?

Mr. MORTON. The technical aspects of research should be left in the agencies where they are now. It is nothing new for the State Department to rely on many departments on research.

Mr. SALTONSTALL. It does not have any of these powers now.

Mr. MORTON. No. It would have to start from scratch. The talent in these fields, so far as the Government is concerned, would have to be recruited. It would mean stripping them from another department or recruiting them from private industry, where they are very much in need.

Mr. McCARTHY. Mr. President, will the Senator yield?

Mr. GOLDWATER. I yield.

Mr. McCARTHY. Can the Senator advise me whether all the authority which is suggested for this Agency is not already in existence and possessed by some other agency of Government?

Mr. GOLDWATER. In my opinion, it is.

Mr. McCARTHY. It is not taking away any authority that is now in existence. It is a question of whether it shall be continued to be exercised by those who possess it, or, if it is not now assigned to an agency, the President could assign that responsibility.

Mr. GOLDWATER. That is correct. I invite the Senator's attention to section 34 on page 14 of the bill, which replaces the former section 37. That section strengthens this concept. It makes it clear that the President is authorized to encourage cooperation. I believe it would be a healthy thing to have them working among existing agencies, rather than starting out on their own. That would create jealousies and complications, particularly in the field of missile development, and complications in other areas where we have a conflict.

Mr. McCARTHY. I believe it would conform with what should be the theory of a disarmament agency. With our whole effort in the Government being directed toward peace, the effort of every agency, including the Department of Defense, should have in mind the objective of advancing and furthering disarmament.

Mr. GOLDWATER. The Senator has made a very valuable addition to the argument. I thank the Senator.

Mr. McCARTHY. We often hear it said that we cannot have peace without disarmament. That is not quite accurate, and does not state the whole truth. We can have peace without disarmament, but we cannot have disarmament without peace.

Mr. GOLDWATER. The Senator is absolutely correct.

Mr. McCARTHY. We should put first things first. If the Agency is to be effective, it is important that we do not put this great burden upon it and ask it to assume responsibilities and obligations that we could not ask a similar agency to assume, when these purposes rest upon the whole Government. The Senator's amendment is a good amendment.

Mr. GOLDWATER. I thank the Senator from Minnesota.

Mr. HRUSKA. Mr. President, will the Senator yield?

Mr. GOLDWATER. I yield.

Mr. HRUSKA. I think it is fine that the Senator from Arizona is making a record on this particular point. I wish to ask the Senator whether the effort to coordinate the talents of the many existing agencies would not be facilitated by the appropriations processes of the House and Senate.

Mr. GOLDWATER. Oh, certainly; and not only through that avenue, but also through the avenue of legislation and the avenue of congressional opinion. This is not an impossible objective to achieve. I think there are many examples of interdepartmental relationships in Government which will bear out the fact that we can and do get along, even though there is duplication. I do not like to see us turn our order into disorder through another agency which will have all the powers of research and development which seven or eight other agencies now have.

Mr. HRUSKA. I appreciate that. Apprehensions have been expressed that the creation of a new agency will be followed by the desire to expand it into an independent organization. The authorization for appropriation in this instance is only $10 million. That amount will not promote a large-scale program. If any large-scale program is envisioned by the Director of the new Agency, he will be compelled to come to Congress and say, "I want a new building; I want a larger research staff; I want this and other activities undertaken. The price tag for these things is so much."

At that time congressional policy can be expressed by saying, "Consult the other agencies which have those facilities. See what they already have on hand."

If expansion is needed, it can be done in the regular order, rather than by promoting out of hand a new bureaucracy.

Mr. GOLDWATER. The Senator from Nebraska is correct. We are developing a new mother-love type of agency, a U.S. Disarmament Agency for World Peace and Security. That is kind of hard to vote against. If the Agency comes to Congress and asks for an appropriation of $1 billion or $2 billion, and we vote against it, our constituents will say, "You are against peace."

It is the same with national defense. I think some 21 bills have been introduced in Congress bearing somewhere in the title the words "national defense." I believe 18 of them have passed. I doubt that any of them was worthy of passage. But if we voted against them, the cry was heard, "Oh, you are against national defense."

So the Senator from Nebraska is saying that Congress theoretically will take control through its control of the purse strings. This type of Disarmament Agency for World Peace and Security will make it mighty difficult for Congress to turn down requests when the Agency comes to Congress and asks for new buildings and additional tens of millions or hundreds of millions, and ultimately billions of dollars. This is one of the things about which I am fearful. The very name lends itself, one might say, to overcrowding with demands.

Mr. HRUSKA. One of the first concerns of any advocate of such a bill is to search for the most appealing or attractive title for the Agency that it is possible to get. However, it has been my observation that the Senator from Arizona was not too inhibited when the title of National Defense Education came up. He was quite frank in his expression concerning that bill, notwithstanding the fact that he ran the risk of incurring the displeasure of some persons who accused him of being against education simply because he was critical of that program. That is one of the things we meet with constantly. However, I feel that by requiring the Agency to run the gauntlets of the Committees on Appropriations we will have a good safeguard against the Agency's "overdevelopment."

Mr. GOLDWATER. I should like to remind the Senate, in considering whether to remove the authorization to give this Agency the power to spend funds in these fields, that we are already spending more than $10,500 million now for research and development.

Mr. HRUSKA. The Senator from Nebraska is in full sympathy with the proposal of the Senator from Arizona.

Mr. GOLDWATER. I thank the Senator.

Mr. President, on my amendment, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. GOLDWATER. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Arizona. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. HUMPHREY. I announce that the Senator from Illinois [Mr. DOUGLAS], the Senator from Arkansas [Mr. FULBRIGHT] the Senator from Oregon [Mrs. NEUBERGER], and the Senator from Arizona [Mr. HAYDEN] are absent on official business.

I also announce that the Senator from New Mexico [Mr. CHAVEZ], and the Senator from New Mexico [Mr. ANDERSON] are absent because of illness.

I further announce that, if present and voting, the Senator from New Mexico [Mr. ANDERSON], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Oregon [Mrs. NEUBERGER], and the Senator from Arizona [Mr. HAYDEN] would each vote "nay."

On this vote, the Senator from Illinois [Mr. DOUGLAS] is paired with the Senator from Utah [Mr. BENNETT].

If present and voting, the Senator from Illinois would vote "nay," and the Senator from Utah would vote "yea."

Mr. KUCHEL. I announce that the Senator from Vermont [Mr. AIKEN] is absent on official business.

The Senator from Utah [Mr. BENNETT] and the Senator from North Dakota [Mr. YOUNG] are necessarily absent.

The Senator from New Hampshire [Mr. BRIDGES] and the Senator from Kansas [Mr. CARLSON] are absent because of illness.

On this vote, the Senator from Utah [Mr. BENNETT] is paired with the Senator from Illinois [Mr. DOUGLAS]. If present and voting, the Senator from Utah would vote "yea," and the Senator from Illinois would vote "nay."

The result was announced—yeas 43, nays 46, as follows:

[No. 190]

YEAS—43

Allott	Ervin	Prouty
Beall	Goldwater	Robertson
Boggs	Holland	Russell
Butler	Hruska	Saltonstall
Byrd, Va.	Jackson	Schoeppel
Cannon	Jordan	Scott
Capehart	Kerr	Smathers
Case, S. Dak.	Kuchel	Smith, Maine
Cotton	Lausche	Stennis
Curtis	Magnuson	Talmadge
Dirksen	McCarthy	Thurmond
Dodd	McClellan	Tower
Dworshak	Miller	Williams, Del.
Eastland	Morton	
Ellender	Mundt

Gore	McGee	Yarborough
Gruening	McNamara	Young, Ohio
Hart	Metcalf	
Hartke	Monroney	

NOT VOTING—11

Aiken	Carlson	Hayden
Anderson	Chavez	Neuberger
Bennett	Douglas	Young, N. Dak.
Bridges	Fulbright	

So the amendment was rejected.

Mr. DIRKSEN. Mr. President, I submit a motion.

The PRESIDING OFFICER. The motion submitted by the Senator from Illinois will be stated.

The LEGISLATIVE CLERK. The Senator from Illinois [Mr. DIRKSEN] moves to refer the pending bill to the Senate Committee on Armed Services.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Illinois.

Mr. DIRKSEN. Mr. President, I shall take only 1 minute on the motion. I point out that on page 3 of the bill, line 17, under "definitions," in section 3 appears this language:

As used in this Act—

(a) The term "disarmament" includes the elimination, reduction, control, limitation, inspection, verification, or identification, of armed forces and armaments of all kinds under international agreement, including the necessary steps taken under such an agreement to establish an effective system of international control or to create and strengthen international organizations for the maintenance of peace.

Mr. DIRKSEN. Mr. President, I cannot imagine that the Senate would vote on this bill unless it first had the benefit of the views of the Committee on

Armed Services of the Senate. I think, properly speaking, it should have been referred there before it ever came to the floor of the Senate. That is all I need say, I think, in view of the definition of "disarmament," as to why the motion to commit to the Committee on Armed Services of the Senate should prevail.

Mr. BUSH and Mr. MANSFIELD addressed the Chair.

Mr. DIRKSEN. I yield first to the Senator from Connecticut.

Mr. BUSH. Would the Senator accept a modification of his amendment, that the Armed Services Committee report by a date certain?

Mr. DIRKSEN. I would have no objection. My only desire is to see that those who are dealing essentially with the security of the country have a chance to consider this bill, call in those persons whom they think can offer testimony of value, and then send it back to the Senate.

Mr. BUSH. Would the Senator be willing to modify his amendment by providing that the Armed Services Committee shall report back to the Senate not later than February 1, 1962, let us say?

Mr. DIRKSEN. I have no objection.

Mr. BUSH. It is up to the Senator to modify his motion.

Mr. DIRKSEN. If the clerks will take note of the language, because my motion is a simple one to refer the bill to the Committee on Armed Services, the additional language would be, "with instructions to report back on or before the first of February 1962."

Mr. MUNDT and Mr. MANSFIELD addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Illinois so modify his motion?

Mr. DIRKSEN. I so modify it.

I yield to the Senator from South Dakota.

Mr. MUNDT. Mr. President, as one who would like to vote for this type of disarmament bill with some perfecting amendments. I hope the Senate will follow the deferment proposal of Senator DIRKSEN, for two valid reasons. I think the Armed Services Committee should have a look at the bill; but, even more important, if we were to pass this proposed legislation today, it would go down in history as the masterpiece of bad timing by the U.S. Senate in all of our American history. At a time when Russia is exploding atomic bombs almost every day and trying to intimidate the free world, I would dislike having the report go out that the U.S. Senate is voting for a disarmament program which could be misinterpreted to be an indication of appeasement and weakness on our part. As of February 1, I hope we can enact legislation on disarmament in a better world climate and without the likelihood that our action will be interpreted as just one more timid reaction to Communist boldness and aggressive activity. Let us not permit it to appear that the United States of America is once more being pushed around.

Mr. DIRKSEN. Mr. President, it is a very simple motion. It requires very little discussion. I am prepared to ask unanimous consent that the time on the motion be limited to 10 minutes, 5 minutes on the side, or whatever time is agreeable.

Mr. CASE of South Dakota. Mr. President, reserving the right to object, I shall want a little time, because I shall want to present the amendment which I had intended to offer. At least, I shall want some time.

Mr. BUSH. On the amendment?

Mr. CASE of South Dakota. Before the motion is voted upon.

Mr. DIRKSEN. Before the motion is voted upon.

The PRESIDING OFFICER. Does the Senator desire time on the motion?

Mr. CASE of South Dakota. I should like to have some time before a vote is taken on the motion.

Mr. DIRKSEN. Mr. President, I modify the request and suggest that the time be limited to 20 minutes, 10 minutes to a side, on this motion alone.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Illinois?

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. GOLDWATER. I agree with the distinguished Senator from South Dakota [Mr. MUNDT] in the observation that today would be a most unfortunate day for the Senate of the United States to pass the proposed legislation. Mr. Khrushchev has said today that he is willing to talk. How will this look to the people of the United States and to the people of the world? We know there is no concession, but this could be very easily misunderstood by our friends around the world as a part of the yielding process to Khrushchev—as a part of the deal, we might say.

I am extremely hopeful that the Senate will send the bill to the Committee on Armed Services for its study, so that we will not make the unfortunate mistake of passing it today.

Mr. BUSH. Mr. President, reserving the right to object——

Mr. MANSFIELD. We will give the Senator from Connecticut some time.

Mr. BUSH. Very well. I should like to have 1 minute.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Illinois?

Mr. HICKENLOOPER. Mr. President, reserving the right to object——

The PRESIDING OFFICER. The Senator from Iowa is recognized.

Mr. HICKENLOOPER. I shall not object.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Illinois? The Chair hears none, and it is so ordered.

Mr. BUSH. Mr. President, will the Senator yield me 1 minute?

Mr. DIRKSEN. I yield 1 minute to the Senator from Connecticut.

Mr. BUSH. Mr. President, I think this is an appropriate motion. I came to the Senate this morning intending to vote for the bill as reported. I have listened carefully to the debate. I listened to the Senator from Georgia, the distinguished chairman of the Committee on Armed Services, express his view on the bill and his thought that the bill ought to go to the Committee on Armed Services.

The more I have thought about it, the more I think it is correct that the bill should be reviewed by the Committee on Armed Services. As a member of that committee, I shall be glad to have it referred to the committee.

I still intend to vote for the bill, and I hope we can have a satisfactory bill reported by the committee. I am delighted the Senator from Illinois has accepted the modification, to require that the bill be reported to the Senate by February 1 of next year.

Mr. DIRKSEN. Mr. President, I yield 2 minutes to the Senator from Iowa [Mr. HICKENLOOPER].

Mr. HICKENLOOPER. I thank the Senator from Illinois.

As I said earlier today, I supported the bill as it came from the committee. The bill was reported unanimously.

I think there are certain things which are wrong with the bill. However, it is a much better bill than when it was sent to the committee. It was corrected a great deal by the committee.

I feel very deeply that the bill cuts across all kinds of lines in our Government; atomic energy, Armed Forces, various scientific organizations, and others.

I said to the Senator from Georgia this morning that if a motion were made to refer the bill to the Committee on Armed Services I would support the motion, because I think the Committee on Armed Services should take a look at the bill from the standpoint of the Armed Forces of the United States. That does not mean I am necessarily against the bill. I voted to report the bill. I expect to vote for the bill on the question of passage, if that question comes before the Senate.

I think the Senate owes it to the country and owes it to our national security to permit the Committee on Armed Services of the Senate to take a look at the bill from the standpoint of the military security of the country and what the bill would do.

Mr. DIRKSEN. Mr. President, I ask for the yeas and nays on the motion.

The yeas and nays were ordered.

Mr. MANSFIELD. Mr. President, we have heard arguments this afternoon that the proposal now before the Senate should be referred to the Committee on Armed Services. I was surprised to hear some of my colleagues express support for that suggestion. I do not refer to the distinguished minority leader.

I know that members of the Committee on Armed Services did make their views known to the Committee on Foreign Relations. I know that the Subcommittee on National Policy Machinery made its views known to the Committee on Foreign Relations. I know the distinguished chairman of the Committee on Armed Services indicated an intense interest, until quite recently, in having the proposal referred to the Committee on Armed Services.

But on the basis of what was done by the Committee on Foreign Relations, the chairman of the Committee on Armed Services this morning stated that he would not ask to have the bill referred to his committee. The chairman of the Committee on Armed Services made that statement on the floor this morning.

Mr. RUSSELL. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. RUSSELL. The Senator has in effect quoted me correctly, but I stated that it was because of the amendments and because of the fact that I did not think the committee could report the bill back at this session of the Senate. If the Senator will look at the RECORD, he will see that that was my statement.

Mr. MANSFIELD. The Senator is correct.

The Senator will agree with me, I believe, that on the basis of the bill and the reports which have been brought to his attention in the last several days, a great change has been made in the original proposal which was advancd to the Committee on Foreign Relations.

Mr. President, the Committee on Foreign Relations heard compelling testimony in behalf of the bill. The bill was reported by a vote of 17 to nothing. The committee heard testimony from Frederick M. Eaton, former Ambassador to the Ten Nation Conference on Comprehensive Disarmament; Trevor Gardner; Thomas Gates, former Secretary of Defense; Roswell L. Gilpatric, present Deputy Secretary of Defense; Gen. Alfred M. Gruenther; Christian A. Herter: Arthur Larson; Gen. Lyman L. Lemnitzer; Henry Cabot Lodge; Robert Lovett; John J. McCloy; Dean Rusk; C. M. Stanley; James J. Wadsworth; as well as a number of others; all of whom unanimously advocated the reporting of the proposal.

I point out, Mr. President, that the Senate Committee on Foreign Relations is on trial, on the basis of the motion made. What Senators should take into account is the fact that for many days the committee met, heard numerous witnesses, and then arrived at a unanimous decision. What confidence do Senators have in the committees they have set up to do the work for them in specialized fields? Either the Committee on Foreign Relations has done a good job or it has not. If it has, the bill is entitled to a vote—not a vote on referral or committal, but a vote on the basis of the facts which the members have brought to the attention of the Senate and have stated in the report as a result of their hearings.

The committee is made up of both Republicans and Democrats, who are good men. The committee has spent much time on this proposal. I think the very least the committee is entitled to is the courtesy of a "yea" or "nay" vote, not on the motion to commit, but on the question of passage.

It is understood that with the limitations placed in the proposal it will not be used to such an extent as to thwart, to estop, or to hinder in any way the continued strengthening of the defenses of this country.

Much work is being put before the Senate for its consideration. If, on the basis of 20 minutes' discussion, Senators are going to vote to refer the bill to another committee, then I think there is something wrong with the committee system and it ought to be looked into.

Mr. McCARTHY. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield to the Senator from Minnesota.

Mr. McCARTHY. Mr. President, I have grave reservations about the proposal to establish the new Agency. I do not know that the subject should be committed to the Committee on Armed Services. But, as I have read the statements of the authorities, experts, and advocates whose statements are cited in the report of the Committee on Foreign Relations, I note that almost everyone has made some reference to the need for better organization. I cite the following authorities who have stated:

John J. McCloy: "* * * there are incidents in the arms race that do create a certain instability and * * * it is imperative of statesmen to * * * bring the best talents to bear that we know how to find and produce to cope with this problem."

Roswell L. Gilpatric: "* * * the Joint Chiefs of Staff recognize the need for centralized control and direction of U.S. arms control efforts."

Robert A. Lovett: "* * * I believe that the present method of dealing with disarmament problems is far too dispersed and fragmentized to make possible the orderly planning, policymaking, and supervisory procedures which, * * * are increasingly necessary as man's ingenuity in killing himself continues to outrun his self-restraint."

Alfred M. Gruenther: "I favor * * * the type of organization that will conduct the necessary research and study to give us a sound position and to remove the propaganda disadvantage under which we work on various occasions."

Frederick M. Eaton: "* * * we must promptly establish a Disarmament Agency with adequate authority to coordinate and direct the activities of the numerous Government agencies involved, so that we may be in a position to advance and consider every proposal in this critical area."

Christian A. Herter: "* * * continuity is very important in a matter that is as complex as that of disarmament."

Again, the question of procedure arose. So on down through the list. I doubt whether the Committee on Foreign Relations should have been assigned the responsibility of considering the bill. It seems to me that the Committee on Government Operations should have studied the bill, because questions of procedure are involved. It is proposed to establish a new agency of Government, and the bill should have been referred to the Senate Committee on Government Operations.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield.

Mr. MANSFIELD. It is my understanding that originally the bill was referred to the Committee on Government Operations, and that subsequently it was rereferred to the Committee on Foreign Relations. Is that correct?

Mr. HUMPHREY. That is correct.

Mr. McCARTHY. In that case, if the bill is being passed around, perhaps it should be passed to the Committee on Armed Services.

Mr. MANSFIELD. If that is the manner in which we are to carry on the operations of the Senate, I think we had better overhaul the committee procedure. If the Senate has a committee which has a certain responsibility, we had better call upon that committee to discharge its responsibility. If we are to pass legislation from committee to committee, I think there is something wrong with our committee system; and clearly something should be done to bring about a reorganization of it.

Mr. MUNDT. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield to the Senator from South Dakota.

Mr. MUNDT. This bill was never considered by the Committee on Government Operations. It may have been referred to our committee and later referred to the Committee on Foreign Relations. But the Committee on Government Operations never considered it at any time.

We have something to consider today, however, which is much more important than arguing about committee jurisdiction, something also much more important than the question whether or not the vote will be considered to be a pat on the back or some kind of imaginary criticism of the Senate Committee on Foreign Relations. It certainly will not be that.

The Committee on Foreign Relations reported a bill. I would have been prepared to vote for that bill as it is 2 or 3 weeks ago. But on this 8th day of September 1961, on the 4th or 5th day of successive atomic bomb tests by the Soviet Union, after they had succeeded in waging psychological warfare against the neutralized conferees in Belgrade to the point that that body enacted resolutions that dealt with the perils of the 18th and 19th centuries and almost completely ignored the dangerous situation created by Khrushchev in the 20th century, I do not think the Senate should take any action which the Communist world might misinterpret through its reports and propaganda to indicate to all the world that a feeling of appeasement or fearfulness is creeping over this body and pervading America.

We are not asked to recommit the bill. We would refer it to another committee which has a rightful interest, because the bill deals with the whole problem of national defense and with our armed services. The Committee on the Armed Forces is the committee that is most intimately related to that particular problem and by delaying action until February 1. We shall lose nothing except the dangerous consequences to peace which could very well flow from the propaganda opportunities we shall present the Communist overlords if we vote affirmatively on this measure today. I wholeheartedly support the purpose of this bill but I heavyheartedly warn against the wisdom of injecting this element into the international situation at this specific and significant time.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MUNDT. I hope the motion will be agreed to.

Mr. MANSFIELD. Mr. President, I yield 2 minutes to the Senator from Minnesota.

Mr. HUMPHREY. Mr. President, I fully recognize the right of any Senator to advocate referring a bill to any committee he desires. I merely wish to clarify the RECORD. When the bill was first referred to the Committee on Government Operations, of which the Senator from Arkansas [Mr. MCCLELLAN] is the chairman, the chairman of the Committee on Foreign Relations [Mr. FULBRIGHT] and the chairman of the Committee on Government Operations [Mr. MCCLELLAN] had a discussion, and the bill was rereferred to the Committee on Foreign Relations.

Mr. MUNDT. Without any consideration by our committee.

Mr. HUMPHREY. Without any consideration by the Committee on Government Operations.

Mr. MUNDT. The Senator is correct.

Mr. HUMPHREY. The bill could have been referred to one, two, or three different committees. Many other bills are so referred. For example, consider a bill which deals with tariffs. The question of tariffs surely affects foreign relations, but tariff bills are considered by the Committee on Finance, and the members of the Committee on Foreign Relations rely upon the decision of the Committee on Finance in the field of tariffs. Yet is there any question more vital to our foreign policy than tariffs?

When we enter the area of defense, questions related to defense affect our foreign policy. Oversea bases surely affect our foreign policy. But who would think of transferring a military construction bill from the Committee on Armed Services to the Committee on Foreign Relations?

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. LONG of Louisiana. Actually the whole reciprocal trade program is referred to the Committee on Finance, as the Senator well knows. Questions related to social security, as well as questions related to public welfare, are referred to the Committee on Finance. Logically, such questions should be referred to the Committee on Labor and Public Welfare, because subjects related to the original Social Security Act are referred to that committee.

Another example is the Sugar Act. The Sugar Act is nothing more or less than a tariff, containing quotas. That measure has been referred to the Committee on Finance. Logically one might say that it should be considered by the Committee on Foreign Relations. There are a number of hiatuses in the rules, but we know that such bills are referred to one committee or another.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HUMPHREY. Mr. President, I do not wish to cast any reflection or pass judgment upon the ability or jurisdiction of any committee. The bill was referred to the Committee on Foreign Relations. Hearings were opened by the Senator from Arkansas [Mr. FULBRIGHT]. The hearings were continued by the Senator from Alabama [Mr. SPARKMAN]. There were several days of hearings. We had days of markup. We reported what we thought was a reasonably good bill. The bill does not vest new authority. The bill does what every witness who came before the committee requested. It provides machinery to coordinate the vast activities of the Government in the fields of disarmament research and disarmament negotiations.

When President Eisenhower, President Kennedy, Secretary of Defense McNamara, Secretary of Defense Lovett, Secretary of Defense Gates, Secretary of State Herter, Secretary of State Rusk, and other witnesses said that we needed this Agency, and many responsible people testified for it, I think it would have looked foolish for us to act contrary to their recommendations.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. DIRKSEN. Mr. President, I yield myself 1 minute. I know the answer to the question I am about to ask, but I would like to get it from high authority. I shall ask the chairman of the Committee on Armed Services whether it is unusual to refer a bill, particularly one of the nature of the bill before the Senate, to another committee which has jurisdiction over a part of the subject matter.

Mr. RUSSELL. Mr. President, will the Senator yield at least 1 minute?

Mr. DIRKSEN. I yield 1 minute.

Mr. RUSSELL. Of course, there is nothing unusual about that procedure. I have often observed three committees studying a bill. In this case, when the bill was first introduced, the question of jurisdiction was raised. I discussed it with the Senator from Minnesota [Mr. HUMPHREY] and the Parliamentarian, and insisted that the bill should go to the Committee on Armed Services. After examining the rules, the Parliamentarian decided that the bill should be referred to the Committee on Government Operations. I examined the rules and decided that such a referral was appropriate; and that, inasmuch as the bill would create a new agency, it should go to the Committee on Government Operations.

I do not know how the bill got out of the Committee on Government Operations and into the Committee on Foreign Relations. But the question of jurisdiction was raised at that time; and inasmuch as I agreed that the bill should be referred to the Committee on Government Operations, I do not make a fight for jurisdiction now.

In answer to the question of the Senator, every Senator who has served for any length of time has seen bills considered by two committees, and I have seen them considered by as many as three.

Mr. DIRKSEN. Mr. President, I shall use the remainder of my 1 minute to read one sentence on page 2 of the bill, which is an amendment written in by the committee:

> Disarmament policy, being an important aspect of foreign policy, must be consistent with national security policy as a whole.

If that language does not bring the bill within the orbit of the Committee on Armed Services, then I do not understand the English language.

I yield 2 minutes to the distinguished Senator from South Dakota.

Mr. CASE of South Dakota. Mr. President, the bill was before the Committee on Government Operations for 1 month and 4 days. It was introduced on the 29th of June. On the 3d of August the Committee on Government Operations was discharged and the bill was referred to the Committee on Foreign Relations. It was before that committee for a month and 3 days, being reported on the 6th of September.

As a member of the Committee on Armed Services, naturally I feel that it would be appropriate that the bill should be referred to or considered by that committee in order that the full compass of the bill might be properly studied. However, the dilemma in which we now find ourselves is due to the fact that the committee in charge of the bill fails to take note of the point I tried to make earlier in the day. That point was that after the speech by Khrushchev on disarmament last night, our position before the world would be misunderstood if we should pass the bill today and leave it as a bill for disarmament. That is why I proposed that the title be changed and that the name of the Agency be changed to "U.S. Advisory Agency on Arms Control, Peace, and Security."

The distinguished Senator from Iowa has suggested that he would like to join in the amendment and make it "the Advisory Agency on Arms Control, Disarmament, Peace, and Security."

Mr. President, our national policy has not been that of total disarmament.

We have talked about arms control. If the bill is referred to the Committee on Armed Services, I shall attempt there to effect this amendment. If the present motion is rejected, I shall offer an amendment from the floor.

Mr. DIRKSEN. I yield the remaining minute to the Senator from Texas.

Mr. TOWER. Mr. President, in the present conflict against the forces of imperialistic communism, the battle will go to the strong. There will be a time when the uncommitted nations will commit themselves. They will not commit themselves necessarily to the side they believe to be morally right. They will commit themselves to the side they believe to be strongest. If we pass the bill at this time, it will be interpreted all over the world as an act of conciliation, weakness, and perhaps even capitulation.

Mr. HUMPHREY. Does any time remain?

The PRESIDING OFFICER. No time remains on either side. The yeas and nays have been ordered, and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. CAPEHART (after having voted in the affirmative). On this vote I have a pair with the Senator from Illinois [Mr. DOUGLAS]. If he were present and voting he would vote "nay." If I were permitted to vote, I would vote "yea." I therefore withdraw my vote.

Mr. TALMADGE (after having voted in the affirmative). I have a pair on this vote with the Senator from Arkansas [Mr. FULBRIGHT]. If he were present and voting he would vote "nay." If I were at liberty to vote, I would vote "yea." I therefore withdraw my vote.

Mr. HUMPHREY. I announce that the Senator from Illinois [Mr. DOUGLAS], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Arizona [Mr. HAYDEN], and the Senator from Massachusetts [Mr. SMITH] are absent on official business.

I also announce that the Senator from New Mexico [Mr. ANDERSON] and the Senator from New Mexico [Mr. CHAVEZ] are absent because of illness.

On this vote, the Senator from New Mexico [Mr. ANDERSON] is paired with the Senator from Utah [Mr. BENNETT]. If present and voting, the Senator from New Mexico would vote "nay," and the Senator from Utah would vote "yea."

I further announce that, if present and voting, the Senator from New Mexico [Mr. CHAVEZ], the Senator from Illinois [Mr. DOUGLAS], the Senator from Arizona [Mr. HAYDEN], and the Senator from Massachusetts [Mr. SMITH] would each vote "nay."

Mr. KUCHEL. I announce that the Senator from Vermont [Mr. AIKEN] is absent on official business.

The Senator from Utah [Mr. BENNETT] and the Senator from North Dakota [Mr. YOUNG] are necessarily absent.

The Senator from New Hampshire [Mr. BRIDGES] and the Senator from Kansas [Mr. CARLSON] are absent because of illness.

On this vote, the Senator from Utah [Mr. BENNETT] is paired with the Senator from New Mexico [Mr. ANDERSON]. If present and voting, the Senator from Utah would vote "yea," and the Senator from New Mexico would vote "nay."

The result was announced—yeas 33, nays 54, as follows:

[No. 191]

YEAS—33

Allott	Eastland	McClellan
Beall	Ellender	Mundt
Bush	Fong	Prouty
Butler	Goldwater	Robertson
Byrd, Va.	Hickenlooper	Russell
Cannon	Holland	Saltonstall
Case, S. Dak.	Hruska	Schoeppel
Cotton	Jackson	Smith, Maine
Curtis	Kerr	Stennis
Dirksen	Kuchel	Thurmond
Dworshak	Lausche	Tower

NAYS—54

Bartlett	Ervin	Kefauver
Bible	Gore	Long, Mo.
Boggs	Gruening	Long, Hawaii
Burdick	Hart	Long, La.
Byrd, W. Va.	Hartke	Magnuson
Carroll	Hickey	Mansfield
Case, N.J.	Hill	McCarthy
Church	Humphrey	McGee
Clark	Javits	McNamara
Cooper	Johnston	Metcalf
Dodd	Jordan	Miller
Engle	Keating	Monroney
Morse	Pell	Symington
Morton	Proxmire	Wiley
Moss	Randolph	Williams, N.J.
Muskie	Scott	Williams, Del.
Neuberger	Smathers	Yarborough
Pastore	Sparkman	Young, Ohio

NOT VOTING—13

Aiken	Carlson	Smith, Mass.
Anderson	Chavez	Talmadge
Bennett	Douglas	Young, N. Dak.
Bridges	Fulbright	
Capehart	Hayden	

So Mr. DIRKSEN's motion was rejected.

Mr. SPARKMAN. Mr. President, I move that the Senate reconsider the vote by which the motion to commit was rejected.

Mr. HUMPHREY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

LEGISLATIVE PROGRAM — ORDER FOR ADJOURNMENT TO MONDAY AT 9 A.M.

Mr. DIRKSEN. Mr. President, while many Senators are in the Chamber, I wish to make inquiry of the distinguished majority leader concerning the program for the remainder of the day and for the remainder of the week, in the hope that there may be good news for the Senate so far as Saturday is concerned.

Mr. MANSFIELD. Mr. President, upon the conclusion of action on the bill now before the Senate, it is the intention to bring up Calendar No. 734, S. 1563, to authorize the conveyance of certain lands within the Clark Hill Reservoir, Savannah River, Georgia-South Carolina, to the Georgia-South Carolina Council, Inc., Boy Scouts of America, for recreation and camping purposes. The Senator from Georgia [Mr. RUSSELL] and the Senator from Oregon [Mr. MORSE] have an interest in the bill. I understand that its consideration can be finished in about 15 minutes.

Following the conclusion of action on that bill, it is the intention of the leadership to bring up Calendar No. 592, H.R. 2010, the so-called Mexican labor bill, and to remain in session until it is disposed of.

Then, if the Senate is willing and agreeable, it is the intention of the leadership to suggest that at the conclusion of the action on the Mexican labor bill the Senate go over until 9 o'clock on Monday morning next.

Mr. DIRKSEN. Mr. President, I know the entire Senate will be grateful to the majority leader for his affability and for thinking of the convenience of the Members, so many of whom have speaking engagements at home, and who are always grateful for his kindness and consideration.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate concludes its business today, it adjourn until 9 o'clock on Monday morning next.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DIRKSEN. Mr. President, I wish to query the majority leader about the measures which will come up for consideration on Monday.

Mr. MANSFIELD. It is hoped that at the conclusion of the consideration of the Mexican labor bill we may lay before the Senate Calendar No. 719, S. 2393, so that at the conclusion of morning business on Monday next, the Senate may embark on a discussion of aid to schools in impacted areas.

Mr. DIRKSEN. I thank the majority leader.

U.S. DISARMAMENT AGENCY FOR WORLD PEACE AND SECURITY

The Senate resumed the consideration of the bill (S. 2180) to establish a U.S. Disarmament Agency for World Peace and Security.

Mr. BUSH. Mr. President, have the yeas and nays been ordered on the passage of the disarmament agency bill?

The PRESIDING OFFICER. Not as yet.

Mr. BUSH. Mr. President, on the passage of the bill, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. ROBERTSON. Mr. President, I wish to offer an amendment, beginning on page 25 of the bill, to restore the language relating to the audit by the Comptroller General. The amendment is to restore the language commencing on line 17 and continuing through line 13 on page 26.

I consulted with the Honorable John J. McCloy, who submitted a draft of the bill and is very much interested in the proposed legislation. He told me it was essential that the bill pass.

I asked him about the denial of the right of the Comptroller General, who reports to Congress, to audit, and he said he did not know the provision had been taken out.

Then I conferred with the distinguished Senator from Ohio [Mr. LAUSCHE], who is always alert to economy measures, and he said he did not know it had been taken out.

Then I conferred with the patron of the bill, and he said he did not know it had been taken out.

Then I conferred with the distinguished Senator from Alabama, my desk mate, and he said he did not know it had been taken out. So, evidently it came out by some mistake. Therefore, I have moved to restore the language.

Mr. SPARKMAN. Mr. President, will the Senator from Virginia yield?

Mr. ROBERTSON. I yield.

Mr. SPARKMAN. I have made some inquiry since I first spoke with the Senator from Virginia. I think I can give him an explanation now as to how the language was taken out.

After the committee had reached agreement, and had agreed definitely that the agency was to be within the Department of State, under the direction of an Under Secretary of State, when the bill was redrafted the language was taken out, for the simple reason that all the functions of the Department of State are already subject to the control act; and therefore an audit of this agency would be duplication.

Certainly so far as I am concerned I would have no objection to putting it

back in. But it was felt it would be a duplication.

Mr. ROBERTSON. If it is just a question of drafting——

Mr. HUMPHREY. That is right.

Mr. ROBERTSON. Then I shall withdraw my amendment.

Mr. HUMPHREY. Mr. President, I wish the Senator from Virginia would not withdraw his amendment. After I went to the cloakroom and examined the language, I recalled very well why the language was omitted; and the reason was as the Senator from Alabama has stated.

But I believe it should be put back in. I think it provides for the kind of precaution that is necessary.

So I hope the amendment of the Senator from Virginia will be adopted.

Mr. ROBERTSON. Then, Mr. President, I ask for a vote on my amendment.

The PRESIDING OFFICER. The amendment of the Senator from Virginia will be stated.

The CHIEF CLERK. On page 25, after line 16, it is proposed to insert lines 17 through 25, and, on page 26, lines 1 through 13, as follows:

COMPTROLLER GENERAL AUDIT

SEC. 46. No moneys appropriated for the purpose of this Act shall be available for payment under any contract with the Director, negotiated without advertising, except contracts with any foreign government, international organization, or any agency thereof, unless such contract includes a clause to the effect that the Comptroller General of the United States or any of his duly authorized representatives shall, until the expiration of three years after final payment, have access to and the right to examine any directly pertinent books, documents, papers, and records of the contractor or any of his subcontractors engaged in the performance of, and involving transactions related to such contracts or subcontracts: *Provided, however,* That no moneys so appropriated shall be available for payment under such contract which includes any provisions precluding an audit of the General Accounting Office of any transaction under such contract: *And provided further,* That nothing in this section shall preclude the earlier disposal of contractor and subcontractor records in accordance with records disposal schedules agreed upon between the Director and the General Accounting Office.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Virginia.

The amendment was agreed to.

Mr. CASE of South Dakota. Mr. President, I call up the amendment which I have at the desk. The amendment is offered by me, on behalf of myself and the Senator from Iowa [Mr. MILLER].

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 1, it is proposed to amend the title so as to read: "To establish a United States Agency on Arms Control, Peace, and Security".

And in lines 6 and 7, strike out the words "Disarmament Act for World Peace and Security" and insert in lieu thereof "Act for Arms Control, Peace, and Security".

On page 4, line 12, strike out the words "Disarmament Agency for World Peace and Security" and insert in lieu thereof "Agency for Arms Control, Peace, and Security".

On page 5, line 2, strike out the words "United States Disarmament Agency for World Peace and Security", and insert in lieu thereof "United States Agency on Arms Control, Peace, and Security", and make the same change in lines 5, 6, and 7 on page 5.

And in line 17 on page 5 and in line 1 on page 6, strike out the word "Disarmament" and insert in lieu thereof "Arms Control" so that the head of the Agency shall be known as the "Under Secretary for Arms Control".

Mr. CASE of South Dakota. On page 2, the committee amendment in line 10 reads as follows:

Disarmament policy being an important aspect of foreign policy, must be consistent with national security policy as a whole.

It is because of my belief that that is true that I have offered this amendment. The national policy of the United States is not for a capitulation or for throwing away all our arms tomorrow or for complete abandonment of our strength. Instead, the national policy of the United States is for arms control with adequate inspection.

In view of the speech made by Premier Khrushchev, as reported today by the news services, it seems to me it is important that we make clear that this Agency is to be one for arms control, peace, and security.

Mr. HUMPHREY. Mr. President, will the Senator from South Dakota yield?

Mr. CASE of South Dakota. I yield.

Mr. HUMPHREY. Mr. President, I have talked to the majority leader, and I understand that he has indicated to the Senator from South Dakota that, in the judgment of the majority leader, such an adjustment might well be made in the bill—because I believe we have the identical objective.

Mr. CASE of South Dakota. I think so, too.

Mr. HUMPHREY. Earlier today, I argued with the Senator in regard to what I believe is the value of these words. Will he be willing to modify his amendment, so that the title would read: "To establish a U.S. Arms Control Agency"—and eliminate the word "Disarmament"—"for World Peace, Disarmament, and Security."

After all, the ultimate objective is controlled disarmament; is it not?

Mr. CASE of South Dakota. That is correct.

Mr. HUMPHREY. That is the objective; and in the title we are referring, first of all, to establishing an arms control agency, and its purpose would be world peace, disarmament, and security.

Mr. CASE of South Dakota. Mr. President, I modify my amendment accordingly.

Mr. COOPER. Mr. President, will the Senator from South Dakota yield?

The PRESIDING OFFICER (Mr. HART in the chair). Does the Senator from South Dakota yield to the Senator from Kentucky?

Mr. CASE of South Dakota. I yield.

Mr. COOPER. I intervene because I was very much interested in the colloquy earlier today between the Senator from Minnesota and the Senator from South Dakota [Mr. CASE] and their present colloquy.

I agree with the Senator from South Dakota that our policy has been one of arms control and limitations. Perhaps we have never said we would completely disarm; but for all practical purposes, if we ever achieved disarmament with effective controls—it would be disarmament in the sense that no country would be able to start, or carry on a total war, and certainly not a nuclear war; and in that sense it would be true disarmament.

I have talked to Mr. John McCloy and to others who have worked in the field of disarmament negotiations, and they say the word "disarmament" is important; and that is what the Senator from Minnesota said a while ago.

Mr. HUMPHREY. Yes, indeed.

Mr. COOPER. The term "disarmament is important. We seek a true disarmament in the sense that arms would be limited, inspected, and controlled in such a way that neither the United States nor the Soviet Union nor any other country would be able to wage a total war to destroy mankind.

If that is the real essence of the meaning of disarmament—rather than the strict definition—and it is—and if that is what we are trying to say to the world, why not say it? Why abandon the word "disarmament?" Why become so afraid of this word? Why change it to words of literal definition, which will not mean anything to the world.

Mr. CASE of South Dakota. Mr. President, I think the amendment will mean something to the world. But no Senator will be able to understand the full force of the argument I am about to make in connection with the amendment unless he first has read the news reports about the statement made last night by Premier Khrushchev. He is proposing disarmament to the world.

The action taken today by the Senate, if limited to disarmament, and without emphasizing the arms control aspects, will, I fear, be subject to the interpretation which earlier today the Senator from South Dakota [Mr. MUNDT] and the Senator from Texas [Mr. TOWER] put on it; namely, that if the Senate today were to propose disarmament, the proposal would seem to amount to capitulation or acceptance of the Khrushchev proposal.

My amendment, as modified in accordance with the suggestion made by the Senator from Minnesota [Mr. HUMPHREY], will change the title of the bill to such an extent that the title then will be, "To establish a U.S. Arms Control Agency for World Peace, Disarmament, and Security."

Mr. CLARK. Mr. President, will the Senator from South Dakota yield?

Mr. CASE of South Dakota. I yield.

Mr. CLARK. Will the Senator agree with me that arms control is the first step on the road to disarmament?

Mr. CASE of South Dakota. Yes, it is.

Mr. CLARK. I thank the Senator. With that understanding, I would not oppose his amendment.

Mr. COOPER. Mr. President, will the Senator from South Dakota yield?

Mr. CASE of South Dakota. I yield.

Mr. COOPER. I have always had the greatest respect for the Senator from South Dakota [Mr. CASE] and for his care and precision. He is always constructive, and I have the greatest respect for his proposals.

I recognize that the term "disarmament" may not be a precise description of what we have offered to do in the past and what we still propose in negotiations. But I say that this bill, in its broad meaning, does deal with true disarmament. A true disarmament that the Soviet Union has never proposed, a true disarmament which the Soviet Union has cynically resisted. So let us use the words "Disarmament Agency."

Earlier today a number of distinguished Senators—among them the Senator from Arizona [Mr. GOLDWATER] and the Senator from South Dakota [Mr. MUNDT]—stated that in view of what Khrushchev is reported to have said today—that he is willing to negotiate about Berlin—that if we were to pass this bill today or if the bill as passed is entitled a "disarmament bill," Khrushchev would seize on our action or the world might do so as an indication of weakness on our part. I do not accept this view. To the contrary I believe it derogates of the strength of our country.

President Kennedy—and he has been supported by former President Eisenhower and former President Truman—has stated the rights and commitments of the United States with respect to Berlin. They are the right of the United States to maintain its presence in Berlin, rights of access, and our commitment to protect the freedom of West Berlin. We have stated that we are willing to fight, and go to war and die for these commitments. What more could we do? But if the whole world thinks the United States is frightened by the passage of this bill and that we have nothing else in our policy, I say we need to enlarge and improve our policy respecting Berlin.

In these last days we have had to take military steps to protect our security and commitments—because of the Soviet Union's wrongful acts in Berlin and because of its resumption of tests; but day by day, and week by week, when these steps are taken, and follow each other, it is necessary to take a new initiative, or they will lead us closer and closer to war with the Soviet Union. We have said we would go to war with the Soviet to defend our rights and commitments. Why are we afraid to take a new initiative? I think the world is looking for the United States to take a new initiative toward an honorable negotiation. The passage of a bill is a reaffirmation of our willingness to make new efforts toward an honorable peace. I deny that it is an expression of weakness. I hold it to be an affirmation of our strength and purpose.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. CASE of South Dakota. I yield.

Mr. HUMPHREY. Again I want to associate myself, very openly and clearly and unmistakably, with what the Senator from Kentucky has just said. If we in this body are going to have our votes governed by what are the latest utterances of Khrushchev, then we ought to go home. We are unworthy of being U.S. Senators if we permit the man in the Kremlin to drive us from one end of this country to another. If we are going to stand here and react, like Pavlov's dog, or like trained seals, to what Mr. Khrushchev says and vote in reaction to what he utters, we had better go home. I suppose if Mr. Khrushchev said "peace," we would vote "war." Of course, we will remember what he said. Of course, we will try to understand and fathom the Soviet propaganda line and what the purposes are. But we know what their purposes are and we know exactly what they are doing.

Mr. President, the stature of the Senator from Kentucky has risen again. Some people talk about Russians being 10 feet high, but when I see a Senator stand up as the Senator from Kentucky has stood, and speak with such statesmanship and moral courage, he ought to be saluted.

When we have the Members of this body who are willing not only to put their lives on the line, in terms of the defense of their country, and put their reputations on the line for the purpose of seeking justice and lasting peace, it is a remarkable thing. Let America never get in the position where everything it will do will be governed by the latest utterance of the man in the Kremlin.

Mr. CASE of South Dakota. Mr. President, I certainly hope the Senator from Minnesota and the Senator from Kentucky are not implying that I had been governed by what Mr. Khrushchev has said. So far as that is concerned, I think we have to take into consideration the public opinion of the world. I want the public opinion of the world to believe that the United States is strong, and that we are not going to throw away our arms because Mr. Khrushchev talks about disarmament. I want us to have a policy which is consistent with the position of strength we have taken in the proposal before the United Nations. We have said the thing to do is to have arms control with inspection before we talk about disarmament.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. CASE of South Dakota. I yield.

Mr. BUSH. I regret that I find myself in disagreement with the Senator from South Dakota, with whom I so often agree in the Armed Services Committee; but it seems to me if there is one significant word in the bill, it is the word "disarmament."

Mr. CASE of South Dakota. That word is not eliminated from the bill or from the title by the amendment.

Mr. BUSH. I had understood it was eliminated.

Mr. CASE of South Dakota. No, it is not, as modified and as presently at the desk.

Mr. BUSH. May we have it read? I thought it was eliminated.

Mr. CASE of South Dakota. The Senator from Minnesota [Mr. HUMPHREY] asked for the revision.

Mr. HUMPHREY. I asked the Senator to modify it to read "to establish a U.S. Arms Control Agency for World Peace, Disarmament, and Security."

Mr. BUSH. How does page 1 read?

Mr. HUMPHREY. That would be the title on page 1.

Mr. BUSH. How do lines 6 and 7 read?

Mr. HUMPHREY. "This act may be cited as the 'Arms Control Act for world peace, disarmament, and security.' "

Mr. BUSH. The word "disarmament" is in?

Mr. HUMPHREY. It must be kept in.

Mr. BUSH. It must be kept in.

Mr. MORSE. Mr. President——

Mr. CASE of South Dakota. Does the Senator from Oregon want me to yield?

Mr. MORSE. I want the floor in my own right.

Mr. President, I have a couple of disarmament matters to discuss.

Mr. President, I wish to join the Senator from Minnesota in his high commendation of the Senator from Kentucky [Mr. COOPER]. I consider the Senator from Kentucky one of the great statesmen of my time. I have said so in many places in the United States. I have said so as a Democrat in the State of Kentucky on more than one occasion. I think the Senator from Kentucky again demonstrated here this afternoon the soundness of the statements I have made from time to time about his statesmanship.

I also rise to commend the Senator from Minnesota for the great leadership he has extended to the Senate and to the people of the country in regard to the matter of disarmament.

For years the Senator from Minnesota has been one of the outstanding leaders of this country in the whole matter of the arms race, and in trying to get the world to see, before it is too late, that if we continue this mad nuclear armaments race, it will mean the end of all, including the United States as well as Russia.

I wanted to make this statement this afternoon before we came to a vote on the bill, because I think the Senator from Minnesota [Mr. HUMPHREY] is deserving of the recognition of the great debt of gratitude that the entire Senate, the Congress, and the people of this country owe to him.

Turning to another matter, which I think may be referred to as a disarmament matter——

Mr. CLARK. Mr. President, will the Senator yield at that point, before he goes to another matter?

Mr. MORSE. Briefly.

Mr. CLARK. I should like to express my strong concurrence with the statement made by the Senator from Kentucky. He states my views. So do the Senator from Oregon and the Senator from Minnesota. I would strongly oppose this amendment if I believed it made any real change in the meaning and title of the bill. I concur again with

UNIVERSITY OF MICHIGAN LIBRARIES

what the Senator from Connecticut has said. All it means is that arms control is a first step to disarmament. Disarmament is still desirable.

Mr. MORSE. Does the Senator agree that arms control has to come first, as the first step to disarmament?

Mr. CLARK. Yes.

DISTRICT OF COLUMBIA REVENUE BILL

Mr. MORSE. Mr. President, I now turn to another matter that might properly be referred to as a disarmament matter, too.

I have made a great discovery, or perhaps it should be called a rediscovery, but it is a discovery which the chairman of the House District of Columbia Committee needs to recognize; namely, that this is a bicameral form of government. It is not a unicameral form of government. As a member of the Senate District of Columbia Committee, I want to let the chairman of the House District Committee in on a great big secret, and that is, here is one Member of the Senate who does not propose to have the chairman of the House District of Columbia Committee lay down a mandate to the Senate of the United States and tell us that we will take the House revenue bill or there will be no revenue bill passed, not even a conference.

I let the chairman of the House District of Columbia Committee in on a secret. I never felt better in my life. I am in perfect health, my doctors tell me; and there will be no revenue bill for the District of Columbia passed in this session of Congress if I can prevent it.

I have, in the last hour, obtained some associates who will join with me. We will go to conference on a revenue bill, or there will be no revenue bill.

Let me say to the Senate I have also made an investigation to ascertain that we can go along without a revenue bill well into March and the District of Columbia will continue to function.

This is not the first time we have had this kind of a threat presented to the Senate of the United States by various committees in the House. It is also true in connection with the question of aid to education legislation. The senior Senator from Oregon is all fed up with it.

I happen to believe I have taken an oath to sustain this form of government of ours, and it is bicameral in nature, not unicameral.

I know why there are powerful forces which would prevent the bill from going to conference. It is because the senior Senator from Oregon got some liquor amendments adopted in the Senate, and the liquor lobby does not like that. I am perfectly willing to find out whether the liquor lobby is the stronger, between now and the time we recess.

The senior Senator from Oregon has served longer on the District of Columbia Committee than any other Member of this body, and does not have to take a second place to anyone in respect to dedicated service to the citizens of the District of Columbia. I do not propose to have the House tell the Senate we shall take their bill or leave it. I am ready to leave it now. We can go over into the next session of Congress, and let the public react to the position being taken by certain people in the House in regard to a District of Columbia revenue bill.

I do not propose to have a sales tax crammed down my throat that way, without at least an opportunity to take a bill passed by the Senate into conference with the House, to let the conference procedure of our form of government operate on that bill.

I am making no threats. I am stating a fact, Mr. President, because that is the way it is going to be. I hope due notice of it will be taken by the chairman of the House Committee on the District of Columbia.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. MORSE. I am glad to yield.

Mr. THURMOND. Do I correctly assume, from the remarks of the senior Senator from Oregon, that he is not making any insinuations against the chairman of the Committee on the District of Columbia of the House, the Representative from the Sixth District of South Carolina?

Mr. MORSE. I have not the slightest idea what the motivations of the Representative are.

Mr. THURMOND. I simply wished to have the RECORD show whether the Senator is doing so or not.

Mr. MORSE. My reply is, I have not the slightest notion as to what are the motivations of the Representative in taking the position he is taking.

Mr. THURMOND. Is the Senator imputing bad faith to the Representative from South Carolina?

Mr. MORSE. Not bad faith; only a lapse of good judgment.

Mr. THURMOND. This is the opinion of the Senator from Oregon, with whose judgment a great many people may not agree, however.

Mr. MORSE. Including the Senator from South Carolina.

Mr. THURMOND. That is correct.

Mr. MORSE. That is correct. I have made my statement, and I shall stand on it.

BERLIN: AN INTERNATIONAL CITY?

Mr. MANSFIELD. Mr. President, this morning's New York Times contains a most interesting column by James Reston, the distinguished commentator on national and international affairs. Mr. Reston reports a widespread interest in diplomatic circles on the possibility of an alleviation of the Berlin situation through internationalized control of the entire city—Communist East and free West—with routes of access guarded by an international force of some kind. Mr. Reston neither endorses nor rejects this approach. Nevertheless, he has performed a significant service by bringing it to the attention of the public. It may not hold any great promise at this time, but certainly the slim possibility of a decent rational solution which the approach contains ought not to be overlooked even at this late date.

I ask that the article be included in the RECORD, at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Sept. 8, 1961]

AN INTERNATIONAL CITY—BERLIN?

(By James Reston)

WASHINGTON, September 7.—In the discussions of Berlin in the embassies here these days there is considerable talk about the possibility of internationalizing that city under the United Nations.

Various ideas along this line are being explored as an alternative to the present stalemate and crisis, but all of them envisage negotiations with the Russians for a new Berlin status and a United Nations "presence" in Berlin pending eventual unification of the two Germanys.

One suggestion, for example, is that both East and West Berlin should actually be administered by the international organization as a kind of trust territory, with the routes of access to it internationalized as well.

Another is that the U.N. would not actually govern the city but merely supervise the administration of a new freely elected Berlin government and replace Soviet and Western troops there with a United Nations force.

A third is that the United Nations should reinforce its presence in Berlin by moving some of its specialized agencies, such as the International Refugee Agency, to Berlin, and there is even some discussion of the possibility of moving the permanent headquarters of the U.N. from New York into Berlin.

KENNEDY INTERESTED

The U.S. Government has not taken a position on any of these ideas, but they are known to the President, they have been discussed at the highest levels of this administration, and more will undoubtedly be heard about them if Khrushchev ever stops jumping up and down.

For the time being nobody here wants to talk above a whisper about any new formula for Berlin. Adenauer is engaged in a West German election that is almost as silly as the New York campaign, and until he disposes of Willy Brandt he does not want to take on Emperor Nik.

Of course, all this talk about turning Berlin over to the U.N., or vice versa, rests on the assumption that Khrushchev really is prepared to guarantee free access to a free city. If he is, the U.N. presence in one form or another is at least a method of tesing his sincerity.

The U.N. has established its presence, with varying degrees of success, in Korea, Lebanon, the Gaza Strip, and the Congo. If it can provide a military service in one area, presumably it can provide a civil service in another; so at least runs the argument in the embassies here in Washington.

Khrushchev himself has indicated a willingness to have the United Nations play an unstipulated part in the supervision of any new Berlin and German settlement, but he has not, of course, gone as far as backing a wholly internationalized Berlin.

He has always talked not about the whole of Berlin as a free city but only of West Berlin. As usual in these negotiations, he wants to hold on to what he's got and negotiate for what we've got. Nevertheless, responsible diplomats here think the U.N. may in the end be the instrument for a new approach to the problem.

The principle of allied policy is that the freedom of the people of West Berlin must be maintained. This means that they must have political freedom and economic freedom which rests on uncontrolled access to the West. These things are now being maintained precariously by the presence of Western troops and money.

CONFLICTING ESTIMATES

The question is whether these freedoms could be maintained under a new international agreement in an internationalized city with internationalized corridors to the West. Some officials and diplomats here think they might; others think they could not even if the U.N. itself were moved to the Brandenburg Gate.

Oddly enough, there is more talk here about the most controversial aspect of the idea than anything else. This is the transfer of the U.N. to the former German capital. The argument for this is that the Communists would scarcely try to capture the U.N. itself. The argument against it is that it would make the U.N. a hostage of the Communist world and by moving it behind the Iron Curtain symbolize the rising influence of Moscow.

Accordingly, the idea of internationalizing the city under some form of U.N. supervision is more likely to get serious support in Washington. The President is going to New York to address the U.N. He will emphasize there the importance of increasing the role of the U.N. in the settlement of international disputes. He will offer the U.N. the long-range prospect of moving toward the rule of law and propose a new disarmament plan based on this principle. Whether he will actually suggest using the U.N. as an instrument for reaching a new accommodation in Berlin remains to be seen.

The point is merely that, despite all the noise from Moscow and the apparent indifference to new ideas here, there is some discussion of new approaches in Washington, and the U.N. is very definitely a part of them.

U.S. DISARMAMENT AGENCY FOR WORLD PEACE AND SECURITY

The Senate resumed the consideration of the bill (S. 2180) to establish a U.S. Disarmament Agency for World Peace and Security.

Mr. RANDOLPH. Mr. President, there have been few proposals to come before this body which offer more prospect of hope for mankind than S. 2180, the measure which would establish a U.S. Disarmament Agency for World Peace and Security. It is not only with this thought in mind, but also with a deep sense of personal responsibility that I speak in support of the pending legislation.

Sixteen years ago, as a Member of the House of Representatives, I first introduced a bill, with our esteemed colleague, the senior Senator from Wisconsin [Mr. WILEY], introducing a similar measure in the Senate, to create a Department of Peace. The intervening years have seen a serious deterioration in our relations with the Soviet Union, some 18 or 20 armed conflicts throughout the world, and an acceleration of the nuclear armaments race among the major world powers. Thus, the urgency of such an agency as that proposed in the pending legislation has increased rather than diminished since the Senator from Wisconsin [Mr. WILEY] and I initially acted.

It may seem paradoxical to some that this body would deliberate the establishment of a Disarmament Agency at a time when both the Soviet Union and the United States have announced the resumption of nuclear testing and military buildups. Certainly the prevailing political and psychological climate in our relations with the Soviet-Sino bloc lends small prospect for early advancements in the field of disarmament. But there is little likelihood that the immediate future will bring forth a more auspicious and hospitable environment for our hopes.

In the meanwhile there is much solid and substantive work which can be done in laying the foundations for arms control and eventual disarmament. Our efforts in this field have been spasmodic and lacking in coherency. Without exception, the most knowledgeable witnesses in this field who testified before the Foreign Relations Committee expressed the need for a continuous and coordinated approach to the problems of disarmament. The proposed Agency would provide the administrative framework necessary for continuity and coordination in this field.

Sixteen years ago, even the most prophetic minds could not have foreseen the variety and complexity of the problems which we now face in disarmament. And even today, we really know very little regarding the scientific, technological, economic, and psychological factors relating to arms control and disarmament. The eminent biologist, Dr. Bently Glass, has recently estimated that if the doubling time of scientific knowledge is 10 years, "then there is 64 times as much to know now as in 1900; and by the year 2000, there will be over 2,000 times as much to know."

This prospect staggers the imagination, Mr. President, and yet we know that we cannot halt the advances of scientific knowledge, and we know also that these advances are in themselves morally neutral—that they may be used for the benefit or to the detriment of mankind, depending upon the social and political framework which guides their utilization. Though time may be running out on us, it is still not too late for the United States to take the lead in providing a new foundation for the hopes and aspirations of humanity.

The pending measure, of which I am a cosponsor, under the leadership of the Senator from Minnesota [Mr. HUMPHREY], offers a modest beginning in this direction. It is my hope therefore that this body will approve the bill and that the House of Representatives will act with equal dispatch to establish a U.S. Disarmament Agency for World Peace and Security during the present session of the 87th Congress.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. RANDOLPH. I yield.

Mr. HUMPHREY. I thank the Senator for his fine support, for his cosponsorship of the bill, and for his lifelong endeavors in this area. I merely wished to have the RECORD show quite clearly that this is no recent act on the part of the Senator from West Virginia.

Mr. RANDOLPH. The Senator from Minnesota is most thoughtful. He is exceedingly gracious. I am grateful to him.

Mr. President, I have discussed the need for and some of the functions of the proposed agency in more detail in an article written for the fall issue of World Affairs magazine. I ask unanimous consent that the article be reprinted in the RECORD at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD as follows:

A NEW DISARMAMENT APPROACH ON THE NEW FRONTIER

(By JENNINGS RANDOLPH)

"An ultimate goal of the United States is a world which is free from the scourge of war and the dangers and burdens of armaments; in which the use of force has been subordinated to the rule of law; and in which international adjustments to a changing world are achieved peacefully. It is the purpose of this act to provide impetus toward this goal by creating a new agency of peace to deal with the problem of disarmament."

So reads the first paragraph of section 2, S. 2180, which was introduced in the Senate on June 29 of this year by Senator HUBERT HUMPHREY, a bill which would seek to establish a U.S. Disarmament Agency for World Peace and Security. Among the cosponsors of this measure initiated by the Kennedy administration are Senator ALEXANDER WILEY, of Wisconsin, and the writer, each of us having been among the first congressional proponents of the concept of a Department of Peace headed by a full Secretary of Cabinet rank.

Briefly, to trace the history of those early efforts: on July 7, 1943—when we had only begun to see the early glimpses of victory against the Axis Powers, Senator WILEY first made his suggestion on the floor of the Senate for a Department of Peace.

On June 29, 1945, as a Member of the House of Representatives, I introduced H.R. 3625, to create such a Department, with Senator WILEY introducing a slightly different measure in the Senate on July 6 of that year.

During the hearings on my bill conducted by the House Foreign Affairs Committee in November 1945, I stated my conviction "that it is utter folly to believe that we can keep secret the atomic bomb and other devices of warfare, because it would raise a suspicion among other countries and cause them to develop substitutes which will be just as deadly, perhaps more deadly, within a matter of a very few years." A similar view, of course, was the guiding premise of the Baruch plan to place atomic energy under control of an International Atomic Development Authority, a proposal which in the words of William R. Frye, U.N. correspondent for the Christian Science Monitor "was and is hailed as one of the most generous offers ever made in international negotiations." Little did any of us realize, I believe, the full and dreadful accuracy of our fears regarding an attitude of international laissez faire toward the development of nuclear weapons. These fears, however, had been confirmed when I again introduced my bill, in the Senate, on my return to Congress in 1959.

Senator WILEY, in discussing the proposed Peace Department in 1945, stated that it "would not be a vast propaganda headquarters. Rather, it would be staffed by a small group of experts—specialists—who would assist the Secretary in concentrating on maintaining world peace. I would like to see," stated Senator WILEY, "this great Nation be the first on earth to establish a Department of Peace. And I would like to see the world peace capital on free American soil, not at Geneva, Vienna, or the scene of past failures, hates, fears, and intrigues."

Though the United Nations headquarters today hardly fulfills Senator WILEY's hopes for a world peace capital, it offers the world's best hope for realizing that goal, and its location in New York—to the displeasure still of some Americans—is further evidence of the growing maturity of the American sense of responsibility in world affairs.

UNIVERSITY OF MICHIGAN LIBRARIES

Among the criticism voiced in 1945—as now also—against the proposed Department of Peace was that it was already the function of the Secretary of State to maintain the peace, and that a Secretary of Peace would be a mere bureaucratic redundancy. While we may gratefully acknowledge the dedication of Secretary Rusk to the quiet but continuous search for honorable conditions for peace, this has not always been characteristic of all our Secretaries of State.

To look no closer, one could hardly say that Secretary Lansing was the best exemplar of peaceful ways in the conduct of our policy toward Mexico in 1915. Nor could it have been said of Secretary Seward with respect to his belligerent posture toward Maximilian in Mexico in 1864 or his pursuit of American "manifest destiny" in the Pacific and the Caribbean at the same time and during the years immediately following.

But discounting the personal records of individual Secretaries, the chief function of the Department of State is to advance the national interest in world affairs as conceived and formulated by the administration in power. Though we like to believe that the actions of the United States have always been in the interest of world peace, a candid view can hardly maintain this. It is thus, within the present world climate, not only the necessity to maintain a frequently combative, or at least assertive, posture within the Department of State, but also the day-to-day concern for its prescribed tasks that to some extent, disqualifies it as the ideal mechanism for introducing fresh insights to the problems of disarmament and achieving viable conditions for world peace.

One illustration will suffice to indicate the role played by the vested interests of our foreign policy and defense strategy in the obstruction of serious efforts at disarmament. In May 1952, when pressed to specify acceptable armed force levels, Britain, France, and the United States suggested for illustrative purposes ceilings of 1 million to 1,500,000 for the United States, the Soviet Union, and China (which though not stipulated, obviously implied Red China), and 700,000 to 800,000 for Britain and France.

In August 1955, by which time the United States was completely committed to the doctrine of massive retaliation and the maintenance of bases throughout the world, Presidential Disarmament Assistant Harold E. Stassen withdrew previous U.S. arms proposals, except for the "open skies" plan, and among other proposals, suggested an Armed Forces ceiling of 2,500,000 for the United States, the Soviet Union, and China—this being the minimum figure necessary to maintain our oversea airbases.

Despite the rapid obsolescence of this policy due to the advancing missile technology in both the Soviet Union and the United States, these figures still represent the official position of the United States with respect to armed force levels. I would hope that within the present Disarmament Administration of the State Department, alternative views are being developed consistent with the present technology of war, and that these may be advanced at the appropriate time. But until then, one must cite our present force level proposal as an instance of disarmament thinking which, in large measure, is still guided by strategic concepts which have not yet assimilated the growing significance of Polaris submarines, Minuteman missiles, and other intercontinental ballistic missiles.

The reversal of our proposals in 1955 has, of course, caused us no little embarrassment and has added to the urge within our own Government to score propaganda victories over the Soviet Union in disarmament negotiations. Thus, we have on occasions advanced proposals which we knew to be unacceptable to the Soviet Union, and which had no realistic chance of being considered seriously, though to our credit, we have not proffered anything so patently propagandistic as Premier Khrushchev's suggestion for complete and universal disarmament in 4 years.

It is not, however, my intent in this article to discuss the technical proposals and machinery of disarmament or arms control. These infinitely complex problems require a degree of specialization which I do not presume to possess.

But it would not be presumptuous to indicate some days in which a separate peace agency might contribute toward attainment of the conditions for which the world so desperately yearns. Though it may seem paradoxical, at a time when the President has announced a military buildup in response to Soviet pressures, I believe the proposed measure for a U.S. Disarmament Agency for World Peace and Security will bring us closer to the effective and systematic treatment of problems of disarmament than we have been at any time during recent years.

There are several reasons for entertaining a guarded optimism, the first being, I believe, a growing awareness among the leaders of the Soviet Union—and well developed in President Kennedy—that we must begin to make some concrete advances toward arms control before the nuclear club is further enlarged.

In the past 15 years the world has experienced some 18 to 20 international conflicts of arms, involving a total of approximately 9 million men and ranging in scope from the bloody and protracted conflicts of Korea, Indochina, and Algeria to the weekend war between Israeli and Egyptian forces in the Sinai Peninsula. Several of these contests might conceivably have erupted into the horror of general thermonuclear war. And it is a further chilling thought to consider what might emerge in such instances when nuclear capability is achieved by the Chinese, either on the mainland or on Formosa, or Iraq or Egypt—to mention but a few of the more obvious trouble spots of the world.

But these dangers have long been apparent, and until recently had not moved American or Soviet negotiators far from the dead center of what Harold Stassen once referred to as "congealed cynicism."

In passing, and without commenting critically upon any of the principal personalities involved we might find instruction in the history of Mr. Stassen's tenure as Presidential disarmament assistant. Though with a President completely dedicated to the effort of achieving peaceful solutions to the world's problems, with a Presidential assistant of unquestioned ability and energy, and with a conscientious and resolute Secretary of State, this was nonetheless one of the less glorious chapters in our disarmament efforts, beset as it was by conflicting lines of authority and responsibility. Much of the difficulty experienced during this period was, I am convinced, the result of the lack of statutory authority of Mr. Stassen—his authority not having been clearly defined by the Congress, but merely that of a Presidential assistant with all of the potential power conflict that the position implies.

It is principally for this reason that I am most heartened by the new priority which President Kennedy has assigned to disarmament problems and by the realism manifested in the drafting of S. 2180 as a means of implementing a new approach.

Although the bill does not provide full Cabinet status—as did the preliminary measures introduced by Senator WILEY and myself—it places the Director at the level of an Under Secretary and clearly establishes him as the President's principal adviser on disarmament matters, working solely under the direction of the President and the Secretary of State.

There are two important aspects of the relationship between the proposed Disarmament Agency and the State Department, which, in a sense, pull in opposite directions. First, as a result of some 15 years of disarmament negotiations in the nuclear age, the Department of State has developed a large reservoir of knowledge, experience, and expertise below the Cabinet and subcabinet level. At the time that Department of Peace proposals were first introduced in Congress, we had not had such experience nor had the problems of disarmament and arms control become so technically complex. No disarmament or peace agency today, however, could afford not to avail itself of the cumulative knowledge of the past decade and a half. It is therefore my view that the proposed measure contains some basic legislative wisdom in retaining final direction in this field in the hands of the Secretary of State, while creating the Director as the principal adviser to the President and the Secretary.

A second feature, which would argue for retaining close rapport between the proposed Disarmament Agency and the State Department is the wealth of information which daily comes in over the wires from American embassies and missions abroad. Any major peace agency could hardly do without such information, and yet it would be a needless duplication of effort to attempt to gain it from independent sources. For this reason also, there is merit in the provision to retain close contact between the Disarmament Agency and the State Department and superior authority in the hands of the Secretary of State.

However, equally compelling is the argument that the Director of the Disarmament Agency must not become enmeshed in the bureaucratic structure of the Department of State itself. He must have immediate access to counsel with the President and the Secretary, and he must have freedom to explore new and possibly controversial avenues of exchange without being burdened by the weight of the past or torn by the conflicts of contending schools of thought within the Department of State.

It is proposed in the measure introduced for the administration by Senators HUMPHREY, SPARKMAN, WILEY, COOPER, HART, CLARK, ANDERSON, MCGEE, and myself that the Disarmament Agency would perform four primary functions:

1. The conduct, support, and coordination of research for disarmament policy formulation.

2. The preparation for and direction of U.S. participation in international negotiations in the disarmament field.

3. The dissemination and coordination of public information concerning disarmament.

4. The preparation for, operation of, or as appropriate, direction of U.S. participation in such control systems as may become part of U.S. disarmament activities.

It is to the first of these activities, the "conduct, support, and coordination of research" that I shall direct the remainder of this article. For it is in this field that we face the greatest void.

The present debate within our Government and among the American people regarding the question of resumption of nuclear testing is in itself an indication of the limitations of our knowledge in the field of detection and monitoring devices. And because of our ignorance in this respect, participants in the controversy are characterized as "hard" or "soft" on the question of resuming nuclear tests. Surely this is the ultimate absurdity in nonsense labeling.

The need for research in this area becomes dramatically evident when one reflects on some of the remarks in these pages in the spring issue by even such an eminent authority as Mr. Thomas E. Murray, a former member of the Atomic Energy Commission. Referring to the concept of a new "third

generation" weapon in an entirely different category from that of the H-bomb, Mr. Murray states that "all that may be said of it here is that it is primarily antipersonnel in destination and effect. Hence it is apt for properly military uses. * * * And it need not create suicidal hazards for the country that employs it. Therefore, a moral argument for the use of the new weapon is possible."

Apart from the curious implication in the last sentence that homicide is more acceptable morally than suicide, Mr. Murray would advocate that we resume testing now basing such a decision on the pure assumption that the Soviet Union has been secretly testing, and on the further assumption that the Soviet Union is moving toward a technological breakthrough on a weapon which is still in the conceptual stage in the United States. And though Mr. Murray does not so indicate, I am informed that there is serious question among many of our most eminent physical scientists regarding the basic theoretical feasibility of the projected weapon.

When policies of such national and international significance are advocated by responsible and reasonable men on grounds of pure assumption, then I suggest it is time for fundamental research in the field of detection and monitoring devices which will eliminate some of the element of guesswork and assumption in policy formulation.

It is to be expected that the proposed Disarmament Agency would offer a new departure in this respect, possibly by initiating serious efforts to have the Soviet Union join with us in an internationally controlled series of nuclear tests for the purpose of perfecting monitoring and detection devices.

Until that time, however, the decision unilaterally to resume testing is primarily a political one, in the absence of conclusive or strongly supporting scientific and intelligence information. It is thus a decision to be made by our political leaders, and ultimately by the President. I was heartened, therefore, that on the day of my completing this article (August 1) the decision by the administration not to resume early testing was reported by the New York Herald Tribune wire service, one of the reasons offered by the writer, Rowland Evans, Jr., being that "there is still no evidence, even with the expert report of the special scientific committee named by President Kennedy on June 28, to show that the Soviet Union has been testing secretly. Nor it there evidence to show that during the nearly 3-year moratorium they have scored significant technological breakthroughs."

A more immediate problem even than developing better detection systems is that of achieving a communications system which would function reliably to lessen the possibilities of nuclear war occurring through accident, mistaken identity, or misinterpretation of data from our warning systems. The hypothetical "flock of geese" or "meteorite shower" which might be misinterpreted by either the Soviet Union or ourselves as aggressive actions by the other must be compensated for by a more reliable communication system between the two powers. We have an elaborate system of safeguards against unintentional bombing or use of missiles, and we may reasonably assume that the Soviet Union has also. Yet situations are easily conceivable in which these precautions might break down.

To avert such a catastrophe, it would seem to me that one of the first efforts of the Disarmament Agency might be to explore the feasibility of having selected American and Soviet radar stations staffed by members of the Armed Forces of both countries, with direct communication lines to their respective strategic bombing headquarters. We would perhaps encounter the same Russian fear of espionage which has met our other inspection proposals, but this would be a more limited concession, and the potential value of such a system certainly justifies our making a serious move in this direction.

A more long-range research function also suitable to the proposed Disarmament Agency would be in the use of the tools and methods of social psychology and cultural anthropology to explore the basic cultural attitudes on which we seek to build the foundations of peace. It is still a matter of considerable pain and discomfort to some of our policy planners that American actions in other parts of the world are not universally acclaimed by millions of Hindus and Buddhists who take a very different view of life from ours.

In a pluralistic world the cultural attitudes of others—regardless of whether they please or displease us—have a factual existence independent of our desires. If our foreign policy, whether in disarmament and the quest for peace, or in any other respect, is to be endorsed by a large part of the world, it must be formulated and communicated with these attitudes in mind.

This conception has been advanced with explicit references and with scientific and theoretical explanation by the noted philosopher, F. S. C. Northrop, in his recent work "Philosophical Anthropology and Practical Politics." It would make instructive reading for many of our policy planners in the Department of State.

In final reference to one of the research functions which might best be carried out by the disarmament agency, we need to know much more than we now do about the economics of disarmament. It is a frequently voiced popular assumption that if only the United States and the Soviet Union could come to terms on disarmament then we would immediately have billions of dollars more for schools, hospitals, roads, and other worthy purposes.

On the contrary, disarmament enforcement itself will be a complex and expensive process, some highly reputable economists having estimated that our annual Defense Department expenditures might mount to $100 billion in order to maintain the detection and control systems necessary to assure disarmament. But these are merely informed guesses, for we have not yet made any fundamental, systematic, and comprehensive studies in this field.

Of more long-range consideration is the need to know more about the problems of economic adjustment and allocation of resources after disarmament. With military costs amounting to some 9.5 to 10 percent of the gross national product in the United States and 12 to 15 percent in the Soviet Union—both of which ratios have become deeply imbedded elements in their respective national economies—it is evident that research and planning in this field are required if we are to grapple seriously with the problems of disarmament.

These are but a few of the areas in which a new disarmament agency may function to move the world with painstaking and careful effort toward more viable and lasting conditions of peace. It is a cruel irony that the quest for peace which so enlists the hopes of the world's millions has become so heavily burdened by the present multitude of hard, complex, and highly technical problems. But desire and good will are not enough; they are necessary but not sufficient conditions. The tasks ahead will also require the utmost in patience, determined effort and disciplined and professional intelligence. President Kennedy is, I know, anxious that Congress authorize the establishment of the Disarmament Agency for World Peace and Security this year. If questioned, I believe the readers of this article and the American people would respond in the terms of the President's inaugural address, "Let us begin."

Mr. SALTONSTALL. Mr. President, I have been working with the distinguished Senator from Minnesota [Mr. HUMPHREY], who is the Senator in charge of the bill, and the Senator from South Dakota [Mr. CASE] on his amendment. I wonder if the distinguished Senator from South Dakota would modify his amendment in this manner: "To establish a United States Agency for World Peace, Disarmament, and Security," and use that language through in the other places in the bill referred to by his amendment.

Mr. CASE of South Dakota. Mr. President, the basic objection to the title of the bill concerns the word "Disarmament"—"to establish a United States Disarmament Agency." We thought that such a title might be misinterpreted. I think if the title were made to read, 'To establish a United States Agency for World Peace, Disarmament and, Security," and make consistent changes on lines 6 and 7 and on pages 4 and 5, I would have no objection. I would offer a modified amendment in that form.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. CASE of South Dakota. I yield.

Mr. HUMPHREY. The Senator from Alabama [Mr. SPARKMAN] is present. On behalf of the committee, I should be happy to accept the modified amendment. I think it would meet the requirements that many Senators have expressed today. I hope that a vote can be had on the amendment and that it can be accepted.

Mr. MILLER. Mr. President, will the Senator from Minnesota yield?

Mr. HUMPHREY. I yield.

Mr. MILLER. The Senator from Iowa is a little concerned about the use of the term "Disarmament." Originally my thought was that we might make the term "Arms Control and Disarmament," so that the phrase preceding the enacting clause would read: "to establish a United State Arms Control and Disarmament Agency for World Peace and Security."

Following that, the Senator from Iowa then proceeded to go through the bill and try to couple with the word "Disarmament" the phrase "Arms Control" so that the language would read, "Arms Control and Disarmament" throughout the bill.

Then the Senator from Iowa was advised informally that some thinking was expressed on the part of the proponents of the bill to the effect that perhaps we should exclude the word "Disarmament" and make the language read "Arms Control."

I think one or the other approach should be used. Either we should strike out the word "Disarmament" and substitute in lieu thereof the words "Arms Control," or we should add to the term "Arms Control" the word "Disarmament," so the language would read "Arms Control and Disarmament" throughout the bill.

UNIVERSITY OF MICHIGAN LIBRARIES

The term "Arms Control and Disarmament" would really cover the problem. But I feel that the word "Disarmament" would not.

As has been said on the floor of the Senate earlier today, in view of Mr. Khrushchev's statement last night, I think that, standing alone, the word "Disarmament" rather than being coupled with the term "Arms Control" would look a little timid on our part.

I am not trying to interfere with the functioning of the Agency at all. The Senator from Iowa voted against referring the bill to the Committee on Armed Services. I believe the bill should be passed. But I must confess great misgivings over the phrase "Disarmament" agency and the use of the word "Disarmament" throughout the bill, without coupling it at least with the words "Arms Control," so that the bill would read "Arms Control and Disarmament" throughout.

I ask the Senator from Minnesota if he would object to such a modification of the amendment.

Mr. HUMPHREY. The whole concept that we have of disarmament is what we call effective and controlled disarmament. During consideration of the bill, time after time we placed in the bill the word "Control," so there is no doubt as to what the purpose is. We know that there will be no complete disarmament, at least in the next few months.

The Senator from Wisconsin [Mr. WILEY] addressed himself to this subject today. I think he made quite clear that what we are doing is establishing machinery. We have hope of accomplishment. But for anyone to envision that within the foreseeable weeks, months, or even a few years that there should be universal disarmament would be perhaps slightly utopian thinking.

Mr. SPARKMAN. Mr. President, will the Senator yield at that point?

Mr. MILLER. I yield.

Mr. SPARKMAN. I suggest that the Senator from Iowa address his request to the Senator from South Dakota [Mr. CASE], whose amendment is pending, and to the Senator from Massachusetts [Mr. SALTONSTALL]. If the proposed modification of the amendment is acceptable to them, we ought to be willing to accept it, take it to conference, and solve the problem in conference.

Mr. MILLER. I ask the Senator from South Dakota [Mr. CASE] if he would acquiesce in the amendment. I have drawn up an amendment, which I had labored over, going through the bill. The word "Disarmament" appears in many places. I had drawn up an amendment to provide in those many places that the word "Disarmament" be changed to read "Arms Control," but it can be very easily modified so that the phrase "Arms Control and" will be inserted before the word "Disarmament."

Mr. HUMPHREY. Mr. President, I ask the Senator from Massachusetts to state his views on that subject.

Mr. SALTONSTALL. I do not quite agree with what the Senator from Iowa has said, but I think the word that we have heard so much about and which is well known is the word "Disarmament." We all know that we will not disarm today. We all know and feel strongly, as the Senator from Minnesota has so well expressed, that we will not be guided by what Mr. Khrushchev says we should do.

If the Senator will turn to page 3 of the bill, section 3, line 18, he will observe the language:

> The term "Disarmament" includes the "elimination, reduction, control," and so on.

I think the Senator from Iowa has in mind the language to read—"The term 'Disarmament and Arms Control' includes."

In that way we would be putting the language in the title. I would like to leave the title as it is. Arms control is one subject, but disarmament is another subject. If we say only "Arms Control," we will satisfy no one, including ourselves. I think we must go further than that so far as the title is concerned.

Mr. MILLER. Mr. President, will the Senator from Massachusetts yield at that point?

Mr. SALTONSTALL. I yield.

Mr. MILLER. I do not know whether my friend from Massachusetts understood. I said that originally my thought was to eliminate the word "Disarmament" and to insert in lieu thereof the term "Arms Control." But in view of what has taken place in the last few minutes, my suggestion now is that we retain the word "Disarmament," but that we add the words "Arms Control and" before the word "Disarmament." I think that expression would be more inclusive. I think it would better express what we are really driving at. Granted that we can define the term on page 3, I think we ought to say what we mean throughout the bill.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. MILLER. I yield.

Mr. HUMPHREY. We need some clarification in two places on page 1. First, in the title, "To establish a United States Agency for World Peace, Disarmament, and Security," which, as suggested by the Senator from Massachusetts, would be the headline of the bill. But when we come to definitions, we can provide in section 1 of the bill:

> This act may be cited as the "Disarmament and Arms Control Act for World Peace and Security."

Mr. MILLER. Mr. President, I had that point in mind, but I can see no objection to changing the title to read:

> To establish a United States Arms Control and Disarmament Agency.

Mr. HUMPHREY. I personally have no objection.

Mr. SALTONSTALL. I have no objection.

Mr. MILLER. And we would use the phrase throughout the bill.

Mr. CASE of South Dakota. Mr. President, I modify my amendment in accordance with the suggestion made by the Senator from Iowa [Mr. MILLER] and concurred in by the Senator from Minnesota [Mr. HUMPHREY] and the Senator from Massachusetts [Mr. SALTONSTALL].

Mr. HUMPHREY. The appropriate adjustments will be made in the text.

Mr. MILLER. Throughout the bill.

Mr. HUMPHREY. Yes.

The PRESIDING OFFICER. The Senator modifies his amendment accordingly.

Mr. CASE of South Dakota. Mr. President, may we vote on this amendment?

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from South Dakota [Mr. CASE] as modified.

The amendment was agreed to.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

U.S. AMBASSADORS

Mr. MANSFIELD. I ask that the Senate proceed to the consideration of the nominations of ambassadors on the Executive Calendar.

The PRESIDING OFFICER (Mr. HART in the chair). The clerk will state the nominations.

The legislative clerk read the name of Charles F. Darlington to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Gabon.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The legislative clerk read the name of Lincoln Gordon to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Brazil.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

U.S. DISTRICT JUDGES

Mr. MANSFIELD. It is my understanding that there is also a judgeship nomination of a district judge in South Carolina, which was reported today. I ask that that nomination be stated.

The PRESIDING OFFICER. The nomination will be stated.

The legislative clerk read the nomination of James Robert Martin, Jr., of South Carolina, to be U.S. district judge for the eastern and western districts of South Carolina.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. JOHNSTON. Mr. President, there is also a judgeship nomination of a U.S. district judge for Florida.

Mr. MANSFIELD. I ask that that nomination also be laid before the Senate.

The PRESIDING OFFICER. The nomination will be stated.

The legislative clerk read the nomination of David W. Dyer, of Florida, to be U.S. district judge for the southern district of Florida.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. MANSFIELD. I ask unanimous consent that the President be imme-

diately notified of the confirmation of the nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. MANSFIELD. I move that the Senate return to the consideration of legislative business.

The motion was agreed to; and the Senate proceeded to consider legislative business.

TV SPECTACULAR AT BERLIN LINE OF DIVISION

Mr. MANSFIELD. Mr. President, I have been reading several newspapers this morning, and to say that I am disturbed by what I have been reading relative to a certain incident in Berlin is an understatement. I feel, however, that a statement should be made, even though it means added publicity to an incident which I think could have been harmful, and is, to say the least, unpleasant to discuss.

There is a front-page story in the New York Herald Tribune this morning which disturbs me deeply. It deals with the appearance along the wall of division in Berlin of an American TV comic and his party, apparently to shoot some scenes for the folks back home. According to the Tribune story, the appearance was accompanied by immediate convergence of a large American and an East German Communist military detachment at the line of division, with our force apparently in proper stage makeup for the occasion. The forces included soldiers, antitank guns, and jeeps equipped with machineguns.

I do not know, Mr. President, what press agent, in or out of the Government, or both, dreamed up this one. I do not know what commander sanctioned the use of military personnel for this questionable purpose. It does not matter very much. What really matters is that we bear in mind that what is transpiring in Berlin is not a TV spectacular. It is a matter which has the overtones of a profound tragedy and it is not to be made into some kind of game for the personal profit of personalities from the entertainment world. Comic relief may have a place even along the Berlin wall, but one would hope that it might be in better taste than the incident described in the Herald Tribune story. One would hope that the Berlin wall, where so much is at stake for this Nation, does not now become the new Mecca for the jaded of the entertainment world.

I ask unanimous consent to insert this article previously referred to, be printed at this point in the RECORD.

The PRESIDING OFFICER (Mrs. NEUBERGER in the chair). Is there objection?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Herald Tribune, Sept. 8, 1961]

ARMY'S BIGGEST TURNOUT FOR TV STAR—WITH PAAR IN BELEAGUERED BERLIN

BERLIN.—Fifty American soldiers yesterday moved rapidly down the rain-splattered street, and took possession of buildings overlooking the East-West Berlin border.

A jeep mounting a 106 mm. recoilless antitank gun and others mounting machineguns went into position at the Friedrichstrasse crossing.

One jeep with machinegun had a front wheel planted on the white stripe that indicates the border.

SITUATION LOOKS GRIM

Two colonels arrived.

The situation looked grim.

It was the biggest turnout the American Army had yet made along the wall that divides Communist from free Berlin—and it was all for Jack Paar.

Mr. Paar, a maestro of American nighttime TV, had arrived to film a show. It was unclear whether the Communists recognized who he was.

An American civilian employed by the U.S. Berlin Command Public Relations Office was at great pains to explain the arrival of the soldiers, the antitank gun, and the jeeps with machineguns, after a newsman commented loudly:

"Never seen this many troops for a proper incident."

"Also, please note we did not move up any armor for this exercise."

A soldier of C Company, 3d Battle Group, 6th Infantry, carefully shifted his rifle, bayonet, tear gas grenade, smoke grenade, gas mask, entrenching tool, canteen, first-aid pouch, armored vest, steel helmet, and 80 rounds of ammunition and remarked:

"We get many representatives of the arts and of the theater down here. We find it's best to put on our makeup before we get into our armored vests."

The rain finally ended, cameramen became active.

"God is with us," Mr. Paar said, squinting up at the sun. "Unfortunately, all we have so far is bad light."

The Communist People's Police on the East Berlin side of the line watched carefully. Communist cameramen, either sensing an incident or just plain puzzled, moved right up to the border.

Mr. Paar and Comedienne Peggy Cass moved around, talking fast, pointing at various sights along the border. These included some girls hanging out of windows on the Communist side of the border, and some GI's standing in the ruins of a five-story building on the Western side.

REDS TAKE PICTURES

The Communist cameramen took pictures of everything Mr. Paar pointed out—except a billboard offering a reward of 10,000 marks ($2,500) for the capture of a Communist policeman who last week murdered a fleeing refugee.

After much more talking and interviewing of American officers and soldiers, Mr. Paar and Miss Cass sat down on a traffic island right on the border, and went into their closing. They finished the show without having spoken to a single Berliner.

As Mr. Paar and company drove off, 3d Battle Group Commander Col. Wayne M. Winder, of Sheridan, Ill., thumbed his steel helmet onto the back of his head, and sighed, "This was as bad as sweating out an enemy attack."

Mr. SALTONSTALL and Mr. HUMPHREY addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Montana yield; and, if so, to whom?

Mr. MANSFIELD. I yield to the Senator from Massachusetts.

Mr. SALTONSTALL. As a member of the Committee on Armed Services, I was extremely surprised to read the statement to which the majority leader has referred. It was a shock to note that American troops were brought up to a line of demarcation between the East and the West at this time, for it might have led to a shooting scene, even though it may have been staged. It was for a stage show of some kind, but an extreme result might have occurred.

I commend the Senator from Montana for putting the article into the RECORD. I was disturbed when I read it. I could not believe it when I first heard of it.

I read the entire article, because it surprised me so much that our officials could lend themselves to such a show. I do not see how it could help to achieve understanding by our citizens in the United States of the problems which face us in Berlin. It puts the problems in a different tone from that we should think about.

I hope no further incident such as this will follow the one we have read about in this morning's newspapers.

Mr. MANSFIELD. I appreciate the remarks of the distinguished senior Senator from Massachusetts, the ranking minority member of the Committee on Armed Services.

Before I yield to my friend, the distinguished majority whip, Madam President, I should like to read several excerpts from the United Press International report as carried in the Herald Tribune:

Fifty American soldiers yesterday moved rapidly down the rain-splattered street, and took possession of buildings overlooking the East-West Berlin border.

A jeep mounting a 106 mm. recoilless antitank gun and others mounting machineguns went into positon at the Friedrichstrasse crossing.

One jeep with machinegun had a front wheel planted on the white stripe that indicates the border.

Two colonels arrived.

The situation looked grim.

It was the biggest turnout the American Army had yet made along the wall that divides Communist from Free Berlin—and it was all for Jack Paar.

Mr. Paar, a maestro of America nighttime TV, had arrived to film a show. It was unclear whether the Communists recognized who he was.

An American civilian employed by the U.S. Berlin Command Public Relations Office was at great pains to explain the arrival of the soldiers, the antitank gun, and the jeeps with machineguns, after a newsman commented loudly:

"Never seen this many troops for a proper incident."

And so forth and so on. I think it was disgraceful.

Mr. SALTONSTALL. Will the Senator permit an addition?

Mr. MANSFIELD. Yes.

Mr. SALTONSTALL. Ever so often Mr. Paar said, "Now we will turn the program back to New York," which put the whole thing, to me, on a very commercial and joking basis, though it should have been a very serious thing.

Mr. MANSFIELD. The Senator is correct. I do not have that part of the comment in this particular clipping, but I intend to include other clippings in the RECORD.

I now yield to the Senator from Minnesota.

Mr. HUMPHREY. I commend the majority leader for his statement. I read the story in the morning newspapers. I

UNIVERSITY OF MICHIGAN LIBRARIES

could not believe it. I thought it must have been a happenstance occurrence, that somebody happened to be at the scene with a movie camera taking some pictures.

The Associated Press story and the United Press International story fully corroborate what the Senator has stated. The AP story goes on to say that:

There were seven jeeps, one armed with the new 106 recoilless rifle, another with loudspeaking equipment, several with machineguns.

Two U.S. Army colonels appeared with one lieutenant colonel, one major, one captain, two lieutenants and about 50 soldiers including an impressive array of sergeants. One squad drew up on the sidewalk to provide a background for the filming. Others stood in a war-wrecked building overlooking the scene—in good range of the cameras

It rained during much of the show, which will be presented in segments on Paar's U.S. show 3 nights next week.

The sudden appearance of so many officers and men at Friedrichstrasse apparently mystified Communist police across the border. A high People's Police officer came down to look over the situation. There was much peering through binoculars.

It soon became clear what was up, however, when Paar's cameras got into position.

I must say that the Government of the United States has something else to do besides provide a backdrop for television shows. If ever there was a chauvinistic action, this was it. This is the very kind of thing Mr. Khrushchev seizes upon, to say that America is warlike and to beat us over the head from one end of the world to the other.

I think the Congress of the United States ought to express its indignation as to this action, and call to the attention of the President, of the Secretary of Defense, and of the commanding officer the fact that this sort of thing is intolerable and should not be condoned.

Mr. HICKENLOOPER. Madam President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. HICKENLOOPER. I heard the last portion of the remarks made by the Senator from Minnesota, and I heartily agree with him as I understand what he said. I endorse what the Senator has said.

I read the same story. I was utterly shocked that at a time of tension, which is probably one of the greatest we have had, the Government of the United States, some agency of the Government, or some individuals in the Government, apparently have lent themselves to the advancement of a commercial program, in which the individual operates in the particular situation for personal revenue. I think it should be condemned. There is no reason for one man, though he is, of course, a prominent public figure in the publicity field, to be given preference or support on a commercial venture. He has no more reason for support than any other columnist or radio man in the United States who might wish to go to Berlin and crowd the border, because one has as much right to profit personally out of such a thing as any other—but none of them has a right to profit personally from it.

I do not object in the least to legitimate and proper and full news coverage of the Berlin operation, but I do not think a person should be permitted to advance his own material and monetary interest in specialized programs of this kind. That ought to be condemned. It should be discontinued.

Such things have happened before over the last several years. It has happened periodically, but it is reprehensible.

Mr. MANSFIELD. The Senator is absolutely correct. I hope further incidents will not occur.

I am glad to note a story published in today's Evening Star, which has a headline "Probe Slated of Jack Paar Berlin Stunt."

The article says:

An investigation of the Jack Paar-Berlin border incident was ordered today by Assistant Secretary of Defense Arthur Sylvester.

"If the newspaper reports are accurate, it was a disgraceful episode," Mr. Sylvester said. "If Army officers were responsible they showed very poor judgment."

In the last paragraph it says:

Mr. Sylvester could not say what disciplinary action might be taken, but he believed the incident as reported was potentially dangerous and reflected poorly on the American Army.

Madam President, I ask unanimous consent that this article, by Richard Fryklund, published in today's Evening Star, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PROBE SLATED OF JACK PAAR BERLIN STUNT

(By Richard Fryklund)

An investigation of the Jack Paar-Berlin border incident was ordered today by Assistant Secretary of Defense Arthur Sylvester.

"If the newspaper reports are accurate, it was a disgraceful episode," Mr. Sylvester said. "If Army officers were responsible they showed very poor judgment."

The Associated Press in Berlin reported yesterday that a number of officers and soldiers, with equipment including machineguns and a 106-mm. recoilless rifle, had been brought up to the edge of the border apparently as the supporting cast to a television show.

TV performer Jack Paar and his staff set up four cameras at a spot on the border normally guarded by a squad of GI's, the Associated Press reported. But while the cameras recorded the scene yesterday, seven jeeps with various armament, two colonels, a lieutenant colonel, a major, a captain, two lieutenants and about 50 enlisted men rolled up for the big show. While Mr. Paar interviewed officers and watched the equipment roll up and down the border, Communist TV cameramen also filmed the operation from their side of the wall.

Mr. Sylvester said today he knew of no authorization for Army participation in the border TV program. White House Press Secretary Pierre Salinger agreed with Mr. Sylvester on the need for an investigation.

Mr. Sylvester could not say what disciplinary action might be taken, but he believed the incident as reported was potentially dangerous and reflected poorly on the American Army.

Mr. MANSFIELD. It had been my intention to write a letter to the Secretary of Defense, Mr. McNamara, asking him to look into this situation, but in view of the fact that the Defense Department is on top of it I shall not do so.

Mr. HUMPHREY. I wish to make it clear that I can well understand that Mr. Paar, who is an outstanding television star, and really a very leading man in terms of news analysis, might very well wish to go to Berlin and to get all the information he could. I am not really critical of Mr. Paar.

The Army of the United States, however, has a responsibility which is a public responsibility. The lining up by the Army as a special backdrop for a man with his television cameras on the Berlin border is the situation about which I complain. Mr. Paar apparently is a pretty good operator. He even got the Army on his side.

Mr. CASE of South Dakota. Does the Senator not think we should send him a bill?

Mr. MANSFIELD. A certain amount of blame should attach to Mr. Paar, however.

Mr. HUMPHREY. Yes, indeed. I think he went far beyond what a person ought to do.

No commanding officer, no Army officer, had to do this. The Army should have something else to do, besides that.

Mr. PELL. Madam President, will the Senator yield?

Mr. MANSFIELD. I yield to the Senator from Rhode Island.

Mr. PELL. I associate myself completely with the remarks of the Senator from Montana. In this Chamber there are at least three who have been to Berlin within the last couple of months, and perhaps more. We all recall the care which was taken, if one wished to go to East Berlin, to see that it was done quietly, to avoid incidents. One can imagine, however, that Mr. Paar may have hoped the Soviets would respond, as they responded earlier to what some may have thought to be provocative actions, with the use of water guns, so that there would have been a real, full-scale incident, which would have promoted Mr. Paar's show and increased his Hooper rating by a considerable amount.

Perhaps this discussion in the Senate will increase Mr. Paar's Hooper rating also. I hope not. But in any case this very beneficial Senate discussion will discourage other producers, on the basis of free enterprise and free competition, from depending on the Army for the same support, cooperation, and assistance, and will discourage similar future provocative actions. In any case, it is not Mr. Paar who is to be condemned, but the inexcusably poor judgment of those who permitted this horseplay.

I ask unanimous consent, in order to complete the RECORD, that the AP story that was published in this morning's newspapers be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

U.S. ARMY PUTS ON SHOW OF FORCE AT BERLIN BORDER—FOR PAAR TV

BERLIN, September 7.—The U.S. Army moved in reinforcements today to make sure that American television cameras got a proper slant on activities at Friedrichstrasse, one of the restricted border crossings between East and West Berlin.

This has been the scene of several tense situations in the last 3 weeks. One day the U.S. Army sent three tanks and four weapon carriers there as a show of strength when an Army car was detained in East Berlin.

But the tanks were withdrawn last week and the guarding of the border point was left usually to six or eight soldiers.

Today Jack Paar, the U.S. TV master of ceremonies who made it to sergeant in World War II, turned up with four cameras.

An array of Army brass and equipment turned up too.

There were seven jeeps, one armed with the new 106 recoilless rifle, another with loudspeaking equipment, several with machineguns.

Two U.S. Army colonels appeared with 1 lieutenant colonel, 1 major, 1 captain, 2 lieutenants, and about 50 soldiers, including an impressive array of sergeants. One squad drew up on the sidewalk to provide a background for the filming. Others stood in a war-wrecked building overlooking the scene—in good range of the cameras.

It rained during much of the show, which will be presented in segments on Paar's U.S. show 3 nights next week.

The sudden appearance of so many officers and men at Friedrichstrasse apparently mystified Communist police across the border. A high People's Police officer came down to look over the situation. There was much peering through binoculars.

It soon became clear what was up, however, when Paar's cameras got into position. One was mounted on a huge hydraulic lift used to repair street lamps. Another was on a platform in Friedrichstrasse. Two others were on the ground.

Newsmen, struck by the unusually large array of officers and men on hand, asked for the reason. An Army officer said tonight:

"There was an operational changeover of units in progress this afternoon. In an effort to be accommodating, we permitted Mr. Paar to film these activities. Mr. Paar took advantage of this situation."

Mr. JAVITS. Madam President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. JAVITS. It has been announced that an inquiry will be conducted. My instinct as a lawyer tells me that perhaps we ought to leave a very small, but nonetheless clear, place in our minds for whatever the factual answers may be. I know Jack Paar and other members of the show, naturally. It originates in my home city. I can understand why they should feel as strongly as they do. I would undoubtedly join them. But I am a little concerned because there have been instances in which we have become very much exercised over some incident and have later found that the facts were not quite as they were pictured to us.

I suggest only one word of caution. I can understand our indignation. I sympathize with it and can agree with it in terms of policy. But in all fairness I feel that perhaps we should make one reservation. We should see the report before coming to a final condign judgment as to who was at fault and precisely how the incident occurred.

Mr. MANSFIELD. The reports received from both AP and UP seemed to have a good deal in common. It seems to me that they are authoritative. I do not think we ought to spend too much time on Jack Paar and his troupe. We ought to think a good deal more about the 6,000 American soldiers who are stationed in Berlin and what could happen if an incident should occur. That is the important thing. It is not a question of a particular individual.

Mr. CASE of South Dakota. Madam President, I agree wholeheartedly with the Senator from Montana that troops and army equipment ought not to be used in such a situation as this for a little comic relief. Moreover, I think the practice of making the facilities of the Defense Establishment available for any private ownership, for commercialization and commercial profit, is one to be examined, and should be permitted only in a situation in which their use would not in any way endanger the security of the United States. This kind of incident, on the border in Berlin today, is inexcusable from any standpoint.

Mr. MANSFIELD. Madam President, I thank the Senator.

Mr. JAVITS. Madam President, will the Senator yield so that I might complete my remarks?

Mr. MANSFIELD. I yield.

Mr. JAVITS. I was not thinking of Paar, but the Army. I took seriously what the Senator from Minnesota [Mr. HUMPHREY] said, because obviously this incident could not have occurred without the cooperation of our military forces. That is the only point I had in mind. I hope that the Senator will clearly understand the point.

Mr. MANSFIELD. I understand.

Mr. JAVITS. I thoroughly agree with the statement as to any other consideration, but when we involve the question of discipline and the judgment of our officers, I think there is a case to be made for saying, "Let us get a report as to their side of the incident."

Mr. MANSFIELD. Madam President, I had made the statement that it was my intention to write a letter to Secretary of Defense McNamara, but on the basis of a story carried in today's Star, I should say that the Department of Defense is on top of the problem. I am sure it will make a thorough, complete, and impartial investigation, that it will not be looking for scapegoats. I am quite certain also that it will not permit an incident of this kind to happen again. It is highly dangerous.

Mr. JAVITS. I agree with the Senator.

Mr. YOUNG of Ohio. Madam President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. YOUNG of Ohio. I compliment the majority leader and the majority whip for speaking out in this Chamber, calling to the attention of the country a shocking action on the part of high officers in our Armed Forces.

It is evident again, as it has been through the years, that the makers of our Constitution, exercised intelligence and foresight in providing that at all times civilian authority should be supreme over the military, without any reservation whatever.

The fact is that a comic, an entertainer, caused this incident. Without any comment whatever with respect to him, I assert, along with others, that it was a shocking thing for high officers in our Army to risk creating an incident in the exceedingly tense situation in Berlin.

In recent days we have been reading of the misdeeds—as in my judgment they have been—of high officers of the Army, from generals on down. It is a good thing that in this grave hour of international anarchy, the Senate has again reaffirmed the supremacy of civil over military authority.

The conduct of our Army officers in West Berlin was amazing, inexcusable, and highly reprehensible. They should be disciplined.

Americans must have a feeling of concern and have grave reason to doubt the capacity of our military leaders upon learning of this incident following reading that Maj. Gen. Edwin Walker tried to influence the voting in last year's elections of troops he commanded. In doing so, he made derogatory statements regarding President Truman and directed them to read lunatic diatribes of Robert Welch and his John Birch Society.

General Walker has been justifiably rebuked and reprimanded. Any military leader who attempts to indoctrinate his men politically and set himself up as a political oracle has no right to command American troops.

We must not permit colonels, generals, or leaders in whatever capacity in the military, to go outside their proper sphere and permit a shocking performance such as we have heard about today.

I wholeheartedly agree with everything that has been said by the majority leader and the majority whip.

Mr. CANNON. Madam President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. CANNON. I associate myself with the views expressed by the majority leader, the majority whip, and other Senators who have spoken out on this very important subject.

In the past 2 days the Committee on Armed Services has heard the testimony of Secretary of Defense McNamara. He explained the investigative procedures that have been followed as a result of actions on the part of another officer in the European theater, General Walker.

It seems to me that a substantial amount of time of those in authority and responsibility is required to investigate items of this nature and of the nature of the so-called Walker incident, when our efforts and energy would be better directed toward the real problem at hand. We should not go off on tangents and disrupt our military effort, and thus spread it in areas where it should not legitimately be spread.

I join in the condemnation of the action of those in authority in permitting the type of sideshow that developed, which could well have resulted in an extremely serious incident to the detriment of all our forces and to the detriment of the NATO shield.

Mr. MANSFIELD. I thank the Senator from Nevada.

Mr. KEATING. Madam President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. KEATING. Supplementing what the Senator from Nevada has said—and I am quite sure he would agree with

me on this point—this requires investigation, and, if necessary, disciplinary action. It apparently shows a gross lack of judgment on the part of military officers. In fact, it shocks those of us who have been in positions of some responsibility in the military to think that officers of relatively high rank would lend themselves to an exhibition of this kind. I am much more critical of them than I am of the individual who is trying to make a living by producing a show. I do not agree with his method of doing it, but it seems to me that this occurrence requires investigation at a high level in the Defense Department.

Mr. MANSFIELD. Madam President, I thank the Senator from Minnesota for yielding.

Mr. HUMPHREY. Madam President, I commend the majority leader for his initiative and courage.

I ask unanimous consent that all this comment on this subject come at the end of my remarks with respect to the pending bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS subsequently said: Madam President, in connection with the debate earlier today about the Jack Paar show in Berlin, the National Broadcasting Co. has telephoned to my office a message which I believe should, in all fairness, be inserted in the RECORD, because, as I stated this morning, certainly, judging from the news reports from the Associated Press and the United Press, I thoroughly agree with my colleagues as to the implications and the dangers we see in so sensitive an area as the Berlin border. I suggested only that at least we keep the lines open, in order to determine what both the Army personnel concerned and Jack Paar himself had to say about that matter.

So the National Broadcasting Co. has telephoned to my office a statement which, in all fairness, I shall read into the RECORD. In this connection, I ask unanimous consent that these remarks be printed in the RECORD following the debate earlier today in regard to this matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. The statement which was telephoned to my office by the National Broadcasting Co. reads as follows:

Jack Paar has informed NBC by telephone from Berlin today that the taping of his television show in West Berlin took place with the full cooperation and permission of the U.S. Army. Mr. Paar explained that the presence of more than the normal complement of men and equipment arose from the fact that at the time he taped his program, the guard was being changed; both the group being relieved and the new group assuming duty were on hand, and the taping attracted other military personnel who came out of curiosity.

At the conclusion of the taping, Paar informed NBC, he was thanked by the officers in charge for the manner in which he handled the presentation and particularly for including close-up views of a number of the men on duty so that their families can see them when the tape is presented next Tuesday night.

Paar states to NBC that one of the officers in charge thanked him for making available to the American public an informative and moving view of the Berlin situation as it affects the men on duty today.

That is the end of the statement from the broadcasting company.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. BUSH. I did not hear the discussions this morning concerning this matter, but I was very much disturbed to read the news accounts of the Jack Paar "invasion" of Berlin. I do not think I can blame Paar particularly for wanting to go to Berlin to "shoot a show" on the border of East Berlin, but I do think it is most unfortunate that a military commander would take it on himself to select one performer, like Jack Paar. He must have known that, if he has given one man in the commercial show business a chance to commercialize the situation in Berlin, other performers will ask similar privileges. It seems to me this is a most unfortunate piece of bad judgment on the part of the commanders who may have approved of the taping for broadcast.

The situation in Berlin is a serious one, one that involves the lives not only of American soldiers in Berlin, but people all over the United States and all over Europe. It is a very tense situation, and I do not think it is the type of situation that should be lent for commercial exploitation by any performer.

I do not hold any prejudice against Jack Paar. I do not stay up late enough to see his television shows, frankly. If I did, I might not see them very often. Nevertheless, I hope the Secretary of Defense will take cognizance of this situation and that appropriate instructions will be given to Army commanders not to cooperate with the exploitation of a serious military situation for the use of performers in commercial enterprise or broadcasting.

I do not know how the Senator from New York feels about it, and I am not asking him, but I thank him for giving me an opportunity to make these observations. I feel quite strongly about it.

Mr. JAVITS. For the information of the Senator from Connecticut, I identified myself this morning with the views expressed by a number of Senators, under the general leadership of the majority leader, who expressed himself very strongly on the question. I feel precisely as he does. I made the point, as a lawyer, that we certainly ought to be willing to hear what was to be said on the other side. Here is a statement of NBC. We expect, as the Defense Department has announced, that we will have its report. This matter, as suggested by the Senator from Minnesota, relates, however, more to the discipline of our troops than to the fact that a commercial performer like Jack Paar obtained a "scoop." That is a very serious matter, aside from the danger of incidents on the border. My colleague from New York made a statement on that point. I identify myself with those views.

This is what NBC has said about it. Let us see what the Army will say about it. I can say that, after all that has occurred on the floor, this is the last time it is likely to happen. For that we must all be grateful.

Mr. BUSH. I hope the Senator is correct.

Mr. JAVITS. I join with the Senator in that expectation. I think we have a right to feel that way, considering how strongly so many of us feel on the subject.

U.S. DISARMAMENT AGENCY FOR WORLD PEACE AND SECURITY

The Senate resumed the consideration of the bill (S. 2180) to establish a U.S. Disarmament Agency for World Peace and Security.

Mr. THURMOND. Mr. President, we are faced here today with a proposal to establish a new congressional agency designed to study all possible ways in which the United States, in cooperation with the other nations of the world, can successfully disarm itself. The end which is sought to be achieved by this Agency is indeed desirable, but is highly idealistic. Under the executive branch of our Government, there has been established such an agency, and the notable lack of success which they have enjoyed should lead us to examine the probable success of the Agency which we are now asked to establish.

The maintenance of strong armaments by any nation must of necessity weigh heavily against the settlement by peaceful means of a dispute with another country. To this extent, the arms race which the nations of the world have experienced during the past years is self-perpetuating.

The increased danger of war attributable to the existence of strong armaments, as great as it be, is not the only tragic result of the arms race. The concentration of the wealth of nations on armaments decreases immeasurably the enjoyment by each individual of the fruits of his own labor and God's bounty. None can deny that the service of man and his posterity is far from enhanced by the devotion of so much of the world's resources to the creation and maintenance of weapons of destruction.

Disarmament is an ancient and elusive goal that has been sought by civilized societies since groups of people first equipped themselves for combat. The prophet Isaiah recognized the wisdom of disarmament, but relegated the time of fulfillment, when "they shall beat their swords into plowshares and their spears into pruninghooks," to the "last days."

Throughout history, efforts to achieve disarmament have been more notable for their loftiness of purpose than for their effectiveness. Such steps toward disarmament as have come about through international agreements have been unilateral in application, usually against a prostrate and defeated nation at the end of a war. Even these forced disarmaments have been temporary in nature, and enforced more by economic conditions within the defeated country than by the dictates of victor nations.

In post-World War II years, disarmament has been promoted as never before as an ultimate solution of the world's political problems and disagreements.

Some seem to think that actual disarmament is just beyond our grasp, with agreement among nations prevented merely by differences over concepts and techniques of inspections to assure compliance. This same school of thought anticipates solution of the inspection barrier through the continued development and perfection of such scientific achievements as the observation satellite and seismographic instruments of increased sensitivity.

As pleasing as are the temptations to join in the utopian dreams of a world unarmed lying just over the horizon, both the lessons of history and the cruel practicalities of the current political status of international relations reveal with stimulating clarity the opiate unrealism of such dreams.

Just as the development of defensive weapons never quite catches up with the development of offensive weapons, the development of observation and detection devices will never match the devices of subterfuge used to conceal the development, test, and buildup of new and advanced weapons. The design of observation and detection devices is necessarily dictated by the nature of the object or activity to be detected or observed, just as the defensive weapon's design is dependent on that of the offensive weapon.

The failure to achieve enforceable agreements for disarmament stems, however, not from the inadequacies of scientific devices with which to assure that such agreements are being adhered to, but rather from a failure in basic approach to the problem. The approach to disarmament which has been exclusively adopted in international negotiations, both in the past and in the current crisis, has been premised upon the mistaken assumption that the tremendous emphasis on armaments by the various nations of the world is a cause, rather than an effect, of the political differences which exist among those nations.

Prospects for disarmament are no better and no worse than—but indeed are identical to—the prospects for peaceful resolution of the controversies among nations. So long as any nation or group of nations harbors ambitions of aggrandizement at the expense of other nations, hope is futile for the development of the international good will which is a prerequisite for cessation of the arms race.

Unfortunately, national and bloc aggrandizements still exist as the foundation of the political system which holds sway in countries behind the Iron Curtain. Peaceful expressions of intent by the leaders of these countries are belied by their actions as well as by the words of their counterparts in other nations of their bloc.

Although the scientific instruments devised by freemen may be inadequate to detect the breach of disarmament agreements which might be reached, the minds of freemen can always detect the inconsistencies of peaceful words with the subjugation and enslavement of millions of people and the patently aggressive aims underlying the incitement of others to rebellion and revolution. No disarmament and no resolution of the conflicting aspirations of the several nations, which constitute the cause of the arms race, is probable or possible so long as deception and aggression are the goals of one or more governments; for freemen will not willingly jeopardize, even for the preservation of life itself, their even more precious possession—individual liberty.

Mr. President, I do not wish to give the impression that I am not in favor of the lofty ideals of world peace and security which this bill expresses as its goal. However, I certainly feel that world peace and security can be maintained only if the free nations of the world keep themselves capable of resisting aggression by the Communists and their satellite nations. The United States has in all good faith done everything possible to decrease tensions in the world. This effort has been met on every front by Communist subversion within countries and Communist forces in the form of open aggression. The Communists have thwarted every attempt to establish an effective nuclear international inspection and control system.

The United States has gone out of its way to avoid any show of hostility toward communism in an effort to draw to our side the unalined nations of the world. The results of such a policy have been catastrophic. With the exception of the countries which have come under the influence of the Communists, these unalined nations remain unalined. It should now be clear that such policies of appeasement have in no way influenced these neutral nations to become our allies. It is only natural that any person should aline himself, or nation itself, with the side which offers the most protection and support. An article by Joseph Alsop entitled "Power or Purity," published in this morning's Washington Post, graphically illustrates the proposition that it is impossible merely to buy friends. I ask unanimous consent that the article be included in the RECORD at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MATTER OF FACT—POWER OR PURITY

(By Joseph Alsop)

The atmosphere in Washington, which was quite somber enough already, has now been darkened a bit further by the pangs of disappointment. The source of the disappointment is the reaction of what is usually called "world opinion" to the Soviet nuclear tests.

With cool calculation, in order to avoid offending world opinion, President Kennedy had put off his country's resumption of nuclear testing long after he had lost all hope of Soviet agreement to a workable test ban.

With the most precise timing, the President had even sent U.S. test negotiator Arthur Dean to Geneva, to plead once again for a test ban, and thus to underline America's good will in the eyes of world opinion, at the very moment when he foresaw the Soviets would begin testing again.

To do these things, a serious price had to be paid. It was not easy to resist the strong domestic political pressure for earlier resumption of American testing. But the price was thought to be worth paying, because of the forecast that the Soviets would thus be driven to make the first tests—and would therefore be judged guilty in the court of world opinion.

In short, it is not easy to recall an occasion when risks have been more astutely weighed, and Soviet behavior has been more correctly anticipated. The risks, it must be understood, were very real indeed. If the U.S. had been the first to resume nuclear testing, the whole world would have been deafened by the screams, shrieks, wails, and moans of self-righteous indignation from the professed voices of world opinion assembled at the neutralist conference in Belgrade.

In this event, American freedom of action in the Berlin crisis would have been greatly hampered, by sympathetic movements of public opinion in Britain, France, and other Western European countries. What was avoided, in fact, was well worth avoiding.

Yet the pangs of disappointment are still pretty sharp in Washington, especially in the group that shares the viewpoint of Adlai E. Stevenson, because what was gained by the shrewd management of the nuclear test problems has proved to be so downright trifling.

With the most arrogant brutality, the Soviets not merely took the lead in resuming nuclear testing (which Khrushchev had sworn he would never do), they also resumed testing above ground, using the method that does real damage by fallout. But among the voices of world opinion, Nehru hardly audibly mumbled his regrets; Gamal Abdel Nasser said this was a bad thing; and the rest were ostentatiously silent.

Judging by the other actions of the Belgrade meeting, moreover, Khrushchev has actually gained by his brutality. The main result will be neutralist pressure on President Kennedy to negotiate with Khrushchev on Khrushchev's chosen terms and ground, about the Berlin problem.

Khrushchev treated the neutralist leaders with open contempt. Almost every great man at Belgrade had said again and again, that it would be a dreadful crime to do what Khrushchev did. The pride of all of them had been grossly affronted. But the fear which Khrushchev's brutality inspired far outweighed the hurt pride it caused.

These points are unpalatable, but they badly need to be underlined because of the wrong weight that is given to world opinion, so-called, by enormous numbers of persons in this country, including too many leading policymakers. If you listen to persons of this school of thought, you might suppose that foreign policy could be conducted on the principle of Sir Galahad—"My strength is as the strength of ten, because my heart is pure."

Consider the aid that this country has given to most of the Belgrade neutralists. This ought to prove that America's heart, if not pure, is at least reasonably generous. Then consider the response of the neutralist leaders, not just to the Soviet nuclear test series, but also to the Hungarian massacre and several other comparable episodes, in recent years. These episodes certainly ought to prove that the Kremlin's heart is as black as ink.

The comparison does not mean that the aid has been given in error. If it serves America's interests to strengthen India—as it does—we should not worry about the degree of gratitude implied by Nehru's public prating. But the comparison does mean that the system of ideas behind such phrases as "the battle for the uncommitted nations" is a ludicrously, transparently false system.

The truth is, alas, that naked power counts far more in this sad world than virtuous intentions. And if the military

power balance is neglected at the Pentagon, as it was for 8 years, the voices of world opinion will always speak from a double standard unfavorable to the United States.

Mr. THURMOND. Mr. President, the Communists at this time are applying to the United States almost every pressure possible. We are faced with a crisis in Berlin, with a controversy over our naval base in Cuba, and ever-increasing attempts on the part of the Communists to force us to recognize diplomatically Outer Mongolia and Red China and admit them to the United Nations.

In view of the many crises which the Communists have manufactured it would be a slap in the face of our allies for the Senate to give favorable consideration to the pending bill. It would be the same as abolishing the police department in the face of an intense crime wave.

For these reasons, I am opposed to passage of the bill.

Mr. CLARK. Mr. President, I call up my amendment which is at the desk and ask that it be stated.

The PRESIDING OFFICER (Mr. HART in the chair). The amendment will be stated.

The LEGISLATIVE CLERK. On page 10, line 21, after the word "peace" it is proposed to insert the words "under world law".

Mr. CLARK. Mr. President, this is a simple amendment. It makes an insertion in the powers of the Commission or Director. I hope the Senator from Minnesota will be willing to take it to conference.

Mr. HUMPHREY. Mr. President, the amendment merely extends itself to a study of the problems of international law. I certainly have no objection to the amendment and shall be happy to take it to conference.

Mr. JAVITS. Mr. President——

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Pennsylvania.

The amendment was agreed to.

Mr. JAVITS. Mr. President——

Mr. CLARK. Mr. President, I still have the floor.

Mr. JAVITS. Mr. President, I sought recognition before the amendment was acted on.

Mr. CLARK. I beg the Senator's pardon. I thought he desired to address himself to another subject.

The PRESIDING OFFICER. The Chair had recognized the Senator from Pennsylvania.

Mr. JAVITS. Mr. President, I make the point of order that a vote cannot be taken on an amendment while its proponent has the floor.

Mr. CLARK. The Senator from New York is quite correct. If the Senator wishes to proceed to some nongermane matters, he is entirely within his right to obtain the floor.

Mr. JAVITS. I have no desire to delay action on the Senator's amendment or to delay any other Senator who wishes to be recognized. I simply say that sometimes we get into a situation in which a Senator holds the floor, and it is impossible for another Senator to gain the floor.

Mr. President, I ask unanimous consent that the amendment of the Senator from Pennsylvania may be acted on; and I also ask unanimous consent that I may yield to the Senator from Kansas, who desires to deal with some other matters. I have no desire to intrude in any way. I was simply seeking to obtain the floor in my own right.

Mr. YOUNG of Ohio. Mr. President——

Mr. CLARK. Mr. President, I have another simple amendment. I believe the Senator from Minnesota, who is in charge of the bill, will accept the amendment. If he will do so and if the Senate will act on the amendment, I shall be grateful.

Mr. JAVITS. The Senator from Ohio [Mr. YOUNG] is seeking recognition; other Senators also desire recognition. I have no desire to intrude upon my friends. Those Senators are more than welcome to precede me. I simply wish to get the floor sometime.

Mr. President, I ask unanimous consent that I may yield to the Senator from Kansas, to the Senator from Ohio, and to the Senator from Pennsylvania, and that I may then have the floor.

Mr. SPARKMAN. Mr. President, I wish very much that the Senator from New York, if he does not wish to offer an amendment to the bill, might permit the disposition of the simple amendment which the Senator from Pennsylvania proposes, and then let the Senate move to the third reading of the bill, before the Senator from New York begins to yield the floor for other purposes. I think that would make for expeditious action.

Mr. JAVITS. Mr. President, I shall be glad to take my seat if it is clear that I may get the floor at some time.

Mr. SPARKMAN. I am certain that that can be done.

Mr. JAVITS. Mr. President, I ask unanimous consent that after the action on the second amendment of the Senator from Pennsylvania, after the third reading of the bill, after the Senator from Ohio [Mr. YOUNG] has been recognized, and after the Senator from Nebraska has been recognized, I may obtain the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. CLARK. I ask for a vote on my amendment, unless some other Senator wishes to speak to it.

The PRESIDING OFFICER. The question is on agreeing to the first amendment offered by the Senator from Pennsylvania.

The amendment was agreed to.

Mr. CLARK. Mr. President, I call up my amendment designated "B" and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 7, line 17, after the word "act," it is proposed to add the following sentence:

The Committee shall meet at least twice each year. It shall from time to time advise the President, the Secretary of State, and the Disarmament Director respecting matters affecting disarmament, world peace, and world law.

Mr. CLARK. Mr. President, this simple amendment gives slightly more power to the Advisory Committee, in the hope that by so doing it will be possible to induce distinguished citizens to serve on the committee.

Mr. HUMPHREY. Mr. President, on behalf of the committee, I am happy to accept the amendment and to take it to conference.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Pennsylvania.

The amendment was agreed to.

Mr. MORTON. Mr. President, will the Senator from Pennsylvania yield?

Mr. CLARK. I yield.

Mr. MORTON. Do I understand that the setting up of the Committee is permissive?

Mr. CLARK. The language creating the Committee is in the bill. The amendment merely requires the Committee to meet twice a year.

Mr. MORTON. There is no requirement that the President take any action?

Mr. CLARK. No; the amendment merely provides that the Committee shall report twice a year and may proffer advice in this area.

Mr. RUSSELL. Mr. President, since the Republican Party has apparently admited its disillusion, I point out that this important Commission will be established without any requirement that there shall be any division of membership as between the parties. I suppose that is the accepted order of things.

Mr. HUMPHREY. The intention of the Committee was that the Commission would be bipartisan. I am delighted that the Senator from Georgia has made this clear and that we shall have his statement as a matter of legislative intent that the commission will be broadly represented.

Mr. CURTIS. Is there any requirement that the members of the Commission shall be citizens of the United States?

Mr. HUMPHREY. Yes; and also that they shall be subject to a full field investigation by the Federal Bureau of Investigation.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. JAVITS. Mr. President, I yield to the Senator from Ohio.

Mr. YOUNG of Ohio. Mr. President, I thank the distinguished Senator from New York.

Almost 190 years ago, a great American patriot, Patrick Henry, said:

There is but one lamp by which my feet are guided, and that is the lamp of experience. I know of no other way to judge the future except by the past.

Bitter experience has taught us that every armament race since the turn of the century has resulted in a world war. We should profit by that bitter experience.

Approximately 1 month ago, the Senate voted, without dissent, to appropri-

ate more than $46 billion to build our military strength, first, as a deterrent to war, and second, to be fully ready in the event of war.

Since the beginning of my service as junior Senator from Ohio, I have voted for every appropriation to strengthen the Armed Forces and military might of our country.

I was glad to vote for the Defense Department appropriation bill which strengthened our retaliatory power and our military strength, so that in negotiating with Khrushchev we would be dealing from strength. Mr. President, as you know, the only language a dictator understands and the only power he respects is the language and the power of force and strength.

Today, we are considering, and we are about to vote upon, a bill authorizing the appropriation of an amount not to exceed $10 million for a disarmament agency to plan for peace. Therefore, we are considering authorizing an appropriation for peace which is only one five-thousandths of the amount we unanimously appropriated in order to be ready for war and to defend ourselves against aggression from Communist Russia.

Mr. President, I do not think one American would prefer war in the nuclear age to an honorable, just, and enduring peace.

No claims have been made that a disarmament agency would solve all the tangled international problems which have led the world to the brink of war on countless occasions in the past 15 years.

It is simply that such an agency is needed to coordinate and stimulate research in the vital field of disarmament—or arms control, if we choose to phrase the matter in that way.

Such an agency could recruit talented and dedicated people who, working together, could provide answers to many of the scientific, economic, and political problems relating to disarmament under workable controls and adequate safeguards.

Further, Mr. President, and also of utmost importance, establishment of this agency would further prove to the world that America is sincere when we declare we want peace.

The Soviet Union has renewed its testing of nuclear weapons, thus further polluting the atmosphere of the world. Reluctantly, under the order issued by our President, who is Commander in Chief of our Armed Forces—and we are glad to have him in that position of great leadership during this grim period of international anarchy—we are obliged to improve our own nuclear arsenal. The President has thus directed that we resume underground nuclear testing.

At the same time, Mr. President, today, by our vote, we can show again our deep desire for peace and disarmament—by establishing the proposed Agency and authorizing for its use an appropriation not to exceed $10 million. Surely, that is little enough cost for the potential good which may result. Mr. President, as one Senator representing a sovereign State of 10 million people, I shall be very happy to cast my vote in the affirmative.

Mr. CURTIS. Mr. President, in a short time we shall be called upon to vote on this measure. This bill is not one either for or against the load of carrying armaments; it is not a bill either for or against war. This is a proposal to create another Government agency. If this one will work, why not create five or six more, and thus set the world at peace?

The entire objective of the United States is to maintain peace with honor, so that we can conduct our commerce in the world. That is the main objective of our State Department. But the mere creation of an additional agency will not bring that about.

I strenuously object to the enactment of a measure of this importance without first having had it studied by our Committee on Armed Services. I believe we could proceed with much more confidence if the motion of the distinguished Senator from Illinois [Mr. DIRKSEN] had prevailed, so that we could have had the recommendations of our Armed Services Committee, which throughout the years has endeavored to make the United States strong, to protect the liberties of our country, and to secure the continuation of our great Republic.

Today, it is proposed that we create a new agency. If it has any purpose at all, it will affect the defense posture of the United States. Regardless of whether that should or should not be done, we should have the answer of the Armed Services Committee before we proceed.

THE FISCAL POSITION OF THE U.S. GOVERNMENT

Mr. CURTIS. Mr. President, many thoughtful Americans are concerned over the fiscal position of the U.S. Government. I share that concern. The concern is justified when viewed either from the standpoint of our increasing Federal expenditures or from the standpoint of the tax philosophy that may be incorporated into our revenue system. The tax burdens on our private enterprise system are so heavy that it is imperative that those who formulate our tax program have a sympathetic understanding of our private enterprise system and a desire to see it grow and expand.

Today, I wish to speak concerning the tax theories of the New Frontier. In attacking these theories I do not wish to make a personal attack on any individual. My remarks are unfriendly to proposals, not to persons.

In the medley of high praise for Douglas Dillon, Secretary of the Treasury, currently being sung by administration-minded columnists and writers, there is a strange unanimity of silence on the Treasury's tax bill fiasco of 1961. This silence is to be regretted; otherwise, the Kennedy administration may not learn by the colossal mistakes it has made in the legislative field of taxation so vital to every citizen and every business and professional activity.

On April 20, the President sent to the Congress a special message and gave us a detailed outline of his major tax bill for 1961, and promised a second and more far-reaching measure in 1962. The tax-writing committee of the House proceeded with hearings on the President's message.

President Kennedy, in selecting his official family, named Prof. Walter W. Heller, of the University of Minnesota, as Chairman of the Council of Economic Advisers; Prof. Mortimer M. Caplin, of the University of Virginia, as Commissioner of the Internal Revenue Service; and Prof. Stanley S. Surrey, of Harvard University, as Assistant Secretary of the Treasury in charge of Federal tax programs. All three, who were destined to have major influence in the administration's tax program, were known to be advocates of rewriting the Federal tax laws so as to incorporate therein a vast number of theories which in the past the Congress had repeatedly refused to accept. Professor Surrey was recognized as the leading spokesman for this group of theorists. The President had induced Douglas Dillon, a Republican high in the Eisenhower administration, to become Secretary of the Treasury.

But when the Surrey nomination came before the Senate Finance Committee, it encountered difficulties. Several Members, including half a dozen from the majority, registered strong opposition to Professor Surrey's tax theories. The outlook for confirmation was ominous. But Secretary Dillon saved the situation by writing to the distinguished and justly respected committee chairman, the senior Senator from Virginia, an unprecedented and rather tortured letter in which he promised to take full personal responsibility for tax proposals coming from the Treasury. As a result of that letter, the nomination of Professor Surrey was confirmed, despite misgivings on the part of many members of the committee and also many of the other Members of this body.

Then came the President's tax message, which was a Surrey production. Secretary Dillon presented it to the Ways and Means Committee of the House. It looked as though these tax theorists "had it made." They had a former Republican official fronting for them. But the Congress and the public soon learned how poorly equipped Mr. Dillon was to mastermind major tax changes. He presented a program that was ill-conceived, ill-timed, and ill-starred. It was heralded by its sponsors as a first step in reforming the Federal tax structure; but it failed in every particular to come to grips with the fundamental weaknesses of our revenue system. Instead of dealing realistically with the great need for reform of depreciation policies, the administration would have tried to cultivate, under bureaucratic supervision, a little hothouse economic growth with a complicated tax credit for certain kinds of investment. Any possible beneficial effect of such a peculiar approach was immediately vitiated by a companion proposal to reimpose the full thrust of double taxation on dividend income, and thereby discourage equity investment.

The Treasury made a special effort to obtain favorable press comment in connection with a proposal in the program to curb business expenses. There was

handed out a Treasury booklet reciting special cases in detail, encouraging columns of antibusiness propaganda. It seemed easier to distort or misrepresent, rather than attack Tax Court decisions directly.

We all know the Internal Revenue Service has adequate enforcement machinery for use when fraudulent tax deductions are made in attempts to avoid Federal income taxes. The criminal code is available, and the record shows that courts and juries are not hesitant to convict and punish the guilty. But Professor Surrey's goal in this area was to transfer business judgment from the management of business to the Federal Government.

One particular area of the proposals would have served a pet theory on curbing certain types of business expenditures for good will. Professor Surrey's insistence on his viewpoint that business expenditures for good will should not be deductible prompted one administration supporter, a member of the majority side of the House Ways and Means Committee, to tell the Harvard professor some of the facts of life in regard to our free American competitive system. He pointed out that in countries where the government owns all business, good will may not be a factor; but in this country, he said, it is vital and essential.

From the prolonged hearings and executive sessions of the committee, it became generally evident that controversy existed between committee members and Secretary Dillon. Eventually several of the more controversial and questionable items were postponed until next year; and on most other items in the program the committee ignored the counsel of Secretary Dillon and his alter ego, Professor Surrey, and produced its own tentative versions. And finally the House committee discarded the entire 1961 effort, and the majority members of the committee informed the President they would have to tackle it again next year. One would be very naive indeed not to know exactly what that meant.

All is not lost if the administration, especially the President, will profit by the experience learned from the tax fiasco of 1961. The administration can provide the urgently needed leadership in promoting sound tax reform only if the administration will apply practical understanding and wisdom in the development of its tax recommendation. Let me quote a few paragraphs from an authoritative speech on the suggested legislation, made in the House of Representatives on May 9 of this year by the experienced Representative JOHN W. BYRNES, of Wisconsin, a capable and esteemed member of the House Ways and Means Committee:

> Mr. Speaker, the conclusion is inescapable that the New Frontier tax policies are designed to add to the tax burdens on productivity, employment, and capital formation. The administration would reverse certain considered policy decisions of previous administrations and Congresses, both Democrat and Republican, by characterizing those decisions as loopholes. They would substitute therefore an investment giveaway that makes considerably less sense in terms of equity and efficacy than the provisions the administration attacks.
>
> The inconsistency and conflicting purposes of the administration recommendations comprise an ill-conceived concoction that will do nothing to strengthen business confidence. These proposals are not new but never before have they ever been muddled together in such a self-defeating mishmash. Specific examples of inconsistencies in administration policy are:
>
> First, the tax credit proposal to increase capital investment is contrary to the proposal to reimpose a double tax on investment income;
>
> Second, the foreign income proposal designed to make it more difficult for American private enterprise to engage in foreign commerce contradicts the administration's request for more foreign aid appropriations; and
>
> Third, the President acknowledges that our tax structure "must encourage efficient use of our resources" but proposes tax changes that would increase bureaucratic control of our private enterprise economy.
>
> Mr. Speaker, in its tax recommendations the New Frontier fails to measure up to the challenge of an urgent subject.
>
> Because the administration has not provided the called-for leadership, the task necessarily must be assumed by the Congress. Our goal must be an objective of fiscal responsibility that provides restrained Government spending fully paid for under a taxing system that fairly distributes the required tax burden at the lowest possible tax rates. In this way our free enterprise system can flourish at home and operate as our best ambassador abroad with minimum Government intervention in private economic affairs.
>
> Tax revision is both desirable and necessary but in revising our tax structure we must be certain that we are moving ahead—and not backward.

Secretary Dillon has been completely assimilated, according to one liberal writer. In other words, he has shed any taint of Republicanism he had. He ignored sound and proven tax principles, and became the top salesman for Professor Surrey's theories. He also joined wholeheartedly the ardent advocates of deficit spending in this administration. His voice has been muted while the administration has been increasing the budget for the current fiscal year by $6.8 billion, of which only $3.7 billion is to go for new military spending. Nor did he counsel fiscal responsibility when the administration increased budgeted spending from January to June of this year by $2.6 billion, although less than $800 million of that $2.6 billion was for the military.

As we look ahead, we anticipate deficits, increased Federal expenditures, and pressures which ultimately will raise the present debt ceiling. I am disappointed at an apparent profligacy which transfers to some future day any reckoning of fiscal fact. A balanced budget has merely become a hobgoblin of little minds.

During the hearings on Mr. Dillon's nomination, I engaged him in the following colloquy:

> Senator CURTIS. What is your notion as to the necessity, the desirability of a yearly balanced budget?
>
> Mr. DILLON. I think on that, Senator CURTIS, I made my position clear. I think the objective is to keep a balance over a reasonably short period of time, because the economy undulates up and down. It would not be practicable to increase expenditures very drastically one year because we had a lot of income, and decrease them equally rapidly when our income fell off. So I think what we should aim for is a surplus that will bring some reduction in our debt over a period. I think that is a generally accepted theory and I think it is fiscally sound.
>
> Senator CURTIS. You would not favor that and attempt to bring the budget into balance every year?
>
> Mr. DILLON. Not in a time of extreme recession, no, Senator.
>
> Senator CURTIS. I understand the philosophy back of that, and it appears in many places in the Government. It seems to me that that invites a national attitude that we ought to balance the budget but not now.

Hearings in June of this year on the bill to increase the public debt limit reflected from members of the Senate Finance Committee the same concern which I expressed in that colloquy with Mr. Dillon.

The lofty declarations about an expanding gross national product and the debt thereby growing smaller in relation to it are soothing platitudes, but they do not reduce the debt or alter the fact that 11 percent of each taxpayer's dollar received in revenue this year goes to pay interest on the national debt.

A few weeks ago Mr. Dillon represented this country in Latin America at a multination meeting dedicated to an alliance for progress. In his remarks Mr. Dillon stated:

> Looking to the years ahead, and to all sources of external financing—from international institutions, from Europe and Japan as well as from North America, from new private investment as well as from public funds—Latin America, if it takes the necessary internal measures, can reasonably expect its own efforts to be matched by an inflow of capital during the next decade amounting to at least $20 billion. And most of this will come from public sources. The problem, I am convinced, will no longer lie in shortages of external capital, but in organizing effective development programs so that both domestic and foreign capital can be put to work rapidly, wisely, and well.

While there is an expression of financial help coming from other quarters, is this pledge a moral commitment that our Government will provide this 20 billion during the next 10 years—if other sources do not provide? I should like to know what portion of this 20 billion is expected to come from sources other than the U.S. Government.

Mr. Dillon has pointed out that land reform is one of the most acute of Latin American problems—that 5 percent of the population there owns 80 percent of the land. Will these reforms be made by local effort and local desire to improve internal situations? Or will these reforms be made under some system of reform underwritten by the U.S. Government?

In summary, the fiscal policies of Mr. Dillon will need a sounder base and a more reasonable interpretation if they are to gain the support they must have from Members of Congress.

The end results will be crucial decisions in 1962 by the tax-writing committees of the Congress. It is very ap-

parent that these committees and the Congress are not going to accept the theories of Professor Surrey, whether carrying the imprimatur of the Secretary of the Treasury or not. This is not the time knowingly to set up an impasse between the Treasury and the Congress on revenue legislation. President Kennedy should enlist as his major advisers on Federal tax policies a man or two who understand our American economy. Then the administration can work intelligently with the committees of the Congress and can enable us to meet the needs of tax revision in a spirit of mutual trust and understanding.

U.S. DISARMAMENT AGENCY FOR WORLD PEACE AND SECURITY

The Senate resumed the consideration of the bill (S. 2180) to establish a U.S. Disarmament Agency for World Peace and Security.

Mr. CLARK. Mr. President, I rise in support of S. 2180, a bill to create a Disarmament Agency.

In my judgment, the bill would make a great contribution to peace in the world and to the posture of the United States among all the nations of the world.

Mr. President, in my judgment, there should be three main prongs to our foreign policy: First, an adequate defense to enable our U.S. forces to move quickly and effectively anywhere in the world where peace is threatened.

I have joined with my colleagues in the House and Senate in doing my share in that regard in voting for the defense appropriation bill on which action has recently been completed.

The second prong of our foreign policy should be an adequate foreign aid program, in order to take such steps as we can alone and in conjunction with other nations to render the lot of the underdeveloped part of the world more bearable, and thus to sustain peoples of those countries in their fight for freedom. This we are on our way to accomplish.

The third—and to my way of thinking equally, if not more important—prong of our foreign policy should be the passage of this bill, S. 2180, in order that the United States may show to all the world the sincerity of its belief in its search for peace under freedom and under world law.

In my judgment, the passage of this bill at this time is of comparable importance to the defense bill and the foreign aid bill because by taking this step the Congress will become involved itself in the important search for total and permanent disarmament, under enforcible world law, and will show not only to our own people but to peoples all across the world and, in particular, to the peoples behind the Iron Curtain and Bamboo Curtain that we mean what we say when we assert that our national goal is a peaceful world under freedom.

This bill can be of enormous impact in making that clear to the entire world as well as giving us a sensible type of organization in which to pursue that most important national goal.

NO SECURITY IN ARMS RACE

Surely, it must be clear to all the world that there can be no security in a continuation of the arms race; there can be no peace, no freedom, unless in some way, in some manner, governments are able to bring an end to the arms race and to proceed by gradual stages, if you will, but to proceed nonetheless actively, energetically, and forcefully toward that total and permanent disarmament under the rule of law which is the only real hope for survival in the world today.

PERFECT TIMING OF S. 2180

I suggest that the timing of this bill is perfect. It comes at exactly the right time. It comes at a time when the world is concerned on the potential of war in Berlin, when we are terribly upset about conditions in Cuba and in Laos, and the Soviet resumption of nuclear tests.

The time to act is when the clouds are blackest and not when the sun is shining, in this area of peace and disarmament.

I envisage within the next 3 months a continuing crisis over Berlin with the German elections September 19, the meeting of the Soviet Communist Party Congress in October, and then hard-fought negotiations to settle, we hope, not only the Berlin question but the German question, and this bill can be of the greatest possible impact in assisting our search for a peaceful and just solution to the current crisis.

Mr. Khrushchev has stated as recently as Wednesday of this week that he is in favor of total and permanent disarmament under strict international controls; that he would waive the veto, that he is prepared to sit down and negotiate a meaningful agreement.

What better evidence can we give to him and the rest of the world that we mean business, too, in this regard, and that we intend to put the best brains of America to work in searching out for that objective.

Now, it may well be that Mr. Khrushchev does not mean what he said. He has a long record of broken promises, the most recent being his resumption of nuclear testing.

But it occurs to me it is our obligation, as a peace-seeking nation, to put the Soviet leader to the test, to call his bluff if bluff it be, and in any event, to assert our own strong will to pursue this objective, and to bring him and, in due course, the Chinese Communists as well, into the world of peace-loving nations where clearly they are not now, and where our country in my judgment should take the initiative.

So I say again, in my judgment the timing of this bill is perfect.

NEED FOR ADEQUATE ORGANIZATION FOR DISARMAMENT EFFORT

It must be clear that our present search for disarmament has been inadequately organized. I can describe only as chaotic the efforts of the State Department to manage this disarmament question during most of the administrations of President Truman and President Eisenhower. In fact, the Acheson-Lilienthal-Baruch plan might well be said to be the last real initiative which our country has taken in the search for peace.

Since then we have been largely on the defensive, and it is not without significance, in my judgment, that disarmament has been so downgraded in the State Department that when Mr. Eaton asked representatives of four of our allies to come to Washington to discuss the Western position prior to the 10-nation talks in Geneva last year, he was never able to tell them the U.S. position because the State Department and the Defense Department had been unable to resolve their differences. This in itself would occur to me to be convincing evidence of the need for this particular Agency, whose Director would have direct Presidential access on certain questions.

NEED FOR ADEQUATE STATUS FOR DISARMAMENT EFFORT

I turn now to the bill and I point out the importance of having adequate status for this disarmament effort. I am the principal sponsor on the bill creating a Department of Urban Affairs. We know that the status of the needs of our cities at the Federal level in Washington is one of the most important reasons for advancing that proposal to give our urban citizens the same status at the Cabinet table as our citizens living on farms have had a hundred years.

I am glad that the President has also recommended an adequate status for the office entrusted with the study and implementation of disarmament.

DISARMAMENT NOT UTOPIAN GOAL

I deplore the attitude of some citizens and some of our friends with regard to this bill and with regard to total disarmament. In fact, nothing does this country more harm than to have responsible citizens suggest that disarmament is a utopian goal, to suggest this is a hypocritical goal. This does the country no good. It does freedom no good, and the world at large no good.

I hope by passing this bill Congress will give convincing evidence that we are not cynical about disarmament; we do not consider disarmament utopian, we consider it a hard-boiled realistic goal which is within the capacity of living men to achieve within the foreseeable future.

So I am happy with the status which has been given to this Agency.

NEED FOR COUNTERVAILING DISARMAMENT PERSONNEL

I would point out, not in derogation of any able and dedicated public servants, but as a fact that many of our Government officers have a natural conflict of interest with regard to disarmament; high-minded, able, sincere, dedicated, patriotic Americans though they may be. The officers of the Defense Establishment both in and out of uniform, who must think in terms of the use of military force, those who are engaged in the work of creating even more dreadful atomic weapons under the jurisdiction of the Atomic Energy Committee and finally, the permanent Foreign Service, skilled in diplomacy and the use of existing institutions—none are

trained to think in terms of disarmament and the creation of essential peacekeeping machinery.

I submit there ought to be a countervailing power at a high level in the executive branch of our Government trained in the search for peace and the search for disarmament, and that its status should be identical in terms of the power it can exert on the Executive and the extent to which it can carry out the legislative policy of the Congress as the other agencies I have mentioned.

Therefore, I think it quite important that the disarmament director should have direct access to the President. Under the bill as amended by the committee it is clear that he will.

USIA DIRECTOR'S RELATIONSHIP TO PRESIDENT AND SECRETARY OF STATE

I point out that there is quite a close analogy, although not a complete analogy, in this regard of direct access to the President on the part of the Administrator to the new AID agency proposed in the pending foreign-aid bill and the Director of the Information Agency.

I ask unanimous consent to have a memorandum on this point printed herewith in the RECORD.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

RELATIONSHIP OF THE DIRECTOR, U.S. INFORMATION AGENCY, TO THE PRESIDENT AND THE SECRETARY OF STATE

The U.S. Information Agency was established by Reorganization Plan No. 8 of August 1, 1953.

The plan provides in section 1(b) that "There shall be at the head of the Agency a Director of the U.S. Information Agency, hereinafter referred to as the Director, who shall be appointed by the President by and with the advice and consent of the Senate and shall receive compensation at the rate of $21,000 a year. The Secretary of State shall advise with the President concerning the appointment and tenure of the Director."

The plan further provides as follows:

"(c)(1) The Secretary of State shall direct the policy and control the content of a program, for use abroad, on official U.S. positions, including interpretations of current events, identified as official positions by an exclusive descriptive label.

"(c)(2) The Secretary of State shall continue to provide to the Director on a current basis full guidance concerning the foreign policy of the United States.

"(c)(3) Nothing herein shall affect the functions of the Secretary of State with respect to conducting negotiations with other governments."

In his letter transmitting the proposed reorganization plan to the Congress, the President said: "I have likewise instructed that the new U.S. Information Agency shall report to the President through the National Security Council, or as the President may otherwise direct." In practice, this has meant only the submission of an annual agency status report to the National Security Council. As a general rule, policy and operating problems have been discussed with the President rather than their being submitted through or discussed by the National Security Council.

Since the inception of the Agency the President has invited the Director of the Agency to participate in National Security Council meetings as an observer. This practice has continued to the present administration where Mr. Murrow attends National Security Council meetings.

Mr. CLARK. Mr. President, note that the USIA Director sits with the National Security Council, and he has direct access to the President; yet he receives policy direction from the Secretary of State.

So I think we have plenty of precedents for the type of organization put forward in the bill as amended.

CONTINUITY GAINED BY AGENCY WITH STATUTORY STATUS

Of course, one of the most important things about giving statutory status to this Agency is that it will have continuity.

It has been said, and I infer it may be true, that really able men are becoming increasingly unwilling to come down here and involve themselves on an ad hoc basis in this search for peace through disarmament, and one only has to look at the unhappy record of the many, many individuals who have been brought down here on an ad hoc basis to take a temporary run for their money in this disarmament field to note how important continuity is.

It is important not only for the Director of the Agency but also for the employees and personnel, for the Assistant Director, the other top level policymakers called for by this bill. Many of them, I am sure, will be drawn from the rolls of the State Department; many of them, I am sure, also will come from the Defense Department; some of whom will come from the Atomic Energy Commission to give a close-knit coordinated team of permanent officials to this Agency. Although I hope we are going to get disarmament within your lifetime and mine, it is very apt to be a permanent agency, at least for the foreseeable future, and we might as well recognize that fact.

An Executive order agency would not be the same thing. Congress must get involved in this. I think this is one of the most important reasons for the bill. In my judgment—and I know this is not a popular statement to make—we have a pretty substantial political, social, and economic lag in the Congress of the United States. We are behind the best current thinking in a host of different efforts, and probably behind further in the search for disarmament and peace than in any other aspect of our national policy.

If we could get this bill through right now before we go home, Congress would be involved in the search for peace and this, I think, would be a splendid thing, from the point of view of our Nation's success in the trying days which lie ahead.

The Disarmament Agency should be a line, not a staff agency.

At the moment Mr. McCloy, whose incredible abilities are indicated by the drafting of this bill, and the enormous support which he, with the help of the President and some of the rest of us, has been able to summon behind this bill, is working with one hand tied behind his back, because he is working in a staff capacity.

He should have a command, as the head of a statutory agency, just as the Cabinet officers have that limited command under the President of the United States which is so essential to their acting in the national interest. They make decisions which are implemented by action.

Mr. McCloy can only make recommendations which somebody else has to approve. This, I think, is a vital difference between what we need to have and what we presently have.

I note also, for the benefit of the press, that this resolution is identical with Senate Concurrent Resolution 83 of the last Congress of which resolution President Kennedy, then Senator Kennedy, was a cosponsor, so we can rest assured that the objective of the resolution has had the approval of John F. Kennedy.

IMPORTANCE OF WORLD OPINION

Two more points and I shall be done. General Gruenther testified during the hearing, and Under Secretary of State Chester Bowles, in a recent press conference, stressed the importance of our world image, of our world opinion, and pointed out that people abroad just do not believe us when we say we search for peace and freedom.

This is unfortunate. The Lord alone knows why they do not, but it does indicate that we have not been successful in persuading those people that our own revolutionary precepts, based on freedom, are still the policy of our National Government.

I can think of no one bit of legislation that could do more to dispel that illusion on the part of the peoples throughout the rest of the world than the passage of this bill.

ISSUE RAISED BY THE BILL

In the end, Mr. President, and I now conclude, the issue raised by this bill is whether the Congress of the United States takes seriously the search for peace, the search for security, or whether we think, as some cynical persons do, that this is a utopian idea, which is fundamentally hypocritical.

I think the Congress does take it seriously, and the best way to evidence it is by passing this legislation as the committee has reported it.

In my judgment, we are engaged in a struggle in this country, as important as any since the Founding Fathers first persuaded a reluctant electorate to accept the Constitution of the United States as their framework of government, a struggle between those leaders of the community who are creative, and those who are merely dominant.

We see it on the floor of the Senate day after day after day.

Here is one of the best opportunities we have had in a long, long time to prove to the country and to the world that the creative forces in the Congress of the United States are able to overcome the merely dominant forces who look back in a sterile way to a past that is dead. This will be concrete evidence that those in the Senate and those in the House who believe that the United States must take the initiative in moving forward in a constantly changing world are in control of the legislative process.

Mr. DODD. Mr. President, I supported this bill in committee and intend to vote for it today.

I have no illusions about Soviet intentions. Accepting their intentions for what they are, I am a firm believer in military preparedness. Unless a miracle happens, I do not believe that it will be possible to negotiate with them any measure of disarmament or arms control, providing for a system of inspection that protects the interests of both sides.

And yet I believe that there is much to be gained from setting up the proposed Agency.

First of all, we must recognize the fact that there are hundreds of millions of people throughout the free world who do not understand the total implacability and the total dishonesty of world communism.

For very human and proper reasons, they fear war and would like to see the world moving in the direction of reduced and controlled arms, rather than in the direction of stepped-up armaments on both sides.

I believe that there is everything to be gained and nothing to be lost from taking the stand that we earnestly share this desire and that we are prepared at any time to sit down and discuss practical proposals that might produce an abatement in the arms race.

But if we take this stand, we must be prepared to submit practical proposals—proposals which make sense intrinsically, which the world community will find persuasive, and which, at the same time, protect our national interests.

The establishment of the proposed Disarmament Agency would, I am convinced, help to persuade free world opinion of our own earnestness on the issue of disarmament, and it would at the same time provide us with a machinery we have not heretofore possessed for research and policy planning in this area.

Let me emphasize again that, so long as international communism is what it is, a meaningful arms control agreement, with inspection, will not be possible. But if we constantly emphasize our own willingness to reduce arms, and if we submit proposals that are soundly and honestly conceived on our side, it will, at the very least, serve to unmask the fraudulence of the perennial Soviet proposals for universal and complete disarmament.

These proposals must be realistic and honest, and must not simply be conceived as propaganda, because we cannot exclude in perpetuity the possibility of an arms control agreement. I believe that arms control might become possible if, through a combination of Western firmness and discontent in its satellite empire, Soviet aggression could be so chastened that the Kremlin was obliged to withdraw to its prewar frontiers.

I am always concerned about the vesting of too much power, in any field, in a single, centralized Government agency. One of the great bulwarks of freedom and one of the great protections against carrying too far any grave mistake is the diversification of power, the checks and balances that run throughout our governmental institutions.

The bill before us provides in section 34 that the President is authorized to establish procedures to assure consultation among the various agencies that have a real interest in this problem of disarmament, including the Atomic Energy Commission, the Department of Defense, the National Aeronautics and Space Administration, and other affected agencies.

Section 34 also provides for the establishment of procedures to resolve differences of opinion between the Department of State and the other agencies which cannot be resolved through consultation.

I take this to mean, and I would like it to be a part of the legislative history of this bill, that this new agency is by no means to have the last, sole word about disarmament policies and that it is to operate in cooperation with other agencies of Government that have a vital interest in this field.

I feel that these provisions satisfy my misgivings to the point that I can support this bill and I gladly do so.

This is a measure which should be approved. Conceived in the spirit of realism, and without any pipedreams about Soviet intentions, it can only serve the cause of the free world in the grave crisis which now confronts us. Let us hope that it will also serve the cause of peace.

SANITARY MILK FOR NEW YORK CONSUMERS

Mr. JAVITS. Mr. President, yesterday the Senator from Wisconsin [Mr. PROXMIRE] and the Senator from Minnesota [Mr. HUMPHREY] spoke out with respect to the desirability of national milk sanitation standards, and they particularly leveled their fire at New York's Governor Rockefeller for his recent remarks in Syracuse, N.Y., about the possible effect of national sanitation standards on New York's dairy producers and New York's vast milk consuming public. I shall not attempt to deal with the political aspects of the Senators' attack on Governor Rockefeller, for these were partisan matters and quite proper, but nevertheless not germane to the principal and substantive issue of national milk standards. However, I think it is incumbent upon me, as a Senator from New York—and my colleague, the Senator from New York [Mr. KEATING], intends to make some comments on this subject—to put into perspective the claim that New York's milk consumers are disadvantaged because sanitary standards in New York are State and local standards.

Milk consumers, whether they be in New York, Wisconsin, Minnesota, Florida, or California, are entitled to protection in two equally important regards: first, assurance of having a reliable supply of sanitary milk; and second, a price reasonably within the reach of every pocketbook. It is, I submit, unfair to play upon the consumer's natural desire for the lowest possible milk price by ignoring the vital interest of local authority in the health and safety of its citizens. Implicit in the remarks of our two colleagues, representing just as I do large dairying States, is the promise that the adoption of national milk sanitation standards, will, if anything, assure higher quality milk at lower prices—in other words, something for everybody. I believe, Mr. President, that when one can offer something for everybody it behooves him to come forward with detailed, factual justification for the panacea held out.

And in examining the panacea in this instance, the controlling issue, I submit, is simply this:

New York State has a right to, and indeed must, protect its New York milk consumers by establishing the highest practicable sanitation standards. This is New York's obligation; it is a function for which New York State's various health officials are uniquely and particularly qualified. Because milk is produced in other parts of the country does not mean that New York should abandon its supervision over milk to be consumed in the New York area unless it can be affirmatively shown that New York's consumers will benefit in price without any relaxation of sanitary standards. It is not enough for midwestern interest to assert, without more, that Wisconsin milk or Minnesota milk will be equally sanitary, nor is it enough to imply that somehow Wisconsin milk on the table of the New York consumers will be cheaper. The burden of proof is on those who would replace high local standards effectively administered with other broader standards. If and when midwestern milk producers can affirmatively demonstrate health and cost benefits to New Yorkers then it is time for New York to reevaluate its own position with respect to national milk sanitation standards.

There are six reasons why I believe enactment of national milk sanitation standards are not practical or desirable at this time:

First. We do not need compulsory national milk sanitation standards.

It is generally conceded that the milk supply for the various markets of the country is of high quality and is entirely safe. We feel quite certain that is true in New York State and we believe that it is true in most of the United States.

Second. Local authorities can best determine what regulations are necessary to safeguard their own milk supplies.

Milk is produced under varying conditions. A regulation which is necessary for one area, may not be necessary or may even be impractical for another area. For example, it might be desirable to have a regulation in some of the southern areas that milk stables be washed daily. Such a regulation in northern New York in the wintertime would seem quite impractical.

Local authorities can best determine what regulations are necessary to assure a safe supply of milk for their area, whereas a national code would not give the same recognition to local conditions.

Third. Local regulations may be changed quickly to meet changing conditions.

New problems in milk sanitation are constantly arising. A local regulation can be quickly changed to meet these changing conditions. The mere mechanics of amending a national code and putting the changes into effect would be very time consuming. It is entirely

within the realm of possibility that a strictly local condition might arise that needed a change in regulations. It might not be considered of sufficient importance to change the national code, and the particular locality might suffer as a result.

Fourth. Local authorities have adequate means for enforcing their regulations.

Local regulatory agencies have the authority to enforce their regulations and can do so quite effectively. In New York State we can effectively enforce our milk sanitation regulations.

The national standards which have so far been proposed contain little in the way of enforcement provisions other than those to compel the States and municipalities to accept milk from plants which ship milk in interstate commerce which have been listed as in compliance. While plants which do not comply with the proposed code may be removed from the listed plants, they may continue to ship milk if someone will accept it.

Fifth. Enforcement of milk sanitation regulations can best be done by the regulatory agency in the market where the milk is used, rather than by the Federal Government or by the State where the milk is produced.

A health regulatory agency will naturally tend to be more thorough in the enforcement of regulations to protect the supply of milk for its own people than it would in enforcing regulations to protect the people of some distant market.

Under proposed national standards a State or a municipality cannot insist upon requirements higher than those in the proposed code, on milk moving in interstate commerce. If they wish to raise the standards they must first get the code changed.

Residents of New York State are accustomed to a high quality milk as are residents of many other areas. If our milk supply needs improving we want the right to send our own inspectors out to find out what is wrong and to correct it.

Sixth. The proposed national standards will tend to lower the quality of milk in some markets.

There are a number of instances in which local health regulations are more strict than in a proposed national code. In those respects the local regulations would have to give way to a national code on interstate shipments. In that way local milk supplies could be lowered in quality.

While the national regulations do not purport to apply to intrastate shipments, to impose higher requirements on the producers within the State, than is imposed upon the producers of milk shipped into the State, would tend to be discriminatory.

As an example, in New York City we have distributors of milk who have their own country plants at which they receive milk from producers. Some of these distributors have such plants both in New York State and in other States. It would be difficult to impose more strict sanitary requirements at those plants inside the State than they have to meet at the out-of-State plants.

I am not saying that national sanitation standards are per se bad—neither did Governor Rockefeller. We are saying that the health and welfare of New York consumers is adequately protected now, and it is entirely proper that we should examine very carefully proposals to alter our effective and orderly policy.

In this connection, I ask unanimous consent that there be printed in the RECORD at this point in my remarks an article by Paul Corash of the City of New York Department of Health which appeared in the June 1961 issue of the Journal of Milk and Food Technology. Mr. Corash has, I believe, apprehended the real issues and set them forth honestly and objectively. I recommend the article to all who have a genuine interest in the welfare of the American milk consumer.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

IS FEDERAL MILK REGULATION THE ANSWER?

In the October 1960 issue of the Journal of Milk and Food Technology, Dr. J. C. Olson, Jr., raised and answered affirmatively the question: "Are we ready for a nationwide system of effective milk control?" There is, however, another aspect of this problem which raises the question whether it is desirable to have Federal laws governing the sanitary aspects of milk control of the type introduced into the 86th Congress under the title, "The National Milk Sanitation Act."

The basic justification presented by proponents of Federal control is that some local regulations are designed as trade barriers to protect the local dairy interests. Certainly it is not our purpose here to defend this type of regulation. However, to impute such motives generally to all States and municipalities which have regulations different from the U.S. Public Health Service milk ordinance and code or different from those of other jurisdictions, is a completely unworthy indictment of numerous boards of health and other local and State legislative bodies which have enacted their own milk sanitation regulations.

The Public Health Service ordinance and code which would presumably be the basis of any Federal milk regulation is an admirable instrument and serves an excellent purpose. It is designed to give guidance to local and State authorities in their formulation of milk regulations and wherever desired, it provides a complete code. The code, however, was never designed or intended to be forced upon any community against its will.

Giving full recognition to the merit of the code does not mean, however, that it has the infallibility of the Ten Commandments, that it takes care of all eventualities in the best possible manner or that it is heretical to believe that other milk regulations may also have their proper place. It would be the sheerest arrogance to assume this, to contend that there can be no honest difference of opinion regarding milk regulations, or that there may not be a peculiar need for a certain type of regulation in one area as against another. Our country is vast and the variations in our environmental, social, and economic conditions cover wide extremes. It is obviously unreasonable to maintain, for example, that a town of 500 people in the arid Southwest requires the same type of milk control program as a city of 8 million people in the Northeast. Yet the effect of the National Milk Sanitation Act would be to impose the same milk regulations over both localities.

It should be remembered that the application of the proposed National Milk Sanitation Act is not restricted to the regulation of raw milk supplies but is applicable as well to the interstate shipment of pasteurized milk. The requirements of the Public Health Service milk ordinance and code are satisfied if the control agency makes a minimum of two inspections per year of each pasteurizing plant. No one experienced in large municipal control could possibly feel safe with such limited supervision in the light of the many things which can go wrong in the operation of a pasteurizing plant. Most large cities make far more frequent inspections to assure the safety of the milk supply. Yet, under the proposed law, a city or State would be required to accept shipments of pasteurized milk from any approved plant outside the State, provided, it was subject to a meager two inspections per year. It may be well to point out here that the right given the receiving areas to make tests is virtually a meaningless gesture. The milk would be consumed before the results of bacterial determinations were completed and a negative phosphatase test result would not be an adequate indication of proper pasteurization if the HTST process was used.

The argument that the law would not be applicable to intrastate milk control is obviously unrealistic because most States and large cities obtain some milk supplies from both intra- and inter-state sources and economic necessity would force the adoption of the Federal code since it would obviously be impossible for a State to operate under two different codes.

Is there any person with a wide experience in the field of milk sanitation brash enough to insist that there is only one proper way to regulate the sanitary aspects of milk control? The answer to this question is obviously "No," and yet, if the National Milk Sanitation Act were to be adopted, the entire country would have forced upon it a single set of procedures and requirements which conceivably might not meet all of the particular needs of a given locality.

Nobody will deny the merit of a certain degree of uniformity but there is also great danger of making a fetish of this concept, and placing our control programs in a straitjacket of mediocrity. Progress in milk control, as in every other endeavor, has been made by people who were not shackled by conformity and were able to strike out in new directions.

The objection to the use of milk regulations for trade barrier purposes is completely valid and such regulations should not be tolerated. Fortunately, there are highly effective remedies available to deal with this problem without the need of imposing upon the country a national milk control law. The record is replete with cases where both State and Federal courts have stricken down milk control statutes which were held to be arbitrary and in restraint of the free flow of commerce. Boards of health are generally aware by now that there must be bona fide reasoning behind their legal actions and it would indeed be a hardy board that would attempt a trade barrier type of regulation in this day and age.

It is interesting to note that a very recent decision by the Supreme Court of the State of Kansas held that the U.S. Public Health Service milk ordinance and code which was in vogue in that State, was in itself a type of trade barrier regulation because the court held in part that "if it becomes apparent that the statute, under the guise of a police regulation, does not tend to preserve the public health, safety or welfare but tends more to stifle legitimate business by creating a monopoly or trade barrier, it is unconstitutional as an invasion of the property rights of the individual." [1]

While the proponents of a National Milk Sanitation Act argue the need for improving the public health as the foundation for

[1] Nebraska Supreme Court, *Lincoln Dairy Co.* v. *Finigan*, July 15, 1960.

their position, perfect frankness compels the recognition that they are primarily interested in economic considerations. The midwestern producer groups who market so much of their milk at relatively low manufacturing prices, visualize the sale of their supplies at eastern fluid milk prices and this prospect looks very pleasing. However, the trade barrier argument seems to lose some of its potency when the proponents are perfectly willing to coerce the rest of the country by imposing an unneeded and undesired law to obtain an economic advantage. Any State or local jurisdiction which desires to obtain milk supplies from distant areas may voluntarily avail itself of the facilities provided under the interstate milk shipment program. The wrongs of trade barrier legislation are not neutralized by the greater wrong of the proposed coercive National Milk Sanitation Act.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. JAVITS. I yield to my colleague.

Mr. KEATING. I am very happy my colleague from New York has brought up this subject, and I commend him for a very fine statement.

My distinguished colleague and friend, the senior Senator from Minnesota [Mr. HUMPHREY], yesterday made a statement on the floor of the Senate on which I should like to comment. His statement was a refutation of the farm views of a prominent New Yorker, whom the Senator referred to as an "alleged national figure." I rise today to defend this "alleged national figure," who also happens to be the distinguished Governor of my State, Nelson A. Rockefeller.

The Senator from Minnesota challenged the Governor with the suggestion: "He ought to speak as a national figure." I say this. He did speak as a national figure. He spoke on behalf of the consumer, taxpayer, and nonsubsidized farmers of America who oppose the multibillion dollar farm program of the Government of the United States. I stand foursquare with the Governor. It is about time we turned the tables on this foolishness.

I shall not make a point by point refutation of the Senator's remarks, because both of us have been through this a number of times. I should prefer to branch out on one of the subjects dear to the heart of the Senator, the feed grains program, with a new piece of information which I think is very relevant.

Just 8 days ago, on September 1, 1961, Secretary Freeman issued the statement which beats them all. I am not a great fan of the feed grains program. I have pointed out on several occasions that this program has been shrouded in more misleading figures and more misleading information than any I have ever seen. For example, the Secretary has been paying out good taxpayer dollars to retire corn on 5 million acres of farmland that never existed before, and probably does not exist now. The cost of this program has gone up higher than the temperature in July, and at the same time the Secretary's estimates as to the amount of corn which would be kept out of production have gone down and down.

The Department estimated in August that the still unharvested crop of corn will be 3,352,037,000 bushels. This is an increase in the corn crop of 176,860,000 bushels over the July figure. To put it all together, the 716-million bushel cut estimated in July is a 539-million cut, as estimated in August. The widely heralded cut in feed grain production has been sliding down hill at a very significant rate.

The Department has now come out with a new angle. They have a feed production estimate they call the "no control" estimate. This estimate was issued on September 1. It purports to show how much grain we would have had, if we had not enacted the feed grain program.

I am no statistician, but I understand that there are many ingredients to such an estimate which would be very difficult to assess. Estimated "no control" production would have been 71.5 million acres. How do we know this? From where did it come? I should like to know. I have therefore addressed a letter to Secretary Freeman which I shall read into the RECORD:

I note with great interest your press release of September 1 in which you state that the 1961 crop of corn is expected to be about 650 million bushels lower than the "no control" estimate. I am very much interested in how you arrived at what the acreage would have been without a feed grain program and the probable yield per acre.

I am sure that you made a careful State-by-State estimate prior to issuing this statement. I would appreciate it if you would send me a State-by-State tabulation showing the estimated acreage and probable production in the absence of the feed grain program. I am especially interested in the New York State figures, but am sure that other Senators would be interested in their respective States. Any assumptions used in this analysis would be appreciated.

I shall look forward to hearing from the Secretary on this matter. I agree with the distinguished Senator from Minnesota that the Crop Reporting Service of the Department of Agriculture is an important and very essential service. Therefore, it is also very important that full information be available as to how they work, where they get their information, and just what the information means. So many people are confused and bewildered by farm statistics, that a lot of these big issues are decided by default. I think that if we put these facts together, it will be shown without a doubt that the feed grain program has not accomplished what was initially acclaimed in terms of its probable success.

The question now is, how has the feed grain program not done what it was supposed to do? The Secretary has given us an answer in the September 1 statement to which I just referred:

The continued upward trend in fertilizer application per acre and the closer plant spacing, has raised the estimated yield per acre for corn by three bushels for 1961 over 1960.

Imagine that? Yield per acre in 1960 was 54.5 bushels. With the feed grain program in 1961 it is going to be 57.5 bushels. This statement should have been entitled: "How to beat the Government and get extra dollars from Uncle Sam: A do-it-yourself handbook." In essence, what the Secretary has said is the way to beat the program—and it is clearly being done—is to put your corn plants a little closer together and apply a little extra fertilizer. There it is.

Mr. President, the evidence is piling up, the feed grain program has missed the mark. We are getting a lot of detailed explanations as to how it is succeeding, when it really is not. The fact remains that we desperately need new ideas in agriculture. The Governor of New York is right.

Now, let me briefly touch on another subject that is dear to the heart of the Senator from Minnesota, as well as to the junior Senator from Wisconsin. Both Senators criticized the Governor for his position on the National Milk Sanitation Act. The Governor clearly disagreed with Secretary Freeman, the former Governor from Minnesota, who threw the administration's support behind this legislation.

Mr. President, I ask unanimous consent to include at this point in the RECORD a statement which I prepared on this issue for hearings of the House Committee on Commerce.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR KENNETH B. KEATING ON NATIONAL MILK SANITATION LEGISLATION BEFORE HOUSE COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE, AUGUST 30, 1961

Mr. Chairman, I appreciate this opportunity to express my views for the record. As a Senator from a State in which the dairying industry is of great importance, I am, of course, interested in your deliberations on legislation to establish nationwide milk sanitation standards.

Although the bill before your committee is commonly referred to as the National Milk Sanitation Act, it does not have truly national sponsorship or support. It is backed by a single regional economic interest which seeks to advance its own competitive position.

I want to call the attention of your committee to an article written by an expert in this field, Dr. Paul Corash, of the New York City Department of Health. Dr. Corash opposed the National Milk Sanitation Act in an article dated June 1961 which appeared in the Journal of Milk and Food Technology. He pointed out, and this makes good sense to me, that it is unreasonable to maintain that a town of a few hundred people in the arid Southwest would require the same type of milk control as a city of 8 million people in the Northeast.

I quote from Dr. Corash's article: "It would be the sheerest arrogance to assume this, to contend that there can be no honest difference of opinion regarding milk regulations, or that there may not be a peculiar need for a certain type of regulation in one area as against another."

Dr. Corash also noted that the National Milk Sanitation Act, as submitted to the Congress, requires only two inspections of pasteurizing plants per year. As almost every large city in the country makes many more inspections to insure that it will have a safe milk supply, Dr. Corash contends that this provision would be very unsatisfactory.

The legislation before your committee directly challenges our basic system of milk marketing. The several Federal and State milk marketing orders which assure the orderly distribution of milk in New York State have, I believe, worked very effectively. These orders represent a realistic and sensible policy for this sector of our agricultural economy. The establishment of milk marketing orders has permitted the farmer

to receive a fair and honest return for his products and have been administered in such a way as to protect the consumer's interest as well. Compared to the farm programs which we have implemented on our basic commodities, this program has involved very little cost to the taxpayer. To summarily cast aside this longstanding system of distribution, would in my mind be a serious error. It could very well invite the type of oversupply problems that we have had with other farm commodities, which have resulted in the excessive and, I believe, totally unnecessary subsidization of basic crop prices.

Let's face it. The people who want this legislation want to receive the higher eastern seaboard price for their milk. I do not begrudge them this; but I question their motives in putting this legislation forward as a measure to protect health, safety, and nutrition. These producers already have significant markets. Their production area has become a center for the manufactured uses of milk. Furthermore, I think that they are fooling themselves in that the transportation costs for the shipment of milk into the markets which they consider vulnerable would very likely preclude the sale of their dairy products in the East.

The sponsors of this legislation have produced a pat answer. It has been volleyed around in the political mill for years. But it is not a good answer. It does not deal with the many detailed and important factors which affect the dairying industry.

I oppose this encroachment of the power of the Federal Government in an area in which the States do and should have the basic responsibility. I regard the so-called National Milk Sanitation Act as a brazen attempt to sell eastern agriculture down the river.

There are no simple answers to the problems which have been conjured up by the interests that support this bill. I hope that the committee will carefully scrutinize this legislation and will avoid hasty action. This is not just a matter that affects the Northeast. It affects the entire country, and it affects every sector of our agricultural economy. We have so many bad farm policies, that I shudder to think we could take another step as foolish and unwise as enacting the National Milk Sanitation Act.

Mr. KEATING. Mr. President, it will be noted that I stressed five points.

First, the National Milk Sanitation Act is not national in its sponsorship or support.

Second, many experts, including the New York City Department of Health, claim that individualized and localized milk standards are necessary, to deal with different conditions throughout the Nation.

Third, the National Milk Sanitation Act is not the whole answer for the Midwest. Shipping costs are prohibitive, and this factor, in itself—even if we passed the National Milk Sanitation Act—would prevent milk from traveling all over the country in the way that many proponents suggest it would.

Fourth, the act would undermine the existing, orderly milk marketing arrangements, which have permitted farmers a fair and honest return, insured consumer interests and protection, and have involved no cost to the taxpayer. There are no big subsidy programs for milk.

Fifth, this is a matter for States and not the Federal Government, to decide.

I think these points are important and should be carefully weighed in any consideration of sweeping new programs to overturn existing and satisfactory marketing programs.

I am not alone. Many sound and reliable experts support this position, and therein, support the position taken by Governor Rockefeller.

My colleague has already requested that there be printed in the RECORD the statement by Dr. Paul Corash of the New York City Department of Health, which is mentioned in my statement before the House Commerce Committee.

I have a brief by Phillip Alampi on behalf of State departments of agriculture, which I ask unanimous consent to have printed at this point in the RECORD.

There being no objection, the brief was ordered to be printed in the RECORD, as follows:

BRIEF OF PHILLIP ALAMPI ON BEHALF OF NORTHEASTERN ASSOCIATION OF STATE DEPARTMENTS OF AGRICULTURE AT THE HEARING ON THE NATIONAL MILK SANITATION BILL BEFORE THE HOUSE INTERSTATE AND FOREIGN COMMERCE COMMITTEE, HEALTH AND SCIENCE SUBCOMMITTEE, APRIL 26–28, 1960, AT WASHINGTON, D.C.

My name is Phillip Alampi and I am secretary of agriculture of the State of New Jersey. My address is 1 West State Street, Trenton, N.J. I am appearing here today as president of the Northeastern Association of State Departments of Agriculture. The States represented in this organization are Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Delaware, Pennsylvania, and Maryland.

The dairy division of this organization has studied in detail H.R. 3840, known as the National Milk Sanitation Act. We have contacted the States in this region and have obtained their opinions as to the need for and the effect of the proposed legislation.

In the interest of agriculture in the northeastern States, as well as the general public, and more specifically the northeastern dairymen, this organization is opposed to the enactment of H.R. 3840. This position represents the thinking of all of the above mentioned States. In opposing this legislation, we are supporting the position of the vast majority of milk producer organizations in the northeast.

REASONS

1. The milk markets in the Northeast already have very adequate milk sanitation regulations. These markets can most effectively determine what health standards best serve the interests of the people of their area. The consumers look to their local authorities for the protection of their milk supply.

2. H.R. 3840 completely nullifies any State or local milk sanitation program that is not based on the recommended ordinance and code of the U.S. Public Health Service. The bill provides that the only means of certifying the milk supply which is shipped in interstate commerce are those criteria established by the Surgeon General. This means that the milk ordinances or codes of an individual State or local municipality would become ineffective as far as they relate to the interstate supply of milk. In many instances this would tend to lower the quality of milk shipped into the various receiving States.

The proposed act does not require any State or municipality to adopt the U.S. milk code, nor is there anything to prevent milk shipped in interstate commerce from such State having to meet higher requirements than those of the proposed code. Nevertheless, the States cannot set up standards higher than those of the proposed act without discriminating against their own plants. Therefore, the proposed legislation would inevitably downgrade the quality of milk for fluid use in all of the major northeastern markets.

3. H.R. 3840 is entitled "A bill to amend the Public Health Service Act to protect the public from unsanitary milk and milk products shipped in interstate commerce without unduly burdening State commerce." As far as the Northeast States are concerned, this bill does not carry out the mandate of its title.

It has been shown that the standards of quality would be lowered. Therefore, the bill becomes an economic measure rather than a quality measure. Furthermore, lowering the quality standards is detrimental to the promotion and expansion of market outlets for milk and milk products which is not in the interest of the entire dairy industry.

4. The intent of the proposed legislation will fall short of its major goal. The basic purpose of H.R. 3840, as we see it in the Northeast, is for one purpose only: namely, to permit the shipment of milk for fluid use from States of surplus production into distant markets where it may be sold at a higher price than that currently received by the producers of such milk. Proponents of the bill assume that prices for fluid milk—particularly here in the East—are established at a level which would permit the movement of milk from midwestern areas to the East at a price somewhat lower than the prices prevailing here now, but still higher than the return midwestern producers would realize on such milk if it were used for manufacturing. It is our considered opinion that the proponents of H.R. 3840 are doomed to disappointment because this legislation cannot possibly achieve this major purpose in the long run. The price differential between surplus milk producing States, such as Wisconsin and Minnesota, and the northeast importing States, is not sufficient to induce the movement of a permanent supply of milk from the surplus producing areas.

Consumers in the Northeast will not benefit as has been suggested by the proponents of this act and actually they could receive lower quality milk.

5. No appropriation should be made from the General Treasury for the administration of H.R. 3840. Section 814 provides for a direct appropriation of $1,500,000 per annum to the Public Health Service of the Department of Health, Education, and Welfare to administer the act. Inasmuch as H.R. 3840 is designed to benefit a small segment of the U.S. population, it seems rather inequitable that a direct appropriation should be made from the General Treasury to administer such a bill. Moreover, there is nothing in the bill which would benefit consumers in the Northeast. Hence, if Congress deems it advisable to enact such legislation, then the individuals who are the chief beneficiaries should bear the cost of administering the entire program.

We from the Northeastern States have pointed out in the above five reasons why we believe that this proposed legislation is unnecessary and detrimental to the dairy industry and the consuming public.

However, if in the wisdom of Congress, this bill should be enacted into law, we strongly recommend that the following principles be incorporated into the act:

1. The receiving State should be permitted and authorized to make inspection of the milk being shipped in interstate commerce to the market.

The shipping plant desiring to ship the milk should pay the cost of inspection of the producers and the plant.

2. All milk and milk products for all purposes should be included in the proposed legislation.

3. The administration of the law should be vested in the Department of Agriculture rather than in the Department of Health, Education, and Welfare. The purpose for this recommendation is that the Department of Agriculture is more keenly aware of milk production and marketing problems.

On behalf of the Northeastern Association of State Departments of Agriculture, I wish to take this opportunity to thank the members of this committee for permitting us to give you our views on the legislation now under consideration.

Mr. KEATING. Besides those statements, I point out that there is no partisan disagreement in New York State on this question. Mr. Paul Smith, chairman of the New York State Farmers for Kennedy-Johnson, in the 1960 campaign opposed the Sanitation Act and sought to blame the National Milk Sanitation Act on former Vice President Nixon. A letter was written to New York State dairy farmers in October of 1960 by Mr. Paul Smith, which may come as quite a shock to the Senators from Minnesota and Wisconsin. It reads as follows:

To my fellow dairy farmers:

Senator Kennedy has met in Syracuse with our dairy leaders since my first letter to you and he left no doubt that our best interests will be served if he is elected to the Presidency.

To report to you correctly on that meeting, here is what Alan S. Emory, Washington correspondent of the Watertown Daily Times wrote in his paper of September 30:

"Senator John F. Kennedy has promised New York dairy leaders that if he wins the Presidency he will hold a full dress discussion of their problems with them prior to inauguration.

"The Senator said he wanted a more intimate knowledge of these issues at hand when and if he moves into the White House. And he assured the dairyman that if he wins they will be able to see the Secretary of Agriculture, or the President, when they want to talk over their problems.

"The Senator and the dairymen agreed that there were better ways of correcting present dairy problems than lower prices. The Democratic Presidential nominee said he would tell his farm Secretary to be more practical in meeting the situations as they arose rather than adopting a rigid, inflexible policy.

"He expressed sympathy with a proposal for a thorough study of New York, New Jersey milk marketing order."

This is the kind of positive thinking that has been lacking in Washington for the last 8 years and that is why I am supporting the Kennedy-Johnson ticket.

Senator Kennedy is on the record but so far Mr. Nixon has declined a request of our dairy leaders that he also meet with them. The reason is clear: Mr. Nixon has no intention of breaking away from the policies of Ezra Taft Benson which have cost dairy farmers money year after year.

What promise, then, does the Nixon-Benson alliance hold for the dairy farmers? It is the promise of a ruinous National Milk Sanitation Act. Governor Rockefeller, who wrote the Republican platform, appeased the Minnesota-Wisconsin lobby which has long been trying to invade our fluid milk markets. The adoption of this National Milk Sanitation Act could cost New York State dairy farmers $40 million a year. Why? Because it would disregard the health requirements of our local communities and permit our fluid markets to be flooded with midwestern milk where production costs are much lower than ours.

And let us remember that Mr. Nixon has done nothing about the hearings that Mr. Benson has called for December 6 (after election) in New York State to tie our food prices to the cheap prices in the Midwest. The result of this could only be to put a ceiling on our fluid milk prices. In other words, our prices could go lower but never higher.

Sincerely yours,

PAUL SMITH.

In other words, Mr. Paul Smith, on behalf of the candidate whom he was supporting and who was elected, called it the "ruinous Milk Sanitation Act." Now, his Secretary of Agriculture, undoubtedly with his approval and support, is urging that the national milk sanitation bill be enacted into law.

Mr. President, the letter from Mr. Smith is misleading on two counts. First, Governor Rockefeller has consistently opposed the milk sanitation bill. He has never favored it. The letter implies that he did.

Also the letter refers to a promise made by President Kennedy that, if elected, he would hold "a full dress discussion" of the problem of the New York dairy industry. To the best of my knowledge this discussion has not been held.

The Governor of New York was thoroughly justified in the remarks which he made at Syracuse on this issue. I support him fully.

Mr. JAVITS. Mr. President, I thank the Senator for his remarks. I ask unanimous consent that excerpts from the speech to which my colleague and I referred, made by Governor Rockefeller at the Syracuse Chamber of Commerce on September 5, 1961, be printed at this point in my remarks.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

EXCERPTS OF REMARKS BY GOVERNOR ROCKEFELLER PREPARED FOR DELIVERY AT ANNUAL FARM DINNER, SYRACUSE CHAMBER OF COMMERCE, HOTEL SYRACUSE, SYRACUSE, N.Y., TUESDAY, SEPTEMBER 5, 1961

I made a bet with the Governor of Michigan the other day that says a lot about how highly I think of New York's agricultural products—and the New York Yankees.

The bet was 3 bushels of New York apples against 1 bushel of Michigan apples that the Yankees would win the American League pennant. Someone promptly objected that I wasn't being fair—that I was giving Governor Swainson only 3-to-1 odds when the odds favoring the Yankees were really 6-to-1. Nothing of the kind: Three bushels of New York apples against 1 bushel of any other apples is a 6-to-1 bet because New York apples are twice as good as any other apples. So Governor Swainson has a 6-to-1 bet, after all—even though he may not realize it.

Besides we are sending a dozen of New York's unsurpassed eggs and a pound of New York's superb butter to every one of the Detroit Tigers including the bat boy. That should give the Tigers enough extra energy to improve the odds in their favor somewhat—and it also gives us an alibi in the unthinkable event that the Yankees should lose. We can always claim the Tigers would never have made it if it hadn't been for New York's farmers, their chickens, and their dairy cows. But to tell the truth, I think my 3 bushels of apples are perfectly safe.

What I'm really looking forward to losing is the New York dairy calf I promised to send Governor Swainson if either Roger Maris or Mickey Mantle breaks Babe Ruth's homerun record.

New York's agriculture is, of course, much more than a matter of pride. It is a most vital element of this great State's economy—and stimulating the economic growth of New York is a main objective of my administration.

And so tonight I would like to discuss some recent developments affecting the agricultural economy of New York—and I refer to developments at both Federal and State levels.

So far as national farm policy is concerned, the point which troubles me most is the philosophy of artificial scarcity being brought to bear on farm production—and particularly with respect to feed grains. In spite of the solid opposition of the New York congressional delegation, Republicans and Democrats alike, we now have and will have again next year a so-called emergency feed grain program designed to slash feed grain production drastically. The program this year alone will cost the taxpayers $800 million in administrative expense and payments to feed grain producers who cut back their acreage at least 20 percent.

The big question in New York is how much more it will cost our dairymen, poultrymen and livestock feeders in higher prices for feed. It remains to be seen how effective this program actually will be in achieving its intended goal of cutting back feed grain production sharply. Feed prices are not so bad in New York at the present, but everyone is holding his breath about what will happen in the future if the philosophy of scarcity underlying the Federal program takes full effect.

And the real question in my mind is whether any such drastic feed grain program is necessary. Senator AIKEN of Vermont, certainly a leading authority in the field of agricultural legislation, makes these points:

1. The present carryover in feed grain supplies is only about 3 months more than a normal safe supply.

2. This carryover has accumulated in a period of declining total number of farm animals but the number of animals is now increasing and must continue to increase.

3. In view of the fact that the Nation's population is increasing by 3 million persons a year, the real need is to concentrate on maintaining or even increasing our feed grain production through the 1960's.

Not only do future demands challenge the necessity for any such drastic feed grain program, but weather conditions this summer have an important bearing. This was dramatized recently by two contradictory actions of Secretary of Agriculture Freeman: in April, he started a program to reduce directly the supply of corn and grain sorghum and indirectly the supply of barley and oats; but in July, just 90 days later, he reversed himself by imposing limitations on sales of Government stocks of oats, barley and corn to conserve supplies for drought plagued livestock farmers in the northern Great Plains.

A philosophy of scarcity in feed grains may be good short-term farm politics in certain areas of the country, but I can't for the life of me see how it is good for the Nation or good for New York.

Another aspect of Federal farm policy that troubles me greatly—and this is of direct concern to our dairy farmers whose products account for half the total farm income of New York State—was Secretary Freeman's recent espousal of a Federal milk sanitation law. In the first place, our State milk sanitation standards are already higher than any Federal law would provide—therefore no public health problem is involved. In the second place, a Federal law superseding State law would open the milk markets of New

York's dairymen to a periodic flood of surplus milk from the upper Midwest with disastrous economic results for our dairymen. In the third place, there would be no long-run benefit for our consumers. New York dairymen cannot be expected to supply our milk needs just for the lean months of production—and if you drive more New York milk producers out of business, you create a shortage of milk here in the lean production months causing pressures for higher consumer prices in the end.

In short, it seems to me that Secretary Freeman is pushing legislation favoring his home State of Minnesota and its immediate neighbors at the expense of the rest of the country—and threatening to disrupt our existing system for orderly milk marketing which has been working very satisfactorily for producers, consumers and all others concerned.

As to State action, I have appointed a special committee on milk marketing to study the class I milk-pricing formula affecting New York's dairy farmers—a formula which has undergone no basic revision since 1950. The cost-price squeeze on our dairy farmers has been a matter of serious concern to me. I joined with New York Congressmen in a plea to Secretary Benson last year which won temporary relief, but it is evident that the basic formula itself is in need of updating in the light of changing conditions. The special committee under the distinguished chairmanship of Dr. Glenn W. Hedlund, of Cornell, has its study well underway. We expect a report early next year recommending solutions for problems in this area.

In addition, State legislation enacted this year provides these additional protections for New York farmers:

1. Protection against unfair picketing in labor disputes:

Legislation which became effective last Friday empowers the courts to issue 5-day temporary injunctions in certain labor disputes involving perishable farm products. This opportunity to obtain speedier court relief in labor disputes is vital to the farmer because his production cannot be controlled. The farmer's products are subject to spoilage, and interruption of his harvesting, production, and distribution cycle can be economically disastrous.

The application of this legislation is restricted to disputes involving production at the farm, shipment from the farm, first storage or first processing. In addition, the labor union involved must be given an opportunity to be heard and the court must make findings on the basic facts of the dispute.

2. Protection against losses in marketing:

Brokers and dealers in farm products will be required to obtain licenses from the Department of Agriculture and Markets, and to be bonded by the Department. This will give farmers protection against the default or insolvency of a broker or dealer to whom the farmer has sold his crops. Commission merchants and net-return dealers handling farm products have previously been licensed and bonded by the Department. Extension of these requirements to brokers and dealers, effective next year, will substantially broaden the area of protection for the farmer when he sends his crops to market.

During the fiscal year which ended last March 31, the State vaccinated over 329,000 calves against brucellosis. This is the largest number of vaccinations in any year, and represents 95 percent of the calf population of the State—one of the highest percentages in the Nation.

In conclusion, a few words about the productivity of American agriculture. This productivity is the wonder of the world—and one of our greatest national assets.

Ten percent of our population is on the farm—and we worry about surpluses of food. Fifty percent of the Soviet population is engaged in food production—and Khrushchev urges his people to eat horsemeat. Severe famine is sweeping Red China, food shortages plague the satellites—and we are exporting food throughout the free world.

These contrasts tell us much about the industry and ability of the free American farmer. They also dramatize the folly of the notion that agriculture works best as a creature of bureaucracy.

Russia, Red China, the satellites all have heavily managed agricultural economies—and all have shortages of food. The answer for America is not more power for bureaucrats but more freedom for the American farmer.

Incentives, protections, and programs to conserve the land, increase technical efficiency in both production and use of agricultural products, and to retire unneeded and marginal acreage while providing new economic opportunities for the lowest income segment of the rural population are all legitimate objectives of government.

But I submit that an underlying philosophy of scarcity and tight controls geared to the agricultural problems created by World War II and the Korean war will not truly serve the future in a growing America.

RESOLUTION TO PRINT HEARINGS ON COMMUNIST FORGERIES IN FOREIGN LANGUAGES

Mr. KEATING. Mr. President, I am delighted that the Judiciary Committee has reported a resolution, which I strongly support, to print 2,000 copies in each of 3 foreign languages of hearings recently conducted by the Senate Internal Security Subcommittee on Communist Forgery Tactics. This publication is an effective antidote to the poison the Communists are trying to spread abroad as well as among American citizens who speak foreign languages. Under the resolution, congressional hearings would, for the first time, be printed in French, Italian, and Spanish.

At these hearings, which were held on June 2, 1961, testimony was presented by Mr. Richard Helms, Assistant Director of the Central Intelligence Agency. Mr. Helms documented 32 known instances in which the Communists have forged Government documents. Among the best known of these forgeries are: A letter from Governor Rockefeller to President Eisenhower calling for more aggressive and warlike American policies, a forged report from Vice President Nixon along the same lines, a letter from Chiang Kai-shek to President Eisenhower stating that many Chinese Nationalists were disloyal, and several letters from American pilots who were reported to be planning to drop an atomic bomb in the North Sea to dramatize the horror of nuclear warfare.

The Americans who are most seriously subjected to these forgeries are foreign speaking groups. I firmly believe that solid and responsible information should be available both in the United States and overseas on the methods the Soviets have used in attempting to authenticate false propaganda about American policies and intentions.

The Italian speaking population of the United States is estimated to number over 4½ million; Spanish, over 2 million; and French, about one-half million. These hearings deserve the widest possible circulation among these groups. It is my hope that, despite the limited amount of time remaining before Congress adjourns, final approval can be obtained this year.

OUR OPPORTUNITY AGAINST RED IMPERIALISM

Mr. HRUSKA. Mr. President, the progress of recent events leads one to conclude that the Kremlin's blind power, by its very blindness, must in the long run lose to the united power of a free world firmly dedicated to human freedom and respect for the dignity and rights of the individual.

This thought is developed in a striking editorial advertisement appearing in the New York Times on September 7, 1961, by Mr. A. N. Spanel, founder of International Latex Corp. It defines the sealed entombment of East Germany and its forced conversion into a Red prison colony. It does more, for it offers sound and practical answers that merit attention by our State Department and the free world embassies to the United Nations.

For over two decades Mr. Spanel, chairman of International Latex Corp., has performed a herculean labor on behalf of our country and the entire free world. To our total unity he and his corporation are completely dedicated.

For this, they certainly deserve the greatest recognition and respect.

I, therefore, ask unanimous consent that Mr. A. N. Spanel's editorial which appeared in the New York Times September 7, 1961, entitled, "Our Opportunity Against Red Imperialism," be printed in the body of the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

OUR OPPORTUNITY AGAINST RED IMPERIALISM

(By A. N. Spanel)

We have become so accustomed to the Kremlin's big lies that we notice them, if at all, only to shrug them off. Our responses have been so enfeebled by familiarity that new Communist deceptions, or variations on old ones, leave us unimpressed.

Unfortunately this indifference plays into the enemy's hands, in that we fail to expose his lies with the vigor and the anger they deserve. Moscow can be utterly reckless in its grand falsifications because it has come to count on our indifference.

Consider, for instance, the Kremlin's pose as the leader and spokesman of anticolonial movements. In the light of its own expanding colonialism—the most dynamic and ruthless in today's world—that self-assumed role is an insult to commonsense. Its sheer impertinence is staggering.

But no one is staggered. We accept it casually and seem unable or unwilling to exploit the obvious opportunities for counteraction and counterpropaganda.

In East Berlin in recent weeks the world has witnessed arrogant, brutal colonialism in action. The Soviets and their German puppets, on August 13, sealed off East from West Berlin with barbed wire, stonewalls and military cordons. On a border cut through the living flesh of a great city, Red imperialism at its ugliest was dramatized again, as in Hungary 5 years ago, for all to see and shudder.

Since then the Communists have plugged one possible escape route after another. They have shot and killed East Germans who tried to swim to freedom, then celebrated the murders with gleeful backslapping. They have arrested hundreds of "dissidents"—with maximum publicity to deepen the pervasive fears. They have promulgated decrees prescribing forced labor and deportation from their homes for those daring to criticize their masters.

The entrapment of the East Germans and the open terror with which the illegal action is being reinforced are acts of colonial violence. Any intelligent child knows this. One would suppose that, against this foul background, Moscow would hesitate just now to raise issues of "anticolonialism." But evidently there are no limits to their contempt for mankind. If there be any who doubt this, let them ponder the Kremlin's latest brazen resumption of nuclear testing, boasting that they now have hydrogen bombs equal to 100 million tons of TNT. This they did on the very eve of the meeting of the world's neutral bloc in Belgrade.

We should never permit these neutrals to forget that even poisoning the world's atmosphere by the Communists is no deterrent to their brinkmanship or their blackmail. Perhaps they may now be able to see the Berlin picture more realistically since Khrushchev's design also perilously affects them.

Even while Red troops are hunting down would-be East German refugees, the Soviet Union, in the words of a New York Times dispatch from Moscow, "called upon the United Nations Assembly to establish a deadline for the abolition of colonialism." There are no words to describe such monumental gall. It's the "Stop thief!" technique carried to a shocking extreme.

The U.N. Assembly will convene on September 19. Khrushchev and his man Gromyko have formally demanded that the "colonialism issue" be placed on its agenda. Far from trying to keep it off the agenda, the United States and other democracies should exploit the opportunity to the limit. It is their chance, in view of world awareness of the Berlin crime, to puncture and annihilate Moscow's shameless pretensions to anti-colonial and anti-imperialist leadership.

Will we have the courage and the intelligence to make uninhibited use of the opportunity? Or will we again soft-pedal the issue of Red imperialism in order to "relax tensions"?

Everyone remembers Khrushchev's table-thumping tantrums at a previous Assembly meeting. But too few recall what precisely it was that touched off his fury. On the first occasion he took to banging with his fists when a Philippine delegate alluded to Soviet colonialism. A few days later he improved the technique by using his shoe instead of fists, and that was when the Premier of Australia attacked Soviet colonialism.

That happens to be the most tender spot in the Soviet anatomy. Touch it, and the Communists shriek in pain. Khrushchev's reaction in frenzy a few years ago to an official American resolution on captive nations was another such cry of pain. Let's make the most of this Communist vulnerability.

The revival of the colonial issue, as Moscow sees it, confronts the United States with a "dilemma." It is supposed to give us only a choice between offending our Western allies and alienating Afro-Asian nations.

But it's a Moscow-made dilemma which Americans have tended to accept too readily. There are other choices. Without condoning colonial sins and errors of the past, we can emphasize the far-reaching breakup of colonial systems by Western nations. We can champion peaceful, ordered, stage-by-stage approaches to freedom for "emerging" peoples, as against an irresponsible independence-now policy which foists nationhood too soon upon unprepared populations.

A comparison of Western and Red imperialisms—not in a defensive but in a boldly offensive spirit—cannot but redound to the benefit of the West. We need only insist upon defining colonial areas to include the Red varieties. We need only see to it that every U.N. resolution for "abolition of colonialism" applies also to the captive nations in the Red empire.

The Soviet pose of champion of unfree peoples can thus be turned into a fallen soufflé. The whole obscene story of Communist colonialism, including the episodes of uprisings drowned in blood in East Germany, Hungary, and Tibet—and the current barbed wire imprisonment of the East German people—should be spread on the record in detail, day after day if necessary. Even the newly independent Afro-Asian countries will then begin to see through the Kremlin's big lies and demagogery.

If there is an area in which the West and its friends can afford to take the initiative, it is colonialism. The Kremlin pushes for independence-now in Africa because it wants the chaos that follows. Chaos is the climate in which Red imperialism can best extend its slave empires.

This fundamental truth can and must be made crystal clear to Africans, Asians, and the rest of humankind. For once let us meet the challenge of an impertinent Communist deception head on. We can turn it into a deadly boomerang against its authors.

U.S. DISARMAMENT AGENCY FOR WORLD PEACE AND SECURITY

The Senate resumed the consideration of the bill (S. 2180) to establish a U.S. Disarmament Agency for World Peace and Security.

Mr. BUSH. Mr. President, some time ago I discussed with the Senator from Minnesota [Mr. HUMPHREY] a possible amendment to the pending measure. He then told me that the bill had been read the third time. The third reading apparently took place while I was working on the amendment, and I was not aware that there had been a third reading.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER (Mr. LONG of Missouri in the chair). The Senator will state it.

Mr. BUSH. Has there been a third reading of the pending bill?

The PRESIDING OFFICER. The Senator is correct.

Mr. BUSH. I shall suggest the absence of a quorum in order to locate the Senator from Minnesota, because he asked me to discuss this subject on the floor of the Senate with him.

Mr. GORE. Mr. President, will the Senator withhold his request while insertions in the RECORD are made?

Mr. BUSH. Mr. President, the discussion will take only a moment.

(At this point Mr. HUMPHREY entered the Chamber.)

Mr. BUSH. Mr. President, if I may have the attention of the Senator from Minnesota, I remind him of our conversation of a few moments ago and direct his attention to page 7, section 26 of the bill, with reference to the general Advisory Committee. The section calls for a Presidential appointment, with the advice and consent of the Senate, of 15 members, but it does not provide how long such members shall serve and what their terms shall be. I told the Senator I had intended to offer an amendment in order that the subject might be considered carefully in conference.

My amendment would read:

On page 7, in line 13, after the period, insert the words "the members shall serve at the pleasure of the President."

Mr. HUMPHREY. That is the intent of the section. I hope that the legislative history that we can build upon this particular section will clearly indicate that such is the intention.

Mr. BUSH. I offered that amendment particularly in order that the subject might be considered in conference. I am not sure that that is the best way the committee could be appointed, or whether it should be appointed for a 5-year term, or on a staggered term. I believe the subject should be considered carefully by the conferees so that when the bill comes back to the Senate we shall know what the terms of the members will be.

Mr. HUMPHREY. Yes.

Mr. BUSH. And whether they are to serve at the pleasure of the President. I thank the Senator for his suggestion, even though it cannot be offered as a formal amendment.

Mr. HUMPHREY. We also made it quite clear, both in committee and in the debate on the floor, that this is to be a bipartisan Commission and advisory body, to serve at the pleasure of the President so far as the terms are concerned, the members to represent a good cross section of American life, composed of individuals who are competent in this particular area.

Mr. BUSH. I am glad the Senator has mentioned that point. The Senator from Georgia [Mr. RUSSELL] previously called attention to the fact that there is no mention in the bill about any bipartisanship. I believe that his comments on that score should be considered by the conferees, along with those that I have made on the question of the terms.

Mr. HUMPHREY. I say to the Senator in all good humor that that section was drawn up by a good Republican, Mr. McCloy, a great American. I am glad that the Senator from Georgia [Mr. RUSSELL] brought it up, because it might be presumed, otherwise, that all the appointees were to be Republicans. I hope that some of them will be Democrats.

Mr. BUSH. Even a great man of the stature of Mr. McCloy is capable of lapsus mentis on an important matter.

Mr. HUMPHREY. The same is true of some of us of lesser stature.

Mr. KUCHEL. Mr. President, will the Senator yield?

Mr. BUSH. I yield.

Mr. KUCHEL. Why is it that my able friend from Minnesota suggests that there is anything humorous when he indicates that one of our party contributed to the verbiage of legislation?

Mr. HUMPHREY. It is an example of what happens from fatigue.

PROPOSED AGREEMENT FOR COOPERATION BETWEEN THE GOVERNMENT OF THE UNITED STATES AND THE GOVERNMENT OF THE FRENCH REPUBLIC

Mr. GORE. Mr. President, yesterday President Kennedy forwarded to the Congress a proposed agreement for cooperation between the Government of the United States and the Government of the French Republic for cooperation in the operation of atomic weapons systems. The proposed agreement is similar to a number of agreements previously entered into between the United States and individual NATO allies. It is similar, for example, with agreements for cooperation which the United States entered into in 1959 with the Federal Republic of Germany, the Kingdom of the Netherlands, the Government of Turkey, and the Government of Greece and through which we have been cooperating during the past 2 years with those nations for mutual defense purposes. It is likewise similar to the agreement for cooperation with the Government of Italy which the President submitted to the Congress in January of this year and which is now in the process of being implemented.

These agreements provide that the United States will exchange with each country classified information necessary to the development of defense plans; the training of personnel in the employment of and defense against atomic weapons and other military applications of atomic energy; the evaluation of the capabilities of potential enemies in the employment of atomic weapons and other military applications of atomic energy; and the development of delivery systems capable to carry atomic weapons. In addition the proposed agreements permit the United States to transfer to each country nonnuclear parts of atomic weapons systems.

Article IV of the proposed agreement with France, similar to the other mentioned agreements, makes clear that under the agreement there will be no transfer of atomic weapons, nonnuclear parts of atomic weapons or special nuclear material.

The proposed agreement with France, is accordance with section 123 of the Atomic Energy Act of 1954, as amended, together with the approval and determination of the President, has been referred to the Joint Committee on Atomic Energy. Under section 123 the proposed agreement cannot become effective until a period of 60 days has elapsed while Congress is in session, during which period the Congress, by concurrent resolution, may disapprove it.

In his message to the Congress, forwarding the proposed agreement for cooperation with France, the President stated that he believes that the gravity of the current international situation compels special action to permit this agreement to come into effect promptly. He, accordingly, has requested appropriate action by the Congress to permit the agreement to take effect during the current session of the Congress.

The Joint Committee on Atomic Energy will hold an open public hearing beginning at 10 a.m., Tuesday, September 12, in room P–63, the Old Supreme Court Chamber, U.S. Capitol, to receive testimony from representatives of the State Department, Department of Defense, and the Atomic Energy Commission concerning this proposed agreement. In order that all members of the Congress and the public may have knowledge of the details of the proposed agreement, I ask unanimous consent to enter into the RECORD, at the conclusion of my remarks, a copy of the proposed agreement along with the accompanying correspondence and message from the President. Subsequent to the public hearings, I would expect that the Joint Committee will issue a report as to its recommendations concerning the proposed agreement and as to any action on the part of the Congress to expedite implementation of the proposed agreement.

There being no objection, the agreement was ordered to be printed in the RECORD, as follows:

To the Congress of the United States:

For some time members of the North Atlantic Treaty Organization have been taking steps toward the introduction of the most modern weapons into NATO forces. Among these measures is the introduction into forces of our NATO allies of weapons capable of delivering nuclear warheads. Such steps have been proceeding for some time following the considered judgment and agreement of the NATO governments. The objective is to achieve the most effective pattern of NATO military defensive strength. In view of the well-known purely defensive purposes of the alliance, the introduction of modern weapons into NATO forces to take account of technological developments is in no way a cause for legitimate concern on the part of other countries.

Article III of the North Atlantic Treaty calls upon the members of the alliance to maintain their capacities to resist armed attack through effective self-help and mutual aid. As part of its contribution to the strength of the alliance, the United States has entered into a number of agreements through which we cooperate with NATO allies in the uses of atomic energy for mutual defense purposes. These agreements have been concluded pursuant to the Atomic Energy Act of 1954, as amended. All of these agreements are designed to implement the NATO objectives for maintaining the most modern weapons and techniques in NATO forces.

We have just concluded an agreement with the Government of France which is essentially the same as agreements previously concluded with a number of other NATO Allies for cooperation in the uses of atomic energy for mutual defense purposes. This agreement will make possible effective cooperation with France in NATO mutual defense planning and in the training of French NATO forces. Training of certain French NATO forces which play a significant role in European defense cannot proceed to conclusion until this agreement becomes effective. This agreement should be brought into effect as quickly as possible, in order that we can promptly and fully utilize the potential of French military forces in the development of our NATO defensive strength. In light of the probable time remaining for this session of the Congress and in view of the provisions of section 123d of the Atomic Energy Act of 1954, as amended, it appears that normally it would not be possible to bring this agreement into effect until the next session of the Congress. Accordingly, I would appreciate action by the Congress during the current session which would permit the agreement to come into force promptly.

I understand and respect the importance of mature consideration in the Congress of agreements of this sort, but I believe that in the present case there are compelling reasons for rapid action. The gravity of the international situation, and in particular the Soviet threat to the freedom of West Berlin, have made it a matter of first importance that the unity of the North Atlantic nations should be sustained. The Government of France, in this crisis, has behaved with great firmness, and the stanch and determined position of President de Gaulle, in particular, has reinforced the West. In these circumstances, I deem it of great importance that we should proceed promptly with such a joint undertaking as this one, carefully matured in prolonged negotiation. As has already been explained in informal discussions with interested Members of the Congress, the present agreement provides for a limited release of information to carefully selected personnel. Careful arrangements have been made to insure that all necessary security requirements are met, and the inclusion of France among NATO countries participating in this general undertaking is an important step forward at a moment in which such a step has a wider significance than usual. It is for these reasons that I urge upon the Congress appropriate special actions to permit the agreement to come into force.

In accordance with the Atomic Energy Act of 1954, as amended, I am submitting to each House of the Congress an authoritative copy of the agreement with the Government of France. I am transmitting also a copy of the letter from the Secretary of State which forwarded to me an authoritative copy of the agreement, a copy of the joint letter from the Deputy Secretary of Defense and the Chairman of the Atomic Energy Commission recommending my approval of the agreement, and a copy of my memorandum in reply thereto which contained my approval.

JOHN F. KENNEDY.

THE WHITE HOUSE, *September 7, 1961.*

THE SECRETARY OF STATE,
Washington, August 3, 1961.

The PRESIDENT,
The White House.

DEAR MR. PRESIDENT: I have the honor to lay before you with a view to its transmission to the Congress, pursuant to the Atomic Energy Act of 1954, as amended, an authoritative copy of an agreement between the Government of the United States of America and the Government of the French Republic for cooperation in the operation of atomic weapons systems for mutual defense purposes, signed at Paris on July 27, 1961.

This agreement was signed on behalf of the United States pursuant to the authorization granted in your memorandum of July 21, 1961, to the Secretary of Defense and the Chairman of the Atomic Energy Commission. A copy of this memorandum was transmitted to the Department of State.

Faithfully yours,

DEAN RUSK.

(Enclosures.)

THE SECRETARY OF DEFENSE,
Washington, July 20, 1961.

THE PRESIDENT,
The White House.

DEAR MR. PRESIDENT: There is hereby submitted for your consideration and approval a proposed agreement between the Government of the United States of America and the Government of France for cooperation on the uses of atomic energy for mutual defense purposes.

The proposed agreement will permit, under the authority of sections 91c and 144b of the Atomic Energy Act of 1954, as amended,

the transfer of classified information and certain equipment necessary for the purpose of improving the state of training and operational readiness of the armed forces of France. The December 1957 NATO heads of Government meeting established the concept of a stockpile of arms for the strengthening of NATO's defenses, and this present agreement is an important part of the implementation of this concept. The carrying out of this agreement should do much to advance our mutual defense interest, including the vital cause of strengthening the NATO defensive alliance, and will thereby aid materially in the defense of the United States.

Article II of the agreement provides for the transfer of classified information, including "restricted data" and "formerly restricted data," necessary to the development of defense plans; the training of personnel in the employment of and the defense against atomic weapons and other military applications of atomic energy; the evaluation of the capability of potential enemies in the employment of atomic weapons and other military applications of atomic energy; and the development of delivery systems capable of carrying atomic weapons.

Article III of the agreement provides that the United States will transfer nonnuclear parts of atomic weapons systems involving restricted data (other than nonnuclear parts of atomic weapons) for the purpose of improving the state of training and operational readiness of the armed forces of France. However, in view of section 91c of the Atomic Energy Act, the applicability of which is reflected in article IV of the agreement, no transfer can be made if it would contribute significantly to the recipient nation's atomic weapon design, development or fabrication capability. It is not possible to determine at this time the types, quantities and conditions of transfer, whether by sale, lease or loan, of those parts which it will become necessary to transfer for our mutual defense during the period of the agreement. Accordingly, under the terms and conditions of the agreement, it will be necessary to determine from time to time the types, quantities and conditions of transfer and such determination shall be submitted for your approval.

The agreement would remain in force until terminated by agreement of both parties, thus assuring continued protection for the information and equipment transferred in accordance with the provision of the agreement. However, cooperation for the transfer of information and equipment under articles II and III of the agreement may be discontinued by either party in the event of the termination of the North Atlantic Treaty.

In accordance with the provisions of sections 91c and 144b of the Atomic Energy Act of 1954, the agreement specifically provides in article I that all cooperation under the agreement will be undertaken only when the communicating or transferring party determines that such cooperation will promote and will not constitute an unreasonable risk to its defense and security. Article I of the agreement also provides, in accordance with the act, that all cooperation under the agreement will be undertaken only while the United States and France are participating in an international arrangement for their mutual defense and security and making substantial and material contributions thereto. Cooperation under articles II and III of the agreement would be undertaken only when these conditions prevail.

Article IV of the agreement stipulates that the cooperation under the agreement will be carried out by each of the parties in accordance with its applicable laws. Article IV also makes clear that there will be no transfer under the agreement of atomic weapons, nonnuclear parts of atomic weapons or special nuclear material.

In addition to the foregoing provisions on the terms, conditions, duration, nature and scope of cooperation, the agreement provides that the parties will maintain agreed security safeguards and standards. The agreement also contains particular commitments that the recipient of any equipment or information that is obtained pursuant to the agreement will not transfer it to unauthorized persons and will not transfer it beyond the jurisdiction of the recipient party, except in limited circumstances specifically provided in the agreement.

France is now participating with the United States is an international arrangement pursuant to which France is making substantial and material contributions to the mutual defense and security. It is the view of the Department of Defense and the Atomic Energy Commission that this agreement is entirely in accord with the provisions of the Atomic Energy Act of 1954, as amended. It is the considered opinion of the Department of Defense and the Atomic Energy Commission that the performance of the proposed agreement will promote and will not constitute an unreasonable risk to the common defense and security of the United States.

Accordingly, it is recommended that you (a) approve the program for the transfer of nonnuclear parts of atomic weapons systems involving restricted data under the terms and conditions provided in this letter and the proposed agreement; however, types, quantities and conditions of transfer of such parts are subject to your later approval; (b) determine that the performance of this agreement will promote and will not constitute an unreasonable risk to the common defense and security of the United States; and (c) approve the proposed agreement and authorize its execution for the Government of the United States in a manner specified by the Secretary of State.

The Secretary of State concurs in the foregoing recommendations.

Sincerely,

GLENN T. SEABORG,
Chairman, Atomic Energy Commission.
ROSWELL L. GILPATRIC,
Deputy Secretary of Defense.

(Enclosure: Proposed agreement.)

THE WHITE HOUSE,
Washington, July 21, 1961.

Memorandum for the Secretary of Defense, the Chairman, Atomic Energy Commission.

In your joint letter to me of July 20, 1961, you recommended that I approve a proposed agreement between the Government of the United States of America and the Government of France for cooperation on the uses of atomic energy for mutual defense purposes.

France is participating with the United States in an international arrangement pursuant to which it is making substantial and material contributions to the mutual defense and security. The proposed agreement will permit cooperation necessary to improve the state of training and operational readiness of the armed forces of France, subject to provisions, conditions, guarantees, terms and special determinations, which are most appropriate in this important area of mutual assistance, in accordance with the agreement in principle reached in December 1957.

Having considered your joint recommendations and the cooperation provided for in the agreement, including security safeguards and other terms and conditions of the agreement, I hereby (1) approve the program for the transfer of nonnuclear parts of atomic weapons systems involving restricted data under the terms and conditions provided in your joint letter and the proposed agreement; however, types, quantities, and conditions of transfer of such parts are subject to my further approval; (2) determine that the performance of this agreement will promote and will not constitute an unreasonable risk to the common defense and security of the United States; and (3) approve the proposed agreement and authorize its execution for the Government of the United States in a manner designated by the Secretary of State.

JOHN F. KENNEDY.

AGREEMENT BETWEEN THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF THE FRENCH REPUBLIC FOR COOPERATION IN THE OPERATION OF ATOMIC WEAPONS SYSTEMS FOR MUTUAL DEFENSE PURPOSES

The Government of the United States of America and the Government of the French Republic,

Considering that they have concluded a Mutual Defense Assistance Agreement, pursuant to which each Government will make available to the other equipment, materials, services, or other military assistance in accordance with such terms and conditions as may be agreed;

Considering that their mutual security and defense require that they be prepared to meet the contingencies of atomic warfare;

Considering that they are participating together in an international arrangement pursuant to which they are making substantial and material contributions to their mutual defense and security;

Recognizing that their common defense and security will be advanced by the exchange of information concerning atomic energy and by the transfer of certain types of equipment;

Believing that such exchange and transfer can be undertaken without risk to the defense and security of either country; and

Taking into consideration the United States Atomic Energy Act of 1954, as amended, and all applicable statutes of France, which were enacted or prepared with these purposes in mind;

Have agreed as follows:

ARTICLE I

General provisions

While the United States and France are participating in an international arrangement for their mutual defense and security and making substantial and material contributions thereto, each Party will communicate to and exchange with the other Party information and transfer non-nuclear parts of atomic weapons systems involving Restricted Data to the other Party in accordance with the provisions of this Agreement, provided that the communicating or transferring Party determines that such cooperation will promote and will not constitute an unreasonable risk to its defense and security.

ARTICLE II

Exchange of information

Each Party will communicate to or exchange with the other Party such classified information as is jointly determined to be necessary to:

A. the development of defense plans;

B. the training of personnel in the employment of and defense against atomic weapons and other military applications of atomic energy;

C. the evaluation of the capabilities of potential enemies in the employment of atomic weapons and other military applications of atomic energy; and

D. the development of delivery systems compatible with the atomic weapons which they carry.

ARTICLE III

Transfer of nonnuclear parts of atomic weapons systems

The Government of the United States will transfer to the Government of the French Republic, subject to terms and conditions

to be agreed, non-nuclear parts of atomic weapons systems involving Restricted Data as such parts are jointly determined to be necessary for the purpose of improving the French state of training and operational readiness.

ARTICLE IV

Conditions

A. Cooperation under this Agreement will be carried out by each of the Parties in accordance with its applicable laws.

B. Under this Agreement there will be no transfer by either Party of atomic weapons, non-nuclear parts of atomic weapons, or special nuclear materials.

C. The information communicated or exchanged, or non-nuclear parts of atomic weapons systems transferred, by either Party pursuant to this Agreement shall be used by the recipient Party exclusively for the preparation or implementation of defense plans in the mutual interests of the two countries.

D. Nothing in this Agreement shall preclude the communication or exchange of classified information which is transmissible under other arrangements between the Parties.

ARTICLE V

Guarantees

A. Classified information and non-nuclear parts of atomic weapons systems communicated or transferred pursuant to this Agreement shall be accorded full security protection under applicable security arrangements between the Parties and applicable national legislation and regulations of the Parties. In no case shall either Party maintain security standards for safeguarding classified information and non-nuclear parts of atomic weapons systems, made available pursuant to this Agreement, less restrictive than those set forth in the applicable security arrangements in effect on the date this Agreement comes into force.

B. Classified information communicated or exchanged pursuant to this Agreement will be made available through channels existing or hereafter agreed for the communication or exchange of such information between the Parties.

C. Classified information, communicated or exchanged, and any non-nuclear parts of atomic weapons systems transferred pursuant to this Agreement shall not be communicated, exchanged or transferred by the recipient Party or persons under its jurisdiction to any unauthorized persons or, except as provided in Article VI of this Agreement, beyond the jurisdiction of that Party. Each Party may stipulate the degree to which any of the information and non-nuclear parts of atomic weapons systems communicated, exchanged or transferred by it or persons under its jurisdiction pursuant to this Agreement may be disseminated or distributed; may specify the categories of persons who may have access to such information or non-nuclear parts of atomic weapons systems; and may impose such other restrictions on the dissemination or distribution of such information or non-nuclear parts of atomic weapons systems as it deems necessary.

ARTICLE VI

Dissemination

Nothing in this Agreement shall be interpreted or operate as a bar or restriction to consultation or cooperation in any field of defense by either Party with other nations or international organizations. Neither Party, however, shall so communicate classified information or transfer or permit access to or use of non-nuclear parts of atomic weapons systems made available by the other Party pursuant to this Agreement unless:

A. It is notified by the originating Party that all appropriate provisions and requirements of the originating Party's applicable laws, including authorization by competent bodies of the originating Party, have been complied with which would be necessary to authorize the originating Party directly so to communicate to, transfer to, permit access to or use by such other nation or international organization; and further that the originating Party authorizes the recipient Party so to communicate to, transfer to, permit access to or use by such other nation or international organization; or

B. The originating Party has informed the recipient Party that the originating Party has so communicated to, transferred to, permitted access to or use by such other nation or international organization.

ARTICLE VII

Classification policies

Agreed classification policies shall be maintained with respect to all classified information and non-nuclear parts of atomic weapons systems communicated, exchanged or transferred under this Agreement.

ARTICLE VIII

Responsibility for use of information and non-nuclear parts of atomic weapons systems

The application or use of any information (including design drawings and specifications) or non-nuclear parts of atomic weapons systems communicated, exchanged or transferred under this Agreement shall be the responsibility of the Party receiving it, and the other Party does not provide any indemnity or warranty with respect to such application or use.

ARTICLE IX

Patents

The recipient Party shall use the classified information communicated, or revealed by equipment transferred hereunder, for the purposes specified herein only. Any inventions or discoveries resulting from possession of such information on the part of the recipient Party or persons under its jurisdiction shall be made available to the other Party for all purposes without charge in accordance with such arrangements as may be agreed and shall be safeguarded in accordance with the provisions of article V of this Agreement.

ARTICLE X

Definitions

For the purpose of this Agreement:

A. "Atomic weapon" means any device utilizing atomic energy, exclusive of the means for transporting or propelling the device (where such means is a separable and divisible part of the device), the principal purpose of which is for use as, or for development of, a weapon, a weapon prototype, or a weapon test device.

B. "Classified information" means information, data, materials, services, or any other matter with the security designation of "Confidential" or higher applied under the legislation or regulations of either the United States or France, including that designated by the Government of the United States as "Restricted Data" or "Formerly Restricted Data" and that designated by the Govern- of the French Republic as "Atomic."

C. "Non-nuclear parts of atomic weapons" means parts of atomic weapons which are specially designed for them and are not in general use in other end products and which are not made of, in whole or in part, special nuclear material; and "non-nuclear parts of atomic weapons systems involving Restricted Data" means parts of atomic weapons systems, other than non-nuclear parts of atomic weapons, which contain or reveal atomic information and which are not made of, in whole or in part, special nuclear material.

D. As used in this Agreement, the term "atomic information" means:

1. So far as concerns information provided by the Government of the United States, information which is designated "Restricted Data" and "Formerly Restricted Data".

2. So far as concerns information provided by the Government of the French Republic, information which is designated "Atomic".

ARTICLE XI

Duration

This Agreement shall enter into force on the date on which each Government shall have received from the other Government written notification that it has complied with all legal requirements for the entry into force of this Agreement, and shall remain in force until terminated by agreement of both Parties except that either Party may terminate its cooperation under Articles II or III upon the expiration of the North Atlantic Treaty.

In witness whereof, the undersigned, duly authorized, have signed this Agreement.

Done at Paris, in duplicate, in the English and French languages, both texts being equally authentic, this 27th day of July 1961.

For the Government of the United States of America:

CECIL B. LYON.

For the Government of the French Republic:

RESOLUTION BY AMERICAN VETERINARY MEDICAL ASSOCIATION PRAISING COMMITTEE PRINT BY COMMITTEE ON GOVERNMENT OPERATIONS

Mr. HUMPHREY. Mr. President, on August 10, 1961, there was published the 11th committee print in a series issued by the Senate Government Operations Subcommittee on Reorganization and International Organizations. This print was entitled "Veterinary Medical Science and Human Health."

It was published pursuant to a series of resolutions, the latest of which is Senate Resolution 26, 87th Congress, providing for studies of interagency coordination.

I am pleased to report that the print has met with an outstanding reaction from the scientific community.

A resolution was passed at the recent convention of the American Veterinary Medical Association in Chicago, endorsing the report. A copy of this resolution was conveyed by H. E. Kingman, Jr., D.V.M., executive secretary, to the Honorable JOHN L. MCCLELLAN, chairman of the Committee on Government Operations and member of its Reorganization Subcommittee.

As chairman of the subcommittee, I send to the desk the text of this resolution and ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION 24

Whereas many activities and programs of veterinary medicine contribute directly to the maintenance and improvement of human health and well-being; and

Whereas the role of veterinary medicine in the total national health picture becomes

increasingly significant as the rapid growth of our population continues; and

Whereas many important biomedical discoveries affecting man have had, and are having, their origin in veterinary medical research; and

Whereas increased veterinary medical research is needed to speed solutions to cancer, heart disease and other problems common to man and animal; and

Whereas the success of America's man-in-space experiments hinges in considerable part on the findings of animal-in-space experiments; and

Whereas these aspects of veterinary medicine have been forcefully and comprehensively stated in a 244-page report, entitled "Veterinary Medical Science and Human Health," prepared by a Senate Government Operations Subcommittee of which Senator HUBERT H. HUMPHREY, Democrat of Minnesota, is chairman: Therefore be it

Resolved, That the American Veterinary Medical Association, in convention assembled, commend Senator HUMPHREY and all members of the Subcommittee on Reorganization and International Organizations for their excellent presentation of the need for long-range, well-funded and coordinated Federal-State research efforts cross-seeding the biomedical research findings in both human and veterinary medicine; and be it further

Resolved, That a copy of this resolution be forwarded to the chairman and members of both the Committee on Government Operations of the U.S. Senate and its Subcommittee on Reorganization and International Organizations.

August 20, 1961.

FAIR COMPETITIVE PRACTICES

Mr. HUMPHREY. Mr. President, I call to the attention of the Senate a letter which was printed in the Washington Evening Star on Saturday, July 29, 1961. This letter was written by Mr. Herman Morton, a druggist from the District. It is a well-thought-out, well-reasoned statement explaining why our economy needs the Fair Competitive Practices Act, S. 1722, of which I am the sponsor. I ask unanimous consent that this article be printed in the RECORD at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FAIR TRADE

There is a bill now pending in Congress known as the Fair Competitive Practices Act and identified as S. 1722 and H.R. 7685. In the past, the press, in general has opposed similar measures. This bill, if and when enacted, will bring fair competition and honesty in the marketplace. It will benefit the consumer and at the same time prevent the extinction of thousands of small businessmen. It will curb retail price juggling—a form of deceitful, unfair competition which tricks the consumer, destroys small business, and cheapens valuable trademarks.

Price-juggling merchants use deception to make money. They destroy competitors and eventually create a monopoly. The price juggler offers popular brands as bait bargains to make the consumer think everything he sells is a bargain. He thus tricks customers into buying other items at hidden high prices which more than cover his losses on the bait bargains. His bait prices for popular brands make his competitors look like price gougers. He uses this trick to put small stores out of business. This puts the consumer at the mercy of giant retail monopolies, once the competition of small business is destroyed. And by weakening the small business economy, it operates against the general public interest.

Scientific research has proved that consumers pay less under fair competitive practice for leading national brands even though retailers in nonfair trade areas can sell such brands at any price they choose. Surveys show that consumers in fair trade States pay less overall for leading brands of drugstore products than consumers in nonfair trade areas paid for the same products at the same time. Fantastic statements have been made that fair trade costs the consumer money. These statements are based on spurious surveys in which carefully selected items were bought in certain stores at certain times when these items were being used as loss leaders.

The Fair Competitive Practices Act recognizes both the social and economic contribution of the small businessman. He is the symbol of freedom of opportunity. He is your friend and neighbor.

HERMAN MORTON.

U.S. DISARMAMENT AGENCY FOR WORLD PEACE AND SECURITY

The Senate resumed the consideration of the bill (S. 2180) to establish a U.S. Disarmament Agency for World Peace and Security.

Mr. HART. Mr. President, the thought has been expressed several times in the debate that in view of the present tense world situation and the sacrifices we are being called upon to make to build up our military strength, this is no time to be creating an agency to study arms control.

I do not "buy" this argument. Of course we need to be strong militarily. But does any thoughtful person believe that the piling of weapon upon weapon, in endless crescendo, is the answer to mankind's desire for peace, or even to his desire for national security? In testifying before the Committee on Foreign Relations on the bill, Mr. Frederick Eaton, our Ambassador to the 10-nation disarmament conference under the previous administration, made a point which I should like to see made in the RECORD before the vote on the bill. I therefore ask unanimous consent to have printed in the RECORD Mr. Eaton's statement as it appears on page 151 and 152 of the hearings.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Mr. EATON. Even though we are successful in keeping ahead in the arms race, security does not lie on this line.

The proliferation of huge weapons of mass destruction of certain countries will increase rather than decrease our lack of security. Even though Congress would give the military the budget they need, the military is highly successful in their research, and we have the best weapons in the world, as a result they would not assure peace and security today.

We must find other means. My own belief is that they lie in the area of disarmament, and that we have waited too long to set up in our Government an effective Disarmament Agency.

This bill, it seems to me, sets up one. Research development must be coordinated. A future negotiator should not be put in the position in which our delegation found itself in January of last year when we were scheduled to sit down on the 15th of March in a multination conference. We were without an agreed-upon position within our own Government, let alone an agreed-upon position with our allies.

I am hopeful that that situation has improved today, and I am convinced, under the leadership that we have had here, that it has. However, nothing will take the place of a centralized control where directions and lines of authority are clear. I urge this although I believe that this is not the moment for fruitful discussion with the Soviets.

* * * * * *

We should, by diplomatic channels, continually impress upon the Soviets our desire to have agreement in the area of disarmament. Let them choose any area they wish for discussion; so long as we can have commensurate inspection, we should be prepared to go ahead with it.

The risks that we are taking in not disarming are far, far greater than the risks which we will incur by a successful armaments effort.

Mr. HART. Additionally, it has been my privilege to be a cosponsor of the bill. I have followed the debate today. It has, I believe, been most helpful in establishing a concern and purpose which is shared by all mankind, that we seek just as earnestly for peace as we seek to prepare for war.

A thoughtful editorial entitled "Agency for Peacemaking," published in the Muskegon Chronicle of August 21, accurately, eloquently, and persuasively sets forth the reasons which I hope will move the Senate to pass the bill.

I ask unanimous consent that the editorial be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

AGENCY FOR PEACEMAKING

At first glance, the new Disarmament Agency being considered by Congress would seem about as unproductive an undertaking, in this particular period, as any that could be imagined. But it has an intrinsic merit that cannot be ignored.

The President has asked authority to appoint a Disarmament Director responsible jointly to himself and the Secretary of State. He would be the President's principal adviser on disarmament, would sit with the National Security Council during disarmament negotiations, conduct studies, and prepare policy recommendations.

Current circumstances in Germany and elsewhere are not exactly ideal for the birth of a new peace agency. In fact, there is no thought of immediate success being achieved by the new agency in the present atmosphere.

Still it is necessary to keep the whole picture in perspective, and to keep alive whatever momentum can be maintained toward peace, however dim and distant it may seem.

We should have a firm grip on our proposals in this respect. It was an outstanding revelation, for example, to learn from Ambassador Dean, our present disarmament negotiator, that the United States had no firm position of its own, and neither did England, France, or any of our other allies, at the time he entered the last round of disarmament negotiations with the Russians in January. Here again we were ad libbing our way waiting to react to Communist moves instead of having a firm policy of our own.

The proposed new agency is in a sense a minor step—a technical rearrangement to help the principal architects of foreign policy, the President, and the Secretary of State, to plan better and more clearly.

If it does that, it is worth the price. It will be even more valuable if it can help to

convey to the world that this country still regards the pursuit of peace as its day-to-day business. At some time there is going to have to be disarmament, because disarmament under proper safeguards would mean improved living conditions for many millions.

Mr. PASTORE. Mr. President, now more than ever before, when we are building up our power in view of the international developments of the past few days, it becomes ever so important to pass this type of legislation. This action proves to the world that while we are determined to do everything that needs to be done to build up our military power to meet any onslaught of communism; nevertheless, we stand ready, at all times, to reach agreement on the control of armaments under proper international standards of control and inspection.

I shall therefore support S. 2180.

Mr. PELL. Mr. President, I am proud to be a cosponsor and a fervent supporter of S. 2180 for I firmly believe that at this crucial time it is more important than ever before that we have an agency in our Government solely concerned with disarmament.

Recent aggressive moves on the part of the Soviet Union have required this Nation to step up its defenses and to resume underground nuclear tests. We have all supported increased appropriations for our Armed Forces and rightfully so. Given the horrors of today's weapons I believe we have just as compelling an obligation to continue our search for controls over all types of weapons. The American eagle has in its left talon the arrows of defense and of war, and in its right the olive branch of peace. Both are equally important. Therefore, to my mind it is not at all unreasonable to seek $10 million for a Disarmament Agency when we have appropriated over $47 billion for arms.

Mr. President, we all know arms control is a most complex subject. It is not solely a military question—there are vast political and economic implications involved. Moreover, arms control involves highly trained scientists who must seek out new methods of scientific inspection. Therefore, I believe that the logical and most effective way to pursue the goal of arms control is to have a Disarmament Agency, with trained specialists who can concentrate on a coordinated approach to this most complicated challenge.

Mr. President, there is another important reason why we must have a Disarmament Agency. We must continue to demonstrate to the world our true dedication to the cause of peace. During the past week we have been disappointed by the public reaction of the Belgrade Conference to the Soviet resumption of nuclear tests in the atmosphere. However, Mr. President, the public reaction of the uncommitted nations, or lack of it, is not necessarily an indication of the severe setback which the Soviets suffered in the eyes of world opinion. The leaders of the uncommitted nations obviously feel that they cannot publicly criticize, with impunity, the Soviet Union. Nevertheless, the contrast between the swaggering, blistering approach of the Soviet Union and the genuine concern of the United States for the future of mankind is becoming more evident daily to important segments of opinion in the uncommitted nations. By establishing a Disarmament Agency we have another opportunity to demonstrate to all the peoples of the world our unrelenting dedication to the cause of peace. Mr. President, the time to act is now. We cannot in good conscience leave any stone unturned which could contribute to controlling the weapons of terror which confront mankind today. The search must go on.

In conclusion, I want to pay tribute to men like Senator Humphrey, Senator Clark, John J. McCloy, and all others who have labored so heroically to produce what is perhaps the most momentous piece of legislation we have to consider this session.

Mr. KEATING. Mr. President, I shall support the bill to create a U.S. agency to study arms control, disarmament, world peace, and security—not because I think this is the moment for disarmament—not at all—but rather because I believe we must coordinate our efforts at research and study in the field of weapons control. This is the principal aim of the bill.

We all realize that a stronger, not weaker, military posture is necessary at the moment to block the Soviet threat to world peace. We all realize that disarmament at the moment is out of the question. It would be suicidal. Even arms control is temporarily impossible.

But it is important that whatever studies and research are conducted on the ultimate possibility of some degree of weapons control be done under the jurisdiction and control of the Secretary of State and in coordination with the rest of our foreign policy. In the long run, we can benefit from a system of arms control which would guarantee protection through international control and checks. It would be the job of this Agency to do the spadework, to lay the foundation for an effective arms limitation system, which, we sincerely hope, may one day be possible—after we have clearly demonstrated to Khrushchev that we do not intend to be pushed around, that we do not intend to start any unilateral disarmament, and that we do not intend to limit our own armaments without ironclad guarantees and inspection provisions to insure that all other nations do the same.

Moreover, the passage of this bill will make clear beyond doubt that it is the Soviet Union not the United States which is blocking progress toward control of armaments. The United States seeks a world of peace, order, and law in the ultimate hope that some kind of arms control can be devised without jeopardizing our own security. This bill makes our aims clear. But it is up to the Communists and the rest of the world to make this hope a reality.

This bill has the support of the Secretaries of Defense, under both Republican and Democratic administrations. It is supported by former President Eisenhower and by former U.N. Ambassador Henry Cabot Lodge. It has the support of past and present Secretaries of State. It will strengthen our overall capacity to combat communism, in peace as well as war, at the conference table as well as in world propaganda forums.

Mr. MUSKIE. Mr. President, I rise to add my support for the bill S. 2180, which will create a new Agency for Arms Control and Disarmament.

The United States has been meeting with the Soviet Union and other countries for many years now in an effort to work our effective and workable arms control and disarmament agreements. Progress has yet to be made. The main obstacle has been the lack of willingness on the part of the Soviet Union to accept reasonable and effective controls. But there also has been an obstacle in that the United States has not been well prepared always for the disarmament negotiations. We have often been disorganized in our efforts. Occasionally different agencies have not agreed as to what our policy should be, and in the absence of any coordinating agency to work out our policy the United States has often appeared indecisive. Furthermore, we have not pursued an aggressive information program to carry our story on disarmament to the nations of the world. As a result the picture has sometimes been blurred as to what our policy was.

The bill before us today presents us with an opportunity to remedy some of the problems which I have just described. This bill sets up an agency, under the direction of the Secretary of State, to assure that the United States will be well prepared for the disarmament negotiations of the future.

The bill will establish a group within the Government with the responsibility of coordinating disarmament policy. The executive branch will now be equipped to do the necessary research, policy planning, and coordination to the end that the chances for progress toward arms control and disarmament may be increased. Our policy machinery will now be modernized. We should now be in a position to formulate effective policies and present them in a clear and forthright manner to the nations of the world.

I am pleased and delighted to know that the Senate has passed this bill. I hope that the House will soon do likewise so that the new Agency may be organized as soon as possible.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SMATHERS. On this vote I have a pair with the senior Senator from Illinois [Mr. DOUGLAS]. Were he present and voting he would vote "yea." Were I at liberty to vote, I would vote "nay." I therefore withold my vote.

Mr. HUMPHREY. I announce that the Senator from Illinois [Mr. DOUGLAS], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Arizona [Mr. HAYDEN], the Senator from Wyoming [Mr. MCGEE] and the Senator from Massachusetts [Mr. SMITH] are absent on official business.

I also announce that the Senator from New Mexico [Mr. CHAVEZ] and the Senator from New Mexico [Mr. ANDERSON] are absent because of illness.

I further announce that, if present and voting, the Senator from New Mexico [Mr. ANDERSON], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Arizona [Mr. HAYDEN], the Senator from Wyoming [Mr. MCGEE] and the Senator from Massachusetts [Mr. SMITH] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from Vermont [Mr. AIKEN] is absent on official business.

The Senator from Utah [Mr. BENNETT] and the Senator from North Dakota [Mr. YOUNG] are necessarily absent.

The Senator from New Hampshire [Mr. BRIDGES] and the Senator from Kansas [Mr. CARLSON] are absent because of illness.

If present and voting, the Senator from Utah [Mr. BENNETT] and the Senator from Kansas [Mr. CARLSON] would each vote "yea."

The result was announced—yeas 73, nays 14, as follows:

So the bill (S. 2180) was passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—SHORT TITLE, PURPOSE, AND DEFINITIONS

Short title

SECTION 1. This Act may be cited as the "Arms Control and Disarmament Act for World Peace and Security".

Purpose

SEC. 2. An ultimate goal of the United States is a world which is free from the scourge of war and the dangers and burdens of armaments; in which the use of force has been subordinated to the rule of law; and in which international adjustments to a changing world are achieved peacfully. It is the purpose of this Act to provide impetus toward this goal by creating a new agency of peace to deal with the problem of arms control and disarmament.

Arms control and disarmament policy, being an important aspect of foreign policy, must be consistent with national security policy as a whole. The formulation and implementation of United States arms control and disarmament policy in a manner which will promote the national security requires a central organization charged by statute with primary responsibility for this field. This organization must be so placed within the Government that it can provide the President, the Secretary of State, other officials of the executive branch, and the Congress with recommendations concerning United States arms control and disarmament policy, and can assess the effect of these recommendations upon our foreign policies, our national security policies, and our economy.

This organization must have the capacity to provide the essential scientific, economic, political, military, psychological, and technological information upon which realistic arms control and disarmament policy must be based. It must be able to carry out the following primary functions:

(a) The conduct, support, and coordination of research for arms control and disarmament policy formulation;

(b) The preparation for and management of United States participation in international negotiations in the arms control and disarmament field;

(c) The dissemination and coordination of public information concerning arms control and disarmament; and

(d) The preparation for, operation of, or as appropriate, direction of United States participation in such control systems as may become part of United States arms control and disarmament activities.

Definitions

SEC. 3. As used in this Act—

(a) The phrase "arms control and disarmament" includes the elimination, reduction, control, limitation, inspection, verification, or identification of armed forces and armaments of all kinds under international agreement, including the necessary steps taken under such an agreements to establish an effective system of international control or to create and strengthen international organizations for the maintenance of peace.

(b) The term "Government agency" means any executive department, commission, agency, independent establishment, corporation wholly or partly owned by the United States which is an instrumentality of the United States, or any board, bureau, division, service, office, officer, authority, administration, or other establishment in the executive branch of Government.

(c) The term "Agency" means the United States Arms Control and Disarmament Agency for World Peace and Security.

TITLE II—ORGANIZATION

United States arms control and disarmament agency for world peace and security

SEC. 21. There is hereby established within the Department of State an agency to be known as the "United States Arms Control and Disarmament Agency for World Peace and Security".

SEC. 22. The Agency shall be under the direction of an Under Secretary of State for Arms Control and Disarmament, who shall serve as the principal adviser to the Secretary of State and the President on arms control and disarmament matters. In carrying out his duties under this Act the Under Secretary of State for Arms Control and Disarmament shall, under the supervision and direction of the Secretary of State, have primary responsibility within the Government for arms control and disarmament matters. He shall be appointed by the President, by and with the advice and consent of the Senate, and shall receive compensation at the rate of $22,500 per annum. For the purposes of this Act, he shall be referred to as the "Director".

Deputy director

SEC. 23. A Deputy Director of the Agency shall be appointed by the President, by and with the advice and consent of the Senate. He shall receive compensation at the rate of $21,500 per annum. The Deputy Director shall perform such duties and exercise such powers as the Director may prescribe. He shall act for, and exercise the powers of, the Director during his absence or disability or during a vacancy in said office.

Assistant directors

SEC. 24. Not to exceed four Assistant Directors may be appointed by the President, by and with the advice and consent of the Senate. They shall receive compensation at the rate of $20,000 per annum. They shall perform such duties and exercise such powers as the Director may prescribe.

Bureaus, offices, and divisions

SEC. 25. The Director, under the supervision and direction of the Secretary of State, may establish within the Agency such program and staff bureaus, offices, and divisions as he may determine to be necessary to discharge his responsibilities under this Act, including, but not limited to, an Office of Public Affairs and an Office of the General Counsel.

General advisory committee

SEC. 26. The President, by and with the advice and consent of the Senate, may appoint a General Advisory Committee of not to exceed fifteen members to advise the Director on arms control and disarmament policy and activities. The President shall designate one of the members as Chairman. The members of the committee may receive the compensation and reimbursement for expenses specified for consultants by section 41(d) of this Act. The Committee shall meet at least twice each year. It shall from time to time advise the President, the Secretary of State, and the Disarmament Director respecting matters affecting disarmament, world peace, and world law.

TITLE III—FUNCTIONS

Research

SEC. 31. The Agency is authorized and directed to exercise its powers in such manner as to insure the acquisition of a fund of theoretical and practical knowledge concerning disarmament. To this end, the Agency is authorized and directed (1) to conduct research, development, and other studies in the field of arms control and disarmament; (2) to make arrangements (including contracts, agreements, and grants) for the conduct of research, development, and other studies in the field of arms control and disarmament by private or public institutions or persons; and (3) to coordinate the research, development, and other studies conducted in the field of arms control and disarmament by or for other Government agencies in accordance with procedures established under section 34 of this Act. In carrying out its responsibilities under this Act, the Agency shall, to the maximum extent feasible, make full use of available facilities, Government and private. The authority of the Agency with respect to research, development, and other studies shall be limited to participation in the following insofar as they relate to arms control and disarmament:

(a) the detection, identification, inspection, monitoring, limitation, reduction, control, and elimination of armed forces and armaments, including thermonuclear, nuclear, missile, conventional, bacteriological, chemical, and radiological weapons;

(b) the techniques and systems of detecting, identifying, inspecting, and monitoring of tests of nuclear, thermonuclear, and other weapons;

(c) the analysis of national budgets, levels of industrial production, and economic indicators to determine the amounts spent by various countries for armaments;

(d) the control, reduction, and elimination of armed forces and armaments in space, in areas on and beneath the earth's surface, and in underwater regions;

(e) the structure and operation of international control and other organizations useful for arms control and disarmament;

(f) the training of scientists, technicians, and other personnel for manning the control systems which may be created by international arms control and disarmament agreements;

(g) the reduction and elimination of the danger of war resulting from accident, miscalculation, or surprise attack, including (but not limited to) improvements in the methods of communications between nations;

(h) the economic and political consequences of arms control and disarmament, including the problems of readjustment arising in industry and the reallocation of national resources;

(i) the arms control and disarmament implications of foreign and national security policies of the United States with a view to a better understanding of the significance of such policies for the achievement of arms control and disarmament;

(j) the national security and foreign policy implications of disarmament proposals with a view to a better understanding of the effect of such proposals upon national security and foreign policy;

(k) methods for the maintenance of peace and security during different stages of arms control and disarmament;

(l) the scientific, economic, political, legal, social, psychological, military, and technological factors related to the prevention of war with a view to a better understanding of how the basic structure of a lasting peace under world law may be established;

(m) such related problems as the Director may determine to be in need of research, development, or study in order to carry out the provisions of this Act.

Patents

SEC. 32. No appropriated funds may be expended pursuant to authorization given by this Act for any technological research or development activity unless such expenditure is conditioned upon provisions effective to insure that all information, uses, products, processes, patents, and other developments resulting from that activity will (with such exceptions and limitations as the Director may determine to be necessary in the interest of the national defense) be made freely and fully available to the general public. Nothing contained in this section shall be construed to deprive the owner of any background patent relating to any such activity of any right which he may have under that patent.

Policy, negotiations and related functions

SEC. 33. Under the supervision and direction of the Secretary of State—

(a) the Director shall prepare for the President, the Secretary of State, and the heads of such other Government agencies as the President may determine, recommendations concerning United States arms control and disarmament policy.

(b) the Director, for the purpose of conducting negotiations concerning arms control and disarmament or for the purpose of exercising any other authority given him by the Act, may (1) consult and communicate with or direct the consultation and communication with representatives of other nations or of international organizations and (2) communicate in the name of the Secretary with diplomatic representatives of the United States in this country and abroad.

(c) the Director shall perform functions pursuant to section 2(c) of Reorganization Plan 8 of 1953 with respect to providing to the United States Information Agency official United States positions and policy on arms control and disarmament matters for dissemination abroad.

(d) the Director is authorized (1) to formulate plans and make preparations for the establishment, operation, and funding of inspection and control systems which may become part of the United States arms control and disarmament activities, and (2) as authorized by law, to put into effect, direct, or otherwise assume United States responsibility for such systems.

SEC. 34. The President is authorized to establish procedures to (1) assure cooperation, consultation, and a continuing exchange of information between the Agency and the Department of Defense, the Atomic Energy Commission, the National Aeronautics and Space Administration and other affected Government agencies, in all significant aspects of United States arms control and disarmament policy and related matters, including current and prospective policies, plans, and programs, and (2) resolve differences of opinion between the Department of State and such other agencies which cannot be resolved through consultation.

TITLE IV—GENERAL PROVISIONS

General authority

SEC. 41. In the performance of its functions, the Agency is authorized to—

(a) utilize or employ the services, personnel, equipment, or facilities of any other Government agency, with the consent of the agency concerned, to perform such functions on behalf of the Agency as may appear desirable. Any Government agency is authorized, notwithstanding any other provision of law, to transfer to or to receive from the Director, without reimbursement, supplies and equipment other than administrative supplies or equipment. Transfer or receipt of excess property shall be in accordance with the provisions of the Federal Property and Administrative Services Act of 1949, as amended;

(b) appoint officers and employees, including attorneys, for the Agency in accordance with the civil service laws and fix their compensation in accordance with the Classification Act of 1949, as amended, except that, to the extent that the Director deems such action necessary to the discharge of his responsibilities, not to exceed forty-five scientific, technical, administrative, and professional personnel may be appointed, compensated, and removed without regard to the provisions of any other law, of whom not to exceed twenty may be compensated at annual rates not more than $500 in excess of the compensation now or hereafter fixed by law for grade 18 of the General Schedule, and of whom not to exceed two may be compensated at annual rates not more than $1,500 in excess of that now or hereafter fixed by law for grade 18;

(c) enter into agreements with other Government agencies, including the military departments through the Secretary of Defense, under which officers or employees of such agencies may be detailed to the Agency for the performance of service pursuant to this Act without prejudice to the status or advancement of such officers or employees within their own agencies;

(d) procure services of experts and consultants or organizations thereof, including stenographic reporting services, as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), at rates not to exceed $100 per diem for individuals, and to pay in connection therewith travel expenses of individuals, including transportation and per diem in lieu of subsistence while away from their homes or regular places of business, as authorized by section 5 of said Act, as amended (5 U.S.C. 73b–2): *Provided*, That no such individual shall be employed for more than one hundred days in any fiscal year unless the President certifies that employment of such individual in excess of such number of days is necessary in the national interest: *And provided further*, That such contracts may be renewed annually;

(e) employ individuals of outstanding ability without compensation in accordance with the provisions of section 710(b) of the Defense Production Act of 1950, as amended (50 U.S.C. App. 2160), and regulations issued thereunder;

(f) establish advisory boards to advise with and make recommendations to the Agency on United States arms control and disarmament policy and activities. The members of such boards may receive the compensation and reimbursement for expenses specified for consultants by section 41(d) of this Act;

Contracts or expenditures

SEC. 42. The President may, in advance, exempt actions of the Director from the provisions of law relating to contracts or expenditures of Government funds whenever he determines that such action is essential in the interest of United States arms control and disarmament and security policy.

Conflict of interest and dual compensation laws

SEC. 43. The members of the General Advisory Committee created by section 26 of this Act, and the members of the advisory boards, the consultants, and the individuals of outstanding ability employed without compensation, all of which are provided in section 41 of this Act, may serve as such without regard to the provisions of section 281, 283, 284, or 1914 of title 18 of the United States Code, or of section 190 of the Revised Statutes (5 U.S.C. 99), or of any other Federal law imposing restrictions, requirements, or penalties in relation to the employment of individuals, the performance of services, or the payment or receipt of compensation in connection with any claim, proceeding, or matter involving the United States Government, except insofar as such provisions of law may prohibit any such individual from receiving compensation from a source other than a nonprofit educational institution in respect of any particular matter in which the Agency is directly interested. Nor shall such service be considered as employment or holding of office or position bringing such individual within the provisions of section 13 of the Civil Service Retirement Act (5 U.S.C. 2263), section 212 of the Act of June 30, 1932, as amended (5 U.S.C. 59a), or any other Federal law limiting the reemployment of retired officers or employees or governing the simultaneous receipt of compensation and retired pay or annuities.

Security requirements

SEC. 44. (a) The Agency shall establish such security and loyalty requirements, restrictions, and safeguards as it deems necessary in the interest of the national security and to carry out the provisions of this Act. The Agency shall arrange with the Federal Bureau of Investigation for the conduct of full-field background security and loyalty investigation of all the Agency's officers, employees, consultants, persons detailed from other Government agencies, members of its General Advisory Committee, advisory boards, contractors and subcontractors, and their officers and employees, actual or prospective. In the event the investigation discloses information indicating that the person investigated may be or may become a

security risk, or may be of doubtful loyalty, the report of the investigation shall be turned over to the Office of Security of the Department of State for final determination. No person shall be permitted to enter on duty as such an officer, employee, consultant, or member of advisory committee or board, or pursuant to any such detail, and no contractor or subcontractor, or officer or employee thereof shall be permitted to perform any services under the contract or to have access to any classified information relating thereto, until he shall have been investigated in accordance with this subsection and the report of such investigation made to the Agency, and it shall have been determined that such person is not a security risk or of doubtful loyalty. Standards applicable with respect to the security clearance of persons within any category referred to in this subsection shall not be less stringent, and the investigation of such persons for such purposes shall not be less intensive or complete, than in the case of such clearance of persons in a corresponding category under the security procedures of the Government agency or agencies having the highest security restrictions with respect to persons in such category.

(b) The Atomic Energy Commission may authorize any of its employees, or employees of any contractor, prospective contractor, licensee, or prospective licensee of the Atomic Energy Commission or any other person authorized to have access to Restricted Data by the Atomic Energy Commission under section 2165 of title 42, to permit the Director, or any officer, employee, consultant, person detailed from other Government agencies, member of the General Advisory Committee or of an advisory board, contractor, subcontractor, prospective contractor, or prospective subcontractor, or officer or employee of such contractor, subcontractor, prospective contractor, or prospective subcontractor, to have access to Restricted Data which is required in the performance of his duties and so certified by the Director, but only if (1) the Atomic Energy Commission has determined, in accordance with the established personnel security procedures and standards of the Commission, that permitting such individual to have access to such Restricted Data will not endanger the common defense and security, and (2) the Atomic Energy Commission finds that the established personnel and other security procedures and standards of the Agency are adequate and in reasonable conformity to the standards established by the Atomic Energy Commission under section 2165 of title 42, including those for interim clearance in subsection (b) thereof. Any individual granted access to such Restricted Data pursuant to this subsection may exchange such data with any individual who A is an officer or employee of the Department of Defense, or any department or agency thereof, or a member of the Armed Forces, or an officer or employee of the National Aeronautics and Space Administration, or a contractor or subcontractor of any such department, agency, or armed force, or an officer or employee of any such contractor or subcontractor, and B has been authorized to have access to Restricted Data under the provisions of sections 2163 or 2455 of title 42.

Comptroller General audit

SEC. 45. No moneys appropriated for the purpose of this Act shall be available for payment under any contract with the Director, negotiated without advertising, except contracts wih any foreign government, international organization or any agency thereof, unless such contract includes a clause to the effect that the Comptroller General of the United States or any of his duly authorized representatives shall, until the expiration of three years after final payment, have access to and the right to examine any directly pertinent books, documents, papers, and records of the contractor or any of his subcontractors engaged in the performance of, and involving transactions related to such contracts or subcontracts: *Provided, however,* That no moneys so appropriated shall be available for payment under such contract which includes any provisions precluding an audit of the General Accounting Office of any transaction under such contract: *And provided further,* That nothing in this section shall preclude the earlier disposal of contractor and subcontractor records in accordance with records disposal schedules agreed upon between the Director and the General Accounting Office.

Transfer of functions to agency

SEC. 46. (a) The United States Disarmament Administration, together with its records, property, personnel, and funds, is hereby transferred to the Agency. The appropriations and unexpended balances of appropriations transferred pursuant to this subsection shall be available for expenditure for any and all objects of expenditure authorized by this Act, without regard to the requirements of apportionment under section 665 of title 31.

(b) The President, by Executive order, may transfer to the Director any activities or facilities of any Government agency which relate primarily to arms control and disarmament. In connection with any such transfer, the President may under this section or other applicable authority, provide for appropriate transfers of records, property, civilian personnel, and funds. No transfer shall be made under this subsection until (1) a full and complete report concerning the nature and effect of such proposed transfer has been transmitted by the President to the Congress, and (2) the first period of sixty calendar days of regular session of the Congress following the date of receipt of such report by the Congress has expired without adoption by either House of the Congress of a resolution stating that such House does not favor such transfer.

Use of funds

SEC. 47. Appropriations made for the purposes of this Act, and transfers of funds to the Agency by other Government agencies for such purposes, shall be available to the Agency to exercise any authority granted it by this Act, and shall also be available for the following uses to carry out the purposes of this Act including, without limitation, expenses of printing and binding without regard to the provisions of section 11 of the Act of March 1, 1919 (44 U.S.C. 111); purchase or hire of one passenger motor vehicle for the official use of the Director without regard to the limitations contained in section 78(c) of title 5 of the United States Code; entertainment and official courtesies to the extent authorized by appropriation; expenditures for training and study; expenditures in connection with participation in international conferences for the purposes of this Act; and expenses in connection with travel of personnel outside the United States, including transportation expenses of dependents, household goods, and personnel effects.

Appropriations

SEC. 48. (a) There are hereby authorized to be appropriated not to exceed $10,000,000, to remain available until expended, to carry out the purposes of this Act.

(b) Funds appropriated pursuant to this section may be allocated or transferred to any agency for carrying out the purposes of this Act. Such funds shall be available for obligation and expenditure in accordance with authority granted in this Act, or under authority governing the activities of the agencies to which such funds are allocated or transferred.

Report to Congress

SEC. 49. The Agency shall submit to the Secretary of State, for transmittal to the Congress, not later than January 31 of each year, a report concerning activities of the Agency. The Agency shall include in this report, and shall at such other times as the Secretary of State deems desirable submit to the Congress, recommendations for additional legislation deemed necessary or advisable.

Mr. HUMPHREY. Mr. President, I move that the vote by which the bill was passed be reconsidered.

Mr. KUCHEL. Mr. President, I move that the motion to reconsider be laid on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Without objection, the title will be appropriately amended, so as to read: "An act to establish a U.S. Arms Control and Disarmament Agency for World Peace and Security."

Mr. MANSFIELD. Mr. President, I ask unanimous consent that Senate bill 2180 as passed today by the Senate be printed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUMPHREY. Mr. President, on behalf of the Senate Foreign Relations Committee, I wish to express to the members of the committee staff our sincere thanks for their valuable assistance—and particulary to Miss Hansen, for the preparation of the report on the Disarmament Agency bill.

MEXICAN FARM LABOR PROGRAM

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 592, House bill 2010.

The motion was agreed to; and the Senate proceeded to consider the bill (H.R. 2010) to amend title V of the Agricultural Act of 1949, as amended, and for other purposes which had been reported from the Committee on Agriculture and Forestry with an amendment to strike out all after the enacting clause and insert:

That section 502(2) of the Agricultural Act of 1949, as amended, is amended to read as follows:

"'(2) to reimburse the United States for essential expenses incurred by it under this title, except salaries and expenses of personnel engaged in compliance activities, in amounts not to exceed $15 per worker; and'.

"SEC. 2. Clause (3) of section 503 of such Act is amended to read as follows: '(3) reasonable efforts have been made to attract domestic workers for such employment at wages, standard hours of work, and working conditions comparable to those offered to foreign workers'.

"SEC. 3. Sections 504 through 509 of such Act are renumbered sections '506' through '511' respectively; the reference to 'section 507' in section 508, renumbered as section '510', is changed to section '509'; and the following new sections '504' and '505' are inserted after section 503:

"'SEC. 504. No workers recruited under this title shall be made available to any

employer or permitted to remain in the employ of any employer—

"'(1) for employment in other than temporary or seasonal occupations, except in specific cases when found by the Secretary of Labor necessary to avoid undue hardship; or

"'(2) for employment to operate or maintain power-driven machinery, except in specific cases when found by the Secretary of Labor necessary for a temporary period to avoid undue hardship.

"'SEC. 505. No workers recruited under this title shall be made available to any employer or permitted to remain in the employ of any employer unless the employer offers and pays to both domestic and foreign workers not less than the prevailing wage paid in the area to domestic workers engaged in similar work, as determined by the Secretary of Labor, and unless the Secretary of Labor determines pursuant to section 503(2) that such prevailing wage rate is not adversely affected by the employment of Mexican workers.'

"SEC. 4. Paragraph (1) of section 507 of such Act, renumbered as section '509' is amended by changing the comma after the words 'Internal Revenue Code, as amended' to a period and deleting the remainder of the paragraph.

"SEC. 5. Section 509 of such Act, as amended, renumbered as section '511', is amended by striking 'December 31, 1961' and inserting 'December 31, 1963'."

UNITED NATIONS POLICY IN THE CONGO AND THE DANGER OF A COMMUNIST TAKEOVER

Mr. DODD. Mr. President, while the eyes of the free world have been focused on Berlin, world communism has, since the beginning of this year, scored significant advances in Asia, in Africa, and in Latin America.

In Asia, because the Communists acted in Laos, and we did not act, they now have us negotiating, virtually on their terms, for the creation of a coalition government. It was a victory in a faraway country, which the Communists achieved with small forces and at relatively little cost. But it is a victory which may nevertheless provide them with the key to southeast Asia.

In Latin America on August 21, international communism won its first continental beachhead when Cheddi Jagan, the pro-Communist candidate, triumphed in the British Guiana elections. Again this was a small victory in a remote country, about which we know little. But it was a victory which may provide the Kremlin with the possibility of subverting all or most of Latin America.

I rise to speak now, Mr. President, because there is a serious danger, unless we act with courage and expedition, that the Communists will take over in the Congo and thus secure for themselves a base for operations that will affect the whole of central Africa. I have reason to believe, Mr. President, that we may have only months or weeks in which to salvage this situation.

I recently had occasion to call attention to the fact that the United States had actually abetted Cheddi Jagan in the British Guiana election by approving a $1,250,000 loan by the World Bank in the critical preelection period.

Earlier this year, we made another financial contribution to the expansion and consolidation of Communist power by approving a grant of $1,157,600 to the Castro regime by the United Nations Special Fund.

As is common knowledge, the United States put up the lion's share of the money for both of these international financial organizations.

But our folly does not yet seem to have exhausted itself. For more than 1 year now we have been paying the better part of the bill for the U.N.'s operations in the Congo. The cost of these operations to date is estimated at $100 million, of which our own share is approximately 50 percent. But while we have been paying the bill, United Nations policy in the Congo has, for all practical purposes, been determined by Prime Minister Nehru of India, or to be more precise, by his unspeakable adviser on foreign affairs, Mr. Krishna Menon, who calls himself an Indian, but who invariably talks with the voice of Moscow.

Under the guise of assisting the central government and reestablishing parliamentary rule, the United Nations, although it may not recognize this fact, has been preparing the way, step by step, for a Communist takeover in the Congo.

The United Nations first gave its unconditional support to the regime of Patrice Lumumba.

When Lumumba was dismissed by President Kasavubu in September 1960, his chief aid, Antoine Gizenga, a Prague-trained Communist, set up an independent regime in Stanleyville, the capital of Oriental Province.

The U.N. did nothing to interfere with Gizenga's action in setting up this independent, Moscow-oriented regime.

It did nothing to curb the reign of terror which Gizenga instituted against the white residents of Oriental and Kiwu Provinces and against anti-Communist political opponents.

It did nothing to prevent the massive influx of Communist arms to Gizenga, via Cairo.

To round out the picture, it did everything in its power to prevent and restrain President Kasavubu from reasserting the authority of the Central Government over Oriental Province.

Within recent weeks, the U.N. has fostered the creation of a so-called coalition government, so heavily weighed in favor of the Communists that, unless we do something to reverse the course of U.N. policy, the outcome is virtually a mathematical certainty.

The Prime Minister, Adoula, is, by reputation, not a Communist but simply a neutralist. The Vice Premier, however, is Antoine Gizenga, a cadre Communist, while the key position of the Ministry of the Interior has been awarded to Gizenga's most notorious henchman, Christophe Gbenye, also a Prague-trained Communist. Gbenye, incidentally, as Minister of the Interior in the pro-Communist regime in Oriental Province, was directly responsible for instigating the murder and rape and terror against the white residents of the province.

Just as disturbing as the measures it has taken to expand the influence and power of the Communists are the measures the U.N. has taken and is today taking to undermine and destroy the Government of President Tshombe of Katanga Province, the most solid bulwark against communism in the Congo, and, indeed, in central Africa.

Katanga is the richest province of the Congo. It provides 60 percent of the world's cobalt output and 7.5 percent of its copper output. Its capital, Elisabethville, has been described by American businessmen as a potential Chicago of central Africa.

Katanga is the one province of the Congo where law and order has been maintained.

It is the only province that has enjoyed an efficient administration and that has been able to improve its economic position since independence.

President Tshombe has, according to competent American observers, demonstrated that he is a man of rare intelligence, courage, and dedication. He and most of his cabinet members are devoutly religious men whose profound enmity toward communism springs from their adherence to moral values. His record proves that he is anything but a Belgian puppet. He is a man of rare character who has remained loyal to the free world despite the indignities he has suffered at the hands of the U.N., acting with the apparent support of the free world.

In the light of these considerations, it is easy enough to understand why the Communists are bending every effort to undermine the government of President Tshombe, to destroy his army and to promote economic chaos. The downfall of Tshombe, after all, would leave a vacuum that only the Communists could fill.

What I cannot understand is why or how the U.N. has converted itself into an instrument of Communist policy in central Africa, and why the United States should be supporting and footing the bill for the United Nations military and police state operations against the anti-Communist government of President Tshombe.

Mr. President, incredible things are taking place in the Congo today under the flag of the United Nations, and with the apparent approval and support of the American authorities on the spot, and of our Department of State.

The United Nations Army, for which we are paying, has invaded Katanga and has taken over key powers from the legal government of the area. Of the 20,000 U.N. troops in the Congo, 14,000 have now been moved into Katanga, while less than 2,000 are stationed in the Oriental Province stronghold of Vice Premier Gizenga and his Communist cohorts.

On Monday, August 28, at dawn, the United Nations forces surrounded the barracks of the Katanga Army, and informed the 200 Belgian officers who had been serving with this well-trained and disciplined army that they would have to leave the country within 24 hours.

They were ordered—I quote—"to surrender" themselves to the U.N. command before the end of the day. Several hundred noncommissioned officers of Belgian and other nationality were also affected by this order.

Mr. President, I want to read to my colleagues a few paragraphs from the current issue of Time magazine, describing the brutal intervention of the U.N. Army against the army and Government of Katanga. I do not know whether the U.N. had a code name for this operation, but if it did not, I would suggest that it consider calling it Operation Decapitation.

Here are the words of Time magazine:

At dawn, blue-helmeted U.N. troops swarmed into action at Elisabethville, capital of the Congo's breakaway Katanga Province. Without any warning to the Katangans, platoons of Indians seized the studios of Radio Katanga; Swedish infantry occupied the transmitter site on the outskirts of the city. At Katanga army headquarters, Irish troops intercepted Belgian officers on their way to work. Most of Katanga's 634 white officers surrendered expeditiously and were promptly put under U.N. detention pending expulsion from Katanga. Others prudently went underground or sought asylum at Elisabethville's foreign consulates. The 11,600 black Katanga troops remained passive, possibly because U.N. soldiers staged ferocious public bayonet drills and small-arms exercises in a pointed show of power. Remarked one senior Indian U.N. officer: "We have these soldiers scared witless."

A delegation of U.N. officers went to see President Moise Tshombe, who between dawn and breakfast suddenly found himself deprived of most of his army's officer corps. Only a fortnight ago, Tshombe vowed to fight "unto death" any U.N. interference in his province. After listening to the delegation's tough talk, Tshombe meekly went on the air to appeal for calm. "The government bows to the decisions of the U.N.," he said. Then he took to his bed with a "mild heart attack."

It is a miracle that the Katanga army did not fall apart as a result of this sweeping action by the U.N. command. That it did not do so is a tribute both to the discipline and training of the army and to the personal authority enjoyed by President Tshombe.

The U.N. command has also ordered out of the country many Belgian civilians who were serving as technicians and administrators in various capacities. In view of the present lack of trained Africans, this is a very cruel blow against the administration, the economy and general stability of the country.

In ordering the Belgian officers and technicians out of the Congo, the U.N. command was basing itself on a resolution approved by the United Nations Security Council on February 21, which called for the withdrawal of all white advisers from Katanga. The United States, I regret to say, voted for this resolution.

This resolution did not endow the U.N. commander with police powers, nor did it define what was meant by an "adviser," nor did it establish any procedures. But the United Nations command in the Congo has not been deterred by this lack of specific directives.

It has interpreted the word "adviser" to mean any Belgian holding a technical or administrative position of importance.

It has arrested people or ordered them expelled from the country, with no notification of charges, and no provision for legal procedure or appeal.

It has, in effect, established a police state on the territory of a government friendly to the United States and the Western nations.

Its next move, it is predicted, will be against the Belgian and other foreign officers serving with the Katanga police.

Already it is endeavoring to force Tshombe to capitulate completely to the central government in Leopoldville, with its Communist Vice Premier and its Communist Minister of the Interior.

Already, too, it is exercising pressure to force President Tshombe to reduce the size of his 10,000 man army. But there is no record of any parallel effort to persuade Gizenga to reduce the size of his Communist-armed force of 7,000 men.

Mr. President, I believe that for the actions the U.N. is now taking in the Congo, there is no authority in the Charter of the United Nations, or under international law.

I believe that the only consequence of these actions will be the establishment not of a parliamentary and neutralist regime, but of a Communist and anti-Western regime in the Congo.

This is a situation which is all the more scandalous because all of the cards were in our favor, and, for that matter, still are in our favor if we choose to play them intelligently.

The Congo is not Berlin. The Congo is in our sphere of operations, geographically and logistically. If we choose to act affirmatively to support the forces of independence and anticommunism, there is absolutely nothing the Soviets can do to interdict our policy.

If the Congo goes Communist, it will not be because of Soviet intervention, but because of intervention by a United Nations army, created by American policy, and paid for by American money.

I believe that select committees of Congress should be set up only on rare occasions. But I find the situation in the Congo so outrageous, and I consider the danger so great and so imminent, that I favor such dramatic action by Congress as the one measure which may conceivably salvage the Congo for the Congolese people and for the free world.

I plan to submit during the first part of next week a resolution calling for the establishment of a select committee of the Senate to investigate the situation in the Congo.

I shall ask that this resolution be acted on with all possible expedition, because there is no time to waste. Meanwhile, I would urge the Department of State to insist on a stay of further U.N. action in the Congo until there has been time to reappraise the situation. In particular, we should insist that the U.N. authorities suspend all action against white officers and technicians serving in Katanga, and release those now under detention, pending a final decision.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point the following articles dealing with developments in the Congo since the beginning of this year:

First. "Will Africa Go Communist?" by Stewart Alsop, Saturday Evening Post, February 18, 1961.

Second. "Too Many Cooks in the Congo," by Marguerite Higgins, New York Herald Tribune, March 20, 1961.

Third. "The Excited Nations," by Marguerite Higgins, New York Herald Tribune, March 27, 1961.

Fourth. "The Congo's White Men," by Marguerite Higgins, New York Herald Tribune, April 3, 1961.

Fifth. "The Disunited Nations," by Marguerite Higgins, New York Herald Tribune, April 17, 1961.

Sixth. "United States Jeopardizes Congo Gains by Surrendering on Tshombe," by Smith Hempstone, Washington Post, June 3, 1961.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Saturday Evening Post, Feb. 18, 1961]

WILL AFRICA GO COMMUNIST?—HOW DEEPLY HAVE THE REDS PENETRATED THE FRENZIED POLITICS OF THE CONGO AND OTHER NEW AFRICAN NATIONS? HAVE WE LOST OUT WITH A DO-NOTHING POLICY? A POST EDITOR REPORTS FROM THE SCENE

(By Stewart Alsop)

It is tempting to start this report on a long journey of inquiry through Africa by recalling some of the more startling and bizarre sidelights on African politics which were encountered along the way.

For example, the last chief of state I met on my travels was the President of one of the little countries which have emerged from former French West Africa. When his country was under French rule, the distinguished President of this now sovereign nation spent a stretch in jail for selling his mother-in-law into slavery. Or there was the high official of the Katanga Government, who was impeccably dressed, spoke elegant French and hated all white men. The reason, I was told, was that a couple of years ago his aged father had got into trouble with the Belgians for eating a small child in a vain attempt to regain his youth.

Aside from being startling, such episodes have a perfectly serious meaning. For it is easy for Americans to forget that Africa south of the Sahara is only a generation or so removed from the prehistoric past—literally prehistoric, since there was no writing and thus no written history. The witchcraft, slavery, cannibalism, and tribalism which marked that recent unrecorded past still strongly color the political present. Thus the worst mistake we in the West can make is to see Africa through Western eyes, to judge Africa by Western standards.

There are other ways in which a report on Africa might well begin. For example, there is the unforgettable contrast between Lagos, capital city of Nigeria, the biggest black African state, and Johannesburg, chief city of the white-dominated Union of South Africa. Johannesburg is a prosperous city, blessed with a climate to make a Californian green with envy. Lagos is a hideously ugly city, filled with bad smells, and not long ago it was known as "the white man's grave," since white men rarely survived there more than 6 months. But Lagos today is a city of hope. Johannesburg is a city of hate and fear, and it may one day prove the grave of many more white men than ever died in Lagos. This contrast also has a serious meaning.

But I think instead that I shall begin this report on a trip of more than 19,000 miles unconventionally—and against all the best rules of reporting—by listing certain conclusions I reached during my African travels. They are:

First, the talk we heard a little while ago about "keeping the cold war out of Africa" is blithering nonsense. The Communist bloc is now making a determined, carefully planned play for power throughout Africa. The only real question is whether we should let the Communists win the African cold war by default, or whether we should try seriously to meet the Communist challenge in Africa.

Second, if we are to meet the challenge successfully, we must try to see Africa as it is, rather than in terms of time-hallowed cliches and liberal slogans. If we insist on maundering on about democracy where there is none, if we try to substitute noble phrases about "supporting the United Nations" for an effective American policy, and if we attempt to convince the Africans of our noble intentions by kicking our European allies in the teeth, then we certainly will not meet the challenge.

Finally if we base our policies on the realities instead of on noble cliches, the position of the United States and of the West in Africa south of the Sahara is very far from hopeless. Indeed, throughout most of Africa, if we of the West have any sense and any guts, the odds are all in our favor. That is true even in the Congo.

As for the first of these three conclusions, surely no sensible man doubts that the cold war has come to Africa. Last November, in my first week in Africa, to cite one example, no less than six distinct Communist-bloc missions descended on Bamako, capital of the Mali Republic. (Interestingly enough, the Russians and the Chinese Communists, although crowded into the same small hotel, never exchanged a word or a nod.) Low-interest loans, guns and planes, heavy equipment, sports stadiums, jet runways, scholarships, "dash" (African for bribes) for important politicians and jewels for their mistresses—these are a few of the weapons with which the Communist bloc is fighting the African cold war.

The Congo is, of course, the heart of the African cold war. That is one reason why this first report on Africa will center on the Congo. Another reason is that I found in the Congo one of those queer, unexpected, little-understood situations which a wandering reporter comes across once in a blue moon. The moral to be drawn from this odd situation was once neatly summed up by Mr. Leo Durocher: "Nice guys finish last."

Those who hoped to "keep the cold war out of Africa" pinned their hopes on the U.N. force which was sent to the Congo after the Congolese army revolted. But the Soviets very quickly made it clear that they had no intention at all of being nice guys about the Congo. They bypassed the U.N. to send in relays of Ilyushin planes, filled with materiel and with more than 400 "technical advisers" for the paranoiac pro-Communist Premier, Patrice Lumumba.

Then when things began to go wrong for them, and especially after Lumumba was first "neutralized" and then arrested by anti-Communist Joseph Mobutu, Soviet Premier Khrushchev demanded the scalp of U.N. Chief Dag Hammarskjold and threatened to destroy the U.N. itself if he did not get his way. The "positive neutralists" who follow the Soviet lead, including the Egyptians, the Guineans, and the Ghanaians, threatened to withdraw their troops from the U.N. command in the Congo. With Communist help and advice—and no interference whatsoever from the U.N.—a rump pro-Lumumba regime under Communist-lining Antoine Gizenga, was established in Stanleyville, in the Congo's Oriental Province. All this hardly sounds like an attempt to "keep the cold war out of Africa."

While the Soviets and their friends have been busy playing the bad guys in the Congo, we have been dutifully playing the good guys. Last September James Wadsworth, then U.S. Ambassador to the U.N., summarized the policy laid down by former President Eisenhower: "U.S. policy in the Congo is simple. We support the U.N. wholeheartedly." In accord with this "simple" policy, when the Soviets refused to contribute a ruble to the expensive U.N. operation in the Congo, the American taxpayer dutifully picked up most of the tab.

The result, perhaps inevitably, is that the bad guys seem to have a lot more influence with the U.N. command in the Congo than the good guys. As one Western ambassador in Leopoldville remarked in honest bewilderment, "I just don't understand you Americans. Here you are paying the piper. And yet you let Nehru call the tune."

The man who has been calling the U.N. tune in the Congo, as of this writing, is a pipe-smoking Indian intellectual-aristocrat named Rajeshwar Dayal, who was chosen by Hammarskjold to run the U.N. operation in the Congo. An able and highly articulate man, Dayal is a follower of India's Prime Minister Nehru, and shares Nehru's leanings toward "positive neutralism."

In Dayal's eyes, his chief antagonist is not Gizenga or Lumumba or the Communist or neutralist politicians who have bitterly attacked his U.N. command. Dayal's enemy is—as of this writing—young General Mobutu, recently appointed commander in chief of the Congolese army by President Joseph Kasavubu, U.N.-recognized chief of state of the Congo. It is not too much to say that Dayal and Mobutu hate each other's guts, as both instantly made clear when I talked to them.

I saw Mobutu in a big white house on the banks of the Congo, which he had taken over as his command post after his anti-Lumumba coup. By the time this is published, Mobutu may be out of his big white house, since his position gets shakier every day—thanks largely to Dayal.

It is fashionable among reporters in Leopoldville to write about Mobutu in deprecatory quotes as "the so-called Congo strongman." When I met him, he seemed to me, in a quiet way, a strong man. He is nervous, and very thin, but he seemed to have a certain inner force. He was only 29 when he marched into the Leopoldville radio station last September and announced that the army was taking over from Lumumba. He had discovered, he said, that the Russian technicians sent to Lumumba were really "Russian officers disguised as civilians." He added, "I have expelled them all." This hardly seems the action of a weak man.

Strong or weak, Mobutu was certainly a sad and harried man when I saw him. If the U.N. under Dayal had not actively obstructed every move he made, he said, he could have dealt in fairly short order with the Stanleyville dissidents. After that it would have been possible to come to some sort of accommodation with the other two secessionist regimes, Tshombe's in Katanga and Kalonji's in the Kasai. But, he said, as long as the United Nations pursued "la politique Nehru"—meaning the Dayal policy—nothing could be done in the Congo.

Dayal was just as unhappy as his enemy Mobutu, when I saw him in his air-conditioned office in the junior skyscraper the U.N. had taken over in Leopoldville. The trouble was, he said, that "you people don't really believe in democracy." If certain Western embassies (meaning the able American Ambassador, Clare Timberlake) had not had "an obsession about Lumumba," a legitimate democratic government could have been established (meaning almost certainly a government headed by pro-Communist Lumumba). Now, instead, Mobutu's army of rapists was completely unleashed. The situation was, therefore, totally out of control, and chaos threatened.

This extremely somber estimate of the situation surprised me. Some reporters have the luck to resemble Joe Btfspik, the small man in "L'il Abner" who is accompanied by a permanent black cloud and whose every step is dogged by disaster. This makes for vivid reporting. Alas, wherever I go, a great calm descends. It would make better copy if I could write, as others have written, that the jungle is rapidly taking over Leopoldville and Elisabethville; that the people are reverting to savagery; and that the Congolese Army is using visiting journalists as human pincushions. Instead, I found the two big Congo cities the handsomest and best kept in Africa, and with the best restaurants. And I found the Congolese people, in uniform and out, in the Katanga bush country and in Leopoldville's African "cité," unfailingly courteous and even jolly.

No doubt these impressions were one-sided. Some very ugly things have certainly happened in the Congo. But the fact is that Dayal, both as a Nehru neutralist and as the U.N. chief in the Congo, has had an understandable impulse to portray the situation in lurid terms. Since three-quarters of the news from the Congo emanates from the U.N. command, Dayal's views have also had a considerable influence on the press.

Dayal has described the Mobutu army as a disorderly rabble and accused it in an official report of acts of lawlessness. Actually, in the view of qualified observers, in his first few weeks in power Mobutu did a rather remarkable job of bringing the army in the Leopoldville area under control. But to Dayal, the Congolese army is, and always will be, a disorderly rabble. If it were not a rabble, it might be difficult to justify certain of the policies laid down by Dayal as U.N. chief in the Congo.

For the U.N. policy has been, in essence, to immobolize the forces controlled by the Kasavubu-Mobutu regime, in the name of preventing violence and maintaining law and order. Dayal has ruled that Mobutu's army should be permitted to make only "minor troop movements." Otherwise the "rabble" might get out of hand, and bloodshed might result.

With the Kasavubu-Mobutu forces thus effectively hamstrung, and with help from the Egyptians and Iron Curtain money and technicians, Gizenga's rump pro-Communist regime quickly consolidated its position in Oriental Province. Gizenga's forces then began moving on neighboring Kivu and Katanga provinces. The troop movements were by no means minor by Congolese standards, but the U.N. did nothing, or nothing much. Immobilized by the U.N. Mobutu could do nothing, or nothing much. Being powerless to act, Mobutu's prestige has been eaten away, which is why he may be out of the picture even before these words are printed—and why the Communist-lining Lumumba may be back in the picture.

Surely this is a very queer business. U.N. forces largely subsidized by the United States have been used to prevent a moderate, pro-Western, anti-Communist regime, headed by the U.N.-recognized chief of state, from consolidating its position in the heart of Africa. Meanwhile, a pro-Communist regime has been established and allowed to extend its power in the heart of Africa without effective opposition from those forces. How did we get into this odd situation?

Part of the answer, to be candid about it, is that when our simple policy was first conceived, the U.N. looked like the best bet for preventing Lumumba from consolidating his position. Another part of the answer is that

the U.N. troops are largely concentrated near Léopoldville, and it is thus physically easier to control the Léopoldville regime than the Stanleyville regime. But another part of the answer surely derives from our tendency to be carried away by noble-sounding phrases.

The U.N. in the Congo is widely advertised as being neutral and above politics, for example. It is neither. There is no such thing as neutrality in a situation like that in the Congo, if only because, if you prevent A from shooting at B, you are obviously helping B. Moreover, because they are working for the U.N., people are not mysteriously transmuted into supranational beings without political views of national allegiance. Being both an Indian and a subordinate of Nehru, Dayal is quite naturally responsible to la politique Nehru. By the same token, the commanders of the Egyptian or Ghanaian or Guinean forces in the Congo quite naturally have an ear cocked to the ambitions and desires of Nasser or Nkrumah or Sékou Touré.

All this may be quite natural and understandable, but from the point of view of American and Western interests, the present situation is an impossible one. For why should we subsidize the U.N. in the Congo, while the U.N. in turn engages in a continual vendetta with the pro-Western regime which we recognize and support? Kasavubu has demanded that Dayal be replaced. That demand certainly deserves the quiet support of the new administration. And if quiet support is not enough, then Adlai Stevenson, our new Ambassador to the U.N., must bring himself to bang his shoe on his desk, at least figuratively. We who pay the piper ought to begin to do a little tune calling.

We ought also now to recognize, once and for all, what the U.N. can and cannot do. Where there is danger of a great power clash, the U.N. can usefully freeze a situation until tempers cool. But to freeze a situation is not to resolve it, as the Congo has abundantly proved. That is why the "simple" policy of "wholehearted support for the U.N." is really no policy at all. The beginning of a sensible policy in the Congo, and indeed in black Africa as a whole, is to recognize the realities, to see things as they are and not as they ought to be.

The first reality to recognize is very simple—Africa is not America. Every time an American uses American standards to judge an African situation, he falls flat on his face. Consider, for example, the way a shrewd American public relations man came a cropper in Nigeria.

The public relations expert was hired for the Nigerian elections by Chief Awolowo, the big chief of the western region of Nigeria. Awolowo hoped his party, the Action Group, would score sufficient gains, especially in the largely Moslem northern region, to make him the obvious choice for prime minister of the federal government. The public relations man had a bright idea. He persuaded Awolowo to get himself a helicopter for pamphlet dropping and campaigning purposes—in the United States; after all, helicopters have been used most effectively in political campaigns. But the emirs in the north put out the word: "The sky belongs to Allah, and the droppings of the great bird are poison," and Awolowo ended up low man on the Nigerian political totem pole.

The second reality we must recognize if we are not to end up low man on the African totem pole is that countries are not countries in Africa—not by American or European standards. Countries aren't real in Africa. Tribes are real.

Take the Congo. Like every other country in black Africa, the Congo is a geographical accident. Its frontiers are simply lines drawn on a map by white men in the bad old days when the Europeans were slicing up Africa like a juicy pie. These lines are not real or meaningful to the African who lives in the bush or the rain forest, or even—except for a thin layer of detribalized évolués—to the African who lives in the crowded African quarters of the European-built cities. What is real and meaningful to the African is his tribe.

It is quite impossible to make head or tail of what is going on in the Congo unless you understand the power of tribalism in African politics. A few examples:

The Baluba tribesmen in northern Katanga have made all sorts of bloody trouble for Moise Tshombe, the moonfaced, Belgian-backed president of copper-rich Katanga, in the southeastern Congo. The Katanga Balubas are allied to the pro-Communist, pro-Lumumba forces in Stanleyville. But this is not because the Balubas are close and approving students of the doctrines of Karl Marx. It is because Tshombe is a Balunda, and so are most of the members of his government. The Balubas and the Balundas are ancient enemies.

The Balubas of south Kasai, on the other hand, are fiercely anti-Lumumba. But this is not because they find communism abhorrent, but because their ancient enemies, the Luluas, are pro-Lumumba. Or consider the triumph enjoyed by President Kasavubu last December, in New York, when the U.N. Assembly voted to seat his delegation, which was a big setback for Lumumba and his Soviet friends. Kasavubu owed his triumph to small, smiling President Fulbert Youlou of the neighboring former French Congo, who rallied the other former French territories to back Kasavubu. The reason: Youlou and Kasavubu are both members of the Bakongo tribe.

Tribalism is the main reason—though not the only one—why the fragmentation of Africa has proceeded at such a pace. When the French ruled French West Africa, for example, the area consisted of two huge administrative districts. These 2 districts have now become 12 nations, some so small or so economically unviable as to be geographical bad jokes. The same fragmentation is going on in the Congo, and for the same reasons. Aside from the U.N.-recognized Kasavubu regime in Leopoldville, there are the three secessionist regimes, and there may well be more to come.

This may be very deplorable. But it is silly to talk about our objective in the Congo being unity, when in fact real unity could only be imposed by an iron Communist regime. The best we can hope for in the Congo is a loose federation of tribal satrapies, and since that is the best we can hope for, that is what we ought to aim for.

The third reality we must recognize in Africa is that although within the tribal system there is democracy of a peculiar sort, it has very little in common with our kind of democracy. Philip Crowe, American Ambassador to the Union of South Africa, found out something about the African version of democracy when he paid an official call on the paramount chief of Barotseland, a vast British-administered enclave in southern Africa.

The conversation touched on political matters, and the paramount chief volunteered that he was a strong believer in democracy. For example, he said, he regularly consulted with his six counselors, who were the voice of the people. "I will show you," he said, and clapped his hands. Immediately six men crawled in on their bellies and prostrated themselves before the paramount chief and the startled Ambassador. "Are my people happy?" asked the paramount chief. The six counselors, grinning fiercely, vied with each other in protestations of popular content. "You see," said the paramount chief, and clapped his hands again. The six counselors crawled out backward on their bellies, still grinning fiercely.

The kind of democracy practiced elsewhere in Africa is not fundamentally very different from the Barotseland version. Everywhere you find the same pattern—one big chief, one monolithic party without serious opposition. The pattern derives from the tribal system, and it is a natural reflection of the African realities. It is silly in any case to suppose that our kind of democracy could flourish in countries in which 90 percent of the people are illiterate and live in mud or palm huts in the bush or the jungle. It is especially silly to look for our kind of democracy in the harried Congo.

Much has been made by the Communists, the neutralists and some plain fatheads of the fact that Lumumba is the "democratically elected" Premier of the Congo. It is quite true that the Congolese Parliament voted to make Lumumba Premier. But this triumph of parliamentary democracy was achieved by a judicious mixture of threats and bribery. In Lumumba's heyday he bought members of the Congolese Parliament at the going rate of $2,000 a head. There was never much of a secret about where this money came from either. The Russians, the Czechs, the Chinese Communists, the Ghanians, the Egyptians and both the Belgian bankers and the Belgian Communists all bought a slice of Lumumba preferred on the Lumumba bull market.

This, then, is how Lumumba became the democratically elected Premier of the Congo. And this suggests how meaningless high-sounding words are likely to be, measured against the African realities. There is not going to be any democracy in the Congo, not our kind of democracy. The best we can hope for is the kind of regime that will at least keep things ticking in a loose federation, and again, because this is the best we can hope for, it is what we ought to aim for.

This suggests the fourth reality which we must recognize in Africa—that the people who are most experienced at keeping things ticking in tropical Africa are those horrid people, the former colonial powers. The British, the French and even the unpopular Belgians have forgotten more about Africa than we Americans are ever likely to learn. Moreover, their knowledge of Africa and their continuing influence there are among the central assets of the West in the struggle for Africa which has now been joined.

This is not to suggest that we must defend the colonialism of the distant past—although it does happen to be true that the cities and industries of tropical Africa were all built with European money and European skills. Even in the very recent past the European powers have certainly done some stupid things in Africa, as when the French in a fit of pique threw Guinea to the Communist wolves, or when the Belgians cast the Congo loose with totally inadequate preparation.

But the British and French are now doing a remarkable job in West Africa, which is kept ticking largely thanks to British and French advisers and technical experts, and money from the pockets of British and French taxpayers. And it is also largely thanks to the Belgians that much of the Congo, including the big cities of Leopoldville and Elisabethville, are kept ticking today. It is because of the Belgians that the light goes on in your hotel room; that the government finances are kept in some kind of working order; that the Katanga mines, on which the livelihood of many thousands of Africans depends, are still functioning efficiently.

The Belgians are no doubt difficult people. But would it be a good thing if the thousands of Belgian technicians in the Congo were replaced by Russians or Czechs or Chinese Communists? For that matter, would it be a good thing if they were replaced by Americans?

We Americans must get over the notion that we necessarily do everything better than anybody else. As one knowledgeable American official remarked in Brazzaville, "The French are shelling out around half a billion dollars a year in this part of Africa. If we ever had to take over from them, it would cost about six times as much, and we'd do about half as good a job."

Africa is no vacation wonderland. It is hot and smelly, and an American, limply wandering about in Africa, is likely to have the tempting thought, Why not just let the Europeans handle the job here, and keep our noses out of it? Alas, although we should certainly encourage the British, the French, and the Belgians to handle that part of the job they are already handling, we Americans cannot keep our noses entirely out of Africa.

The immense African continent is the world's greatest reservoir of untapped resources. That is the main reason why the Soviets are now making a carefully planned power play, the purpose of which is to make the Soviet bloc the dominant power in Africa. By the inexorable laws of power politics, the Soviet power play will succeed, unless American power is introduced as a counterweight. For in Africa, as in other parts of the world, power is the key factor in the equation. And if the struggle for Africa comes to a showdown in the Congo, the United States and its allies hold for once the high cards in terms of available military power—and the other side must know that this is so.

Look at the map, and you will see why it is so. In Korea, and in almost every other major Communist expansionist drive in the last 15 years, the Communist bloc supported an established Communist regime with direct supply routes from contiguous territory. (Cuba is the exception, but one suspects that the Communist triumph in Cuba surprised the Kremlin.) In the Congo the undependable pro-Communist Stanleyville regime is a long, long way from its Communist base. To supply it in case of a showdown the Soviets would have to mount a massive airlift, overflying such pro-Western countries as Greece, Turkey, and Iran. Both the United Arab Republic and the Sudan would have to take the risk of playing the Soviet game to the hilt.

By contrast, to supply both Leopoldville and Elisabethville from the West is no problem, while a Soviet airlift to the Congo would be easily subject to an effective air blockade. Suppose Kasavubu, as recognized chief of state of the Congo, asked for such an air blockade. Would it not be imposed, in one form or another? That is a question that the Soviet planners must be asking themselves. It may suggest why, as of this writing, the Soviets have not officially recognized the Stanleyville regime, and why their aid has been limited to technicians, advisers, and counterfeit Congolese francs.

In short, if it came to a showdown in the Congo, with the Soviet supporting and supplying Stanleyville while the West supported and supplied Leopoldville and Elisabethville, the military and logistic high cards would be in our hands. Essentially the same military-logistic equation holds true elsewhere in Africa. Showdowns are dangerous in the nuclear age, and must be avoided if possible. But the best way to avoid a showdown is to let the other side know you will play your high cards if you must. And the fact that those high cards exist is a main reason why the position of the West in Africa south of the Sahara is very far from hopeless.

Mind you, everythig is not going to be jim-dandy in the Congo, or elsewhere in Africa—not in our lifetimes. All Soviet and Communist influence cannot possibly be excluded from the Congo. But we can prevent the establishment in the Congo of a totally disciplined, unitary, Communist satellite state, which could only come into being as a result of civil war and which would be like a cancer in Africa's belly.

By the same token, Soviet-Communist influence is now paramount in three very small, very noisy states in black Africa—Ghana, Guinea, and Mali. We cannot hope to prevent such Communist infections from developing from time to time—and indeed, for reasons to be discussed in another report, we must be prepared sometimes to let them develop, rather than to submit to blackmail. But we and our European allies do have the means—military, political, and economic—to prevent the Soviet bloc from becoming the dominant power throughout black Africa. That is what we can do, and that is what we must do.

[From the New York Herald Tribune, Mar. 20, 1961]

TOO MANY COOKS IN THE CONGO

(By Marguerite Higgins)

LEOPOLDVILLE.—What the Congo desperately needs is to be let alone.

To the visitor conditioned by high-flown oratory about the turbulent Congo, the strangest thing about Leopoldville and the area directly controlled by the Kasavubu regime is its lack of turbulence. This correspondent, for instance, walks every night the 5 blocks to the Congolese telegraph office, which is more than she would do in New York City if the route took her through Central Park. The Congolese people are friendly and helpful—once it is established that the visitor has nothing to do with the United Nations.

Only in the provinces controlled or semicontrolled by the Red-recognized Stanleyville regime has racism been official policy. And with regard to the outrages against Americans trapped in remote Kindu it must be stressed again and again that the terror perpetrated there against both white and Congolese is caused by leaderless bands of Congolese soldiers who were transported there by the late Patrice Lumumba when he started his abortive civil war. And one of the lonely bright spots in this all-dark picture in Kindu is the way in which the civilian population has tried to help the hard-pressed whites, giving them food—and, more important, hiding them.

In the Leopoldville area the only real tension is between the United Nations and the Congolese authorities. For the United Nations, whose public relations here are abominable, has for too long allowed the impression to stand that it intended to use armed force if necessary to disarm the Congolese. And indeed the highhandedness, arrogance, even contempt with which the reigning U.N. Commander Rajeshwar Dayal of India treated the Kasavubu regime would give ground for fury on the part of any government.

An example of how factors completely beyond the scope of the Congo national interest are injected into decisions affecting this country is afforded by Secretary General Dag Hammarskjold's bland insistence that Dayal is to come back to the Congo whether the Congolese like it or not.

Dayal is now on several week's consultation leave in New York.

Why? Because according to high sources Hammarskjold fears to offend Dayal's countryman and boss, Prime Minister Nehru of India.

But what is good for Nehru is not necessarily good for the Congo. The fact is that the temporary chief of the U.N. here, Mekki Abbas of the Sudan, has done much to ease the explosive situation created by Dayal's aloofness from the Congo's leaders. Instead of confronting them with accomplished facts he has even bothered to explain the reasons behind certain actions. (Mr. Abbas is trying to keep in mind that this country does, after all, belong to the Congolese, explained a U.N. official, completely missing the irony of his statement.)

The Congolese also need to be understood in the perspective of all Africa. It must, for instance, be understood that President Kwame Nkrumah has no more right to speak on Congolese affairs and be treated as the true voice of Africa than Premier Fidel Castro would have the right to speak on Venezuelan affairs and be considered the voice of the Americas.

Indeed, Ghana is disliked by the overwhelming majority of West African states for its territorial ambitions and its hypocrisy in calling for measures in other countries it has no intention of applying in its own. It amazes the Congolese that some Americans expect them to listen respectfully to Ghana.

Thus when you ask Prime Minister Ileo of the Congo or leaders in Nigeria, Brazzaville, the Cameroons, Dahomey, etc., about Ghana the comments have significant similarities.

"Ghana tells us to get rid of our white advisers, especially the Belgians," Premier Ileo said the other day "Why doesn't the U.N. tell Ghana to get rid of its whites, particularly those of the former colonial power, Great Britain? In Ghana the British hold far more important jobs than Belgians will ever be allowed to hold here—such jobs as held by General Alexander, the Ghanaian chief of staff, plus the many British political and technical advisers including an Australian director of the Volta River project. As to democracy, why does America even listen to Ghana? Don't you know that Nkrumah has put all his opposition in jail, corrupted the judiciary and established a police state?"

Continued Ileo: "Is it illogical then that we do not feel that it helps the Congo for Ghana to serve on Hammarskjold's Congo Advisory Committee when the country presumably most concerned—the Congo itself—is not admitted?"

President Kasavubu has been the first to admit that much needs urgent correction inside this country, including the discipline of his troops. But he has insisted that the reorganization of his army be done by the U.N. in cooperation with the Congolese national army instead of unilaterally. Is this so much to ask? The new Congolese Confederation decided on by the various Congolese leaders at Tananarive is a hopeful sign of new-found unity. It is not the end of troubles but perhaps the beginning of their end.

THE EXCITED NATIONS

(By Marguerite Higgins)

LEOPOLDVILLE.—Soviet blasts at U.N. Secretary General Dag Hammarskjold are, of course, built on lies and intended to destroy the world organization. But it is also obvious that the nefarious intentions of the Russians are no reason to rule out another and necessary kind of criticism—criticism aimed at the exposition of mistakes with a view to their correction if possible.

It should not come as a surprise to the American people that the United Nations here, being made up of countries with differing—often clashing—interests, and led by human beings whose fallibilities do not vanish with the donning of the U.N.'s blue hats, can and often does do wrong.

And the greatest mistake made by the United Nations has been to incur the hostility of the Congolese people, the Congolese Army, and the Congolese Government of President Joseph Kasavubu. The hostility is bound to continue so long as the United Nations is guilty of the attitude that brought the reaction on in the first place—its attempt to ram decisions down the throat

of this government without consultation and whether the government likes it or not.

The comment most often heard around here from the U.N. officials is a revealing one: "The only way to handle the Congolese is to treat them as children."

Therein lies the clue to mistake No. 1. For the Congolese violently object to being treated as children, confronted with accomplished facts and actions taken in defiance of this allegedly sovereign regime's best estimate of its own national interest.

The dispatch here of Prime Minister Nehru's Indian troops is an example of an action taken by the U.N. in defiance of the publicly expressed opposition of President Kasavubu and every one of his ministers. The Congolese object for the simple reason that they believe that India, being allied to left-leaning Ghana, this country's bitter enemy, simply is not neutral.

The question of attitude begins with the reign here as director of the U.N. of Rajeshwar Dayal, an Indian national. According to dispatches printed in the local Congolese press, Mr. Dayal in a speech to U.N. correspondents described the Congolese army as a rabble and called General Mobutu, army chief of staff, "a bandit." This press dispatch does not come as a surprise as Mr. Dayal has said the same thing often in private in Leopoldville.

And General Mobutu, who happens to be intense, hard working, intelligent and about as far from banditry as is Dayal himself, has had this to say about the news dispatch: "I had always thought it was the function of a diplomat to be diplomatic. But perhaps it is just as well that Mr. Dayal's thoughts are on the record. Perhaps it will make it clearer why his return would be most unwelcome."

Before coming to this part of Africa, this correspondent had the occasion to interview statesmen of every single one of the new African states admitted to the U.N. The leadership of Leopoldville from President Kasavubu on down compares favorably with the best of them. Even George Washington, Alexander Hamilton, Thomas Jefferson and Abraham Lincoln all put together would have had an incredibly difficult time trying to master the chaotic circumstances confronting this government and in many ways the wonder is that the Kasavubu regime has survived at all.

According to General Mobutu, "The mutual suspicion between ourselves and the U.N. does not need to exist. In the days when Ralph Bunche was here there was real cooperation and I am not saying that just because you are an American. But this neocolonialism—this imposition of the U.N. will irrespective of either our wish or our knowledge—can you think of any nation in the world that would welcome this? And if you Americans blindly and unconditionally go along with this policy, it cannot help in the long run but to undo the good relations we want so much to have. Has Washington really thought through the meaning of this precedent the U.N. is trying to set? Are you going to insist on carrying out a mandate from the Security Council if this mandate is against the will of the nation most concerned—the Congolese themselves? Are you Americans really anti-Communist? If you are, why do you ask us to surrender our guns to a U.N. force that so often has sided with the leftists? The whole world knows that it was the U.N. that let the rebel [Stanleyville] forces into our Kindu Province and then prohibited us from counterattacking. And you ask us not to be suspicious."

Of late the U.N. headquarters here has been dubbed the "excited nations" because of dire pronouncements about the perils of letting the Congolese run such things as the unloading of U.N. vessels at the port of Matadi. Yet even though the U.N. officials have not been permitted back into Matadi, the supplies including those of the U.N. are coming off the ships right on schedule under purely Congolese management.

Observed a Western diplomat: "One way of fostering a sense of sovereignty and responsibility is to treat a nation as both sovereign and responsible. It is not too late to begin."

[From the New York Herald Tribune, Apr. 3, 1961]

THE CONGO'S WHITE MEN

(By Marguerite Higgins)

WASHINGTON.—The most candid—and possibly the most significant—thing said in a recent interview by Red-recognized Antoine Gizenga, boss of the Congo's rebel Stanleyville regime, came in answer to this question: "Why have you delayed in giving the Belgians and other Europeans exit visas?" (At least 300 Europeans, including British, Germans, Dutch, and some Greeks, have been held virtual hostages in Stanleyville over the winter.)

"Because we need them," said Mr. Gizenga. "Without them our economy, which is in any case under a strain, might collapse."

Mr. Gizenga, who ascribed the white man's impulse to flee his province as due to panic that would subside with a return to normalcy, added that even if every one of the whites saw the light and decided voluntarily to stay on the job in Stanleyville they wouldn't fill the need for skilled technicians, accountants, bankers, engineers, etc. So added Mr. Gizenga, "it will be necessary to send recruiting teams abroad to obtain skilled help."

"But," said this correspondent, mindful of the Gizenga press attacks on Moise Tshombe, boss of the Congo's Katanga Province, for employing Belgians, "surely you are not going to recruit in Brussels?"

"Why not?" said Mr. Gizenga coolly. "French-speaking experts are, of course, our greatest need. But if we do hire any more Belgians you may be sure that they will be those that are loyal to and take orders from us."

Mr. Gizenga was asked how, in light of his own plans, he could justify denouncing Mr. Tshombe for hiring Belgians.

"The whites hired by Mr. Tshombe are Fascists," said Mr. Gizenga. "Mr. Tshombe is a tool of the imperialists."

The utter ridiculousness of Mr. Gizenga's charge—and it is ridiculous—need not obscure the central point, which is that all emerging African countries must temporarily depend in some degree on assistance from skilled white technicians and it is natural for them to turn—on an individual basis—to people they know, usually the representatives of the former colonial power.

But all of this illustrates the sticky wicket on which the United Nations finds itself when it seeks to dictate which whites, including Belgians, the Stanleyville or anti-Stanleyville Congolese may or may not hire. If former colonials are bad for the Congo why aren't they bad for Ghana, the Cameroons, Dahomey, and the other places where skilled Europeans abound?

Observed a Nigerian diplomat: "Certain great powers seem to interpret the Security Council resolution of February 21 as a mandate to throw all non-U.N. Europeans out of the Congo. This in itself betrays a kind of racial snobbism. The basic assumption seems to be that if whites work for Africans like Mr. Tshombe they will automatically dominate. I think that you whites—whether Russians or Americans—underestimate the African leaders. I happen to think Mr. Tshombe is perfectly capable of using white advisers for his own purposes and getting rid of those who do not take his orders. The whites are not all that clever so that their mere presence means their control."

An interesting point—coming as it did from an African diplomat who went on to add: "As for President Kasavubu, there are a lot of outsiders—including U.N. officials—who have sought to belittle him. But he has a knowledge of his own people—and a sense of timing. The U.N.—which has guns to back it up—has tried to dictate to Kasavubu. For instance, the Irish General McKeown (of the U.N.) has not—despite all his guns—had his way. Do you think some little Belgian secretary would succeed where a General McKeown failed?"

If the U.N. could suddenly find enough French-speaking technicians (which they can't) to fill the gap, it might be possible in the Congo to get rid of all Europeans, including Belgians, if one other condition obtained. This condition is that the non-Communist Congolese could trust the U.N. not to act against their national interest. Such trust does not exist and cannot exist so long as the U.N. stands idly by when Gizenga troops advance but reacts (as happened Friday in Katanga) by sending 1,000 Indian soldiers when the non-Communist Congolese try to take back the area seized by Stanleyville.

Meanwhile, it remains true in the case of both Gizenga and Kasavubu that any outright exodus of Europeans would add more economic chaos to political tension. The Russians are, of course, in favor of this because chaos is their political black magic in the Congo. Fortunately, this time they are likely to be thwarted for the practical reason that the only way the U.N. can successfully intervene against whites employed by the Congolese is to use force; in effect, to go to war against the respective Congolese armies of the north and south. And surely there is no way to square this with a mission of peace?

[From the New York Herald Tribune, Apr. 17, 1961]

THE DISUNITED NATIONS

(By Marguerite Higgins)

WASHINGTON.—On the New Frontier, as elsewhere, the urgent is often the enemy of the important. And in the supposed urgency of actions on the Congo (where the situation today is infinitely calmer than the cacophony in New York of rival back-seat drivers would let anyone suppose) the New Frontier has for the most part stuck to the Eisenhower policy of unqualified public support for the United Nations as if its deeds were morally good simply because perpetrated by the United Nations.

In this atmosphere, where virtue and the U.N. are so absolutely equated, the broadside against the U.N. by General de Gaulle came as a shock. And indeed by couching his attack on the U.N.'s "scandalous" behavior in uncharacteristically bitter, even ill-tempered language, the French President may have delayed what is important: a realistic reappraisal of what the U.N. may logically be expected to do in light of its sudden enlargement (120 members in the near future) and the clear—and perfectly logical—Communist hostility to letting the U.N. keep the peace in the many areas where violence works to Moscow's and Peiping's advantage.

In the case of the Congo, both the United States and the Russians voted in favor of the February 21 Security Council resolution to give the U.N. the right to use force if necessary (whatever that means) to keep the peace, meaning to tame and retrain the Congolese Army. The resolution also tells the Congolese leaders that they have to fire all the Belgians working for them as advisers or in the military and whether they like it or not.

Now the plain fact is that the U.N. can enforce these intimate interventions in the life of the Congo only if the U.N. is prepared to go to war against the Congolese. Now, having the U.N. go to war against President Kasavubu (who is recognized by the U.N. as head of the Congo), General Mobutu, King Kalonji and President Tshombe would admirably serve the purposes of the Communist-bloc nations because these are the gentlemen who threw the Russians out of the Congo in the first place.

A summary Belgian exit from the Congo would also suit the Communist purposes (in this case chaos) because it is the Belgian technicians, engineers, sanitation experts, teachers, that keep the electricity going, the bridges in repair, the plants working and the schools open even to the limited extent that they are.

The reason that the U.N. could not enforce the February 21 resolution without war stems from the Congo's implacable hostility to the U.N. administration because of its deliberate and often contemptuous defiance of the expressed will of the sovereign government headed by Kasavubu. President Kasavubu simply is not going to permit his troops to be disarmed by Ghurkhas from India because the acid attacks on him by Mr. Nehru of India have given him the idea that India is not particularly friendly. Thus surrender to a Ghurkha is surrender to an enemy.

And this leads to one of the most astonishing precedents yet set by the U.N. in the Congo. This is the doctrine that the sovereign government that asked assistance can have no voice in what armed forces are flown into its country.

But consider what this precedent means.

Consider if some Latin American country—Venezuela, for instance—were at some future date to find itself in need of U.N. assistance. Under the Congo precedent, the Venezuelan regime of Betancourt would not be able to prevent the arrival in his country of troops of his bitter enemy (and would-be assassin) Dictator Trujillo of the Dominican Republic if the U.N. "for administrative reasons" decided to incorporate them into its troubleshooting force. For the same reasons that Betancourt would want to veto the import of forces of his arch-enemy Trujillo, so did Kasavubu try—unsuccessfully—to veto the arrival of Mr. Nehru's forces.

As to the Belgians, perhaps it is good policy for all white men belonging to a former colonial power to get out of Africa even if, ironically, the Africans want them so badly that they are sending recruiting teams to French-speaking Europe in an effort to get help. But if getting rid of the Belgians is good for the Congo, why isn't getting rid of the British good for Ghana? If President Kasavubu is to be forced (how?) to get rid of the Belgian colonel who stood loyally by him during the troubles, why shouldn't Ghana's Nkrumah be forced to get rid of British Major General Alexander, his chief of staff? These, in any case, are questions that are being asked through much of non-Communist Africa which this reporter has just visited.

They ought to be answered (even if put by people not hostile to the West) and even if the answers might show that in actual practice the February 21 resolution supported by the United States does the opposite of what was intended—creates more tension rather than less.

[From the Washington Post, June 3, 1961]

UNITED STATES JEOPARDIZES CONGO GAINS BY SURRENDERING ON TSHOMBE

(By Smith Hempstone)

ELISABETHVILLE, KATANGA, June 2.—A pattern is forming in the Congo.

The deployment of Indian garrisons throughout north Katanga, the arrest of Moise Tshombe, the accord signed last month between President Joseph Kasavubu and the United Nations, the Kasavubu-Ileo government's decision to reconvene the Congolese Parliament, all point to some basic power shifts in the Congo.

It is now clear that:

The United States has given up on Maj. Gen. Joseph Mobutu and his student council.

The U.N., with the backing of the United States (which will pay half of this year's $120 million Congo bill), has accepted the idea of a Federal Congolese state.

Belgium has been persuaded to drop its support of jailed Tshombe's breakaway government in Katanga.

In return for cooperation from Kasavubu, the U.N. (and, by implication, the United States) has agreed to help the Leopoldville government subdue Katanga, by force if necessary.

Although Tshombe was becoming increasink troublesome to the U.N., there is no evidence to suggest that he was arrested on April 26 at the U.N.'s suggestion. But it is equally clear that Kasavabu would not have arrested Tshombe unless he had unofficial assurances that the U.N. would not interfere.

Neither the U.N. nor the United States has registered any serious complaint, although Tshombe's arrest at Coquilhatville, to which he had come to attend a political conference, was clearly a violation of international practice.

Both the difficulties and the risks in reconvening the Congolese Parliament are immense.

At least 15 deputies are dead (9 slain by Lumumbists and 6, including Prime Minister Patrice Lumumba, by anti-Lumumbists). Perhaps as many more are missing or in prison, while the rest have retreated to their regional strongholds.

Others, such as the Katangan deputies, might be excused if they place little faith in any safe-conduct guarantees offered by the Leopoldville government.

But assuming that a caucus can be found, what can be expected of the Parliament? As was the case last June, there is no one man who can be expected to command the loyalties of the great majority of the deputies.

The question then gets down to which candidate can buy or intimidate the most delegates. Kasavubu's prime minister, Joseph Ileo, is an honest, intelligent, and moderate man but not a forceful one.

In any blackjack-and-bribery contest with Red-leaning Antoine Gizenga, Lumumba's Stanleyville-based heir apparent, it is more than likely that the latter would come out on top.

The United States would then find itself in the position of having either to wreck the U.N. operation by withdrawing its financial support and thus provoking new chaos in the Congo, or of supporting a pro-Communist Gizenga regime.

The gain, of course, would be great if a government similar to that of Ileo should be approved by Parliament, but that is a very long shot.

In coming around to the point of view that a Federal constitution with considerable local autonomy is desirable, the U.N. and the United States are finally recognizing what many observers and the majority of the Congolese have said all along: that the only solid foundation upon which to build a Congolese constitutional framework is the authority of tribal and regional leaders.

It was Tshombe who gave practical recognition to this last July when he declared Katanga independent. It was Tshombe, again, who led in the reconciliation of the tribal groupings at the Tananarive (Malagasy) conference earlier this year.

The abandonment of Tshombe by Belgium (and by this, one means both the Belgian Government and the all-powerful mining interests) appears to be based on the simple conviction that the Katangan leader is a losing horse.

By throwing their full support behind the Leopoldville government, some mining company executives apparently believe they can preserve their privileged economic position in Katanga under a stronger central government.

What appears both immoral and impractical is the U.N.-U.S. insistence of a shotgun wedding between Katanga and the rest of the Congo.

The thinking seems to be that the creation of a unified Congo, by force if necessary, will ease the pressure on the West from the radical Afro-Asian powers (which have vigorously supported the Lumumbists) and provide the Congo with sufficient revenue to get it on its feet.

To this end, one finds U.N. garrisons being reinforced here, where all is peaceful, in an apparent attempt to force Katanga's hand, while the blue berets are withdrawn from South Kasai, where the tribal warfare, in the U.N.'s words, is endemic.

In addition, the U.N. forces have done virtually nothing to reestablish order in Kivu and Equator provinces, where near-chaos provoked by anti-Western leaders exist.

It is impossible to erase tribal and regional differences by fiat.

No solution that does not have the support of Katanga's people and leaders (Tshombe and Interior Minister Godefroid Munongo) can be a lasting one, unless the U.N. is willing to stay forever in Katanga or to impose a dictatorship from Leopoldville.

Rather than pouring troops into Katanga, the U.N. might be better employed in restoring a modicum of order where disorder exists, in effecting Tshombe's release, and in promoting a reconciliation between Leopoldville and Elisabethville. Tshombe is not an easy man to deal with. But he is shrewd, articulate, brave, and pro-Western. The United States cannot be the winner through his eclipse.

CALIFORNIA ADMISSION DAY—SEPTEMBER 9

Mr. KUCHEL. Mr. President, I should like to call attention to an important vote cast in this body 111 years ago tomorrow, on September 9, 1850. It was significant for this Nation, particularly for the beautiful State which I call my home. I refer to the vote, which concurred in a House vote 2 days earlier, granting statehood to the golden region of California. As citizens proud of their State, Californians look back with pride on that day.

Today, we are only a phone call away from the west coast. But in 1850, news had to go by way of Panama—leaving the Californians woefully isolated from the momentous decision at the Capitol. They did not know until October 18 that they were already represented in the U.S. Senate by our first two Senators, John C. Fremont—the great American explorer—and W. M. Gwin. They had already been elected in anticipation of this great event. It had been the steamship *Oregon* that had sailed into San Francisco Bay, carrying the tidings that it was the 9th of September which would forever be California's greatest day.

California came to the Union with a rich heritage. It had more flags flown over it than any other State. The Spaniards, the Mexicans, the Russians, the English all had claim to it at one

time. They left behind a variety of culture, ideas, and even names. It was by the Treaty of Guadalupe-Hidalgo, on February 2, 1848, that legal cession was finally granted to the United States.

California's heritage was rich in another sense: It was the home of stalwart pioneers who had braved long journeys across rough and uncivilized terrain. They had uprooted themselves from all parts of our own country, and from nations around the world, to create a new State. They were imbued with the spirit of progress and liberty. They were anxious to share these excellent characteristics with the sisterhood of American States.

Today, new generations celebrate our fortune. They would do well to pause and reflect on history, drawing lasting inspiration from the pioneer fervor that created our illustrious State.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD a news article from the New York Tribune, of September 13, 1850.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Tribune, Sept. 13, 1850]

We are at last enabled to send the news so long waited for by our fellow citizens on the Pacific coast. California is admitted into the American confederacy; and today takes rank as the 31st State of the Union.

The bill for her admission was brought up in the House, on Saturday, and after a short discussion, passed as it came from the Senate. The 57 votes against the bill, were all from the ultrasouthern Members.

The Representatives of California, who have been so long in waiting, will probably take their seats today.

The news has been received everywhere, with the most unbounded satisfaction. At Washington, 100 minute guns were fired on Saturday evening, followed by a display of fireworks.

In this city, many of the hotels and public edifices hoisted the national flag in token of rejoicing.

The Utah and New Mexico bills have also passed, and the organized members of our confederacy now span the continent in one unbroken arch, whose base is washed by the world's two great oceans. May it so stand through the coming centuries.

CONVEYANCE OF CERTAIN LANDS TO THE GEORGIA-CAROLINA COUNCIL, INC., BOY SCOUTS OF AMERICA

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the pending business be temporarily laid aside, and that the Senate proceed to the consideration of Calendar No. 734, Senate bill 1563.

There being no objection, the Senate proceeded to consider the bill (S. 1563) to authorize the conveyance of certain lands within the Clark Hill Reservoir, Savannah River, Ga.-S.C., to the Georgia-Carolina Council, Inc., Boy Scouts of America, for recreation and camping purposes.

The PRESIDING OFFICER. The bill is open to amendment.

Mr. MANSFIELD. Mr. President, I understand that the Senator from Oregon [Mr. MORSE] has a few remarks to make on the pending measure.

Mr. MORSE. Mr. President, ordinarily I would postpone my remarks on the bill until we had heard from the proponents. However, I am willing to proceed at this time; and then I shall offer an amendment.

Mr. RUSSELL. Mr. President, I shall be glad to make a brief explanation of the bill, if the Senator desires that I do so.

Mr. MANSFIELD. Mr. President, will the Senator from Georgia yield?

Mr. RUSSELL. I yield.

Mr. MANSFIELD. I ask unanimous consent that during the further consideration of the pending measure, there be allotted a total of 30 minutes—15 minutes to a side.

The PRESIDING OFFICER. Is there objection? Without objection it is so ordered.

Mr. RUSSELL. Let me ask who will control the allotment of the time.

Mr. MANSFIELD. The Senator from Georgia [Mr. RUSSELL] and the Senator from Oregon [Mr. MORSE].

Mr. RUSSELL. Mr. President, I yield myself 4 minutes.

The PRESIDING OFFICER. The Senator from Georgia is recognized for 4 minutes.

Mr. RUSSELL. Mr. President, this bill involves 282 acres of land adjacent to the Clark Hill Reservoir, a great Federal project lying in the States of Georgia and South Carolina. The bill would convey that land to the Georgia-Carolina Council, Inc., Boy Scouts of America, for recreational purposes, with the inclusion of a clause that if it is not developed or if it is ever used for any other purpose, the land shall revert to the Government.

At the present time this council has this land under lease. But the law does not permit a lease exceeding 25 years. The people in charge of the Boy Scout movement find it difficult to raise the large sums of money necessary to build messhalls and necessary structures under a 25-year lease.

A similar bill passed the Senate unanimously in September 1957, conveying 526 acres of land in the Old Hickory Reservoir on the Cumberland River, Tenn., to the Middle Tennessee Council, Inc., Boy Scouts of America, under identical terms and conditions that the pending bill conveys the land.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. RUSSELL. I yield.

Mr. MORSE. If the Senator is willing to change the part of his statement in which he used the word "unanimously," I will agree with him.

Mr. RUSSELL. I was not aware of the fact that the Morse formula had been established. Yes, I think it was. But the Morse formula was breached in the case of the Boy Scouts of Tennessee, and I do not believe the Morse formula should be applied in the case of the Boy Scouts of Georgia-Carolina Council.

I reserve the remainder of my time and shall resume when the Senators from Georgia and South Carolina have concluded.

Mr. MORSE. Mr. President, I yield myself such time out of my 15 minutes as I shall need.

As the Senator from Georgia has pointed out, S. 1563 would authorize the conveyance, without consideration, of approximately 282 acres of land located in the Clark Hill Reservoir to the Georgia-Carolina Council, Inc., Boy Scouts of America, for recreation and camping purposes.

The bill provides for a reverter with immediate right of entry, if the grantee has not commenced development of the property for recreation and camping purposes within 3 years from the date of enactment of the act, or if the land ceases to be used for recreation and camping purposes.

No one is more aware than is the senior Senator from Oregon of the magnificent work that has been done for many years by the Boy Scouts of America. They deserve encouragement and assistance throughout the Nation, because under their fine program, we are molding many of the Nation's leaders of tomorrow.

Regardless of the very worthwhile cause for which this gratuitous conveyance of approximately 282 acres of Federal land would be made, I am at a loss to understand why the taxpayers of the United States should donate a piece of property to the Boy Scouts of America and not make similar donations to other equally meritorious programs relating to the youth of our country. The difficulty of this type of case lies in the fact that when we set this type of precedent, we open the floodgates for such gratuitous conveyances to other deserving organizations. In other words, the purpose is extremely good, but the consequences may be bad.

It does not take much of a stretch of the imagination, Mr. President, to contemplate the possibility that a youth organization of the Friends might wish similar assistance—that, too, is a great organization—or, again, the Catholic Youth Organization, or a Presbyterian Brotherhood might apply for a similar grant, or the Young Hebrew Boy Scouts—all very worthwhile organizations in the training of the youth of America, along with others of their kind.

It is my opinion that we must keep these great movements separate from the Government or we should pass a law of general applicability, making such property available to organizations such as the Boy Scouts, the 4–H Clubs and other youth groups on a uniform and impartial basis.

I am in complete agreement with the Secretary of the Army who informs us that the Department of the Army is opposed to the enactment of this bill. His letter of August 14 addressed to the chairman of the Senate Public Works Committee appears at pages 4 and 5 of Report No. 757 on S. 1563. He points out that Boy Scout Council now enjoys a long-term lease of the property for a nominal consideration and it is not anticipated that there will be any substantial changes in the lease which will interfere with a satisfactory camping program of the Boy Scouts.

The Secretary of the Army emphasizes, and I agree with him completely, that "the enactment of this measure

would create an undesirable precedent which would encourage the many other worthy organizations leasing sites at Clark Hill and other reservoirs throughout the country" to seek comparable grants under special legislation. He also observes "it would result in the loss to the Government of the value of the property to be conveyed thereunder."

In view of the foregoing, Mr. President, I offer an amendment to provide for the payment of 50 percent of fair appraised market value in this case. In so doing, I am proceeding on the assumption that we can justify this conveyance as one which is designed to achieve a public purpose. The payment of 50 percent of fair appraised market value would make the conveyance unobjectionable under the Morse formula.

The distinguished Senator from Georgia [Mr. RUSSELL] is quite correct when he points out that there has been a breaching of the Morse formula. I take note of the fact that he recognized it was a breach of the Morse formula. I remember very well the debate on the Tennessee Boy Scout case. The RECORD will show that in that case I warned the Senate that, if it made an exception to the Morse formula in the case of the Tennessee Boy Scouts, there would be demands for similar appeals in the future. This is the second one.

There is a vital question of public policy involved here. I think it is a mistake to set up a formula and then breach the formula, unless we want to throw the whole formula out.

I hope no one will think I am making an improper personal statement when I say that in 1946 we adopted the Morse formula, growing out of the work of a subcommittee of the Committee on Armed Services, consisting of the Senator from Massachusetts [Mr. SALTONSTALL], the Senator from Virginia [Mr. BYRD], and myself, when we laid down the general principle of the Morse formula in connection with the disposal of military surplus property. I then applied it to the disposal of all Federal property thereafter. Since that time and through the application of the formula we have saved many millions of dollars for the taxpayers of America.

Mr. President, it has not been easy. I do not like to stand here and oppose a gratuitous conveyance to the Boy Scouts or any other worthy group. But we cannot make exceptions, in my judgment, in such a matter.

Let me say to the Rotarians—and I speak as a Rotarian—I should like to suggest that Rotarians in the principal cities of Georgia in furtherance of their youth program, should buy some tin cups and dispense with their noon lunches for a couple of weeks and go out and raise the relatively small amount of money which would be required in this case and give it to the Boy Scouts. I think that would be a much better course of action than to ask the Senate to breach the Morse formula.

Mr. RUSSELL. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. RUSSELL. I can assure the Senator that the children involved in the youth movement of the Rotary Clubs will be permitted to use these facilities.

Mr. MORSE. I am sure they will be permitted to use them, but I want them to raise the money for that purpose. I think the suggestion I have made is a good one.

But, Mr. President, I know the situation in the Senate. My two good friends from Georgia have made an "end run" around me. They have gotten it off the unanimous-consent calendar. I have been in this position before, but let me say I am going to fight against it until the whistle blows in trying to stop the touchdown they are hoping to make in the next few moments.

So I send to the desk the same amendment I always send to the desk when there is a proposal to breach the Morse formula.

Mr. ERVIN. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. ERVIN. I should like to ask the Senator from Oregon if this is not one of those occasions when a man is strongly tempted to rise above principle.

Mr. MORSE. I suspect that is what is going to happen when a vote is taken, and a lot of Senators are going to rise against principle.

The PRESIDING OFFICER. The amendment offered by the Senator from Oregon will be stated.

The LEGISLATIVE CLERK. It is proposed, on the first page, line 5, beginning with the comma, to strike out all through "therefore" on line 6.

At the end of the bill it is proposed to add the following new section:

SEC. 6. The conveyance authorized by this Act shall be subject to the condition that the Georgia-Carolina Council, Incorporated, Boy Scouts of America, pay to the Secretary of the Army as consideration for the property conveyed an amount equal to 50 per centum of its fair market value as determined by the Secretary after appraisal of such property.

Mr. MORSE. Mr. President, I yield the floor, and ask for action on my amendment.

Mr. RUSSELL. Mr. President, I yield 4 minutes to my distinguished colleague [Mr. TALMADGE].

Mr. TALMADGE. Mr. President, I rise to support the bill and to oppose the amendment offered by the distinguished Senator from Oregon.

I have listened with much interest to the Senator from Oregon substantiate his argument by his famous formula. I am unaware of the fact that the formula has ever been codified either in national law or in the Constitution. I do not think it ranks with the Magna Carta as one of the immortal documents of history. I regard it accordingly, even though I have deep respect for my friend from Oregon.

What we are talking about is the munificent sum of $5,792. That is what the Government paid for the land we are requesting authority to have the Secretary of the Army transfer to the Boy Scout Council of the State of Georgia and of the State of South Carolina.

The reason the land is desired in fee is very simple. The land has been leased for a period of 25 years. The cause was so worthy that the cost of the lease was the munificent sum of $1.

The Boy Scouts of Georgia and South Carolina desire to improve this property by erecting thereon some permanent improvements, under an extensive building program, including permanent messhalls, bath and latrines, water supply, and additional camping and training facilities. The Boy Scouts do not wish to spend the money which the Boy Scout Council has unless they have fee title to the property.

The Army would gladly renew the lease for the munificent sum of $1 a year, but as my able senior colleague says, the law prohibits the lease for longer than 25 years, and one cannot erect permanent improvements on property on a 25-year basis.

Mr. ERVIN. Mr. President, will the Senator yield?

Mr. TALMADGE. I yield to my friend from North Carolina.

Mr. ERVIN. The question I shall ask the Senator is somewhat hypothetical. I ask the Senator. If secession had been a success instead of a failure, would not Georgia be a part of a foreign country at this time? That being so, there would be no great difficulty in having the proposal carried out under the foreign aid program, would there?

Mr. TALMADGE. None whatever.

I point out to my able friend that the Senate recently voted to give Chile the sum of $100 million, because there was an earthquake in Chile. All we are asking is land of the value of a little more than $5,000.

I also point out that the Senate has passed bills providing millions of dollars to combat juvenile delinquency.

I point out further that the Senate has passed bills to put the Government in the business of creating youth camps and financing them in full.

I do not know how the Senator from Oregon voted on those proposals, but I strongly suspect he voted for them.

All we are asking is to give the Boy Scouts title to certain property so that they may finance their own improvements, finance their own youth program, curtail juvenile delinquency, and not be on the Federal payroll while they are doing it. The proposal is as simple as that.

I hope the Senate will reject the amendment and pass the bill.

Mr. MORSE. Mr. President, I always find my two friends from Georgia very moving speakers, and usually convincing, but today they are not convincing.

As an old teacher, I think we have an opportunity to teach a great lesson in citizenship to the Boy Scouts, which is that they ought to be willing to pay for what they will get. I think it is pretty good to teach the boys and girls of our country that when one gets something for nothing, one usually does not get much, and loses something, too. We have an opportunity to teach the Boy Scouts a good lesson. After all, the property will mean much more to them if they pay for it.

It has been pointed out, if I correctly understood my friends, that the Boy Scouts do not wish to use their funds for such purpose. I make two sugges-

tions. Let the Rotarians of Georgia do the job, or let the Boy Scouts do it for themselves. Let the Boy Scouts have a benefit. That is a good project. They could have a benefit to raise 50 percent of the value of the property, which comprises some 282 acres. This would preserve what we ought to recognize as a pretty sound policy, which we have followed quite consistently in the Senate, by not giving away surplus property.

I have nothing further to say, except to ask for a vote on the amendment.

Mr. RUSSELL. Mr. President, I yield 3 minutes to the distinguished Senator from South Carolina [Mr. THURMOND], who served as a director of the Georgia-Carolina Scout Council.

Mr. THURMOND. Mr. President, I rise in support of the bill, S. 1563, and in opposition to the Morse amendment.

The leaders of the Boy Scouts in the Savannah River Valley, of which Augusta, Ga., is the center, are naturally interested in the passage of this bill.

Several years ago I served on the board of directors of the Georgia-Carolina Scout Council, and I am now a trustee of the trustee fund. We have been raising money for some time to erect permanent buildings for the various camps.

I point out to the distinguished Senator from Oregon that the Boy Scouts will certainly do their part in this project. The citizens in the area will, also. It will require a considerable amount of money to erect the needed buildings. Everything will not be given to the Boy Scouts.

The land to be conveyed to the Boy Scouts originally was valued at $5,792. This is indeed a paltry sum in comparison with the foreign aid bill, for example, and the usual welfare proposals that come before this body. The Boy Scouts do not feel justified in erecting permanent buildings on leasehold property. They cannot very well go to the people and request them to contribute to a fund to erect buildings on leased property. If they can say to citizens, "We own the property," they will have a much better chance of obtaining donations to erect the necessary buildings.

This is a very worthy cause. There is no point in arguing the fact that the Boy Scouts is a fine patriotic organization. I know that Senators are thoroughly familiar with this great American organization.

There would be little, if any, juvenile delinquency in the United States if every young boy were a member of the Boy Scouts. During the 8 years I served as a judge in South Carolina there appeared before me only one young person charged with a crime who was a member of the Boy Scouts. The Boy Scouts have an outstanding record. They build good citizens.

I cannot imagine a better purpose to which the Government could devote the land than to convey it to the Boy Scouts.

The land is located on the Georgia side of the river, but the Boy Scouts of both States in the Savannah River Valley will utilize the property and benefit to full advantage.

I hope the Senate will pass the bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Oregon.

The amendment was rejected.

The PRESIDING OFFICER. The bill is open to amendment.

Mr. MORSE. Mr. President, I yield back the remainder of my time.

Mr. RUSSELL. Mr. President, I yield back any remaining time I have.

The PRESIDING OFFICER. All time has been yielded back. The question is on the engrossment and third reading of the bill.

The bill (S. 1563) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Army is authorized and directed to convey to the Georgia-Carolina Council, Incorporated, Boy Scouts of America, without monetary consideration therefor, but subject to the conditions of this Act, the area or areas he determines to be available for conveyance within the two hundred and eighty-two acres of land leased to the said Boy Scouts Council at the Clark Hill Reservoir, Savannah River, Georgia-South Carolina, under lease granted January 1, 1961, numbered DA-09-133-CIVENG-61-316.

SEC. 2. Title to property authorized to be conveyed by this Act shall revert to the United States, which shall have the right of immediate entry thereon, if the Georgia-Carolina Council, Incorporated, Boy Scouts of America—

(1) has not commenced the development of such property for recreation and camping purposes within the three-year period beginning on the date of enactment of this Act; or

(2) shall ever cease to use such property for recreation and camping purposes.

SEC. 3. The Secretary of the Army is authorized to grant to the Georgia-Carolina Council, Incorporated, Boy Scouts of America, such rights-of-way for public access and utility lines across any property of the United States as may be necessary to facilitate the development and use of the property conveyed under authority of this Act for recreation and camping purposes.

SEC. 4. The conveyance of the property herein authorized shall be subject to the right to flood due to the fluctuation of the water level of the Clark Hill Reservoir project and to such other conditions, reservations, and restrictions as the Secretary of the Army may determine to be necessary for the management and operation of said Clark Hill Dam and Reservoir project.

SEC. 5. The cost of any surveys necessary as an incident of the conveyance authorized herein shall be borne by the Georgia-Carolina Council, Incorporated, Boy Scouts of America.

MEXICAN FARM LABOR PROGRAM

The Senate resumed the consideration of the bill (H.R. 2010) to amend title V of the Agricultural Act of 1949, as amended, and for other purposes.

Mr. MANSFIELD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MANSFIELD. What is the pending business?

The PRESIDING OFFICER. H.R. 2010, to amend title V of the Agricultural Act of 1949, as amended, and for other purposes.

Mr. JORDAN. Mr. President, I shall make a brief explanation of H.R. 2010. I was chairman of the subcommittee which held hearings on the bill, and I am thoroughly familiar with the testimony offered; therefore, I wish to give a brief explanation.

This bill would extend the Mexican farm labor program for 2 years and make a number of improvements in the program.

The Mexican farm labor program was authorized in 1951 by Public Law 78 of the 82d Congress. Under this program the Secretary of Labor, pursuant to an agreement with the Republic of Mexico, recruits workers in Mexico for agricultural employment in the United States. Pursuant to this agreement, as well as the law, a number of assurances are provided for the protection of the Mexican workers, including a guarantee by the Secretary of the payment of wages and transportation by farm employers. Employers who employ Mexican workers are required to indemnify the United States for its guarantee of their contracts and to pay into a revolving fund a fee for each worker to support the program financially. The program is self-supporting, except for compliance activities and certain executive functions. The workers are greatly needed during the periods of peak employment, such as at harvest time, when the crops must be either harvested or lost and there are not a sufficient number of domestic workers available. The program also provides a number of safeguards to prevent any importation of Mexican workers which might have an adverse effect on the employment of domestic agricultural workers. The program has been extended on various occasions to December 31, 1955, June 30, 1959, June 30, 1961, and December 31, 1961.

Hearings were conducted by the Subcommittee on Agricultural Research and General Legislation on three bills dealing with extension or amendment of the program. H.R. 2010, as passed by the House of Representatives, provided for a simple extension of 2 years. S. 1466 and S. 1945 provided for various amendments of the law designed to provide greater protection for the domestic workers. The committee gave very careful consideration to all of these bills, and to the differing points of view presented at the hearings, and have recommended amendment of H.R. 2010 to include some additional protection for the domestic workers. These changes should, in the opinion of the committee, prove adequate to protect fully the American worker without imposing such restrictions on the program as would necessitate the loss of crops on account of the inability to obtain workers from any source.

The law already contains a number of provisions designed to protect the American worker from any adverse effect as a result of the program. In the first place, the Secretary of Agriculture must determine that the Mexican workers are needed to assist in certain production. Second, the cost of bringing the worker from Mexico, including subsistence, medical care, and burial expenses, where

necessary, must be borne by the employers, in addition to the payment of prevailing wages and the furnishing of other benefits which the employer might ordinarily make available to domestic workers. Third, the law prohibits any Mexican worker from being made available for employment in any area unless the Secretary of Labor has determined and certified that the following situations exist:

(1) Sufficient domestic workers who are able, willing, and qualified are not available at the time and place needed to perform the work for which such workers are to be employed;

(2) The employment of Mexican workers will not adversely affect the wages and working conditions of domestic agricultural workers similarly employed; and

(3) Reasonable efforts have been made to attract domestic workers for such employment at wages and standard hours of work comparable to those offered foreign workers.

Both S. 1466 and S. 1945 would have prohibited the employment of Mexican workers recruited under the program unless employers—or, in the case of S. 1945, the specific employer—had made reasonable efforts to attract workers not only at comparable wages and hours, but also at comparable terms of employment. It appeared to the committee that this would result in a very complex and difficult situation. The terms of employment provided for Mexicans under the arrangements with Mexico provide for transportation from points in the interior of Mexico, burial expenses, work guarantees, housing in barrack-type dormitories with other single male workers, cooking facilities, sanitary facilities, laundry facilities, Mexican social security benefits, protection from immoral and illegal influences, worker representation, insurance, and other terms resulting from agreement with the Mexican Government. These terms simply do not apply to domestic workers who may or may not be migrants, may or may not be single workers, may go wherever they please in the United States, and accept any type of employment. Of course, under the proposal advanced, the employer would not have to offer identical terms of employment, but rather would be required to offer comparable terms of employment. But what term would be comparable, let us say, to the cost of transportation from Mexico where the employee is a citizen of the community in which the work is performed. Perhaps the employer would be required to pay a higher wage to a local worker, but the agreement with Mexico provides that the Mexican worker shall be paid not less than the prevailing wage rate paid to domestic workers. If the domestic workers' wages are raised to compensate for transportation and the prevailing wage is thereby raised, the Mexican worker's wage would have to be raised. The two provisions could never be in perfect balance since an increase in either the prevailing wage or the wage paid the Mexicans would require an increase in the other. Of course such a spiral could not possibly be intended. Presumably the provision would be administered in some manner worked out by the Secretary of Labor in some way that he might consider suitable. The committee was not able to determine what this might be.

Rather than require employers to furnish benefits to domestic workers comparable to benefits which, by their very nature, are inapplicable to domestic workers and cannot be made applicable to them, the committee restricted this proposal to cases where the domestic and foreign workers were in comparable situations. In addition to "wages and standard hours of work" comparable to those furnished the Mexican workers, the committee amendment provides that employers must offer "working conditions" to domestic workers comparable to those offered foreign workers. Thus employers would have to offer domestic workers at least as good wages, hours, and physical conditions of safety and sanitation, as would be provided the Mexican workers. The employers would not have to offer domestic workers anything comparable to transportation from Mexico or to the other terms peculiar to the importation of Mexican workers.

Another provision of S. 1945 would have prohibited the employment of Mexican workers in other than temporary or seasonal occupations, except when necessary to avoid undue hardship. The committee felt this recommendation to be a good one. The purpose of the act is to meet temporary and seasonal labor needs. It is not intended to provide workers for permanent employment or with jobs which should be filled by domestic workers on a year-round basis. This recommendation has been included in the committee amendment.

Another proposal of S. 1945 would have prohibited the use of Mexican workers for employment involving the operation of power-driven machinery, except when necessary to avoid undue hardship. The committee felt that this proposal was an excellent one, but that its language might be construed to prohibit employment in which the worker neither operated nor maintained the machinery, but merely loaded it or did some other manual task in connection with the machinery, which required no special skill or training. The committee amendment therefore prohibits the employment of Mexican workers recruited under the program to "operate or maintain" power-driven machinery, except where necessary to avoid undue hardship. The committee felt very strongly that there is no shortage of American workers to perform the jobs requiring greater skill or training, and that there is therefore no need for the recruitment of Mexican workers and their transportation here to perform such work.

Another provision of S. 1945, which was favored by some of the witnesses before the committee and opposed by others, would have required employers to pay Mexican workers recruited under the program and domestic workers not less than the lowest of the following:

(a) The average farm wage in the State;
(b) The national farm wage average; or
(c) Ten cents per hour above the highest wage rate prevailing during the last previous season in which workers recruited under the program were employed in the area.

This appeared to the committee to be a rather haphazard method of providing for a constantly self-escalating minimum wage for agricultural workers. In the past, Congress has specifically exempted agricultural employment from the minimum wage laws. If, at some time in the future, it should appear desirable to establish minimum farm wages, the method should be carefully worked out by Congress after the most thorough consideration. The proposal advanced in the hearings was not such a carefully worked-out plan, but provided for three different criteria. The first of these was the average farm wage in the State for all types of farm employment, including the highest paid type of farm work. Such an average can hardly be an appropriate measure of fair wages for the least skilled type of labor. The second criterion suggested was the national farm wage average. This not only includes the wages for the highest paid and most skilled types of agricultural employment, but it covers types of employment which may not even exist in the State where the labor is being performed, and includes wages paid in areas where living conditions and costs may be entirely different from those in which the labor is being performed. This also did not appear to the committee to be a fair measure. The third criterion proposed was 10 cents per hour above "the highest wage rate prevailing during the last previous season in which workers recruited under this title were employed in the area and in the activity involved." This criterion therefore looks to some past year which may not be representative of the situation prevailing during the year in which the employment is performed and uses not the average wage rate, but the highest wage rate prevailing at any time during that season for any type of employment. All three of these criteria would, of course, be self-escalating. As wages might be increased to meet the criteria, the criteria would also rise, either for the current season or the succeeding season. The committee gave very careful consideration to the testimony on this point and particularly to the allegations in the hearing that in some cases domestic workers were being paid less than Mexican workers, while in other cases the Mexican workers were being discriminated against. Of course, some domestic workers will always be paid more than some Mexican workers, and some Mexican workers will be paid more than some domestic workers. However, to prevent any discrimination between workers in this respect, the committee has recommended an amendment to require employers of Mexican workers recruited under the program to pay both their domestic workers and their Mexican workers not less than the prevailing wage rate for similar work in the area of employment.

The committee amendment also adopts another provision recommended in S. 1945, which would amend the definition of agricultural employment for the purpose of the program to prohibit the furnishing of Mexican workers for some processing activities.

A further provision of S. 1945 of a technical nature is contained in the com-

mittee amendment. This provision would make no change in the substance of the program, but would include in the basic act covering the program an existing appropriation act requirement that employers reimburse the United States up to a $15 maximum for all expenses of the program, except salaries and expenses of personnel engaged in compliance activities.

With the protection now provided in the law and the additional protection provided by the committee amendment, the Secretary of Labor should be able to administer the program in a way which will provide complete protection for domestic workers, while insuring sufficient workers whenever and wherever needed to perform the work that must be done.

I recommend that the Senate accept and pass the bill as amended and reported by the committee.

Mr. ELLENDER. Mr. President, for a number of years it has been necessary to bring in agricultural workers to help during harvest and other peak periods. In 1948, the United States and Mexico entered into an agreement, under which, without cost to the Federal Government, agricultural employers unable to obtain adequate domestic farm labor recruited workers in Mexico under the supervision of the United States and Mexican Governments. The employer paid the cost of transporting the worker from Mexico and return and the cost of his supplies and subsistence during the period of movement. The employer was also required to post a bond of $25 for each worker to guarantee his departure from the United States when his work was completed. The 1948 agreement was terminated in October 1948, and a new similar, but improved, agreement became effective August 1, 1949.

A number of difficulties were encountered under both the 1948 and 1949 agreements. Since employers did their own recruiting, it was cheaper for them to recruit as close to the border as possible. Mexicans who desired work converged on the border in great numbers, creating problems for the border towns and for the Government of Mexico. Large numbers of Mexicans crossed the border illegally to obtain employment. These illegal entrants could not obtain the wage guarantees provided for by the agreement with Mexico. Their employment was having an adverse effect on domestic farm wages, and they created special problems for our Spanish-American population, for the Immigration and Naturalization Service, and for other law enforcement and welfare agencies. The employers in turn had problems with departure bond forfeitures and the Mexican Government had problems arising from employers' failure to fulfill their contracts.

Because of these difficulties in the operation of the 1948 and 1949 agreements, representatives of the United States and Mexico met in conference beginning January 26, 1951. I served as an adviser to the U.S. delegation at that conference. During the conference, the Mexican Government gave notice that it was terminating the 1949 agreement; and it was suggested that private recruitment be replaced by recruitment by an agency of the United States which could guarantee compliance with individual work contracts. On February 27, 1951, I introduced S. 984, to authorize such a recruitment program by the Secretary of Labor, and subsequently that bill was approved as Public Law 78 of the 82d Congress on July 12, 1951.

The program provided by Public Law 78 was not designed as a subsidy to employers in any way. It provided that the employer would indemnify the United States against loss by reason of its guarantee of the work contracts, that the employer would reimburse the United States up to $15 per day for the transportation and subsistence of workers, and that the employer would either return or pay the cost of returning the worker to the reception center in the United States. The $15 limit was imposed not with the idea that the United States might have to share any of the cost, but rather to keep administrative officials from spending excessive funds in the transportation and maintenance of workers. Testimony indicated that private employers were transporting Mexican workers from recruitment points in Mexico to the border and return for about $5 per worker. Allowing another $5 per worker for maintenance at reception centers, the House Committee on Agriculture recommended a maximum reimbursement of $10. In conference the sum of $15 was agreed upon. At present the employers are required to pay all of the expenses of the program, except compliance activities. The cost was $10.41 per worker in fiscal 1960, and is estimated at $13.04 per worker in fiscal 1961 and $11.84 in fiscal 1962. Employers are currently charged a fee of $12 for the initial contract of a worker, and $5 for recontracting a worker previously contracted for use in another State. The amounts charged employers are increased or decreased as necessary to pay the costs of the program. Amounts received from employers are deposited in the Farm Labor Supply Revolving Fund and subsequently paid out for program expenses. Expenses paid out of the revolving fund amounted to approximately $5 million in fiscal 1959, $4.5 million in fiscal 1960, and $4.1 million in fiscal 1961.

Mr. President, I ask unanimous consent to insert in the RECORD at this point a tabulation of the program expenses for fiscal 1959, 1960, and 1961 which are met from employer contributions to the revolving fund.

There being no objection, the tabulation was ordered to be printed in the RECORD, as follows:

Costs of Mexican farm labor program borne by employers

	Fiscal years		
	1959	1960	1961
Transportation of workers	$1,662,000	$1,495,000	$1,213,000
Meals	738,000	701,000	603,000
Medical care	669,000	610,000	577,000
Rent	155,000	186,000	161,000
Other	93,000	120,000	109,000
Administrative costs	1,674,000	1,337,000	1,404,000
Total	4,991,000	4,449,000	4,067,000

Mr. ELLENDER. Mr. President, Public Law 78 has done much to solve the problems which gave rise to its enactment. Mexican workers are recruited in an orderly fashion by the Secretary of Labor in the interior of Mexico. The workers are sure of proper housing, transportation, and medical care. The performance of work contracts are guaranteed by the United States, which in turn is entitled to indemnity from the employer.

Except for compliance activities, all program costs are borne by the employers. This includes the cost of administering the program, as well as transportation of the workers from Mexico and back, rent of reception centers, medical care, and other expenses.

The act provides protection and assistance for the Mexican worker, the domestic worker, and the employer.

The Secretary of Agriculture must determine the need for the Mexican workers, and then they can be brought in only if the Secretary of Labor determines that there are not sufficient domestic workers available, that the wages and working conditions of domestic workers will not be adversely affected, and that reasonable efforts have been made to obtain domestic workers.

Public Law 78 was originally made effective for 2½ years. It has been extended on a number of occasions, and I hope that Congress shall see fit to extend it again.

The PRESIDING OFFICER (Mr. BARTLETT in the chair). The question is on agreeing to the committee amendment in the nature of a substitute. [Putting the question.]

Mr. KUCHEL. What was the statement of the Chair?

The PRESIDING OFFICER. The question is on agreeing to the committee substitute.

Mr. KEATING. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. KEATING. If the committee substitute were adopted, would it then be open to amendment?

The PRESIDING OFFICER. The bill would then not be open to further amendment.

Mr. KEATING. Several Senators have amendments to offer. We had better protect our rights at this time.

The PRESIDING OFFICER. The question is on agreeing to the amendment in the nature of a substitute. [Putting the question.]

Mr. KEATING. I understood that the Senator from Minnesota [Mr. MCCARTHY] had an amendment. If the committee amendment in the nature of a substitute is adopted, will he be foreclosed from offering his amendment?

Mr. HOLLAND. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HOLLAND. I understand that the committee amendment has been adopted, and that the Chair has so ruled.

The PRESIDING OFFICER. The Chair has not announced the vote.

Mr. HOLLAND. I ask for the regular order.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute.

Mr. MANSFIELD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MANSFIELD. What is the status of the committee amendment?

The PRESIDING OFFICER. The amendment is open to amendment. If there be no amendment to be proposed, and no Senator wishes to speak, the question will be on the adoption of the committee amendment. Its adoption will foreclose any further amendment.

Mr. McCARTHY. We had an understanding with the Senator from North Carolina, who is handling the bill on the floor, that amendments might be offered. I am sure he did not intend to preclude us from offering amendments.

The PRESIDING OFFICER. The committee amendment is open to amendment.

Mr. JORDAN. The Senator from Minnesota is correct. I did not intend to preclude him from offering an amendment.

Mr. McCARTHY. I call up my amendment, which is at the desk.

The PRESIDING OFFICER The amendment will be stated.

The LEGISLATIVE CLERK. On page 3, lines 1 through 9, it is proposed to strike out all of section 505 and insert in lieu thereof the following:

SEC. 505. (a) No worker recruited under this title shall be made available to any employer or permitted to remain in the employ of any employer unless the employer offers and pays to such workers wages at least equivalent to 90 per centum of the average farm wage in the State in which the area of employment is located, or 90 per centum of the national farm wage average, whichever is the lesser.

(b) The determination of the average farm wage in a State and the national farm wage average required in (a) above shall be made by the Secretary of Labor, after consultation with the Secretary of Agriculture. In making these determinations, the Secretary of Labor shall consider, among other relevant factors, the applicable average farm wage rate per hour for workers who do not receive board and room, or such other appropriate information and data as may be available.

Mr. McCARTHY. Mr. President, the amendment is quite clear. It provides that no Mexican worker recruited under this title shall be made available to any employer or permitted to remain in the employ of any employer unless the employer offers and pays such worker wages at least equivalent to 90 percent of the average farm wage in the State in which the area of employment is located, or 90 percent of the national farm wage average, whichever is lesser.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield.

Mr. MANSFIELD. I wish to propound a unanimous-consent request. I have discussed the question with Senators who intend to offer amendments, and with the leadership on the other side, as well as with the Senator in charge of the bill, and other Senators interested in the proposal before us.

I ask unanimous consent that debate on all amendments be concluded tonight, with the understanding that on any amendment on which a yea-and-nay vote is requested, the yea-and-nay vote shall be postponed until Monday; that the time then be limited to 10 minutes on each amendment, 5 minutes to a side, before the vote is taken; and that the time shall begin to run immediately at the conclusion of morning business on Monday next.

The PRESIDING OFFICER. Is there objection?

Mr. McCARTHY. Reserving the right to object, do I correctly understand that the majority leader proposes a limitation of 10 minutes on each amendment on which a rollcall is requested this evening, 5 minutes to a side?

Mr. MANSFIELD. That is correct.

Mr. McCARTHY. Any other amendments would not be debated within the 10-minute limitation?

Mr. MANSFIELD. No; but if any other amendments were forthcoming, we would try to give them all the consideration possible, and we would hope that the Senators who offered such amendments would not ask for too much time for their consideration, due to the length of the debate before us.

Mr. HOLLAND. Mr. President, will the distinguished majority leader yield?

Mr. MANSFIELD. I yield.

Mr. HOLLAND. I wonder if the distinguished majority leader would consider amending his requiest so as to require a yea-and-nay vote on such amendments as are important—I do not know which ones they are—so that Senators who are not interested in the minor amendments, which will not require yea-and-nay votes, can return to their offices. I understand there are two or three amendments which are of importance, and that the offerers will ask for yea-and-nay votes on them. Would the majority leader include those particular amendments in his request?

Mr. MANSFIELD. Those are the amendments I have in mind. I understood that the Senator from Minnesota [Mr. McCARTHY] intended to ask for a yea-and-nay vote. Will the Senator from New York request a yea-and-nay vote on his amendment?

Mr. KEATING. I intended to wait, to see what would happen on the yea-and-nay vote on the amendment of the distinguished Senator from Minnesota. I am inclined at present to ask for a yea-and-nay vote, if that statement is helpful to the majority leader.

Mr. MANSFIELD. It is.

Mr. HOLLAND. I wonder if the distinguished Senator from Minnesota is ready to ask for a yea-and-nay vote on his amendment. I will support his request, if he wishes a yea-and-nay vote.

The point is that unless we know that the important amendments will be submitted to yea-and-nay votes, unless we know that they will not be subject to voice votes or division votes, while many Senators are not in the Chamber, we would not be safe in leaving the Chamber.

Mr. MANSFIELD. To the best of my knowledge, after making inquiry, I find there are only two amendments to be offered. On the basis of those inquiries, it would appear that both the Senator from New York [Mr. KEATING] and the Senator from Minnesota [Mr. McCARTHY] wish to have yea-and-nay votes on their amendments. Therefore, if the unanimous-consent request is agreed to, it will mean that at the conclusion of the morning hour on Monday next the Senate will proceed, at 10-minute intervals, to vote on those two amendments.

Mr. KUCHEL. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I yield.

Mr. KUCHEL. Under those circumstances, I wonder if it would be agreeable to all Senators to ask for the yeas and nays on both amendments. If there is no objection to the unanimous-consent request, and if the amendment of the distinguished Senator from Minnesota were disposed of in such fashion as to indicate to the Senator from New York that he might not wish to have a yea-and-nay vote on his amendment, the opportunity would always be available to him to ask unanimous consent to withdraw his amendment.

Mr. JORDAN. Does the Senator mean on the amendments?

Mr. KUCHEL. Yes.

Mr. MANSFIELD. That was the procedure I had in mind proposing, if we could first have the unanimous-consent request agreed to.

Mr. KEATING. In order that the Senator from Florida [Mr. HOLLAND] and other Senators may be reassured, I announce that I will not endeavor to obtain a vote tonight, by division or otherwise. Although it does not require unanimous consent, I ask unanimous consent that at the time the yeas and nays are ordered on the McCarthy amendment, they may at the same time be ordered on my amendment, although that would not be in order until the amendment was before the Senate.

Mr. MANSFIELD. Every Senator would be protected, and nothing in the way of an unknown amendment would be offered, thereby catching off guard Senators who may leave the Chamber in the expectation that there will be no votes this evening.

Mr. HOLLAND. I am certain the distinguished Senator from Montana would make certain that such a procedure was followed. However, it is not only the Senator from Florida who is concerned. Numerous other Senators, who are not now in the Chamber, would like to be assured by the staff if an agreement is entered into that there will be no voting tonight.

Mr. President, I ask unanimous consent that there be no voting on any amendment tonight.

Mr. MANSFIELD. Mr. President, will the Senator from Florida withhold that request until action has been taken on the request I have made?

Mr. HOLLAND. I withhold my request.

Mr. JORDAN. Was the Senator's request for 10 minutes on each amendment?

Mr. MANSFIELD. Ten minutes on each amendment, 5 minutes to a side.

Mr. JORDAN. Would the Senator mind making that 20 minutes to each amendment, 10 minutes to a side?

Mr. MANSFIELD. That is agreeable.

Mr. JORDAN. I believe some of us would like to take more than 5 minutes.

Mr. McCARTHY. The point of my reservation was to ask the majority leader whether it would be possible, if there were any other business to be considered which would take a limited amount of time, that it might be taken up after the morning hour on Monday, so that the debates and the votes which may be agreed to which would take place about 12 o'clock. I think 10 or 10:30 o'clock on Monday morning might be a little too early for some Senators who will be out of the city over the weekend and will be returning to the Senate on Monday.

Mr. HOLLAND. I remind the distinguished majority leader that two treaties are on the executive calendar. Probably they will be agreed to in a perfunctory way, but necessarily by yea-and-nay votes. It may be that they will provide the answer to the Senator's suggestion.

Mr. McCARTHY. The time for consideration of the treaties may prove to be adequate for the purpose I have suggested.

Mr. MANSFIELD. Mr. President, I do not mind being elastic, but I do mind being stretched too far. The Senate has already agreed to an order to convene at 9 o'clock on Monday morning. Now we are being asked to postpone action on the amendments for 3 hours. I am willing to agree to a time limitation beginning at 10 o'clock on Monday morning, but I think that is as far as I can go. Someone must exercise responsibility. I hope the Senator from Minnesota will give me that much leeway, because another very important bill is scheduled to be taken up on Monday, and it will require much debate.

Mr. McCARTHY. I was not so much concerned with yea-and-nay votes, because Senators are somewhat familiar with what my amendment seeks to do. I think the Senate has become preoccupied with yea-and-nay votes during the past 2 or 3 months. It has been suggested that there be one every hour on the hour, no matter what is before the Senate. It is a little like professional basketball, where it is necessary to shoot every 20 seconds, or else the ball will be taken away.

Members of the Committee on Agriculture and Forestry, including the distinguished Senator from Louisiana [Mr. ELLENDER], and the distinguished Senator from North Carolina [Mr. JORDAN] know the purpose of my amendment. Many other Senators do not know about it. Many have asked, "What is the McCarthy amendment?" I believe there should be time enough to study the RECORD.

Mr. KUCHEL. Nevertheless, time for debate tonight will be available. The distinguished majority leader has suggested that the time limitation on Monday begin at 10 o'clock. That makes sense to me. That is better than beginning at 12. It would be reasonable to assume that the 2 hours between 10 and 12 o'clock would not be crucial, so far as the vote is concerned.

I urge the distinguished Senator from Minnesota to accept what I think is a reasonable suggestion by the distinguished majority leader.

Mr. McCARTHY. I have some views about the format of the CONGRESSIONAL RECORD. I believe it contributes much toward keeping Senators well informed. The argument that Senators will not go to the RECORD does not carry a great deal of weight.

I hope, since the Senator from Florida observed that two treaties will have to be brought up on Monday——

Mr. MANSFIELD. They do not have to be brought up on Monday.

Mr. HOLLAND. The voting on the treaties will be by yea-and-nay vote.

Mr. McCARTHY. If that is the case, if the majority leader did not have in mind bringing up the treaties very soon, and if his schedule would otherwise be interfered with, I am quite willing to agree to his unanimous-consent request.

Mr. MANSFIELD. I thank the distinguished Senator from Minnesota. I suggest, then, that beginning at 11 o'clock on Monday morning there be a 20-minute limitation of debate on each of the two amendments.

Mr. McCARTHY. That is better than I had expected.

Mr. KEATING. Will the majority leader yield for a clarification of the parliamentary situation?

Mr. MANSFIELD. I yield.

Mr. KEATING. After the Senator from Minnesota offers his amendment, if it is not acted upon, I assume it will be in order for me to call up my amendment, in order that I may discuss it.

Mr. JORDAN. I think the amendments ought to be generously debated, because the Senate passed a bill when the Senator walked away a while ago.

Mr. HOLLAND. Mr. President, I wish, not simply for my own convenience, but for the convenience of many other Senators, to propound a unanimous-consent agreement that the Senate not vote tonight on any amendment to the bill.

Mr. MANSFIELD. May my proposal be agreed to first?

Mr. CLARK. Mr. President, is it the intention to bring the treaties to a vote on Monday morning, or can we rely on the understanding that the first yea-and-nay vote will come at 11 o'clock?

Mr. MANSFIELD. I wish Senators would allow me to discuss that question with the chairman of the Committee on Foreign Relations.

I will do what I can.

The PRESIDING OFFICER (Mr. BURDICK in the chair). Will the Senator from Montana inform the Chair whether the proposed unanimous-consent agreement is to be in the regular form and whether any provision is to be made for yielding time on the bill?

Mr. MANSFIELD. It will be in the regular form; and on Monday there will be 20 minutes for debate on each amendment, beginning at 11 o'clock; and the time will be under the control of the Senator in charge of the bill [Mr. JORDAN] and the Senator from New York, on his amendment, or the Senator from Minnesota, on his amendment.

Mr. HOLLAND. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I yield.

Mr. HOLLAND. Since the Senator from Montana says the agreement will be in the regular form, let me ask whether that includes a provision to the effect that no amendment not germane to the bill may be considered?

Mr. MANSFIELD. That is correct; that is the regular form.

The PRESIDING OFFICER. Will the Senator from Montana inform the Chair whether the agreement is to provide for the allowance of any time on the bill?

Mr. MANSFIELD. No.

The PRESIDING OFFICER. Is there objection to the proposed unanimous-consent agreement? Without objection, it is so ordered.

The unanimous-consent agreement, as subsequently reduced to writing, is as follows:

UNANIMOUS-CONSENT AGREEMENT

Ordered, That, effective on Monday, September 11, 1961, beginning at 11 a.m., during the further consideration of the bill (H.R. 2010) to amend title V of the Agricultural Act of 1949, as amended, and for other purposes, debate on the two amendments (designated as: the McCarthy amendment, numbered 8–25–61A, and the Keating amendment, numbered 8–29–61A) shall be limited to 20 minutes, to be equally divided and controlled by the mover of any such amendment or motion and the majority leader: *Provided,* That in the event the majority leader is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or some Senator designated by him: *Provided further,* That no amendment that is not germane to the provisions of the said bill shall be received.

Mr. HOLLAND. Mr. President, if the Senator will yield, I wish to propound an inquiry, although if any Senator expects to have a vote taken tonight, I certainly will not propound this inquiry. I understand that Senators wish to have no votes taken tonight. Therefore, I ask unanimous consent that the Senate not vote tonight, either by record vote, standing vote, or voice vote, on the pending bill or any other measure which may be brought up.

Mr. MANSFIELD. I see no objection to that, because I know of no vote that will be requested tonight.

Mr. DIRKSEN. Mr. President, reserving the right to object, I must say that such a request; namely, that there be no record votes—is rather unusual. I would prefer to rely on the assurance of the majority leader, rather than to have such a precedent established, because at a future time it might present some real difficulties to the Senate. So I hope the Senator from Florida will not press for adoption of his request.

Mr. HOLLAND. I first said that I would not request it if any Member objected.

However, it has been said that there are to be only two amendments to the bill, and that no Senator wishes to have a vote taken tonight, and that the votes will be taken on Monday. So all I am asking is that it be agreed that no votes will be taken tonight.

I hope the Senator from Illinois will withdraw his objection.

Mr. DIRKSEN. Mr. President, I could not withdraw my objection.

Mr. JORDAN. Mr. President, will the Senator from Florida yield?

Mr. HOLLAND. I yield.

Mr. JORDAN. I have before me an amendment which I am prepared to accept; and I have discussed it with the chairman of the committee and with the Senator from Minnesota [Mr. McCARTHY]. It would do away with the necessity of paying double insurance on Mexican workers who are brought in, who are covered by an agreement with the Mexican Government. If there is no objection, I am prepared to accept that amendment.

Mr. DIRKSEN. Mr. President, I may have misunderstood the request of the Senator from Florida. I thought his request applied to record votes, which have already been covered. But the majority leader informs me that the Senator from Florida was referring also to voice votes, in order to make sure that no action would be taken before Monday.

Mr. HOLLAND. As I understand, the request of the Senator from Montana covered only two yea-and-nay votes.

Mr. MANSFIELD. That is correct.

Mr. HOLLAND. I was trying to provide assurance, for the benefit of Senators who are not present at this time—although so far as I am concerned, I can remain here until midnight, if that is necessary or desirable; but certainly there is no use in doing so if we know that no votes will be taken tonight. I was merely trying to clarify that question for the RECORD.

Mr. DIRKSEN. I have no objection, if the Senator has in mind an amendment, to agree that there shall be no voice votes.

Mr. HOLLAND. I have no amendment in mind. I do not want any amendment similar to the ones we are talking about, or even more sweeping amendments, taken up and acted on, either by voice vote or any other vote, when many Senators are not present.

Mr. MANSFIELD. Mr. President, will the Senator from Florida accept the assurance of the minority leader [Mr. DIRKSEN] and myself that there will be no votes tonight, except on the amendment—to be offered by the Senator in charge of the bill [Mr. JORDAN]—which, I understand, is satisfactory to everyone?

Mr. HOLLAND. I gladly accept that assurance.

Mr. MANSFIELD. Mr. President, on the question of agreeing to the two amendments which will be voted on on Monday, I ask unanimous consent that it be in order to ask that the yeas and nays be ordered on each even though one of them is not yet before the Senate.

The PRESIDING OFFICER. Without objection it is so ordered.

The yeas and nays were then ordered on each.

Mr. JORDAN. Mr. President——

Mr. McNAMARA. Mr. President, will the Senator from North Carolina yield?

Mr. JORDAN. I yield.

Mr. McNAMARA. The Senator made an announcement about an amendment. Do I correctly understand that the amendment would require that American employers rely upon a Mexican insurance firm for protection?

Mr. JORDAN. No. But let me read the amendment. It would insert certain language on page 3 of the bill, between lines 9 and 10.

Probably it will be best if at this time I submit an explanation of the amendment.

Mr. President, I submit to House bill 2010 an amendment dealing with a special problem which has arisen in the State of California since the time when the Senate Committee on Agriculture and Forestry considered the bill.

Recently, the California Temporary Disability Insurance Act was extended to cover agricultural workers. It did not exclude Mexican nationals employed in California under Public Law 78. It is my understanding that any benefits which Mexican nationals would enjoy under the California law are already provided for under Public Law 78.

Unless the amendment is adopted, it will mean that Mexican nationals employed under Public Law 78 will be paying for benefits similar to those already provided for under Public Law 78.

As soon as this matter came to my attention I asked for a report on it from the Department of Labor, and I ask unanimous consent that a copy of that report be included in the RECORD at the conclusion of my remarks on the proposed amendment.

It is my understanding that both the Government of the Republic of Mexico and the California Department of Employment have requested that the amendment be adopted in order to avoid a great deal of confusion and repetition in the operation of the Mexican farm labor program in the State of California.

The amendment provides that workers recruited under Public Law 78 shall not be subject to any Federal or State tax levied to provide illness or disability benefits for them. I want to make clear that Public Law 78 requires the employers of Mexican nationals to provide this type of benefit for all employees employed under Public Law 78.

Mr. McNAMARA. Have we assurance that employers will not be relying upon Mexican insurance firms under any circumstances?

Mr. JORDAN. The amendment does not affect American employers in any way whatever.

Mr. KUCHEL. Mr. President, will the Senator from North Carolina yield to me?

Mr. JORDAN. I yield.

Mr. KUCHEL. For the benefit of the Senator from Michigan, let me read the text of a telegram bearing on this subject, which I received on August 28 from the director of the California State Board of Employment:

SACRAMENTO, CALIF., *August 28, 1961.*
Hon. THOMAS H. KUCHEL,
U.S. Senator,
Senate Office Building,
Washington, D.C.:

May I urge support of amendment to Public Law 78 which would exclude Mexican nationals from California disability insurance coverage. As the administrator of this program I believe that we will experience great difficulty and near impossibility in the administration of this law.

IRVING H. PERLUSS,
Director, California Department of Employment.

Under those circumstances I say to the Senator that it is exclusively designed to cure this defect.

Mr. ENGLE. Mr. President, will the Senator from North Carolina yield?

Mr. JORDAN. I yield.

Mr. ENGLE. The purpose is to keep them from being insured twice.

Mr. JORDAN. That is exactly what the amendment does; and I have discussed it with the Senator from Minnesota and with the chairman of the Committee on Agriculture and Forestry, the Senator from Louisiana [Mr. ELLENDER], and the amendment is acceptable to all Members concerned.

The PRESIDING OFFICER. Will the Senator from North Carolina send the amendment to the desk, so that it may be read?

Mr. JORDAN. Yes. Mr. President, I offer the amendment which I send to the desk; and I ask that it now be read.

The PRESIDING OFFICER. The amendment will be read.

The LEGISLATIVE CLERK. On page 3, between lines 9 and 10, it is proposed to insert the following:

SEC. 4. Section 505 of such Act, as amended, renumbered as section "507", is amended by adding at the end thereof the following:

"(d) Workers recruited under the provisions of this title shall not be subject to any Federal or State tax levied to provide illness or disability benefits for them."

And to renumber the succeeding sections accordingly.

Mr. JORDAN. Mr. President, I ask unanimous consent that the pending amendment of the Senator from Minnesota [Mr. McCARTHY] be temporarily laid aside, so that the Senate may proceed to consider the amendment I have sent to the desk, which has just now been read by the clerk.

Mr. McCARTHY. Mr. President, I am glad to yield for that purpose.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The question now is on agreeing to the amendment offered by the Senator from North Carolina.

The amendment was agreed to.

Mr. LONG of Hawaii. Mr. President, will the Senator from Minnesota yield?

Mr. McCARTHY. I yield.

Mr. LONG of Hawaii. Mr. President, the Senate now has under consideration the extension of the Mexican Farm Labor Act. It is, I believe, imperative that we take this opportunity to correct some of the demonstrated evils of the law. It is time that we face the problem as it is, and recognize that continuation of the present system will be a continuation of the degradation of America's farm labor force.

I support the efforts of the junior Senator from Minnesota to improve the working conditions of American and Mexican farm laborers alike. I am most pleased that I am joined in this support by many of the leading citizen organizations in this country, as an example of

which I cite a letter I recently received from Mr. Andrew J. Biemiller, director, Department of Legislation, American Federation of Labor and Congress of Industrial Organizations. I think Mr. Biemiller's letter is a concise and accurate statement of the situation, and I request unanimous consent that it be printed at this point in the CONGRESSIONAL RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AUGUST 25, 1961.

Hon. OREN E. LONG,
Senate Office Building,
Washington, D.C.

DEAR SENATOR: The Mexican farm labor importation program, Public Law 78, has been extremely harmful to American farmworkers who are undoubtedly the most poverty stricken single working group in our country. Public Law 78 has been a means of depressing the wages of our farmworkers and of cutting down job opportunities.

Under Public Law 78, 315,000 Mexican farmworkers were imported into the United States in 1960. This mass importation has been a major factor in maintaining the average farm labor wage well under $1,000 a year and in keeping the average number of days of farm labor employment around 138 days a year.

The Senate will shortly consider H.R. 2010, a bill to extend Public Law 78 for 2 years. This measure would make some minor changes in Public Law 78 but it would do nothing about the major abuses of this law. H.R. 2010, as reported, would still do serious harm to the wages and job opportunities of our citizen farmworkers.

We understand that Senator EUGENE MCCARTHY will offer two amendments to H.R. 2010 to combat the harmful effects of Public Law 78. One amendment would require growers who use imported Mexican workers to pay them at least the State or national average farm labor wage, whichever is the lower. The second amendment would provide that domestic workers employed on farms using Mexican workers would get comparable benefits to those provided the Mexican workers.

We urge you to support the McCarthy amendments. They are extremely necessary. Without them, H.R. 2010 would be so detrimental to several millions of our fellow citizens that it should not pass the Senate.

Sincerely yours,

ANDREW J. BIEMILLER,
Director, Department of Legislation,
AFL–CIO.

Mr. MCCARTHY. Mr. President, my amendment is offered as a substitute for section 505 of the committee bill. That section reads as follows:

> No workers recruited under this title shall be made available to any employer or permitted to remain in the employ of any employer unless the employer offers and pays to both domestic and foreign workers not less than the prevailing wage paid in the area to domestic workers engaged in similar work, as determined by the Secretary of Labor, and unless the Secretary of Labor determines pursuant to section 503(2) that such prevailing wage rate is not adversely affected by the employment of Mexican workers.

The committee amendment is intended to assure, or at least the declaration is made that it will assure, that an employer who employs both Mexican and domestic labor does not pay either of them less than the prevailing wage for domestic workers similarly employed.

On the face of it, this sounds significant, but in a realistic application it becomes almost meaningless.

The amendment adds little to the existing condition, and the Department of Labor holds that, at best, it has no practical value. The prevailing wage in some areas is as low as 30 cents an hour for American domestic workers performing agricultural work. The Mexican Government will not permit its nationals to work in the United States for less than 50 cents an hour.

So in this case the wage demanded and received by the Mexican nationals who come here under contract is 50 cents an hour. The prevailing wage paid to domestic workers performing similar work is 30 cents an hour. In some cases, there are no Americans, either migrant or nonmigrant performing the work, so the prevailing wage of the Mexican worker becomes the prevailing wage for that area.

The key problem is not the prevailing wage or whether the prevailing wage is being paid, but the fact that in many areas the prevailing wage for similar work is so low. In these cases the use of Mexican nationals has frozen wages of domestic workers at these low levels. The 50-cents-an-hour minimum required by agreement with Mexico, plus the fact that most of the workers are Mexican nationals, establishes in effect a ceiling on what is paid American workers in those areas.

My amendment is designed to correct in some small degree the depressing effect of the Mexican farm labor program on wages and employment opportunities of domestic workers.

My amendment would not terminate the Mexican farm labor program. It would have no effect at all in States which have been paying migrant and domestic workers wages which are reasonable, at least in a relative sense, and which are higher than the national hourly farm wage.

In California and other States where the prevailing wage is already above the national hourly farm wage it will have no bearing. The amendment simply provides that an employer must offer and pay Mexican nationals who are imported into the United States wages at least equal to 90 percent of the State or National average rate for hourly farmwork, whichever is the lesser.

In those States which have a record of relatively low wages paid to agricultural workers, my amendment would not require growers to pay 90 percent of the national average, but only 90 percent of the State average.

The table which I will include in the RECORD is clear evidence that if my amendment were now in force, the effect of the amendment would be moderate, and that it would not impose any undue hardship upon persons who employ Mexican nationals.

I would like to cite one or two examples to indicate what would happen if this amendment were in effect. In the State of Arizona, for example, where in 1960 some 14,000 Mexican nationals were employed at the peak of their employment, and overall some 19,000 were employed, the lowest wage rate which was paid to U.S. workers for work in which the Mexican nationals were also employed was 70 cents an hour. This was the lowest wage paid to them, and it was also the most common wage paid to them.

The average hourly farm wage rate without room and board paid in Arizona in 1960 was 97 cents an hour.

The effect of my amendment would be to require employers to pay Mexican nationals at least 90 percent of 97 cents an hour, which would be about 87 cents an hour, instead of the 70 cents an hour which many have been paid in recent years.

This is not an unreasonable request, and it would have, at best, only a slight effect upon improving the competitive position of the American farmworker who may be available in that area or who might otherwise make himself available.

In the State of Arkansas, which is one of the States in which the problem is very serious, the average which is paid to Mexican nationals is approximately 50 cents an hour, the minimum which is required under the law.

The effect of my amendment would be to require, taking into account 90 percent of the average rate in Arkansas of 73 cents an hour, payment to Mexican nations of 65 cents an hour, instead of the 50 cents an hour rate now being paid to them.

In the State of Texas, which contracted in 1960 for the employment of 112,000 Mexican nationals, the lowest rate paid to Americans performing similar work was 40 cents an hour, and the most common rate paid to Americans was 50 cents an hour.

The average hourly farm wage rate without room or board in Texas was 78 cents in 1960. My amendment would have the effect of requiring the growers in Texas to pay Mexican nationals at least 70 cents an hour, or 90 percent of the prevailing rate for agricultural wages in the State of Texas.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point a table which gives an indication of what wage rates would actually have to be paid to Mexican workers if my amendment were adopted. This table of estimates of the minimum offer for Mexican nationals if my amendment were in effect this year is evidence, I believe, that this is a moderate proposal.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

[Lowest wage for Mexican workers permitted by the amendment [1]]

Arizona	$0.87
Arkansas	.65
California	.87
Colorado	.87
Georgia	.59
Illinois	.87
Indiana	.87
Iowa	.87
Kansas	.87
Kentucky	.73
Michigan	.87
Minnesota	.87
Missouri	.87
Montana	.87
Nebraska	.87
Nevada	.87
New Mexico	.76
North Dakota	.87
Oregon	.87

See footnote at end of table.

[Lowest wage for Mexican workers permitted by the amendment [1]]—Continued

South Dakota	$0.87
Tennessee	.56
Texas	.70
Utah	.87
Washington	.87
Wisconsin	.87
Wyoming	.87
United States	.87

[1] 90 percent of the average farm wage in the State or 90 percent of the average farm wage in the Nation, whichever is the lesser.

Mr. McCARTHY. Mr. President, it is my opinion that this formula is clear and objective. For many years the Department of Agriculture has been maintaining a quarterly series of farm wage rates by States. The Department gathers data on several types of farm labor arrangements. It compiles data on farm labor rates per month with house, per month with board and room, per week with board and room, per week without board and room, per day with board and room, per hour with house, per hour without board and room. These rates are published in a report "Farm Labor," issued by the Statistical Reporting Service of the Department of Agriculture.

Of these categories the hourly rate without board and room is a reasonable equivalent of rates paid to seasonal agricultural workers, and where piece rates are paid, these rates are converted to the hourly equivalents. Seasonal labor is almost universally paid either piece rates or hourly rates. The weekly and monthly rates are generally paid to regular hired men engaged in nonseasonal activities.

However, since the average hour wage rate series also includes some skilled workers, I have modified my amendment to take this into account and to provide that payment of 90 percent of the average hourly farm wage rate is the minimum the growers could pay the Mexican workers.

At the same time, this provision of 90 percent takes into account the fact that the Mexican nationals who are brought into this country have been given many fringe benefits which are not available to American migrants.

I wish to note for the RECORD some of the special benefits which, under the agreement with Mexico, must be provided for Mexican nationals.

It is a fact that Mexican nationals have much more in the way of protection. They have many more fringe benefits than are granted to American migrants. We can assume that these benefits are worth approximately 10 percent of the total wage which is paid to the Mexican nationals.

Mr. ENGLE. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield to the Senator from California.

Mr. ENGLE. I have before me the amendment submitted by the distinguished Senator on August 25, 1961, which provides:

On page 3, lines 1 through 9, strike out all of section 505 and insert in lieu thereof the following:

I shall not quote the language, but I rise to inquire whether this is the amendment as to which the distinguished Senator is speaking at this time?

Mr. McCARTHY. The amendment to H.R. 2010?

Mr. ENGLE. Yes.

Mr. McCARTHY. That is the amendment. It is the only amendment I intend to offer to the bill.

Mr. ENGLE. I assume the amendment does not apply any standard to domestic labor which relates to the wages paid to the Mexican bracero; is that correct?

Mr. McCARTHY. The amendment applies only to Mexican nationals brought in under contract. It has no direct application to domestic migrants or to American workers. It merely requires that the Mexican nationals who are brought in—who now must be paid at least 50 cents an hour under the agreement with the Mexican Government—must be paid 90 percent of the average hourly farm wage rate in the State or the Nation, whichever is lower.

Mr. ENGLE. Will the Senator yield for a further question?

Mr. McCARTHY. I yield.

Mr. ENGLE. Why does the Senator think the language he proposes is preferable to the language in section 505 of the bill as amended and reported by the Committee on Agriculture and Forestry?

Mr. McCARTHY. Section 505 of the bill as reported by the committee provides that such laborers must be paid the same wage rates as are paid for similar work, which means, in effect, that there is really no standard. In many areas the standard is established by the Mexicans employed, since few, if any, American workers are employed in many types of work.

I cited figures earlier to show that in some States Americans working in the same area were paid only 30 cents an hour. In such a case, Mexican nationals, under existing agreements and arrangements, are paid 20 cents an hour more than Americans are paid.

If the committee amendment is agreed to, without a 50-cent minimum—which is now a matter of agreement between our country and Mexico—it would be necessary in these areas to pay only 30 cents an hour to Mexican nationals. The committee amendment deals with "prevailing wage" in the area. My amendment takes as a standard 90 percent of the State or National hourly farm wage, whichever is the lesser.

Mr. ENGLE. But not necessarily for workers engaged in similar work.

Mr. McCARTHY. The standard takes into account all hourly agricultural employment.

Mr. ENGLE. What the Senator is providing in the amendment he has offered is that there must be paid 90 percent of the national farm wage average, or 90 percent of the average for the area in which the person is employed, whichever is lower?

Mr. McCARTHY. In the Nation or in the State.

Mr. ENGLE. In the State. That is different from the amount prescribed in section 505, inasmuch as in section 505 it is stated that there must be paid not less than the prevailing wage in the area to domestic workers engaged in similar work.

Mr. McCARTHY. The Senator is correct.

Mr. ENGLE. The Senator believes that the language he has proposed in the amendment is better than the language which is in the bill at the present time, because "similar work" is frequently not very precisely defined and actually the State average for farmwork might be higher; is that correct?

Mr. McCARTHY. In every case, I think, the general State average rate for hourly farmwork is higher than that which is paid for Americans engaged in work similar to that which the Mexican migrants normally perform.

Sometimes Americans who are employed in the same field of work are paid less than Mexicans are paid.

Mr. ENGLE. If Mexicans are getting paid more than the domestic workers are paid, why is there a need for the amendment?

Mr. McCARTHY. The amendment is needed for two reasons.

If Mexican workers are being exploited that in itself is a sufficient cause to try to bring about some improvement in the situation.

The second point is that Mexican workers in some cases can be brought in under economically advantageous circumstances.

I shall state the situation for the Senator. There are about 500,000 migrant American workers in this country who to some degree compete with Mexican nationals. This is especially true in Texas. Some 300,000 Mexican workers were brought in last year and about 122,000 of those were employed in Texas.

Perhaps not most of them, but a large percentage of what we call domestic American migrants are displaced Texans. One can imagine a displaced Texan.

Mr. ENGLE. California is full of them.

Mr. McCARTHY. California is full of displaced Texans. What is set up is a kind of chain reaction. When a Mexican laborer is brought into this country, he may displace a Texan, and he in turn goes on up through the various routes that migratory workers follow.

Mr. ENGLE. In California our farmers pay the Mexican bracero more, and it costs the California farmer more for the Mexican bracero than it costs him for the domestic laborer. What the Senator is proposing in his amendment—and this is what puzzles me—is the payment to the bracero of 90 percent of the State average for State farm labor.

It seems to me as though the Senator from Minnesota is backing downhill.

Mr. McCARTHY. If there are people who are backing down, the Californians should back down and pay what is paid in Texas. However, because of a combination of forces, they are not able to back down.

Mr. ENGLE. I suppose that if I am for the braceros I should be opposed to the amendment of the Senator from Minnesota. If I am for the farmer, I should vote for the amendment. Is that correct?

Mr. McCARTHY. I do not think that is right. I think the Senator must take a stand so far as either the braceros or the growers in California are concerned.

I am sure that the Senator's humanitarian concern reaches beyond the borders of California. If the Senator is concerned about the braceros and also the domestic agricultural workers in the State of Texas, in the State of Arkansas, and in two or three other States adjoining California, he probably should support my amendment.

If the Senator wishes me to appeal to him on a selfish basis, I suppose I should say that he should be for the amendment, so as to force up wages paid to workers in Texas, some of whom are used to produce crops which compete with the crops produced in California, where relatively decent wages are paid—that is, relative to what is paid in this particular area of Texas. Producers in California may compete to some degree with the crops produced in Arkansas Some cotton is produced in California, is it not?

Mr. ENGLE. A very good quality.

Mr. McCARTHY. I could argue in terms of the Senator representing his State and, in doing so, eliminating unfair competition. On that basis the Senator from California should support my amendment.

I have stated two arguments, one of which is a selfish argument and the other an unselfish argument; one argument is humanitarian, the other more selfish.

Mr. ENGLE. Do I come out with an answer?

Mr. McCARTHY. Yes; the Senator from California can come out in favor of the amendment.

Mr. ENGLE. I thank the Senator. He has made a persuasive presentation.

Mr. COOPER. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield.

Mr. COOPER. I shall not argue the humanitarian objectives of the bill, but I should like to ask a question. Am I correct in my understanding that at the present time farm laborers are exempted from the application of the Wage and Hour Act?

Mr. McCARTHY. Domestic farm labor is exempt. Mexican nationals brought in under Public Law 78 are protected by a 50-cents-an-hour minimum wage under the agreement with Mexico.

Mr. COOPER. But under the Minimum Wage Act, all foreign labor is exempt. Agricultural workers are exempt.

Mr. McCARTHY. The Senator is correct.

Mr. COOPER. The amendment of the Senator from Minnesota would enable the Secretary of Labor to fix wages.

Mr. McCARTHY. It would enable him to fix the floor of wages for Mexicans, but no one else. It would not apply to Americans.

Mr. COOPER. The amendment would enable the Secretary of Labor to fix wages for agricultural workers employed in the United States.

Mr. McCARTHY. Yes, but not for Americans. We would not give him that privilege. In the long run it may be determined that standards that are good for Mexicans may be considered to be good standards for Americans also, but we have not yet reached that point.

Mr. COOPER. The Secretary of Labor does not have such power at present.

Mr. McCARTHY. The minimum wage rate for Mexicans is now established at 50 cents an hour. The Secretary cannot change the rate of 50 cents an hour. He cannot reduce it.

Mr. COOPER. My friend is saying that the Secretary of Labor has no authority today to fix wages for agricultural workers.

Mr. McCARTHY. The Senator is correct. He has the authority to decide whether or not farmers are paying prevailing wages, and whether, on that basis, such farmers may hire Mexicans. He cannot lower the 50-cent wage rate paid to Mexican nationals.

Mr. COOPER. I do not deny the humanitarian objectives of the Senator from Minnesota in supporting his amendment, but I oppose the amendment and all such provisions because I oppose the power of the Secretary of Labor to enter into the field of fixing wages for agricultural workers. If the wages of agricultural workers are to be fixed, I suggest that the question be decided by the Committee on Labor and Public Welfare, and let the wages be brought under the Minimum Wage Act.

Mr. ENGLE. Mr. President, will the Senator yield for a question?

Mr. McCARTHY. I yield.

Mr. ENGLE. Is it not a fact that when the State Department has an opportunity to negotiate agreements such as are now negotiated, in which wages are fixed, in effect we have given him, rather than the Secretary of Labor, the power to fix wages? Are not labor standards fixed through negotiations by the Secretary of State rather than the Secretary of Labor?

If we are entering into a program on the basis that we believe minimum wages should be established for agricultural labor—and the bracero program does so—Senators should oppose the amendment. The Senate ought to vote against the whole program now and forever. Any time the Secretary of State can negotiate a wage agreement, he fixes the wage. Any time a bracero is paid a particular wage, as he is in the State of California, that fact has a tendency to fix agricultural wages. There is no question about it.

The argument is made that domestics may not be paid less than Mexicans are paid.

In California we do not do so. It is the fringe benefits—the cost of the transportation, the bonding, and all the other costs that are incident to the Mexican program that make it more expensive for farmers.

Relative to what my good friend from Kentucky has said, I think I would prefer to have the Secretary of Labor, rather than the Secretary of State, fix the wage rates for braceros if anyone were to fix the rate. But I wish to make clear that I do not believe wages should be fixed in this country by any executive officer.

Mr. McCARTHY. What I am about to say does not apply to what the Senator from Kentucky has said, but it has been somewhat difficult for me to understand Senators who support this project, which I believe involves—I shall not say exploitation—but at least the employment of imported workers at wages which are lower than the average wages paid to American workers. When we move from the field of agriculture to the field of industry and talk about tariffs, quotas, and keeping out unfair competition, one argument among many is always raised that foreign producers do not pay their workers enough.

What is the difference in principle between bringing in finished goods which have been produced through labor which has not been properly paid and bringing in workers, paying them improperly, and then throwing the same product into competition with other products produced for which adequate wages have been paid?

I fail to see the distinction. I am against unfair competition from goods which are produced abroad by labor which is inadequately paid, and I am opposed to bringing in farmworkers who are paid depressed wages—wages below the average which is paid in this country—employing them in competition in this case with approximately 500,000 domestic migratory workers.

In the hearings, cases involving cucumber producers were cited. Pickle manufacturers came in with tears in their eyes and explained to us how they had tried to bring unemployed workers from Detroit into the cucumber-producing area. The explanation was that a producer brought a man up into the cucumber-producing country. He worked for 10 hours. When he had finished, he had earned very little. He quit and returned to Detroit.

It was said, "This proves he did not want to work."

It proved he did not want to work for comparatively low wages, but that is different from proving that he would not work if he were paid an adequate wage.

This witness was an expert. I did not know that anyone in America knew as much about cucumbers and pickles as did that man.

Mr. HART. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield.

Mr. HART. In fairness, the witness was a Michigan cucumber raiser, and in America no one else knows as much about the cucumber as does a Michigan producer—and properly so. We produce the best.

Mr. McCARTHY. How many varieties are there? Fifty-six? I thought there were some varieties that were not represented at the hearings.

Mr. JORDAN. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield.

Mr. JORDAN. I heard the testimony of the cucumber growers from the State of Michigan. As the testimony in the hearings will indicate, the farmer who hired braceros to pick cucumbers furnished the land, planted the crop, furnished the fertilizer, then gave the

braceros or the domestic workers one-half of the price he received for the cucumbers for picking them. That is a pretty fair price. The testimony was that they made considerably more than a dollar an hour. When a man gives anyone half of the price of the crop to pick it, the worker is doing pretty well, I think.

Mr. McCARTHY. It depends on what the crop amounts to. Fifty percent of nothing is not very much.

Mr. JORDAN. Producers do not plant pickles for fun.

Mr. McCARTHY. No; they do not plant pickles for fun, but they seem to think that picking cucumbers is great exercise. I should say that this man, after all, did not know everything about cucumbers. I was somewhat reassured when he could not tell me what the per capita consumption of cucumbers was. He said he did not know. He did tell us about what sensitive work it is to pick cucumbers. He told us about how delicate the vines are, and how it is necessary to pick up the vine very gently and to pick off the small cucumbers without bruising them; then let the vine down; then come back the next day and pick up the vine gently again to see whether any little cucumbers may have grown a little bigger.

At one point I suggested to him that perhaps the only people who could be trusted to do this kind of work, would be the celloist or the first violin of the Detroit Symphony, because it was necessary to have such a fine touch, such a sensitive hand, to be successful at this business of picking cucumbers. After he told me all about the work involved in picking cucumbers I was inclined to think that this was the kind of work that ought to bring a man $4 or $5 an hour, because it is really specialized work, and requires the hand of a truly rare genius to handle cucumber vines properly to—I was about to say to pick a pickle—to pick a cucumber.

Low or inadequate wages are not justified in order to provide the American people with a supply of pickles. This involves a crop that is not really a necessity, it is also true to a certain extent of other crops.

Mr. JORDAN. When the Senator gets away from cucumbers, I hope he will not forget that in California, Oregon, Washington, and other States other crops are grown in connection with which Mexican workers are also employed. The bill does not deal exclusively with cucumbers. Other producers are also involved.

Mr. McCARTHY. The Senator is quite correct. But in many cases they are used in the production of crops which are really not necessities. Perhaps I have used an extreme example in order to make my case. I should like to follow through a little further on the nature of the competition.

It has been said that the effect of this amendment is to set a minimum wage for agricultural workers, something the Congress has never legislated. This, I believe, is a misunderstanding of the language of the amendment. The amendment simply states what must be paid to Mexican workers before they can be contracted for work in this country. I believe that Senators who come from industrial States, who have constituents who work in factories, in steel mills, in textiles, would be concerned if several hundred thousand foreign workers were brought in to work in these industries. If there were a shortage of labor they would undoubtedly favor such a program. But I believe they would also be most careful to make certain that such workers were not brought in to work for 50 cents or 75 cents or even a dollar an hour.

This is not a minimum wage. It is rather a standard to indicate to the Department and to the growers the minimum which must be paid to citizens of another nation before they are added to our domestic labor force. This is a perfectly reasonable condition.

A minimum wage lays down a uniform level of hourly rates. It applies to all the employers in the same category. It guarantees the uniform rate to all the workers in that category.

My amendment does none of these things. It does not lay down a uniform rate, but one which can vary from State to State and year to year, depending upon economic conditions and trends in the particular State.

It does not apply to all employers of farm labor. In fact, it does not apply to any of them. Rather, it is simply the condition for the use of the offices of the U.S. Government to secure workers from another country. No farm operator who does not use Mexican nationals is required to pay any wage as a result of this amendment—and thus at the start over 98 percent of the American farms are excluded from direct effect by the amendment.

It does not apply to all migratory workers or to all farmworkers. It does not apply to any domestic worker who is employed by a grower who uses only domestic labor.

Of course, the amendment is intended to have some indirect effect on the farm labor market. If it were without indirect effect, there would be little purpose in it. It is intended to set a sufficiently high standard so that growers will be motivated to attempt some recruitment of domestic workers. It will have the effect of encouraging growers to offer more attractive conditions to domestic workers, unless, of course, there is no shortage, and in that case, growers may continue to secure domestic workers for 30, 40, and 50 cents per hour without any effect whatsoever from this amendment.

Mr. President, it should be clear that this is a moderate amendment. Where there is a shortage, growers will be able to secure Mexican nationals as before. In fact, it will clarify the program and remove the source of disagreement and litigation which has clouded the operation of this program and which has aroused a great number of religious and civic groups to oppose it.

Mr. President, I believe that few would deny that the unhappy conditions of work and living of migratory workers make a special claim on our conscience. This amendment will not solve all their problems or perhaps even their most serious ones, but it is a modest step in the proper direction.

I think this is a reasonable and fair proposal. I hope this minimum improvement in the farm labor program will be adopted by the Senate.

Mr. WILLIAMS of New Jersey. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield.

Mr. WILLIAMS of New Jersey. Mr. President, I wish to express my strongest support of the amendment to H.R. 2010, proposed by the most able junior Senator from Minnesota. The Senator's amendment is a wisely conceived, equitable means of enabling farm employers to continue using Mexican citizens as farmworkers, while simultaneously preventing the use of such workers from lowering the wages and damaging the job opportunities of our own farmworkers.

I should like to emphasize that the amendment does not curtail the use of Mexican workers where there is a bona fide farm shortage. It merely draws a line—a most reasonable line, in my judgment—beyond which the use of Mexican workers will not be allowed to do damage to the American economy.

In our consideration of this matter, there is no need for an extensive elaboration of the workings of a free competitive labor market. We all know that a labor shortage causes an upward wage adjustment in a free labor market. Unfortunately, the operation of this basic economic principle has been stultified by the importation of large numbers of Mexican workers for U.S. farmwork. This has come about because Public Law 78 does not contain sufficient safeguards to prevent the use of Mexican workers from adversely affecting the wages and job opportunities of American workers.

Senator McCARTHY's amendment offers a constructive means of correcting the wage part of this problem. The amendment would affect only those areas where the use of braceros has caused wages of American workers to stagnate or decline. Its practical effect would be that, in these areas, before braceros could be made available, there must be a showing that employers have offered to them a wage rate equal to 90 percent of the State or National farm wage rate, whichever is lower.

This is a most reasonable proposal, Mr. President, for it is designed to restore free enterprise principles to our farm labor market without imposing an undue burden on employers of bracero workers. Affected employers are not even required to offer wages equal to those offered by other farmers in their same State. It does not require them to offer wages equal to those offered by other farmers throughout the Nation. It only requires them to pay 90 percent of the average farm wage rate of their State or 90 percent of the national average—whichever is lower.

The amendment would not have any affect at all on the approximately 3.7 million American farmers who would not use Mexican workers. It would affect only those less than 50,000 farms that do request Mexican workers.

Even for these 50,000 employers the proposed amendment would not make mandatory the payment of any specific wage. Employers always have the alternative of doing without Mexican labor; large farm employers who follow this course are to be found in even the areas in which Mexican workers are most highly predominant.

No one will deny, I am sure, the necessity of preventing foreign workers from undercutting wages of American citizens. Let us look then at the evidence on this question: it shows that the wages of American workers are in fact being undercut by Public Law 78.

U.S. Department of Labor wage rate data for 1960 clearly demonstrate that damage has occurred to wages of American farmworkers. These data, covering the same State and the same work performed by Mexican nationals, show that the most common hourly wage rate paid American workers was about an average of 21 cents lower than the average hourly farm wage rate for the whole State. Piece rates in these States were also generally lower.

The national wage-rate decline of 10 percent in cotton harvesting since 1952 is even more significant—for more braceros are used during cotton harvesting season than in any other crop. At the height of the season in October of 1960, for example, more than 40 percent of all Mexican nationals employed in the United States were employed in this crop.

Viewed in its local context the low wages of American workers in heavy bracero-using areas becomes even more apparent. Surveys in some of these areas in Arkansas in 1960 and 1961 disclosed that American farmworkers were being paid rates between 30 and 40 cents an hour. These rates compare with that State's own average hourly rate of 73 cents for farmwork in 1960.

This comparison, it should be emphasized, is not between a low State average and a high national average. The comparison is between a low rate paid an American worker in a particular county in Arkansas with the average rate for all farm workers in that State.

A comparable situation exists in the Rio Grande Valley of Texas. Wages of 40, 45 and 50 cents an hour for American farm workers were found to prevail extensively while the State average hourly farm rate stood at 78 cents an hour last year.

The decline in wage rates of the American migratory farm worker provides another valuable yardstick in measuring the harmful effect of Public Law 78. U.S. Census Bureau and Department of Agriculture data, during the period generally parallel to the bracero program, 1952–59, show a marked decline in the daily earning of our migratory workers. These daily earning figures, which include both hourly and piece rates, show a decline from $6.90 a day in 1952 to $6 in 1959. The full data for this period are:

Year:	*Daily earning figures*
1952	$6.90
1954	6.40
1956	8.05
1957	6.45
1959	6.00

Coupled with Public Law 78's adverse effect on wages is the serious unemployment and underemployment problem in this country today, particularly in rural areas.

The extent of unemployment is considerably greater among farmworkers than among other workers in the labor force. During 1960, the average annual rate of unemployment for farmworkers was 8 percent. This compares with an average of 5.6 percent for nonagricultural workers. During the first quarter of 1960, when seasonal farmwork was at its low point, the rate of unemployment among farmworkers was 14.1 percent. Even in the third quarter of the year, when farm employment was at its peak, the unemployment rate for farmworkers was higher than the rate for other workers.

Underemployment, like unemployment, also affects farmworkers more seriously than it does nonfarmworkers. In 1960, for example, the monthly average of unemployed farmworkers stood at 11.5 percent. The comparable figure for nonfarmworkers was a low of 4.6 percent.

In view of these high rates of rural unemployment and underemployment, it seems clear that many jobs now filled by braceros could be performed by domestic farmworkers. In fact, studies indicate that some of this unemployment and underemployment is directly related to the bracero program. A 1959 USDA survey of southern Texas migrant farmworkers revealed that these migrants worked an average of 131 days during 1956 and were unemployed for 70 days. Male heads of households worked an average of 174 days and were unemployed for 89 days.

I would add here that there is good reason to believe that many of these Texas workers join the migrant stream northward, because of the importation of Mexican workers into areas that would normally be their year-round homes. When this occurs, there is real damage to their wages and job opportunities; they have no choice but to move away from their home area to search for work.

It has been said by some opponents of reform of Public Law 78, that domestic workers will not accept the bracero type jobs no matter what is done to improve their working conditions. The point seems to be that American farm workers will not perform stoop labor. This is contrary to the facts. More foreign workers are used in the cotton harvest, involving primarily stoop labor, than in any other crop in this country. Yet about four-fifths of the entire peak seasonal labor force in this activity is comprised of domestic workers.

Domestic workers account for approximately 64 percent—64,200—of all the workers employed at the peak of the tomato harvest, the second largest crop in which foreign workers are used. Even in Texas, California, Arkansas, and Arizona, domestic workers constitute the majority of the peak farm labor force—during the same time, in the same States, in the same areas and in the same work, as braceros.

We know also that innumerable American workers are employed in a variety of difficult and unpleasant jobs, such as the stoop farm labor already mentioned; mining, a most hazardous occupation; operation of garbage trucks, sewer maintenance, cesspool workers, and many others.

Where reasonable wages and working conditions prevail, domestic workers are often available in sufficient numbers for stoop labor, as well as other activities. For example, the States of Idaho, Ohio, Oklahoma, Oregon, and Washington hire virtually no foreign workers. But all of these States have substantial stoop labor requirements and pay the national average wage rate of 97 cents or above.

Ohio had a peak employment figure of 28,320 domestic workers in August 1960, of which more than 12,000 were employed in harvest activities involving stoop labor. Ohio paid an average farm wage rate of $1.08 last year.

Oklahoma paid an average of 97 cents an hour, and had almost 29,000 domestic workers involved in stoop labor harvest activities, with a peak of 34,875 in farm work for the State in October 1960.

Direct evidence on this point was reported by the Sunday New York Times of July 16, 1961. The Times article noted that Robert E. Brewington, an Arkansas cottongrower in a heavy bracero-using area, stopped using Mexicans 2 years ago. Mr. Brewington said that with adequate supervision domestic crews performed well and that "I can always get enough day-haul labor any time I need it."

We must use our domestic rural manpower; we must offer employment opportunities to these people. We cannot hope to do so by allowing the situation under Public Law 78 as it exists now to continue. We should accept this amendment, or we should not extend the Mexican labor program.

Many knowledgeable people concerned with this problem have strongly urged reform in this area; some have, in fact, urged repeal of Public Law 78. The Department of Labor, the administrators of Public Law 78, believe reform of the program is essential, and the present administration is backing them fully in this position.

Is it not true that the administration has indicated, through the Secretary of Labor, that the Senator has support from that source for his amendment?

Mr. McCARTHY. That is true. The administration has indicated support for my amendment. It recommended a somewhat broader amendment than the one I am proposing. My amendment is somewhat reduced, really, in its effect and in its extent as compared with what the administration originally proposed.

Mr. WILLIAMS of New Jersey. While it is true that the amendment has application primarily to the braceros coming into the country, would it effect an improvement in the wage situation for our domestic migratory workers?

Mr. McCARTHY. I would hope that it might have at least an indirect effect in that direction. If the lowest wage paid to a Mexican migratory worker were raised from 50 or 60 cents to 75 cents, it might move the employer to search a

little harder for an American farmworker who might be available at a little higher wage.

Mr. WILLIAMS of New Jersey. I believe I heard the Senator say that where Mexicans were used, their wage frequently became the ceiling for all wages in the area.

Mr. McCARTHY. Yes, for similar work in the area.

Mr. WILLIAMS of New Jersey. I thank the Senator.

Mr. CASE of New Jersey. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield.

Mr. CASE of New Jersey. Mr. President, H.R. 2010 is clearly inadequate as a solution to the problem of preventing the competition of Mexican bracero labor from disastrously undercutting wage standards and employment conditions of seasonal farm labor in the United States.

When Public Law 78 was enacted in 1951 for the regulation of Mexican farm labor in this country, it was designed to provide a means of replacing the large numbers of domestic farm workers who were drafted during the Korean conflict. The law provided for minimal wage and housing standards for bracero labor, and at the same time created U.S. Government machinery for the transportation and placement of this labor. The measure was not intended to create a permanent pool of inexpensive Mexican labor to the detriment of American workers, but was rather a temporary measure to fill the gap caused by the increased draft.

The Korean conflict is long since over, the domestic farm labor force has regained its former proportions, the farm labor shortage is all but non-existent, the Nation is in a period of unusually high unemployment, yet Mexican labor is still widely used at wage levels which are economically impossible for most American workers. Because of the low level of the Mexican economy in relation to that of the United States, Mexican farm labor accepts wages which are substandard for American workers. In fairness to both Mexican and American farm labor, the law must be changed.

H.R. 2010, I repeat, is inadequate to the problem. The amendment to that bill which Senator McCARTHY has proposed would go a considerable way toward alleviating the situation. His amendment was originally included in S. 1945, which I sponsored with him. If incorporated in the bill now before the Senate, the proposed amendment would accomplish two highly worthwhile objectives: First, it would require that bracero labor receive payment at a rate approximately equivalent to prevailing domestic wages, and second, it would thus enable domestic American farm labor to compete on more even terms with Mexican migratory labor.

With unemployment at an unconscionably high level nationally, and American domestic farm labor afflicted with chronic unemployment and underemployment, I believe we have no alternative but to adopt this amendment.

Of course the McCarthy amendment, important as it is, deals with but one facet of the complex problem of migrant labor in this country. Recently the Senate approved legislation providing for improved health services and educational opportunities for migrant workers and their families and for the registration of employers of migrant workers. There is much more to be done, and no single measure will solve the entire problem. But the McCarthy amendment would be a real forward step. I urge its adoption by the Senate.

Mr. HART. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield.

Mr. HART. As was the case in the discussions in the Committee on Agriculture and Forestry, I am delighted to support the position and the amendment proposed by the Senator from Minnesota.

This I do not do lightly, because, as has already been indicated, it is my privilege to represent, in part, a State which is a very large user of migrant and foreign labor. Certainly it is a source of labor supply which is essential to the Michigan farm economy.

Last year, at the peak, more than 11,000 Mexican nationals were employed on Michigan farms. At the same time, more than 66,000 domestic seasonal workers were employed on Michigan farms. These included many migratory workers from as far distant as Texas.

My study of the labor situation in Michigan agriculture and the sum total of the advice which I have been able to obtain from informed experts within the State persuade me that the Mexican labor program should be continued, and I support its continuance. However, I am gratified that the administration and the Secretary of Labor support the continuation of this program at this time.

Nevertheless, as I did in committee, and do now, I strongly support the attempt of the distinguished Senator from Minnesota and other Senators to obtain significant amendments to the bill reported by the Committee on Agriculture and Forestry. I note for the RECORD two reasons for so doing.

First, I support the amendment to establish wage standards for Mexican labor because it is right that such standards be incorporated in the law. I am aware of the fact, as are other Senators, that a decrease in the supply of labor, other things being equal, would create a rise in the wage level. We are also aware that an increase in the supply of labor, other things being equal, would result in downward pressure on wage rates. It is clear to me that the Mexican labor supply made available by Public Law 78 constitutes the type of increase in labor supply which exerts a downward pressure on wage rates. Thus I understand and agree with the administration's contention that the Mexican labor program has in fact produced an adverse effect upon the wages of U.S. farmworkers; and I believe it only proper that the continuation of this law be premised upon wage standards which will substantially prevent the depressing effect that has occurred in the past.

Certainly I see nothing unreasonable in requiring that the farmer who desires Mexican labor should pay them average wages. The average hourly wage in Michigan as published by the U.S. Department of Agriculture was $1.07 in 1960. However, the national average in this same year was only 97 cents, and 90 percent of that level—which is the target established by the McCarthy amendment—would amount to only 87 cents. This would be the lowest wage which Michigan farmers could pay Mexican nationals if the McCarthy amendment is accepted. I believe that this is a moderate—perhaps even excessively moderate—wage standard for such a foreign worker program, and I believe that Michigan agriculture and the representatives of the agriculture of most other States in the Nation will agree.

As I have said, I support this principle because I believe it is justified and morally right. I wish to make clear, however, that I also support the amendment because I believe that its passage is essential to preserving the Mexican labor program. It has now been well documented that the availability of Mexican labor has been very harmful to U.S. workers, in some parts of the country through the 10 years in which this program has been in existence. It has been documented that in many areas the wages offered to our own farmworkers have been frozen at ridiculously low levels, 35 to 50 cents per hour, through operation of the Mexican labor program.

This is but one of numerous evidences that the Mexican labor program is verging on a scandal in some parts of the country. This is becoming widely recognized among the influential, opinion-setting groups of the population. I am convinced that any failure to correct these evil results which flow from the Mexican labor program will lead to the complete elimination of this program. This I would think unfortunate and I suggest to the Senate that the substantial reform which would make the extension of this program tolerable to its responsible and respected critics is the way to preserve the Mexican labor program.

This has been recognized also by the administration in its recommendation that the program be extended if, and only if, it can be corrected to avoid the serious defects found in it.

The agricultural industry, it seems to me, has a special interest in bringing itself into conformity with labor standards that are found acceptable by other elements in our society. Agriculture, with its special economic problems, has been particularly dependent upon the assistance of other elements of the population in working out the legislative remedies for overproduction and price problems. The elected representatives of all elements of the population have been aware of agriculture's needs and have reacted affirmatively to those needs through support of a great body of legislation. However, the fact that the elected representatives of urban and industrial areas have in fact taken this view consistently through the last 25–30 years does not mean that this cooperation is automatically assured. The representatives of urban and industrial constituencies are particularly aware of the need to protect and preserve and develop proper labor standards, and to wipe out exploitation of working men whatever their national origin. I believe that leadership of the farm community is

coming to realize that it cannot on the one hand close its eyes to the pressing need for improved labor standards in agriculture while on the other hand continuing to receive the unstinting support of the representatives of nonagricultural interests.

In summary, I call for support of the amendment of the Senator from Minnesota in the interest of common decency, in the interest of cutting out the cancer that can and will destroy the Mexican labor program if we permit its continuance, and in the interest of preserving wide support including the support of urban representatives in the continuation of enlightened farm support programs.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD a summary of Mexican labor as it affects Michigan agriculture, prepared by the Department of Labor.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

MICHIGAN

MEXICAN-WORKER EMPLOYMENT

At the peak of 1960 there were 11,151 Mexican nationals employed in Michigan. They were used in all but two of the nine agricultural reporting areas of the State, with the largest concentration in the four central areas.

At the peak of Mexican employment (August 15), 66,546 domestic seasonal workers were employed in all agricultural activities in the State, and 17,426 were employed in the same areas and activities as Mexicans. These included many migratory workers from Texas.

ACTIVITIES AND EMPLOYERS OF MEXICAN NATIONALS

Most of the Mexicans were used in the cucumber harvest, while smaller numbers were employed in a variety of activities including the harvest of tree fruit, miscellaneous vegetables, and the cultivation of sugarbeets.

Mexican workers were employed on 3,921 individual farms in 1959, 3.5 percent of the 111,817 farms in the State according to 1959 Census of Agriculture.

WAGE DATA

Approximiately 80 percent of the Mexican nationals work in the cucumber harvest where their pay is based on a special piecerate formula. A Department of Labor survey of Mexican earnings in 1960 found the average hourly equivalent of these piece rates to be 87 cents per hour. In other crop activities where small numbers of Mexican workers were employed in 1960, the most common hourly wage rates paid were 85 cents and $1.

The U.S. Department of Agriculture average hourly farm wage without room or board in 1960 was $1.07 in Michigan, and 97 cents nationally.

EFFECT ON PROPOSED LEGISLATION

In picking cucumbers, where most of the Mexican nationals are used, the principal effect of the proposed legislation on piecerates paid would be an adjustment yielding an increase in earnings of 10 cents per hour the first year, and none in the year following.

In other crop activities, employers paying $1 per hour would not be required to increase the hourly rate since it exceeds the national average hourly wage. Growers paying 85 cents per hour would be required to increase the hourly wage 10 cents per hour the first year and 2 cents the year following.

EFFECT ON FARMERS GENERALLY

As commercial producers of vegetable and fruit crops, many Michigan growers are affected indirectly by the conditions under which braceros are used in other States. These Mexican workers comprise about 25 percent of the Nation's peak hired work force in vegetable harvesting, and around 10 percent in fruit production. The additional production and marketings made possible by these additional workers undoubtedly exerts downward pressure on the prices received by other fruit and vegetable producers.

Mr. HART. Mr. President, I also ask unanimous consent to have printed at this point in the RECORD a list of individuals and organizations which have expressed in letter form, to me, their support of the amendment offered by the Senator from Minnesota, which is now pending.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

Department of Christian Social Relations, Maryland Council of Churches.
Young Christian Workers Movement of the United States.
Department of Rural Education, National Education Association.
United Papermakers and Paperworkers, AFL–CIO.
American Veterans Committee.
League of Catholic Women, Gratiot County, Mich.
Michigan Migrant Ministry, Division of Home Missions, National Council of the Churches of Christ.
Young Women's Christian Association of San Antonio, Tex.
National Board of the Young Women's Christian Association.
Amalgamated Meat Cutters and Butcher Workmen, AFL–CIO.
National Consumers League.
National Farmers Union.
National Sharecroppers Fund, Inc.
Bishops' Committee for Migrant Workers.
Workers Defense League.
Michigan Farmers Union.
American GI Forum of New Mexico.
Woman's Division of Christian Service, Board of Missions, the Methodist Church.
Commission on Christian Social Action, Evangelical United Brethren Church.
League of Catholic Women, Saginaw County, Mich.
United Church Woman of Michigan.
Bishops' Committee for the Spanish Speaking.
Spanish Catholic Action, Archdiocese of New York.
Council of Catholic Women, Saginaw Diocese, Michigan.
American GI Forum of the United States.

Mr. KUCHEL. Mr. President, will the Senator yield for a question at this point?

Mr. McCARTHY. I wish to make an observation before yielding to the Senator from California.

I may say to the Senator from Michigan that I did not intend to single out Michigan for any special attention. It so happens that the witnesses were from Michigan; and on the record, Michigan employers have done relatively well in this field. They have been paying Mexican nationals about 87 cents an hour, which is what they would be required to pay them if my amendment were adopted.

I now yield to the Senator from California.

Mr. KUCHEL. Is it not true that under the law the State government must first determine that there is insufficient domestic labor available to harvest the crops before any Mexican nationals may be made available for temporary assistance to the farmers of such a State?

Mr. McCARTHY. So far as I know, the determination is made by the Secretary of Labor, not by the State.

Mr. JORDAN. That is correct.

Mr. KUCHEL. Does not the Secretary of Labor consult with the State government before making such a determination?

Mr. McCARTHY. I do not know that he is required to do so. I assume he probably does, because one of the determinations which must be made is the existence of a shortage of domestic labor which can perform this work and which is willing, able, and available. So I assume he would have to consult with State employment officials.

Mr. KUCHEL. Is it not a fact that that is precisely what the Secretaries of Labor under Democratic administrations and under Republican administrations have done?

Mr. McCARTHY. I assume they have.

Mr. HART. Mr. President, will the Senator from Minnesota yield for a question with respect to the statement of the Senator from California.

Mr. McCARTHY. I yield.

Mr. HART. I think the key point is the realization that if the obligation with respect to wages is such that the offer to domestic laborers is too low to attract responsible domestic labor, the gate is open for the Mexican. The purpose of the McCarthy amendment is to insure an offering sufficiently high to attract domestic labor which is responsible, if it seeks this opportunity; and then, and only then, will the Secretary permit the machinery of the Immigration Service to bring in Mexican labor.

Mr. McCARTHY. The Senator from Michigan is quite correct. The changes which I am proposing, as well as some of those which we are not offering, were recommended by Mr. Mitchell, Secretary of Labor in the previous administration, and are again recommended by Mr. Goldberg, the Secretary of Labor in this administration, the argument being that some standard such as this is necessary to administer the program effectively.

Mr. JORDAN. Mr. President, will the Senator from Minnesota yield?

Mr. McCARTHY. I yield.

Mr. JORDAN. In answer to the question just propounded by the junior Senator from Michigan, the very thing which he says would permit the Secretary of Labor to fix the wages of a domestic worker would be the same as if he carried out the very policy which the Senator has discussed.

Mr. HART. I would have no qualm or resistance if that were the effect; but I think it is not the effect. It does not fix the domestic wage. It takes the domestic wage and provides that if the farmer wishes to use the immigration route to bring in labor in competition with American labor, he shall offer 90 percent of whatever the domestic wage is.

Mr. McCARTHY. That is the effect of my amendment.

Mr. JORDAN. If the Senator will read the report, he will find that before Mexican labor can be brought into this country at all, it is necessary to offer comparable wages. The bill provides that now.

Mr. HART. I think the Senator from Minnesota, in developing his opening argument in support of his amendment, has made the response which I shall adopt to the Senator's statement. In the judgment of those who signed the minority views, this is a delightful recital in the bill but does not seek an objective of the kind we seek.

Mr. JORDAN. The Secretary of Labor cannot certify Mexican labor until it has been determined that domestic labor cannot be obtained. That provision is in the law, and it has been in the law all the time. The bill spells it out again.

Mr. McCARTHY. The Senator is correct.

That is the point at issue. It is necessary to get domestic workers who are willing to work at the prevailing wages. Those wages are frequently so low that even when domestic labor is available, or when American workers are unemployed, they will not accept such wages. We are attempting by the amendment to obtain a standard which can be used by the Secretary of Labor in deciding whether to permit Mexicans to come into this country, and as a guide for an employer to decide whether he wishes to bring in Mexican workers.

Mr. JORDAN. The bill also provides that the employment of such workers shall not adversely affect the wages or working conditions of domestic agricultural workers employed in similar work. If bringing in Mexican workers would affect domestic migrant labor, the farmer may not bring in Mexicans.

Mr. McCARTHY. That is correct. The key words are "similar work." In Arkansas, where American workers are paid 30 cents an hour for similar work, bringing in Mexican workers could not possibly have an adverse effect upon the workers in Arkansas; it might have a good effect. It could not possibly adversely affect them, because they are getting 20 cents an hour less than would have to be paid Mexican nationals.

Using that standard would not have a depressing effect on their wages.

Mrs. NEUBERGER. Mr. President, will the Senator from Minnesota yield?

Mr. McCARTHY. I yield.

Mrs. NEUBERGER. The Senator from Minnesota has shown real concern for workers in the United States, both American and Mexican, and I congratulate him.

Mr. President, in dealing with the Mexican farm labor program, the question is, How temporary is "temporary"?

Often a temporary building carries a "temporary" designation even though it may be 40 or more years old. I think specifically of some of the governmental office buildings in Washington, D.C.

And sometimes a temporary piece of legislation, written during a time of crisis, is extended and reextended for many years. I hope we can stop this practice in one area.

I refer to the Mexican farm labor program.

When this bill, H.R. 2010, was reported from the Committee on Agriculture and Forestry with some minor amendments, five of us on the committee signed supplemental views. My able colleague from Minnesota [Mr. McCARTHY] has worked hard to point up the deficiencies in the existing law.

In our supplemental views we noted:

> Public Law 78 was enacted in 1951 at a time of labor shortage during the Korean conflict. It began as a temporary program, but it has been extended by Congress four times. During this period the farm labor force has declined, technological change in agriculture has continued at a rapid rate, and unemployment and underemployment have increased as rural problems. Yet at the same time the Mexican farm labor program has expanded greatly.

On page 8 of the report on the bill, table I shows that the total number of Mexican nationals contracted by year from 1951, when there were 192,000, to 1960, when there were 315,846, has increased by 123,846.

During this 10-year period the number of farm operators and unpaid family workers has decreased more than 2 million. At the same time the number of hired workers employed has decreased from 2,236,000 to 1,869,000. The loss is 367,000.

There is no labor shortage in our Nation, either in the vast cities of the East and Midwest or in towns or on farms. The purpose for enacting Public Law 78 has passed.

Out in my home State of Oregon there are fewer than 350 Mexican farm laborers. They help harvest our pear crop. They are paid $1.44 per hour.

The Department of Labor believes this hourly wage of $1.44 in Oregon is the highest received by Mexican farm laborers in this country. And I am thankful that in my State the wage scale is that high.

But this is not the case elsewhere. The Department of Labor estimates the national average wage is around 70 cents per hour. It can be less.

In our minority report on the bill we said:

> We do not believe that anyone can accurately establish the extent of the need for this program under the existing practices.

We do know that low wages paid Mexican nationals in turn depress the salary level for domestic workers. The Department of Labor may authorize the hiring of Mexican nationals when local workers cannot be obtained at the prevailing wage in the area for the type of work.

The Department of Labor has found that in some counties this year the hourly wage is 30 to 50 cents per hour.

If we apply the provisions of Public Law 78 there is no incentive for an employer to pay higher wages.

In my July newsletter to Oregonians, I asked:

> Is it an insult to our Mexican neighbors that they will do work which Americans won't do, or is it an insult to American farm workers that Mexicans are given working conditions and emoluments that they do not receive?

Under the treaty negotiated with Mexico, nationals from that country are assured adequate housing, transportation costs and health care and insurance. Farmworkers who are U.S. citizens do not receive equal treatment.

If we should vote to continue this program—as Senator McCARTHY has asked—we should amend H.R. 2010 so that it contains a provision limiting the use of Mexican nationals to employers who have made reasonable efforts to attract domestic workers at terms and conditions of employment reasonably comparable to those offered Mexican nationals. We should insist that the minimum wage paid imported and domestic migratory workers be 50 cents per hour or more.

And we should seriously consider amending legislation which will assist the Secretary of Labor in determining whether Mexican nationals should be certified. It is a responsibility of Congress that it should provide the Secretary of Labor with guidelines within which he can work.

The Washington Post editorial, "Peonage," which appeared in that newspaper August 24, 1961, had pertinent observations on Public Law 78. It says, in part:

> In its present form, the law is a depressant to the whole agricultural economy. The peonage it imposes ought not to be perpetuated.

Mr. President, I ask unanimous consent that the editorial be reprinted in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

PEONAGE

We hope that the Senate, under pressure for adjournment, will not join the House in extending Public Law 78 for another 2 years without amendments. This law, due to expire at the end of 1961, fixes the conditions under which several hundred thousand itinerant farmworkers from Mexico—braceros they are called—are allowed to cross the border and harvest crops in the western and southwestern States of this country.

Public Law 78 was a most useful statute when it was first adopted. It put a floor under the starvation wages which were then being paid to the desperate Mexican peons who were willing to work at any price. But that floor—50 cents an hour—has now become a ceiling for wages paid to American farmworkers in the same area. It is a wage ceiling which has the effect of condemning thousands of American farmworkers to peonage—to a condition of hopeless destitution for themselves and homeless ignorance for their children.

Public Law 78 needs to be brought up to date—by lifting that long outdated 50-cent minimum to a level, as Senator EUGENE McCARTHY has proposed, no less than the average farm wage in the State or in the Nation, whichever is the lesser. In its present form, the law is a depressant to the whole agricultural economy. The peonage it imposes ought not to be perpetuated.

Mr. McCARTHY. Mr. President, Public Law 78, of the 82d Congress, was enacted in 1951 as a temporary emergency measure, to ease the labor shortage which existed at the time of the

Korean conflict. But this law has been renewed four times since then; and now we are in the year 1961, 10 years later. Almost every time the question of renewal of the law has been under consideration, it has been argued that it would be well to extend it for only a few years more, and by the end of those few years the emergency would be over. However, 10 years have elapsed, during which time there has been no significant change—certainly no significant legislative change. The only change has been that the Mexican Government has suggested that unless certain concessions were made, it would cut off the flow of Mexican nationals into the United States; so, in a sense, the improvements have been dictated from Mexico, rather than on our part, and thus have taken into account chiefly the welfare of Mexican farmworkers, but not the welfare of American nationals who engage in this form of labor.

Mr. MUSKIE. Mr. President, will the Senator from Minnesota yield?

Mr. McCARTHY. I yield.

Mr. MUSKIE. It has been argued that the Senator's amendment in effect undertakes to establish a minimum wage for agricultural workers; that that has never been done in this country; and that if it is to be done, it should be done by means of an amendment to the minimum wage law, which should be referred to the Committee on Labor and Public Welfare and considered there as such.

Until I read House bill 2010, it seemed to me that that argument had some merit. But I ask the Senator from Minnesota whether, on the basis of the argument which has been made, he can distinguish between his amendment and the language of the bill we are considering, which itself, it seems to me, undertakes to establish a minimum wage.

Mr. McCARTHY. The difference is really one of procedure. The substance of my amendment is essentially the same as the substance of the language of the bill, except that it would be limited to employment in similar work, which would be used as a basis for establishing a standard. I propose that 90 percent of the average hourly wage paid for all agricultural workers in the State or the Nation be the standard used. But in terms of the question of principle which has been raised, the bill as reported by the committee is as much in violation of what has been described here a principle as is my amendment.

Mr. MUSKIE. In other words, Senators who oppose this amendment on the basis that it undertakes to establish a minimum wage for agricultural workers ought also to oppose the pending bill?

Mr. McCARTHY. Or at least section 505 of the Committee bill.

Mr. MUSKIE. Yes.

Mr. McCARTHY. The question is one of the method or procedure for determining what the wage shall be, rather than a difference in principle.

Mr. MUSKIE. I thank the Senator.

Mr. McCARTHY. I thank the Senator from Maine for making that point. Those who wish to act on the basis of principle in connection with matters of this kind should be able to act somewhat more freely, now that the Senator from Maine has clarified the point.

Mr. PROXMIRE. Mr. President, will the Senator from Minnesota yield?

Mr. McCARTHY. I yield.

Mr. PROXMIRE. Is it not true that the Secretary of Labor has testified that the experience of 10 years with the operation of this program—that is, the importation of hundreds of thousands of Mexican agricultural workers—shows that the program has adversely affected the wages, employment, opportunities, and working conditions of domestic migrant laborers?

Mr. McCARTHY. That is quite correct; that was the testimony of the Secretary of Labor.

Mr. PROXMIRE. So, on the basis of that testimony, it seems to me that insofar as the employment of American citizens is concerned, serious consideration might be given to a proposal to abolish this entire program.

If we attach great weight to the welfare of hundreds of thousands of persons, as to whom the documentation has been overwhelming—so much so, that the Columbia Broadcasting Co. has referred to this situation as a "Harvest of Shame"—it would be proper to abolish the whole program, unless it were substantially improved, would it not?

Mr. McCARTHY. The Senator from Wisconsin is quite correct.

The consultants appointed by President Eisenhower stated in their report:

> There is reason to believe that the real or presumed shortage of domestic agricultural labor could in large measure eventually be eliminated if more satisfactory wages and conditions of work were offered to domestic farmworkers and if the farm labor market operated on a more rational basis.

Mr. PROXMIRE. So it is conceivable—and perhaps, on the basis of simple economic principles, very likely—that if 300,000 Mexican nationals did not come into the United States to compete with domestic agricultural workers, the wages, working conditions, and certainly, the employment opportunities for American agricultural workers would significantly improve. Is not that true?

Mr. McCARTHY. That is entirely correct; and in this respect the point of view of the Senator from Wisconsin is shared by the Committee appointed by President Eisenhower, who said:

> However, the committee doubts whether it is possible to prevent adverse effect on our citizen agricultural work force by such use of imported workers until and unless the law provides the necessary enforceable authority to prevent adverse effect.

The committee stated that it was its opinion that such importations had had an adverse effect upon wages and general working conditions and opportunities for employment among domestic agricultural workers.

Mr. PROXMIRE. Is it not true that that position was also taken by Secretary of Labor Mitchell when he indicated, as I understand, that he would oppose extension of the law and the entire program unless substantial reforms were made, reforms similar to the very modest kind the Senator from Minnesota is calling for?

Mr. McCARTHY. That is correct. The quotations I have most recently submitted for the RECORD are from the list of recommendations of the committee of consultants to Secretary of Labor Mitchell. This committee of consultants included Mr. Glenn E. Garrett, Msgr. George G. Higgins, Mr. Edward J. Thye, and Dr. Rufus B. von Kleinsmid.

I ask unanimous consent to have the recommendations of the consultants printed at this point in the RECORD.

There being no objection, the recommendations were ordered to be printed in the RECORD, as follows:

EXTENSION OF MEXICAN FARM LABOR PROGRAM—RECOMMENDATIONS

(A review and discussion of the factual background led to the following recommendations. Six of these involve the law itself, and one relates to the procedures by which the law is administered.)

A. CONTINUATION OF PROGRAM

The Mexican farm labor program, administered under the terms of Public Law 78, has always been thought of as an emergency program designed to meet a temporary need for supplementary agricultural labor. Although the law was amended several times, its basic purpose was never changed. It is still intended to relieve temporary shortages of unskilled labor.

Do the original arguments in favor of the "Bracero" program still apply? In the judgment of the committee, it is impossible to give a definitive and unqualified answer to this question. On the one hand, it can be argued that all of the labor needs of American agriculture are not, and in the foreseeable future will not be available from domestic sources. On the other hand, it can be contended that the shortage of domestic agricultural labor does not constitute a real emergency, except in certain crops and areas and that, even in these specific cases, the shortage is not unavoidable. More specifically, there is reason to believe that the real or presumed shortage of domestic agricultural labor could in large measure eventually be eliminated if more satisfactory wages and conditions of work were offered to domestic farmworkers and if the farm labor market operated on a more rational basis.

Furthermore, the renewal of Public Law 78 without changes in 1961 would almost certainly tend to postpone the adoption of necessary reforms and would tend to increase rather than diminish the shortage of domestic farm labor.

The arguments for and against the renewal of Public Law 78 are not entirely conclusive. As a practical judgment, however, the committee has concluded that, on balance, the case in favor of renewing Public Law 78 on a temporary basis is more conclusive than the arguments against its renewal.

However, the committee doubts whether it is possible to prevent adverse effect on our citizen agricultural work force by such use of imported workers until and unless the law provides the necessary enforceable authority to prevent adverse effect. Part II of this report shows clearly the continuing problems in administering the law as presently written. In order to provide effective tools by which the Secretary of Labor may continue to authorize the orderly importation of Mexican nationals only where necessary and justified, the committee has incorporated in this part of the report its recommendations for changes in Public Law 78. The committee's support of a temporary renewal of Public Law 78 is conditioned on its being substantially amended so as to prevent adverse effect, insure utilization of the domestic work force, and limit the use of Mexicans to unskilled seasonal jobs.

To overcome the shortcomings of Public Law 78, several basic principles need to be established and incorporated into the legislation. This may be done in a preamble, or by means of amendments to specific sections of the law. These principles are included in the recommendations in items "B" through "F" listed below.

B. LIMITATIONS ON USE OF MEXICAN NATIONALS

The legislation should clearly confine the use of Mexicans to necessary crops in temporary labor shortage situations and to unskilled, nonmachine jobs. To accomplish this, the committee recommends that the law be amended to: (a) prohibit employment of Mexicans in specific occupations involving year-round employment such as ranch hands, general farmhands, and other types of nonseasonal employment; (b) prohibit employment of Mexicans in machine operations such as sorting and packing machines, tractors, irrigation equipment, etc.; and (c) delete present provision authorizing the Secretary of Agriculture to designate "necessary" crops on which Mexicans can be used, unless this provision can be clarified and implemented. To avoid undue hardship to growers who have been employing Mexicans in categories (a) and (b), provision might be made for a gradual termination of such employment over a 1-year period.

C. RECRUITMENT AND AVAILABILITY OF DOMESTIC LABOR

1. The law should authorize the Secretary of Labor to take such action as may be necessary to insure active competition for the available supply of domestic agricultural workers. The objective of the Secretary should be to reduce reliance on Mexican labor. Some ways in which this could be done include: (a) limit the ratio of Mexicans to domestic workers on individual farms, (b) and limit the number of Mexicans in any particular crop-area to a specific proportion based upon previous years' experience.

2. Sections 503(1) and 503(3) of Public Law 78, both of which relate to the availability of domestic labor, should be combined. The test of availability of domestic labor, which must be made before the use of foreign workers may be authorized, should be clarified and strengthened. The law should clearly stipulate that the primary responsibility for the recruitment of domestic workers rests with the employer himself. The law should direct the Secretary of Labor not to certify as to the unavailability of domestic labor unless: (a) Employers have undertaken positive and direct recruitment efforts in addition to the efforts of the public employment offices. Such efforts should be made sufficiently in advance of the need. They might include, but not be restricted to, publicizing needs, participation in dayhauls, providing adequate housing and transportation. (b) Employment conditions offered are equivalent to those provided by other employers in the area who successfully recruit and retain domestic workers; (c) domestic workers are provided benefits which are equivalent to those given Mexican nationals, i.e., transportation, housing, insurance, subsistence, employment guarantees, etc.; (d) employers of Mexican nationals offer and pay domestic workers in their employment, no less than the wage rate paid to Mexican labor.

D. ADVERSE EFFECT CRITERIA

The test of adverse effect on wages and employment, which, if threatened, precludes authorization of Mexican workers, should be more specific. The Secretary should be directed to establish specific criteria for judging adverse effect including but not limited to: (a) Failure of wages and earnings in activities and areas using Mexicans to advance with wage increases generally; (b) the relationship between Mexican employment trends and wage trends in areas using Mexican workers; (c) differences in wage and earning levels of workers on farms using Mexican labor compared with nonusers.

E. WAGES

The Secretary should be authorized to establish wages for Mexicans at no less than the prevailing domestic farm rate in the area or in the closest similar area for like work; and no less than a rate necessary to avoid adverse effect on domestic wage rates.

F. GENERAL RULE

While there is inherent authority to issue implementing regulations, Public Law 78 should be amended to include specifically a provision authorizing the Secretary to promulgate such rules and regulations as he deems necessary to effectuate the requirements of the law.

G. ADMINISTRATIVE PROCEDURE

Although many of the problems in connection with the Mexican farm labor program can be resolved only by changes in Public Law 78, there is much that can be done through administrative procedures.

1. It is believed that additional progress could be made if adequate staff resources were available so that the Secretary could make the fullest use of the authority he does have to evaluate carefully all requests for foreign labor. Emphasis should also be given to developing procedures and regulations which will avoid, to the greatest extent possible, adverse effect in their employment.

2. It is recognized that many facets of the Mexican importation program have been decentralized and that other parts of the program are administered through the affiliated State agencies and their local offices. While this undoubtedly results in economies, there is also a serious danger that local pressures and considerations may distort the original intent of the program. It is therefore suggested that sufficient controls and checks be developed to offset this possibility.

3. For more effective administration of the compliance aspects of the importation program, consideration should be given to the possibility of punitive action against violators which would be less severe than complete withdrawal of Mexicans. Failure to provide less severe penalties often results in no punitive action at all.

4. It is recommended that a tripartite advisory committee be established to advise the Secretary on the Mexican farm labor program. The committee should consist of representatives of management and labor in equal numbers and of public members.

In recommending changes in Public Law 78, and in the administration of the law, the committee is mindful that these proposed changes will not, of themselves, solve the long standing and complicated manpower problems of American agriculture and may not substantially improve the wages and working conditions of domestic farm labor. These recommendations should therefore be considered minimal in nature.

Mr. GLENN E. GARRETT,
Msgr. GEORGE G. HIGGINS,
Mr. EDWARD J. THYE,
Dr. RUFUS B. VON KLEINSMID,
Consultants to the Secretary.
Mr. WILLIAM MIRENGOFF,
Executive Secretary.

Mr. JORDAN. Mr. President, will the Senator from Minnesota yield?

Mr. McCARTHY. I yield.

Mr. JORDAN. I should like to point out to the Senator that any defect in this law can be charged back to the Secretary of Labor, because he cannot certify any Mexican worker until he has found that no domestic labor is available to do the work. So if he has certified that such Mexican labor is needed in order to do the work, the fault is his.

Mr. PROXMIRE. The answer is that no American agricultural labor is available if the wage offered to be paid is 35 cents an hour—which the record shows is the amount that is paid in Arkansas—and the same is true when any of the other very low wages are offered; and they are documented on page 8 of my supplemental views.

If people are to insist on paying wages this low, they are not going to find Americans able to work at such low wages. On the other hand, if working conditions are improved and wages are increased, the pool of persons who are willing to work will increase.

In the State of Wisconsin last year we employed more than 1,000 Mexican nationals, and we employ many others. I am convinced that if wages were higher in my State, many American farmworkers would be willing to work.

Mr. JORDAN. Mr. President, if the Senator will yield, so long as they are drawing as much in unemployment compensation or relief as they could make while working, they would rather do that than work for the money.

I should like to refer to a State which has the most braceros; namely, California. I think California is at the top of the list.

Mr. PROXMIRE. California and Texas.

Mr. JORDAN. California is just under Texas. According to the Secretary of Agriculture, the average rate in California for the braceros and domestics is $1.25 an hour. California is next to the top State in the use of braceros, and it now pays 10 cents higher than the minimum wage. So it is not a question of how much is paid to those persons; it is a question of how many are available to work.

North Carolina does not use any braceros, so there is nothing selfish about this.

Mr. McCARTHY. The cucumber growers of North Carolina manage without importing workers.

Mr. JORDAN. We are not large producers of cucumbers, but we have many small cucumber producers, and the total amounts to a fair-sized production. Domestic workers do that work.

Mr. PROXMIRE. The Senator from North Carolina is very fairminded, and he is an expert in this area.

It seems to me what the Senator from Minnesota is trying to do is provide a wage standard for the Secretary of Agriculture to apply which is a little higher; and, after all, it is very modest. It is still the fact that the average State or national wage for the farmworker is low. This is not a prohibitive level. This is the level that would be preferred by the Secretary of Labor who will administer the program? Is that correct?

Mr. McCARTHY. The Senator is correct. I wish to quote from the testimony of the Secretary of Labor, Mr. Goldberg, with regard to standards to be applied in determining what the wage rates should be. He said:

We now know, however, that the prevailing wage principle applied to a massive foreign worker program tends to prevent wages from rising. That this has actually oc-

curred over the last 8 years, to a serious extent in many areas, is now a matter of common knowledge.

The Secretary continued:

In areas where a large number of Mexicans are used, it is difficult to arrive at a valid method for determining the prevailing wage required to be paid Mexicans so as not to reflect merely the wage received by those workers from year to year.

Where there are only Mexicans, or a large percentage of the work force in similar work is made up of Mexican nationals there is no other base on which to determine what they should be paid.

I continue to quote:

The Department has made strenuous efforts during the last few years to avoid this. These efforts have not met with success. And in some areas the employers of Mexican labor have initiated wage increases designed to overcome adverse effects of the Mexican labor importation. Unfortunately, these have been in the minority.

In numerous other areas the wage rates in the specific activities in which Mexican workers are employed have remained static or even declined. To illustrate, Mexican nationals were employed in 1951, after Public Law 78 was enacted, at an hourly wage of 50 cents per hour in Arkansas, Missouri, Texas, and New Mexico. Ten years later, in 1960, this was still the rate normally paid braceros in most areas in these States. In the meantime, of course, the average wage rate for all hourly paid farmworkers in these States as well as in the Nation as a whole was increasing significantly.

Secretary Goldberg continued:

The availability of braceros at these static rates throughout this 10-year period has tended to place a ceiling upon the wage offered U.S. workers engaged in similar work in the areas where braceros are employed.

Secretary Goldberg went on to summarize the problem—which I think is of concern to us—of administrative difficulty, and asked that we clarify and establish workable standards:

In far too many areas employers have not, since the inception of this program, voluntarily introduced any wage increases and have vigorously opposed any efforts of the Department to give meaning and effect to the statutory responsibility of the Secretary not to make Mexican workers available under circumstances which would adversely affect the wages and working conditions of our own agricultural workers. We have found ourselves in endless litigation challenging the validity of the Department's policy and criteria to prevent such adverse effect even where the policies of the Department would require the payment of wages which would produce minimum earnings of 50 cents per hour.

In the light of this experience and in view of the unrelenting resistance to the Department's efforts to carry out its responsibilities under Public Law 78, we have concluded that statutory standards should be prescribed by the Congress to avoid the continuous and irksome friction that has characterized the program; and which has in effect tended to impair the safeguards which the law purports to provide.

To this end—

The Secretary concludes—

the administration recommends an amendment, as contained in S. 1945, which would require employers with labor shortages sufficient to warrant bringing in foreign workers to offer to such workers wages at least equal to the statewide or national average rate for hourly paid farm labor, whichever is the lesser.

This is essentially the amendment which I am offering, though I have modified it to read 90 percent of the statewide or national average.

We have gone beyond that and say, since in the average we take into account the higher paid farmworkers and the fact that Mexican nationals are paid fringe benefits—by way of medical aid, housing, transportation costs—90 percent of the average paid in the State is a wholly fair standard to apply.

I ask unanimous consent that the statement given to the Senate Subcommittee on Agricultural Research and General Legislation by the Secretary of Labor, Mr. Goldberg, on June 13, be printed in the RECORD at this point, and also a letter from Secretary Goldberg to me stating his position on the committee bill.

There being no objection, the statement and the letter of Secretary Goldberg was ordered to be printed in the RECORD, as follows:

EXTENSION OF MEXICAN FARM LABOR PROGRAM, TUESDAY, JUNE 13, 1961, U.S. SENATE, SUBCOMMITTEE ON AGRICULTURAL RESEARCH AND GENERAL LEGISLATION OF THE COMMITTEE ON AGRICULTURE AND FORESTRY

STATEMENT OF HON. ARTHUR J. GOLDBERG, SECRETARY OF LABOR

Secretary GOLDBERG. Senator JORDAN and Senator HART, I have a prepared statement which I will deviate from, so I would like at this time to offer it for the record. I will not read it verbatim, but I will make comments about it, if that meets with your approval.

Senator JORDAN. Yes, sir.

The prepared statement of Secretary Goldberg is as follows:

"I welcome this opportunity to present the views of the administration and to express my personal views on legislation which this committee is considering for improving the Mexican labor program and for its extension for an additional 2 years.

"To remove any doubt as to the administration's position, I would like to state at the outset that we are not advocating the termination of the program. On the contrary, fully mindful of the uncertainty of meeting the labor requirements at this time of our agricultural producers entirely from our own labor supply, we recommend the extension for a 2-year period of Public Law 78—the law which provides the basic authority for the Mexican labor program.

"But it should be equally clear that the administration opposes any extension of this law unless it is appropriately amended to provide sorely needed protection for our own workers; protection against the rampant competition for available jobs from an almost inexhaustible reservoir of foreign workers accustomed to work for wages and under conditions which compared with ours are substandard and which we have long relegated to the past.

"The basic question is—do we not have a solemn responsibility to our own workers to provide safeguards against the adverse impact upon their wages, working conditions, and employment opportunities that must inevitably flow from the large scale use of foreign supplemental labor.

"There are two bills presently before this committee, H.R. 2010 and S. 1945.

"H.R. 2010 would merely extend Public Law 78 for an additional 2 years without amendment. S. 1945 would extend the program for 2 years but with basic amendments to protect the interests of domestic agricultural workers. The amendments are as follows:

"1. Authorize the Secretary of Labor to limit the number of Mexican nationals that may be employed by any one employer to the extent necessary to assure active competition for domestic workers.

"2. Require growers to offer conditions of employment to domestic workers comparable to those they must provide Mexican workers.

"3. Prohibit the employment of Mexican workers in other than temporary or seasonal work or in work involving the operation of power-driven machinery.

"4. Provide that employers using Mexican workers must pay them wages at least equivalent to the statewide or national average rate for hourly paid farm labor, whichever is the lesser. The maximum increase in any one year would be the equivalent of 10 cents per hour.

"The administration supports S. 1945.

"Programs for the admission of Mexican agricultural workers have been with us for almost 20 years. The present program stems from governmental arrangements concluded during World War II. At no time during the war years did the numbers exceed 175,000 in any one year. With the cessation of hostilities the program tapered off until the Korean emergency again created manpower stringencies. The need was felt for an orderly method of supplementing available domestic workers, and in 1951 Public Law 78 was enacted. The law, implemented by an international agreement with Mexico in the same year, has been extended, with minor amendments, from time to time since then.

"Under Public Law 78 approximately 200,000 Mexicans were brought in annually between 1951 and 1953. From that time it increased until it reached a peak of approximately 445,000 in 1956. In 1960 due to mechanization of the cotton harvest the number decreased to about 315,000.

"During the House consideration of similar legislation this year, considerable argument was advanced designed to show the need for a continuation of the program. Since the administration is not opposing an extension of an improved law, such arguments are not relevant. The sole question which we are now considering is what terms and conditions are necessary, when admitting Mexican workers, to avoid undermining the economic conditions of our domestic farmworkers.

"Approximately 2,200,000 American farmworkers who depend for their livelihood on farm employment are in some measure affected by the Mexican labor program. But the impact of mass importation of foreign agricultural workers falls with the greatest severity upon our migrant agricultural workers—the segment of our labor force whose shocking living and working conditions have increasingly become the subject of public scrutiny in the press, over the radio, on television, in the pulpit, and in the Halls of Congress.

"The majority of American migrants, moving in vast streams out of the South and Southwest each spring, exist for the most part in a shadowy world of poverty, privation, lack of opportunity and living conditions intolerable by any standards. Each year approximately 500,000 American farmworkers migrate with their families in order to avoid either unemployment or low wages at home. All too frequently they are quartered in unsanitary and substandard housing; transported in unsafe buses and trucks which has subjected them to a high incidence of accidents resulting in death and serious injury. Because they are constantly on the move, their children are denied the opportunity to receive a minimal education, while restrictive residence requirements deny them public health and welfare services. The conditions of these families are an affront to American concepts of human dignity.

"The unpleasant truth is that the migratory labor system in the United States is based on underemployment, unemployment, and poverty. This is not a small problem. The Department of Agriculture estimates that underemployment alone in rural areas of our Nation is the equivalent of 1,400,000 fully unemployed people. The earnings of agricultural workers average barely over $1,000 a year.

"Farmworkers are excluded from minimum wage, unemployment insurance, almost all workmen's compensation legislation and most other social legislation. In addition, they are excluded from legislation which protects the right of workers to organize and bargain with their employers.

"We, as a nation, take pride in our concern for the dignity of the individual; but the apathy that has been demonstrated toward this lingering social problem seems to us to be an abdication of our responsibilities. At a time when we are engaged in a a bitter struggle to advance the cause of democracy throughout the world this social and economic blight at home has become a matter of embarrassment to the United States.

"The emphasis in our foreign aid policy is reflecting a greater concern for the individual in the underdeveloped countries throughout the world. We are accenting the need for improving the standard of living of these poverty ridden people. While we have necessarily expended hundreds of millions of dollars in this effort, we must equally measure up to our responsibilities toward our own agricultural workers who, in our midst live in poverty and degradation. The conditions under which these men and women live and work is contrary to our democratic institutions and ideals. In the interest of simple humanity we should not tolerate these conditions.

"The present administration is firmly of the view that the time for studying the migrants' problem is past; the time for remedial action is long overdue. This blemish in our social order must be eradicated. While some progress has been made it is not nearly enough.

"For its part, the Department of Labor is now considering ways and means of improving and extending existing programs for farmworkers in order to assure greater continuity in employment and higher earnings.

"To me it appears highly inconsistent, however, to attempt to improve the lot of the migrant workers through the series of bills which the Congress is now considering while requiring these workers to complete, without adequate legal protections to safeguard their interests, with an inexhaustible supply of foreign workers.

"The nature and size of the Mexican labor program substantially interfere with the normal operations of the law of supply and demand in the labor market. The inexorable result is to stabilize or depress the wages of our own farmworkers in areas where Mexican braceros are employed. My concern over this problem was shared by my predecessor in office, the distinguished James P. Mitchell. It has been highlighted in a report of a committee of prominent consultants who were appointed by Secretary Mitchell to study the matter.

"Although we are concerned with the impact of the Mexican labor program on the economic conditions of domestic farmworkers, we are in no way critical of the Mexican workers as individuals. We value them highly as respected neighbors. They have proved to be dependable and competent workers and have contributed a great deal to the Nation's agricultural production.

"To meet these problems, the administration recommends the enactment of Senator McCarthy's bill, S. 1945. This bill is designed to assure that the Mexican labor program remains a truly supplemental labor program rather than a program to substitute Mexican workers for U.S. workers.

"We have been urged by many groups and individuals to oppose any extension of Public Law 78. This position, we believe is too extreme. The administration's proposals would extend the program for 2 years with reasonable and moderate amendment.

"First, the Secretary of Labor would be provided with authority, in connection with his certifications under section 503, to limit the number of foreign workers who may be employed by any employer to the extent necessary to assure active competition among farmers for the services of U.S. farmworkers.

"As I indicated above, we find that because of the Mexican labor program, there has been a substantial deterioration of employer recruitment programs and of the labor relations practices designed to maintain a stable and productive work force. The results are that employers of Mexican workers frequently pay lower wages to domestic workers than the employers in the same activity and area who depend upon U.S. agricultural workers. They are under no real compulsion to attract additional U.S. farmworkers, with results that are clearly adverse to the interests of our own farmworkers.

"The most tangible result of the ready supply of Mexican workers is its depressing effect upon wages. The failure to make the special effort to offer other working conditions that are necessary to maintain a satisfied work force, however, may be even more detrimental to U.S. farmworkers and a significant factor in the failure to obtain them.

"All efforts to protect our farmworkers from these effects of the Mexican labor program in a meaningful manner heretofore have been unsuccessful. Clearly, employer responsibility to recruit and retain U.S. farmworkers is required in the law. The incentive for employers of Mexican workers to do a better job of domestic recruitment and labor relations will be increased under this amendment. Where necessary, each employer of Mexican workers will be required to maintain a fair, specified proportion of domestic agricultural workers in his work force.

"In this connection, I am somewhat disturbed by allegations that our domestic workers are an unstable and unreliable source of labor; that employers experience, notwithstanding their best recruitment efforts, large turnover in their domestic labor force. In my judgment this is a most unjust characterization of our domestic agricultural labor force.

"Thousands of farmers throughout the country depend exclusively upon domestic agricultural labor to plant, cultivate, and harvest their crops. It is evident that when dealing with a large number of domestic workers or foreign workers there will be those in both categories who will not fulfill their obligations. In varying degrees, some Mexican workers have failed to complete their contracts without justifiable reasons. I think it is significant that approximately 500,000 domestic migrant workers year by year leave their homes in search of employment. It is inconceivable to me that these people would be willing to subject themselves to the privations and hardships under which they live and travel if they were not sincerely and genuinely interested in obtaining remunerative employment. We should also take note that to a great extent they move from the low wage areas to seek better employment opportunities.

"My experience convinces me that the stability of a work force is directly related to the efforts and interests of the employer in providing the worker with satisfactory employment. A dependable work force is obtained not alone by the payment of transportation. While this may be a significant factor in obtaining the workers in the first instance, whether a worker is satisfied with his employment depends in a large measure upon day-to-day treatment accorded him by his employer; it depends upon the interest the employer manifests in his welfare; it depends upon the wages and working conditions, the housing provided him and a variety of other factors which employers who successfully recruit and retain workers have learned are important in assuring themselves of a competent and dependable work force.

"I would like to point out that generally where decent wages and working conditions are offered, domestic labor is available. It is available, for example, in the State of Washington where wages are $1.25 an hour, as compared to 50 cents an hour in other areas and, where growers participate in an annual worker plan, and sometimes advance transportation costs to American migrants. It is available in the State of Oregon where the State legislature has enacted legislation improving conditions for American farmworkers. It is available in northern California, where American workers can earn as much as $1.50 an hour on some tree crops. On the other hand, we cannot expect to attract domestic workers to areas which pay less than 50 cents per hour.

"I have also heard from time to time the complaint that domestic workers will not accept certain agricultural employment, such as 'stoop labor,' regardless of the wages and working conditions offered. This contention does not square with the facts. Good cases in point are the States of Mississippi and Louisiana. In the early days of the Mexican labor program, these States used a substantial number of Mexican workers. The employers in these States, however, decided that it was in the best interest of the local economy to utilize domestic agricultural workers and are no longer employing Mexican labor. In these States, as in many other States, domestic agricultural workers are performing 'stoop labor.' For example, More foreign workers are used in the cotton harvest than in any other crop. In this activity which involves exclusively 'stoop labor' four-fifths of the entire labor force is comprised of domestic agricultural workers.

"Approximately 64 percent (70,000) of all the workers employed at the peak of the tomato harvest, the second largest crop in which foreign workers are used, are domestic agricultural workers. Approximately 39,000 Mexicans are used in this activity at peak, almost all in the State of California.

"Even in Texas, California, Arkansas, Arizona, and New Mexico, the five States using the greatest number of Mexican workers, the majority of the total hired agricultural labor force during the same time, in the same States, in the same areas and in the same activities, are domestic workers.

"The theory that domestic agricultural workers will not accept work which is unpleasant or undesirable is not supported by the facts. Innumerable American workers are employed in a variety of difficult and unpleasant jobs, such as mining, operation of garbage trucks, sewer maintenance, cesspool workers, sand hogs, boiler stokers, blast furnace workers, and others.

"It is thus apparent that the allegations that domestic workers will not accept the type of employment for which Mexicans are used is without foundation.

"For the reasons I have stated I believe that the administration's proposal to permit the Secretary of Labor to limit the number of Mexican workers employed in the United States is necessary to stimulate more vigorous recruitment programs to the end that there will be a greater utilization of the domestic labor force.

"The second substantive amendment provided in S. 1945 would make Mexican workers available only to employers who have made reasonable efforts to attract domestic

workers at terms and conditions of employment reasonably comparable to those offered to foreign workers.

"Under existing law, the Secretary of Labor must certify, before foreign workers may be made available, that domestic workers have been offered wages and standard hours of work comparable to those offered to Mexican workers. No provision is made for offering to domestic workers the other material benefits which, under the Migrant Labor Agreement, are provided the Mexican workers. These include workmen's compensation or occupational insurance coverage for the Mexican farmworkers, as well as free transportation, free housing, subsistence when work is not available, written contracts, and work guarantees.

"S. 1945 would condition the availability of the Mexican workers to any employer on the employer's offer to domestic farmworkers, not only of comparable wages and standard hours of work, but also of other comparable benefits.

"The effect of this amendment is that the available job offers would be made more attractive for domestic workers at costs for such benefits generally the same as those the employer now incurs when he obtains Mexicans. It would also remove the anomaly and injustice that has done so much to arouse public sentiment against Public Law 78, its maintenance of higher labor standards for foreign workers than those accorded our own workers.

"The amendment does not require precisely the same terms and conditions to be offered as are extended to Mexicans. It is contemplated that appropriate recognition would be given to the differences between the situation of the domestic workers and the foreign workers.

"For example, for local workers who have their own homes in the area of employment, it would not be reasonable to require the employer to offer free housing. Local workers would be reimbursed with monetary allowances in lieu of housing and of daily transportation to the job when these benefits are not provided. The requirements that local workers be offered a written contract, the three-quarter guarantee of employment, and subsistence payments would be waived in instances where they are clearly inappropriate.

"The principal impact of certain features of the amendment relates thus to recruitment of nonlocal workers. Those assurances should make acceptance of out-of-area seasonal farm employment a feasible choice for many more unemployed and underemployed.

"The provision of comparable benefits to domestic migrants poses some special problems as it relates to housing. The obligation to provide free housing, as is provided Mexican nationals, should not be expanded, on a mandatory basis, to the free provision of family housing for dependents not part of the work force. Here again a monetary allowance of roughly equivalent to the cost of housing a single worker can be provided.

"We are, of course, aware of the complaint filed by some employers of unsatisfactory results from their recruitment of distant workers. Cases have been cited in which workers transported at the employer's cost have not completed the work required for the harvest. Here I would like to advert to my previous observation that generally the dependability of a work force has a direct relationship to the treatment accorded the workers and the terms and conditions of their employment. For example, a study made by the State of Washington in 1958 disclosed that approximately 100 crew leaders with 3,600 workers were recruited in Texas through the annual worker plan, directed and coordinated by the Department of Labor, for employment in the State of Washington. Farmers in the State of Washington advanced more than $110,000 to those crew leaders by sending cashiers' checks or Western Union money orders to them in care of the Texas Employment Commission's local officers. All but two of these crew leaders reported for work with crews and proved eminently satisfactory—the total loss $250. This is only one illustration which, I am sure, can be duplicated throughout the country.

"While the experience of many other employers who provide transportation to workers has been gratifying, the Department recognizes that many employers are honestly and legitimately concerned with the uncertainties involved. Accordingly, we propose to provide that the employer who chooses may, in lieu of providing transportation in advance, agree rather to reimburse workers for their transportation costs, after the fact, in proportion of the agreed contract which the worker fulfills. However, this should not permit practices that are less liberal than those prevailing in the area. This will, I believe, remove any reasonable objection on the part of employers to paying for domestic workers, as they do for Mexican workers, the cost of transportation to the job and of their return home on completion of the contract.

"Fear has been expressed by some that the Department of Labor, in proposing that domestic farmworkers be afforded terms and conditions reasonably comparable to those provided Mexican workers, is seeking broad discretionary power which might be exercised in an arbitrary manner. The area of uncertainty seems to be centered around a method of converting transportation and housing allowances in cash payments.

"I find it rather strange that this same fear has not been manifested in connection with a present provision of Public Law 78. Under that provision, in any case in which a Mexican worker is not returned to the reception center, the employer is required to pay an amount determined by the Secretary of Labor to be equivalent to the normal cost to the employer of returning other workers to the reception center. The administration of this provision involves the exercise of discretion on the part of the Department. Although thousands of dollars have been paid by the growers to the United States on the basis of estimates made by the Department of Labor, there has been no accusation of any arbitrary or capricious action on the part of the Department. As a matter of fact the Department on its own initiative in 1954 proposed and obtained an amendment which provided authority to relieve employers of double assessments which were required in some cases under the provisions of the law.

"In the light of this experience, fear of arbitrary action on the part of the Department is certainly not well founded. Far from granting new undefined authority to the Secretary, of the 'comparable terms and conditions' principle is specific and limited. The terms and conditions provided the Mexicans are spelled out in considerable detail in the agreement with Mexico. These would provide a specific outer limit upon what the employer would be required to offer to domestic workers. To me, it is indeed, anomalous that a citizen of the United States who presents himself for employment in this country can under the law be told that foreign workers are entitled to greater benefits when employed in the United States than he can obtain. U.S. citizenship thus becomes a liability in the United States.

"We also recommend an amendment contained in S. 1945 to prohibit generally the employment of Mexican workers admitted under Public Law 78 in other than temporary or seasonal work or in work involving the operation of power-driven machinery. The Secretary could grant temporary exceptions where he believes this necessary to prevent undue hardship. He would use this authority to permit gradual adjustment where farmers are now dependent upon Mexican workers for year-round or machine jobs.

"Although we believe that the Mexican labor program when initially enacted was viewed as a means of meeting seasonal shortages of unskilled field hands, this purpose was not specified in the law. Consequently, we now have substantial numbers of braceros employed on mechanical equipment and additional thousands in year-round jobs. In view of the substantial underemployment and unemployment characteristics of our own farm work force, the alleged shortage of U.S. workers for skilled and year-round jobs are believed to reflect problems of wage levels and employee relations rather than true shortage of labor. We believe that the Congress should so conclude, leaving the Secretary with discretion only to grant temporary exceptions in specific hardship cases. We are not now even considering the question of stoop labor but of employing braceros to operate costly machinery and in year-round occupations. In my opinion, there is no question but that domestic workers will accept such employment provided that the wages and conditions of work are reasonable. Whenever there is a need for additional workers for year-round employment which cannot be met from our domestic labor force, they should be admitted under the provisions of the Immigration and Nationality Act which deals with the permanent admission of workers for employment in the United States.

"The administration's recommendations for legislation extending the Mexican labor program, as contained in S. 1945, would also enact into law a definite policy with respect to wages of Mexican workers that must be offered and paid by employers seeking authorization to employ such workers.

"The prevailing wage principle that has been our basic guide in this matter is a proper protection for Mexican workers and must continue to be used for this purpose. We now know, however, that the prevailing wage principle applied to a massive foreign worker program tends to prevent wages from rising. That this has actually occurred over the last 8 years, to serious extent in many areas, is now a matter of common knowledge.

"In areas where a large number of Mexicans are used, it is difficult to arrive at a valid method for determining the prevailing wage required to be paid Mexicans so as not to reflect merely the wage received by those workers from year to year.

"The Department has made strenuous efforts during the last few years to avoid this. These efforts have not met with success. And in some areas the employers of Mexican labor have initiated wage increases designed to overcome adverse effects of the Mexican labor importation. Unfortunately, these have been in the minority.

"In numerous other areas the wage rates in the specific activities in which Mexican workers are employed have remained static or even declined. To illustrate, Mexican nationals were employed in 1951, after Public Law 78 was enacted, at an hourly wage of 50 cents per hour in Arkansas, Missouri, Texas, and New Mexico. Ten years later, in 1960, this was still the rate normally paid braceros in most areas in these States. In the meantime, of course, the average wage rate for all hourly paid farmworkers in these States as well as in the Nation as a whole was increasing significantly.

"The availability of braceros at these static rates throughout this 10-year period has tended to place a ceiling upon the wage offered U.S. workers engaged in similar work in the areas where braceros are employed.

"To these illustrations of static wages in the presence of substantial Mexican employment can be added many others. Of the 123 wage surveys made in 1960 in specific areas and activities employing Mexican workers,

it was found that the wage prevailing among U.S. workers had remained static from the previous year in 67 percent of the cases. It had actually declined in 15 percent. In the face of generally rising farm wages, this tendency to remain stable or decline where Mexican workers are employed is, in my view, a direct outgrowth of the Mexican labor program. This is a central problem in the way the Mexican program operates today, and the reason why we urgently need corrective guidelines of the type proposed in S. 1945.

"In far too many areas employers have not, since the inception of this program, voluntarily introduced any wage increases and have vigorously opposed any efforts of the Department to give meaning and effect to the statutory responsibility of the Secretary not to make Mexican workers available under circumstances which would adversely affect the wages and working conditions of our own agricultural workers. We have found ourselves in endless litigation challenging the validity of the Department's policy and criteria to prevent such adverse effect even where the policies of the Department would require the payment of wages which would produce minimum earnings of 50 cents per hour.

"In light of this experience and in view of the unrelenting resistance to the Department's efforts to carry out its responsibilities under Public Law 78, we have concluded that statutory standards should be prescribed by the Congress to avoid the continuous and irksome friction that has characterized the program; and which has in effect tended to impair the safeguards which the law purports to provide.

"To this end, the administration recommends an amendment, as contained in S. 1945, which would require employers with labor shortages sufficient to warrant bringing in foreign workers to offer to such workers wages at least equal to the statewide or national average rate for hourly paid farm labor, whichever is the lesser. This would be applicable only to those employers who are seeking to obtain Mexican workers. Where employers requesting Mexican workers are not offering at least this much, they would be expected to bring their wage offers up to this level. In no case would employers be required to increase their wages by more than the equivalent of 10 cents per hour in any 1 year. We believe that this formula will prevent the stagnation and/or depression of farm wages in some areas where large numbers of braceros are employed; it would simply cause wages in these activities to keep pace with farm wages generally. No employer willing to offer average wages would be deprived of needed braceros by this amendment.

"We are of the view that we presently have the authority under existing legislation to require this; that the adoption of this formula by the Department would be a reasonable exercise of the Secretary of Labor's statutory responsibility under title V of the Agriculture Act of 1949 (Public Law 78) not to make Mexican workers available unless he can certify that their employment will not adversely affect the wages and working conditions of domestic workers similarly employed. We believe that this is a fair and appropriate standard by which to test such adverse effect.

"The simple fact is that whenever the Department of Labor has adopted any measure to give meaning and effect to this statutory requirement, the authority of the Secretary of Labor has been vigorously contested, in and out of court. In fact in the most significant cases in which such restraining orders have been issued, even though set aside at a later date, it has been due only to the action of the Mexican Government in withholding their nationals that the adverse effect has not been greater. Because we have been subjected to restraining orders and to other litigation that vitiates that authority, we believe that the time has come to remove any doubt as to the validity of the Secretary's actions through a specific legislative standard.

"This is not, I believe, contrary to a resolution passed in December 1960 by the American Farm Bureau Federation favoring extension of the Mexican labor program. This resolution read, in pertinent part:

" 'We favor the establishment of statutory standards for the exercise of the broad discretionary authority now delegated to the Secretary of Labor. We strongly oppose the delegation to the Secretary of discretionary authority even broader than he now has.'

"I am somewhat perplexed by the dilemma in which the Department finds itself. On the one hand, when it endeavors to establish standards to give effect to its responsibilities under the law, its authority to adopt such standards is forthwith challenged on the grounds that the Secretary of Labor is attempting to usurp congressional prerogatives. On the other hand, the same groups are here opposing a proposal on the part of the Department to avoid such problems in the future by requesting an amendment which would provide statutory standards and remove any further questions as to whether or not the standards are within the congressional contemplation.

"During the House debates on H.R. 2010 and the amendments introduced similar to those contained in S. 1945, it was repeatedly argued that the Department of Labor already has authority under present law to put into effect the recommendations of the administration. We do not concur in this conclusion, at least with respect to some of the amendments. To the extent that such authority presently exists, the purpose in requesting statutory guidelines is to eliminate any further question as to the propriety of action taken by the Department to protect the interests of our domestic agricultural workers within the contemplation of Public Law 78.

"To meet these problems adequately, the administration recommends that if Public Law 78 is to be extended for 2 years, it should be amended as provided in S. 1945.

"In closing I would like to observe that there is general recognition of the fact that we are confronted with a serious problem of underemployed and unemployed farmworkers; that these workers and their families live and work under conditions which we cannot in good conscience continue to ignore. We have an obligation to these workers to extend every effort not to aggravate an already intolerable situation by placing them in competition with foreign workers without safeguarding them against the impact of this vast foreign supplemental labor supply.

"The time has come for a more realistic approach to this problem. It is time that we cease finding reasons why we cannot utilize more fully our own labor resources. It is time that we begin to think in terms of developing affirmative programs which will bring dignity, social and economic well-being to our own underprivileged agricultural labor force."

U.S. DEPARTMENT OF LABOR,
OFFICE OF THE SECRETARY,
Washington, August 8, 1961.

Hon. EUGENE J. MCCARTHY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MCCARTHY: I have carefully studied the draft bill, H.R. 2010, approved by the Senate Agriculture Committee, providing for a 2-year extension of the Mexican farm labor program, Public Law 78. Although this measure would make some minor improvements over the present law, it falls far short of providing the needed reforms which the administration had sought in order to protect our citizen farmworkers.

The committee bill includes two amendments from among those recommended by the administration. One prohibits the employment of Mexican braceros in jobs involving the operation or maintenance of power-driven machinery. The other prohibits the employment of braceros in year-round occupations. In addition, the committee bill includes an amendment with respect to working conditions offered to U.S. workers. The meaning of this term is so circumscribed by language in the report as to have no practical value. The problems do not lie in the limited area to which this amendment is directed.

Finally, the committee's bill includes a new provision, section 505, the purport of which is that both domestic and foreign workers shall be paid not less than the wage prevailing for similar work in the area. Although the prevailing wage principle has always been a part of the Migrant Labor Agreement with Mexico, it has never before been stated in Public Law 78, and its inclusion now appears to have no practical value. Unfortunately, the amendment fails to corrrect the important wage problems which, uncorrected, threaten to make this program inconsistent with the public interest. I refer here to Public Law 78's serious adverse effect upon the wages of U.S. farmworkers and to its effect in some areas of enabling employers to pay U.S. workers less than they pay Mexican workers doing the same work.

The committee bill did not incorporate any of the most important amendments which the administration had requested, and which were before the committee in the form of S. 1945, which you introduced. Among the omissions are:

1. Limitation of eligibility to employ braceros to growers who will pay Mexican nationals at least average farm wages, the average for the State or for the Nation, whichever is lower.

2. Limitation of eligibility to employ Mexican workers to growers who offer and actually provide benefits and conditions of employment to U.S. farmworkers comparable to those they are required by law to provide to Mexicans. (This includes work guarantees, insurance, and free housing and transportation, as well as wages.)

We do not believe that the bill as reported by the committee reaches the basic problems which stem from the large-scale use of Mexican workers, that is, the adverse impact that their employment has on the wages, conditions of employment, and employment opportunities of our own workers. The committee's failure to accept your amendment which would require growers using Mexican labor to pay them the average farm wage of their particular state or of the Nation, whichever is lower, is much to be regretted. This provision is the keystone of the administration's reform requests. As you know, the effect of the Mexican program in many areas has been to place a ceiling on the wages offered to U.S. workers, at the wage level at which Mexican workers are made available. Where an ample supply of workers (Mexicans) are available at 50 cents per hour, for instance, employers do not voluntarily offer to pay higher wages. The consequence of this system is that it has established a wage ceiling for U.S. workers often at only 50 cents per hour. In many areas using a significant number of Mexican workers this wage ceiling has remained frozen at this level for 10 years, as the direct

result of the Mexican labor program. This is the fundamental vice of the present Mexican labor program and the committee bill, H.R. 2010, does nothing to correct it.

I have every confidence that, once this is understood, the Senate will vote to remove this wage ceiling. This can be accomplished simply by adoption of your wage amendment. What is involved here is not, as has been erroneously stated, the enactment of a minimum wage floor; it is rather the breaking of a wage ceiling imposed by Public Law 78 upon many of our lowest paid workers. None of the Administration proposals embodied in your bill was designed to or in fact would establish a minimum wage in agriculture.

The sole impact of your wage amendment is upon those farm employers who would take advantage of the special privilege of bringing in an ample supply of foreign labor under contract. To these growers this amendment would say merely that this special privilege is conditioned upon your paying at least average wages to the workers thus recruited. No employer willing to pay average wages would be deprived of foreign labor by this amendment.

It is our hope that the Senate will see fit to add the remaining amendments of S. 1945 and, in particular, the average wage amendment during its consideration of the bill providing for the extension of Public Law 78.

Yours sincerely,

ARTHUR GOLDBERG,
Secretary of Labor.

Mr. PROXMIRE. Mr. President, I think one of the most shocking economic statistics I have seen—and it should be made available to everybody in America—is the average farm wage. We are not talking about the average wage in a factory, an automobile plant, or a steel mill, but the average farm wage, which is very low. In virtually every State it is less than $1 an hour. In many States it is far less than that.

We are not asking in the McCarthy amendment for a high standard; we are talking about a wage which is barely enough to eke out an existence on.

In conclusion, I may say to the Senator from Minnesota, on the question of consultation with State authorities in this kind of situation, we must recognize that, while we have great faith in the Governors of our States, and they are wonderful men, they have an obligation to the producers in their States, and the people we are trying to protect, by and large, are not people who are citizens of those States. They are migratory workers. By definition, they do not live in the States where they work. Occasionally they do. They do not have a vote or any political influence in the State. They do not have an assemblyman or State senators or State representation at all. They do not have any kind of local representation. The Governor is not their Governor. They cannot vote for him.

That is why reliance on local officials has broken down, and why it is so important that the Congress and the administration act the conscience of the country, and look out for the welfare of all of our citizens, whether they are migratory workers or domiciled in the area where they work.

I ask unanimous consent, with the permission of the Senator from Minnesota, to have the supplemental views printed in the RECORD at this point, starting on page 7 and continuing to the top on page 10.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

SUPPLEMENTAL VIEWS

H.R. 2010 as amended by the Senate Agriculture Committee does improve Public Law 78 by prohibiting the use of Mexcian nationals for employment in other than temporary or seasonal occupations or for employment in the operation and maintenance of power-driven machinery except in those cases in which prohibition would cause undue hardship.

Although these amendments improve the basic law, they will do little toward solving the economic, social, and moral problems raised by the operation of the Mexican farm labor program.

Migratory workers are among the most neglected and underprivileged groups in the American economy. Their wages are low, they suffer much from unemployment, they are not covered by unemployment compensation laws or by minimum wage laws, and they are generally denied the benefits of workmen's compensation laws. Because their work requires them to move from one area to another, they and their families do not have the advantage of services and facilities that normally go with stable membership in a community.

The basic difficulties of American migrants are intensified by the annual importation of 300,000 Mexican nationals under the Mexican farm labor program. The experience of 10 years of operation of the program has demonstrated that it does affect adversely wages, employment opportunities, and working conditions of domestic workers. This is the unqualified testimony of the Secretary of Labor, Mr. Goldberg, who has the responsibility for the administration of the program. He and the administration have supported extension of Public Law 78 on the condition that substantial reforms such as provided in S. 1945 are adopted. Secretary of Labor Mitchell last year opposed extension of Public Law 78 unless substantial reforms were approved.

Public Law 78 was enacted in 1951 at a time of labor shortage during the Korean conflict. It began as a temporary program, but it has been extended by Congress four times. During this period the farm labor force has declined, technological change in agriculture has continued at a rapid rate, and unemployment and underemployment have increased as rural problems. Yet at the same time the Mexican farm labor program has expanded greatly (table I).

TABLE I

Year	Total number of Mexican nationals contracted, by year, 1951–60 [1]	Average number of workers employed on farms, United States, 1951–60 (in thousands) [2]		
		Farm operators and unpaid family workers	Hired workers	Total
1951	192,000	7,310	2,236	9,546
1952	197,100	7,005	2,144	9,149
1953	201,380	6,775	2,089	8,864
1954	309,033	6,579	2,060	8,639
1955	398,650	6,347	2,017	8,364
1956	445,197	5,899	1,921	7,820
1957	436,049	5,682	1,895	7,577
1958	432,857	5,570	1,955	7,525
1959	437,643	5,459	1,925	7,384
1960	315,846	5,249	1,869	7,118

[1] Administrative reports, Bureau of Employment Security.
[2] U.S. Department of Agriculture, Statistical Reporting Service, Farm Labor.

About 70 percent of the Mexican nationals are contracted for by growers in two States, Texas and California. Only five other States reported employment of more than 3,000 Mexican nationals at the time of peak employment of these workers in 1960. The average hourly wage paid domestic workers for work in which Mexican nationals are also employed indicates that the presumed shortage of labor has hardly been tested by the offer of premium rates (table II).

TABLE II.—*Selected employment and wage data for major Mexican-using States, by State, in 1960*

Major Mexican-using States [1]	Employment of Mexican nationals, 1960		Hourly wage rates paid U.S. workers in work in which Mexican nationals were employed		Average hourly farm wage rate without room or board, 1960 [3]
	Contracted [2]	Employed at peak	Lowest rate	Most common	
Texas	122,755	103,680	$0.40	$0.50	$0.78
California	112,995	73,430	.75	1.00	1.23
Arkansas	27,413	31,296	.35	.50	.73
Arizona	19,324	14,312	.70	.70	.97
New Mexico	10,404	11,257	.60	.60	.85
Michigan	4,815	11,151	.75	.85 and 1.00	1.07
Colorado	8,492	6,539	.65	.75	1.09
Montana	2,438	2,563	(4)	(4)	$1.13
Nebraska	2,255	2,310	$0.85	$0.85	1.10
Georgia	(5)	1,264	(4)	(4)	.66
Wyoming	1,215	1,213	(4)	(4)	1.12
Wisconsin	528	1,004	.80	1.00	1.09
Tennessee	1,138	659	.50	.50	.63
Indiana	65	612	.75	.80	1.06

[1] 500 or more Mexican nationals employed at peak. Other States with fewer than 500 are: Missouri, Utah, Oregon, Illinois, North Dakota, South Dakota, Kentucky, Iowa, Nevada, Minnesota, Washington, and Kansas.
[2] In addition to Mexican workers contracted at reception centers, 64,535 were recontracted or reassigned from one employer to another, sometimes in another State. For example, Michigan contracted 4,815 and recontracted 6,486 for a total of 11,301.
[3] U.S. Department of Agriculture. The U.S. average hourly farm wage rate without board and room, 1960, was 97 cents per hour.
[4] No hourly rates reported in 1960.
[5] All of the workers employed in Georgia were recontracted from other States.

Source: Bureau of Employment Security.

We do not believe that anyone can accurately establish the extent of the need for this program under the existing practices. The Department of Labor authorizes Mexican nationals when a sufficient number of workers cannot be obtained at the prevailing wage in the area for the type of work. Where the prevailing wage is very low, the number of workers who are able and willing to work under those conditions is likely to be reduced. The most recent figures (June 1961) of the Department of Labor show several counties in which wages of 30 to 50 cents per hour have been found to prevail among domestic workers. These rates are in areas and for work in which Mexican nationals are likewise employed.

The employer seeking additional employees at a time of labor shortage normally offers higher wages and better working conditions. Under Public Law 78 there is little incentive to do this.

We do not know what percentage of those who have left the farm labor force in the past 10 years would be willing to work in positions now filled by Mexican nationals if wages and working conditions were improved. As long as the present criteria are used to authorize the use of Mexican nationals, we cannot know the extent of the need.

The committee had before it a bill (S. 1945) which incorporated the recommendations of the Department of Labor and was supported by the Secretary of Labor and the administration. It contained major provisions which were not adopted by the committee.

One of these provisions would have limited the use of Mexican nationals to employers who have made reasonable efforts to attract domestic workers at terms and conditions of employment reasonably comparable to those offered Mexican nationals. Under the international agreement between the United States Government and the Republic of Mexico, Mexican nationals coming to this country under contract are guaranteed transportation costs, employment on three-fourths of the workdays in the contract period, subsistence when underemployed, housing, medical care, and compensation for injuries on the job, and health and accident insurance at reasonable cost. In addition, they are assured the wage rate that prevails among U.S. workers similarly employed and a minimum wage of 50 cents per hour. These are benefits not enjoyed by most domestic migratory workers.

S. 1945 also proposed a new test for adverse affect. Under terms of this provision, the employer would have been required to pay Mexican nationals no less than the average hourly farm wage in the State, or the national hourly farm wage average, whichever is the lesser. This would establish a clear, objective, and reasonable minimum base to assist the Secretary of Labor in determining whether Mexican nationals should be certified.

These two provisions should be adopted to provide very limited protection for American migrant workers. They are clearly consistent with the fundamental policy and intent of Congress as stated in section 503 of Public Law 78 which requires that the Secretary of Labor before approving the importation of Mexican nationals certify that there is a shortage of domestic workers and that "the employment of such workers will not adversely affect the wages and working conditions of domestic agricultural workers similarly employed."

The experience of the past 10 years has demonstrated that this intent has not been achieved. In large part the difficulty has resulted from the absence of a formula or of guidelines to determine when adverse effect has taken place. We do not believe Public Law 78 should be extended without providing the Secretary of Labor with additional directives necessary to protect domestic workers from such adverse effects.

EUGENE J. MCCARTHY.
WILLIAM PROXMIRE.
STEPHEN M. YOUNG.
PHILIP A. HART.
MAURINE B. NEUBERGER.

Mr. MCCARTHY. Mr. President, I should like to comment, and then yield to the Senator. The Senator has made an important point with regard to migratory farmworkers, both domestic and Mexican. In a report of the U.S. Department of Labor, dated July 11, 1961, reference is made to certain information about wages, and I ask unanimous consent that the letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF LABOR,
OFFICE OF THE SECRETARY,
Washington, D.C., July 11, 1961.

Hon. EUGENE J. MCCARTHY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MCCARTHY: I am presenting herewith the information requested by your letter of June 30 with respect to areas in which Mexican nationals are being employed despite wage levels lower than 50 cents per hour among U.S. workers.

The areas and activities of Mexican employment in which a wage of less than 50 cents per hour has been found to prevail among domestic workers thus far in 1961 are as follows:

State, area, and activity	Date of wage finding	Prevailing wage rate
ARKANSAS		
Crittenden County: Cotton chopping	June 9	$0.30
Mississippi County: Cotton chopping	do	.40
Phillips County: Cotton chopping	June 7	.30
TEXAS		
Lower Rio Grande Valley:		
All crops, hoeing	Apr. 27	.40–.45
Cucumber, picked-bulk	May 3	.45
Maverick County: Cauliflower, cut-pack in field	Feb. 14	.40

There may, of course, be other areas in which wages paid on a piece-rate basis are yielding less than 50 cents per hour to average U.S. workers.

I am also enclosing the full list of areas and activities of Mexican employment in which the prevailing wage rate among U.S. workers is 50 cents per hour or less.

With regard to your final question, we are unable to conclude that wages in the very low-wage Mexican-employing areas are showing marked improvement. So far this year 18 area wage surveys have revealed prevailing wage rates lower than on the comparable date a year ago. All but four of these wage declines were in States where the typical hourly rate is 50 cents or less. Furthermore, in three out of the six exceptionally low-wage areas listed above (including both of the 30-cents-per-hour areas) the latest wage finding represents a decline from the prevailing wage rate in the preceding year. In short, it appears that wage-depressive tendencies in areas using Mexican labor are strongest and most harmful in the areas in which wages are already exceptionally low.

Yours sincerely,

ARTHUR J. GOLDBERG,
Secretary of Labor.

Farm wage rates of 50 cents per hour or less in 1961 in activities employing Mexican contract workers by State and area [1]

State, area, and activity	Date of wage finding	Prevailing wage rate
ARKANSAS		
Craighead County: Cotton chopping	June 9	$0.50
Crittenden County: Cotton chopping	do	[1].30
Mississippi County: Cotton chopping	do	[1].40
Phillips County: Cotton chopping	June 7	[1].30
Poinsett County: Cotton chopping	June 19	.50
TENNESSEE		
Lake County multicrop: Cotton and soybean chopping	June 6	.50
TEXAS		
Lower Rio Grande multicrop:		
All crops, hoeing	Apr. 27	[1].40–.45
Asparagus, cut-bulk	Mar. 10	.50
	Mar. 22	.50
	Apr. 7	.50
Cabbage, cut-bulk	Jan. 26	.50
	Feb. 9	.50
	Feb. 24	.50
	Mar. 10	.50
Cauliflower, cut-bulk	Jan. 26	.50
	Feb. 9	.50
	Feb. 24	.50
Celery, cut-pack in field	Feb. 9	.50
	Mar. 10	.50
Cucumber, picked-bulk	May 3	[1].45
	May 17	.50
	May 31	.50
Lettuce:		
Cut-pack-load	Feb. 24	.50
Cut-pack-seal-load	Jan. 12	.50
	Jan. 26	.50
	Feb. 24	.50
	Mar. 10	.50
Onions, dry, pull only	Apr. 22	.50
	Apr. 7	.50
	Apr. 20	.50
Peppers, bell, cut-bulk	May 3	.50
Squash, bulk	May 17	.50
Maverick County multicrop:		
All crops, hoeing	June 14	.50
Cauliflower:		
Cut-bulk	Jan. 17	.50
	Feb. 14	.50
Cut-pack	Jan. 17	.50
Cut-pack in field	Feb. 14	[1].40
	Mar. 1	.50

	Jan. 25	.50
	Mar. 29	.50
Cauliflower:		
Cut-bulk	Jan. 25	.50
Cut-pack	Jan. 10	.50
Lettuce, cut-bulk	Mar. 29	.50
Onions, dry, pull only	Apr. 27	.50
	May 11	.50
Onions, dry (medium), pull only	Apr. 12	.50
Onions, green, pull-bulk	Feb. 21	.50

[1] Hourly wage rates paid Mexican nationals cannot be lower than 50 cents per hour.

Mr. MCCARTHY. Those were the prevailing wage rates in those counties when the spotchecks were made. There may, of course, have been other rates in other areas. There is no effort to say that these are the only areas involved. There may be other areas where the rate is 30 cents, 40 cents, or 50 cents an hour.

Another report bearing upon that subject is the Department of Agriculture report on the annual income of migratory farmworkers. For the year 1959, the latest available figures, the average

wages earned were $710 a year in farmwork. This was supplemented by $201 from other sources. By putting the two together, the workers were averaging $911 a year in income.

Mr. PROXMIRE. $911 a year in net income?

Mr. McCARTHY. Yes. Of that sum, $710 was from migratory farmwork, and the work on the average was 119 days in agricultural labor. Additionally, there were 24 days of other work, which supplemented the income by $201.

Mr. PROXMIRE. That compares with an average factory wage today in America of nearly $2.50 an hour, which results in an income of about $5,000 a year.

Mr. McCARTHY. The Senator is correct.

Mr. PROXMIRE. In other words, the wage is five times as great for factory work as for the farm laborer the Senator from Minnesota is talking about.

Mr. McCARTHY. Yes.

Mr. PROXMIRE. Since the amendment of the Senator from Minnesota would use farm—not factory—wages as the standards, it seems to me it is a very modest proposal. We cannot say that these people really would join the American way of life economically, as we wish they could. It seems to me that the proposal is a wholly justifiable step to take. I am proud to have an opportunity to support it.

Mr. McCARTHY. Opponents are making the same arguments against raising wages for farmworkers as were made against raising wages for factory workers 50 years and 100 years ago. The arguments have no more validity now, in my judgment, either economically or ethically, with regard to the farmworkers of today than they had 100 years ago with respect to the factory workers of that time.

Mr. JORDAN. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield.

Mr. JORDAN. I am looking at a table on costs and returns from farmwork in all States. This is table 18, showing production, costs, and returns, for dairy-hog farms in the southeastern Minnesota operation.

The other table from Farm Labor gives information on what the farmers must pay for outside labor when they hire laborers without room and board. The rate is $1.12 an hour.

The man who owns the farm, who does all the remainder of the work, gets a return of 40 cents an hour. I am worried more about the farmers in Minnesota than about the folks whom they hire.

Mr. McCARTHY. We are working on that problem by other means.

Mr. JORDAN. Are these farmers to be put out of business?

Mr. McCARTHY. No; they will not be put out of business. The Minnesota farmer is willing to pay his workers a just wage. The Minnesota farmer would rather do that and suffer some hardship himself than to profit as a result of exploitation of workers.

I think those statistics indicate that the people of Minnesota are highly moral and responsible.

Mr. JORDAN. I suppose it is necessary not only for the farmer to work, but also for his wife to work, and to work at night, so that he can pay $1.12 an hour to hire a laborer in the daytime.

I have before me a table showing the wages paid to workers who work for farmers in Wisconsin on dairy farms. This is for eastern Wisconsin, and shows production, costs, and returns. The return is only 23 cents an hour for the owner of the farm. I am beginning to worry about the farmers in Wisconsin.

Mr. PROXMIRE. I have been concerned about the income of our Wisconsin farmers for a long time. I am delighted to have the Senator from North Carolina join me. This situation is disgraceful.

As the Senator from North Carolina points out, the farmers own their farms. They have made investments in their farms. They have taken great risks as a result of their investments. They have increased their efficiency greatly. They work long hours.

Yet this is the kind of reward and return the Wisconsin farmers are getting. It is a disgrace. However, I cannot see that it would be a justification for hammering down the wages of migratory workers.

The fact is that on most Wisconsin dairy farms there are no hired men. Farmers cannot afford them. They do not have hired men. The work is done by the farmer, his wife, and his children.

I believe the figure which the Senator from North Carolina read includes the work done on the farm by the farm family.

There is no question that the return is too low.

Mr. JORDAN. The table also shows that the people the farmer hired, without board or room, received $1.12 an hour. The man who owned the farm received only 23 cents an hour.

I think we ought to worry a little more about the one who owns the farm, who hires the other man. Otherwise, before long he will not be able to hire anyone.

Mr. PROXMIRE. What happens on most of Wisconsin farms is that there are no hired laborers. The farmers do not have hired help.

There are a few farms where the farmers have incomes much higher. These farms have the best land, the biggest herds, the latest equipment, and so forth. On those farms the owners are able to hire a man, or two, or perhaps even three. On those farms the owner has a far better return. Of course, it can afford to pay far more for a hired man.

That is the peculiarity with reference to the statistics. One will not find very many people actually receiving 23 cents an hour return who have any hired men working for them.

Mr. JORDAN. It is a peculiarity of statistics to note what has been stated by the Senator from Minnesota about a rate of 30 cents an hour being paid in many places. That is not an average, because regular wages at that rate are not paid. If that were the wage rate, there would be no one who would work at all.

I would advise the farmers to sell out and to go to work for the man to whom they sold the farm. If I were an owner and making 23 cents an hour and hiring some fellow at $1.12 an hour, I would join him, after selling the farm.

Mr. McCARTHY. Mr. President, since this point has been raised, I believe it might be helpful to the farmers in Wisconsin if they did not have to compete with some large commercial forms which do use and exploit farm labor.

Another point should be made. This program is not one of general benefit to the farmers of the United States. In 1959 the Mexican nationals were used on about 50,000 farms, less than 2 percent of the farms of the Nation. In fact, about half of the U.S. farms use no hired labor at all.

In 1954 only 5 percent of the farms reported an annual wage bill of $2,000 or more. This 5 percent accounted for more than 70 percent of all the expenditures for hired farm labor that year. The Department of Labor reports, preliminary releases from the 1959 Census of Agriculture, show that these percentages remain about the same.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield to the Senator from New York.

Mr. KEATING. Mr. President, I wish to express my support for the amendment offered by the distinguished Senator from Minnesota.

I ask the Senator if it is not a fact that the previous Secretary of Labor, Mr. Mitchell, recommended at least as much protection as would be afforded by the amendment offered by the Senator from Minnesota?

Mr. McCARTHY. Yes. I think that is an accurate statement. I could not say that the previous administration recommended protection in quite the same form in which I propose it, but the total pattern of recommendation I think would have had at least the same effect—slightly different, but certainly a comparable effect.

Mr. KEATING. I invite attention to this, particularly in order that my colleagues on this side of the aisle who will read the RECORD will be aware of the fact that the previous administration, as well as the present administration, recommended the adoption, in substance, of the amendment offered by the Senator from Minnesota. I also point out that the present administration recommends adoption of the amendment which I offer, which is correlative and relates to American laborers on farms which employ Mexicans.

Mr. President, since I understand that the committee, or a majority of the committee, will also oppose the amendment which I intend to offer, and since we are acting under a rather unusual parliamentary situation with only a few of us here listening to these arguments with a vote to be taken at some future date, if the Senator from Minnesota has concluded, it might be an appropriate time for me to seek recognition for the purpose of explaining the amendment which I shall offer. This amendment will, I assume, be voted upon on Monday, following the vote on the amendment offered by the Senator from Minnesota.

Mr. McCARTHY. The Senator from New York has made a pertinent point.

Before yielding the floor, I ask unanimous consent that there be printed at this point in the RECORD two additional tables which are pertinent to the Mexican farm labor program.

There being no objection, the information was ordered to be printed in the RECORD, as follows:

Major Mexican-using States [1]	Employment of Mexican nationals, 1960	
	Contracted [2]	Employed at peak
Texas	122,755	103,680
California	112,995	73,430
Arkansas	27,413	31,296

TABLE II.—*Selected wage data for major Mexican-using States, by State, in 1960*

Major Mexican-using States [1]	Hourly wage rates paid U.S. workers in work in which Mexican nationals were employed		Average hourly farm wage rate without room or board, 1960
	Lowest rate	Most common	
Texas	$0.40	$0.50	$0.78
California	.75	1.00	1.23
Arkansas	.35	.50	.73
Arizona	.70	.70	.97
New Mexico	.60	.60	.85
Michigan	.75	.85 and 1.00	1.07
Colorado	.65	.75	1.09
Montana	(2)	(2)	1.13
Nebraska	.85	.85	1.10
Georgia	(2)	(2)	.66
Wyoming	(2)	(2)	1.12
Wisconsin	.80	1.00	1.09
Tennessee	.50	.50	.63
Indiana	.75	.80	1.06

[1] U.S. Department of Agriculture. The U.S. average hourly farm wage rate without board and room, 1960, was 97 cents per hour.

[2] No hourly rates reported in 1960.

Mr. KEATING. Mr. President, I think the suggestion made by the Senator from Minnesota and the request he made to have printed in the RECORD certain charts and graphs is a very desirabie request, because we are speaking mostly for the RECORD under the situation which presently exists. However, I will say to my friend from Minnesota that we do not have as much of a vacuum as I have sometimes encountered in this Chamber. I am not alone tonight. I appreciate the close attention which is being paid by Senators who are present.

I should like to discuss briefly my amendment, which is designated "8–29–61—A."

Mr. President, I ask unanimous consent that the text of the amendment appear at this point in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment of Senator KEATING is as follows:

On page 2, line 7, after the term "working conditions", add the words "and other terms and conditions of employment".

On page 2, line 8, after the term "foreign workers", add the following:

"For the purposes of this section the term 'other terms and conditions of employment comparable to those offered foreign workers' includes only—

"workmen's compensation or insurance against occupational hazards reasonably comparable to those afforded Mexican workers;

"guarantee of the opportunity to work during at least three-quarters of the workdays in the agreed term of employment;

"provision of basic subsistence when the opportunity to work is not available for extended periods;

"provision of transportation (for the worker only) from place of recruitment and return, or provision of reimbursement for such cost, in the ratio that the number of weeks worked bears to the total agreed term of employment and not to exceed a maximum of $3 per week of employment."

Mr. KEATING. The amendment is similar to a bill which I introduced this year (S. 1466) and to an amendment which I suggested last year when Public Law 78 was extended for 6 months.

Very frankly, former Secretary of Labor Mitchell had talked to me about this subject, and it was with his assistance and cooperation that the amendment was discussed last year.

This amendment requires that before Mexican workers can be employed, efforts must be made to attract domestic workers by offering them conditions of employment comparable to those offered Mexicans. The amendment is specifically limited to transportation, subsistence payments when work is unavailable, insurance, and work guarantees. The law already requires that comparable wages be offered domestic workers.

In answer to a point made in connection with the discussion of the McCarthy amendment, let me say that my amendment would in no way place in the hands of the Secretary of Labor any opportunity to fix wages or conditions for American farmworkers except on farms where Mexicans are employed. Offering comparable conditions of employment to domestic workers before Mexican workers, who possess these benefits, are hired seems to me a matter of elemental justice.

The offer of such benefits should increase the number of domestic workers willing and able to accept farm employment. If these benefits are not offered, we have no means of judging the size of the true labor shortage on the basis of which Mexican workers are admitted to the United States.

Section 2 of H.R. 2010 as reported out by the Senate committee adds the requirement that Mexican workers shall be made available only after efforts to attract domestic workers have been made by providing "working conditions" comparable to those offered to foreign workers.

This might sound all right on its face, and it might indicate that there is no need for the amendment which I propose. But in its report accompanying this legislation, the committee indicated that the term "working conditions" refers to physical conditions, and that it does not include "other terms and conditions of employment" such as transportation, subsistence, insurance, and work guarantees, which my amendment would include. In defining these "other terms and conditions" my amendment calls for specific items which are set forth in the amendment, beginning at line 9 of the first page.

The amendment does not require that precisely the same terms and conditions be offered as are extended to Mexicans. It is contemplated that there would be some recognition of the differences between the situation of the domestic workers and foreign workers. For example, where employees have their own homes in the area of employment, it would not be reasonable to require the employer to offer free transportation to domestic workers. Under the amendment, however, an employer could be required to offer workmen's compensation or on-the-job insurance to the domestic worker, just as he offers it to the Mexican worker.

When Public Law 78 was being considered on the floor of the Senate in the twilight hours of the 86th Congress, I stated my position that there should be no further extension of the law unless it is amended to provide that growers who use Mexican labor be required to offer domestic workers benefits and conditions of employment similar to those they must by law offer and actually provide Mexican labor.

My position has not changed.

To me, it is inconceivable that we treat foreign workers better than we treat our own domestic farmworkers. I fail to understand how growers can claim that domestic labor is not available to do the job if they do not, first, make sincere attempts to recruit U.S. workers. By sincere attempts, I mean actually finding out what incentives would attract U.S. workers and basing recruitment efforts on the results of these findings. The availability of a vast potential labor supply south of the border has reduced competition for domestic workers in labor shortage areas and has caused many growers to make only token recruitment efforts.

Growers are presently required to furnish transportation for Mexican nationals to and from reception centers. Mexican nationals are guaranteed the opportunity to work at least three-fourths of the work days in the contract period, which usually has a minimum of 6 weeks. If Mexican workers are offered employment for less than 64 hours in any 2-week period, they are entitled to subsistence during idle days at the employer's expense.

Mexicans must be provided with free housing. Because of the complication of computing housing costs and conditions and because the Mexicans who come into the United States under Public Law 78 are single men, I have specifically excluded this requirement from my amendment.

Employers of Mexicans are required to pay insurance against occupational injuries and to pay for the workers' subsistence during days of illness or injury. California State law now requires this for domestic workers. Employers must also carry occupational health insurance for Mexican workers, but the cost of this item is paid by deductions from wages.

In sum, my amendment is a compromise in that it excludes housing and health insurance, in that it limits the definition of "other terms and conditions" to those stated above and in that it places what is certainly a reasonable $3 maximum per week on the transportation costs paid by employers of domestic workers who also employ Mexicans.

Mr. President, Public Law 78 was initially adopted as a temporary program under emergency Korean war labor shortage conditions. I urge the adoption of my amendment, for without it, I think Public Law 78 has outlived its usefulness and should be permitted to expire.

With unemployment increasing, there is simply no justification for permitting the steady rise of Mexican workers to take jobs which should be made available, at least on an equal basis, to American workers. My amendment would see to it that a true labor shortage was the basis for admitting foreign workers and not the unwillingness of employers to make reasonable job offers to Americans.

I want to add one point. In addition to the fundamental fairness of treating domestic workers as well as we treat Mexican workers, there is another factor, which should be important to some. Unless we limit the number of Mexicans to a reasonable amount, production in some States, which therefore have very low wage rates, places real pressure on producers in States, such as New York, which pay more reasonable and fairer wages to domestic workers and to workers brought in from outside.

The competitive argument should be very important to Senators from States which have taken steps to improve conditions for migrant farm workers.

I shall try to condense these remarks into a capsule form on Monday when we reach the limited time area. I yield the floor.

Mr. TOWER. Mr. President, getting to the heart of this matter, if the McCarthy and Keating amendments are adopted, they will have a devastating effect on the bracero program. According to the largest farm organization in my State, it would have the effect of drastically curtailing the bracero program, perhaps even killing it outright. I believe we should consider the consequences of killing the bracero program. There is no question that it would be harmful to the economy of my State and, indeed, to the economy of all southwestern States.

However, there is another aspect which has not been mentioned this evening, but which was brought out in committee testimony by the distinguished Senator from Arkansas [Mr. FULBRIGHT], chairman of the Foreign Relations Committee. He sees an aspect in this program that perhaps we have not seen. I should like to quote from his testimony. He testified:

> The Mexican labor program is equipped with safeguards for everyone involved—the worker, his employer and the domestic laborer whose livelihood could be endangered by unregulated importation of Mexican nationals. Farmers pay all the expenses incurred in the operation of this program through payments to the farm labor supply revolving fund from which the Department of Labor is then reimbursed for its expenses. In addition to the fees paid by the farmers for the Department of Labor's cost in operating the fund, the farmer pays the cost of transporting the worker from the migratory station to the place of employment and then back again. In 1960, the Phillips County Farmers Association in my State found that the cost for this transportation was $47.32 per worker. Regulations backed up by strict enforcement insure that the Mexican laborers are paid fair wages and are furnished with adequate housing while they are in this country. The wages which the braceros earn in the United States not only provide a living for the laborers and their families but also furnish the Republic of Mexico with its second most important source of American dollars. Our continuing favorable balance of trade with Mexico indicates the importance to American business of maintaining this program. Mexico is one of our most important customers and in 1960 our exports to that country were $807 million compared to imports of $443 million.
>
> Statutory provisions give full protection to domestic workers and protect their jobs from possible competition from Mexican laborers. Before a farmer can obtain Mexican laborers, certification must be made by the Department of Labor that an adequate supply of domestic workers is not available. I do not mean to imply that there is always full employment in areas where Mexican laborers are used, since it often happens that domestic workers will not do the type of work required. If our farmers could get sufficient domestic laborers at the time they are needed and at wages which the farmer could afford to pay, I am sure they would be happy to do so. The Mexican labor program is in reality a program of necessity.

I should like to associate myself with the remarks of the distinguished Senator from Arkansas. It points up a very important aspect of this whole subject, the necessity of not shutting off the flow of dollars into Mexico, so that it may continue to trade with us. As the Senator notes, we have a very favorable balance of trade with the Republic of Mexico.

A great many misconceptions about this program could be summed up by a paragraph from an editorial published in the Evening Monitor, published in McAllen, Tex., on August 26:

> The bracero is no bargain worker. He must be recruited, transported, insured, housed, fed and returned. He is brought "hog round," as the cotton men say. That is, sight unseen, ungraded, unknown. He may never have seen a boll of cotton. He may have arthritis, or the sleeping sickness. But you "rent" 50 of them from the Mexican Government and you take the first 50 out of the chute.

This says very succinctly and effectively what should be understood, that is, that wages are not the sole cost of the bracero worker. There is also transportation, insurance, housing, and feeding. We can understand the concern of the southwestern farmer for this program and its future, when we note the cost involved.

These amendments represent a further intrusion of the Department of Labor in affairs in which the Department of Labor should not be involved. The program in reality should be administered by the Department of Agriculture, not by the Department of Labor. We seem to be bestowing a great many powers on the Secretary of Labor these days.

We are going to give him power to go into a conflict with the farmers at the very administrative level in the Department of Labor. In the Committee on Labor and Public Welfare, we are going to give him more specific power with respect to supervising pension disclosure, and all that sort of thing. Pretty soon we will be able to abolish the Presidency and let the Department of Labor take over and run the country.

I do not believe that the Department of Labor can be said to have a proagriculture orientation.

This has never been true. It is not true now. We are placing the farmer at the mercy of a Department which is not cognizant of his problem, a Department which is not familiar with his problems, and is not necessarily in sympathy with him.

The enactment of the proposed amendment would plunge the Department of Labor at every level of administration into constant conflict and controversy with farmers, since every decision would be a question of judgment as applied to the particular circumstances.

Whether or not the local official of the Department in a particular area was lenient or autocratic, cooperative or dictatorial, would be a matter of major significance to the farmers in an area.

No farmer would know where he stood, what would be required of him, until some official of the Department told him, and when he was so told that would be the law so far as he was concerned.

It is one thing for people to be required to comply with a law which they can read and understand. It is quite another thing for people to be required to do what a Government official tells them to do. The difference is basic—the difference between freedom and totalitarianism.

This would be in exaggerated form the substitution of government by man for government by law.

State and National average farm wages are an average of wages paid to a work force ranging from the highly skilled and experienced to the unskilled and inexperienced. Averages include such skilled workers as dairy herdsmen and milkers, machine operators and repairmen. They include many full-time farmworkers whose abilities and responsibilities may equal and even exceed those of the farmer himself.

To use such averages as a criteria to which workers engaged primarily in routine harvest and cultural operations should be raised is an inequitable burden to place on farmers.

We do not believe the present upward trend in farm wages can be disregarded in this connection. Since 1950, farm wages have increased 46 percent in contrast to the trend in farm incomes. Farm wages are inreasing in all areas. They are continuing to increase. We expect

they will continue to increase in the years ahead without any stimulant from Government action. The restrictions on the employment of braceros provided for in the bill reported by the Senate Agriculture Committee will operate to force farm wages upward.

It appears to me that an attempt is being made here to apply industrial labor standards to agriculture. The industrial economy and the agricultural economy are strikingly different in many respects and must be treated differently. The law and the courts have long recognized this difference.

I quote from the case of *Tigner* v. *State of Texas* (318 U.S. 141), in the Supreme Court of the United States, in which the Court said:

> An impressive legislative movement bears witness to general acceptance of the view that the differences between agriculture and industry call for differentiation in the formulation of public policy.

I urge the defeat of the two amendments proposed to the extension of Public Law 78.

THE IMPORTANCE OF BASIC RESEARCH—DEFENSE DEPARTMENT STILL LAGS IN SUPPORTING LONG-RANGE QUEST FOR KNOWLEDGE

Mr. HUMPHREY. Mr. President, I invite the attention of Senators to certain information which I believe is of importance to this body.

The United States still has a long way to go in order to assure success in surpassing the Soviet Union's long-range scientific objectives.

Thanks to the leadership of President Kennedy, a great many sound steps have been taken to assure U.S. leadership in the immediate, short-range scientific and technological contest.

But in the long run, in the upcoming decades of the 1970's and the 1980's, the race will be won on the basis—not of the dramatic gadgets of the 1960's—but through the long-range science education and the basic research—with which we build for tomorrow.

STUDY BY GOVERNMENT OPERATIONS SUBCOMMITTEE

It is for this reason that for some months, I have been exploring, as chairman of the Senate Government Operations Subcommittee on Reorganization and International Organizations, the issue of Federal support of basic research.

My view has been and remains that this Nation has been "penny wise and pound foolish" in starving basic research.

Facts have been compiled on this subject in great depth, particularly as regards the Department of Defense.

The subcommittee has enjoyed splendid cooperation from Dr. Harold Brown, Director, Office of Defense Research and Engineering, who testified at our subcommittee hearing on July 26, and in particular from Dr. Orr Reynolds and the Office of Science.

DEPARTMENT OF DEFENSE REPLY OF SEPTEMBER 1

I have now received a comprehensive reply from Dr. Brown to a series of supplementary questions which I had directed to the Department. The reply is very valuable for anyone seeking an understanding of the problems of science in our Nation. It contains information never before generally released. As a matter of fact, in some instances, it contains data which have never before even been compiled. This has been due partly to the fact that the respective armed services have tended to utilize differing definitions and systems of reporting on basic research. Even now, considerable progress is still to be made to standardize armed service reporting, so as to make sure that the figures which are given are really comparable. We must not add apples and potatoes and call them oranges.

POLICY STATEMENT EXPECTED FROM SECRETARY M'NAMARA

Most important, I am expecting to receive shortly a policy statement on the part of Secretary of Defense Robert McNamara, as to future DOD support of basic research. From what I understand of the Secretary's enlightened attitude, unlike one of his predecessors, Mr. Charles E. Wilson, the study of a fundamental question such as "Why plants are green," far from being dismissed as unimportant, is now regarded as highly significant for the Nation's scientific future.

Mr. Wilson had said "basic research" is being done "when you do not know what you are doing."

But the fact is that many, if not most, of the greatest discoveries in history have been made when men did not know what they were doing.

As I stated to the Senate on August 3, to underestimate or misunderstand the value of basic research is the height of folly; it could lead to national suicide as well.

The situation as regards basic research is not a dramatic one. It is not one which is likely to get into the Nation's headlines. Yet it is one which goes to the very heart of the issue as to whether this Nation will endure.

UNANIMOUS APPROVAL OF PREVIOUS STATEMENT

In order to sound out additional authoritative judgment, my statement of August 3 was circulated to a number of leading scientists, including many distinguished members of the esteemed National Academy of Sciences-National Research Council. I am gratified to report that I have received an enthusiastic and unanimously favorable reaction.

I ask unanimous consent that the excerpts from several of their messages be printed at this point in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

EXCERPTS FROM COMMENTS BY SCIENTIFIC LEADERS ON SENATOR HUBERT H. HUMPHREY'S STATEMENT OF AUGUST 3, 1961, ON BASIC RESEARCH

A scientist associated with the National Academy of Sciences, National Research Council, Washington, D.C.: "I agree with every comment you have made and congratulate you for your effort in increasing the funding for this essential activity.

"In view of the pressing demand for hardware on the part of the operating and field personnel, there is always the tendency to divert funds from basic work to applied research and development. This is true even though most engineers and scientists recognize that development proceeds faster and more economically the greater the attention to basic and fundamental research.

"Your campaign is especially important at the moment when the U.S. Chamber of Commerce has a research committee represented by several of the prominent scientists and technologists of the country. This committee has actually made the preliminary recommendation that no Government agency should be allowed to do inhouse basic research. If such a procedure is encouraged it would wreck the work of most of the defense laboratories as well as many other Government institutions such as the Bureau of Standards. The chamber is not opposing basic research but apparently has the mistaken idea that such work should be conducted exclusively by the universities through governmental financing.

"Actually in the interest of public welfare basic research should be encouraged and conducted wherever the talent exists for creative work, whether this be in a university, a private foundation, or a Government institution.

"Your efforts on behalf of basic research are deeply appreciated by scientists who understand the significance of such development and what it means to the economic welfare and security of the Nation."

A scientist at Rice University, Houston, Tex.: "May I congratulate you on your vigorous support of basic research within the Defense Department appropriation. As a member of (a Defense Department advisory group), I have tried to do what I could to support increases in basic research support by the Defense Department. As you have said very effectively, the Defense Department has the prestige, the size of general appropriation, and the overall point of view to carry the case for a larger basic research appropriation if it would present the case effectively. It is clear that Dr. Brown agrees with this point of view, and I hope that he will be effective in the years ahead in obtaining Defense Department action in this direction."

A professor at the College of Agriculture, University of Wisconsin, Madison, Wis.: "Congratulations on your stand in relation to the importance of basic research. It is from this source that the important breakthroughs are most likely to come. One of the greatest handicaps in research, particularly in applied research, is that men are concerned too much with the soiled dishes of yesterday and not enough on tomorrow's ideas."

An authority on the role of State agricultural experimentation station, New Haven, Conn.: "You mentioned under the head, 'The Price of Neglect in Prior Years,' that the country is going to pay the price for not doing basic research earlier. You might, therefore, be interested in my appraisal of this, quoting the Broadway show, 'The Music Man,' which makes such a devastating criticism of a salesman, 'he doesn't know the territory.' Our rocketeers are certainly devastated with criticism right now because 10 years ago 'they didn't know the territory.' I go further to say that we in agricultural science do not want to have it said of us that in 1961 'we did not know the territory.'

"More power to you in your efforts to explain to your colleagues the nature of basic research and the need for it.

"I am convinced that many, many nonscientific people do not understand the sort of scientific climate that has to be provided if creative basic research is to go on. You, from your background, are in an excellent position to be able to explain this matter to your colleagues in Congress."

A chemist, University of California, Los Angeles, Calif.: "I was very pleased to receive the excerpts. Basic research is the source of our technical well-being. The engineers are right on the tails of the research men, and the limiting factor in many areas is our fundamental knowledge. I therefore hope you keep the pressure on the Department of Defense and other agencies as well, though many of them are well aware of the situation and do what they can to see that the Federal funds are spent for this purpose whenever scientists capable of this arduous and difficult kind of endeavor appear on their contract roles."

A life scientist at the University of Michigan, Ann Arbor, Mich.: "Thank you very much for sending me the memorandum on the need for increased basic research in the Department of Defense. While much of this refers to weapons and heavy materials, the problem has become extremely acute in the area of the medical sciences and the military.

"I would like, then, to express again our warm appreciation and approbation of your effective presentation."

A member of department of chemistry, University of Arizona, Tucson, Ariz.: "I am pleased to learn of your ardent advocacy of basic research support by the Department of Defense. It is my opinion that in this country we cannot place a dollar limit on the support for basic research but should supply whatever money is necessary to keep all really able scientists engaged in fundametal work. We do not have so many topflight research men that that would put an unnecessary burden on the Treasury. Thanks for sending me your comments."

NSF, DOD, NASA, AEC, AND BUDGET BUREAU

Mr. HUMPHREY. Mr. President, to these comments could be added innumerable others, particularly from those scientific leaders associated with the U.S. agency which is most familiar with the needs, opportunities and challenges of basic research—the National Science Foundation.

Upon NSF, DOD, National Aeronautics and Space Administration, Atomic Energy Commission and others' support of basic research depends much of mankind's future.

I hope that the Bureau of the Budget will not forget that fact when it scrutinizes agency budget presentations for the 1963 fiscal year.

I mention this because we have been reviewing the budget forecast and the budget for what might be called long-term planning on research. I have been concerned over the failure of the Bureau of the Budget during recent years to take into consideration the actual needs in the vital area of basic research.

KEY FACTS IN DEPARTMENT OF DEFENSE REPLY

The facts within the Department of Defense's most recent reply provide so much food for thought that they will require extended analysis.

Let me, however, cite but three highlights:

First. For the 1962 fiscal year DOD reports it expected that the armed services would spend for basic research a total of 4.5 percent out of the total allocation of $4.7 billion for research, development, testing, and evaluation. This 4.5 percent target will not, however, be attained, since less funds were provided by the Congress for basic research than had been originally anticipated.

The 4.5-percent ratio is, in my judgment, shockingly low. In report after report, defense advisory committees and other expert groups, including authorities of the President's Science Advisory Committee, have urged that the proportion of basic research be far higher.

The taxpayers invested in these advisory reports, but the reports have become dead letters. The question is "Why"? Why does the U.S. Government continue to ignore the judgment of the greatest representatives as well as the rank and file of the scientific community?

Second. In many specific installations of the Department of Defense, the amount provided for basic research is incredibly small.

It must be recalled that many of these installations are, by their very nature, highly specialized engineering and testing grounds where it might not be expected that much, if any, pure research might be conducted.

Nevertheless, a serious question prevails as to whether it is satisfactory to have 99 percent of a major facility completely divorced from fundamental research.

I note, for example, that at Huntsville, Ala., the famed Army Rocket and Guided Missile Agency received in the 1961 fiscal year $345 million. But its basic research funds aggregated only $255,000.

Third. There is a tremendous disparity between applications for basic research and the DOD funds available to support them. For example, in the 1961 fiscal year, the three armed services and the Advanced Research Projects Agency received $114 million in meritorious proposals for which funds were not available.

CONCLUSION

The entire situation commands continued intensive study. As a member of the Committee on Appropriation, I intend to do my part, in addition to my work on the Government Operations Committee.

I ask unanimous consent that the full text of the Department of Defense reply be printed at this point in the RECORD.

There being no objection, the reply was ordered to be printed in the RECORD, as follows:

DIRECTOR OF DEFENSE RESEARCH AND ENGINEERING,
Washington, D.C.

Hon. HUBERT H. HUMPHREY,
Chairman, Subcommittee on Reorganization and International Organizations, Committee on Government Operations, U.S. Senate.

DEAR MR. CHAIRMAN: The Secretary of Defense has asked me to acknowledge your letter of July 28 concerning basic research in the Department of Defense.

After discussion of the matter of the Defense Department policy on basic research with the Secretary, I would summarize the policy as follows. The Department of Defense recognizes the great importance of an adequate program of basic scientific research to the Nation as well as to the specific requirements of the Department of Defense and intends to continue to develop and implement specific policies on personnel, financing, etc., that will promote a strong national defense program in cooperation with other responsible agencies of the Government, such as the Department of Health, Education, and Welfare, the National Science Foundation, and the Atomic Energy Commission.

The Department of Defense is at the present time considering a new formal statement of policy on basic research to take account of legislative and organizational changes that have occurred since the last policy directive was issued in November 1957. The remaining questions contained in your letter are answered in the inclosure to this letter.

May I take this opportunity to thank you for your courtesy to me on the occasion of your hearing July 26 and for the opportunity to submit the specific information you requested at that time.

Sincerely,

HAROLD BROWN.

INFORMATION CONCERNING DEPARTMENT OF DEFENSE SUPPORT OF BASIC RESEARCH

2. Definitions: There have been many comments on statistical variations in Government reporting, because of ambiguity in the term "basic research." I understand that ODDR & E has made a study as to whether differences in definition do account for substantial differences in DOD assigning projects to the category of either "basic" or "applied" research. Please describe the results of such review and comment on the definition problem as it concerns DOD reporting to the National Science Foundation.

Answer: Although ODDR & E has made no formal study of the problem of ambiguity in the term "basic research," the matter is one which is under almost constant discussion; and many of its consequences are well known. The Department of Defense adheres to the National Science Foundation definition; i.e., "Basic research is that type of research which is directed toward increase of knowledge in science. It is research where the primary aim of the investigator is a fuller knowledge or understanding of the subject under study * * *" so no conflict exists. However, this really constitutes only agreement on the shape of a pigeonhole—the problem arises when different people, for different purposes, attempt to sort out the appropriate items to be placed in that pigeonhole.

Research which appears quite fundamental or "basic" to those concerned with the building of extensive systems may be regarded as distinctly applied by a university scientist. On the other hand, there are many instances in which research which is superficially indistinguishable from the purest academic investigation is being conducted in the course of a search for solutions to pressing development problems.

Without reading the mind of every investigator to ascertain his motives, there is probably no absolutely reliable way of distinguishing between basic and applied research. Following up discussions by the Coordinating Committee on Science, my Office is at the present time endeavoring to select disciplinary categories into which basic research may appropriately be classified, a measure which should make the work of the three military departments more readily comparable.

"Basic research" seems to be a generally appealing name, and there has been a tendency to assign it to work which is, in some instances, closer to engineering than research. As illustrated by the recent reevaluation of the Army's research program, with a more stringent application of the definition of basic research mentioned above, the cognizant agencies of the Department of Defense are alert to the serious consequences of misidentification in this area and are actively attempting to improve the situation where necessary.

3. Extramural applications to services: The Coordinating Committee on Science has apparently made a study as to the extent of extramural applicants' duplication in basic

research proposals to the respective services. Please provide a brief statement as to the results of the review.

Answer: In 1958 the Coordinating Committee on Science made a study of all meritorious basic research proposals that were received in fiscal year 1957, but were not funded. These proposals from the military departments totaled $44,669,026 and included duplicate proposals totaling $2,877,199 or 6.4 percent.

4. Basic research proportions: Please indicate over the period of the last 5 fiscal years the amounts and proportions of their total research, development, testing, and evaluation obligations, assigned for basic research by the three services and (since its inception) by ARPA.

Answer: Attachment A shows the amounts and proportions of the total R.D.T. & E. obligations assigned for basic research by the three services and ARPA from fiscal year 1958 through fiscal year 1962.

5. Extramural basic research: Please list the names of the respective major offices and facilities in the services and in the Department which receive and pass upon unsolicited, extramural proposals for basic research.

To the extent available, please indicate for each of these respective offices, in dollar figures and in percentages of the extramural total, the obligations for basic research for fiscal year 1961.

Answer: In the Department of the Army, all the facilities engaged in basic research, as well as the technical services, may receive unsolicited extramural proposals for basic research. However, a majority of these proposals in the physical sciences are reviewed by the Army Research Office, Durham, and a majority of proposals in the life sciences are reviewed by the Army Medical R. & D. Command. The Office of Naval Research is primarily responsible for receiving and passing upon unsolicited extramural basic research proposals in the Department of the Navy. A majority of the unsolicited basic research proposals received in the Air Force are submitted to the Air Force Office of Scientific Research. The following table indicates the total extramural program and the basic research extramural program of these four offices.

[Dollar amounts in thousands]

	Total extramural program	Basic research extramural program	Percent
Army Research Office (Durham)	7,287	7,287	100
Army Medical Research and Development Command	7,000	6,300	90
Office of Naval Research	66,600	37,941	57
Air Force Office of Scientific Research	21,551	21,551	100

6. Research institutions: Please cite the total number of extramural facilities and institutions of various types in (a) the United States and (b) abroad, in which DOD supported basic research in fiscal year 1961.

Answer: In fiscal year 1961, the Department of Defense supported basic research in approximately 560 facilities and institutions in the United States and 263 abroad.

7. Intramural basic research: Please provide a list showing for DOD's own principal research and development facilities the dollar amounts represented by basic research in fiscal year 1961 and (at least the approximate) proportion which this effort may have represented of the total work performed at the respective facilities.

Answer: Attachment B is a list of the Department of Defense facilities engaged in basic research showing the fiscal year 1961 R.D.T. & E. allocations and the basic research funds for each.

8. Turnover: Please provide information and comment as to the turnover rate of DOD basic research contracts per year, e.g., including an indication as to the proportions of money which are (a) precommitted and (b) available for new contracts.

Answer:

	Percent
Percent of extramural basic research funds obligated for contracts and grants which were in effect in previous years:	
Fiscal year 1960	67.0
Fiscal year 1961	68.2
Percent of extramural basic research funds obligated for new contracts and grants:	
Fiscal year 1960	33.0
Fiscal year 1961	31.8

It is expected that approximately 30.5 percent of extramural basic research funds will be placed in new contracts and grants in fiscal year 1962.

9. Trend by discipline: What is the trend of DOD basic research support by major category and by intramural, extramural breakdown? Thus, please specify—in a table, broken down by (a) intramural, extramural; (b) the 14 (or so) disciplines or fields of basic research for which records may be available; (c) for a recent base year, e.g., fiscal year 1958, if available; and (d) fiscal year 1961—the total obligations in absolute figures and in percentage form, e.g., for astronomy, physics, chemistry, etc.

Answer: The following table showing the DOD basic research program broken down by disciplinary divisions includes all funds that can be identified as supporting basic research. Other contributions to research, such as military salaries, portions of maintenance and operations funds, etc., cannot be separated as between basic research, applied research, and development and, therefore, are not included.

Increased requirements for a better knowledge of the composition of the basic research program of the Department of Defense, both for internal purposes and for exchanges of information with such agencies as the National Science Foundation, require delineation of basic research in terms of subfields of the major areas. The Coordinating Committee on Science, at its 15th meeting on August 19, 1959, agreed that a mutually acceptable classification system should be established for reporting basic research. When this has been accomplished we will be able to answer future inquiries regarding the Department of Defense basic research program in more detail.

[Dollar amounts in thousands]

	1958		1959		1960		1961	
	Obligations	Percent	Obligations	Percent	Obligations	Percent	Obligations	Percent
Biology and medicine	$19,853	18.0	$23,755	17.0	$28,190	15.6	$32,207	17.1

Psychology and social sciences	2,815	2.5	4,476	3.2	4,329	2.4	4,840	2.5
Total	110,370	100.0	139,672	100.0	180,776	100.0	188,611	100.0

10. Meritorious applications: Please provide for fiscal year 1961 a statement as to (a) the amounts of funds made available by the Congress for basic research in relation to (b) the total amount of dollars represented by meritorious applications.

Answer:

[Millions of dollars]

1961 DOD basic research obligations, including ARPA	188.6
1961 basic research funds obligated for new contracts and grants (including ARPA)	44.0
Dollar value of meritorious proposals received in fiscal year 1961 by the three military departments and ARPA, but not funded	[1] 114.8

[1] See question 3 for estimate of duplication contained in this total.

THE FREE COMPETITIVE ENTERPRISE SYSTEM

Mr. HART. Mr. President, the distinguished chairman of the Antitrust and Monopoly Subcommittee of the Committee on the Judiciary, the Senator from Tennessee [Mr. KEFAUVER] long has emphasized the need for broad understanding of the place the antitrust laws play in the maintenance of the system of competitive enterprise. His most recent expression was in the role of guest columnist in the New York Herald Tribune of September 1, in a column entitled "Suicidal Industry." The column, written by the distinguished Senator, with whom I have the privilege of serving as a member of the Antitrust and Monopoly Subcommittee, is well worth the widest attention. I ask unanimous consent that it may be printed in the RECORD at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SUICIDAL INDUSTRY

(By Senator ESTES KEFAUVER)

(Financial Editor Donald I. Rogers is on vacation. His column today is by Senator ESTES KEFAUVER, Democrat of Tennessee.)

To businessmen the realization that the United States is something of an island of free enterprise in a world of collectivism always comes as something of a shock. In the Communist world, from central Europe through Russia and across Red China the idea of private ownership of industry is anathema. But, even outside the Communist sphere, industry has been nationalized, socialized, and subjected to one form or another of direct governmental control.

That the United States has been able to maintain the free competitive enterprise system, where everywhere else it has given way to one form or another of collectivism, is directly traceable to the existence of that unique American institution, the antitrust laws.

It is apparently a law of history that men must have some philosophy of government to live by. Put very briefly, the philosophy of collectivism is that monopoly is inevitable, and in private hands intolerable, and that therefore it must be taken over or directly controlled by the State. Prices will not be unreasonable because they will be set, directly or indirectly, by the government.

In contrast, under the philosophy of competition, monopoly is not regarded as inevitable. Prices will be reasonable, not because they are determined by governmental fiat, but by the rivalry of competing producers in the market. This rivalry will, in turn, result in the best use and development of resources.

But to perform its function of acting as the "invisible hand" or "automatic regulator," competition must be protected. The unique contribution by this country has been the development of a means of keeping competition alive and vigorous. It is not just an accident that, where in other lands competition has come to be replaced by collectivism, antitrust laws of any real force and effect have never existed.

As a former member of the House Judiciary Committee and the House Small Business Committee and now chairman of the Senate Subcommittee on Antitrust and Monopoly, I have always been astonished by the vigor, and sometimes the ferocity, of the attacks on the antitrust laws by those who have the most to gain from their existence.

For some reason, too, many businessmen seem incapable of realizing that the alternative to the antitrust laws is something which they would regard as utter anathema—direct Government control over prices, profits, etc. If they view such controls as beyond the realm of possibility in this country, they should pay attention to a growing body of opinion which holds that the antitrust laws have had their day, that they are no longer capable of dealing with the huge corporations and high levels of concentration of today and that some more direct form of protecting the public interest must be devised.

Personally, I do not subscribe to this point of view, and, as a consequence, I find myself regarded in some quarters as being rather old-fashioned and behind the times. But to me competition has a dynamic force and creativity that no form of governmental intervention in the price-setting process can possibly replace.

Just as competition must be protected by the antitrust laws, the antitrust laws must in turn be given reality by the antitrust agencies and the committees of Congress having jurisdiction in this field. If there is a more difficult and thankless job anywhere, I do not know what it is.

What makes it so taxing is the myopia on the subject by large segments of the business community. Not only do businessmen fail to realize that those engaged in this work are the real preservers of the free enterprise system, they all too often regard antitrust activity as something which must be stamped out by any means—fair or foul.

Being the target of vilification, smear campaigns, personal attacks (in newspaper columns and elsewhere), intensive attacks on one's job must be the accepted lot of all who enter this form of public service.

These attacks stem from an attitude of mind toward the antitrust laws within much of the business community which ranges from indifference to contempt.

The attitude of too many businessmen toward these charters of economic freedom was dramatically revealed during the course

of hearings on the electrical machinery industry. To certain officials of General Electric and Westinghouse the antitrust laws were traditionally something to be ignored, and where this was not possible, to be evaded.

If they were aware of the inconsistency between praising the free enterprise system and violating the antitrust laws the record fails to disclose it.

Another unhappy manifestation of the business attitude toward the antitrust laws has been a lowering of the intellectual level of the rationalizations for their behavior offered by even the largest and presumably best informed corporations.

A case in point is the steel industry. During our hearings, we were informed that one company must raise its price to meet another's in order to meet competition, and that competition exists only when all prices are the same and all price increases are identical.

Yet 20 years ago, when United States Steel was called before the temporary National Economic Committee, the corporation presented an excellent analysis of the underlying issues, prepared under the direction of Dr. Theodore Yntema, now vice president of Ford Motor Co.

It is saddening indeed to compare that careful study—which one may disagree with but still admire—with today's cliches, public relations gimmicks, personal attacks and such inanities as "raising prices to meet competition."

Big business can discuss complex economic issues with depth and on their merits, because it has done so in the past. It is high time in public discussions for our large corporations to stop putting their worst foot forward.

There can be no gainsaying the fact that in many industries the managers of large corporations possess tremendous economic power. With power inevitably goes responsibility.

The preservation of the free competitive system should not be regarded solely the responsibility of Government. It is also the responsibility of those who direct the activities of our great corporations.

This is a responsibility which they should feel because of both moral considerations and enlightened self-interest. To do otherwise will be to commit economic hara-kiri.

NEED BY SMALL BUSINESS FOR LONG-TERM EQUITY CAPITAL

Mr. PROXMIRE. Mr. President, a very few years ago the Senate recognized the great need by small business for long-term equity capital. This recognition was based on studies which have taken place over a period of some 25 or 30 years. The study had been made by industry, by financial institutions, by Government institutions, by the Federal Reserve Board, and others. There is no question that small business has such a need.

The SBIC was established with the idea that little business was unable to get equity capital from banking houses or elsewhere, and had to have some institution from which to get it. In creating the SBIC, Congress provided for substantial tax advantages. We also provided a substantial amount of Government money. We provided that for every $2 of Government money, private investors in small SBIC's would put up $1 of their own money. The purpose of permitting use of Government money and tax privilege was in order that small business—really small business—would have the opportunity to get the long-term capital, which has been so badly needed.

This morning the Wall Street Journal published a very alarming article on this issue, written by Kenneth Slocum.

The article reads in part as follows:

RISE OF THE SBIC'S—FEDERALLY AIDED UNITS TRIPLE IN NUMBER, POOL FUNDS FOR BIGGER LOANS—THEY AID HELICOPTER SERVICE, BOATMAKER; UNDER $50,000 LOANS GROW LESS POPULAR—A FLORIDA LENDER SPECULATES

(By Kenneth G. Slocum)

CHICAGO.—Bomb shelter builders, fishing tackle producers, helicopter service operators, and ballpoint penmakers are among the businessmen benefiting from a new trend in small business financing.

Within the past 12 months, the number of Government-aided small business investment companies has roughly tripled, to 354. Helping this growth has been a trend by the SBIC's to split their processing costs by combining their capital to make bigger loans.

"A year ago the little guys in this business—

That is, the little small-business investment companies—

didn't have a chance, but now we're teaming up, says Philip E. Freed, a Chicago attorney who serves part time as secretary of the Mid-North Capital Corp., one of the small-business investment companies. The smaller SBIC's biggest loans in many cases used to be too small to offset costs of finding, investigating and servicing them. Now joint investments, besides cutting costs and offering little SBIC's an interest in bigger companies with greater potential, are attracting even the bigger SBIC's because they provide more safety through diversification, both geographically and by industry.

A little later the article describes an investment made by a California company, as follows:

The mechanics of SBIC joint investments are relatively simple. For instance, the Cambridge Fund of California, Inc., Long Beach, developer of shopping centers and service stations, needed some $850,000 recently to finance planned expansion. Inquiries in financial circles led the firm not to local bankers, but to an SBIC in New York City, the Small Business Capital Corp.

This SBIC had capital of $400,000, qualifying it for a maximum loan of $80,000 to any one firm, but it set about lining up other SBIC's willing to take part of the investment. In late July, 19 SBIC's, headquartered in such scattered points as New York City, New Haven, Philadelphia, Washington, D.C., Monticello, Ill., and Los Angeles, concluded an agreement for a 10-year loan for $810,000 at 10 percent interest, along with purchase of a 25 percent stock ownership (10,000 shares) for $40,000. The agreement also grants the SBIC's voting control of 50 percent of the stock and four directors on the eight-man board of the Cambridge Fund.

And in the article it is stated that many of the SBIC's are getting in on this development.

Mr. President, I think it is wonderful that people are making money. But we should remind the SBIC's and the Small Business Administration that this sort of money is being made on the basis of a program designed and enacted for the purpose of providing equity capital to small business. But certainly the program is not providing equity capital to small business when it results in providing capital of $810,000 to only one concern.

I have studied this matter, and I find that there have been cases in which loans of over $1 million have been made in connection with this program, which supposedly was intended to operate and provide help in the name of small business. So it is most important that Congress take a look at the actual operation of the program.

After all, both the Senate and the House, in acting on an SBIC bill this week, included a provision for a maximum of $500,000 for such loans. But we find that "the boys" get around that limitation by pooling 20 or more together; and, as a result, even with the $500,000 limitation, they are thereafter able to wind up with an investment of $10 million in one so-called small business. Mr. President, this is not supposition; it is the sort of activity that is described in this article in the Wall Street Journal, which states that such things are now being done, and that Congress should be concerned about them.

I ask unanimous consent that the entire article from the Wall Street Journal be printed at this point in the RECORD, in connection with my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Sept. 8, 1961]

RISE OF THE SBIC'S—FEDERALLY AIDED UNITS TRIPLE IN NUMBER, POOL FUNDS FOR BIGGER LOANS—THEY AID HELICOPTER SERVICE, BOATMAKER; UNDER $50,000 LOANS GROW LESS POPULAR—A FLORIDA LENDER SPECULATES

(By Kenneth G. Slocum)

CHICAGO.—Bomb shelter builders, fishing tackle producers, helicopter service operators and ballpoint penmakers are among the businessmen benefiting from a new trend in small business financing.

Within the past 12 months, the number of Government-aided small business investment companies has roughly tripled, to 354. Helping this growth has been a trend by the SBIC's to split their processing costs by combining their capital to make bigger loans.

"A years ago the little guys in this business didn't have a chance, but now we're teaming up," says Philip E. Freed, a Chicago attorney who serves part time as secretary of the Mid-North Capital Corp., one of the small business investment companies. The smaller SBIC's biggest loans in many cases used to be too small to offset costs of finding, investigating and servicing them. Now joint investments, besides cutting costs and offering little SBIC's an interest in bigger companies with greater potential, are attracting even the bigger SBIC's because they provide more safety through diversification, both geographically and by industry.

This new technique is important to the success of the SBIC program, for some 90 percent of these companies are minimum firms, which have only $300,000 in capital and can lend no more than $60,000 to any one borrower. And the growth in the SBIC program is providing new sources of capital for a wide variety of businesses. Some 150,000 manufacturing businesses and another 30,000 service concerns are considered prime candidates for SBIC funds, according to the Small Business Administration.

Unhappily, however, the joint-loan trend speeds an already marked move away from small loans of $5,000 to $50,000 to the little

businessman. These little—and often unprofitable—loans were a major aim of the whole program, SBIC officials concede.

PROGRAM GROWS FAST

The capital of the SBIC's now totals some $280 million, compared with $44 million a year ago. And the SBA figures funds available or already loaned to business will top $500 million before the end of the year.

SBIC's provide unsecured funds for 5 years or longer to businesses with under $5 million in assets on their balance sheets. The SBIC's often buy stock in the companies to which they make loans. The 3-year-old program enables private investors to form an SBIC with a minimum of $150,000, which the Government matches through 5-percent debentures. After the $300,000 is loaned out, the SBIC can borrow additional funds from the SBA or other sources or sell stock in unlimited quantities.

Tax breaks are a major inducement: Dividends received by an SBIC on an investment are 100 percent tax free; most other corporations must pay a Federal tax on 15 percent of the amount of dividends received. SBIC capital losses are treated as operating losses and are fully deductible from ordinary income, which is taxable at rates up to 52 percent. Most other corporations must use capital losses to offset capital gains, taxable at a maximum rate of 25 percent.

The mechanics of SBIC joint investments are relatively simple. For instance, the Cambridge Fund of California, Inc., Long Beach, developer of shopping centers and service stations, needed some $850,000 recently to finance planned expansion. Inquiries in financial circles led the firm not to local bankers but to an SBIC in New York City, the Small Business Capital Corp.

This SBIC had capital of $400,000, qualifying it for a maximum loan of $80,000 to any one firm, but it set about lining up other SBIC's willing to take part of the investment. In late July, 19 SBIC's, headquartered in such scattered points as New York City, New Haven, Philadelphia, Washington, D.C., Monticello, Ill., and Los Angeles, concluded an agreement for a 10-year loan for $810,000 at 10 percent interest, along with purchase of a 25 percent stock ownership (10,000 shares) for $40,000. The agreement also grants the SBIC's voting control of 50 percent of the stock and four directors on the eight-man board of the Cambridge Fund.

"We experimented with one participation (joint) venture last year and found it so rewarding that we're putting about 25 percent of funds invested this year into group deals," comments Irve L. Libby, president of the First Miami Small Business Investment Co., Miami, "and we'll probably put an even bigger share into them next year."

BIGGER SBIC'S TEAM UP

"We didn't join with other SBIC's in any deals last year," says John M. Breiner, president of the First Connecticut Small Business Investment Co., Bridgeport. "But we figure that about $500,000 of the roughly $1.7 million we'll invest this year will be in joint investments."

While such joint investments were almost nonexistent last year, they probably accounted for about 10 percent of funds extended to businesses by SBIC's in July and August, estimates George J. Miller, chairman of the participation committee of the National Association of Small Business Investment Companies. Mr. Miller also is president of the Baltimore Business Investment Co.

Among the SBIC officials who stress the cost-cutting advantages of "pool" investments is Robert E. Johnson, a consumer credit company official who is also vice president of the Morris Plan Business Investment Co., Cedar Rapids, Iowa. "The biggest cost in this whole program is that involved in finding suitable investments," he says. "So when an SBIC offers us a $50,000 piece of a big loan, our expenses are practically nil in comparison with finding and processing a $50,000 loan by ourselves."

Expenses surrounding an investment vary widely with the SBIC and with the company being investigated and in many cases the borrower must absorb most of them. But an official of a New York SBIC estimates that its costs of making a loan, not including those fees passed on to the borrower, average 5 percent of the amount of the loan. "We make practically nothing on an investment during the first year, if we handle it alone," the official says.

HOW EXPENSES ARE SPLIT

The SBIC's in a joint investment handle the expenses in a variety of ways. In some cases, several SBIC's split expenses equally. In others, the sponsor absorbs all costs, with the understanding other SBIC's participating without expense will later offer the sponsor similar opportunities.

"Pooling capital with others is the only means by which a minimum SBIC can overcome the limitations of its size," says Stewart Devore, president of the Fort Worth Capital Corp., Fort Worth. "By teaming up, we can accommodate the larger size business concern that offers greater profit potential."

"We're only a minimum company but we have a chunk of money in convertible debentures of a company that's going to sell stock to the public in the next few weeks," says the president of a Florida SBIC. "We should be able to sell our stock at a good profit and we couldn't have swung such a deal without participating with others in the big investment."

As this official's comment suggests, some SBIC's are more interested in making capital gains on the stock of companies they help than in earning interest income. Such stock, of course, is often highly speculative.

The SBIC program is still much too new to permit any firm judgments on the soundness of SBIC loans and investments. Although the borrowers are carefully investigated, the element of risk remains sizable in lending to companies that cannot qualify for regular bank loans. The Government, with its holdings of SBIC debentures, has a large stake in the future of the investment companies. This stake is likely to grow as more SBIC's are formed; legislation pending in Congress would permit the SBA to invest bigger sums in each SBIC than it now can.

SBIC officials say the safety of their portfolios is considerably enhanced when they pool funds to achieve diversification by industry. For instance, Allied Small Business Investment Corp., Bethesda, Md., with capital of $1.5 million, is negotiating with three other SBIC's for an investment in National Research Associates, Laurel, Md., which has orders to produce 18 boats that will travel above the water on jets of air, according to Gus Levathes, Allied executive vice president. The boats are designed for use by commercial carriers and the Government.

Allied also has pool investments in a helicopter service, a weather instrument maker, a producer of oil well equipment and a ballpoint penmaker. Allied also is negotiating with a borrower who wants to build bomb shelters. "When we operate alone, investment often runs from $250,000 to $300,000 and this limits the number of loans and thereby the amount of diversification we can accomplish," notes Mr. Levathes. "Now, by joining others on the same investments, we can put in only $100,000 and spread ourselves into more industries for safety's sake."

GEOGRAPHIC DIVERSIFICATION

Some SBIC's also are eager for diversification geographically. "While we used to operate mostly in the New York City area, participation loans have now given us investments in Florida, Pennsylvania, Arizona, and California," says Harry L. Schein, president of Small Business Capital Corp., New York. "It enables a New York company such as we are to invest in areas such as southern California, where growth is the greatest."

Growth in the SBIC field has been encouraged not only by the sunnier prospects for smaller SBIC's but by brisk entry of banks, usually considered the most conservative of financial institutions. Some 114 banks now own all or part of 55 SBIC's.

One bank which recently entered the field is the First National Bank of Chicago, which put up $3 million capital to form the wholly-owned First Capital Corp. "The basic reason for our interest in the SBIC program is to build future customers," comments Clarence B. Jennett, president of the First Capital Corp. and a retired vice president of First National. "We plan to wet-nurse the most promising little men to the point where they are good customers for First National's conventional banking operations."

Also, many banks are convinced the SBIC program is a needed adjunct to the Nation's financial institutions. "There's no doubt that we have a gap in our economic structure," maintains Lee Davis, president of the Southeastern Capital Corp., Nashville, an SBIC formed by 54 State and National banks. "Commercial banks are not geared to handle long-term loans and most institutional lenders such as insurance companies and pension funds want only the blue-chip borrowers."

While laws of many States now prohibit State banks from joining the SBIC program, there are indications that many of these States will alter the laws, as did Tennessee. "The potential loss of business to National banks will force State banks to influence legislators to pass enabling legislation," predicts a spokesman for the Small Business Administration. Illinois voters soon will be asked to approve such enabling legislation.

While prices of the stocks of many publicly owned SBIC's fell from spring highs as investor fever cooled, average bid prices August 30 of 12 key stocks was $16.35, compared with initial offering prices of $11.25, according to SBIC Evaluation Service, Chicago, an industry newsletter. The high for the year was $22.10 on May 31. Bid price on Electronics Capital Corp., San Diego, this week is about $35, compared with an issue price of $10 in June 1959. Growth Capital Corp., Cleveland, has a bid price of $27.50, up from an issue price of $20 in June 1960. Bid on Florida Capital Corp., Palm Beach, is about $8.50, up from an issue price of $8 in July of last year.

SBA figures show that 77 SBIC's which had been in business for at least 1 year on December 31, 1960 (latest date available), had net income after taxes for the year of 10.8 percent on their investment portfolios. There have been no failures so far.

Small business concerns which have borrowed money from SBIC's are generally enthusiastic about the benefits. "Our suppliers offer 2 percent discounts for payment within 10 days and these discounts completely offset the interest charges of our SBIC financing," says Frank Etheridge, general manager of Miller Bearings of Orlando (Fla.), Inc., a bearing distributor. "In addition, the time I was spending for financial manipulations now goes in sales effort and we're also saving money through more efficient operation."

Mr. Etheridge says that he investigated regular bank financing but "found they weren't interested in a company only 4 years old."

A HELICOPTER SERVICE

"SBIC's played a big role in the birth of our company," says James G. Ray, president of the Washington-Baltimore Helicopter Airways, Inc., Washington, D.C., which is seeking approval for an air service in that area.

He reports that when a well-known SBIC, equipped to investigate loans, approved an investment in his company, local financiers were much quicker to put money in the transaction.

St. Croix Corp., a fishing tackle producer based in Park Falls, Wis., credits the sale of $200,000, 7.5 percent, 10-year convertible debentures to the First Midwest Small Business Investment Co. of Minneapolis with boosting its sales. "We were turning away business because we couldn't afford to maintain proper inventories of raw materials and finished goods," comments J. Douglas Johnson, president. "Our sales this year will increase to about $2,250,000 fron. $1,800,000 last year, mainly because of the new financing."

But financing is no corporate cure-all, of course. "We turn down most of the people who apply for money because capital is not the only thing these people need to succeed," observes Mr. Jennett of Chicago's First Capital Corp. "They also have to have judgment, special knowledge, opportunity and a whole lot of luck."

Mr. PROXMIRE. Mr. President, I also ask unanimous consent to have printed at this point in the RECORD a similar article, also expressing concern. The article was written by David R. Francis, and was published in the Christian Science Monitor.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

"SMALL" FIRM INVESTMENT GROWS

(By David R. Francis)

NEW YORK.—"It was a baby 3 years, it's a stripling now, and in 3 years, it will be a young giant."

A spokesman for the investment division of the Small Business Administration (SBA) in Washington was speaking of the small business investment phenomenon.

Such companies make loans to "small" firms on a long-term basis; or buy equity in firms, squeezed by a "credit gap."

Harold C. Scott, president of Midland Capital Corp., presently the third largest small business investment company (SBIC), sees these "SBIC's" as "a great banking system of their own."

Mr. Stott adds: "They probably have a greater future than the Federal savings and loan associations."

These forecasts are an indication of the hopes held out for the fast-spreading firms, permitted to operate under terms of legislation passed by Congress in 1958.

A STIMULUS

The purpose of that legislation—as stated in the act—is "To improve and stimulate the national economy in general and the small business segment thereof in particular by establishing a program to stimulate and supplement the flow of private equity capital and long-term loan funds which small business concerns need for the sound financing of their business operations and for their growth, expansion, and modernization."

When Congress speaks here of small business, it isn't referring to the corner grocery store. It is talking about firms with less than $5 million in gross assets and fewer than 250 employees.

The Small Business Administration estimates that small business investment companies have 120,000 to 130,000 potential customers.

TAX INCENTIVES

In order to encourage the formation of SBIC's, Congress has offered several tax incentives—and more are in the offing probably.

"Who can be against small business?" asks an SBA official. "That's like being against home, family, and flag."

In this hothouse tax climate, 8 or 10 more SBIC's are springing up each week. They now number more than 350.

Minimum capitalization is $300,000, of which half may be lent by the Federal Government. But about 20 percent of SBIC's have a greater capitalization.

Total capital held in SBIC's for investment in small business is in excess of $275 million. This may not be a large sum, compared to the total capital available for investment in the Nation, but it is a total likely to increase rapidly.

STOCK ISSUED

Nearly every week some small business investment company becomes public, issuing stock and thereby enormously increasing its capital. Twenty-eight are now public. Another 15 are awaiting clearance from the Securities and Exchange Commission.

Last week, for instance, the Small Business Investment Co. of New York, Inc., announced that it plans a public offering of 875,000 of its shares at an estimated total price of $17,500,000.

The largest SBIC in the Nation, Electronics Capital Corp., raised a total of $34 million through the sale of ownership papers.

A significant fact about the Small Business Investment Co. of New York, Inc., is that the company is now owned by 17 banks in New York State. The largest holders are the Morgan Guaranty Trust Co., the Lincoln Rochester Trust Co., the Manufacturers & Traders Trust Co., and the National Commercial Bank & Trust Co.

BANKS AFFILIATED

Of the more than 350 SBIC's some 55 are bank affiliated, according to the Small Business Administration. Involved thus are about 114 banks, including the world's largest, the Bank of America, on the west coast. The chairman of the board of Mr. Stott's Midland Capital Corp., C. Edgar Schabacker, Jr., is also executive vice president of the Marine Trust Co. of western New York.

John W. Remington, president of the American Bankers Association in 1960, noted then that through an SBIC operation a bank for the first time in our history is enabled to enter the equity-financing field.

Banks would now be able to provide small business customers with a complete package of financial services, he said at that time.

OPPORTUNITY FOR BANKS

This is a great breakthrough for the banks.

The Glass-Stegall Act of 1933 prohibited them from any equity-financing operations. Now, under the Small Business Investment Act, they may invest up to 1 percent of their capital and surplus in a small business investment company.

And the SBIC in turn invests its money in small businesses. To date, most SBIC investment has been in equity capital, a small portion in loans.

A concern that banks would build enormous business empires by means of their immense money resources has apparently dwindled. Banks are able to indirectly invest in small businesses—which could grow up.

Mr. Remington pointed out that a bank can now provide a small business with necessary equity financing and in turn can then expand its own line of credit to the growing company.

Mr. PROXMIRE. Mr. President, I also ask unanimous consent to have printed at this point in the RECORD an article on the same matter, written by Vance Trimble, and published recently in the Washington News.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A $500,000 LOAN LIMIT ON WAY FOR SMALL INVESTMENT FIRMS

(By Vance Trimble)

Congress is putting a $500,000 limit on loans made by the suddenly flourishing small business investment companies.

This ceiling was expected to be adopted today by the House. The Senate voted it last week as part of an overhaul that both sweetened and restricted the Government-sponsored SBIC program.

The program began 3 years ago—with no limit on loans—to meet a need for equity capital and long-term loan funds for small business. By contrast, regular Government-financed Small Business Administration loans are for short terms. Limited to 5 or 7 years, they draw 5½ percent interest, are under $350,000.

EIGHT PERCENT

SBIC's, usually formed by a syndicate of investors, may lend for longer periods, get 8 percent.

Some of the 354 SBIC's now operating—with 250 others being organized—have made loans of as much as $1 million. Congressional critics say firms that can borrow that amount shouldn't qualify as "small" business.

Small Business Administrator John Horne counters that there are "few" $1 million loans. Most of those made by SBIC's, Mr. Horne said, are for under $500,000.

Senator WILLIAM PROXMIRE, Democrat, of Wisconsin, and other Congressmen take a cautious view of the boom in small business investment companies. Since January 1, 177 SBIC's have been licensed by the SBA.

That means that under the Kennedy administration licenses were granted in 7 months to nearly as many SBIC's as were authorized in 2½ years under the Eisenhower administration.

VIEW

Such a mushrooming of special lending facilities, in the view of informed Congressmen, requires diligent policing to avert an assortment of potential malpractices.

A chief lure to SBIC organizers has been special favorable treatment under tax laws. Additionally, the Government in effect, furnishes $2 of original capital for every $1 provided by SBIC organizers.

From a $250 million revolving fund, the SBA has been permitted to put up $150,000 of the minimum $300,000 needed to start an SBIC. The SBA can immediately provide another $150,000 to the new investment company.

The Kennedy administration wanted this limit on matching capital boosted from $150,000 to $1 million. The Senate raised it to only $300,000. The House legislation would make it $500,000.

NBC DESERVES COMMENDATION FOR SPLENDID TELEVISION POLITICAL SCIENCE COURSE

Mr. PROXMIRE. Mr. President, on Thursday, September 7, the Members of the Senate and House were invited to a special screening of the NBC–TV network's new "Continental Classroom" course on American Government. This is a new educational series which will appear on some 170 TV stations early weekday mornings starting on September 25.

This most interesting preview for the Congress was made possible by the network, the American Political Science Foundation, the National Council for the Social Studies, and the American Association of Colleges for Teacher Education, who are joined as professional sponsors in the presentation of the course. These organizations deserve our thanks for arranging this preview.

The TV series is conducted by Dr. Peter H. Odegard, the eminent professor of political science from the University of California at Berkeley. Over 300 colleges and universities throughout the country are offering full academic credit to students who complete the course. I am sure that the Members of Congress join me in the hope that this television course will bring to its viewers a greater understanding and appreciation of the affairs of American Government at every level.

Mr. President, I yield the floor.

EDUCATOR SAYS "WE REJECT FEDERAL AID"

Mr. HRUSKA. Mr. President, although Federal aid to education legislation is dead for this session at least—and many millions of Americans hope for a longer period of dormancy—it is bound to be resurrected. This has been so every few years since 1870, when the first bill on this subject was introduced in Congress.

Advocates of Federal aid are still hopeful.

It is heartening to know, however, that those who have great faith in the present non-Federal system of education are constantly, and even now, alert.

My attention has been called to a well considered article entitled "We Reject Federal Aid," written by Dr. Anthony Marinaccio, superintendent of public schools in Davenport, Iowa, since 1959. The article appears in this month's issue of Nation's Business.

The author has devoted 27 years of his life to education—as a college professor, school principal, and as superintendent or assistant superintendent of schools in three other midwestern communities, before coming to his present position in Davenport, Iowa.

FEDERAL AID TO EDUCATION IS UNNEEDED AND UNWISE

These two points are emphasized in Dr. Marinaccio's article.

The Senator from Nebraska has often pointed out that the first general Federal aid to education bill was introduced in Congress over 90 years ago—in 1870, to be exact.

That bill and every one since has been turned down. This fact in itself should prove the lack of need for such a measure. Each time one such bill was introduced, the cry of "Wolf! Wolf!" has been raised. It was asserted, each time, that without such a law education in America would suffer badly, and so would the country.

Yet, without Federal aid, the United States has fashioned and developed a splendid progressive educational system—the best in the world, and the envy of all nations.

It is not perfect. It is not totally adequate. It can be improved and developed. That is in the very nature of all truly democratic institutions.

But when we say that expansion and improvement are needed in our school system, it does not follow that these can be done or must be done only by the use of Federal funds.

The fact is that as to classrooms, teacher supply, teacher pay, and in many other respects, the present system is being vastly improved without Federal intervention and management. It is being done with locally generated or State generated funds, with retention of local control.

Moreover, the past decade's record and the future outlook prove that State and local governments are better able and better situated to provide for unmet needs of the school system than is the Federal Government. This is especially true in view of the national defense requirements of present days.

FEDERAL AID MEANS FEDERAL CONTROL

It is on this fact that Dr. Marinaccio scores most effectively.

He states:

> If we allow Federal aid to education to come on a big scale, we will be moving—perhaps slowly at first, but more rapidly later on—to centrally directed education that could take us down the same road traveled by Mussolini and Hitler and Stalin and all totalitarian countries of the past.

This is a strong statement. It forecasts an ugly thought. But it does speak the truth.

Virtually everyone who advocates the enactment of this type of measure disowns and repudiates the idea of favoring a law which would embrace Federal management or control of schools. Every bill for such aid contains express, clearly stated provisions to that effect. Such provision forbids the Federal Government or any of its officials or agents or employees from exercising "any direction, supervision, or control over the policy determination, personnel, curriculum, program of instruction, or the administration or operation of any school or school system."

This language is found in the Senate approved bill of 1961.

But it is a vain gesture. There are many reasons why this sharp statement is true.

First, it is just as easy to amend or repeal such a provision as it is to enact it into law in the first place.

Second, past and present experience proves that "control does follow aid," as Dr. Marinaccio declares.

He writes:

> Proponents of Federal aid to education continually assure us that there will be no control. In Davenport, Iowa, in Peoria, Ill., in Missouri, and in other places where I have had contact with public schools, I found the opposite to be true. Control does follow aid.
>
> Uncle Sam cannot hand out large sums of money without checking to make sure this money is properly spent. When you get to checking the spending you have to have a standard against which to check it. This becomes control.

He cites experience with the National Defense Education Act of 1958. He refers to his earlier experiences with vocational education.

In regard to those acts, the views of Dr. Marinaccio parallel the testimony of Dr. Allen P. Burkhardt, of Norfolk, Nebr., then superintendant of public schools, as given in the 1958 Senate hearings, and of Prof. Claude J. Bartlett, assistant professor of psychology in George Peabody College for Teachers, at Nashville, Tenn. In this connection, I refer to the May 24, 1961, CONGRESSIONAL RECORD, pages 8804 and 8805.

Mr. President, I ask unanimous consent that all of Dr. Marinaccio's article be printed at this point in the body of the CONGRESSIONAL RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

EDUCATOR SAYS: "WE REJECT FEDERAL AID"—HOW REDTAPE AND DICTATION RESULT WHEN CITIES GIVE IN TO THE LURE OF GOVERNMENT ASSISTANCE

(By Dr. Anthony Marinaccio)

Don't let anyone tell you that Federal aid to education won't lead to Federal control. I have been on the receiving end of Federal aid and I have seen the controls develop and grow.

It's a dangerous delusion—this notion that aid from the Federal Government does not lead to interference with the freedom of local schools to manage their own affairs.

In a Missouri community where I served as superintendent of schools I saw a dramatic example of how this can happen. The public schools there were receiving Federal funds for vocational home economics education.

Ostensibly, there were no strings attached. In fact, however, we were harassed by a school supervisor who, in her capacity as an inspector employed by the State—but actually paid by Uncle Sam—attempted to force changes in our curriculum and facilities which our own vocational training specialists knew to be inadvisable.

When we refused to accept her ideas, she said, "Well, I am not sure that I want to approve the funds you get for this program."

What did we do? We did what I feel every school system in America should do in a situation where its basic rights are threatened. We rejected the Federal program and ran our own.

There are other examples of the controls which come with so-called aid from Washington. But before I enumerate some of those which my 27 years in education have revealed, I want to make this point most emphatically to all Americans—and particularly those responsible for the training of our youth: America is in real peril of losing its freedom as a result of corrosion from within, and that corrosion, I am convinced, will be hastened if the Nation adopts large-scale programs in which the Central Government finances local schools.

Some will say that I am an alarmist, that I am painting the picture in unnecessarily dark colors. Let me say that I am not wearing blinders or fighting for a preconceived idea. I am, I think, a realist. I know that sometimes circumstances make it necessary for the Federal Government to help localities with their school problems.

One such special case is what is known as an impacted area. These are communities where, because of Federal installations, tremendous numbers of children come in suddenly and fill up the schools. Such communities should be given Federal help.

NEED FOR "AID" NOT WIDESPREAD

In most public school systems, there is no need for asking or expecting Federal help. The job can be done at the local level—where it should and must be done if we are

to preserve our freedom. America has been built out of this thing we call freedom. People can learn how to handle freedom—to be free—only if they have such powers as free education. Essential to free education is the power of the community to decide for itself what its schools should teach, and how to finance the teaching.

If we allow Federal aid to education to come on a big scale, we will be moving—perhaps slowly at first, but more rapidly later on—to centrally directed education that could take us down the same road traveled by Mussolini and Hitler and Stalin and all the totalitarian societies of the past. I don't want this to happen. But it could happen. It's precisely the danger which Washington and Jefferson and Benjamin Franklin were concerned about when they met at the inn in Williamsburg after the Revoluntionary War.

"Now that we have won this thing," they said in effect, "are we able to educate the masses of Americans to be free and to have responsibility for control of their freedom—or will chaos result?"

Proponents of Federal aid to education continually assure us there will be no control. In Davenport, Iowa, in Peoria, Ill., in Missouri and in other places where I have had contact with public schools, I found the opposite to be true. Control does follow aid.

Those who administer aid want to check the programs and courses of a study. They suggest programs. They suggest the type of personnel you should hire and what you should pay them. They suggest what you should teach and, through these suggestions, they are actually controlling the situation.

Uncle Sam cannot hand out large sums of money without checking to make sure this money is properly spent. When you get to checking the spending you have to have a standard against which to check it. This becomes control. It is really as it should be. Billions of dollars should not be loosely distributed and their use left unmonitored. So, you're in a vicious circle. If you're running a public school system which receives Federal tax dollars, you have to pay attention to what the Federal Government or its agents say, or you just won't qualify for the funds.

Look at the National Defense Education Act of 1958 which sets up grants for science and mathematics.

The preamble of this act disclaims any intention to control local schools, yet you should have seen the thick report which we had to prepare in Davenport if we wanted to qualify for NDEA funds. We had to spell out in detail our program, our organization, and so forth. If that isn't control, what is it?

I know of communities which are spending thousands of dollars on science equipment, language laboratories, additional guidance personnel and tests financed from NDEA funds before they are ready for these things and before they know what to do with the new facilities.

This is an outrageous drain on American taxpayers. Many such communities spend the money from NDEA simply because it is there and its availability invites someone to spend it.

WASTE CITED

In my earlier experience with vocational education, the supervisor wanted us to redo our home economics laboratory. Instead of having a limited number of areas in which to teach cooking and so on, she insisted on having enough for everybody.

Well, this would have been a tremendous waste. We knew we would have only so many students in there, and we didn't want to leave other areas idle. After we rejected the federally supported program, we split the student group so that some were cooking, some were sewing, and some doing other things. That way we saved a lot of money and—most important—did a better job of teaching.

We are now starting an electronics program under vocational training for adults. Federally connected people, through the State, worked with us in making out the courses of study, and the plans for the program. They made suggestions for the kind of person we should find, and how much we should pay him.

In their letter they said, "These are only suggestions." Well now, you probably know what "only suggestions" means coming from a superior office.

The drive for Federal aid to education has been gaining momentum in recent years because of a tremendous growth in the numbers of children to be educated and the teachers and facilities needed to do the educating. In addition, inflation has led to a rise in the cost of materials needed for school construction and, most important, in the salary requirements of teachers, many of whom are still underpaid. The net impact of all these pressures in many communities has been almost revolutionary. The average taxpayer sometimes can't see why his taxes should be so high.

We have to get across to the taxpayer—at the local level—that his higher taxes are buying better schools and better education. If he is tempted to think that running to the Federal Treasury will relieve the burden, he must be shown that nothing comes from Washington that doesn't originate in his own pocket.

Most communities can handle these increased needs locally if they will recognize the needs and have the initiative to do the job. In Davenport, where our board of education is on record as opposing Federal aid, we overcame the problem of teacher pay. Our school board spearheaded the campaign, starting about 3 years ago. The board enlisted the support of our local chamber of commerce, and other civic groups. Result: In 3 years—counting next year, which is already budgeted—the average classroom teacher will have realized a pay hike of from $1,000 to $3,000.

We did this by getting local support for a school tax increase. I am gratified by the result. It has raised the morale of our teachers. They have seen that the public recognizes their economic status and have thrown themselves into the job. They have organized new courses of study, invented new materials for the classroom, introduced language labs, including the teaching of foreign languages to children in the second grade. They work after school and on Saturdays.

LOCAL ACTION ESSENTIAL

This is the heart of the matter. Local action to solve local problems. Not enough communities are doing this, in my opinion. Too many bond issues are thrown out because of lack of understanding; too many tax levies are being voted down When that happens, the superintendent of schools and board of education run to the Federal Government for money.

We lost one bond issue last year but a committee came right back to push it and get the job done. One of the obstacles is the fact that the administration has come out for Federal aid. Many people in Davenport, meeting me on the street, say: "We're not against your program, but our taxes are high and we think we can get the money from the Federal Government."

One of the things which we should all recognize, realistically, is that if Federal aid is ever voted on a massive scale, many communities—including my own—will tend to think that they should apply for it, just to get their share. This is another reason why it is so important that the Federal programs be stopped before they get started.

I have studied history, and I am disturbed by the lessons it teaches. I see some ominous things in our society which emerged in past societies prior to their collapse. One of the most menacing signs is a drift into centralization, abandonment of individual responsibility.

What is happening in America today is comparable to what happened to Rome and Greece and Egypt. After the individual citizens of those States rose to great heights and everything became abundant, they forgot how they got the abundance. We are living better than we have ever lived, yet I wonder if we are not forgetting how we got there.

We got there through individual initiative, not by turning to someone else to solve our problems. If we let the centralization trend continue, we will wind up in the predicament described to me by a Russian teacher to whom I talked recently. I asked this teacher why Khrushchev and the other Soviet leaders are pushing so hard to surpass America.

"We won't have to fight you," this teacher replied with cold impersonality. "You will fall from within."

The reason why we are drifting toward the superstate and consequent loss of local initiative, stems, I feel, from widespread ignorance of our economic and political system. Our youngsters—for the most part—simply do not know what got us where we are today, and what makes our system tick. The same must be said about our teachers.

In our public schools you see very little in our curricula that even refers to our system of free enterprise. The student has to elect one economic course out of 12 years of work, one semester. We teach our economic system in only an incidental way.

Let me illustrate this: Say a youngster makes a pair of bookends in shop. He gets the mistaken notion that, since he paid 15 cents for the two pieces of scrap wood he used, and perhaps 15 cents for his shellac and what not, the bookends are worth less than a dollar. Then, when he sees a pair of bookends in a store window for $19.95, he assumes that somebody is making $19.

If our teachers understood our economic setup better they would say:

"Now look, boys, you are going to make a pair of bookends," and then they would study together how bookends are produced by industry; what the overhead cost is; how much goes for taxes; what it costs to supply the tools and to pay the workers. When you put it all together you might find a 2-percent margin of profit, or 3 or 4, and that would give the youngsters a more accurate grasp of competitive enterprise.

Why are our teachers so poorly equipped in economics? Many of today's teachers weren't taught economics when they were in school—or, at least, weren't motivated to study it. You must add to this the fact that some teachers feel they do not receive an adequate financial return from the society they serve.

RETURN TO OUR EARLIER VALUES

The challenge we face nationally has subtle aspects. When I was a boy, young people were quickly acquainted with the fact that they had responsibilities. We carried groceries, or sold door to door. The importance of hard work, initiative, and self-reliance was made plain to us not only in our own families but in our schools and in our communities.

We have slipped away from those principles, and we must get back to them. Our emphasis should not be on having "big government" do more and more for the individual, but on the individual doing more and more for himself.

If Federal aid to education becomes a reality, I am afraid it will mark the first step toward complete control of the education process by government. Dictation would move slowly, but surely, just as it did in Mussolini's Italy, where even the textbooks

were changed and Il Duce's picture finally showed up on about every fifth page. The schools would eventually become an agency of government, and many people would take their children out of them, leaving the public institutions to accommodate only the paupers and unfortunates whom no one else would take into their private schools. Even private schools would be drawn to the magnet of Federal aid.

We must not let these things happen. The public school is the basis of our strength. It's the bulwark of our society.

In the future we must teach our children to be able to make comparisons between our way of life and communism, but the only way we can teach these things is, first of all, to make sure that they understand what America stands for. Then we should try and teach the truth about communism as nearly as we can see it, and as nearly as we can tell the story. This becomes a difficult thing because our teachers, while they are well meaning and patriotic, generally don't have a foundation which would enable them to compare the American way of life with communism.

I would want to have an intense in-service education program so that our teachers would know. Out of this would come a strong desire to promote the American way.

For a long time I have felt rather comfortable about our relationships with Russia, thinking that someday the people would overthrow their government, but after talking with some Russians, I don't believe they are about to overthrow the government. They have a strong desire, almost a religious feeling, that their country is going to rise to tremendous heights.

They have been imbued with the idea that they are going to surpass America. They have been given a little more than they had—and they had nothing before—and this to them proves that they are making progress.

We must give our youngsters the same faith and strong desire to fight for and to promote American values, and I am afraid that is an area where we are falling down.

We face a difficult job, but we must get this job done, or we truly will fall from within.

LEGISLATION THE WHITE HOUSE FINDS WHOLLY SATISFACTORY

Mr. HRUSKA. Mr. President, last week, during debate on the conference committee's report on foreign aid, discussion centered around the curious fact that the White House had found "wholly satisfactory" a provision which only a few weeks earlier it had rejected as "not satisfactory." The implication was that when the administration sponsors certain "must" legislation, what it really means is, "well, almost 'must.'"

Another example of this strange policy is at hand now. The Senator from Nebraska received, as presumably did all Senators, a warm letter from the Secretary of Agriculture; it was dated August 25, and it expressed appreciation for the interest of Congress in farm legislation this year, and hailed the omnibus farm bill as "the most constructive and promising farm legislation in many years."

This statement by the Secretary is a complete 180° reversal of position, because the bill, as passed, left out the original title I, which the Secretary had previously and often described as virtually an indispensable part of his proposal.

Title I was deleted in spite of the Secretary's insistence that it be made into law.

But now he describes the omnibus farm bill, as enacted, "the most constructive and promising farm legislation in many years." Thus, he achieves a rewriting of history.

This, Mr. President, is in spite of the fact that the bill which was sent us by the President was described in Time magazine as being "gutted" by the Congress. The New York Times referred to the "dismantling" of the bill. The Wall Street Journal said it had been "reduced to a shell."

This is the bill which was stripped by the Congress of what the Omaha Stockmen's Journal called "the vicious title I which would have had the effect of eliminating Congress as the principal farm lawmaker and giving unprecedented power to the Secretary of Agriculture." It will be remembered that the Senator from Vermont [Mr. AIKEN] found 23 new grants of authority to the Secretary in that title alone. The Senator's tabulation was made after repeated assertions by the Secretary that his proposed bill would reduce his powers rather than increase them—a clearly erroneous statement.

That Secretary Freeman considered the ill-fated title I as indispensable and, in fact, as a cornerstone of his legislation is clear from the record which he made in campaigning for its inclusion. Let us review some of the actual declarations disclosed by the record.

When Secretary Freeman addressed the American Agricultural Editors Association, here in Washington, on April 28, the Associated Press quoted him as "predicting disaster for farmers if Congress did not pass his farm bill or something like it."

The Secretary repeated the warning on May 3, in testimony before the Senate Committee on Agriculture and Forestry, when, in arguing for the omnibus bill, he said:

> Delay or postponement now could have disastrous results.

The Secretary later testified that if his bill did not pass, we could expect "only economic disaster for the farmer, and a blight on our entire economy." He several times described the need for his bill as "urgent."

When the Senator from Kentucky [Mr. COOPER] asked Mr. Freeman whether it would not work just as well to have the Congress enact farm legislation in the usual way, the Secretary said he would "feel rather strongly" about getting the powers he sought. Later, in response to the same question, he said:

> Therefore, I feel that some kind of expedited procedure whereby we can get action, absolutely, is essential.

In an address to the National Press Club, on April 17, Mr. Freeman warned ominously:

> May I say quite frankly that I believe undue delay would be very serious—more serious than simply a postponement of the gains that we expect from the new program. In a real sense we are reaching the point of no return. Delay or postponement now could mean economic disaster. The time is running out.

In a speech at Urbana, Ill., on April 6, the Secretary used the word "essential" to describe the need for the procedures outlined in the administration bill.

Such is part of the record of the Secretary's efforts to brand title I as totally indispensable to a meritorious farm law. But now he has changed his mind. All is now different. Now it is with him "the most constructive and promising farm legislation in many years."

Even his Chief Executive, President Kennedy, engaged in the same tactics. He also made known to Congress and the Nation his belief that title I was virtually necessary. But after the "gutting" of that bill by the deletion of title I, he also joined in the ranks of those who describe the new law as satisfactory.

For example, in his farm message to the Congress, in March, the President stated that he "was deeply concerned," and asked that the Secretary of Agriculture be given the broad powers contained in title I because those he already had were not "sufficiently flexible for all contingencies."

But after having been denied by Congress the powers he asked, the President now calls this "gutted," "dismantled," "shell of a bill," "a major step toward a sound agricultural economy and a better life for the farmers of this country."

And the Secretary of Agriculture says it will "strengthen the economy of the entire Nation."

The Omaha World-Herald reported on June 4 that Mr. Freeman told a Des Moines audience that his bill "may be the last, best opportunity for farmers to secure from Congress the kind of broad, flexible enabling legislation under which good farm programs can be developed."

When the American Broadcasting Co. asked Mr. Freeman, last Friday, for his view on the water content of smoked hams, he replied: "A ham ought to be a ham." It seems strange that Mr. Freeman does not also feel that a farm bill ought to be a farm bill, especially one which was a last chance to prevent disaster for the entire American economy.

Mr. President, the Senator from Nebraska is gratified at the sense of satisfaction expressed by the White House on the foreign aid and farm bills. He is relieved that the earlier estimates of disaster and collapse have been revised, and that the outlook is not so gloomy, after all. It restores one's confidence in the wisdom of the Congress and the people we represent. It also is a body blow to two attempts to advance "government by crisis."

It is hoped that the lesson of these two bills, one labeled by the President as the "most important in the foreign field," and the other as the "No. 1 domestic issue," will not be lost on the Congress. When we and the Nation are told that there will be all manner of dire things ahead if we do not embrace the administration's proposals, if we do not surrender our constitutional responsibilities, if we do not blindly appropriate tremendous sums of money, we should remember these two bills.

Perhaps another way of putting it is that when the cry of "Wolf! Wolf!" is heard too often, there is a tendency to

ignore such a cry, and there is justification for doing so. And perhaps we can substitute for "Wolf! Wolf!" the words of the current cry, "Crisis! Crisis!"

Mr. President, in Gilbert and Sullivan's "H.M.S. *Pinafore*," there is a duet which goes:

Things are seldom what they seem. Skim milk masquerades as cream.

So it is with the administration's proposed legislation. What seemed to be "unsatisfactory" becomes "wholly satisfactory." What seemed necessary to prevent disaster and economic collapse turns out to be not so important, after all.

The strident clamor raised by the President and his associates when they asserted that we could never have a foreign-aid program without back-door financing, or that we could never have a farm program without providing sweeping powers for Mr. Freeman, is reminiscent of the chorus which asked the self-righteous captain of the *Pinafore*, "What, never?" and his cheerful reply, "Well, hardly ever."

WORDS CAN GET IN THE WAY

Mr. HRUSKA. Mr. President, it seems that sometimes words can muddy, rather than clarify, a basic issue. I think this has been happening in regard to our satellite communications policy.

Certainly everybody in the United States agrees that this country should be first in satellite communications. Most people agree that we have the resources and the know-how to be first. The question, it seems to me, is, Why have we not been moving ahead more rapidly?

I think words have been getting in the way.

For example, if we took out of the discussion, for the moment, the glamor words "space" and "satellite," there would be very little discussion as to who should own and operate a communications system. In this country it has been longstanding public policy that the responsibility for public communications rests with the privately owned common carrier industry under public regulation. Yet there has been prolonged debate and discussion about a satellite communications system, when the very purpose of such a system is to provide oversea communication for anybody who wants it. It is a job that the common carriers have been doing for years.

To properly serve all would-be users, a satellite system would have to be an extension of the present communications network—an additional facility. Only in that way could all users get the benefits. These carriers have for years been using radio and cable for oversea communications. No question has been raised about who should do the job when they open a radiotelephone circuit to Ankara, or when they lay an Atlantic cable. These are accepted as normal additions to the network.

But mention "satellite" and "space," and the Government agencies tread gingerly; and some say that manufacturing companies should be part owners of such a system, although they have not been common carriers, or regulated, and I presume they would not want to be classified legally as common carriers.

The discussions go on, and misunderstanding abounds.

I realize that the public interest has to be protected. In this area, it seems to me, the discussion boils down to who should be permitted to use the system and what type of regulation is needed. Here, again, it seems to me that everyone who wants to use it should have access to it, and it should be regulated by the Government. On this basis, I think it is clearly a common carrier job, for their facilities are open to all who want to use them, and they are regulated.

No question is raised regarding the competence of the international common carriers. Nobody questions their management ability, the quality of their research and operations, or their ability to mesh with foreign networks, or their ability to obtain the money necessary to finance such a venture. All this is acknowledged. It is proven by the record.

Nobody who understands the situation claims that putting a communications satellite system into space is any different in essence, from constructing a microwave system across the country. In effect, communications satellites will be microwave towers in the sky. They will carry communications: voice, high-speed data, television, as they do on land. And the most important components of any satellite system will be the inventions of private enterprise, such as the transistor and the Bell solar battery.

So it seems to me that there has been no need to debate any great new policy and there has been no need to be hesitant about moving, for in this country we have a longstanding policy that can be applied to this situation, and that policy has worked. It is the policy I mentioned previously—that the responsibility for public communications rests with the privately owned common carrier industry, under public regulation.

Here in Washington we frequently hear used—this is another case of words which get in the way—the phrase "the country's resources." There is nothing wrong with the phrase, but we hear it so often that I think we sometimes feel that all the country's resources are centered in the appropriation bills that come up before us. On reflection, of course, all of us realize that nothing would be further from the truth. All of us are aware that the production capacity and know-how of the private sector of the economy constitute our greatest resource.

We tell the world about the vigor of our private enterprise. In contrast to the Soviets, we say that where private enterprise can do a job, we not only permit it, but encourage it.

In the field of satellite communications, the international common carriers—regulated private businesses—are ready, willing, and anxious to take all the risks necessary to attain the objective we all seek—that is, to give this country the lead in satellite communications, and at no cost to the taxpayers. To those in Government, I respectfully urge that there be an end to the hesitancy, or else we in the United States may find ourselves chasing a communications sputnik.

GERMAN EXCHANGE STUDENT WRITES OF BERLIN CRISIS

Mr. HRUSKA. Mr. President, a fascinating newspaper article was brought to my attention recently by one of the page boys in the Senate, Kent Kammerlohr. Kent's home is Lexington, Nebr., which welcomed a Berlin student, Volker Claus, on an exchange program sponsored by the Methodist Church a year ago. During the past year he attended the high school in Lexington and stayed at the family home of Dr. P. Bryant Olsson.

On August 13, young Volker wrote a letter to Dr. Olsson, which was later printed in the Lexington, Nebr., Clipper, edited by my good friend, Lloyd Kain.

That letter is very revealing not only from the standpoint of a student who spent a year in this country learning the blessings of liberty but also from the perspective of a young man living in Berlin and experiencing those crises which confront East and West Berlin today.

I ask unanimous consent that the text of the letter from Volker Claus which was published in the Lexington Clipper be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

GERMAN EXCHANGE STUDENT WRITES OF BERLIN CRISIS—LETTER TO DR. P. BRYANT OLSSON FAMILY TELLS OF CONDITIONS IN BERLIN

The following interesting letter was received here last week by the Dr. P. Bryant Olsson family from Volker Claus, a Berlin student who made his home with the Olssons while he attended his senior year in Lexington High School:

BERLIN, *August 13*.

DEAR OLSSON FAMILY: Tuesday, I guess, I received Mom's letter, for which I would like to thank you very much, and now I am going to answer it at once. As you probably will have read already in the newspapers, terror has begun to reign in East Berlin and East Germany, and just today we all begin to feel the tension, which has been mounting for quite some time.

A month ago the stream of fugitives had increased day by day. You will remember that I told you that about 700 fugitives came to West Berlin daily. Just yesterday came 2,700 and this stream will probably go on, we thought. But just today, the Communists have closed the border between East and West Berlin, in order to stop the people of the zone to flee. They have broken all of the treaties made in 1945 and we have to hear about shootings on the border. Today, my oldest brother and I tried to go to the East sector to take some pictures at Brandenburg gate. We just saw about 100 soldiers with machineguns, armored cars and tanks behind them.

Streets and the public traffic are interrupted and East German soldiers have begun today to lay barbed wire along the sector border. Just now I heard that only about 800 fugitives could reach West Berlin by swimming through lakes and rivers or going over rubble fields. Perhaps it isn't right to tell you all this in a personal letter like this is, but it is just so terrible, that I would like to send letters to all the world telling about this injustice.

I guess we all, in East and West, change between indignation and despair. East Germans can't even go to East Berlin. This

is the first time in history that a regime would not allow its people to go to the capital of the state. Actually, that is a joke, but the situation just doesn't allow laughing since 16 millions of Germans have been put in a Communist cage, which reminds us of the Nazis.

But we just can't do anything against this brutal rupture of our city. I guess I can't really tell you how we all feel. Please tell all of this to as many people as possible."

* * * * *

VOLKER.

The remainder of the letter was purely personal, and it closed with "Hoping to see you soon."

MEXICAN FARM LABOR PROGRAM

The Senate resumed the consideration of the bill H.R. 2010 to amend title V of the Agricultural Act of 1949, and for other purposes.

Mr. JORDAN. Mr. President, I wish to discuss the McCarthy amendment.

This amendment would establish a minimum wage for Mexican workers recruited under the act equal to the lower of first, 90 percent of the average farm wage for the State of employment, or second, 90 percent of the national farm wage average.

In determining such average farm wages the Secretary would consider, among other relevant factors, average farm wage rates for workers who do not receive board and room.

This would provide for an automatically self-escalating minimum wage, since any increase in the amounts paid to the Mexican workers would result in increases in the State and National average wages.

The criteria used are not reasonable ones. The Mexican workers are employed largely at stoop labor, the jobs which are least desirable and for which domestic employees cannot be obtained. The use of Mexicans for the higher paid jobs of operating or maintaining power-driven machinery would be prohibited by the bill. The Mexicans are, therefore, employed in the least skilled and least remunerative jobs in agriculture. Any average which includes the most skilled and most highly paid jobs in agriculture is not a fair criterion of what the wages should be for the lowest paid jobs.

The Mexican workers are to be provided with free housing under the terms of the agreement with Mexico. The wages paid workers who are not furnished housing would, therefore, not be a reasonable measure of what ought to be paid the Mexicans. Of course, in taking into consideration the wages paid without room and board, the Secretary might, and should be, expected to make some adjustment for housing, but the amendment does not so specify, nor does it suggest how such adjustment should be made. The criteria which would be established by the amendment are very indefinite and leave very great discretion with the Secretary as to what the measure will be.

At present a reasonable criterion is established by the agreement with Mexico. That requires the Mexican to be paid not less than the prevailing wage rate paid to domestic workers for similar work at the time the work is performed and in the manner paid within the area of employment. This ties the Mexican wage to the prevailing wage for similar employment, at the time and in the area of employment. There is no reason to superimpose upon this any requirement that he be paid at a rate fixed on the basis of wages paid for more skilled jobs in other places. That is what the amendment would do, and it does not appear to be a reasonable objective.

The amendment also strikes out a provision of the committee amendment which would require an employer of Mexicans to pay his domestic workers not less than the prevailing wages for similar work in the area of employment. The testimony before the committee was that some employers of Mexican workers were discriminating against domestic employees. By requiring employers to pay their domestic workers at least as much as they are required to pay their Mexican workers, the committee amendment was designed to provide additional protection for the domestic workers and prevent such discrimination. They are already protected in many ways by various provisions of the existing law. However, the committee felt that this additional provision might close a small loophole, and there is no good reason why it should be stricken.

I wish now to discuss the Keating amendment.

This amendment would prohibit Mexican workers from being made available in any area unless employers had offered domestic workers, first, workmen's compensation or occupational hazard insurance reasonably comparable to that afforded Mexican workers; second, a guarantee of work during at least three-quarters of the workdays during the agreed term of employment; third, basic subsistence when work is not available for extended periods; and fourth, transportation costs.

This amendment fails to take into account some of the basic differences between domestic employment and the employment of Mexican nationals. The Mexican farm labor program is designed to provide a supplementary labor force in times of peak labor needs when a sufficient supply of domestic workers is not available. No Mexican workers can be brought in under the program unless the Secretary of Agriculture finds that they are needed. No Mexican workers can be made available in any area under existing law unless the Secretary of Labor finds that there are insufficient domestic workers. No Mexican worker can be made available under existing law if the Secretary of Labor finds that the employment of Mexicans will adversely affect the wages and working conditions of domestic workers. The Secretary of Labor must make an affirmative finding and certification that such will not be the case.

Once all these determinations and certifications are made, the Mexican worker must be recruited in Mexico and brought to this country. He cannot cross the border to come up to seek work by his own act. When he is brought up, it is for definite needed work to be performed within a reasonably ascertainable time.

The domestic worker on the other hand may be a resident of the area of employment, a student, or a migrant worker who moves with the crop. He may be alone or with his family. He needs no entry permit and is not required to leave the country. He is free to take nonagricultural employment and to leave one employer for another, or not to work at all, without then being required to leave the area.

The States have considered the application of workmen's compensation laws to agricultural workers and have made differing provision therefor or exemption therefrom. The Senate recently gave consideration to a provision for absolute liability with respect to certain agricultural workers when it considered S. 1123, but abandoned that provision in view of the problems involved. On the other hand disability insurance provided by State law may not be appropriate to the Mexican national and it is likely that an amendment will be offered to exempt him from State disability insurance provisions applicable to domestic workers. Workmen's compensation and disability insurance for domestic workers who may be employed in either agricultural or nonagricultural employment at different times should be left to the States.

The agreed term of employment for a domestic worker may start when he shows up for work at the beginning of the day and end when he decides to leave, or at the end of the day, or it may be fixed in any manner that the employer and employee may agree upon. Terms as to a guaranteed number of workdays and provision for subsistence that fit into the standard work contract for a Mexican worker brought from Mexico to Michigan may not fit into an agreement with the worker who is temporarily laid off from industrial employment and seeks agricultural work only until he can get his job back.

Likewise provision for transportation for the Mexican worker brought up from Mexico with a number of other male workers does not involve the same problems as transportation provisions for domestic workers who may be from near or far, may be traveling with their families, or others, and may switch to nonagricultural employment at any time.

The domestic worker is already given the fullest protection possible. The Secretary of Labor must find that the employment of Mexicans will not adversely affect his wages or working conditions. The addition of fringe benefits such as insurance, guaranteed workdays, subsistence, and transportation benefits cannot make the Secretary's determination any easier, but can only serve to make the problem more difficult. It will not necessarily increase the worker's total compensation, but may result in his receiving less wages in the form he wants them and more fringe benefits of a kind which he may never realize and which may not be appropriate to his needs.

This amendment attempts to obtain fringe benefits for domestic workers based on the needs of Mexican workers. Such benefits are not likely to attract more workers than would be attracted by higher cash wages. If such fringe benefits must be provided during the peak

employment periods when Mexicans are employed, will they be eliminated when Mexicans are not employed, or will they be frozen into the employment system? If so, who is most likely to pay for these benefits, the employer or the employee? There is nothing at all in this amendment that requires the domestic worker's total compensation, including these fringe benefits, to be increased above what his total compensation might otherwise be. If we should at any time decide to impose upon agriculture, by legislation, terms and conditions of employment, regulating the term of employment, the number of workdays to be worked, provision for basic subsistence, and carfare, let us do so on the basis of the domestic worker's needs, rather than upon what may be comparable to what someone else may need. And let us at that time examine carefully the price the worker must pay for these legislatively imposed terms of employment.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD a statement by the Senator from Arkansas [Mr. FULBRIGHT], chairman of the Committee on Foreign Relations. He could not be present, and he requested me to place this statement in the RECORD for him.

As Senators well know, he is chairman of the Committee on Foreign Relations. He is greatly interested in our dealings, not only with Mexico, but with all our neighbors around the world. He has attached to this statement a document entitled "The Value of the Bracero Program to Mexico," by Dr. Richard H. Hancock, which shows that the income of the Mexican braceros who work in the United States amounts to the third largest item of income for Mexico. It amounts to $120 million a year, which income is exceeded only by that from tourism and cotton exports. We export to Mexico a great deal more than we import from Mexico. It is the view of the Senator from Arkansas—and I go along with his views—that the bracero program is a good public relations program with our sister country of Mexico.

I ask unanimous consent that the statement of the Senator from Arkansas and the attached statement be printed in the RECORD at this point.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR J. W. FULBRIGHT ON H.R. 2010, A BILL TO EXTEND THE MEXICAN LABOR PROGRAM

We have spent considerable time this session in trying to devise appropriate ways to help the American farmer.

Early in the session we passed the emergency feed grain program. Later, we devoted a great deal of time to the omnibus farm bill. I did not agree with all of the administration's recommendations in the farm bill, but I was in thorough accord with the objective of trying to give the farmer a more equitable share in the fruits of our economy. Every Member of this body, whether they come from an agricultural State or not, understands that the farmer is the backbone of the Nation's economy, and when he suffers the general economy suffers.

A subcommittee of the House Committee on Agriculture, under the chairmanship of Congressman GATHINGS, of my State, held a series of very illuminating hearings this spring on the cost-price squeeze affecting farmers throughout the country. The hearings focused additional attention on the disastrous effects of rising costs and declining income on the agricultural sector of the economy. I hope that my colleagues will take the time to study these hearings and read what the farmers themselves say about the existing situation.

I received a report from the Department of Agriculture only a few days ago which contained startling statistics on the farm income situation. In Arkansas, for example, farm production expenses increased from $303.7 million in 1950 to $476.5 million in 1960—more than 57 percent. During the same period net farm income decreased by 14 percent from $318.3 million in 1950 to $274.7 million in 1960. These statistics while startling by themselves do not begin to portray the personal impact of the farm income problem on the individual farmer who is trying to raise a family and provide them with the amenities of life while faced with constantly increasing production costs and, in most cases, frozen acreage allotments.

I point this out as a preliminary to discussing the need for extending the Mexican labor program which is essential to the cotton farmers of Arkansas, and farmers in many other States. The extension of this program is one way we can help a sizable segment of agriculture. If the program is killed or saddled with restrictive provisions you will have caused a direct injury to thousands of farmers.

I realize that there is a great deal of controversy about this program. Unfortunately, the migratory labor problem has been brought into this issue in an uncalled for manner. Intense emotion has been generated at the expense of reasonable analysis. I hope that Senators will look behind the emotional arguments which have been advanced for placing unneeded and unworkable restrictions on this program and judge the issue on the merits.

The existing Mexican labor program was authorized in the Korean war as a noncontroversial way to obtain the hand labor needed by farmers to replace the domestic labor involved in the war effort. The program is still essential, but for different reasons. In the last decade vast population shifts have taken place which have seriously decreased the availability of domestic farmworkers. In my State, the farmers simply cannot obtain sufficient domestic farm labor to meet the short-term demands of the cotton crop cycle.

During 1960 over 31,000 Mexican nationals helped cultivate and harvest Arkansas' cotton crop. This heavy reliance on imported labor is due primarily to population shifts which have taken place in the last decade within the State and the nearby farm labor market. There has been heavy migration from rural to urban areas and also migration to other States. Arkansas had a net population loss of 6.5 percent from 1950 to 1960, and 57 percent of this loss occurred in the 18 counties of eastern Arkansas where 80 percent of our cotton is produced. At the same time there has been a growing disinclination on the part of many laborers to do the tedious work required in cultivating and harvesting a cotton crop. The net result is that we simply do not have enough domestic labor available in Arkansas or the surrounding areas to supply the farmer's need for hand labor.

It has been argued that mechanization will eventually do away with the need for hand labor on cotton farms. This may be true at some time in the distant future, but it is not true today. The soil and terrain conditions in many Arkansas cotton producing counties are such that picking machines cannot be used in the fields during unfavorable weather. There are also many small farms where use of machines is not practical or economical, and rental machines are not available for these farms until after the crops have been harvested on the larger farms. Another factor indicating continued need for hand labor is the preference shown by many cotton mills for hand-picked cotton over machine-picked cotton.

I do not want to leave the implication that the Mexican labor program is a one-way street designed solely to help our farmers. This is an important program to Mexico. It is her second most important source of American dollars. Mexico is one of our best customers, and in 1960 our exports to that country were $807 million compared to imports of $443 million. Our continued favorable balance of trade with Mexico indicates the importance to American business of maintaining this program.

An interesting analysis of the value of the bracero program to Mexico appears in the House committee hearings on this bill. I ask unanimous consent that there be printed in the RECORD following my remarks a copy of the statement of Dr. Richard H. Hancock which appears in the House hearings on page 42.

Aside from the economic importance of this program to Mexico, there are also important intangible benefits which accrue to both that country and ours. The program has been very effective in improving understanding between the peoples of our countries. The program, in my opinion, could be used to even greater advantage in improving relations between the United States and Mexico. I recently contacted Secretary Rusk and Secretary Goldberg about the possibility of doing something further along these lines. I have received reports from both Departments indicating that efforts will be made to do this. I intend to pursue this further with the officials responsible for administering the Mexican labor program.

The objections to extension of the Mexican labor program center about its effects on the domestic farmworker. I think that the protections which now exist are adequate to protect domestic workers from possible competition from Mexican laborers. Before a farmer can obtain braceros, certification must be made by the Department of Labor that:

1. Domestic workers, able, willing and qualified are not available.

2. Employment of Mexican workers will not adversely affect labor and working conditions of domestic workers similarly employed.

3. That reasonable efforts have been made to attract domestic workers for such employment at wages and standard hours of work comparable to those offered the Mexican workers.

These restrictions in my opinion are certainly adequate to minimize the impact of this program on the domestic worker. In fact, the Department of Labor has often gone overboard in their regulations implementing these statutory restrictions.

I do not mean to imply that there is always full employment in areas where Mexican laborers are used. It often happens that domestic workers will not do the type of work called for. If our farmers could get sufficient domestic laborers at the time they are needed and at wages which the farmer can afford to pay they would be happy to hire them. In reality the Mexican labor program is a program of necessity.

I might point out that the farmers pay practically all of the expenses incurred in the operation of this program. In addition to the fees paid by the farmers into the

farm-labor supply revolving fund, the farmer pays the cost of transporting the worker from the migratory station to the place of employment and then back again. In 1960 the Phillips County Farmers' Association in my State found that the cost for this transportation was $47.32 per worker. The regulations backed up by strict enforcement insures that the Mexican laborers are paid fair wages and are furnished with adequate housing while they are in this country. The entire program is equipped with safeguards for everyone involved—the worker, his employer, and the domestic worker whose livelihood could be endangered by unregulated importation of Mexican nationals.

I oppose the amendment sponsored by the junior Senator from Minnesota. On the surface the amendment appears to be fair and reasonable. But on close examination it is obvious that the effect of the amendment would be to establish a minimum wage for farm labor. The Senator's amendment would require the farmer to pay Mexican laborers a wage equal to at least 90 percent of the average farm wage in the State, or the Nation, whichever is lower. This means that the hard-pressed cotton farmer in Arkansas would be required to increase wage rates for Mexican laborers by 32 percent above the current rate. At the same time this will mean an automatic increase in the wages for domestic labor since Mexican labor cannot be obtained unless domestic labor is not available at comparable wages.

No one can argue that the current rate is a generous wage. I agree fully with the Senator's objective of trying to improve farm wages. But this cannot be done without corresponding increases in labor productivity and farm income which will put the farmer in a financial position to pay better wages. Farmers in Arkansas cannot afford this increase and if you want to take them out of the cotton business, passage of this amendment is a good way to do it.

I want to mention one other fault in the Senator's amendment. The use of the average hourly farm wage for the State does not take into consideration the fact that many farm jobs require a high degree of skill and training. And farmworkers with these skills naturally command higher wages than unskilled hand labor. Let's remember that the Mexican labor program involves only unskilled hand labor. And yet under this amendment there is no distinction between skilled and unskilled labor in setting up the base wage rate. This greatly distorts the resulting average.

The Senate passed a minimum wage bill earlier this year. The Labor and Public Welfare Committee considered all aspects of the bill at great length and did not see fit to recommend a general minimum wage for agricultural workers. The Senator from Minnesota's amendment is a giant step toward a minimum wage for agriculture and any legislation in this area should certainly be thoroughly considered by the Senate Committee on Labor and Public Welfare before coming before the Senate.

I urge that this amendment be rejected.

The Value of the Bracero Program to Mexico

(By Dr. Richard H. Hancock)

The most obvious benefit of the bracero program is the large amount of dollars it contributes to the Mexican economy. Mexico is a trade-deficient area, particularly in regard to trade with the United States. From 75 to 80 percent of Mexican imports are from the United States, while only 50 percent of its exports are to the United States.

Mexico's trade balance for the first 6 months of 1960 showed a deficit of $57,806,000. This deficit would be much greater if it were not for the annual inflow of bracero remittances, estimated at over $120 million annually.[1] Braceros constitute a source of dollars exceeded in importance only by tourism and cotton.

Throughout this calculation, the writer has attested to present bracero savings on the low side; for example, many contracting associations charge less than 7 cents a day for insurance instead of the 10 cents allowed. Further, $4.90 a week seems to be ample for the maintenance of a bracero in view of the fact that the U.S. Department of Agriculture found in the spring of 1955 that U.S. families with up to $2,000 income after taxes were spending only $4.42 per capita each week on food (House Committee on Agriculture, hearings on "Mexican Labor," p. 579).

Not only does the bracero program alleviate Mexico's balance-of-payment problems, but it also serves to lessen conditions of unemployment and underemployment. With a current population of 34.6 million people, Mexico has one of the world's fastest growing populations. In 1957, a year when Mexican President Ruiz Cortines cited Mexico's acute need for 350,000 to 400,000 more jobs, 4 percent of Mexico's entire economically active population—7 percent of those active in agriculture—found employment in the United States, while over 10 percent of the total rural population was directly dependent to varying degrees on bracero income. Bracero money greatly enhances consumer purchasing power, since nearly all this money goes into local trade channels and is not spent on luxury items, as is the case with a considerable portion of the money which comes from nearly all other sources. In Chihuahua the local storekeepers are greatly in favor of the bracero program.

There can be no doubt that braceros and their families are desperately in need of the opportunity to work in this country. According to an outstanding Mexican economist, Señora Ifigenia Navarrete, the average monthly earnings of the 20 percent of Mexican families which comprise the lowest income group in the nation declined from $22 per month in 1950 to $19.80 per month in 1957. The effect of this decline has been greatly accentuated by inflation. The cost-of-living index for workers in Mexico City reveals that living costs rose 80 percent from 1950 to 1957, 12.7 percent in 1957 alone. Surveying conditions in the State of Chihuahua in 1958, I found that the increase in the cost of living was much greater than the increase in rural wages. In representative municipios, rural wages had increased 350 percent since 1943, while the cost of living increased 570 percent based on five commodities (corn, beans, coffee, flour, and potatoes) which make up the bulk of the working class diet in Mexico. The fact that the cost of living has risen more rapidly than have rural wages was emphatically verified by all people questioned on the matter.

The following table shows that more money derived from braceros than from any other activity in the State of Chihuahua except mining, cotton, and beef cattle. Even though Chihuahua statistics are not entirely reliable, these figures show that the bracero program constitutes one of the big businesses of the State. In 1957 more men were employed as braceros than in any other category except agriculture. They comprised 11 percent of the total labor force and 21 percent of the total economically active agricultural population of the State. There are nine municipios in Chihuahua where bracero emigration absorbs some 30 percent of the total active population and 32 percent of the total agricultural labor force. General Trías has the State's highest level of emigration, with braceros constituting 44 percent of the entire economically active population and 47 percent of the total agricultural labor force. In the summer of 1958, I visited two Chihuahua villages where the inhabitants said they had no means of support other than the bracero program. While the effects of the program are not uniformly felt throughout the nation, a study of the dynamics of migration in the other States which contribute heavily to the outflow of migrants—Durange, Zacatecas, Guanajuate, Michoacán, and Jalisco—would doubtless reveal a migratory labor complex similar to that depicted for Chihuahua.

I do not propose that the bracero program be artificially perpetuated, but I do say that it would be extremely unwise to arbitrarily terminate this program on the uncertain premise that the domestic migrants' welfare would be greatly improved. The domestic migrant problem cannot be considered as pertaining exclusively to agriculture. This is a social problem in the United States similar, and in many cases identical, to that of caring for the alcoholic, the physically handicapped, the mentally ill, and the aged. In our Nation today, social derelicts, rejected for all other types of employment, are frequently considered to be apt candidates for agricultural positions. It is our duty as members of an enlightened and compassionate society to make strenuous efforts to succour these people, but we should not place all of this burden on agriculture.

There are many individual examples of the manner in which braceros have benefited from their labors in the United States. I will cite two which happened to come to my attention in February 1961. One man came into our office to cash $1,900 worth of checks, which he said represented his savings during the past 14 months. He said that he had consummated a deal to buy land in Mexico and needed the cash to make a down payment. On further inquiry, I found that this bracero had saved $800 to $1,000 annually during the past 8 years. With this money he had purchased a 30-acre farm, 8 span of oxen and various farm implements, and made miscellaneous improvements on his farm. He had also invested in some city property in Ciudad Juárez.

Another man, who had been working as a bracero since 1953, had spent his entire savings, approximately $6,000, on medical expenses for his ailing mother. Although she finally passed away after various operations and extensive hospitalization, he

[1] The average duration of contract of braceros is 3.5 months, according to the Labor Department (House Committee on Agriculture, hearings on "Mexican Labor," 1958, p. 452), and the average number of braceros contracted annually for 1956 and 1957 was 440,000. The average minimum was taken as $5 a day (the fact that some workers receive less than this amount is counterbalanced by the fact that others receive more than $5 a day). Calculations were as follows:

Average bracero earnings and expenses

	Item	Total
Contract of 100 days at $5		$500
20 days off (13 1½-day weekends)	−$100.00	400
5 days' time loss (inclement weather)	−25.00	375
5 days' subsistence wage ($1.50 per day)	+7.50	382
100 days' insurance ($0.10 per day)	−10.00	372
100 days' maintenance ($0.70 per day)	−70.00	302
General expenses (entertainment, clothes)	−27.50	275
Average amount of money taken or sent home		275
Total money sent or taken home by the 440,000 braceros contracted annually ($275 per man)		120,000,000

pointed out to me that without his bracero earnings her life could never have been prolonged so much, since she could have received little or no medical treatment. He seemed to derive a great deal of satisfaction from the fact that he had been able to provide his mother with the best of care during the final years of her life.

I wish to relate one other incident which has impressed me very strongly with the good effects of the bracero program. In 1958, I happened to meet a U.S. citizen who managed a combined store and post office in a small mountain village in Chihuahua. He said he was disturbed by the fact that substantial amounts of Communist propaganda were being distributed through the mail. He stated, however, that even though the United States was sending out no counterpropaganda, this Communist literature was in his opinion having little effect, since people were able to view the United States in its true perspective through the eyes of returning braceros.

In these days when the conflict between the free world and communism is so strongly contested, we cannot afford to ignore the welfare of our neighbors to the south. The bracero program is a critical factor in avoiding the economic chaos which is the feeding ground for communism. If we give no thought to the welfare of the 2,250,000 Mexicans who derive all or part of their livelihood from the program, we are inviting disaster.

The bracero program has improved the level of Mexican living. Braceros and their families eat better, wear better clothing, and live in better houses. Most important of all, they have the consciousness that their lot can be improved. They have what the sociologists call a higher level of aspiration. In the "Decline and Fall of the Roman Empire," Gibbon says: "In all pursuits of active and speculative life, the emulation of states and individuals is the most powerful spring of the efforts and improvements of mankind." In creating this spirit of emulation in braceroes, and through them in the Mexican nation as a whole, I believe that the bracero program may prove to be a significant factor in the social and economic development of Mexico as a responsible nation of the free world.

Value of production of the 10 principal economic activities in the State of Chihuahua in 1956 [1]

Item	Volume	Value	
		Pesos	Dollars [2]
Mining [3]		1,259,702,485	$100,776,228
Cotton	241,731 bales	355,861,188	[4] 28,468,895
Cattle [5]	262,853 head	237,913,844	19,033,025
Bracero earnings	36,623 braceros		[6] 10,071,325
Forest products		111,559,621	[7] 9,075,000
Maize	98,146 metric tons	62,422,128	4,993,770
Oats	63,027 metric tons	35,295,064	2,823,605
Beans	28,168 metric tons	31,226,480	2,501,318
Wheat	24,743 metric tons	20,982,064	1,678,565
Irish potatoes	26,969 metric tons	15,911,415	1,272,913

[1] Source for agricultural items is Mexico, Secretaría de Agricultura y Ganadería, Boletín mensual de la dirección de economía rural (1957–58); sources for other items are individually cited. Data is for 1956 unless otherwise stated.

[2] Conversion rate used is the official rate of $1 dollar, 12.50 pesos.

[3] From tables compiled by Leopoldo Hurtado Olín, director of the Department of Economics of the State of Chihuahua.

[4] If cottonseed is included, this total is $33,165,608.

[5] Since the variation in the number of cattle sold annually in Chihuahua is extremely wide, the annual average number of cattle sold from 1945 through 1957 was computed from Hurtado Olín, Compendio estadístico del estado de Chihuahua, 1956–57 (Chihuahua: By the author, 1958), p. 15. The value of sales was obtained using the average price received in Chihuahua for cattle on the hoof sold during 1956, with figures from the Boletín mensual de la dirección de economía rural of March 1957.

[6] Each bracero is estimated to have taken home $275 (see p. 37). The figure for the number of braceros contracted is for 1957, since complete and reliable data was available for that year. Moreover, Labor Department officials stated that 1957 was a typical year regarding bracero movement in Chihuahua.

[7] Figure is for 1954 and is the latest available. Figures for volume of production coincide almost exactly with those for 1956 and 1957. Mexico, Secretaría de Economía, Dirección General de Estadística, Anuario estadístico de los Estados Unidos Mexicanos, 1955–56 (México, D.F.: Talleres Gráficos de la Nación, 1957), pp. 508–518.

U.S. DISARMAMENT AGENCY

Mr. PROXMIRE. Mr. President, I was a cosponsor of the Disarmament Agency bill which passed the Senate earlier. I see the author of the bill is present in the Chamber. I wish to take advantage of that fact, because I understood opponents of the bill to say that this is the worst possible time to pass the bill, that it would be misinterpreted abroad, that it would indicate weakness on the part of the American people.

I wish to make it absolutely clear that, so far as this cosponsor is concerned, my cosponsorship of the bill and my vote for the bill, far from indicating any feeling of weakness or any willingness to appease Communist Russia, has precisely the contrary intention.

I feel very strongly that this is a time when we must be strong and firm, and a time when we must increase, not decrease, our armaments. This is a time when we must do all we can to strengthen our nuclear ability.

I am very proud to see that one of the four divisions called up by the Secretary of Defense is Wisconsin's great 32d National Guard Division.

I feel we must do all we possibly can to establish the greatest nuclear deterrent, the greatest Air Force, the most powerful Army, and the most powerful Navy in the world today.

However, I think that with every dollar we spend on defense, with every soldier who is alerted or called to active duty, every American must keep in mind that we do this to achieve peace in the world. As Churchill said on more than one occasion, "We arm to parley."

We are building up our defenses certainly not because we wish to use those defenses to inflict death and destruction. We have built up our defenses because we recognize that when one lives in a world with Khrushchev, when one lives in a world with the Communists, the only way one can negotiate is to negotiate from strength, to negotiate from power, to be in a position to command respect. One cannot command respect unless one has an air force, an army, navy, and nuclear power with which to command it.

It has been said in the history of mankind that every arms race has led to war. This arms race will be no exception if it continues as an arms race, with fantastic technological development. As the situation is developing, as one outstanding author, Mr. Hadley, has said, technology is now undergoing a complete revolution every 5 years. The H-bomb is spreading, and it will spread further within the next 10 years. The New York Times says that within 10 years 23 nations of the world will have nuclear power and nuclear weapons.

There is no question that unless we can begin to have arms control we shall have nuclear destruction, and the prospects for mankind then will be very dim.

It seems to me that only a strong country, only a self-confident country, can afford to have arms control or a disarmament program.

I say to the Senator from Minnesota, the author of the bill, that the reason why it is so important to have the bill enacted is that when we work out and develop an arms control program we shall know exactly what we are doing. Under no circumstances should we permit an inspection system which is faulty, which could result in the betrayal of America. Under no circumstances should we permit a disarmament system which could result in a preponderance of power in the hands of any enemy or any combination of enemies.

The purpose of the bill, as I understand it, is to give to the President of the United States and to the Congress of the United States the kind of intelligence and understanding not available to us today. Unless we have research to determine how feasible, how effective, how workable, how practical an arms control program will be, we shall not have any idea of what we are doing.

I ask the Senator from Minnesota if it is not true that a vote for his bill is not only a vote affirming faith in America but also a vote for a practical, workable, defensible arms control program which will safeguard the American people and not endanger them?

Mr. HUMPHREY. The Senator from Minnesota is more than happy to respond to the inquiry of the Senator from Wisconsin.

I never would have sponsored the bill unless I thought it would promote the national security. The President of the United States would never have sent his message to the Congress of the United States urging that this proposed legislation be acted upon favorably otherwise. A man of the patriotism, loyalty, ability, and dedication of John McCloy, the President's special adviser on disarmament, never would have asked the Congress to pass the bill unless he thought and knew it was a vital part of our national security.

I concur with the Senator's statement. He has made a brilliant statement. He has made a comprehensive and a very worthwhile statement not only as to

the need to be strong but also as to the need to search relentlessly for paths to peace which really lead to peace—not to appeasement, not to retreat, not to a fictitious and false peace, but to a genuine peace.

We know disarmament cannot be a one-way street. We are talking about multilateral international disarmament. We are talking about effective control mechanism; supervision and control so that we shall not be fooled, so that we shall not be led down some blind alley. That is why we need the Agency.

I remember what President Kennedy said about the American eagle as our symbol. That was referred to in the debate today.

In the claws of the eagle on one side are the arrows, and in the claws on the other side is the olive branch. The arrows indicate and signify our preparedness, our defense, our willingness to make the sacrifices necessary for our security. The olive branch, in the claws on the other side, indicates our search for peace.

This is not a contradiction. A well governed city has a police force, but it also has judges, social workers, schools, and churches.

A city could never be governed with police only. A city without a church would be a city which would never be governed well. A city without a spiritual leader would never have enough policemen to govern. One cannot have enough policemen to keep mankind in order and in line with police alone. There must be something else. There must be peace of mind. There must be peace of soul. There must be standards of conduct which are moral and ethical. That is what we are talking about.

The most courageous man in the world was known as the Prince of Peace. It has been said, "Peace be unto you," and "Peace on earth, good will toward men."

Is this a sign of weakness? I think it is a sign of the greatest courage man can have.

I do not think Hitler was courageous. I think he was a madman. He knew how to arm.

I do not think Khrushchev is courageous, either. He is imbued with the same kind of madness, the thinking that power comes from weaponry. That is what bandits think.

There have been men, like Gandhi, who have been able to stop a whole empire without even as much as raising a hand in defense or in violence.

When one talks about courage, about power, or about strength, it should be understood that the power of the spirit is sometimes greater than the power of the machine.

I was accused of being a visionary, as one of my colleagues said. I am happy to find myself in that very fortunate group of people. I accept that description. I am also a very practical man, I hope. I try to be.

I feel that one of the reasons why we need the Agency is to get down to exactly what the Senator is talking about. We must study this complex problem of arms control and disarmament with scientists, with engineers, with diplomats, with the most able, intelligent and brilliant people this country can bring to bear on the problem.

This is not something one can talk about in Utopian terms. One cannot merely wish peace for the world. One has to work for it, to plan for it, and to sacrifice for it.

When the American people understand that military preparedness and diplomatic preparedness are opposite sides of the same coin called "national security," then we shall start to make progress.

We have always failed at the conference table. We have never failed on the battlefield. We win the wars and lose the peace.

One of the reasons why we lose the peace is that we have never been able to get the Congress, until today, to stand up to say, "We must look ahead a long way, perhaps 25 years or perhaps 50 years. We have to plan for peace. We have to work for it. We have to study for it. We have to pay for it. We have to sacrifice for it."

The Senate passed a Defense Department appropriation bill of nearly $47 billion in less than 1 hour. We argued about a Disarmament Agency bill in the Senate from 10 o'clock this morning until 6 o'clock this evening, and it involved only $10 million. I wonder, sometimes, what people must think of us.

There is no answer, no solution to the world problems, in a nuclear war.

I am in favor of standing firm. I am in favor of preparedness. I voted for that every time. I voted for the NATO alliance, for foreign aid, for Defense Department appropriations.

I have three sons. One of them has gone through ROTC. He is of military age.

It is always somewhat bewildering to me that day after day the Congress can vote for fantastic sums for defense, because we need them, but cannot understand that we must have trained people working for peace. We cannot say to a vice president of an insurance company, "Negotiate with the Russians—over the weekend."

They do not like insurance companies and they do not particularly like vice presidents of insurance companies. We do not send someone over to fight our wars on the basis, "Well, there is a fellow who worked for the Remington Arms Co. He must know something about guns. Let us send him over as a commander in chief." We do not do that. We have academies in which to train our people. We spend billions on research for weaponry and many billions on projects which sometimes fail. No one ever complains when projects end on dead end streets and blind alleys. We search some other place.

What is the Disarmament Agency for? As I said, we will study, research, plan, look ahead, and recruit people to work in the area of disarmament, the best people that the Nation can produce.

The next time we go to the conference table we shall be prepared. By the way, we will either go to the conference table with Mr. Khrushchev or world war III is only hours away. I think it might be well for the Nation to ponder what world war III would mean. I think we could win it. We may not be around to know it. But I suppose someone will crawl out from under a rock and say, "I think we won the war." We liken the situation to that of a football game. We talk about nuclear weapons that can destroy all forms of life, not once but twice, if we never build another bomb. All of this we say is necessary.

But I suggest that Mr. Khrushchev, Mr. Kennedy, Mr. de Gaulle, Mr. Macmillan, and Mr. Adenauer all know, as well as we know here, that they will sit around a conference table one of these days. Again I ask Senators and fellow Americans, "Shall we be prepared?"

We can rest assured that the Soviets are. They have people who are prepared long in advance. Some of us have negotiated with them.

It is like having a high school football team playing Notre Dame when Notre Dame is at its best. If one is not prepared, he ought not to get into the same room and open himself to that kind of abuse.

All I say is that what we did today was to take a real step in preparedness for the defense of the Nation. I think we should look upon S. 2180 as a part of a great national security project, because it will relate to our national security in the days ahead in a very beneficial way.

I thank the Senator. I know of his deep concern, and I want him to know how much I appreciate his sponsorship, support, and interest in this work.

It means a great deal not only to the Senate but also to the people of Wisconsin who have in the Senator from Wisconsin a very fine public servant and one who is dedicated to peace through strength.

Mr. PROXMIRE. I thank the Senator from Minnesota for his magnificent answer. In conclusion I wish to say that the principle he has enunciated and underlined is one that my dad told me when I was a little boy, which is, "You get out of life what you put into it."

If we want peace, we must put something into it. As the Senator from Minnesota said, we must invest our intelligence, scientific understanding, and know-how into peace. The bill calls for such investment.

I congratulate the Senator from Minnesota on what I think may very possibly be the most important bill that will have passed the Senate of the United States this year or, I might say, even since I became a U.S. Senator. I, of course, recognize the overwhelmingly iron necessity of passing appropriation bills for defense and the necessity for passing some of our very wonderful and necessary domestic bills. But here is the kind of bill which can permit us to achieve a peaceful world. There is nothing on earth the people of America yearn for or want more than peace with freedom, peace with strength, and peace with justice.

Mr. HUMPHREY. The Senator will be interested to know that there is a

good deal of comment about what our generals say. There is talk on both sides of the aisle as to whether they say the right things or not.

Every military officer who testified on the bill before the committees in the House and the Senate was for it. I think one of the greatest testimonials to democracy is that the top military officers of our country, active officers or retired, have come to testify for the bill. The great Gen. Douglas MacArthur is today one of the greatest exponents of peace. He is like a spiritual leader. Former President of the United States, Dwight Eisenhower, was for the proposed legislation. Former President of the United States, Harry S. Truman, was for the proposed legislation. The present President, the Chief of Staff, the Chairman of the Joint Chiefs, the man who today has the destiny of our Nation literally in his hands, and is the chief military officer, came before the committee and said, "Pass it. It is urgent. We need it." The Secretary of Defense, the former Secretary of Defense, the former Secretary of State, the present Secretary of State, ambassadors and top people said that we need it.

I could not help but think that sometimes we came close today to rejecting those men. It would be like a man having heart trouble and going to all the heart specialists he could go to, every one of whom would advocate the same treatment. After the man had listened and received their professional counsel and advice, he would decide that what he really ought to do is to eat radishes. That is about what we almost did. But, thank goodness, we decided to take professional advice.

MEXICAN FARM LABOR PROGRAM

The Senate resumed the consideration of the bill H.R. 2010 to amend title V of the Agricultural Act of 1949, and for other purposes.

Mr. HUMPHREY. Mr. President, I wish to have the RECORD quite clear in reference to the pending legislation. I support wholeheartedly the amendment of my distinguished colleague from Minnesota [Mr. MCCARTHY]. I commend him for his diligence in presenting the amendment and the splendid case he made for it.

As a former member of the Committee on Agriculture and Forestry, I have given considerable attention to the Mexican farm labor program. I wish to say for the committee I think that he has presented this year a decidedly improved bill, and the committee ought to be commended on that.

I recognize the need for Mexican labor. I know that we have set some pretty good standards for the protection of the health and welfare of these laborers from the friendly Republic of Mexico who come to work in the United States.

What the Senator from Minnesota [Mr. MCCARTHY] seeks to do, however, is to give them a little better deal and also help to protect the domestic labor market.

I would have the RECORD note that we have unemployment in this country. We have some of it in the agriculture areas, and I think our first obligation is to our own.

What the junior Senator from Minnesota [Mr. MCCARTHY], as a member of the Committee on Agriculture and Forestry—who, by the way, conducted a nationwide study of unemployment problems only last year—seeks to do is to provide standards that will assure a fair wage for either a domestic worker or for a foreign worker who has been brought in for a limited period of time. It ought to be quite clear that every part of America does not use imported farm labor, only limited parts. I am not being critical of that situation. They have a specific need.

I wish to say that the Secretary of Labor has a definite responsibility to workers, whether they are in factories, on farms, in the forests, or on their jobs. I do not think we ought to look down upon him for the diligence that he gives to his job. I think we should commend him.

We get down to a kind of agriculture which is a factory type of agriculture. By the way, this is one kind of agriculture which uses imported labor. The dairy farmers of Wisconsin do not import 25, 50, or 100 Mexican laborers, or laborers from some other area, nor does the wheat farmer of North Dakota, the corn farmer of Iowa, or the wheat farmer of Kansas. But I assure the Senate that there are certain types of agriculture in which there is huge acreage, much of it in areas where what is called stoop labor is required. We import foreign labor for such jobs. I believe the best way to build a good foreign relations is to see that those foreign laborers are well protected, are paid good wages and, by the same token, our own people, who are looking for work, are given the first option.

I support the amendment of the Senator from Minnesota [Mr. MCCARTHY], and I compliment him on his leadership in this effort. I am hopeful that the amendment will be agreed to.

AID TO FEDERALLY IMPACTED SCHOOLS

Mr. HUMPHREY. Mr. President, I move that the Mexican labor bill, H.R. 2010, the unfinished business, be temporarily set aside. Under the unanimous-consent agreement, the Senate will vote on Monday on the bill. I also ask that Order No. 719, S. 2393, providing aid to federally impacted schools be made the pending business.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 2393) to extend for 1 year the temporary provisions of Public Laws 815 and 874 relating to Federal assistance in the construction and operation of schools in federally impacted areas and to provide for the application of such laws to American Samoa.

Mr. HRUSKA. Mr. President, may I inquire of the Senator from Minnesota if the suggestion he now makes will be subject to the unanimous consent agreement that at 11 o'clock a.m. on Monday the Senate will resume the consideration of the so-called bracero bill?

Mr. HUMPHREY. That is correct.

Mr. HRUSKA. If Calendar No. 719, S. 2393, is not disposed of by that time, it will be held in abeyance until the unanimous-consent agreement will be effectuated insofar as the bracero bill is concerned; is that correct?

Mr. HUMPHREY. The Senator is correct. He has been very helpful in explaining this parliamentary situation.

Mr. HRUSKA. With that understanding, I have no objection to the request.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Minnesota?

There being no objection, the Senate proceeded to consider the bill.

TRANSACTION OF ADDITIONAL ROUTINE BUSINESS

By unanimous consent, the following additional routine business was transacted:

ADDITIONAL REPORTS OF A COMMITTEE

The following additional reports of a committee were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary, without amendment:

S. 310. A bill for the relief of Annie Tymochek Porayko (Rept. No. 911);

S. 899. A bill for the relief of Liu Shui Chen (Rept. No. 912);

S. 1793. A bill for the relief of Mrs. Alfia Alessandro Milana (Rept. No. 913);

S. 1947. A bill for the relief of Annemarie Herrmann (Rept. No. 914);

S. 2291. A bill for the relief of Paul James Branan (Rept. No. 915);

H.R. 1325. An act for the relief of Mrs. Seto Yiu Kwei (Rept. No. 916);

H.R. 1369. An act for the relief of Zsuzsanna Reisz (Rept. No. 917);

H.R. 1394. An act for the relief of Laszlo Hamori (Rept. No. 918);

H.R. 1399. An act for the relief of Mrs. Josefa Pidlaoan and daughter, Annabelle Pidlaoan (Rept. No. 919);

H.R. 1422. An act for the relief of Mrs. Agavni Yazicioglu (Rept. No. 920);

H.R. 1459. An act for the relief of EN/2 Hideo Chuman, U.S. Navy (Rept. No. 921);

H.R. 1496. An act for the relief of Aloysius van de Velde (Rept. No. 922);

H.R. 1532. An act for the relief of Jeanine Ruth Tabacnik (Rept. No. 923);

H.R. 1550. An act for the relief of Jesus Garza Lopez (Rept. No. 924);

H.R. 1551. An act for the relief of Kim-Ok Yun (Rept. No. 925);

H.R. 1569. An act for the relief of Isei Sakioka (Rept. No. 926);

H.R. 1581. An act for the relief of Maria Falato Colacicco (Rept. No. 927);

H.R. 1583. An act for the relief of Mrs. Chung-Huang Tank Kao (Rept. No. 928);

H.R. 1614. An act for the relief of Byran K. Efthimiadis (Rept. No. 929);

H.R. 1630. An act for the relief of Carma Pereira de Bustillos (Rept. No. 930);

H.R. 5735. An act for the relief of Steven Mark Hallinan (Rept. No. 950); and
H.R. 6158. An act for the relief of Adolphe C. Verheyn (Rept. No. 951).

By Mr. EASTLAND, from the Committee on the Judiciary, with an amendment:

S. 1560. A bill for the relief of Yasuko Otsu (Rept. No. 952);
S. 2012. A bill for the relief of Mrs. Moy York Che (Rept. No. 953);
S. 2163. A bill for the relief of Saifook Chan (Rept. No. 954); and
H.J. Res. 453. Joint resolution relating to deportation of certain aliens (Rept. No. 955).

By Mr. EASTLAND, from the Committee on the Judiciary, with amendments:

S. 1076. A bill for the relief of Nancy E. Williamson (Rept. No. 956);
S. 1439. A bill for the relief of Sylvia Freda Karro and her three minor children, Allan Karro, Jennifer Karro, and Michelle Karro (Rept. No. 957);
S. 1685. A bill for the relief of Brigitte Marie Kroll (Rept. No. 958); and
S. 2337. A bill for the relief of Athanisia G. Koumoutsou (Rept. No. 959).

ADDITIONAL BILLS INTRODUCED

The following additional bills were introduced, read the first time, and, by unanimous consent, the second time, and referred, as indicated:

By Mr. ENGLE (for himself, Mr. MAGNUSON, and Mr. BUTLER):

S. 2524. A bill to amend the Shipping Act, 1916; to the Committee on Commerce.

By Mr. KEATING:

S. 2525. A bill for the relief of Ruth Philipp; to the Committee on the Judiciary.

AMENDMENT OF ACT RELATING TO ELECTIONS IN THE DISTRICT OF COLUMBIA—RESIDENCE REQUIREMENT—AMENDMENT

Mr. KEATING. Mr. President, I submit an amendment to the bill (H.R. 8444) to amend the act of August 12, 1955, relating to elections in the District of Columbia. I ask unanimous consent that the amendment be printed, and also that it be printed at the conclusion of my remarks.

The PRESIDING OFFICER. The amendment will be received, printed, and will lie on the table; and, without objection, the amendment will be printed as requested by the Senator from New York.

Mr. KEATING. Mr. President, this amendment provides a maximum residence requirement for voting of 90 days in the District of Columbia for presidential elections only. It does not affect the requirement in the bill for 1 year of residence to qualify to vote in other elections, which in the case of the District of Columbia just involves the selection of delegates to the national nominating conventions.

This amendment is very similar to a resolution (S.J. Res. 90) which I introduced this year to amend the Constitution to place a 90-day maximum on residence requirements for voting in presidential elections. It is also similar to a new and revised resolution which I introduced with the distinguished senior Senator from Tennessee, Senator KEFAUVER, placing a 90-day ceiling on resident requirements and, in addition, permitting voters, who are qualified on all other bases in both their old and new voting jurisdictions, to vote in their new jurisdiction for presidential and vice presidential electors. On September 1, this resolution (S.J. Res. 128) was reported favorably to the full Senate Judiciary Committee by the Constitutional Amendments Subcommittee.

Mr. President, the District of Columbia should have a model election code. The bill reported by the Senate District of Columbia Committee is progressive in many respects, and I commend the committee for the fine work which they have done on this subject.

The committee, however, recommends a District of Columbia residence requirement of 1 year, including presidential elections, which is far from being a model provision. I hope that when we consider this bill, the Senate will revise this section.

In presidential elections, there is no justification for disenfranchising otherwise qualified citizens just because they move from one place to another shortly prior to the election. Five States have already taken steps to lower residence requirements for voting for President and Vice President below 90 days. They are: Wisconsin, Ohio, California, Missouri, and Oregon. Six States have legislation pending to liberalize residence requirements for presidential elections.

Mr. President, 90 days is identical to the President's recommendation on residence requirements in the District for presidential elections. I am hopeful that the Senate will adopt this position, and in so doing follow the lead of the several States which have already modernized their residence requirements to meet the high mobility conditions of the 20th century.

The amendment submitted by Mr. KEATING is as follows:

On page 11, beginning with "(E)" on line 22, strike out all through the period on line 2, page 12, and insert in lieu thereof the following: "(E) who, for the purpose of voting in a presidential election under this Act, has resided in the District for the ninety-day period ending on the day of the presidential election, or for the purpose of voting in any other election held pursuant to this Act, has resided in the District for the twelve-month period ending on the day of such election."

ADJOURNMENT UNTIL 9 A.M. ON MONDAY NEXT

Mr. HUMPHREY. Mr. President, in accordance with the order previously entered, I move that the Senate stand in adjournment until 9 a.m. on Monday next.

The motion was agreed to; and (at 9 o'clock and 41 minutes p.m.) the Senate adjourned, under the order previously entered, until Monday, September 11, 1961, at 9 o'clock a.m.

NOMINATIONS

Executive nominations received by the Senate September 8, 1961:

MISSISSIPPI RIVER COMMISSION

Harold T. Council, of Mississippi, to be a member of the Mississippi River Commission, vice Harry L. Bolen.

DISTRICT JUDGE

William H. Benedict	Douglas E. Rector
Robert F. Coxe	George W. Robinson
Joseph J. Drozd	Floyd D. Saine
Lester R. Funderburk	Forrest D. Stout
Frederick L. Holiman	James T. Tapp, Jr
Robert W. Horrobin	Leslie H. Turbiville
William F. Hoss, Jr.	John R. Turner
Marvin D. Lind	Robert K. Zentmyer
James C. Pickering	

The following-named enlisted personnel to be ensigns in the Medical Service Corps of the Navy, for temporary service, subject to the qualifications therefor as provided by law:

James R. Andrews	John R. Kozik
Joseph R. Barrows	John R. Lewis
Floyd E. Bennett	Thomas W. MacConnell
Lawrence L. Biesiadny	
William E. Branscum	Wessel H. Meyers
Dallas E. Cassell	Richard A. Morin
Elgin R. Christian	Norman K. Owen
John F. Connolly	David D. Palmer
Myron R. Corbett	George J. Palmer
George L. Dailey	Henry E. Parker
Neslund E. Denison	Herbert D. Pearson
James J. Dewhirst	Hudson B. Price
Alvin G. Ebert	William E. Royals
Lloyd J. Flewelling	Bobby G. Rutledge
Raeford E. Garriss	Patrick J. Scanlin
Eugene G. Gendron	Donald L. Schoenmann
James D. Gillentine	
Kenneth F. Glassford	Donald L. Siplon
Joe E. Goble	Jack W. Smith
Ronald K. Green	Jonathan C. Sparks
Billy L. Heller	Virgil E. Spruell
Ralph C. Hempey	Gerald R. Steiner
Cecil D. Hudson	Roger E. Stockman
Pedro Jimenez	David C. Tharp
Jack E. Johns	James M. Ulmer
Paul W. Johnson	Robert J. Wallace
John J. Kehoe	John P. Walsh
Patrick J. Kennedy	Billy R. Wesson
John R. Knight	Lee P. Williamson

The following-named enlisted personnel selected as alternates to be ensigns in the Medical Service Corps of the Navy, for temporary service, subject to the qualifications therefor as provided by law:

Richard E. Thomas	Alexander R. Duncan
Melvin W. Smith	John J. Hicks
Billy J. Fannin	Arvid C. Johansen
Nicholas T. Reitmeyer	Bernard L. Zettl

The following-named officers of the U.S. Navy for permanent promotion to the grade of lieutenant (junior grade) in the line and staff corps, as indicated, subject to qualification therefor as provided by law:

LINE

	Eugene P. Richter, Jr.
Robert E. Burgess	Malcolm E. Smith
Vincent D. Caracio	John H. Strasser
Robert J. Elgaard	Francis J. Tague
Charles G. Gerard	Donald F. Tremmel
Leroy H. Gonzales	George A. F. Weida
George C. Hearn	Joseph J. Wheeler
Arthur E. Help	

CONFIRMATIONS

Executive nominations confirmed by the Senate September 8, 1961:

DIPLOMATIC AND FOREIGN SERVICE

U.S. AMBASSADORS

Charles F. Darlington, of New York, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Gabon.

Lincoln Gordon, of Massachusetts, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Brazil.

U.S. ATTORNEY

H. Moody Brickett, of Montana, to be U.S. attorney for the district of Montana for the term of 4 years.

U.S. DISTRICT JUDGES

Albert Lee Stephens, Jr., of California, to be U.S. district judge for the southern district of California.

Raymond E. Plummer, of Alaska, to be U.S. district judge for the district of Alaska.

William H. Becker, of Missouri, to be U.S. district judge for the western district of Missouri.

James Robert Martin, Jr., of South Carolina, to be U.S. district judge for the eastern and western districts of South Carolina. (A new position.)

David W. Dyer, of Florida, to be U.S. district judge for the southern district of Florida. (A new position.)

HOUSE OF REPRESENTATIVES

FRIDAY, SEPTEMBER 8, 1961

The House was not in session today. Its next meeting will be held on Monday, September 11, 1961, at 12 o'clock noon.

Pursuant to an order of the House on Thursday, September 7, 1961, Mr. SHEPPARD submitted a conference report on H.R. 8302, making appropriations for military construction for the Department of Defense.

HOUSE OF REPRESENTATIVES

MONDAY, SEPTEMBER 11, 1961

The House met at 12 o'clock noon and was called to order by the Speaker pro tempore, Mr. MCCORMACK.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

John 8: 32: *Ye shall know the truth, and the truth shall make you free.*

Eternal and ever-blessed God, as we enter upon the duties of a new week, make us more eager to appropriate and apply the principles of brotherhood and the golden rule to the many problems of human relationships.

Show us how to lead mankind into the bright domain of truth and freedom. Use us as Thy ministering servants and emancipators wherever men are held in social bondage; wherever minds are imprisoned in the darkness of ignorance and superstition and wherever hearts are bruised and broken. May our hearts go out in sympathy and in the spirit of the good samaritan to the citizens in the stricken areas of our country.

Above all may we pray and labor to release humanity from spiritual bondage and from those evil passions and ambitions which shackle its soul and are filling the world of our day with so much havoc and horror.

Hear us in the name of the Saviour who came to bring us truth, liberty, and peace. Amen.

THE JOURNAL

The Journal of the proceedings of Thursday, September 7, 1961, was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H.R. 1021. An act to extend for 2 years the definition of "peanuts" which is now in effect under the Agricultural Adjustment Act of 1938;

H.R. 2308. An act to amend the Ship Mortgage Act, 1920, with respect to its applicability to certain vessels;

H.R. 6302. An act to establish a teaching hospital for Howard University, to transfer Freedmen's Hospital to the university, and for other purposes;

H.R. 7447. An act to amend the Strategic and Critical Materials Stock Piling Act to provide for the immediate disposition of certain waterfowl feathers and down;

H.R. 7622. An act to repeal sections 1176 and 1177 of the Revised Statutes of the United States relating to the District of Columbia; and

H.R. 8719. An act to amend the act of July 23, 1947, chapter 301, as amended, to extend for 2 years the authority to make temporary appointments and promotions in the U.S. Coast Guard.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 2308. An act to amend the Ship Mortgage Act, 1920, with respect to its applicability to certain vessels;

H.R. 2585. An act relating to the credits against the employment tax in the case of certain successor employers;

H.R. 2883. An act to amend title 28, entitled "Judiciary and Judicial Procedure," of the United States Code to provide for the defense of suits against Federal employees arising out of their operation of motor vehicles in the scope of their employment, and for other purposes;

H.R. 4669. An act to amend the law relating to gambling in the District of Columbia;

H.R. 4670. An act to amend the law relating to indecent publications in the District of Columbia; and

H.R. 5852. An act to provide for the free entry of a towing carriage for the use of the University of Michigan.

The message also announced that the Senate had passed, with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 8666. An act to provide for the improvement and strengthening of the international relations of the United States by promoting better mutual understanding among the peoples of the world through educational and cultural exchanges.

The message also announced that the Senate insists upon its amendment to the foregoing bill, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. FULBRIGHT, Mr. SPARKMAN, Mr. HUMPHREY, Mr. WILEY, and Mr. HICKENLOOPER to be the conferees on the part of the Senate.

The message also announced that the Senate had passed bills and a joint resolution of the following titles, in which the concurrence of the House is requested:

S. 476. An act to establish the Point Reyes National Seashore in the State of California, and for other purposes;

S. 502. An act to authorize the employment of retired personnel of the Federal Government by the Board of Education of the District of Columbia, and to authorize the employment of retired personnel of the Board of Education of the District of Columbia by the Federal Government;

S. 653. An act to provide for the presentation by the United States to the people of Mexico of a monument commemorating the independence of Mexico, and for other purposes;

S. 914. An act to provide for more effective administration of public assistance in the District of Columbia; to make certain relatives responsible for the support of needy persons, and for other purposes;

S. 1292. An act to amend the act of June 19, 1948, relating to the workweek of the Fire Department of the District of Columbia, and for other purposes;

S. 1528. An act to increase the relief or retirement compensation of certain former members of the Metropolitan Police force, the Fire Department of the District of Columbia, the U.S. Park Police force, the White House Police force, and the U.S. Secret Service, and of widows and children of certain deceased former officers and members of such forces, department, or service;

S. 1563. An act to authorize the conveyance of certain lands within the Clark Hill Reservoir, Savannah River, Ga.-S.C., to the Georgia-Carolina Council, Inc., Boy Scouts of America, for recreation and camping purposes;

S. 1918. An act to extend benefits of the Policemen and Firemen's Retirement and Disability Act Amendments of 1957 to widows and surviving children of former members of the Metropolitan Police force, the Fire Department of the District of Columbia, the U.S. Park Police force, the White House Police force, or the U.S. Secret Service Division, who were retired or who died in the service of any such organization prior to the effective date of such amendments;

S. 2180. An act to establish a U.S. Arms Control and Disarmament Agency for World Peace and Security;

S. 2299. An act to provide for the establishment of a juvenile division within or in connection with the District of Columbia Youth Correctional Center, and to authorize the judge of the Juvenile Court of the District of Columbia to commit to such juvenile division, subject to the provisions of the Juvenile Court Act, children 15 years of age, or older;

S. 2397. An act authorizing the National Capital Transportation Agency to carry out part 1 of its transit development program and to further the objectives of the act approved July 14, 1960 (74 Stat. 537); and

S.J. Res. 51. Joint resolution authorizing the creation of a commission to consider and formulate plans for the construction in the District of Columbia of an appropriate permanent memorial to the memory of Woodrow Wilson.

The message also announced that the Senate agrees to the amendments of the House to bills of the Senate of the follow titles:

S. 200. An act to amend the act entitled "An act relative to employment for certain adult Indians on or near Indian reservations," approved August 3, 1956;

S. 1719. An act to amend title 23 of the United States Code with respect to Indian reservation roads;

S. 1768. An act to provide for the restoration to Indian tribes of unclaimed per capita and other individual payments of tribal trust funds;

S. 1807. An act to authorize the disposition of land no longer needed for the Chilocco Indian Industrial School at Chilocco, Okla.; and

S. 2241. An act to donate to the Jicarilla Apache Tribe of the Jicarilla Reservation, N. Mex., approximately 391.43 acres of federally owned lands.

The message also announced that the Senate disagrees to the amendment of the House to the bill (S. 902) entitled "An act to amend the Small Business Investment Act of 1958, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. ROBERTSON, Mr. SPARKMAN, Mr. DOUGLAS, Mr. PROXMIRE, Mr. LONG of Missouri, Mrs. NEUBERGER, Mr. BEALL, Mr. BENNETT, Mr. JAVITS, and Mr. TOWER to be the conferees on the part of the Senate.

The message also announced that the Senate disagrees to the amendments of the House to the bill (S. 2237) entitled "An act to permit the entry of certain eligible alien orphans," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. EASTLAND, Mr. JOHNSTON, Mr. MCCLELLAN, Mr. ERWIN, Mr. DIRKSEN, Mr. KEATING, and Mr. FONG to be the conferees on the part of the Senate.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 4317) entitled "An act to

amend the Internal Revenue Code of 1954 and incorporate therein provisions for the payment of annuities to widows and certain dependents of the judges of the Tax Court of the United States," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. BYRD of Virginia, Mr. KERR, Mr. LONG of Louisiana, Mr. WILLIAMS of Delaware, and Mr. CARLSON to be the conferees on the part of the Senate.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 7391) entitled "An act to promote the conservation of migratory waterfowl by the acquisition of wetlands and other essential waterfowl habitat, and for other purposes," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. MAGNUSON, Mr. ENGLE, Mr. BARTLETT, Mr. MCGEE, Mr. SCHOEPPEL, and Mr. BUTLER to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1540) entitled "An act to amend the law establishing the Indian revolving loan fund."

The message further requested that the House return to the Senate the bill (H.R. 8414) entitled, "An act to amend section 5011 of title 38, United States Code, to clarify the authority of the Veterans' Administration to use its revolving supply fund for the repair and reclamation of personal property."

The message also announced that the Vice President has appointed Mr. JOHNSTON and Mr. CARLSON members of the Joint Select Committee on the part of the Senate, as provided for in the act of August 5, 1939, entitled "An act to provide for the disposition of certain records of the U.S. Government," for the disposition of executive papers referred to in the report of the Archivist of the United States No. 62–6.

WATERSHED PROTECTION ACT

The SPEAKER pro tempore laid before the House the following communication, which was read, and referred to the Committee on Appropriations:

SEPTEMBER 8, 1961.

Hon. SAM RAYBURN,
The Speaker,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the provisions of section 2 of the Watershed Protection and Flood Prevention Act, as amended, the Committee on Agriculture on September 7, 1961, considered the work plans transmitted to you by Executive Communication 1227 and referred to this committee and unanimously approved each of such plans. The work plans involved are:

STATE AND WATERSHED

Kentucky, East Fork of Pond River; Massachusetts-New Hampshire, Souhegan River; North Carolina, Ahoskie Creek; Iowa, David's Creek; Iowa, Davis-Battle Creek; Iowa, Ryan-Henschal; Oklahoma, Cane Creek; Pennsylvania, Dunlap Creek; Georgia, Little Satilla Creek; Mississippi, Tallahalla Creek; Florida, Sarasota West Coast; and Wisconsin, Kickapoo Creek.

Sincerely yours,

HAROLD D. COOLEY, *Chairman.*

DEPARTMENTS OF STATE AND JUSTICE, THE JUDICIARY AND RELATED AGENCIES APPROPRIATION BILL, 1962

Mr. ROONEY. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a conference report on the bill H.R. 7371, making appropriations for the Departments of State and Justice, the judiciary, and related agencies for the fiscal year ending June 30, 1962, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

EXPORT-IMPORT BANK BILL

Mr. ALBERT. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. ALBERT. Mr. Speaker, I take this time to advise the House that on Wednesday next the gentleman from Kentucky [Mr. SPENCE], chairman of the Committee on Banking and Currency, will call up the bill S. 2325, the Export-Import Bank bill, under a unanimous-consent request.

SALINE WATER CONVERSION PROGRAM

Mr. ASPINALL submitted a conference report and statement on the bill (H.R. 7916) to expand and extend the saline water conversion program being conducted by the Secretary of the Interior.

PEACE CORPS

Mr. DORN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. DORN. Mr. Speaker, no one connected with our Foreign Service could officially and openly oppose the creation of a Peace Corps, particularly since it is already in being by Executive order. No one connected with our foreign-aid program could officially and openly oppose the Peace Corps under such circumstances; but, Mr. Speaker, everyone connected with our Foreign Service or our mutual security program with whom I have conferred privately express grave concern and misgivings about this hastily assembled organization of amateurs. Likewise, no official of a friendly nation is going to openly oppose the Peace Corps. As the recipient of our aid, it would be most inexpedient for them to do so. But the reports I receive from abroad indicate there is extreme skepticism of the Peace Corps and there is fear that it could cause serious damage to friendly relations with the United States.

As a Member of this House, you would not welcome amateur reformers into your district to tell your people what is wrong with their way of life. This is a dangerous, psychological approach to foreign, internal, and domestic problems. This House will make a grave mistake if we pass H.R. 7500 without a thorough investigation at home and abroad of the need and effect of this organization.

The establishment of the Peace Corps was a political decision made during the heat of a national political campaign without thorough investigation of its operation at the grassroots level in foreign lands. As a duplication of many of our foreign activities, it cannot possibly do any good, but may without thorough training do irreparable harm.

The time to prevent empire building is before it starts. The time to rid the world of this ill-advised Peace Corps is now. Our foreign friends are tired of this superior than thou attitude of swarms of Americans roving around the world telling them what is wrong with their way of life.

HURRICANE DAMAGE TO TEXAS AND LOUISIANA

Mr. RIVERS of South Carolina. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. RIVERS of South Carolina. Mr. Speaker, during these hours of trial for the people of the States of Texas and Louisiana, our prayers should go out to the victims of this, one of the most severe storms ever to hit this Nation. The reason I take the floor and implore you, my colleagues, and everybody to join in prayer for those unfortunate people is because you who have never lived on the ocean, as I do, or on the seashore, you have never lived until you have endured a hurricane. It is composed of all of nature's hell in a single package.

I saw one come ashore in my district at Beaufort, and when it did, nothing survived its fury, nothing, even the roots of the grass vanished.

We are told by the radio and the newspapers that the eye of this storm which is now just about to hit the State of Texas, with its malevolent fury, will cause a reaction for hundreds of miles in each direction, and into Louisiana.

It will be the largest eye of a hurricane ever to hit this Nation, and where that eye hits Texas, God help Texas. The losses of human life, animal life, and property will be something that is conjectural. I hope that this Government—

and I would like to applaud the action of the President—will leave no stone unturned to help these people. Every Army combatant personnel or Army combat engineer or Navy engineer should be sent immediately, because this will be it.

I hope that the Lord in His omniscience, omnipresence, and omnipotence will spare these people. This is a tragedy that we will read about and our children will read about for many years to come.

I hope these courageous people will be spared.

THE TEXAS HURRICANE

Mr. THOMPSON of Texas. Mr. Speaker, I ask unanimous consent to address the House or 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. THOMPSON of Texas. Mr. Speaker, I appreciate the words of the gentleman from South Carolina very deeply. This is my congressional district that is being hit. Thank God there is no loss of life known as yet, and so far the damage is all material. I want you to know that everything that can be done in Washington is being done. I myself will go down there as soon as we can get through and then if I need your help I will call on you.

ENTRY OF CERTAIN ALIENS

Mr. WALTER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill S. 2237, to permit the entry of certain eligible alien orphans, and agree to the conference requested by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

The Chair hears none and appoints the following conferees: Messrs. WALTER, FEIGHAN, CHELF, POFF, and MOORE.

THE 100TH BIRTHDAY OF THE BOSTON SUNDAY HERALD

Mr. LANE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LANE. Mr. Speaker, the Boston Sunday Herald and its many subscribers are celebrating the 100th anniversary of its service to the people of New England.

The Sunday Herald ranks among the best newspapers in the United States for the accuracy of its reporting, and for the high standards of its editorials. Although it is a traditionally conservative Republican paper that is published in the Democratic stronghold of Boston, it enjoys the respect of all. It has courage and conscience and style, documented by nearly 50 citations for public service and journalistic excellence.

Four times since 1923 it has won the highest national award among competing newspapers—the prestige of the Pulitzer Prize.

There are occasions when we take exception to the position of the Herald on State and National issues, but even then we acknowledge the sincerity of its views that may err in judgment, but never sacrifice principle to expediency. On international relations, this newspaper stands for a strong and alert United States that will take the initiative in promoting the practice of human rights and the participation in material progress that will be fair to the whole human family.

The increasing circulation testifies to the support of advertisers and readers in this newspaper that is distinguished by its objective coverage of events, and by the combination of intelligent interpretation and character in its editorials.

Congratulations to the Boston Sunday Herald on its century of service as a newspaper that lives up to the inspiring ideals of a free press.

THE HONORABLE CLARE E. HOFFMAN

Mr. GROSS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. GROSS. Mr. Speaker, I desire to call the attention of the House to the birthday of one of the oldest yet youngest members of this body in mind and spirit.

I speak of the gentleman from Michigan, the Honorable CLARE HOFFMAN, who, on yesterday, observed his 86th birthday.

Mr. Speaker, the gentleman from Michigan is serving his 27th consecutive year in the House of Representatives and through this more than a quarter of a century he has served and continues to serve the 4th Congressional District of Michigan with courage, distinction, and unfailing devotion to his constituents and the Republic.

Incidentally, Mr. Speaker, I am informed that in November of this year, Mr. and Mrs. Hoffman will celebrate their 62d wedding anniversary.

To my warm friend from Michigan I extend my compliments on the occasion of his 86th birthday. May he observe many more such occasions as a Member of the House. And to both Mr. and Mrs. Hoffman my very best wishes when, in November, they turn the corner on 62 years of married life.

Mr. JONAS. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from North Carolina.

Mr. JONAS. Mr. Speaker, I would like to join the gentleman from Iowa in extending greetings and felicitations to the gentleman from Michigan [Mr. HOFFMAN] who yesterday celebrated his 86th birthday. The gentleman from Michigan may be 86 years old but one would never know it to watch him in operation here on the floor from day to day. He not only remains young and vigorous in mind and body but equally so in spirit.

It has been my pleasure to work with the gentleman from Michigan on several subcommittees of the Government Operations Committee and that was an experience I shall never forget. He has one of the keenest legal minds in the House and the load he carries in committee and on the floor would not be undertaken by many Members half his age.

Mr. Speaker, I shall always cherish the friendship accorded me by the gentleman from Michigan, and wish to join my colleague from Iowa in extending to him sincere congratulations on the occasion of his birthday yesterday and to wish for him many happy returns of the day.

Mr. HALEY. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Florida.

Mr. HALEY. May I also join with my colleague in wishing him a happy birthday, and many, many happy birthdays in the future in rendering service to his country.

Mrs. ST. GEORGE. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentlewoman from New York.

Mrs. ST. GEORGE. Mr. Speaker, I would also like to pay my respects to my distinguished colleague, the gentleman from Michigan [Mr. HOFFMAN]. But, I also want to pay my respects to Mrs. Hoffman.

Mr. MASON. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Illinois.

Mr. MASON. Mr. Speaker, I want to join with the gentleman from Iowa in paying my respects to the gentleman from Michigan [Mr. HOFFMAN] who antedates me by 2 or 3 years, and to extend my sympathy to Mrs. Hoffman for having put up with him so long as she has.

Mr. CEDERBERG. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Michigan.

Mr. CEDERBERG. Mr. Speaker, I am going to be very brief, but on behalf of the other members of the Michigan delegation I want to extend our birthday greetings to the dean of our delegation [Mr. HOFFMAN].

I am sure our colleagues in the House join us in extending best wishes for many, many more happy birthdays. During his more than a quarter of a century in the House he has made an outstanding contribution through his ability for keen analysis and brilliant debate. We wish for him a full measure of health and happiness in the years ahead.

Mr. KNOX. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Michigan.

Mr. KNOX. Mr. Speaker, I appreciate my colleague from Michigan [Mr. CEDERBERG] interceding in my behalf.

However, I do want to personally congratulate my colleague from Michigan [Mr. HOFFMAN] on being blessed with the good fortune of spending 62 years with his most gracious wife.

My wish is that the union will continue and they will have many more years of a happy married life together.

Mr. WALTER. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Pennsylvania.

Mr. WALTER. Mr. Speaker, I make a point of order that the gentleman from Michigan is not in order. He is reading the Chicago Daily Tribune while we are transacting this very important business.

Mrs. CHURCH. Mr. Speaker, a further point of order.

The SPEAKER pro tempore. The gentlewoman will state the point of order.

Mrs. CHURCH. Mr. Speaker, I suggest the absence of a quorum.

The SPEAKER pro tempore. Will the gentlewoman from Illinois withhold the point of order until the gentleman from Iowa is through with presentation?

Mrs. CHURCH. Mr. Speaker, this is one quorum call I am sure the gentleman from Michigan will not make, and I cannot resist the opportunity to make it for him.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentlewoman yield?

I certainly would have made the point of order of no quorum if I had known what they were going to say.

The SPEAKER pro tempore. Does the gentlewoman withdraw her point of order?

Mrs. CHURCH. I withdraw my point of order, Mr. Speaker.

Mr. JONAS. Mr. Speaker, I ask unanimous consent that all Members may extend their remarks following the remarks of the gentlewoman from Illinois [Mrs. CHURCH].

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. HOEVEN. Mr. Speaker, I congratulate my good friend CLARE HOFFMAN on the occasion of his 86th birthday and both Mr. and Mrs. Hoffman on the observance of their 62d wedding anniversary.

CLARE HOFFMAN is one of the most remarkable men I have ever known. He is a peer among rugged individualists. Forthright, brave, determined, sincere and honest are only a few words which typify CLARE HOFFMAN as we all know him. He fills a most valuable place in the daily deliberations of the House of Representatives.

May CLARE HOFFMAN enjoy many more birthdays and may he and his good wife share life's richest blessings in the days that lie ahead.

CALL OF THE HOUSE

Mrs. CHURCH. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

Mr. ALBERT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 193]

Alger	Gavin	Morrison
Anderson, Ill.	Giaimo	Morse
Anfuso	Gilbert	Mosher
Arends	Glenn	Moulder

Garland		

The SPEAKER pro tempore. On this rollcall, 278 Members have answered to their names, a quorum.

By unanimous consent further proceedings under the call were dispensed with.

AMENDMENT TO SMALL BUSINESS INVESTMENT ACT OF 1958

Mr. SPENCE. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 902) to amend the Small Business Investment Act of 1958, and for other purposes, with House amendment thereto, insist on the House amendment and agree to the conference requested by the Senate.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky? [After a pause.] The Chair hears none and appoints the following conferees: Messrs. SPENCE, PATMAN, RAINS, MULTER, MCDONOUGH, WIDNALL, and DERWINSKI.

AMENDMENT TO SMALL BUSINESS ACT TO INCREASE AMOUNT AVAILABLE FOR REGULAR BUSINESS LOANS THEREUNDER

Mr. SPENCE. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 8762) to amend the Small Business Act to increase the amount available for regular business loans thereunder, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky? [After a pause.] The Chair hears none, and appoints the following conferees: Messrs. SPENCE, PATMAN, RAINS, MULTER, MCDONOUGH, WIDNALL, and DERWINSKI.

PROHIBITING TRAVEL OR TRANSPORTATION IN AID OF RACKETEERING ENTERPRISES

Mr. ROGERS of Colorado submitted the following conference report and statement on the bill (S. 1653) to amend title 18, United States Code, to prohibit travel or transportation in commerce in aid of racketeering enterprises:

CONFERENCE REPORT (H. REPT. No. 1161)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1653) To amend title 18, United States Code, to prohibit travel or transportation in commerce in aid of racketeering enterprises, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the House amendment insert the following:

"That chapter 95 of title 18, United States Code, is amended (a) by adding the following new section at the end thereof:

"'§ 1952. Interstate and foreign travel or transportation in aid of racketeering enterprises

"'(a) Whoever travels in interstate or foreign commerce or uses any facility in interstate or foreign commerce, including the mail, with intent to—

"'(1) distribute the proceeds of any unlawful activity; or

"'(2) commit any crime of violence to further any unlawful activity; or

"'(3) otherwise promote, manage, establish, carry on, or facilitate the promotion, management, establishment, or carrying on, of any unlawful activity

and thereafter performs or attempts to perform any of the acts specified in subparagraphs (1), (2), and (3), shall be fined not more than $10,000 or imprisoned for not more than five years, or both.

"'(b) As used in this section "unlawful activity" means (1) any business enterprise involving gambling, liquor on which the Federal excise tax has not been paid, narcotics, or prostitution offenses in violation of the laws of the State in which they are committed or of the United States, or (2) extortion or bribery in violation of the laws of the State in which committed or of the United States.

"'(c) Investigations of violations under this section involving liquor or narcotics shall be conducted under the supervision of the Secretary of the Treasury.'

and (b) by adding the following item to the analysis of the chapter:

"'Sec. 1952. Interstate and foreign travel or transportation in aid of racketeering enterprises.'"

EMANUEL CELLER,

BYRON G. ROGERS,
WILLIAM M. MCCULLOCH,
GEORGE MEADER,
Managers on the Part of the House.
JAMES O. EASTLAND,
ESTES KEFAUVER,
OLIN D. JOHNSTON,
EVERETT MCKINLEY DIRKSEN,
ROMAN L. HRUSKA,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill, S. 1653, to amend title 18, United States Code, to prohibit travel or transportation in commerce in aid of racketeering enterprises, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommend in the accompanying conference report:

The House passed the Senate bill after amending it by striking out all after the enacting clause and inserting its own provisions. The Senate insisted upon its version and requested a conference; the House then agreed to the conference.

The conference report recommends that the Senate recede from its disagreement to the House amendment and agree to the same with an amendment, the amendment being to insert in lieu of the matter proposed to be inserted by the House amendment the matter agreed to by the conferees, and the House agree thereto.

In substance, the conference report contains the language of the House amendment with a few exceptions which are subsequently explained in detail.

The bill, as passed by the Senate, prohibited travel or the use of any facility for transportation in interstate or foreign commerce, including the mail, in furtherance of "extortion or bribery in violation of the laws of the State in which committed or of the United States." The amendment of the House, however, limited the coverage of the bill as it applied to extortion or bribery to "extortion or bribery in connection with gambling, liquor, narcotics, or prostitution." The version agreed to by the conferees accepts the Senate coverage so that the agreed amendment now covers "extortion or bribery in violation of the laws of the State in which committed or of the United States."

The Senate version also included in the definition of the term "unlawful activity" liquor on which the Federal excise tax had not been paid but the House amendment deleted this condition so as to include within the term "unlawful activity" liquor regardless of the payment of the Federal excise tax. The language adopted by the conferees is the language of the Senate version so as to limit "unlawful activity" on liquor on which the Federal excise tax had not been paid.

The Senate version of the bill was composed of two separate sections, viz., (1) relating to travel in interstate and foreign commerce, and (2) relating to the use of any facility for transportation in interstate or foreign commerce while the House version combined these two separate sections into a single section. On this particular matter, the House version was agreed to by the conferees so that the amendment to chapter 95 of title 18, United States Code, merely adds a new section at the end thereof designed as section 1952. Interstate and foreign travel or transportation in aid of racketeering enterprises.

Finally, the language which was contained in the Senate bill "after such travel" which related to the three specified acts involving travel or the use of any facility in interstate or foreign commerce to further unlawful activity is eliminated in the conference report in conformity with the House version which had eliminated the language as superfluous in view of the fact that the insertion of the word "thereafter" conforms the bill to the requirement that an act be performed subsequent to the travel in or the use of the interstate or foreign commerce facility. Thus, there is required the commission of an overt act after having traveled or after having used the facilities of interstate or foreign commerce.

EMANUEL CELLER,
PETER W. RODINO, Jr.,
BYRON G. ROGERS,
WILLIAM M. MCCULLOCH,
GEORGE MEADER,
Managers on the Part of the House.

Mr. ROGERS of Colorado. Mr. Speaker, I ask unanimous consent for the immediate consideration of the conference report on the bill S. 1653 just filed.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

Mr. HARRIS. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Colorado if there is any change in interpretation as affects certain businesses which we discussed on the floor of the House when the bill was before the House for consideration.

Mr. ROGERS of Colorado. As to the four categories, there is no change whatsoever.

Mr. HARRIS. It remains just as it was explained on the floor of the House when the bill was being considered over here?

Mr. ROGERS of Colorado. Yes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. ROGERS of Colorado. Mr. Speaker, I ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

The Clerk read the statement.

The SPEAKER pro tempore. The question is on the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

DEFENSE OF SUITS AGAINST FEDERAL EMPLOYEES

Mr. LANE. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 2883) to amend title 28, entitled "Judiciary and Judicial Procedure," of the United States Code to provide for the defense of suits against Federal employees arising out of their operation of motor vehicles in the scope of their employment, and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 2, strike out all after line 22 over to and including line 10 on page 3 and insert:

"(d) Upon a certification by the Attorney General that the defendant employee was acting within the scope of his employment at the time of the incident out of which the suit arose, any such civil action or proceeding commenced in a State court shall be removed without bond at any time before trial by the Attorney General to the district court of the United States for the district and division embracing the place wherein it is pending and the proceedings deemed a tort action brought against the United States under the provisions of this title and all references thereto. Should a United States district court determine on a hearing on a motion to remand held before a trial on the merits that the case so removed is one in which a remedy by suit within the meaning of subsection (b) of this section is not available against the United States, the case shall be remanded to the State court."

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

Mr. BYRNES of Wisconsin. Mr. Speaker, reserving the right to object, I wonder if the gentleman from Massachusetts [Mr. LANE] could tell us whether this has been cleared with the minority members on our committee, and whether it is agreeable to them?

Mr. LANE. Yes; it has been cleared. All parties are satisfied with the amendment as placed on this bill by the Senate. The amendment merely calls for an affidavit.

Mr. BYRNES of Wisconsin. I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

DEPARTMENTS OF LABOR, AND HEALTH, EDUCATION, AND WELFARE APPROPRIATION BILL, 1962

Mr. FOGARTY. Mr. Speaker, I call up the conference report on the bill (H.R. 7035) making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1962, and for other purposes, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 1154)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7035) "making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1962, and for other purposes," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 10, 21, 34, 49, 56, 64, 65, 66, and 69.

That the House recede from its disagreement to the amendments of the Senate numbered 3, 4, 5, 8, 13, 16, 18, 20, 22, 25, 27, 30, 32, 33, 35, 52, 53, 54, 58, 59, 61, 62, 67, and 68, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,796,000"; and the Senate agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$500,000"; and the Senate agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$405,000,000"; and the Senate agree to the same.

Amendment numbered 9: That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment, as follows: Restore the matter stricken out, amended to read as follows: "including not to exceed $250,000 for temporary employees at rates to be fixed by the Secretary of Labor (but not to exceed a rate equivalent to that for general schedule grade 9) without regard to the civil service laws and Classification Act of 1949, as amended"; and the Senate agree to the same.

Amendment numbered 11: That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$17,307,000"; and the Senate agree to the same.

Amendment numbered 12: That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$23,000,000"; and the Senate agree to the same.

Amendment numbered 14: That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$211,557,000"; and the Senate agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$11,594,000"; and the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$5,000,000"; and the Senate agree to the same.

Amendment numbered 23: That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$10,000,000"; and the Senate agree to the same.

Amendment numbered 26: That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$6,000,000"; and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$203,000,000"; and the Senate agree to the same.

Amendment numbered 31: That the House recede from its disagreement to the amendment of the Senate numbered 31, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$8,800,000"; and the Senate agree to the same.

Amendment numbered 37: That the House recede from its disagreement to the amendment of the Senate numbered 37, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$127,637,000"; and the Senate agree to the same.

Amendment numbered 38: That the House recede from its disagreement to the amendment of the Senate numbered 38, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$142,836,000"; and the Senate agree to the same.

Amendment numbered 39: That the House recede from its disagreement to the amendment of the Senate numbered 39, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$108,876,000"; and the Senate agree to the same.

Amendment numbered 40: That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$132,912,000"; and the Senate agree to the same.

Amendment numbered 42: That the House recede from its disagreement to the amendment of the Senate numbered 42, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$17,340,000"; and the Senate agree to the same.

Amendment numbered 43: That the House recede from its disagreement to the amendment of the Senate numbered 43, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$81,831,000"; and the Senate agree to the same.

Amendment numbered 44: That the House recede from its disagreement to the amendment of the Senate numbered 44, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$56,091,000"; and the Senate agree to the same.

Amendment numbered 47: That the House recede from its disagreement to the amendment of the Senate numbered 47, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$70,812,000"; and the Senate agree to the same.

Amendment numbered 51: That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$9,000,000"; and the Senate agree to the same.

Amendment numbered 55: That the House recede from its disagreement to the amendment of the Senate numbered 55, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$2,401,200,000"; and the Senate agree to the same.

Amendment numbered 57: That the House recede from its disagreement to the amendment of the Senate numbered 57, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$3,442,000"; and the Senate agree to the same.

Amendment numbered 60: That the House recede from its disagreement to the amendment of the Senate numbered 60, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,607,000"; and the Senate agree to the same.

Amendment numbered 63: That the House recede from its disagreement to the amendment of the Senate numbered 63, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$3,265,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 7, 15, 24, 29, 36, 41, 45, 46, 48, and 50.

Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House, at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7035) making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1962, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to each of such amendments; namely:

TITLE I—DEPARTMENT OF LABOR

Office of the Secretary

Amendment No. 1—Salaries and expenses: Appropriates $1,796,000 instead of $1,711,000 as proposed by the House and $1,811,000 as proposed by the Senate.

Bureau of International Labor Affairs

Amendment No. 2—Salaries and expenses: Appropriates $500,000 instead of $444,000 as proposed by the House and $510,000 as proposed by the Senate.

Office of the Solicitor

Amendment No. 3—Salaries and expenses: Appropriates $4,116,000 as proposed by the Senate instead of $3,616,000 as proposed by the House.

Bureau of Labor Standards

Amendment No. 4—Salaries and expenses: Appropriates $3,258,000 as proposed by the Senate instead of $3,208,000 as proposed by the House.

Bureau of Employment Security

Amendment No. 5—Limitation on salaries and expenses: Authorizes the expenditure of $10,500,000 from the employment security administration account in the Unemployment trust fund as proposed by the Senate instead of $9,600,000 as proposed by the House.

Amendment No. 6—Limitation on grants to States for unemployment compensation and employment service administration: Authorizes the expenditure of $405,000,000 from the employment security administration account in the Unemployment trust fund instead of $391,700,000 as proposed by the House and $406,700,000 as proposed by the Senate.

Amendment No. 7—Payment to the Federal extended compensation account: Appropriates $340,000,000 instead of $390,000,000 as proposed by the Senate.

Bureau of Labor Statistics

Amendment No. 8—Salaries and expenses: Appropriates $12,667,000 as proposed by the Senate instead of $12,167,000 as proposed by the House.

Amendment No. 9—Revision of the Consumer Price Index: Restores, with amendment, language proposed by the House and stricken by the Senate.

Amendment No. 10—Revision of the Consumer Price Index: Strikes language proposed by the Senate to make the funds appropriated available for obligation until June 30, 1963.

Wage and Hour Division

Amendment No. 11—Salaries and expenses: Appropriates $17,307,000 instead of $12,261,000 as proposed by the House and $17,761,000 as proposed by the Senate. This action was taken with the intention that the increase over the House allowance allow for not more than 500 additional positions.

TITLE II—DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

Amendment No. 12—Salaries and expenses: Appropriates $23,000,000 instead of $23,580,000 as proposed by the House and $22,000,000 as proposed by the Senate.

Office of Education

Amendment No. 13—Land-grant college aid: Appropriates $3,775,000 as proposed by the Senate.

Amendment No. 14—Defense educational activities: Appropriates $211,557,000 instead of $210,857,000 as proposed by the House and $211,707,000 as proposed by the Senate. The increase of $700,000 over the amount proposed by the House is composed of $500,000 for the fellowship program and $200,000 for counseling and guidance institutes.

Amendment No. 15—Defense educational activities: Reported in disagreement. It was agreed that a motion will be made for the House to recede from its disagreement to the language added by the Senate, and concur therein.

Amendment No. 16—Defense educational activities: Strikes language proposed by the House and inserts language proposed by the Senate.

Amendment No. 17—Salaries and expenses: Appropriates $11,594,000 instead of $11,364,000 as proposed by the House and $11,864,000 as proposed by the Senate. The increase over the amount proposed by the House will provide $65,000 for captioned films for the deaf; $20,000 for three additional positions for the library services staff; and $145,000 for fourteen positions to partially restore items disallowed by the House.

Amendment No. 18—Salaries and expenses: Deletes language proposed by the House.

Amendment No. 19—Cooperative research: Appropriates $5,000,000 instead of $5,500,000 as proposed by the House and $4,000,000 as proposed by the Senate. The committee of conference is agreed that no cooperative research project applications should be funded unless evaluated and approved by the Research Advisory Committee.

Office of Vocational Rehabilitation

Amendment No. 20—Research and training: Appropriates $20,250,000 as proposed by the Senate instead of $19,250,000 as proposed by the House. It is the intention of the committee of conference that $250,000 of the increase over the amount proposed by the House be applied for additional training of speech pathologists and audiologists.

Public Health Service

Amendment No. 21—Preamble: Strikes language proposed by the Senate to increase the maximum salary authorized to be paid certain personnel.

Amendment No. 22—Accident prevention: Appropriates $3,618,000 as proposed by the Senate instead of $3,368,000 as proposed by the House.

Amendment No. 23—Communicable disease activities: Appropriates $10,000,000 instead of $9,778,000 as proposed by the House and $10,028,000 as proposed by the Senate.

Amendment No. 24—Control of tuberculosis: Reported in disagreement. It was agreed that a motion will be made for the House to recede from its disagreement and concur in the language proposed by the Senate which will make $500,000 available for grants to States "in such amounts and upon such terms and conditions as the Surgeon General may determine."

Amendment No. 25—Control of tuberculosis: Provides that $3,500,000 of the funds appropriated shall be available for grants to States on a formula basis as proposed by the Senate instead of $4,000,000 as proposed by the House.

Amendment No. 26—Control of venereal diseases: Appropriates $6,000,000 instead of $5,815,000 as proposed by the House and $6,090,000 as proposed by the Senate.

Amendment No. 27—Dental services and resources: Appropriates $2,500,000 as proposed by the Senate instead of $2,182,000 as proposed by the House.

Amendment No. 28—Hospital construction activities: Appropriates $203,000,000 instead of $187,972,000 as proposed by the House and $212,972,000 as proposed by the Senate.

Amendment No. 29—Hospital construction activities: Reported in disagreement. It was agreed that a motion will be made for the House to recede from its disagreement and concur with an amendment which will make $140,028,000 available for part C instead of $125,000,000 as proposed by the House and $150,000,000 as proposed by the Senate, and will, in addition, authorize and direct the Surgeon General to transfer $9,972,000 from part G and section 636 to part C.

Amendment No. 30—Air pollution: Strikes language proposed by the House and inserts language proposed by the Senate.

Amendment No. 31—Air pollution: Appropriates $8,800,000 instead of $8,600,000 as proposed by the House and $8,900,000 as proposed by the Senate. The increase over the amount proposed by the House will provide an additional $100,000 for grants and an additional $100,000 for direct operations.

Amendment No. 32—Radiological health: Deletes language proposed by the House and inserts language proposed by the Senate.

Amendment No. 33—Radiological health: Appropriates $10,647,000 as proposed by the Senate instead of $9,147,000 as proposed by the House.

Amendment No. 34—Grants for waste treatment works construction: Strikes language proposed by the Senate.

Amendment No. 35—Foreign quarantine activities: Appropriates $6,084,000 as proposed by the Senate instead of $5,350,000 as proposed by the House.

Amendment No. 36—Foreign quarantine activities: Reported in disagreement. It was agreed that a motion will be made for the House to recede from its disagreement to the Senate amendment providing that $734,000 shall be available for construction of wharf facilities, and concur therein. The amount provided is to cover the entire cost of this construction.

Amendment No. 37—General research and services, National Institutes of Health: Appropriates $127,637,000 instead of $119,275,000 as proposed by the House and $140,000,000 as proposed by the Senate.

Amendment No. 38—National Cancer Institute: Appropriates $142,836,000 instead of $125,672,000 as proposed by the House and $160,000,000 as proposed by the Senate.

Amendment No. 39—Mental health activities: Appropriates $108,876,000 instead of $92,182,000 as proposed by the House and $125,570,000 as proposed by the Senate.

Amendment No. 40—National Heart Institute: Appropriates $132,912,000 instead of $105,723,000 as proposed by the House and $160,100,000 as proposed by the Senate.

Amendment No. 41—National Heart Institute: Reported in disagreement. It was agreed that a motion will be offered for the House to recede and concur in the Senate amendment which makes $1,000,000 of the appropriation available for plans and specifications for a gerontological research building and appurtenant facilities.

Amendment No. 42—National Institute of Dental Research: Appropriates $17,340,000 instead of $14,681,000 as proposed by the House and $20,000,000 as proposed by the Senate.

Amendment No. 43—Arthritis and metabolic disease activities: Appropriates $81,831,000 instead of $73,661,000 as proposed by the House and $90,000,000 as proposed by the Senate.

Amendment No. 44—Allergy and infectious disease activities: Appropriates $56,091,000 instead of $52,182,000 as proposed by the House and $60,000,000 as proposed by the Senate.

Amendment No. 45—Allergy and infectious disease activities: Reported in disagreement. It was agreed that a motion will be offered for the House to recede from its disagreement and concur in the Senate amendment which provides that $750,000 of the appropriation shall be available for modernization of the Rocky Mountain Laboratory, Hamilton, Montana.

Amendment No. 46—Neurology and blindness activities: Reported in disagreement. It was agreed that a motion will be offered for the House to recede from its disagreement and concur in the Senate amendment which authorizes the use of these funds to cooperate with State health agencies and others in the prevention, control, and eradication of these diseases dealt with under this appropriation.

Amendment No. 47—Neurology and blindness activities: Appropriates $70,812,000 instead of $57,624,000 as proposed by the House and $80,000,000 as proposed by the Senate.

No activity allocations of the appropriations for the various institutes were agreed to by the committee of conference.

Amendment No. 48—National Institutes of Health management fund: Reported in disagreement. It was agreed that a motion will be made for the House to recede and concur in the language proposed by the Senate.

Amendment No. 49—Grants for cancer research facilities: Restores appropriation of $5,000,000 proposed by the House and stricken by the Senate.

Amendment No. 50—Grants for hospital research facilities: Reported in disagreement. It was agreed that a motion will be offered for the House to recede from its disagreement and concur in the Senate amendment

with an amendment which will restore the matter proposed by the House and stricken by the Senate but making the appropriation pursuant to authorization of Section 636 of the Public Health Service Act rather than Section 433(a).

Amendment No. 51—Scientific activities overseas (Special foreign currency program): Appropriates $9,000,000 instead of $8,000,000 as proposed by the House and $10,084,000 as proposed by the Senate.

Amendment No. 52—Salaries and expenses, Office of the Surgeon General: Appropriates $5,375,000 as proposed by the Senate instead of $5,275,000 as proposed by the House.

SOCIAL SECURITY ADMINISTRATION

Amendment No. 53—Limitation on salaries and expenses, Bureau of Old-Age and Survivors Insurance: Strikes language proposed by the House.

Amendment No. 54—Limitation on salaries and expenses, Bureau of Old-Age and Survivors Insurance: Strikes language proposed by the House.

Amendment No. 55—Grants to States for public assistance: Appropriates $2,401,200,000 instead of $2,285,800,000 as proposed by the House and $2,501,200,000 as proposed by the Senate.

Amendment No. 56—Grants for training of public welfare personnel: Strikes appropriation of $2,000,000 as proposed by the Senate.

Amendment No. 57—Salaries and expenses, Bureau of Public Assistance: Appropriates $3,442,000 instead of $3,221,000 as proposed by the House and $3,663,000 as proposed by the Senate.

Amendments Nos. 58 and 59—Grants for maternal and child welfare: Appropriate $69,100,000 as proposed by the Senate instead of $67,100,000 as proposed by the House and earmark the $2,000,000 increase for maternal and child-health services.

Amendment No. 60—Research and training (special foreign currency program): Appropriates $1,607,000 instead of $1,000,000 as proposed by the House and $2,213,000 as proposed by the Senate.

Gallaudet College

Amendment No. 61—Salaries and expenses: Appropriates $1,256,000 as proposed by the Senate instead of $1,200,000 as proposed by the House.

Amendment No. 62—Construction: Appropriates $601,000 as proposed by the Senate instead of $127,000 as proposed by the House.

Office of the Secretary

Amendment No. 63—Salaries and expenses, Office of Field Administration: Appropriates $3,265,000 instead of $3,225,000 as proposed by the House and $3,345,000 as proposed by the Senate. The increase of $40,000 over the amount proposed by the House will allow for one additional secretary in each regional office whose primary responsibility will be to serve the regional representative on aging.

General Provisions

Amendment No. 64—Restores language proposed by the House and stricken by the Senate to limit, to fifteen per centum of the direct costs, the amount of funds that may be used to pay for indirect costs under research grants.

Amendments Nos. 65 and 66: Change section numbers.

TITLE III—NATIONAL LABOR RELATIONS BOARD

Amendment No. 67—Salaries and expenses: Appropriates $19,989,000 as proposed by the Senate instead of $18,213,000 as proposed by the House.

TITLE IV—NATIONAL MEDIATION BOARD

Amendment No. 68—Salaries and expenses: Appropriates $1,804,000 as proposed by the Senate instead of $1,604,000 as proposed by the House.

TITLE IX—GENERAL PROVISIONS

Amendment No. 69: Strikes language proposed by the Senate.

JOHN E. FOGARTY,
WINFIELD K. DENTON,
CLARENCE CANNON,
MELVIN R. LAIRD,
JOHN TABER,
Managers on the Part of the House.

Mr. FOGARTY. Mr. Speaker, when the House passed this bill last May 17, it carried a total of $4,327,457,000. A little over 2 months later on July 25, the Senate passed the bill with an increase to $5,161,380,000. It should be pointed out, however, that in the interim between the time the House passed the bill and the time of Senate action the President submitted amendments to the budget which added $722,133,000. In large part these amendments were due to new legislation passed by this Congress.

As agreed to in conference the total of the bill is $4,915,965,000. This is $245,415,000 less than the Senate bill; $588,508,000 over the House bill; $88,316,081 less than the revised President's budget for 1962 and is $72,451,331 less than the appropriations made for these departments for fiscal year 1961. The following table presents a more detailed tabulation of these comparisons:

Portion of the bill	Appropriations, 1961	Eisenhower budget	Budget amendments submitted to the House	Budget acted on by the House	House bill	Budget amendments submitted to the Senate
Department of Labor	$1,074,560,800	$264,357,000	$20,935,000	$285,292,000	$283,113,000	$497,700,000
Department of Health, Education, and Welfare	3,869,867,131	3,838,992,081	132,987,000	3,971,979,081	4,020,134,000	222,857,000
Related agencies	43,988,400	24,877,000		24,877,000	24,210,000	1,576,000
Total	4,988,416,331	4,128,226,081	153,922,000	4,282,148,081	4,327,457,000	722,133,000

Portion of the bill	Budget acted on by the Senate	Senate bill	Conference agreement	Conference agreement compared with—			
				Appropriations, 1961	Budget, 1962	House bill	Senate bill
Department of Labor	$782,992,000	$679,829,000	$629,350,000	−$445,210,800	−$153,642,000	+$346,237,000	−$50,479,000
Department of Health, Education, and Welfare	4,194,836,081	4,455,365,000	4,260,429,000	+390,561,869	+65,592,919	+240,295,000	−194,936,000
Related agencies	26,453,000	26,186,000	26,186,000	−17,802,400	−267,000	+1,976,000	
Total	5,004,281,081	5,161,380,000	4,915,965,000	−72,451,331	−88,316,081	+588,508,000	−245,415,000

As I have pointed out, the conference agreement which we bring you is substantially over the House bill—a total of $588,508,000. However, over 95 percent of this increase is made up by three items. The largest item of increase is $340 million for payment to the Federal extended compensation account. The House bill carried no provision for this item, but after the House acted, a budget amendment was submitted to the Senate. A minimum of this amount is necessary to enable the Department to carry out the Temporary Extended Unemployment Compensation Act of 1961, which was enacted by this session of Congress.

The second largest item of increase over the House bill is $115,400,000 for grants to States for public assistance. This increase is also in the bill as a result of an amendment to the budget submitted after the House acted on the bill. Again the need for these additional funds is occasioned by recently enacted legislation, in this instance, amendments to the Social Security Act.

The third large item of increase over the House bill is $97,335,000 for the National Institutes of Health. Since this is the only large item of increase, comparatively speaking, that was not occasioned by an amendment to the budget, which in turn resulted from additional recent legislation, I intend to discuss this in considerably more detail in a few moments. For the present, I will simply summarize the situation by saying that the conferees spent about as much time on the National Institutes of Health as all of the other items in the bill combined and we finally agreed on a 50–50 split. My position with regard to support for the work of the National Institutes of Health is well known.

It is hardly necessary for me to state that some of us would like to have seen more funds made available and of course there are those who think the amount agreed upon is entirely too high. The compromise agreed upon probably does not fully satisfy a single one of the conferees, but was agreed to unanimously as being a fair reconciliation of widely divergent opinions.

All of the other items that are over the House bill total to less than 5 percent of the total increase. Unless there are questions concerning them, I will not take the time of the House to discuss them at this time.

Now I should like to discuss in a little more detail the action of the conferees

on the appropriations for the National Institutes of Health. This section of the bill is certainly one of the most important and also one of the most difficult which the conferees had to consider.

Although there was substantial difference between the amounts appropriated by this House and by the Senate for each of the Institutes, there was complete agreement among the conferees on the importance and urgency of the NIH programs, on the objectives toward which they must be directed and on the philosophy underlying the attitude of the Congress toward medical research.

I have heard no dissent—and can imagine none—from the view that our Nation's most important national resource is its people, that good health is their most valuable possession, and that the preservation and advancement of the health of our citizens is, therefore, our foremost national policy and our first obligation as responsible legislators. During the past several years the Congress has given practical expression to this view by substantially increasing the appropriations for the National Institutes of Health which, as the research arm of the Public Health Service, have the primary operating responsibility for Federal participation in the advancement of the medical sciences.

The Congress has rightly taken the position that no opportunity for pressing the attack on the dread diseases should be lost or delayed because of lack of funds. This policy has wide and enthusiastic public support. The Members of the Congress, regardless of party, have insisted on a progressive and rapid expansion of the Nation's capacity for medical research. To this end the Congress has repeatedly made substantial increases in the appropriations with which the National Institutes of Health can support a wide range of promising research projects, the creation of additional research facilities and the training of research manpower.

As a result of these increases, the National Institutes of Health has become the foremost medical research organization not only in the United States but in the world and has become the most effective driving force behind our total national research effort in the medical and related sciences. The NIH now supports fully half of all the biomedical research done in this country. There is now no area of medical science which does not benefit directly from these programs. Virtually every major new contribution to medical knowledge now owes something to the support made available by these programs.

Federal support of programs that contribute so directly and so significantly to the health of every citizen is a most worthwhile expenditure of public funds. It is one of the few expenditures of tax dollars that can truly be described as a dividend paid to the taxpayer.

In fact, it makes little sense to speak of the appropriations for the National Institutes of Health as expenditures. They are investments—and I do not mean this figuratively, but literally. They are investments because they bring long-term returns not only in such important intangibles as health and happiness but in cold assets of dollars and cents. The actual return in national income and in tax revenue of every major advance in the prevention or effective treatment of a disease far exceeds the cost of even the most expensive and protracted research program.

Let me cite just one obvious recent example. I have seen no calculation of the amount of work time that used to be lost as the result of the many infectious diseases which can now be prevented or cut short by the use of antibiotics, but it does not require a statistician to conclude that the earned income and tax revenue restored to the economy by these wonder drugs completely overshadows the cost of their development, and more than pays for many years of research in areas which have not yet seen such dramatic results.

Economic losses due to diseases which doctors have not yet learned to control are staggering.

It is estimated that if the victims of arteriosclerosis—the major killer that is responsible for over half of all deaths in the United States—could live only one extra healthy year they would add a billion dollars to the national income and pay over $150 million in income taxes alone.

Arthritis and rheumatism, in addition to forcing many people to stop working prematurely, are responsible for the loss of 17 million working days by victims still in normal employment. Apart from the human misery caused by these crippling diseases, they cost the Nation over $2 billion a year and represent a loss of more than $250 million in taxes.

The common cold and other acute respiratory diseases have disabled as many as 6 million people on a single day and annually account for nearly 300 million illnesses. Most of these are short and more, uncomfortable than serious but they cost the Nation $2 billion each year.

It is conservatively estimated that cerebral palsy is responsible for a loss of $300 million in income taxes. About 90 percent of the adult victims of this tragic disease cannot support themselves. Merely to maintain them costs well over $200 million.

The total cost to the Nation of mental illnesses is incalculable. The maintenance expenses of non-Federal public mental hospitals alone is over $900 million. The mentally retarded, of whom there are nearly 5½ million or about 3 percent of the entire population, cost the national economy a billion dollars a year. The direct costs and indirect losses due to serious crimes, juvenile delinquency, alcoholism, narcotic addiction and other social maladjustment in which mental illness is a significant factor runs into astronomical figures.

There are over 356,000 blind persons in our country now compared with 230,000 in 1940. In 1958, 110,000 blind persons received $90 million from public funds for their support and it is estimated that the Federal Government lost $95 million in income taxes from the blind who are under 65 and so still in potentially productive years. It will be expected that the Institute for Neurology and Blindness substantially increase their efforts and activities in the field of blindness.

These are only the most dramatic examples of great economic losses due to specific diseases. The whole, long, heartrending list totals billions of dollars in lost earnings, loss of capital through depletion of savings, nonproductive expenditures on essential care—much of it at public expense—for the incurable, and loss of tax revenues at all levels of government.

These dread diseases are not only a drain on the economy and the cause of a serious loss of income for the Federal Government but they involve direct costs which completely overshadow the NIH appropriation. For example, care and compensation for veterans with neuropsychiatric problems cost the Veterans' Administration $900 million a year; compensation or pensions to veterans with arthritis or rheumatism cost another $200 million. Publicly financed aid to the blind last year cost more than $95 million, much of it from Federal funds. Altogether, actual out-of-pocket expenditures by the Federal Government directly attributable to disease total several billion dollars a year.

If one wants to measure the amount that can profitably be invested in medical research against these cold dollar figures, even a cursory calculation will show that every dollar spent for research to prevent or cure a disease will, when the breakthrough finally comes, be repaid several times over year after year.

Personally, I prefer a different yardstick for measuring the amount that the Federal Government should invest in medical research. To me, the fact that nearly half a million new cases of cancer are diagnosed each year and that about 250,000 individuals will die of it during the next 12 months is a greater spur to action than the fact that this means a $12 billion loss in goods and services which these people would otherwise have produced or that the annual hospital bill for cancer patients is over $300 million.

I am much more concerned—and I believe a humane and decent government ought to be much more concerned—about the intensely personal tragedy of the onslaught of cancer in a home. The investment I want to make in helping to find a cure for leukemia will be paid off by the happy useful life it will enable the stricken child to lead; the dividend to which I look forward is the relieved smile on the faces of the grief-stricken parents.

I can give you no statistical measure of the misery caused by the dread diseases against which you might gage the need for medical research. Surely you do not need one. There is not a Member of this House who cannot recite numerous instances in which medical knowledge or therapeutic techniques have been inadequate to prevent a heartrending tragedy. We are all acutely aware of how much remains to be done. The hope that medical science will find

the missing clue and the sought-for cure before we ourselves need it nags each of us from time to time.

There can be no serious argument over the fact that this country needs the most vigorous medical research programs our scientists can mount. There is no valid argument against the view that it is the simple execution of an obvious responsibility to the people of this country for the Federal Government to provide whatever funds are needed to supplement private sources of support so that these programs may be promptly carried out. There was no disagreement on these points among the conferees. I believe that there is no disagreement on these points in this House.

The difficult point is to determine the level of support which can be efficiently and effectively used. As the amount proposed by the budget seemed to many of us to be inadequate, and virtually all of the testimony from private individuals, doctors and others, agreed on that, the Appropriations Committee recommended, as a compromise, and the House accepted the figure of $641 million originally proposed by NIH and the Department to the Bureau of the Budget. This was $58 million higher than the budget request, but it did not represent a real broadening of the scope of the NIH programs because it merely restored the amount by which the Bureau of the Budget had cut the NIH request.

This was not as good a figure as many of us thought it ought to be. I should like to remind the House that I pointed out at the time that it fell far short of the $757 million which had actually been requested by the institutes on the basis of their professional judgment of the needs of the NIH research and training programs. I added that I could not tell exactly how much more it falls short of what is actually needed if we are as serious as we ought to be about pushing these vital programs as hard as they can go.

The requests of the public witnesses—the so-called citizens' budget—totaled more than $976 million. Let me stress that this is not an irresponsible figure but the result of the cumulative views of witnesses most of whom are outstanding experts in their field and all of whom are well acquainted with the NIH programs and the research needs and opportunities in the medical sciences.

The conferees have now agreed on a total of $738,335,000 for the several appropriations for the National Institutes of Health in fiscal year 1962. This figure lies halfway between the total of $835,670,000 in the Senate version of the bill and the $641 million allowed by the House when the bill was originally passed.

It is, I think, a good compromise. It is only $19 million less than the professional judgment figure of the Institutes. It can thus be accepted, on the one hand, as being enough to meet the demonstrable needs as seen by those directly responsible for the National Institutes of Health program and, on the other, as being no more than can be appropriately and effectively employed to further medical research as rapidly as available facilities and manpower will permit during the current fiscal year.

The bill, as agreed to by the conferees, provides not only for a vigorous research program but will have an important effect on the Nation's research capacity in the future by making a substantial contribution to the expansion of medical research facilities and the training of research manpower.

Grants for the creation and long-term support of research centers, which were authorized by the Congress in 1960, will be further expanded and the disease categories for which they will be available will be broadened. These centers have already proved to be a highly significant resource for the conduct of complex and exacting investigations. In addition to the specialized clinical centers, funds are provided for the creation of special resource centers in which the principles, instrumentation, and techniques of the physical sciences and certain engineering specialties can be brought to bear on biomedical research.

Additional centers for handling primates for medical research will also be constructed and supported.

The bill includes $30 million for the final year of the program authorized by the present Health Research Facilities Construction Act. This program has made an extraordinary contribution to the expansion of research facilities but it has not kept pace with construction needs. The $30 million ceiling on the annual appropriation has become a serious limitation and the requirement that the Federal contribution be matched on a dollar-for-dollar basis has deprived some institutions of access to these much needed construction funds. Bills pending before the Congress would extend the program and will give the House a further opportunity to consider the ceiling on the appropriation. This conference report, however, includes $5 million for urgently needed cancer research facilities in institutions that are not able to meet the matching requirements of the Health Research Facilities Construction Act.

The special provision, in the bill as passed by the House, of $10 million in matching funds for the construction of experimental hospitals has been retained but has been transferred from the NIH appropriation to the appropriation for hospital construction activities in anticipation of authority contained in H.R. 4998.

The bill also provides for the expansion of the training and fellowship programs of the Institutes. These programs are under review by the NIH and the committee has asked for a report on the estimated manpower requirements and expected output over the next 5 and 10 years as a basis for considering the future expansion of the training programs. Strong representations have, however, been made to the committees in both Houses to the effect that a year's delay in the progressive development of these programs will slow their momentum and will leave a training gap which it will not be possible to make up.

Especially with regard to the National Institute of Mental Health, we expect a sizable part of the increase over the budget to be devoted to the acceleration of training programs. Severe personnel shortages continue to prevent thousands upon thousands of mental patients from receiving the newer treatments which have been developed.

We are particularly interested in seeing expansion of the general practitioner training program. This is one of the most popular and worthwhile programs in the entire mental health field, and the demand for training on the part of general practitioners today far exceeds the present availability of training programs and stipends.

Both House and Senate committees agree as to the necessity for an accelerated campaign against juvenile delinquency, and I think the recommendation that the sum of $2.5 million be spent on this activity during fiscal year 1962 is the minimum which should be so utilized.

The most important effect of the increases to which the conferees have agreed is, however, to give still greater impetus to the vitally important work already in progress on the dread diseases and to the indispensable basic research that must provide clinicians with an understanding of fundamental life processes and of the chemical and physical mechanisms on which the proper functioning of the body depends.

The 865 pages of official testimony and 200-odd pages devoted to private witnesses in the transcript of the committee's hearings are full of the most impressive evidence of the recent accomplishments of medical research and of the needs and opportunities for pressing forward, with even greater vigor, the never ending work of pushing back the scourges which beset mankind. No one who has reviewed this evidence can doubt that the sum now provided in this bill for medical research and training can be wisely and productively spent.

We are confident that the increases provided will be warmly welcomed by the American people who have such an important and very personal stake in the success of the NIH programs. We strongly recommend that they be accepted by the House.

Mr. Speaker, this conference report was agreed to unanimously by both the managers on the part of the House and the managers on the part of the Senate. I urge its adoption by the House.

I now yield to the distinguished ranking minority member of the subcommittee, the gentleman from Wisconsin [Mr. LAIRD].

Mr. LAIRD. Mr. Speaker, the gentleman from Rhode Island has explained the increases in the bill from the amounts originally included as it passed the House, and has set forth the total reduction which was made in the bill as it passed the Senate. The Senate bill contained $5.161 billion. As he stated, we have reduced this bill in conference by $245 million.

One of the reductions made in conference has to do with grants to the States for welfare programs. There is

a strong feeling on the part of many Members that the Department of Health, Education, and Welfare in administering this program with the States can carry on a more vigilant type of review. Many of the examples of waste that have been pointed out in the welfare programs, such as aid to dependent children, old-age assistance, and others, can be prevented if carefully policed by the Department of Health, Education, and Welfare, with resultant savings of both Federal and local funds.

The conferees also made a reduction in the appropriation for carrying out the temporary unemployment compensation program. In that particular program there is a reduction in this bill of $150 million from the budget request. This reduction below the budget was brought about by new estimates which show less than the anticipated unemployment for extended periods that the Bureau of the Budget and the Department of Labor submitted to the Congress as justification for the request.

With regard to the National Institutes of Health, the House and the Senate conference split the difference between the Senate bill and the House bill. But we made it very clear in the report on the part of the managers that the conferees did not agree on any earmarking of funds by activities within the appropriations. The Department will submit to the Congress a listing, and that listing will be submitted to us late this afternoon or tonight; that will show, by Institute, a breakdown of the appropriations for next fiscal year by activity. In the statement on the part of the managers we have made a very clear statement that the priorities should be worked out in the Department rather than by the Committee of Conference. I had asked the Secretary of Health, Education, and Welfare for a priority listing by activities in the National Institutes of Health giving priorities to the various earmarkings that had been done by the Senate, but that listing has not yet been forthcoming. I have been assured this morning that such a listing will be forthcoming and will be available for us late this afternoon and under leave to extend my remarks I will include it in the RECORD at this point:

National Institutes of Health—Distribution of conferee increases over House allowances

	Research grants	Clinical research centers [1]	Primate centers [1]	Fellowships	Training	State control program	Community demonstration projects	Professional and technical assistance	Chemotherapy contracts	Other direct operations	Total increases
General research and services	$2,412,000	[0]	[0]	$1,000,000	$4,500,000	0	0	0	0	$450,000	$8,362,000
National Cancer Institute	6,138,000	[$1,000,000]	[0]	400,000	2,000,000	0	$500,000	$4,000,000	$2,250,000	1,876,000	17,164,000
Mental health activities	6,609,000	[2,500,000]	[0]	1,750,000	6,500,000	$750,000	0	300,000	0	785,000	16,694,000
National Heart Institute	17,570,000	[2,000,000]	[$2,000,000]	750,000	3,500,000	1,500,000	0	1,800,000	0	2,069,000	27,189,000
National Institute of Dental Research	755,000	[0]	[0]	250,000	1,500,000	0	0	0	0	154,000	2,659,000
Arthritis and metabolic disease activities	4,982,000	[0]	[0]	330,000	2,000,000	0	0	0	0	858,000	8,170,000
Allergy and infectious disease activities	1,583,000	[0]	[0]	100,000	110,000	0	0	0	0	2,116,000	3,909,000
Neurology and blindness activities	5,988,000	[2,000,000]	[0]	500,000	2,154,000	0	0	3,000,000	0	1,546,000	13,188,000
Total	46,037,000	[1] [7,500,000]	[1] [2,000,000]	5,080,000	22,264,000	2,250,000	500,000	9,100,000	2,250,000	9,854,000	97,335,000

[1] The entries under "Clinical research centers" and "Primate centers" are included in the entries in the column "Research grants."

Mr. DINGELL. Mr. Speaker, I was very much distressed to note the deep cuts made by the other body in the Labor-HEW appropriation bill and rejoice greatly to find that much of this cut has been put back in by the conferees. Even with the cuts restored, I note that Food and Drug, already hard put by budget limitations to carry out its responsibility to safeguard the health and welfare of American people, will have about 30 less inspectors than provided by the original budget request. This cut will impair all of Food and Drug's inspection programs and it is indeed regrettable that the full amount of the budget request, and more, was not appropriated.

In his budget, the President requested an appropriation of $23,580,000 to operate the Food and Drug Administration during fiscal year 1962. The President's budget was approved by the House of Representatives. The Senate, however, reduced the appropriation to $22 million, a cut of $1,580,000. These divergent amounts have been resolved by a House-Senate Conference Committee which agreed to reinstate $1 million of the Senate cut, bringing the total Food and Drug Administration appropriation for fiscal year 1962 to $23 million.

The President's budget and the House bill would have provided FDA with an increase of $4,732,000 over the fiscal year 1961 appropriation. This increase, it might be noted, was identical to the one approved by the Eisenhower administration before leaving office. In effect, therefore, it represented the combined thinking of two administrations. Furthermore, it was in accordance with a plan instituted in fiscal year 1957 to strengthen FDA across the board over a period of up to 10 years. This plan was the result of a special study made in 1955 by an advisory committee of citizens which concluded that FDA was understaffed and lacked the proper facilities and equipment to provide adequate protection to the Nation's consumers of foods, drugs, and cosmetics.

The loss of $580,000 for fiscal year 1962 will have direct effects of an adverse nature on FDA's operations. Thirty positions, including inspectors and chemists working in FDA's 18 district offices scattered throughout the Nation, will be lost to the Agency. These positions had been requested to bolster FDA's efforts protecting consumers against harmful food additives. In imposing this cut, the Congress has, in effect, denied FDA the resources to carry out responsibilities which Congress itself assigned to the Agency only 3 years ago when it passed the Food Additives Amendment of 1958.

There are today an estimated 3,000 chemicals used in foods and food packaging materials. Many of them are known to be highly toxic, and unless they are used in a manner and in amounts prescribed by scientific tests, these chemicals can be harmful to consumers.

It is FDA's responsibility under law to determine the safety of all food additives and to establish tolerances for their proper use in each and every food product. Once this is accomplished, FDA, by means of its inspectors and chemists in field laboratories, must make sure that these tolerances are maintained by each of the estimated 73,000 food manufacturing, processing, and packaging establishments using additives. This is a heavy burden and important responsibility, and the health of every American depends to a considerable extent upon FDA's ability to bear this burden adequately and fulfill its responsibilities under law.

As of now, FDA has the manpower to inspect each year only a fourth of the food establishments under its jurisdiction. To cut the Agency's staff by 30 positions does little to improve matters. For this reason it is unfortunate that the full appropriation of $23,580,000 as requested by the President and approved by the House was not approved.

Mr. FOGARTY. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

The SPEAKER pro tempore. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 7: Page 8, line 8, insert:

"PAYMENT TO THE FEDERAL EXTENDED COMPENSATION ACCOUNT

"For payment into the Federal extended compensation account of the unemployment trust fund, as repayable advances, as authorized by section 13 of the Temporary Extended Unemployment Compensation Act of 1961, $390,000,000, to remain available only until September 30, 1962."

Mr. FOGARTY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FOGARTY moves that the House recede from its disagreement to the amendment of the Senate numbered 7 and concur

therein with an amendment, as follows: In lieu of the sum "$390,000,000," insert "$340,000,000."

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 15: Page 18, line 13, insert: ": *Provided further*, That no part of this appropriation shall be available for graduate fellowships awarded initially under the provisions of the Act after the date of enactment of the Department of Health, Education, and Welfare Appropriation Act, 1962, which are not found by the Commissioner of Education to be consistent with the purpose of the Act as stated in section 101 thereof."

Mr. FOGARTY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FOGARTY moves that the House recede from its disagreement to the amendment of the Senate numbered 15 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 24: Page 24, line 20, insert: "of which $500,000 shall be available for grants of money, services, supplies and equipment to States, and with the approval of the respective State health authority, to counties, health districts and other political subdivisions of the States for the control of tuberculosis in such amounts and upon such terms and conditions as the Surgeon General may determine, and".

Mr. FOGARTY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FOGARTY moves that the House recede from its disagreement to the amendment of the Senate numbered 24 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 29: Page 26, line 12, strike out "$125,000,000" and insert "$150,000,000".

Mr. FOGARTY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FOGARTY moves that the House recede from its disagreement to the amendment of the Senate numbered 29 and concur therein with an amendment, as follows: In lieu of the amount proposed by said amendment, insert the following: "$140,028,000 plus $9,972,000 which the Surgeon General is authorized and directed to transfer from the sums set forth herein for section 636 and for grants or loans for facilities pursuant to part G".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 36: Page 30, line 21, insert: ", of which $734,000 shall be available for construction of wharf facilities at the Rosebank Quarantine Station."

Mr. FOGARTY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FOGARTY moves that the House recede from its disagreement to the amendment of the Senate numbered 36 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 41: Page 32, line 23, insert: ", of which $1,000,000, to remain available until December 31, 1962, shall be available for plans and specifications for a gerontological research building and appurtenant facilities."

Mr. FOGARTY. I offer a motion.

The Clerk read as follows:

Mr. FOGARTY moves that the House recede from its disagreement to the amendment of the Senate numbered 41 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 45: Page 33, line 18, insert the following: ", and of which $750,000 shall be available for modernization, including renovation and alterations, planning and construction, of the Rocky Mountain Laboratory, Hamilton, Montana."

Mr. FOGARTY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FOGARTY moves that the House recede from its disagreement to the amendment of the Senate numbered 45 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 46: Page 33, line 24, insert the following: "; to cooperate with State health agencies, and other public and private nonprofit institutions, in the prevention, control, and eradication of neurological and sensory diseases and blindess by providing for consultative services, training, demonstrations, and other control activities, directly and through grants-in-aid,".

Mr. FOGARTY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FOGARTY moves that the House recede from its disagreement to the amendment of the Senate numbered 46 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 48: Page 34, line 7, insert the following:

"NATIONAL INSTITUTES OF HEALTH MANAGEMENT FUND

"The paragraph under this head in the Department of Health, Education, and Welfare Appropriation Act, 1958 (71 Stat. 220) is amended by striking out the words 'cost of such operation' in the second sentence of such paragraph, and inserting in lieu thereof 'reasonable value of the meals served.' "

Mr. FOGARTY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FOGARTY moves that the House recede from its disagreement to the amendment of the Senate numbered 48 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 50: Page 34, line 19, strike out lines 19 to 24, as follows:

"GRANTS FOR HOSPITAL RESEARCH FACILITIES

"For making grants, as authorized by section 433(a) of the Act, for the construction of hospital research facilities, $10,000,000: *Provided*, That none of these funds shall be used to pay in excess of two-thirds of the cost of such facilities."

Mr. FOGARTY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FOGARTY moves that the House recede from its disagreement to the amendment of the Senate numbered 50 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment, amended to read as follows:

"HOSPITAL AND MEDICAL FACILITY RESEARCH

"For research and demonstration in the development and utilization of services and hospital and other medical facilities, including grants for construction and equipment of experimental or demonstration hospitals and other medical facilities, as authorized by section 636 of the Act, $10,000,000: *Provided*, That none of these funds shall be used to pay in excess of two-thirds of the cost of such construction and equipment: *Provided further*, That this paragraph shall be effective only upon enactment into law of H.R. 4998, Eighty-seventh Congress, or similar legislation."

Mr. LAIRD. Mr. Speaker, will the gentleman yield?

Mr. FOGARTY. I yield to the gentleman from Wisconsin.

Mr. LAIRD. Mr. Speaker, I have been asked several questions about this amendment and what its practical effect is. This amendment carries out the program that was outlined on the floor of the House by the gentleman from Rhode Island and myself at the time the Labor-Health, Education, and Welfare appropriation bill was before us. The only difference in the provisions of this amendment and the bill that was passed by the House of Representatives is that instead of using the authority of section 433(a) of the Public Health Service Act we will use the authority of section 636 as amended in bill H.R. 4998, which has passed both the House and the Senate. We have retained the two-thirds matching provision that was in the House bill as it passed the House several months ago.

Mr. FOGARTY. Mr. Speaker, I move the previous question on the motion.

The previous question was ordered.

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the several motions was laid on the table.

Mr. FOGARTY. Mr. Speaker, I ask unanimous consent that all Members be permitted to extend their remarks in the RECORD on the conference report just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

RESERVE COMPONENTS OF THE ARMED FORCES

Mr. RIVERS of South Carolina. Mr. Speaker, I ask unanimous consent to take from the Speaker's table for immediate consideration the bill (H.R. 5490) to provide for more effective participation in the Reserves components of the Armed Forces, and for other purposes, with a Senate amendment thereto.

The Clerk read the title of the bill.

The Clerk read the Senate amendment as follows:

Strike out all after the enacting clause and insert: "That section 6 of the Universal Military Training and Service Act, as amended (50 U.S.C. App. 456), is amended—

"(1) by amending subsection (c)(2)(A) by striking out in the last sentence thereof the words 'eight years' and substituting the words 'six years' in lieu thereof;

"(2) by amending subsection (c)(2)(B) to read as follows:

"'(B) Any person who after attaining the age of eighteen years and six months, but prior to attaining the age of twenty-six years and prior to the issuance of orders for him to report for induction, enlists or accepts appointment in an organized unit of the National Guard shall be deferred from training and service under this Act so long as he continues to serve satisfactorily as a member of such organized unit. No person deferred under the provisions of this clause shall by reason of such deferment be liable for training and service in the Armed Forces by reason of subsection (h) of this section after the twenty-eighth anniversary of the date of his birth or the sixth anniversary of the date of his enlistment or appointment in such unit, whichever occurs later. No such person who has completed six years of satisfactory service as a member of an organized unit of the National Guard, and who during such service has performed active duty for training with an armed force for not less than three consecutive months shall be liable for induction for training and service under this Act, except after a declaration of war or national emergency made by the Congress.';

"(3) by amending subsection (c)(2)(D) by striking out in the last sentence thereof the words 'eight years' and substituting the words 'six years' in lieu thereof;

"(4) by amending subsection (c)(2)(E) to read as follows:

"'(E) Notwithstanding any other provision of this Act, the President, under such rules and regulations as he may prescribe, may provide that any person enlisted in the Ready Reserve of any reserve component of the Armed Forces pursuant to authority conferred by this paragraph or under section 262 of the Armed Forces Reserve Act of 1952, as amended, or any member of the National Guard deferred from training and service by clause (A) of this paragraph, or any person enlisted or appointed in the National Guard after the effective date of this amended clause and deferred from training and service by clause (B) of this paragraph, who fails to serve satisfactorily as a member of such Ready Reserve or National Guard or the Ready Reserve of another reserve component of which he becomes a member may be selected for training and service and inducted into the armed force of which such reserve component is a part, prior to the selection and induction of other persons liable therefor.';

"(5) by amending clause (C) in the first sentence of subsection (d)(1) to read as follows: '(C) agrees to remain a member of a regular or reserve component until the sixth anniversary of the receipt of a commission,';

"(6) by amending the fifth and sixth sentences of subsection (d)(1) to read as follows: 'If, at the time of, or subsequent to, such appointment, the armed force in which such person is commissioned does not require his service on active duty in fulfillment of the obligation undertaken by him in compliance with clause (B) of the first sentence of this paragraph, such person shall be ordered to active duty for training with such armed force in the grade in which he was commissioned for a period of active duty for training of not less than three months or more than six months (not including duty performed under section 270(a) of title 10, United States Code), as determined by the Secretary of the military department concerned to be necessary to qualify such person for a mobilization assignment. Upon being commissioned and assigned to a Reserve component, such person shall be required to serve therein, or in a Reserve component of any other armed force in which he is later appointed, for the remainder of his service obligation.'; and

"(7) by striking out in the seventh and eighth sentences of subsection (d)(1) 'in such unit' wherever it appears therein.

"SEC. 2. Section 262 of the Armed Forces Reserve Act of 1952, as amended (50 U.S.C. 1013), is amended—

"(1) by striking out in subsection (b)(3) the words 'eighteen years and six months' and substituting the words 'twenty-six years' in lieu thereof; and

"(2) by striking out in the first sentence of subsection (c) thereof the words 'eight years' and substituting the words 'six years' in lieu thereof;

"(3) by amending the last sentence of subsection (c) thereof to read as follows: 'Each such person (1) shall be deferred from training and service under the Universal Military Training and Service Act, as amended, so long as he continues to serve satisfactorily, as determined under regulations prescribed by the appropriate Secretary, (2) shall by reason of that deferment remain liable for induction for training and service under the provisions of section 4(a) of such Act until the twenty-eighth anniversary of the date of his birth or until the sixth anniversary of the date of his enlistment under this section, whichever anniversary occurs later, and (3) upon the completion of six years of such satisfactory service pursuant to such enlistment shall be exempt from further liability for induction for training and service under such Act, except after a declaration of war or national emergency made by the Congress after August 9, 1955.'

"SEC. 3. Section 270 of title 10, United States Code, is amended by adding the following new subsection at the end thereof:

"'(c) Any person who becomes a member of the Army National Guard of the United States or the Air National Guard of the United States after the enactment of this subsection and who fails in any year to perform satisfactorily the training duty prescribed by or under law for members of the Army National Guard or the Air National Guard, as the case may be, as determined by the Secretary concerned, may, upon the request of the Governor of the State or territory, Puerto Rico, or the Canal Zone, or the commanding general of the District of Columbia National Guard, whichever is concerned, be ordered, without his consent, to perform additional active duty for training for not more than forty-five days. A member ordered to active duty under this subsection shall be ordered to duty as a Reserve of the Army or as a Reserve of the Air Force, as the case may be.'

"SEC. 4. (a) Section 651(a) of title 10, United States Code, is amended to read as follows:

"'(a) Each person who becomes a member of an armed force before his twenty-sixth birthday shall serve in the armed forces for a total of six years. Any person covered by this subsection may be sooner discharged because of personal hardship under regulations prescribed by the Secretary of Defense, or, if he is a member of the Coast Guard while it is not operating as a service in the Navy, by the Secretary of the Treasury. Any part of such service that is not active duty or is active duty for training shall be performed in a reserve component.'

"(b) The amendment made by subsection (a) of this section shall be effective with respect to all persons who became members of the armed forces prior to the date of enactment of this Act as well as to all persons who become members after the date of enactment of this Act, any enlistment or written agreement entered into prior to such date to the contrary notwithstanding.

"SEC. 5. Section 3261 of title 10, United States Code, is amended—

"(1) by striking out the designation '(b)' in subsection (a) and inserting the designation '(c)' in place thereof; and

"(2) by redesignating subsection (b) as subsection '(c)' and inserting the following new subsection (b):

"'(b) Under regulations to be prescribed by the Secretary of the Army, a person who enlists or reenlists in the Army National Guard, or whose term of enlistment or reenlistment in the Army National Guard is extended, shall be concurrently enlisted or reenlisted, or his term of enlistment or reenlistment shall be concurrently extended, as the case may be, as a Reserve of the Army for service in the Army National Guard of the United States.'

"SEC. 6. Section 8261 of title 10, United States Code, is amended—

"(1) by striking out the designation '(b)' in subsection (a) and inserting the designation '(c)' in place thereof; and

"(2) by redesignating subsection (b) as subsection '(c)' and inserting the following new subsection (b):

"'(b) Under regulations to be prescribed by the Secretary of the Air Force, a person who enlists or reenlists in the Air National Guard, or whose term of enlistment or reenlistment in the Air National Guard is extended, shall be concurrently enlisted or reenlisted, or his term of enlistment or reenlistment shall be concurrently extended, as the case may be, as a Reserve of the Air Force for service in the Air National Guard of the United States.'

"SEC. 7. Title 32, United States Code, is amended as follows:

"(1) Section 302 is amended to read as follows:

"'§ 302. Enlistments, reenlistments, and extensions

"'(a) Under regulations to be prescribed by the Secretary concerned, original enlistments in the National Guard may be accepted for—

"'(1) any specified term, not less than three years, for persons who have not served in an armed force; or

"'(2) any specified term, not less than one year, for persons who have served in any armed force.

"'(b) Under regulations to be prescribed by the Secretary concerned, reenlistment in the National Guard may be accepted for any specified period, or, if the person last served in one of the highest five enlisted grades, for an unspecified period.

"'(c) Enlistments or reenlistments in the National Guard may be extended—

"'(1) under regulations to be prescribed by the Secretary concerned, at the request of the member, for any period not less than six months; or

"'(2) by proclamation of the President, if Congress declares an emergency, until six months after termination of that emergency.'

"(2) The analysis of chapter 3 is amended by striking out the following item:

"'302. Enlistments.'

and inserting the following item in place thereof:

"'302. Enlistments, reenlistments, and extensions.'

"SEC. 8. The amendments made by sections 5, 6, and 7 of this Act shall not affect any enlistment, reenlistment, or appointment entered into or made before the effective date of this Act.

"SEC. 9. (a) Section 29(a) of the Act of August 10, 1956, as amended (5 U.S.C. 30r), is amended by striking out the words 'fiscal year' wherever they appear therein and substituting the words 'calendar year' in lieu thereof.

"(b) Except with respect to substitute postal employees, the amendments made by subsection (a) of this section shall become effective as of January 1, 1961, and with respect to substitute postal employees such amendments shall become effective as of January 1, 1962."

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

Mr. BYRNES of Wisconsin. Reserving the right to object, Mr. Speaker, will the gentleman advise whether this amendment has been taken up with the minority members of the committee?

Mr. RIVERS of South Carolina. It has.

Mr. BYRNES of Wisconsin. Is it agreeable to them?

Mr. RIVERS of South Carolina. It is agreeable to them.

Mr. BYRNES of Wisconsin. I withdraw by reservation of objection, Mr. Speaker.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. RIVERS of South Carolina. Mr. Speaker, I move that the House concur in the Senate amendment with an amendment.

The Clerk read as follows:

Mr. RIVERS of South Carolina moves to concur in the Senate amendment to the bill H.R. 5490, with an amendment, as follows:

In lieu of the matter proposed by the Senate amendment, insert "That section 6 of the Universal Military Training and Service Act, as amended (50 U.S.C. App. 456), is amended—

"(1) by amending subsection (c)(2)(E) to read as follows:

"'(E) Notwithstanding any other provision of this Act, the President, under such rules and regulations as he may prescribe, may provide that any person enlisted in the Ready Reserve of any reserve component of the Armed Forces pursuant to authority conferred by this paragraph or under section 262 of the Armed Forces Reserve Act of 1952, as amended, or any member of the National Guard deferred from training and service by clause (A) of this paragraph, or any person enlisted or appointed in the Ready Reserve of any reserve component of the Armed Forces (other than under section 511(b) of title 10, United States Code), the Army National Guard, or the Air National Guard after the effective date of this amended clause, but prior to his attaining the age of 26, who fails to serve satisfactorily as a member of such Ready Reserve or National Guard or the Ready Reserve of another reserve component of which he becomes a member may be selected for training and service and inducted into the armed force of which such reserve component is a part, prior to the selection and induction of other persons liable therefore.'; and

"(2) by striking out the words 'in such unit' in the seventh and eighth sentences of subsection (d)(1) and amending the fifth and sixth sentences of that subsection to read as follows: 'If, at the time of, or subsequent to, such appointment, the armed force in which such person is commissioned does not require his service on active duty in fulfillment of the obligation undertaken by him in compliance with clause (B) of the first sentence of this paragraph, such person shall be ordered to active duty for training with such armed force in the grade in which he was commissioned for a period of active duty for training of not less than three months or more than six months (not including duty performed under section 270(a) of title 10, United States Code), as determined by the Secretary of the military department concerned to be necessary to qualify such person for a mobilization assignment. Upon being commissioned and assigned to a reserve component, such person shall be required to serve therein, or in a reserve component of any other armed force in which he is later appointed, until the eighth anniversary of the receipt of such commission pursuant to the provisions of this section'.

"SEC. 2. Section 270 of title 10, United States Code, is amended by adding the following new subsection at the end thereof:

"'(c) Any person who becomes a member of the Army National Guard of the United States or the Air National Guard of the United States after the enactment of this subsection and who fails in any year to perform satisfactorily the training duty prescribed by or under law for members of the Army National Guard or the Air National Guard, as the case may be, as determined by the Secretary concerned, may, upon the request of the Governor of the State or territory, Puerto Rico, or the Canal Zone, or the commanding general of the District of Columbia National Guard, whichever is concerned, be ordered, without his consent, to perform additional active duty for training for not more than forty-five days. A member ordered to active duty under this subsection shall be ordered to duty as a Reserve of the Army or as a Reserve of the Air Force, as the case may be.'

"SEC. 3. Section 3261 of title 10, United States Code, is amended—

"(1) by striking out the designation '(b)' in subsection (a) and inserting the designation '(c)' in place thereof; and

"(2) by redesignating subsection (b) as subsection '(c)' and inserting the following new subsection (b):

"'(b) Under regulations to be prescribed by the Secretary of the Army, a person who enlists or reenlists in the Army National Guard, or whose term of enlistment or reenlistment in the Army National Guard is extended, shall be concurrently enlisted or reenlisted, or his term of enlistment or reenlistment shall be concurrently extended, as the case may be, as a Reserve of the Army for service in the Army National Guard of the United States.'

"SEC. 4. Section 8261 of title 10, United States Code, is amended—

"(1) by striking out the designation '(b)' in subsection (a) and inserting the designation '(c)' in place thereof; and

"(2) by redesignating subsection (b) as subsection '(c)' and inserting the following new subsection (b):

"'(b) Under regulations to be prescribed by the Secretary of the Air Force, a person who enlists or reenlists in the Air National Guard, or whose term of enlistment or reenlistment in the Air National Guard is extended, shall be concurrently enlisted or reenlisted, or his term of enlistment or reenlistment shall be concurrently extended, as the case may be, as a Reserve of the Air Force for service in the Air National Guard of the United States.'

"SEC. 5. Title 32, United States Code, is amended as follows:

"(1) Section 302 is amended to read as follows:

"'§ 302. Enlistments, reenlistments, and extensions

"'(a) Under regulations to be prescribed by the Secretary concerned, original enlistments in the National Guard may be accepted for—

"'(1) any specified term, not less than three years, for persons who have not served in an armed force; or

"'(2) any specified term, not less than one year, for persons who have served in any armed force.

"'(b) Under regulations to be prescribed by the Secretary concerned, reenlistment in the National Guard may be accepted for any specified period, or, if the person last served in one of the highest five enlisted grades, for an unspecified period.

"'(c) Enlistments or reenlistments in the National Guard may be extended—

"'(1) under regulations to be prescribed by the Secretary concerned, at the request of the member, for any period not less than six months; or

"'(2) by proclamation of the President, if Congress declares an emergency, until six months after termination of that emergency.'

"(2) The analysis of chapter 3 is amended by striking out the following item:

"'302. Enlistments.'

and inserting the following item in place thereof:

"'302. Enlistments, reenlistments, and extensions.'

"SEC. 6. The amendments made by sections 3, 4, and 5 of this Act shall not affect any enlistment, reenlistment, or appointment entered into or made before the effective date of this Act.

"SEC. 7. (a) Section 29(a) of the Act of August 10, 1956, as amended (5 U.S.C. 30r), is amended by striking out the words 'fiscal year' wherever they appear therein and substituting the words 'calendar year' in lieu thereof.

"(b) Except with respect to substitute postal employees, the amendments made by subsection (a) of this section shall become effective as of January 1, 1961, and with respect to substitute postal employees such amendments shall become effective as of January 1, 1962."

The motion was agreed to.

A motion to reconsider was laid on the table.

CHILDREN HANDICAPPED BY DEAFNESS

Mrs. GREEN of Oregon. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 336) to make available to children who are handicapped by deafness the specially trained teachers of the deaf needed to develop their abilities and to make available to individuals suffering speech and hearing impairments the specially trained speech pathologists and audiologists needed to help them overcome their handicaps.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Oregon?

There was no objection.

The Clerk read the Senate bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—TRAINING OF TEACHERS OF THE DEAF

SEC. 101. In order to encourage and facilitate the training of teachers of the deaf, the Commissioner of Education (hereinafter in this title referred to as the "Commissioner") shall, with the advice and assistance of the Advisory Committee on the Training of Teachers of the Deaf (established by section 105 and hereinafter in this title referred to as the "Advisory Committee"), establish and conduct a program of grants-in-aid to accredited public and nonprofit institutions of higher education which are approved training centers for teachers of the deaf or are affiliated with approved public or other nonprofit institutions which are approved for the training of teachers of the deaf to assist such institutions in providing courses of training and study for teachers of the deaf and in improving such courses. Such grants-in-aid shall be used by such institutions to assist in covering the cost of such courses of training and study and for establishing and maintaining scholarships for qualified persons who desire to enroll in such courses of training and study, the stipends of any such scholarships to be determined by the Commissioner. The Commissioner shall submit all applications for grants-in-aid under this title to the Advisory Committee for its review and recommendations, and the Commissioner shall not approve any such application before he has received and studied the recommendations of the Advisory Committee with respect to such application, unless the Advisory Committee shall have failed to submit its recommendations to him after having had adequate time to do so.

SEC. 102. Payments of grants-in-aid pursuant to this title shall be made by the Commissioner from time to time and on such conditions as he may determine, including the making of such reports as the Commissioner may determine to be necessary to carry out the provisions of this title. Such payments may be made either in advance or by way of reimbursement.

SEC. 103. For the purposes of this title:

(a) The term "nonprofit", as applied to an institution, means an institution owned and operated by one or more corporations or associations no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual;

(b) The term "accredited", as applied to an institution of higher education, means an institution of higher education accredited by a nationally recognized body or bodies approved for such purpose by the Commissioner; and

(c) The term "approved", as applied to training centers for teachers of the deaf, means centers approved by a nationally recognized body or bodies approved for the purpose by the Commissioner, except that a training center for teachers of the deaf which is not, at the time of its application for a grant under this title, approved by such a recognized body or bodies may be deemed approved for purposes of this title if the Commissioner finds, after consultation with the appropriate approved body or bodies, that there is reasonable assurance that the center will, with the aid of such grant, meet the approval standards of such body or bodies.

SEC. 104. The Commissioner is authorized to delegate any of its functions under this title, except the making of regulations, to any officer or employee of the Office of Education.

SEC. 105. (a) There is hereby established in the Office of Education an Advisory Committee on the Training of Teachers of the Deaf. The Advisory Committee shall consist of the Commissioner, who shall be Chairman, and twelve persons appointed, without regard to the civil service laws, by the Commissioner with the approval of the Secretary of Health, Education, and Welfare. The twelve appointed members shall be selected so as to secure on the Committee a balanced representation from among individuals identified with institutions approved for the training of teachers of the deaf, individuals identified with institutions of higher education which are affiliated with institutions approved for the training of teachers of the deaf, individuals who have responsibilities in the teaching of the deaf, and individuals identified with the general public who have demonstrated an interest in the education of the deaf.

(b) The appointed members of the Advisory Committee shall hold office for a term of four years, except that (1) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term, and (2) the terms of the members first taking office after the date of enactment of this title shall expire, as designated by the Commissioner at the time of appointment, three at the end of four years after such date, three at the end of three years after such date, three at the end of two years after such date, and three at the end of one year after such date. None of the appointed members shall be eligible for reappointment until a year has elapsed since the end of his preceding term.

(c) The Advisory Committee shall periodically review the operations of the grants-in-aid program established pursuant to this title with a view to determining the extent to which such program is succeeding in carrying out the purposes for which it was established. On the basis of such reviews the Advisory Committee shall submit to the Commissioner such recommendations with respect to the operation and administration of the program as it may deem advisable, together with any recommendations for legislation which it may deem necessary or desirable to carry out the purposes for which this title was enacted. Such recommendations, together with the Commissioner's comments thereon, shall be referred to the Secretary of Health, Education, and Welfare for transmittal by him to the Congress.

(d) The Advisory Committee is authorized to review all applications for grants-in-aid under this title and recommend to the Commissioner the approval of such applications as, in the opinion of the Advisory Committee, contribute to the carrying out of the purposes of this title, and the disapproval of such applications as, in the opinion of the Advisory Committee, do not contribute to the carrying out of such purposes.

(e) The Commissioner may utilize the services of any member or members of the Advisory Committee in connection with matters relating to the provisions of this title, for such periods, in addition to conference periods, as he may determine.

(f) Members of the Advisory Committee shall, while serving on business of the Advisory Committee or at the request of the Commissioner under subsection (e) of this section, receive compensation at rates fixed by the Secretary of Health, Education, and Welfare, not to exceed $50 per day, and shall also be entitled to receive an allowance for actual and necessary travel and subsistence expenses while so serving away from their places of residence, except that any member may waive his right to receive such compensation or allowance, or both.

SEC. 106. (a) For the purpose of carrying out the provisions of this title there are authorized to be appropriated such amounts as may be necessary for the fiscal year beginning July 1, 1961, and for the nine succeeding fiscal years, but aggregate payments, from sums so appropriated, with respect to costs incurred during the fiscal year beginning July 1, 1961, or the next fiscal year by recipients of grants-in-aid under this title may not exceed $1,500,000. Any grant for training or scholarships made from an appropriation under this title for any fiscal year may include such amounts for providing such training or scholarships during succeeding years as the Commissioner may determine.

(b) The provisions of this title shall terminate on June 30, 1971.

TITLE II—TRAINING OF SPEECH PATHOLOGISTS AND AUDIOLOGISTS

SEC. 201. In order to encourage and facilitate the training of speech pathologists and audiologists, the Director of the Office of Vocational Rehabilitation (hereinafter in this title referred to as the "Director") shall, with the advice and assistance of the Advisory Committee on Speech Pathology and Audiology Training (established by section 205 and hereinafter in this title referred to as the "Advisory Committee"), establish and conduct a program of grants-in-aid to accredited public and nonprofit institutions of higher education which are engaged in the training of speech pathologists and audiologists to assist such institutions in providing such training and in improving courses for such training. Such grants-in-aid shall be made only to institutions of higher education which offer programs of such nature and content as to enable students who have successfully completed such programs to qualify for an advanced certificate in speech pathology or audiology from a nationally recognized body or bodies approved for the purpose by the Director. Such grants-in-aid shall be used by such institutions to assist in covering the cost of courses of graduate training and study leading to the master's or doctor's degree and for establishing and maintaining graduate fellowships with such stipends as may be determined by the Director. The Director shall submit all applications for grants-in-aid under this title to the Advisory Committee for its review and recommendations, and the Director shall not approve any such application before he has received and studied the recommendations of the Advisory Committee with respect to such application, unless the Advisory Committee shall have failed to submit its recommendations to him after having had adequate time to do so.

SEC. 202. Payments of grants-in-aid pursuant to this title may be made by the Director from time to time, in advance or by way of reimbursement, on such conditions as the Director may determine, including the making of such reports as the Director may determine to be necessary to carry out the provisions of this title.

SEC. 203. For the purposes of this title:

(a) The term "nonprofit", as applied to an institution of higher education, means an institution owned and operated by one or more corporations or associations no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual.

(b) The term "accredited", as applied to an institution of higher education, means an institution of higher education accredited by a nationally recognized body or bodies approved for the purpose by the Director.

SEC. 204. The Director is authorized to delegate any of his functions under this title except the making of regulations, to any officer or employee of the Office of Vocational Rehabilitation.

SEC. 205 (a) There is hereby established in the Office of Vocational Rehabilitation an Advisory Committee on Speech Pathology and Audiology Training. The Advisory Committee shall consist of the Director who shall be Chairman and twelve persons, appointed

without regard to the civil service laws, by the Director with the approval of the Secretary of Health, Education, and Welfare. The twelve appointed members shall be selected so as to secure on the Advisory Committee a balanced representation from among individuals who devote a major part of their efforts to departments of speech pathology and audiology in institutions of higher education and who reflect varied specialties represented in such departments, individuals from the ranks of professional people actively engaged in the diagnosis, training, or rehabilitation of individuals suffering serious speech or hearing impairments, and individuals from the general public who have demonstrated an interest in the problem of speech and hearing disabilities.

(b) The appointed members of the Advisory Committee shall hold office for a term of four years, except that (1) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term, and (2) the terms of the members first taking office after the date of enactment of this title shall expire, as designated by the Director at the time of appointment, three at the end of four years after such date, three at the of three years after such date, three at the end of two years after such date, and three at the end of one year after such date. None of the appointed members shall be eligible for reappointment until a year has elapsed since the end of his preceding term.

(c) The Advisory Committee shall periodically review the operations of the grants-in-aid program established pursuant to this title with a view to determining the extent to which such program is succeeding in carrying out the purposes for which it was established. On the basis of such reviews the Advisory Committee shall submit to the Director such recommendations with respect to the operation and administration of the program as it may deem advisable, together with any recommendations for legislation which it may deem necessary or desirable to carry out the purposes for which this title was enacted. Such recommendations, together with the Director's comments thereon, shall be referred to the Secretary of Health, Education, and Welfare for transmittal by him to the Congress.

(d) The Advisory Committee is authorized to review all applications for grants-in-aid under this title and recommend to the Director the approval of such applications as, in the opinion of the Advisory Committee, contribute to the carrying out of the purposes of this title, and the disapproval of such applications as, in the opinion of the Advisory Committee, do not contribute to the carrying out of such purposes.

(e) The Director may utilize the services of any member or members of the Advisory Committee in connection with matters relating to the provisions of this title, for such periods, in addition to conference periods, as he may determine.

(f) Members of the Advisory Committee shall, while serving on business of the Advisory Committee or at the request of the Director under subsection (e) of this section, receive compensation at rates fixed by the Secretary of Health, Education, and Welfare, not to exceed $50 per day, and shall also be entitled to receive an allowance for actual and necessary travel and subsistence expenses while so serving away from their places of residence, except that any member may waive his right to receive such compensation or allowance, or both.

SEC. 206. (a) For the purpose of carrying out the provisions of this title, there are authorized to be appropriated such amounts as may be necessary for the fiscal year beginning July 1, 1961, and for the nine succeeding fiscal years, but aggregate payments, from sums so appropriated, with respect to costs incurred during the fiscal year beginning July 1, 1961, or the next fiscal year by recipients of grants-in-aid under this title may not exceed $2,000,000. Any grant for training or fellowships made from an appropriation under this title for any fiscal year may include such amounts for providing such training or fellowships during succeeding years as the Commissioner may determine.

(b) The provisions of this title shall terminate on June 30, 1971.

Mrs. GREEN of Oregon. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. GREEN of Oregon: Strike out all after the enacting clause of the Senate bill, S. 336, and insert the provisions of the bill, H.R. 9011, as follows: "That, in order to encourage and facilitate the training of more teachers of the deaf, the Commissioner of Education (hereinafter in this Act referred to as the 'Commissioner') shall, with the advice and assistance of the Advisory Committee on the Training of Teachers of the Deaf (established by section 5 and hereinafter in this Act referred to as the 'Advisory Committee'), establish and conduct a program of grants-in-aid to accredited public and nonprofit institutions of higher education which are approved training centers for teachers of the deaf or are affiliated with approved public or other nonprofit institutions which are approved for the training of teachers of the deaf to assist such institutions in providing courses of training and study for teachers of the deaf and in improving such courses. Such grants-in-aid shall be used by such institutions to assist in covering the cost of such courses of training and study and for establishing and maintaining scholarships for qualified persons who desire to enroll in such courses of training and study, the stipends of any such scholarships to be determined by the Commissioner. The Commissioner shall submit all applications for grants-in-aid under this Act to the Advisory Committee for its review and recommendations, and the Commissioner shall not approve any such application before he has received and studied the recommendations of the Advisory Committee with respect to such application, unless the Advisory Committee shall have failed to submit its recommendations to him after having had adequate time to do so.

"SEC. 2. Payments of grants-in-aid pursuant to this Act shall be made by the Commissioner from time to time and on such conditions as he may determine, including the making of such reports as the Commissioner may determine to be necessary to carry out the provisions of this Act. Such payments may be made either in advance or by way of reimbursement.

"SEC. 3. For the purposes of this Act—

"(a) The term 'nonprofit', as applied to an institution, means an institution owned and operated by one or more corporations or associations no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual;

"(b) The term 'accredited', as applied to an institution of higher education, means an institution of higher education accredited by a nationally recognized body or bodies approved for such purpose by the Commissioner; and

"(c) The term 'approved', as applied to training centers for teachers of the deaf, means centers approved by a nationally recognized body or bodies approved for the purpose by the Commissioner, except that a training center for teachers of the deaf which is not, at the time of its application for a grant under this Act, approved by such a recognized body or bodies may be deemed approved for purposes of this Act if the Commissioner finds, after consultation with the appropriate approved body or bodies, that there is reasonable assurance that the center will, with the aid of such grant, meet the approval standards of such body or bodies.

"SEC. 4. The Commissioner is authorized to delegate any of his functions under this Act, except the making of regulations, to any officer or employee of the Office of Education.

"SEC. 5. (a) There is hereby established in the Office of Education an Advisory Committee on the Training of Teachers of the Deaf. The Advisory Committee shall consist of the Commissioner, who shall be Chairman, and twelve persons appointed, without regard to the civil service laws, by the Commissioner with the approval of the Secretary of Health, Education, and Welfare. The twelve appointed members shall be selected so as to secure on the Committee a balanced representation from among individuals identified with institutions approved for the training of teachers of the deaf, individuals identified with institutions of higher education which are affiliated with institutions approved for the training of teachers of the deaf, individuals who have responsibilities in the teaching of the deaf, and individuals identified with the general public who have demonstrated an interest in the education of the deaf.

"(b) The Advisory Committee shall periodically review the operations of the grants-in-aid program established pursuant to this Act with a view to determining the extent to which such program is succeeding in carrying out the purposes for which it was established. On the basis of such reviews the Advisory Committee shall submit to the Commissioner such recommendations with respect to the operation and administration of the program as it may deem advisable, together with any recommendations for legislation which it may deem necessary or desirable to carry out the purposes for which this Act was enacted. Such recommendations, together with the Commissioner's comments thereon, shall be referred to the Secretary of Health, Education, and Welfare for transmittal by him to the Congress.

"(c) The Advisory Committee is authorized to review all applications for grants-in-aid under this Act and recommend to the Commissioner the approval of such applications as, in the opinion of the Advisory Committee, contribute to the carrying out of the purposes of this Act, and the disapproval of such applications as, in the opinion of the Advisory Committee, do not contribute to the carrying out of such purposes.

"(d) The Commissioner may utilize the services of any member or members of the Advisory Committee in connection with matters relating to the provisions of this Act, for such periods, in addition to conference periods, as he may determine.

"(e) Members of the Advisory Committee shall, while serving on business of the Advisory Committee or at the request of the Commissioner under subsection (d) of this section, receive compensation at rates fixed by the Secretary of Health, Education, and Welfare, not to exceed $75 per day, and shall also be entitled to receive an allowance for actual and necessary travel and subsistence expenses while so serving away from their places of residence, except that any member may waive his right to receive such compensation or allowance, or both. The provisions of section 1003 of the National Defense Education Act of 1958 shall apply to members of the Advisory Committee.

"SEC. 6. (a) For the purpose of carrying out the provisions of this Act there are authorized to be appropriated $1,500,000 for the fiscal year ending June 30, 1962, and $1,500,000 for the fiscal year ending June 30, 1963. Any grant for training or scholarships made from an appropriation under this Act for any

fiscal year may include such amounts for providing such training or scholarships during succeeding years as the Commissioner may determine.

"(b) The provisions of this Act shall terminate on June 30, 1963."

The amendment was agreed to.

Mr. SMITH of Mississippi. Mr. Speaker, I am pleased to join in support of this legislation to provide for special training for teachers of the deaf. This is the type of program that can be adequately handled only by the Federal Government. There is, at present, a serious shortage of trained teachers in this field and this program will be of great benefit to all of the States attempting to meet the present shortage, both in their public institutions and private schools. I appreciate the efforts of the gentlewoman from Oregon in calling this bill up for action at this time.

Mr. FOGARTY. Mr. Speaker, the need for competent, trained teachers of the deaf is extremely critical throughout the country. This urgent need must be met now. Each year of delay exacts an irremediable toll. Schools for the deaf have long waiting lists of applicants who cannot be admitted because of the growing shortage of teachers and facilities. Failure to meet the basic educational needs of the deaf child infinitely compounds the handicap of deafness and creates bewilderingly complex problems to be faced by the deaf person, his family, and all the agencies, public and private, which seek to meet his needs. It is only through the special skills of those trained to teach the deaf that the deaf child can be brought into realistic contact with his world. Without this education, suited to his needs, the stream of our society and its culture flows past him in ambiguous and confusing undulations. For no other group in our population is the price of educational neglect so high, nor its resultant harm so irreparable.

The art of conveying to the deaf child meaning, that is, comprehension and understanding of ideas inherent in language, is an extremely specialized one. This meaning, which comes to the hearing—and the hard of hearing—child through his ears, is available to the deaf child only through his eyes. Herein lies the difference between the art of the teacher of the deaf and the other teachers in the educational milieu. Training in the special skills of this art is essential if we are to give to each deaf child a firm educational foundation. For the deaf child, the task of learning language—this comprehension of the world about him in terms meaningful and accurate to him and to the persons to whom he wishes to convey his thoughts—is a slow and complex one. He has a right to the teaching of one especially qualified to convey this meaning to him. To the extent that he is denied that right, this Nation is failing in its duty to him, and is robbing itself of the benefit of his contribution to our society in his adulthood.

One of the most difficult problems facing adjustment counselors and placement workers today is the so-called "marginal" deaf person who has reached employable age without benefit of proper education or of any education at all. The problem is frequently compounded because, faced with having to turn numbers of applicants away, the schools are forced into a selection process which frequently "selects out" the more difficult case—the problem child. Of equal significance is the constellation of extremely complex problems posed by many deaf persons who have had school experience from untrained teachers.

Public and private programs are then confronted with the deaf client whose problems are complex and difficult of solution, who may lack not only the rudiments of education, but the positive patterns of social relations and work habits and attitudes which accompany the usual educational process and which must be established in the adult client if he is to succeed with any realistic vocational objective. Needless to say, these problems of personal, social, and vocational adjustment are more difficult to meet in a deaf person who has not had an opportunity to develop an understanding of the world around him, or to acquire the communication skills needed to articulate his thoughts, feelings, and needs to professional persons who would serve him.

One of the first things adjustment workers have had to do for many deaf clients is develop a sense of time—how to tell time, how to make or keep an appointment on time; how to know what time to catch a bus, how to count—how to count money—all of these little things which we take so for granted, and which would have come to him through the schools if he had been given the opportunity of a proper education.

We cannot say that responsibility in this crucial area lies solely with the States or the communities concerned. President Kennedy, in his educational message stressed that the human mind is our fundamental resource. To us this means the mind of the deaf child as well as the hearing. The Federal Government has a responsibility to see that every effort is made to assure that the deaf children of this Nation have available to them the teaching skills of those especially qualified to meet their educational needs. Nor can we assert that the needs to which the bill is addressed do not have sufficient priority to warrant enactment at this time. We must recognize the priority of prevention. We must calculate the price of failure.

On August 31, 1961, I introduced H.R. 9011 to assist in making available to children who are handicapped by deafness the specially prepared teachers of the deaf needed to develop their abilities. In the Nation there are about 35,000 school-age children suffering from deafness. About 27,000 of these children are reported to be enrolled in residential schools for the deaf or in special public day school facilities for the education of the deaf. Many children now enrolled in these special classes are being taught by teachers not fully prepared to instruct the deaf. There are about 8,000 children who are not receiving any specialized help from the schools.

Education of deaf children and youth is a difficult process. One of the avenues of learning—the sense of hearing—is closed to such children. The normal child acquires language in a casual, imitative way, but the deaf child must be taught to communicate before he can begin his schooling or participate in normal social experiences.

The teacher of the deaf has a dual responsibility. He is the one to help the child acquire and maintain a means of communication; at the same time, he is the one to provide the usual elementary and secondary curriculum offering, so that the child will master the basic skills for learning—reading, writing, and arithmetic—and also secure a concept of man's cultural heritage. In order to be effective in this dual role, the teacher must be equipped with technical knowledge about deafness and at the same time qualify as a capable educator.

Several nationwide studies have been made on the preparation of teachers of exceptional children. As far back as 1954, the Office of Education reported that teachers of the deaf were more difficult to secure than teachers in any other single area of exceptionality. While the number of teachers needed was not greater than in most of the other areas, the difficulty in securing them seemed to be more pronounced.

A recent study on the need for teachers of the deaf has been reported in "Information for Prospective Teachers of the Deaf for Schools for the Deaf, Classes for the Deaf, Speech and Hearing Clinics, Rehabilitation Facilities for the Deaf in the United States and Canada," a brochure published by the American Instructors of the Deaf and the Conference of Executives of American Schools for the Deaf. This study reports the acute need for teachers to work in residential schools as well as in special schools and classes for the deaf. The study indicates that about 500 additional teachers of the deaf would be needed each year in order to staff the schools and classes of the Nation.

On the basis of these studies, it appears that about 25 institutions of higher education are now offering professional preparation for educators in the field of the deaf and that many of these, with strengthening and improving, could accept more students. It appears that the best immediate contribution that the Federal Government could make to this problem would be to provide resources for scholarships to graduate and undergraduate students.

The need for such personnel was vividly presented by witnesses who testified in the nine regional hearings on special education and rehabilitation held by the Subcommittee on Special Education of the House Committee on Education and Labor of the 86th Congress. Glaring gaps in our educational provisions for exceptional children and youth were pointed out in each of these hearings. The main deterrent to progress in developing the needed provisions was identified as the lack of qualified teachers of the various types of exceptional children to staff the Nation's schools.

The urgent need for teachers of the deaf was again emphasized at the hearings held by the Subcommittee on Special Education in Washington on August 22 and 23, 1961, on bills under consideration—H.R. 3523, H.R. 5743, and H.R. 7175.

Unless the schools help these children so they can take advantage of educational opportunity, they will not have a chance to become contributing, well-adjusted members of society. If, on the other hand, they are given suitable education, most of them will become useful, productive citizens.

I would like, therefore, to urge the passage of H.R. 9011 so we may speedily provide and improve instruction in this critical area. As means of communication unfold to the deaf child and enable him to acquire a suitable education, it can be presumed that he will engage in normal life activities. Not only will he benefit as an individual, but so will his family and the community.

In introducing this specialized piece of legislation, I am aware also of the several million children who have handicapping conditions other than deafness and do not have access to the type of school program they need. It is my hope that the Special Subcommittee on Education will present at the next session of Congress broadened legislation which will enable the Federal Government to make a contribution not only to mentally retarded and to deaf children, but also to all others in need of special educational opportunities.

The experience of the Office of Education in the administration of Public Law 85–926, professional preparation for teaching mentally retarded children, has fully demonstrated the benefits that can be expected under the program proposed for the teaching of deaf children. The grants made by the Office of Education thus far have enabled 25 of our leading universities to strengthen the preparation of teachers in this field and 180 Fellows have been supported. Several of these persons have already assumed positions in colleges and universities preparing teachers of the mentally retarded. Others have taken positions as directors or supervisors of programs of the mentally retarded in State and local school systems. Testimony recently presented by the State directors and by the national professional organizations representing special education enthusiastically supports the value of the training that is authorized by Public Law 85–926.

Because of the limited funds now available under the program the Office of Education has had to give its priority to the training of college level instructors who will prepare classroom teachers and leaders of the programs in State and local schools. The program should now be expanded to permit additional grants so that classroom teachers can also be trained under the program.

The favorable experiences we have had with the program in the field of mentally retarded gives us confidence that comparable success can be achieved in the preparation of teachers of deaf children. It is assumed that in the first year of the program approximately 350 scholarship grants could be awarded to persons to be trained in about 25 institutions. This would have the twofold effect of both strengthening institutions who are now preparing classroom teachers and at the same time preparing more students for the actual teaching of deaf children. It is estimated that between 600 and 700 teachers of deaf children can be made available in our schools with the enactment of this legislation. It is nothing short of disgraceful that deaf children now capable of benefiting by education are now denied this opportunity in some localities because of an inadequate supply of qualified teachers.

I urge my colleagues in the House to give their wholehearted support to this legislation and to permit the Federal Government to provide the leadership in this field that has proven so valuable in the preparation of teachers of the mentally retarded.

Mr. RIVERS of Alaska. Mr. Speaker, I wish to take this opportunity to urge the passage of H.R. 9011, which would establish in the Office of Education an Advisory Committee on the Training of Teachers of the Deaf, and authorize $1,500,000 for fiscal year 1962 and fiscal 1963 for grants-in-aid to public and nonprofit institutions to help make available to individuals suffering hearing impairments the service of teachers and other specialists in the field of audiology needed to help them overcome their handicaps. Although there is nationwide need for a hearing specialist program, I shall limit my comments to the need for such a program in the State of Alaska.

I recently read an excellent article in the New York Times on the problems of the deaf by Dr. Howard A. Rusk, the medical columnist for the Times. In that article Dr. Rusk pointed out that there are over 6 million persons in the United States with impaired hearing, but that only 109,000, or 2 percent of the total, are deaf. The percentage of the native population afflicted with serious hearing maladies in Alaska is much higher than the national average. In the course of my correspondence with Dr. David L. Sparling, pediatric consultant for the Alaska Native Health Service at Mount Edgecumbe, Alaska, and physicians at the boarding schools operated by the Bureau of Indian Affairs, I have been informed that chronic ear infections are found in as many as 30 percent of the children admitted to the Mount Edgecumbe Hospital. I might add that the children so admitted are from all over Alaska.

During 1960, chronic ear infections were found in 10 percent of the students from remote villages enrolled at Wrangell Institute Elementary Boarding School, and more than 5 percent of the students enrolled at Mount Edgecumbe Secondary Boarding School were so afflicted. Likewise, chronic ear infections have been found among 30 percent of the pupils selected at random in certain native villages scattered throughout Alaska.

What makes these statistics the more striking is that they pertain only to children. According to Dr. Rusk the rate of impaired hearing per 1,000 persons under age 25 in the United States is 7.9 percent with the rate increasing in the higher age brackets. Among the native children of Alaska the percentage of children with impaired hearing is more than twice that high.

All specialists in the field of audiology are agreed that the most important aspect of hearing conservation is early detection of hearing loss. Early treatment of chronic ear infection may produce acceptable hearing. Unfortunately, at the present time, auricular training, for most of Alaska's deaf children must, in the majority of cases be given by untrained volunteers under the occasional supervision of a qualified teacher of the deaf.

In a letter to me of August 11, 1961, Mrs. Henrietta C. Krantz, a speech and hearing specialist employed by the Alaska Department of Health and Welfare, wrote as follows:

> So far as I know the State director of the Alaska Crippled Children's Association is still trying to recruit a teacher of the deaf to take the class that we had hoped to organize in Ketchikan this September. The Office of Vocational Rehabilitation is constantly seeking assistance for individuals, who, because of our inability to supply this type of training have become adults unable to make satisfactory social or economic adjustments.

Alaska is not the only State where there are not enough trained personnel to carry on an effective program of assistance to those suffering hearing impairments. The problem is national in scope. The answer is to establish a program implemented with funds with which to encourage and promote the graduate training of professional audiologists who could treat individuals suffering hearing impairments. For this reason I want to sincerely express to my colleagues the need for enactment of this legislation.

Mrs. GREEN of Oregon. Mr. Speaker, the purpose of the bill, H.R. 9011, is to alleviate a serious shortage of trained teachers of deaf children.

The Special Subcommittee on Education, in hearings across the Nation last year under the chairmanship of the gentleman from Alabama [Mr. ELLIOTT], heard testimony that this shortage has existed for some time. In further hearings this year, the subcommittee received testimony that the shortage is becoming increasingly acute.

Mr. Speaker, dozens and dozens of letters to the subcommittee from principals of schools for deaf children, from administrators of special classes for these handicapped youngsters in the public schools, from State agencies and from parents of deaf children all attest to a need for more trained teachers to give these youngsters a meaningful and adequate education.

There are approximately 400 schools and special classes for deaf children in our country. They are starting the school year this fall with about 500 fewer trained teachers than they need.

While this shortage may seem small, we must consider the handicap to these handicapped children if that gap is not filled. Deaf children must be taught to speak, as well as taught reading, arithmetic, history, and all the other subjects

in a school curriculum. Clearly, their teachers require special training to bridge this barrier to the deaf child's ability to communicate.

Mr. Speaker, our higher education institutions simply are not producing enough trained teachers of the deaf to meet the growing and urgent need for them. Fewer than 200 teachers are graduated each year, yet the schools and classes for deaf children annually report a need for upward of 500 additional teachers.

The bill, H.R. 9011, would establish a 2-year program to assist in training more teachers of the deaf. The bill authorizes appropriations of $1.5 million annually to higher education institutions which are approved as training centers for teachers of the deaf. The bill provides for grants-in-aid to assist in providing and improving courses of training and study and to establish scholarships for qualified persons who wish to enroll in these training courses.

H.R. 9011 also provides for an advisory committee, composed of persons with special knowledge and interest in training teachers of the deaf and in teaching deaf children, to review the program and applications for grants-in-aid.

Mr. Speaker, the other body already has passed legislation on this subject. I hope that a law may be enacted this year so that the higher education institutions may go forward with the task of attracting and training the teachers which deaf children so desperately need.

As the principal of a school for the deaf told our subcommittee:

These children we are talking about are wonderful youngsters. They have the ability and the will to learn, but they are at the mercy of the caliber of teacher provided for them. Until medical science develops a cure, their avenue to independence and self-sufficiency lies in special education.

Mr. Speaker, Oregon is no different from other States in its need for more teachers for deaf children. I am including at this point some of the letters I have received from persons who work with deaf children in my State, telling of this need:

COUNCIL FOR EXCEPTIONAL CHILDREN,
Salem, Oreg.

Hon. EDITH GREEN,
Chairman, House Select Subcommittee on Education, House of Representatives, Washington, D.C.

MY DEAR MRS. GREEN: As one who has been engaged in the education of deaf children for more than 20 years I am well aware of the problems which exist in this area of education and especially in the difficulties which arise from the shortage of trained teachers of the deaf. Also as president of Willamette Chapter No. 131 of the Council for Exceptional Children, I urge that you give favorable consideration to Senate bill 336 which would provide scholarships and aid in training teachers of the deaf.

Respectfully yours,
INA SMITH,
President, Willamette Chapter No. 131.

THE TUCKER-MAXON ORAL SCHOOL,
Portland, Oreg., April 6, 1961.

Congresswoman EDITH GREEN,
House of Representatives, U.S. Capitol, Washington, D.C.

DEAR MRS. GREEN: There is a frightening shortage of teachers who have necessary training to teach deaf children. Such training requires additional preparation and too few people can afford the expense of such preparation.

For these reasons I am one of many who very much want to see H.R. 4616, introduced by Congressman MONTOYA and H.R. 5360 introduced by Congressman BOLAND, passed. These are identical bills and are the same as S. 336 which has already been passed in the Senate.

I beg of you—please help put this over.

Respectfully and sincerely,
HATTIE HARRELL.

PORTLAND, OREG., *May 30, 1961.*

Hon. EDITH GREEN: I wish you to vote for H.R. 4616, as is, providing grants-in-aid for training teachers of the deaf children. There are very few willing to take the training to teach the deaf children. If aid were offered college students they would be enticed into a field that is very gratifying.

Portland, Oreg., in the past 11 years has found it very difficult to hire trained teachers of the deaf. So have had to hire elementary trained teachers. Sure they can teach subject matter but not speech and lipreading and auditory drill. The deaf child's education has been "slowed." I feel the bill would help speed up matters to help deaf children.

Thanks.

RUTH JENSEN.

P.S.—The lack of trained teachers has been a problem since I began to teach in 1938.

THE TUCKER-MAXON ORAL SCHOOL,
Portland, Oreg., April 10, 1961.

Representative EDITH GREEN,
Select Subcommittee on Education, House of Representatives, Washington, D.C.

DEAR REPRESENTATIVE GREEN: On behalf of the parent-teachers forum of the Tucker-Maxon Oral School in Portland, Oreg., may I urge you, as chairman of the Select Subcommittee on Education, to support H.R. 4616 on the training of teachers of the deaf, speech pathologists and audiologists, now under consideration by your committee.

As parents of deaf children, we are acutely aware of the extreme shortage of well-qualified teachers of the deaf and hard of hearing throughout the country. Children with impaired hearing, with the proper oral education and training to help develop their inherent potential, can and have become assets to their communities and the Nation, rather than liabilities.

It is indeed heartwarming to learn that such legislation is under consideration before Congress. Again, may I urge you to vote "yes" on this bill, and to encourage your fellow Congressmen to follow suit.

Sincerely yours,
Mrs. MARVIN C. GOLDMAN,
Secretary.

Hon. EDITH GREEN,
House of Representatives, Washington, D.C.

DEAR MRS. GREEN: In the interest of better education for our deaf children will you please lend your support to the passage of S. 336, as this bill will do much to alleviate the critical shortage of teachers of the deaf.

I have worked around deaf children for several years and know of the urgent need of additional teachers.

Thank you.

Yours truly,
Mrs. C. D. BUSHMAN.

PORTLAND, OREG., *August 1, 1961.*

Hon. EDITH GREEN,
House of Representatives, Congress of the United States, Washington, D.C.

DEAR MRS. GREEN: Bill S. 336 is in your subcommittee on special education at the present time, with hearings to be scheduled very soon.

I need not tell you that this bill has to do with obtaining the right caliber teachers for deaf children. What you may not be aware of is that each year the shortage of qualified teachers of the deaf becomes more acute. This year the shortage is 20 percent greater than last year, when this same bill was lost in the House of Representatives. There are 30,000 deaf children in schools and classes in this country, and there would be more if qualified teachers were available.

This need is desperate. Won't you please vote "yes" on bill S. 336?

Trusting that we shall hear from you, I remain,

Very truly yours,
ARNOLD H. BAUDER,
President, Parent-Teacher Forum of the Tucker-Maxon Oral School.

Mr. BOLAND. Mr. Speaker, I rise in support of H.R. 9011, a bill to make available to children who are handicapped by deafness the specially trained teachers of the deaf needed to develop their abilities. This legislation is practically similar to my bill, H.R. 5360, which the Special Subcommittee on Education, under the chairmanship of Congresswoman Edith Green, considered when holding hearings recently.

The purpose of H.R. 9011 and my bill, H.R. 5360, is to assist in providing more trained teachers of deaf children by authorizing a 2-year program of grants-in-aid for this purpose. The grants would be used for assisting in covering the costs of providing and improving courses of training and study, and providing scholarships for students who desire to enroll in such courses.

Mr. Speaker, there has been a nationwide shortage of trained classroom teachers of deaf children over the past several years. This shortage for the school year just beginning is critical indeed.

One of the outstanding schools specializing in this field is the Clarke School for the Deaf in Northampton, Mass., in my congressional district. Principal George T. Pratt of the Clarke School has informed me that there will be a nationwide shortage of 454 qualified teachers of the deaf as the 1961–62 school year opens this month.

While only 177 teachers in this specialty were trained during the last year, there are over 30,000 deaf children of school age. One teacher is needed for every 10 pupils in order to provide the special instruction they require in learning a language they cannot hear.

Mr. Speaker, these exceptional children will grow up to become useful productive citizens if they can obtain the proper special education. The States have no training facilities to provide properly trained teachers of the deaf. I firmly believe that this must become a Federal responsibility to establish a program of grants-in-aid to nonprofit institutions of higher education to cover the cost of courses and to provide scholarships for qualified persons who wish to specialize in teaching these deaf children.

I appeal to Members of the House to unanimously pass this legislation.

Mr. BRADEMAS. Mr. Speaker, I am pleased to rise in support of H.R. 9011, a

bill to help provide training for more teachers of the deaf.

As a member of the Subcommittee on Special Education, I have received many letters from both teachers and parents of deaf children from many parts of the country pointing out the need for more trained teachers of the deaf.

I should like especially to take note of the remarks of Mr. William J. McClure, who is not only superintendent of the Indiana State School for the Deaf but also the president of the Conference of Executives of American Schools for the Deaf, who in a recent letter to me said:

> There is a desperate need for trained teachers of the deaf all over the country, and we at the Indiana school are feeling this very acutely.

Mr. Speaker I hope very much that H.R. 9011 will be passed and enacted into law during this session of Congress.

Mrs. SULLIVAN. Mr. Speaker, I support S. 336 as amended by H.R. 9011, a bill to encourage teachers to train in the skills of teaching the deaf, but with some reluctance. My reluctance is not due to any disagreement with the objective of the bill—far from it. I have supported legislation of this kind for many years.

My reluctance stems rather from the fact that we are once again handling the educational problems of exceptional children in a piecemeal fashion, a little at a time, one group or category at a time, in a succession of small programs involving small amounts of Federal funds.

Of course I recognize that in the present atmosphere, anything helpful to education—or to any group of children—represents a great accomplishment from a legislative standpoint. Since the Senate has already passed a bill dealing with the expansion of teaching of children with speech and hearing defects, and the encouragement of the training of more speech pathologists and audiologists, I will readily acknowledge that this approach of tackling just one aspect of the problem of teaching exceptional children probably holds some hope of legislative success in the closing days of the session. But I deplore the necessity for taking such a limited step forward, when the educational needs for all of our exceptional children are so great.

I submit at this point, Mr. Speaker, the testimony I gave on August 22 before the Special Subcommittee on Education, headed by the gentlewoman from Oregon, Congresswoman GREEN, on H.R. 15, my bill to try to meet the educational needs of all the exceptional categories of children, as follows:

TESTIMONY BY CONGRESSWOMAN LEONOR K. SULLIVAN, DEMOCRAT, OF ST. LOUIS, BEFORE SUBCOMMITTEE ON SPECIAL EDUCATION, HOUSE COMMITTEE ON EDUCATION AND LABOR, ON H.R. 15, A BILL BY MRS. SULLIVAN, THE EXCEPTIONAL CHILDREN EDUCATIONAL ASSISTANCE ACT, TUESDAY MORNING, AUGUST 22, 1961

I am grateful for this opportunity to testify on H.R. 15, the exceptional children educational assistance bill, to establish a 7-year program of Federal fellowships and scholarships to train more teachers for America's 6 million exceptional children—those with specialized learning needs and problems.

Because of the extraordinarily heavy schedules of controversial legislation on the calendar of the Committee on Education and Labor I was not able to arrange hearings on this bill in either the 85th or 86th Congress, so I am particularly grateful to Congresswoman GREEN, the chairman of this subcommittee, for calling up the bill for hearings this week.

During the 4 years since I originally introduced the legislation, we have made a few piecemeal approaches to the educational problems of exceptional children—chiefly the mentally retarded—but little or nothing has been done for the others. Consequently, it was not surprising to me this past weekend when Secretary Ribicoff reported that an estimated 4½ million handicapped children of school age are not attending school at all. A major reason for that is that most of our school systems lack the specially trained teachers needed to make school a meaningful experience for these youngsters.

The Federal Government, of course, cannot be and should not be expected to finance the training of all of the classroom teachers we need, and the college faculty people we need, in this field of educating exceptional children. The most a Federal program should be expected to do is to provide a starting motor—a mechanism to initiate action in a neglected bit vitally important area of education.

As long as we recognize it as only a starter—as long as we are aware that the biggest effort here is going to have to be by the States and localities, as it should be—then H.R. 15 represents one of the best investments the people of the United States could make, as Federal taxpayers, in the development of human resources, which constitute the greatest of all of our national resources.

THE PROBLEM FACED BY THE EXCEPTIONAL CHILD IN SCHOOL

While all of us are endowed with individual qualities and characteristics which distinguish us from each other most of us are blessed with a kind of normal averageness, if that is the word, of physical appearance and mental capacity which enables us from childhood on to submerge comfortably in the group—in the crowd—if we so desire and travel life's road at a comparatively easy pace. Most of the institutions with which we come in contact, the tools we must use, the clothes we wear, the homes in which we live, the specifications for most jobs, and the schools in which we learn, particularly the schools, are geared or tailored pretty much to the norm. I said we are blessed with the averageness because certainly as children we shrink at the idea of being visibly or demonstrably different.

But while most children seem to fit a comfortable pattern, others, a very select few, are touched by God with such great gifts of mind and perception, as to stand out for their brilliance; and still others, millions of others, are chosen for reasons known only to God for the special testing and trial of another form of differentness, that is, in having to shoulder physical, mental, or emotional handicaps or disabilities.

To romanticize this situation, it is easy to think that the gifted child has everything in his favor with the world as his oyster and the handicapped child inevitably has some inner fire and drive to enable him to overcome his physical limitations and achieve the greatness which has come to so many in similar circumstances, great poets, musicians, teachers, physicians, and so on, who were handicapped and who nevertheless achieved great things in spite of, if not because of, those physical handicaps.

But let us not forget that children do not suck knowledge out of their thumbs. They must be taught and often it is a painstakingly difficult—incredibly difficult—and skilled task to teach some unfortunate children anything, to teach others the minimum of those things they must learn and know in order to live useful lives, and to teach still others all they can learn profitably.

WASTAGE OF HUMAN RESOURCES

In this respect, the greatly gifted child and the handicapped child share some common and often serious problems in the educational process and thus are placed together by educators under the heading of exceptional. For the procedures set up to teach the so-called normal or average child do not begin to reach the educational needs of the difficult child—the exceptional one. As a consequence, the exceptional child—gifted or handicapped—is robbed of some of this educational birthright.

Some millions of children of school age are not in any school at all because of the existence of this problem. Some of these receive some help from the school system, but the problem is enormous, and the needs generally are not being met.

In addition, many others attend schools but find it often a frustrating experience, a place of confusion and torment, because they are just not geared for the classroom routine. They need classroom work specially planned for their abilities or handicaps. A capable youngster with a serious speech or hearing or visual defect can be made to feel dumb; an emotionally disturbed youngster can be a distracting influence on an entire class; a gifted youngster can sit and vegetate in pure boredom in a class which he tends to find a prison for his imagination or feel out of it in a class of older children who are nearer his mental capacity.

This is the problem faced by the exceptional child, and by his parents, and by all of us. Because the specialized equipment or the special techniques—or, most important the specially trained teachers—are not available, the exceptional child suffers from unrealized educational opportunities, and his family is often caught in an agonizing situation. I think all of us know of such families and the problems they face. And lastly, we as a Nation suffer in terms of a tragic wastage of human resources, of skills and abilities we cannot afford to waste.

I am not going to put this in terms of cold war or West versus East or the fact that the Soviet Union is outstripping us in the education of scientists and engineers and technicians. True, a gifted child whose talents are wasted because he is not stimulated to learn to his full capacity might otherwise become a great inventor or scientist whose discoveries could bolster our defenses, but that is not the point I wish to make. I should like to present this problem not in terms of national defense but in terms of what is right and fair to American children and to our society, which could be enriched by the contributions of all of these exceptional children if given the opportunity to learn and contribute to their full capabilities.

INCIDENCE OF EXCEPTIONAL CHILDREN

Who are these children? And how many are there?

H.R. 15 defines the term "exceptional children" to include those who are unusually intelligent or gifted; the mentally retarded; the deaf or hard of hearing; the blind or those with serious visual impairments; children who have serious health problems due to heart disease, epilepsy, or other debilitating conditions; children with speech impediments; and those who are crippled, including those who have cerebral palsy; and, finally, children who are maladjusted emotionally and socially, including the institutionalized delinquent.

There is no exact count available on the number of children in each category. However, spot studies made in 1952 showed that except for the category of blind children or those with serious visual impairments, numbering at that time less than 100,000. each

of the other seven categories was estimated to number at least—or substantially more than—500,000.

In 1954, the Office of Education held a conference on qualification and preparation of teachers of exceptional children, and in the course of the conference a proposed creed for exceptional children was presented by Leonard Mayo, director of the Association for the Aid of Crippled Children, and was accepted by the conference and by the Office of Education, which has since published it. I would like to quote a few passages from it.

This document states:

We believe in the American promise of equality of opportunity, regardless of nationality, cultural background, race, or religion.

"We believe in the American promise of every child within the borders of our country no matter what his gifts, his capacity, or his handicaps.

"We believe that the Nation as a whole, every State and county, every city and hamlet, and every citizen has an obligation to help in bringing to fruition in this generation the ideal of a full and useful life for every exceptional child in accordance with his capacity: the child who is handicapped by defects of speech, of sight, or of hearing, the child whose life may be adversely influenced by a crippling disease or condition, the child whose adjustment to society is made difficult by emotional or mental disorders, and the child who is endowed with special gifts of mind and spirit."

TRAINED MIND AND WARM HEART

The final paragraph of this document states:

"Above all, we believe in the exceptional child himself; in his capacity for development so frequently retarded by the limits of present knowledge; in his right to a full life too often denied him through lack of imagination and ingenuity on the part of his elders; in his passion for freedom and independence that can be his only when those who guide and teach him have learned the lessons of humility, and in which there resides an effective confluence of the trained mind and the warm heart."

I have quoted only portions of the document, the creed for exceptional children. I prize a framed copy of it in my office, and I will readily acknowledge that I have borrowed very heavily from it, deliberately, for the language of the preamble of my bill.

I think those few passages I quoted sum up a philosophy with which we must agree wholeheartedly if we truly mean to see to it that each child in this great country shares equally in the opportunity to learn. We know that each cannot learn at the same speed or to the same degree. But for those who can absorb knowledge and skills, we must make sure the opportunity exists for the child to benefit to the full extent possible.

We do that now for adults, and for children reaching maturity, in connection with vocational training and vocational rehabilitation. We provide the means by which men and women and young men and young women with physical handicaps can be helped and taught to qualify for skilled employment. Wonders are being performed under this program.

But why must we wait until the handicapped child is almost grown and ready for employment to begin thinking of his need in this respect? If we can perform wonders now in the rehabilitation process—and we can—then think how much more we could accomplish with that same individual if we began his specialized education as a youngster and geared it to his capabilities just as we later gear the vocational rehabilitation program to the physical capabilities of the individual.

SPECIALIZED TEACHING TECHNIQUES

Special educational techniques for the exceptional child would eliminate a tremendous amount of emotional stress for many of these children in the growing-up stage and thus help make better citizens of them and better communities for all of us.

Special education does not always and invariably involve special classes, but it does involve specialized teaching. In this connection, I think one of the best statements of the problem which I have seen was made in the annual report of the Ames, Iowa, public schools for 1954–55, in which Walter L. Hetzel stated:

"It must always be remembered that the education of exceptional children has basic concepts and goals in common with the education of all children. The same principles of child development prevail. A deaf child is a child with a hearing handicap. As a child, he has all the needs, desires, and physical energy of children in general. Basically, the only way in which he differs from an average child is his inability to hear; and because of this hearing handicap, he is unable to speak.

"This difference makes it necessary to plan his education with special consideration for his disabilities. The mentally retarded child, the child with visual impairment, the crippled child, and every other exceptional child has fundamental motives and drives common to children in general; but along with those common characteristics, there is in each case a specific handicap or exceptional condition that requires an adjustment or special service in his educational program.

"That program should be designed with full recognition of (a) his likeness to normal children, and (b) his special needs. This, in brief, constitutes the modern approach to the education of exceptional children."

EDUCATORS AWARE OF AND DISTURBED BY PROBLEM

Every family which has an exceptional child knows of the existence of this problem. So does every teacher who struggles with the task of trying to accommodate such a child in a group of 35 or 40 or more other youngsters, when there is insufficient space and not enough teaching hours in the day to cope with such tremendous classes. Our school administrators know of the problem, and so does the Office of Education, which has published much on it.

Many schools and many school systems are trying determinedly to meet the challenge which this problem presents. I was amazed at the number of Catholic schools, for example, set up specifically to meet the needs of exceptional children. I was also deeply impressed by the tremendous amount of literature on this problem.

TEACHER SHORTAGE AS BASIC FACTOR

One theme runs through all of this material, and is voiced again and again by Federal officials, State and local school administrators, and all of the experts in this field. It is this:

The problem is serious not because there is a lack of techniques or knowledge for helping these children, but because of a lack of trained teachers specially qualified to use these techniques and skills.

According to the research material prepared for me by the Library of Congress, there were in 1957 perhaps 25,000 specially trained schoolteachers equipped or certified to provide the specialized teaching required for various types of exceptional children. Some of the States have gone into the leadership on this in setting up certification standards for teaching exceptional children and many have established on a mandatory basis classes for certain physically handicapped and mentally retarded children.

Furthermore, at least 125 colleges and universities were then presenting sequences of courses leading to degrees for teachers or supervisors or researchers in various areas of exceptionality, and the increase in interest in this work on the part of the colleges and universities in recent years has been extremely gratifying.

Nevertheless, the number of teachers specially trained in these fields is so small compared with the magnitude of the need that any program to help in the education of exceptional children must start—and must concentrate on—assuring the training of many more teachers, and men and women to teach such teachers.

I am informed that a conservative guess on the number of elementary and secondary schoolteachers needed in this field would be 100,000—4 times the 25,000 teachers reported to have these specialized skills. And even that number, I am told, would not assure a desirable or practical ratio of teachers to students needing this specialized help.

PURPOSE OF PROPOSED BILL

The purpose of my bill is not to have the Federal Government proceed to do the job, but just lead the way, to provide a limited number of scholarships and fellowships to teachers and prospective teachers to encourage them to go into this field where they are so desperately needed; to provide some assistance to the colleges and universities pioneering in this work to enlarge facilities or obtain specialized equipment; and, above all, to stimulate the States and the localities not only to recognize their obligations—most of them do now—but rather to see the way to setting up the specialized classes or programs which are so necessary, knowing that under this bill more and more qualified teachers will be coming out of the advanced training courses prepared to take over such programs and build their effectiveness.

The Sullivan bill would work in this fashion:

AWARDS TO INDIVIDUALS

Beginning in this present fiscal year, and extending over 7 years, the Office of Education could award a total of $18,500,000 to teachers and prospective teachers for specialized training, primarily at the graduate level, in the field of education of exceptional children. The appropriations authorized for this purpose would be limited to $500,000 for the current fiscal year ending next June 30, increasing each fiscal year thereafter by $1 million until a maximum of $3,500,000 a year was reached in the fiscal year ending June 30, 1965. This amount would continue each year, then, until the end of the fiscal year 1968. These grants would carry such stipends as the Commissoner of Education would determine, but the basic idea is that, by providing for living expenses as well as tuition or other expenses, they particularly enable men and women already engaged in the teaching profession to feel that they can afford to go back to school for this specialized advanced training.

UNDERGRADUATES COULD BE INCLUDED

The money would be allocated on a strict ratio among the States, based on the school populations of the respective States. If there were not enough successful applicants from any State to use up the State's full allocation in any one year, the remaining amount would revert to the Treasury. It could not be reallocated among other States.

Although the program is intended primarily to attract teachers with degrees for advanced training at the graduate level, there is a special provision in the bill to permit the Commissioner, when he deems it advisable, to make awards also for study at the undergraduate level. Thus, if there should be a limited number of graduate teachers in a particular State who were interested in going into this field, there would still be opportunity for the Commissioner to make awards to teachers who have not yet

earned degrees or to residents of the State who have never taught professionally but who want to enter this field of teaching the exceptional child. But the primary emphasis of the bill, as I said, is on work at the graduate level.

The awards of scholarships and fellowships would be made directly to the individual recipient, not to the colleges or universities offering specialized courses. Since more institutions of higher learning are entering this field year by year, the recipient would thus have a free choice of institutions, providing, of course, that the recipient attended an accredited institution which offered appropriate courses in this field.

AWARDS TO INSTITUTIONS

An additional total amount of $2,500,000 would be authorized for appropriation during the 7-year program for grants to colleges and universities, primarily for installation of specialized equipment or facilities for training teachers in the fields of exceptional children. This particular item is not allocated on a State-by-State basis, nor is there a limitation of how much of the $2,500,000 could be appropriated in any 1 fiscal year. The basic idea in connection with this phase of the bill is to give the Commissioner of Education an opportunity to help schools actively engaged in teacher-training work to expand facilities, to put in necessary laboratories, and so on.

The Commissioner would be free to use some of this money in order to help an institution of higher education expand its faculty to establish courses in teacher training in the exceptionality categories. But I repeat, the emphasis intended on the use of this money is for things, rather than personnel. The amount of money involved is really so small that it could be used up quickly and to little overall effect if much of it were to go to schools to hire personnel, but I would not want to tie the Commissioner's hands too tightly if it should be determined by those best in a position to know the facts, that substantial portions of the awards to institutions should be made for that purpose.

Conceivably the best use to which this $2,500,000 might be put could even be for the purpose of setting up summer workshops or institutes at a number of centrally located colleges and universities. I just throw that out as a possibility, knowing that the summer institute idea has been used with very great success in the National Science Foundation and NDEA programs for high school teachers of science and mathematics.

ADVISORY COMMITTEES

Rather than try to spell out in every detail how these funds would have to be used to achieve the greatest effectiveness, I have provided in the bill for the creation of an advisory committee to assist the Commissioner in determining the areas and priorities of need in the award of grants to individuals and institutions, and in setting the standards for making the awards.

The advisory committee would be composed of people conversant with the overall educational needs of exceptional children, which is broad enough in phraseology, I hope, so that it could include outstanding lay people and other professionals, not just professional educators. To assure full participation by the professional educators now engaged in this work, I suggest in the bill the establishment of advisory panels of specialists in special education for each of the various categories of exceptional children, who could advise the Commissioner on particular problems and needs in their respective fields.

COOPERATION WITH THE STATES

There is one other provision of the bill which I believe warrants mention at this time, a provision calling for close and continuing and affirmative cooperation with the various State educational agencies to keep them fully informed of all developments under this program.

In this connection, the Commissioner of Education is instructed to notify the appropriate State officials of the names and home addresses of each resident of their State who is studying under a scholarship or fellowship grant under this program, and the field of study each is pursuing, so that the States can then bring up whatever ammunition they can to attract these teachers to positions back in their home States.

Of course, no teacher receiving a grant would or could be required to promise to teach in a particular State as a condition to receiving the award; so they will be free agents in that respect. But the States should be encouraged to try to get these people to come back to the home State so that the schools there can benefit, and the children can benefit, from the skills which these teachers will have acquired with Federal help.

The theory behind this section on cooperation with the States is that if the State agencies are keyed into the program, and are kept fully informed of all developments under it, and are consulted on the needs for specialized teachers in their States, they in turn will develop a greater awareness of those needs and the potentials of educating their exceptional children more effectively. They will thus also be encouraged, I believe, to develop more statewide programs and stimulate the local communities to set up special classes in these areas of specialized need.

PARTIAL SOLUTIONS FOR A MUCH BROADER PROBLEM

At the national level, Congress has not by any means been insensitive to this problem. Thanks to Congressman FOGARTY, we have appropriated substantial sums for research into the problems of teaching mentally retarded children and in 1958—a year after what is now H.R. 15 was originally introduced—we passed the bill to authorize a $1-million-a-year program to finance some fellowships for specialized work in teaching the mentally retarded. I was glad to support that bill, but as I said at the time it was passed, it was only a partial solution to a much broader problem.

Now the Senate has this year suggested a further partial solution by passing S. 336, which would provide grants for the training of teachers of the deaf, and for the training of speech pathologists and audiologists.

But is there any legitimate reason why we have to approach this problem in piecemeal fashion, enacting something for the mentally retarded children in 1958, something for the children with speech and hearing defects in 1961 or 1962, something for the crippled and cerebral-palsied in, say, 1963 or 1964, leaving out the emotionally and socially maladjusted, or the children with debilitating conditions unless and until their parents can form a big enough lobby and become articulate enough to command equal attention from the Congress?

I have heard it said by some legislative strategists that it is always so hard to get through any broad type of Federal aid to education, that it is simpler just to handle all of these problems in piecemeal fashion, solving one problem, one year in the name of national defense, then tackling the mentally retarded problem separately because no one can conscientiously oppose aid for mentally retarded children, and so on. Of course your experience on education issues in the Congress might bear that out. But I think, if we are doing anything significant and substantial in the field of training teachers for one group of exceptional children fairness dictates that we include them all in the same program and that it be the most effective type of program we can devise.

In connection with the needs of gifted children, your committee provided a good start in 1958 by including in the National Defense Education Act funds for testing and surveys to uncover the incidence of such youngsters in our schools. Presumably, then, we are singling them out for particular emphasis in the national defense-related subjects such as languages, mathematics, and the sciences. In the same act you set up a fellowship program for teachers in these specialized fields of knowledge. The National Science Foundation also devotes substantial funds for seminars and institutes for teachers in the secondary schools. So this problem is not entirely ignored. But we also need teachers in the elementary schools and in high school, too, who are able to work with the unusually intelligent child, not only in the teaching of a particular subject related to the national defense but in helping the child to achieve his full educational potential in all the fields of learning.

DOLLAR AUTHORIZATIONS PROBABLY TOO LOW

The $21 million which would be authorized over a 7-year period by H.R. 15—$18,500,000 in grants to individuals and $2,500,000 in grants to institutions—is an extremely modest amount compared to the need and the challenge. It is a figure based on recommendations made 4 years ago, and is probably too low in relation to today's costs, prices, and needs. I would be delighted—and I invite you to do it—to see the subcommittee double or triple that amount. I was groping somewhat in the dark in trying to arrive at a reasonable figure. As some of you may know, and as the material I intend to submit for your record will show, I originally invited the Commissioner of Education in 1957—Dr. Derthick—to recommend to me the kind of legislation which would best help meet the need for teachers of exceptional children as he himself had described the need in testimony before the House Appropriations Subcommittee. His office declined to make any official policy recommendations and, I would say, appeared quite lukewarm about the whole matter. I will let our exchange of correspondence at that time speak for itself.

I have not discussed the bill with the new Commissioner of Education because, frankly, I know he's had his hands full, since taking office, with issues and controversies with which all of you are quite familiar. But I hope this subcommittee, if it seriously plans to go ahead with H.R. 15, will discuss with the Commissioner and recognized experts in this field the proper dollar amount which should be authorized overall. I leave that to your good judgment.

CONCLUSION

Madam Chairman, there are two technical amendments which must be made in H.R. 15. On page 3, line 7, the word "Hawaii" should be deleted since Hawaii is now, of course, a State by right and by law and not merely by convenient definition in this measure.

On page 4, section 4, beginning at line 17, the $500,000 which would be authorized for the fiscal year ending June 30, 1961, is no longer appropriate. I would suggest, therefore, that each of the fiscal year authorizations be moved back 1 year, so that the program would continue through fiscal year 1968 rather than 1967.

I am submitting for your record the background material which I prepared at the time this bill was originally introduced. I hope you will include it in the printed transcript. It gives the origin of what is now H.R. 15. It details the actual development of the various provisions of the bill. It shows the factors which were taken into consideration. It lists the people who had a

hand in developing the provisions. Most importantly, it gives what I believe is an outstanding research report from the Legislative Reference Service on this whole program. And this research material, in turn, explains the bases on which I had to make the final decisions from among various alternatives for what was, and still is, a pioneering legislative effort to help extend the American promise of equality of opportunity, as the preamble of the bill states, "to every child within our country, no matter what his gifts, his capacity, or his handicaps, whether he is handicapped by defects of speech, of sight, or of hearing, or crippling disease or condition, whether his adjustment to society is made difficult by emotional or mental disorders, or whether, on the other hand, he is endowed with outstandingly brilliant gifts of mind and of spirit."

Mr. Speaker, the statement above lists the distinctive features of H.R. 15. I think it would help in an understanding of those features if the text of H.R. 15 were printed at this point in the RECORD in full, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

This Act may be cited as the "Exceptional Children Educational Assistance Act."

FINDINGS AND PURPOSE OF ACT

SEC. 2. The Congress believes that the American promise of equality of opportunity extends to every child within our country, no matter what his gifts, his capacity or his handicaps, whether he is handicapped by defects of speech, of sight or hearing, or crippling disease or condition, whether his adjustment to society is made difficult by emotional or mental disorders, or whether, on the other hand, he is endowed with outstandingly brilliant gifts of mind and of spirit. All such exceptional children require special educational guidance for development of their total educational potential.

The Congress finds that the educational problems presented by such exceptional children are of national concern, and that there is an acute national shortage of, and urgent national need for, individuals professionally qualified to teach such children, to supervise the teachers of such children, to train such teachers and supervisors, and to conduct research into the problems relating to the education of exceptional children.

While the Congress recognizes that the primary responsibility for meeting these problems lies with the States and local communities, national interest in the training of self-reliant and useful citizens demands that the Federal Government assist and encourage and stimulate the initiation of adequate programs in the States to meet these problems.

Therefore, this Act provides, on a temporary, seven-year basis, a program to further the training of teachers, supervisors of teachers, and researchers in special education for exceptional children, and to encourage and assist public and nonprofit institutions of higher education to expand their training work in these fields.

DEFINITIONS

SEC. 3. As used in this Act—

(1) The term "State" means a State, Hawaii, the District of Columbia, and the Commonwealth of Puerto Rico;

(2) The term "Commissioner" means the United States Commissioner of Education;

(3) The term "school-age population" means that part of the population which is between the ages of five and seventeen, both inclusive, determined by the Commissioner on the basis of the population between such ages for the most recent year for which satisfactory date are available from the Department of Commerce;

(4) The term "State educational agency" means the State board of education or other agency or officer primarily responsible for the State supervision of public elementary and secondary schools in a State, or, if there is no such agency or officer, an agency or officer designated by the Governor or by State law;

(5) The term "nonprofit institution" means an institution owned and operated by one or more corporations or associations no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual; and

(6) The term "exceptional children" means those children determined in accordance with regulations issued by the Commissioner to present special educational problems, such as (a) children who are unusually intelligent or gifted; (b) children who are mentally retarded; (c) children who are deaf or hard of hearing; (d) children who are blind or have serious visual impairments; (e) children who have serious health problems due to heart disease, epilepsy, or usually intelligent or gifted; (b) children who suffer from speech impediments; (g) children who are crippled (including those who have cerebral palsy); and (h) children who are maladjusted emotionally and socially, including the institutionalized delinquent.

AUTHORIZATION OF APPROPRIATIONS

SEC. 4. (a) There are hereby authorized to be appropriated $500,000 for the fiscal year ending June 30, 1961; $1,500,000 for the fiscal year ending June 30, 1962; $2,500,000 for the fiscal year ending June 30, 1963; $3,500,000 for the fiscal year ending June 30, 1964; $3,500,000 for the fiscal year ending June 30, 1965; $3,500,000 for the fiscal year ending June 30, 1966; and $3,500,000 for the fiscal year ending June 30, 1967; for grants to individuals for scholarships and fellowships in accordance with the provisions of section 5(a) of this Act.

(b) There is also authorized the sum of $2,500,000 to be expended during the existence of this program in the form of grants to public and nonprofit institutions in accordance with the provisions of section 5(b) of this Act.

GRANTS BY THE COMMISSIONER

SEC. 5. (a) The Commissioner is authorized to award scholarships and fellowships, with such stipends as he may determine, to individuals for the purpose of taking advanced training, at institutions selected by the recipients, for stated periods of time, in order to engage in employment as teachers of exceptional children, or to train or supervise teachers in this field, or engage in research in the teaching of exceptional children: *Provided,* That, in his discretion, the Commissioner, in order to accomplish the objectives of this Act, may also make these awards for study at the undergraduate level.

(b) The Commissioner is also authorized to make grants to public and nonprofit institutions of higher education to construct, install, improve, or expand specialized facilities and equipment in connection with courses of instruction for persons preparing to engage in employment as teachers of exceptional children, or to train such teachers, or to supervise such teachers, or to engage in research in special education for exceptional children: *Provided,* That the Commissioner, in his discretion, may also make grants to establish specialized courses in this field in such institutions.

(c) The amount of scholarships and fellowship grants made in any fiscal year to residents of a State under section 5(a) shall not exceed, in the aggregate, an amount which bears the same ratio to the total funds appropriated under authority of section 4(a) for such fiscal year as the school age population of such State bears to the total school age population of all the States.

(d) Payments of grants pursuant to this Act may be made by the Commissioner from time to time, on such conditions as the Commissioner may determine, including conditions requiring public and other nonprofit institutions to make such reports, in such form, and containing such information as the Commissioner may from time to time reasonably require to carry out his functions under this Act, and conditions requiring compliance with such provisions as the Commissioner may from time to time find necessary to assure the correctness and verification of such reports.

(e) The Commissioner shall consult with an advisory committee as described in section 6(a) which shall assist him in determining the areas and priorities of need in the award of these grants, and in setting the standards for the granting of such fellowships, scholarships, and grants.

ADVISORY COMMITTEE AND ADVISORY PANELS

SEC. 6. (a) The Commission shall appoint an advisory committee of not more than eight persons who shall be conversant with the overall educational needs of exceptional children and who shall assist the Commissioner in developing general policies under this Act. The Commissioner shall be ex officio a member of this committee and shall act as chairman thereof.

(b) The Commissioner is also authorized from time to time to establish advisory panels of specialists in special education for any of the categories of exceptional children enumerated in this Act. Each such panel shall consist of not less than five persons, who shall meet at the call of the Commissioner.

DELEGATIONS OF FUNCTIONS

SEC. 7. The Commissioner may delegate to any officer or employee of the Office of Education any of his functions under this Act except the making of regulations.

PUBLICIZING AVAILABILITY OF GRANTS

SEC. 8. The Commissioner shall take such steps as are practicable to publicize to the fullest extent possible the availability of fellowships, scholarships, and grants under this Act among teachers and prospective teachers, and among all colleges and universities offering accredited courses of study leading to advanced degrees in nursery, kindergarten, elementary, or secondary education.

COOPERATION WITH STATES

SEC. 9. In the administration of this Act, the Commissioner shall consult and advise with the various State educational agencies to determine the extent of need for teachers of exceptional children in the respective States and to keep the State educational agencies fully informed of all developments under this program in order to encourage them to establish special programs or special classes for exceptional children. In this connection, the Commissioner shall advise the State educational agencies of the names and home addresses of all individuals from their respective States who have received fellowships, scholarships, or grants for training in the field of education of exceptional children, and the particular field of study each is pursuing, so that the respective State educational agencies can then take appropriate steps to seek to attract such persons to positions in their home States in order to utilize the advanced education and skills which they have acquired under this program: *Provided,* That no individual receiving a scholarship, fellowship, or grant for advanced study under this Act shall be required, as a condition of such scholarship or fellowship or grant, to promise to take employment subsequently in any State.

Mr. GARLAND. Mr. Speaker, I wish to take this opportunity to commend the Members of the House for their favorable action yesterday on H.R. 9011. My interest has been so deep for this particular cause that I have submitted my own bill, H.R. 5623, for the training of special teachers for children handicapped by speech and/or hearing impairments.

From the research I have done on the current ability of our schools and communities to properly care for and train these children, it is obvious that there are serious shortages that prevent the proper training of these young people who could be more useful to themselves and their communities if they received the special instruction they require.

I am anxious for this shortage of specially trained teachers of the deaf, pathologists, and audiologists to be corrected and augmented by a Federal program of assistance. The program I have proposed will be of the grant-in-aid variety and would be administered by the Commissioner of Education in coordination with accredited training institutions. Since the encouragement of these specially trained teachers cannot be fostered at the local level, it is imperative that the Government take steps to help, not by gifts, but by assistance that will be matched by participating training institutions.

This problem is not theoretical. Its severity cannot be ignored. The situation is revealed in the experience over the years. In the past, it has been necessary for schools such as the Governor Baxter State School for the Deaf, in Portland, Maine, to obtain retired teachers, to get extensions for older teachers as they come to the normal retirement age, and to get teachers from the public school system who do not have this very vital specialized training.

It is obvious that this is detrimental to our handicapped children who are so deserving of this help.

Other programs have been tried, such as scholarships, but even this has not been sufficient to maintain the necessary staff members qualified for this work.

It is my belief that recruitment must come on a national level to fulfill these teaching needs. Schools for the deaf are under a tremendous pressure to obtain these specialized teachers because of our expanding population. Federal assistance for training these people is desperately needed.

The key to this problem is simply that there are not enough trained teachers to deal with speech and hearing impairments. The public school systems cannot handle the problems and needs of these handicapped children, and the local communities cannot or will not supply the funds to attract the number of teachers required.

This bill provides our handicapped children with the opportunity to help themselves to become more useful and valuable citizens because this legislation assists in providing them with a proper education under the guidance of expert instructors.

These children are depending upon us to help them. I am proud that we have not let them down.

Mr. LINDSAY. Mr. Speaker, I support this bill which will establish a program of grants in aid for the training of teachers of the deaf. The problem of the deaf and the hard of hearing is one of the least understood, and most neglected, of all of the growing health problems that face this country. It is national and international in scope. A greater number of babies are born each year afflicted with this tragic, lonely handicap of deafness.

Medical science has not yet discovered the cure for deafness at birth. But the lifelong handicap that results from deafness—that forever isolates the deaf child or person from all other human beings, that forces a segregation of its own just as demoralizing as any other kind of segregation—can be overcome. The enactment of H.R. 9011 is one way to begin. It would give us, in greater quantity and quality, the indispensable weapon against the handicap of deafness—trained teachers.

In the 86th Congress and again in this Congress I introduced legislation which would reflect a national response to the national problem of providing Federal funds to train teachers of those handicapped by deafness. I did so with some knowledge of the extent of the problem and an awareness of the enormous waste, in terms of the capacity of deaf persons to be useful and productive members of society, caused by the disaster of deafness. It is a disaster, I assure you, that can strike any home, any parent, any child.

There are in our midst today some 30,000 deaf children of school age with an expected increase of 400 every year. The number continues to rise while the number of specialists dedicated to train these children to take their rightful place in our society, with full opportunity to make their own way, is woefully small, and diminishing in relation to the mounting need.

To train these children, we need some 500 specialists annually. At the moment, there are only 177 such teachers in training in the special teacher training centers. In June 1959 only 127 such teachers were graduated. These figures alone manifest the critical shortage of trained personnel in this field.

From a study of the reports supplied me and conversation with informed sources, I am convinced that 80 percent of these handicaps are remediable. I have seen what can be done for these children if proper training is afforded them. Let me give you two examples of the kind of thing that can be done in this field.

In my own congressional district in Manhattan are located the largest public junior high school for the deaf in the country—Junior High 47, and the country's best known private school—primary and secondary—the Lexington School for the Deaf. In these remarkable schools I have seen the miracle of the deaf child's transition from the silent world of the deaf to the other world of communication, language and speech. After all, the chief thing that elevates human beings above all other species is an intelligence that enables them to communicate by speech.

The Lexington School happens to be a private school, but it charges no tuition and it receives most of its support from the State. It takes children beginning from age 3 or 4 up and gives them a high school education. Many go on to college. By the time they are finished they are equipped to lead normal lives in the adult world and to communicate with others.

The teachers in this school, and in junior high 47 must have very special qualifications. Not only must they have all of the qualifications of high school teachers in the normal school, but they must be specially trained to communicate with the deaf. The young men and women who make this their lifework must, after having met all the other standards for high school teaching, take specialized postgraduate courses, and pay tuition for this purpose. The Lexington School has a postgraduate training school of its own, which is well known around the country and abroad. Most of the teachers in training here have to borrow the funds in order to pay the relatively modest tuition. On top of this, they have to live and, in big cities where the problem is most acute, moderate- or low-income housing is not available. The Lexington School is in a position to provide living accommodations for many of these dedicated persons. But food, clothes, and other costs of living must be borne by them.

Most schools cannot even afford living accommodations. Then when these teachers are finished and are qualified to take on the task of teaching the deaf, they are often paid less than the high school teachers in the regular school system.

Can this be right? Is there any wonder that there exists such a shortage of teachers in this field? And we must remember that teaching the deaf requires a personal dedication and a steadfastness that few other specialized professions require. It is the hardest possible physical work. In addition to personal dedication it requires a persistence and a patience that most people do not have, including most teachers. Why then should we permit conditions to exist that make the cause of these young teachers and hopeful teachers so much more difficult than it has to be?

A properly staffed school specializing in the teaching of the deaf, if adequately supported, can become the laboratory for the advancement of teaching techniques in every school and at every educational level the country over. If methods can be devised, and they are already in process, for the advancement of learning in specialized schools such as Junior High School 47, and the Lexington School of New York City, they will have general application. After all, the essence of education is to teach students to teach themselves—to give them the necessary tools with which to build their own intellectual houses. The job of the teacher is to communicate with the student. Therefore, the development of methods and techniques for communication between the teacher of the deaf and the deaf student will certainly be of immeasurable benefit also

to the teacher who is seeking to establish lines of communication between students with hearing, but who still do not hear.

What I am suggesting, is that one of the soundest investments we can make toward the advancement of learning in the United States is to multiply 100-fold our effort in educational laboratories such as the two I have mentioned by adequately staffing them with specially trained teachers.

The specific Federal approach adopted in this bill now before the House is but one step. This is a modest proposal, calling for Federal assistance through a $3-million, 2-year program of grants-in-aid to accredited public and nonprofit institutions of higher education which are approved training centers for teachers of the deaf. I am pleased beyond measure that the House is at long last taking definitive action on this bill. The more I examine this problem, the more I wonder why we have delayed as long as we have.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill, H.R. 9011, was laid on the table.

GENERAL LEAVE TO EXTEND

Mrs. GREEN of Oregon. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the bill just passed.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

MILITARY CONSTRUCTION APPROPRIATION BILL, 1962

Mr. SHEPPARD. Mr. Speaker, I call up the conference report on the bill (H.R. 8302) making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1962, and for other purposes, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 1156)

The committee on conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 8302) "making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1962, and for other purposes," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 1, 5, 6, 7, and 8, and agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$192,278,000"; and the Senate agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$498,346,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendment numbered 2.

HARRY F. BYRD,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 8302) making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1962, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to each of such amendments, namely:

Amendment No. 1—Military construction, Department of Defense: Appropriates $27,000,000 as proposed by the Senate instead of $15,000,000 as proposed by the House. The conferees are in agreement that no part of these funds shall be obligated for facilities in support of large solid-propellant boosters until specific approval has been obtained from the Committees on Appropriations of the House of Representatives and the Senate.

Amendment No. 2—Military construction, Army: Reported in disagreement. The managers on the part of the House will move to concur in the Senate amendment with an amendment substituting the amount of $154,122,000 instead of $147,450,000 as proposed by the House and $176,512,000 as proposed by the Senate. The conferees have agreed to the reductions as proposed by the Senate and the following additions to the amounts and line items as proposed by the House:

Fort Benning, Ga.: Academic building	$300,000
Fort Leonard Wood, Mo.: Health facility	375,000
Army Chemical Center, Md.: Supertoxic laboratory	3,234,000
Fort Belvoir, Va.: Flying facilities	248,000
Redstone Arsenal, Ala.: Consolidated facility	250,000
U.S. Military Academy, N.Y.: Library	222,000
Sandia Base, N. Mex.: Communication facilities	750,000
Fort Buckner, Okinawa: Hospital	1,251,000
Montmorillon, France: Trainfire range	140,000
Minor construction	750,000
Access roads	250,000

The conferees are not in agreement as to the addition of $3,812,000 for the Quartermaster Research and Development Center, Natick, Mass., as proposed by the Senate. The motion to be made by the managers on the part of the House will exclude this amount and line item from the bill.

In addition the conferees have reduced the total funds available for this appropriation by $3,000,000 instead of $5,000,000 as proposed by the House, and will expect the Army to meet this funding reduction by recoupment of funds from prior appropriations.

The conferees have deleted the amount of $382,000 added by the Senate for the construction of an elementary school at Fort Clayton, Canal Zone and are in agreement that the cost of this school should be provided from funds available to the Canal Zone Government.

Amendment No. 3—Military construction, Navy: Appropriates $192,278,000, instead of $181,387,000 as proposed by the House and $201,259,000 as proposed by the Senate. The conferees have approved the amounts and line items as proposed by the House and the following additional amounts and line items:

Naval Station, Charleston, S.C.: Barracks	$500,000
NAS North Island, Calif.: Tactical control facility	1,480,000
Classified locations AC–4 and AC–7	138,000
NOTS China Lake, Calif.: Expansion of water system	50,000
MCB, Camp Lejeune, N.C.: Head facilities	50,000
MCB, Camp Pendleton, Calif.: Camp facilities, Stuart Mesa	5,000,000
Navy PG School, Monterey, Calif.: Laboratory	2,463,000
Camp Butler, Okinawa	160,000
PWC, Naval Base, Guam	250,000
Minor construction	250,000
Restoration of damaged facilities	250,000
Capehart housing support	50,000
Access roads	250,000

In addition the conferees have reduced the total funds available for this appropriation by $2 million as proposed by the House, and will expect the Navy to meet this funding reduction by recoupment of funds from prior appropriations.

The Departments of Defense and Navy will be expected to make a detailed study of the requirements for repair of jet engines at NAS Miramar, Calif. and the most economical and efficient method of meeting this requirement, including consideration of accomplishing this work in other naval and/or commercial facilities. Review should also be made of the cost and extent of any facilities required at NAS Miramar, including comparison with similar functions in the Air Force. The results of such a study should be made available to the Committees on Appropriations of the House of Representatives and the Senate prior to consideration of the military construction bill for fiscal year 1963.

The conferees have approved $2,463,000 for the Aeronautical Propulsion Laboratory at the Naval Post Graduate School, Monterey, Calif., with the understanding that no part of these funds shall be obligated until specific approval has been obtained from the Committees on Appropriations of the House of Representatives and the Senate.

Amendment No. 4—Military construction, Air Force: Appropriates $498,346,000 instead of $479,522,000 as proposed by the House and $539,243,000 as proposed by the Senate.

The conferees have agreed to the reductions as proposed by the Senate, except for Hickam AFB, Hawaii, and the following additions to the amounts and line items as proposed by the House:

Minot AFB, N. Dak.: Open mess, officers	$205,000
Olmsted AFB, Pa.: Instrument repair shop	719,000
L. G. Hanscom Field, Mass.: Headquarters building	919,000

Andrews AFB, Md.:	
Shop	$288,000
Headquarters building	1,720,000
Glasgow AFB, Mont.:	
Exchange snackbar	100,000
Exchange sales store	127,000
Trailer court parking	977,000
Corrosion control facilities	1,250,000
Civil engineering maintenance facilities	1,250,000
Hospital facilities:	
Lincoln AFB, Nebr	838,000
Little Rock AFB, Ark	1,900,000
Itazuke AB, Japan	806,000
Misawa AB, Japan:	
Air search radar	130,000
Weather facility	10,000
Planning	2,750,000
Minor construction	1,500,000
Access roads	1,000,000

In addition the conferees have reduced the total funds available for this appropriation by $20,000,000 instead of $23,000,000 as proposed by the House and will expect the Air Force to meet this funding reduction by recoupment of funds from prior appropriations.

The conferees have deleted $781,000 added by the Senate for a material science laboratory at Wright Patterson Air Force Base, Ohio. The deletion of this project does not involve disapproval of the function at this location, but is based upon inadequate planning and a desire for further study by the Air Force as to the feasibility of using existing facilities at this location.

The conferees have included $838,000 for the dispensary at Lincoln Air Force Base, Nebr., and $1,900,000 for the hospital at Little Rock Air Force Base, Ark., as proposed by the Senate, and have deleted funds requested for hospitals at March Air Force Base, Calif., and Francis E. Warren Air Force Base, Wyo., as proposed by the House. The conferees are disturbed with reference to the policy of the Department of Defense in programing beds in new construction specifically for retired personnel, as has been done at the hospitals for which funds have been denied, and the lack of a uniform policy with reference to provisions for care of dependents of military personnel. The basic law authorizing the use of military medical facilities by retired military personnel is completely permissive in nature and does not involve specific requirements for the construction of facilities for such personnel. Provision should be made for retired personnel on a space available basis as authorized by law and construction requirements be based only on beds required for active duty military personnel and their dependents. The Department of Defense will be expected in the future to adhere to a policy in the construction of hospital facilities which makes adequate provisions for the care of dependents on a uniform basis, including obstetrical facilities, and does not program beds in new construction for retired personnel.

The conferees have approved $1,250,000 for Civil Engineering maintenance facilities instead of $2,167,000 as proposed by the Senate and are in agreement that priority in the obligation of these funds should be given to the replacement of makeshift facilities at remote radar sites and other installations in the northern areas of the United States and Canada.

Amendment No. 5—Military construction, Army Reserve: Appropriates $14,381,000 as proposed by the Senate instead of $13,000,000 as proposed by the House.

Amendment No. 6—Military construction, Air Force Reserve: Appropriates $4,608,000 as proposed by the Senate instead of $4,000,000 as proposed by the House.

Amendment No. 7—Military construction, Army National Guard: Appropriates $21,868,750 as proposed by the Senate instead of $12,000,000 as proposed by the House.

Amendment No. 8—Military construction, Air National Guard: Appropriates $18,275,000 as proposed by the Senate instead of $14,000,000 as proposed by the House.

HARRY R. SHEPPARD,
ROBERT L. F. SIKES,
CLARENCE CANNON,
CHARLES R. JONAS,
JOHN TABER,
Managers on the Part of the House.

Mr. SHEPPARD. Mr. Speaker, the conference report provides $947,878,750 for the military construction program. This is $99,689,250 below the budget estimates; $72,268,000 below the Senate bill and $64,519,750 above the House bill. The specific items added to the House bill are listed in the statement of the managers. Two programs in particular have been of interest to various Members of the House and I would like to comment on them. The conference report approves the budget estimate of $12 million for the solid propellant booster program as requested by the President. This item was not considered by the House. The House conferees have also accepted the increases as proposed by the Senate for the Army and Air Force Reserve programs and the Army and Air National Guards. The conference report as submitted by the managers on the part of the House is unanimous on the part of all concerned. Not included in the report is the military construction appropriation for the Army. This amendment is in disagreement between the managers on the part of the House and those of the Senate and will be subject to a separate motion and vote after action on the conference report. This is a good report and I urge its adoption.

Mr. JONAS. Mr. Speaker, will the gentleman yield?

Mr. SHEPPARD. I yield to the gentleman from North Carolina.

Mr. JONAS. Mr. Speaker, as the chairman of the subcommittee has explained, the conference action provides $72,268,000 less than the bill that passed the other body. It provides $64,519,750 more than the bill which passed the House. As the gentleman from California has said, the conference report is unanimous. We were under some pressure in the conference. The other body had included an item that had been stricken out on the floor here, although originally contained in our bill as it came out of the House Committee on Appropriations. The conferees on the part of the House felt duty bound to uphold the position taken by the House, so that item comes back in disagreement. And, as the gentleman from California has explained, a separate vote will occur on it after other procedures dealing with this conference report have been concluded.

Mr. Speaker, I ask unanimous consent to include as part of my remarks a tabulation showing service-by-service budget estimates, House action, Senate action, and action taken in conference.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The tabulation is as follows:

Title	Budget estimates (revised)	Passed House	Passed Senate	Conference	Conference action compared with—		
					Estimates	House	Senate
Military construction, Department of Defense	[1] $27,000,000	$15,000,000	[1] $27,000,000	[1] $27,000,000		+$12,000,000	
Loran station	10,000,000	10,000,000	10,000,000	10,000,000			
Military construction, Army	194,977,000	147,450,000	176,512,000	154,122,000	−$40,855,000	+6,672,000	−$22,390,000
Military construction, Navy	205,211,000	181,387,000	201,259,000	192,278,000	−12,933,000	+10,891,000	−8,981,000
Military construction, Air Force	560,380,000	479,522,000	539,243,000	498,346,000	−62,034,000	+18,824,000	−40,897,000
Military construction, Army Reserve	13,000,000	13,000,000	14,381,000	14,381,000	+1,381,000	+1,381,000	
Military construction, Naval Reserve	7,000,000	7,000,000	7,000,000	7,000,000			
Military construction, Air Force Reserve	4,000,000	4,000,000	4,608,000	4,608,000	+608,000	+608,000	
Military construction, Army National Guard	12,000,000	12,000,000	21,868,750	21,868,750	+9,868,750	+9,868,750	
Military construction, Air National Guard	14,000,000	14,000,000	18,275,000	18,275,000	+4,275,000	+4,275,000	
Total	1,047,568,000	883,359,000	1,020,146,750	947,878,750	−99,689,250	+64,519,750	−72,268,000

[1] Includes budget estimates of $12,000,000 in H. Doc. 179, not considered in the House.

Mr. WEAVER. Mr. Speaker, I wish to take this opportunity to commend the committee and the managers on the part of the House for their efforts to include in this bill $838,000 for construction of a dispensary at the Lincoln Air Force Base, Nebr. I also wish to extend the thanks of the people of Lincoln and the military personnel at the base for this action.

This dispensary is badly needed at the Air Force base. The present facilities are limited and occupy a converted bachelor officers' quarters, hardly adequate for the kind of care needed. At a time when our Strategic Air Force must be constantly at its peak of efficiency, better equipment and better housing for medical care is essential.

I sincerely appreciate the fact that the conference committee recognized these very serious needs and took constructive action to guarantee early construction.

Mr. BOLAND. Mr. Speaker, I trust that the House will not agree to the motion to exclude the amount of $3,812,000 for the Quartermaster Research and Development Center at Natick, Mass.

It is difficult to understand, in view of the arguments detailed a few moments ago by the distinguished gentleman from North Carolina [Mr. JONAS], how any Member of this body could persist in voting to keep the Food and Container Institute of the Quartermaster Corps in its present location in Chicago.

As has been stated by many of our colleagues on the floor today, particularly the gentleman from Massachusetts [Mr. BATES], this matter has been studied, restudied, evaluated and reevaluated by the Department of the Army, by Committees on Armed Services and Appropriations, by the Comptroller General of the United States, and by a special committee of the National Academy of Sciences—and, all have recommended that the transfer should be carried out.

It is true that this House twice decided that the Institute should remain in Chicago. But, I submit, Mr. Speaker, that its decision was not based on the merits of the matter. It was grounded solely and simply on personalities. It is always difficult to oppose the great and able Members of the Illinois delegation. This House has had enough field days for the Chicago and Illinois delegations. It ought to resolve this matter on its own merits. Mr. Speaker, although this matter has been based on personalities rather than merit, the rollcall of July 25, 1961, emphatically shows that there is considerable support for the position taken by the interested committees of the House that this move ought to be approved. The vote on that day was 241 to 170 against the move. A mere shift of 36 votes would have sustained the proponents of the transfer.

Mr. Speaker, the real issues here are what is best for the United States—what is best for the Department of the Army—what is best for the Quartermaster Corps in developing methods of giving our armed services the very best in equipment and supplies?

Mr. Speaker, these questions have been answered eloquently by the conclusions reached by the numerous studies. It has been repeatedly and incontrovertibly affirmed that moving the Institute from Chicago to Natick would:

First. Show an annual saving of $1,155,000;

Second. Bring all of the research and development activities of the Quartermaster Corps of the Department of the Army under one roof;

Third. Increase the efficiency of research and development operations;

Fourth. Assure lower operating costs of research management and administration at one location; and

Fifth. Realize the desirability and advantage of having an integrated team of scientists of different disciplines who can freely communicate on a person-to-person basis to help solve the unique military problems entrusted to the Quartermaster Corps.

Mr. Speaker, in view of what has been said here today, the conclusions of the committees that have studied this matter and the good sense of this House, we should retain this item in this bill and resolve once and for all a matter that already has taken too much important time of this body.

Mr. SHEPPARD. Mr. Speaker, I move the previous question.

The previous question was ordered.

The conference report was agreed to.

The SPEAKER pro tempore. The clerk will report the amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 2: On page 2, line 16, strike out "$147,450,000" and insert "$176,512,000".

Mr. SHEPPARD. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. SHEPPARD moves that the House recede from its disagreement to the amendment of the Senate numbered 2 and concur therein with an amendment, as follows: in lieu of the sum proposed by said amendment insert: "$154,122,000".

Mr. SHEPPARD. Mr. Speaker, this amendment is concerned with the military construction appropriation for the Department of the Army. The managers on the part of the House and the Senate have agreed on every item in the bill and the corresponding amounts except for the request to transfer the Food and Container Institute from Chicago, Ill., to Natick, Mass. The motion which I have just offered includes the amounts unanimously agreed upon by the managers and eliminates any funds for this proposed transfer. The specific items involved other than Natick are set forth in the statement of the managers.

Mr. Speaker, after our hearings on this proposal the Appropriations Committee approved the transfer of these functions to Natick. By action on the House floor on an amendment offered by the gentleman from Illinois [Mr. YATES], the House by a vote of 241 to 170 overwhelmingly disapproved the committee action. Similar action occurred previously on the military construction authorization bill. Despite what personal feelings they might have, I have always held the position that the managers on the part of the House represent the views of the majority of the House and not their own views as individuals when the Senate conferees refuse to agree to the House position on this line item, I could see no recourse except to bring this matter back to the House in disagreement and allow the House once more to work its will. Frankly, the feasibility of this transfer of functions has always been questionable, but our hearings developed the fact that such a transfer could well be economically desirable. Therefore we recommended the appropriations for Natick to the House.

At the conclusion of my remarks I shall yield such time as he may desire to the ranking minority member of the House managers and to any other House conferees and then to the proponents and opponents of this proposal. After the time has expired, I shall move the previous question on this motion and allow the House to decide once more what should be done. In the event this motion is defeated, which would be a reversal of the previous position of the House on this construction item, I shall immediately offer another motion to concur with an amendment which would add the funds required for the facilities at Natick to the amount which is now before the House.

Mr. Speaker, I yield such time as he may desire to the gentleman from North Carolina [Mr. JONAS].

Mr. JONAS. Mr. Speaker, I do not think any Member of the House should quarrel with the way the conferees are proceeding with respect to this item. We have, as the gentleman from California has explained, undertaken in the conference to uphold the position taken in the House on a record vote. We took that position in conference, although our subcommittee had recommended this transfer to our committee at the time, after exhaustive hearings, prolonged deliberations, and careful study. We brought the item in the Military Construction bill to the House and on motion the funds were denied for the transfer. Those funds were restored in the other body, and we went to conference with that item in disagreement.

We never were able to reconcile the disagreement. The conferees on the part of the other body insisted on maintaining the position taken by that body; and the House conferees felt duty-bound to uphold the position expressed in the record vote in the House.

I do not speak now for anyone on the subcommittee or on the conference committee except myself, but I think I should explain to the House that I favor this transfer. In the subcommittee I favored it; in the full Committee on Appropriations of the House I favored it; and I argued for it when the bill was before the House on July 24. The conferees from the other body did not accept the House view and we are now back with the conference report. I feel that I have discharged my obligation to the House as reflected in the record vote to which I have referred, and that I have a right now to again voice my own feelings with respect to this transfer and cast my vote in the way I think is proper; namely, the transfer of this installation to Natick, Mass.

May I say I do this without any feeling that what is involved is a contest between Chicago and Massachusetts; if there is I certainly am not involved in it. I have not been lobbied by anybody in connection with this transfer. I realize there are differences of opinion between Members of the House. Those from the Chicago area would like to retain the installation there. Others would like to have it moved to Massachusetts.

In my consideration of this problem I have tried to eliminate all sectional and personal questions. I base my view that this transfer should be made upon the fact that this project has been studied by more committees and by more officials than any project that has come up for consideration since I have been a Member of this body. Every study by every committee that has studied it has recommended that this transfer be made to Natick, and this includes the Department of the Army, the Department of Defense, a subcommittee of the

House Committee on Armed Services, and a Special Advisory Board on Quartermaster Research and Development appointed by the National Academy of Science and the National Research Council.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. JONAS. I yield to the gentleman from Illinois.

Mr. YATES. The gentleman has not pointed out that a staff study made by the staff of the Committee on Appropriations of the House came to an opposite conclusion from all the studies the gentleman has mentioned.

Mr. JONAS. That is not entirely correct. The staff study was critical in some respects, but it did not answer the issue as categorically as the National Academy of Science Board, as the Secretary of Defense, or the Secretary of the Army.

Mr. YATES. I think the gentleman is correct in stating what the decisions of the other Boards were, but if the gentleman will permit me to share his time for a moment to read a staff report of the Committee on Appropriations, I think the gentleman may come to an opposite conclusion.

Mr. JONAS. I hope the gentleman will not take all of my time.

Mr. YATES. I withdraw my request. I will read that portion of the staff report on my own time.

Mr. JONAS. Mr. Speaker, in conclusion may I read from a letter the members of the committee received from the Chairman of the Advisory Board, dated September 1, 1961, written after the action taken in this body late in July. This letter is signed by Dr. Allen Abrams, Chairman, Advisory Board, Quartermaster Research and Development, and I quote from that letter the following:

The Advisory Board is composed of men of high standing in the fields of scientific research and development. These men are appointed by the National Academy of Sciences and the National Research Council. They serve without compensation and without political, regional or other bias. Their function is to assist the military in its task of supplying our soldiers with the best possible equipment and food.

The Q.M.R. & D. has two principal research facilities (1) at Natick, Mass., valued at about $13 million and with a staff of about 1200 people. Here are the principal scientific and engineering laboratories and pilot plants; (2) at Chicago the Food and Container Institute (FCI), a branch of Q.M.R. & D., which carries on research on food and the containers in which it is issued. This separation of the facilities has placed an extra burden on the staff at Natick and has hampered the constant communication required between staff members.

Hence, the relocation of the FCI has been investigated by various echelons of the Army, the Secretary of the Army, the Secretary of Defense, and the Bureau of the Budget. Estimates have been prepared and studies made as to the relocation of the FCI from its presently outmoded facilities. Two places have received special consideration:

(1) Chicago, because of its midwest manufacturing and scientific area;

(2) Natick, Mass., because 80 percent of the Q.M.R. & D. facilities and personnel are in that area—and it too has access to many scientific institutions and manufacturing organizations.

Then, Dr. Abrams proceeds to point out that this question, when it was assigned to his Board, was reassigned to a special panel which considered this question from all angles, and came up with the unanimous recommendation that the Institute be moved to Natick. That recommendation by the panel was later unanimously approved by the full board, and a recommendation so made to the Secretary of the Army.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. JONAS. I yield to the gentleman from Illinois.

Mr. YATES. That panel did not make an adequate report, as I pointed out when this matter was debated earlier in the House. The Chairman himself, Dr. Abrams, in a statement to me declared that he would need at least 30 days in which time to make a detailed study of the feasibility of moving that institute from Chicago to Natick. He was given 1 week by the Secretary of the Army in which to come to a conclusion. As a result, we in Chicago feel that we were never given the opportunity to adequately prepare or to present our side.

Mr. JONAS. In reply to that, may I read the following paragraph from Dr. Abrams' letter?

Earlier this year a Midwest Congressman called me, as Chairman of the Q.M.R. & D. Advisory Board, to ask whether our Board would be able to investigate the proposed move and as to how long the investigation would take. We advised him that if the request came from official sources we would investigate; that such a study would probably require 30 days. At that time we had little or no knowledge of the several previous investigations and were basing our estimate of time on the necessity for digging out the facts. Hence, when the request for the study was transmitted to us by the Secretary of the Army these studies were supplied to us and it became evident that a detailed study would not be required. The Secretary had requested that our report "be concluded as promptly as possible" so we agreed that an evaluation of the accumulated information would be adequate.

Then he goes on to point out that among other things considered was the report by the Subcommittee of the Armed Services Committee of this House, which conducted a full and complete study of this proposal. May I read the following from the recommendation of that subcommitee?

A wholly objective analysis of all the figures presented carries the burden of persuasion on the side of the move from Chicago to Natick. It appears that there will be an annual savings by reason of the move of something on the order of $900,000 each year. There is a definite advantage of mutual stimulus engendered by direct communication with scientific personnel.

Mr. YATES. Mr. Speaker, would the gentleman yield for a question?

Mr. JONAS. I yield to the gentleman from Illinois for a question.

Mr. YATES. Does the letter from Dr. Abrams indicate that in addition to the studies that the gentleman has referred to that the doctor or his group studied in addition the report of the staff of the Appropriations Committee of the House?

Mr. JONAS. That was not made available.

Mr. YATES. I see. That was the only study that was adequate, and the only study that went into a detailed survey.

Mr. JONAS. May I say this to the gentleman in response to that? That was a study prepared for the committee at our request, and was considered by our subcommittee. After it was considered and evaluated along with all the other studies, the subcommittee voted to recommend the transfer.

Mr. SHEPPARD. Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts [Mr. MARTIN].

Mr. MARTIN of Massachusetts. Mr. Speaker, there is not much that I can add to the very ably presented argument of my friend and colleague from North Carolina [Mr. JONAS].

This is really a very simple question. It is not a question of politics or partisanship and I strongly hope that will not enter into the decision we are called upon to make.

This is much more than a choice between Chicago and Natick. It is a choice between efficiency and inefficiency; between economy and waste at a crucial hour in world affairs, when every dollar we spend on our national defense should return a dollar's worth of value to the taxpayers of this country.

I hope and pray, as we all do, that it will not again be necessary to send American boys to war. But if that terrible emergency should be forced upon us, we want to send those boys with the best equipment and the best food that America can provide.

The gentleman from North Carolina [Mr. JONAS] has pointed out how essential it is that these important research facilities should be assembled under one roof, where the researchers and the scientists can work in close collaboration and not be separated miles apart.

Let us consider how thoroughly this matter has been studied. After the most careful and critical investigation, the transfer to Natick was recommended by the Secretary of the Army in the Eisenhower administration, Mr. Brucker. It has also been strongly recommended to the Congress by the Secretary of the Army in the Kennedy administration, Mr. Stahr.

It was recommended by the Armed Services Committee of the House and the Armed Services Committee of the Senate. It was recommended by the Appropriations Committee of the House and by the Appropriations Committee of the Senate. It was made the subject of a special study by a subcommittee of the House Armed Services Committee, the gentleman from California [Mr. DOYLE], and the gentleman from Pennsylvania [Mr. VAN ZANDT]. Their investigation included a personal inspection visit to both sites. These gentlemen concurred in the previous recommendations that the transfer be made in the interests of both efficient operation and of economy.

The subcommittee declared that the scientific advantages which would accrue from uniting the work under one roof at the parent laboratory in Natick would compel them to recommend the transfer even if no economies were to result, but

that a combination of both efficiency and economy was indisputable proof of the desirability of the transfer.

The Senate has twice seen the wisdom of the transfer and has restored the funds which the House eliminated.

Now the conferees, in view of the previous House action, have properly brought the issue back to the House for another vote.

I say to my colleagues that here is a chance to practice economy as well as preach it.

Here is a situation where the Department of Defense, the administration, and the Army desire to do that which is efficient and economical. We should support their efforts. We are constantly calling upon the Defense Department to spend the funds which we appropriate wisely and effectively and we criticize them when they waste funds. We shall be on mighty thin ice if we criticize their operations in the future if we fail now to support their efforts to achieve efficiency and economy in this important project.

Perhaps I may be accused of being prejudiced because Natick is in my district. Naturally I would like to see this installation to go to Natick because it is the only defense installation in my district. But beyond all this, I am broad-minded enough, I am nationally spirited enough to do what is right for the Nation and for our Armed Forces, and even though my district would profit by the change, I would not advocate it unless I was thoroughly convinced by the most competent evidence, including the conclusions of the National Academy of Science, that Natick was the proper place for this installation to be placed.

Let us do the efficient thing and the economical thing; let us do the right thing and assemble these important research facilities which mean so much to our men in uniform, under one roof at Natick.

Mr. FULTON. Mr. Speaker, will the gentleman yield?

Mr. MARTIN of Massachusetts. I yield to the gentleman from Pennsylvania.

Mr. FULTON. May I point out that if the House does not want to choose between Illinois and Massachusetts, it might choose Massachusetts on the ground that it will save $900,000 a year.

Mr. MARTIN of Massachusetts. Nine hundred thousand dollars of the taxpayers' money which might go to some other installation in some other part of the country.

Mr. SHEPPARD. Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts [Mr. BATES].

Mr. BATES. Mr. Speaker, Massachusetts never asked for this project. The first I ever heard of it was when it was before the House Committee on Armed Services to be considered. It seems to me quite clear, after studying this matter now for 3 years, that the right thing to do is to transfer this to Natick.

Over the weekend I had an opportunity to talk to some parents who have received bills to send their children to college. They want excessive spending eliminated in Washington. This is an opportunity to save $1 million a year. As a matter of fact, because of the dilatory tactics of last year this delay has already cost us $1 million.

Being on the Committee on Armed Services, I want to be certain that our servicemen have the very best equipment possible. We all know this agency is going to move from its present site. We know that. Nobody denies it. Right now it is floundering. The Army Quartermaster Corps has no sense of direction as far as this is concerned. It is waiting for this bill to become law so that it will have the money to go ahead.

I was on the committee of conference, representing the House Committee on Armed Services, and the senior Senator of the conference, the gentleman from Georgia, said that he knew of no project, as long as he has been in Congress, that has ever been studied and restudied as much as this one.

Every single decision made by responsible authority was to the effect that clearly this should go to Natick, Mass. The Department of the Army on two separate occasions in the last 2 years, once through Secretary of the Army Brucker, said it was desired to make this move as soon as possible. That was in the Eisenhower administration. Now Secretary of the Army Stahr in this administration said, "Thus the Army's position is sound and it has been reaffirmed by the most searching review."

The House Committee on Armed Services, the Senate Committee on Armed Services, the House Military Appropriations Subcommittee, the full Committee on Appropriations of the House, and the Military Subcommittee on Appropriations in the Senate, all have recommended that this project go to Natick.

A year ago a controversy arose, not from the members of our committee but by a delegation from Illinois who asked that members of our committee be assigned to study this project. They were so assigned, and the project was delayed for a year. After the most careful evaluation, after the greatest scrutiny, the gentleman from California [Mr. DOYLE], a Democrat, and the gentleman from Pennsylvania [Mr. VAN ZANDT], a Republican, interested only in what was the best for the United States and for its taxpayers, said this in conclusion:

> Suffice it to say it appears there will be an annual saving of at least $900,000 if the transfer is made to Natick, Mass.

And they so recommended the transfer.

The Director of Research and Development of the Army, Richard S. Morse, said:

> We in the Army have extensive data demonstrating both the economic and management advantages which would accrue from consolidating our activities at Natick.

Even the General Accounting Office, an unbiased organization, an arm of the Congress, if you will, established to be of assistance to us on matters of this nature said:

> We believe that fairly significant savings could be realized by the Government if the CAC is inactivated as planned by the Army. Amortization on a 7 year basis of new facilities would result in an annual saving of $275,000 for the first 7 years. After the first 7 years, we estimate an annual savings of $998,000.

We had this measure before the Congress a little earlier, and the gentleman from Illinois [Mr. YATES] offered amendments so that this matter could be studied once again, now by an agency of his own choice, the National Academy of Sciences. This organization studied this problem and once again they concurred with everyone else whoever studied this matter. As a matter of fact, right now the Natick office manages the contracts for the Food and Container Institute.

At Natick we have the following equipment, which they do not have in Chicago, and if they want to use such equipment, they must go outside and get them on a contract basis.

This is what they have: Van de Graaff accelerator, Solar furnace, large hot and cold climatic chambers, mass infrared spectograph, food extraction plants, electron microscopes, X-ray defraction equipment, hazardous research facilities, psychophysiological equipment, biophysical facilities, cartographic facilities, and Quartermaster Radiation Laboratories (to be completed in June 1962).

All the equipment available for this purpose is now at Natick. This is bringing together, as the House Committee said, the parents with the child.

It seems to me, Mr. Speaker, this issue is quite clear. We have delayed it too long already. Let us vote down the recommendations and vote "no" when this proposal comes before us.

Mr. SHEPPARD. Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts [Mr. LANE].

Mr. LANE. Mr. Speaker, I sincerely regret that the House conferees are not in agreement as to the addition of $3,812,000 to authorize construction of facilities at the Quartermaster Research and Engineering Center in Natick, Mass. This fund is needed to house the Quartermaster Food and Container Institute due to the proposal for transfer from the Chicago, Ill., Administration Center to Natick.

This item first received the approval of the House Armed Services Committee in their authorization bill to the House. That committee arrived at their conclusions following the appointment of a special subcommittee that consisted of the gentleman from California, the Honorable CLYDE DOYLE, and the gentleman from Pennsylvania, the Honorable JAMES VAN ZANDT. They investigated this project at great length and recommended transfer from Chicago to Natick, in their report to the full Armed Services Committee.

At the time of the consideration of that authorization bill in the House, and at the request of the gentleman from Chicago [Mr. YATES] a further delay was granted in order to have an additional study made by the Defense Department. Although the matter had been studied and restudied by the military, again this committee recommended unanimously

this transfer. This item was recommended favorably by the House committee on the military construction appropriation bill and so reported to the House. The other body has seen fit to insist that this item remain in the conference report.

This appropriation was recommended and sponsored by the Secretary of Defense and not by us, the Members from Massachusetts. Expert testimony offered before your Committee on Appropriations and the Committee on Armed Services clearly establishes that this inevitable move is in the best interests of the Army and the taxpayers. I call your attention to the statement of this committee on page 11 of the report on this military construction appropriation bill for 1962, the following:

> This matter has been investigated and studied on numerous occasions by several committees of the Congress, the Army, and the Department of Defense. Testimony received by the committee and information made available have been both detailed and voluminous. Based on this testimony and the various studies to which it has access, the committee believes that it is in the best interest of the Government to transfer this function as recommended in the budget.

In other words, you have heard a great deal in reference to the hearings before this Appropriations Committee. The evidence produced through the interrogation by our colleagues on that committee has shown conclusively the compelling reasons for the transfer of the Quartermaster Food and Container Institute from Chicago, Ill., to Natick, Mass.

I wish that the Members would read from page 533 of part II of the hearings before this Subcommittee on Appropriations on Military Construction, in which the conscientious gentleman from North Carolina [Mr. JONAS] asks this question:

> This committee is primarily concerned with the dollars involved because we are not a legislative committee; we are an appropriating committee. We have to satisfy ourselves as to the effect the spending will have.
>
> I asked Dr. Sieling the questions about the advantages of the move from a scientific and research standpoint because I thought the record should contain a statement setting forth the practical advantages and the benefits that might be derived.

Dr. Sieling answered as follows:

> I appreciate that, sir. I would not want to belabor the subject, but the technical advantages that would be derived from consolidation of this food and container research activity with the other elements of the Quartermaster research organization at Natick would be outstanding in that we would bring together the technical people from the various fields so that they, when they have a problem to solve, could personally talk with each other on a day-to-day basis as the solutions develop, leaving nothing to chance discussion at later time and having, let us say, a simple example of the development of a dehydrated meat requires the work of the engineers to develop a method of dehydration, it requires the work of chemists to elucidate the color changes that may result from dehydration, the work of physicists to examine the influence of dehydration on the ability to reconstitute the food.
>
> All of these attendant scientific skills are at Natick. The bacteriologist, engineer, plastics expert, chemist, the metallurgist, the etymologist, all of these people who have to do with the keeping quality and the original fabrication of this item except the food technologist are at Natick. The last man is at Chicago. At the present time he must rely on telephonic or letter communication with the other scientists.

What more proof is necessary?

The evidence in support of this transfer is overwhelming. Both the Republican administration and the Democratic administration have recommended it.

The Quartermaster Research and Engineering Center at Natick, Mass., by every standard for determining location and efficient functioning, is the natural home for the Food and Container Institute, Quartermaster Corps, U.S. Army.

Mr. SHEPPARD. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois [Mr. KLUCZYNSKI].

Mr. KLUCZYNSKI. Mr. Speaker, here we are again moving the Food Container Institute from Chicago to Natick, Mass. I hate to get into an argument with my good friends from Massachusetts—Democrats and Republicans. They are all really great Members of this body but they want to take the Food Container Institute which has been in my district in Chicago for over 25 years. The Food Container Institute has done a fine job in research. It is located in the great Midwest, the breadbasket of America. This House has voted twice to keep it there, rollcall No. 22, March 23, 1961—yeas 267, nays 145; rollcall No. 119, July 25, 1961—yeas 241, nays 170.

I cannot understand why the other body insists on transferring the institute to the Quartermaster Research Center at Natick, Mass. Mr. Speaker, you take this important facility away from me, and these boys will decide to take something away from you next session. You know the way "sharpies" operate. I hope the House agrees to the amendment as presented by Congressman SHEPPARD.

Mr. SHEPPARD. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois [Mr. YATES].

Mr. YATES. Mr. Speaker, the conferees have come to the correct decision in moving to exclude the appropriation from this bill for the transfer of the Quartermaster Food and Container Institute from its logical location in the city of Chicago to Natick, Mass.

The eloquent arguments we have heard today from the gentleman from North Carolina and the distinguished Members from Massachusetts were all made at the time this bill came up in the House earlier this year. They were made not once but twice for this matter was before the House twice. On each occasion the House voted to retain the Food and Container Institute in Chicago, Ill., its logical location. As a matter of fact, when the matter was last before the House, the vote was 241 to 170 to keep the Food and Container Institute at Chicago, Ill.

Much has been said about studies, much has been said about surveys that have been made. Let me tell you, however, that the best survey, the most complete survey ever made was the staff report of the Committee on Appropriations. This was the conclusion of that report:

> The staff is of the opinion the Army planning in reaching its decision to deactivate the CAC has been inadequate. The Army's claim that the closing of CAC is dependent upon the relocation of Q.M.F. & C.I. to Natick does not appear sound. Q.M.F. & C.I. occupies only 10 percent of the total space at this facility and is but one of a number of military and civilian tenants. It is felt that the Army has not realistically computed the overall costs involved in relocating all the tenants of the CAC. The staff believes the Army should reevaluate this entire proposal and that any decision to move the Q.M.F. & C.I. from Chicago should be predicated upon locating that facility where it can best perform its mission.

We agree with the staff's conclusion. We think the Institute should be where it can best perform its mission, and on two different occasions the House declared that its mission can best be performed in the city of Chicago, Ill., in the district represented so ably by the distinguished gentleman from Illinois [Mr. KLUCZYNSKI].

Various gentlemen who have taken the floor said there has been no lobbying for this move to Natick, Mass. Why did Dr. Abrams call to a Member from Wisconsin and ask him to change his vote and vote for this proposal. Can it truly be said there has been no lobbying?

Mr. BATES. I would suspect he was interested in correct action.

Mr. YATES. He was interested in sustaining his own inadequate report. Dr. Abrams told me personally it would take at least a month to prepare an adequate survey, and he nevertheless bowed to the pressure applied by the Secretary of the Army and made his report within a week of having received the request to make the survey. All he did was to review in one week the surveys that had already been taken. It was not an independent survey of his own. He approved the surveys that had already taken place and made no new investigation of his own.

Mr. BATES. Mr. Speaker, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Massachusetts.

Mr. BATES. The gentleman selected the board in the first place.

Mr. YATES. That is true. We wanted a fair study, however, and we never received a fair one. We were brushed off by Dr. Abrams and his group. I can only conclude that his decision had been made before he began his week's work. He never gave us an adequate or fair opportunity to present Chicago's side of the story. Mr. Speaker, we have already gone into all of the arguments. There has been nothing new presented since this matter was before the House on July 25. The argument of the gentleman from Massachusetts and the arguments on the other side were presented to the House at that time.

Mr. JONAS. Mr. Speaker, will the gentleman yield?

Mr. YATES. I yield to the gentleman from North Carolina.

Mr. JONAS. There has been one significant thing that happened since.

Mr. YATES. What is that?

Mr. JONAS. The other coordinate branch of the Congress has acted differently.

Mr. YATES. I agree.

Mr. JONAS. I do not agree necessarily that we have to follow the other body, but it does bring new light on the question. The views of the other body certainly are worthy of consideration.

Mr. YATES. I thank the gentleman for his statement, but I will say to him that it brings no new light on this matter at all. This is just another instance where the other body has acted erroneously, and the House of Representatives must correct the action of the other body.

Mr. Speaker, I urge the House to approve the motion of the committee of conference.

Mr. SHEPPARD. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. SHEPPARD].

The question was taken; and on a division (demanded by Mr. JONAS) there were—ayes 40, noes 43.

Mr. YATES. Mr. Speaker, I object to the vote on the ground that a quorum is not present, and make the point of order that a quorum is not present.

The SPEAKER pro tempore (Mr. MILLS). Under order of the House of September 1, further proceedings on this matter will go over until Wednesday next.

The gentleman withdraws his point of order that a quorum is not present?

Mr. YATES. I do, Mr. Speaker.

GENERAL LEAVE TO EXTEND REMARKS

Mr. SHEPPARD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks in the RECORD on the conference report just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

DISTRICT OF COLUMBIA DAY

The SPEAKER pro tempore. This is District of Columbia day. The Chair recognizes the gentleman from South Carolina [Mr. MCMILLAN].

REGULATING THE PRACTICE OF PHYSICAL THERAPY IN THE DISTRICT OF COLUMBIA

Mr. MCMILLAN. Mr. Speaker, I call up the bill (S. 1762) to regulate the practice of physical therapy in the District of Columbia, and ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

Mr. KEARNS. Mr. Speaker, reserving the right to object, I want to concur with the request of the distinguished gentleman from South Carolina in calling up the Senate version of this bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Physical Therapists Practice Act."

DEFINITIONS

SEC. 2. As used in this Act—

(a) The term " Commissioners" means the Commissioners of the District of Columbia sitting as a board, or their authorized agent or agents.

(b) The word "she" and the derivatives thereof shall be construed to include the word "he" and the derivatives thereof.

(c) The term "physical therapy" means the treatment of human disability, injury, or disease by supervised therapeutic procedures embracing the specific scientific application of physical measures to secure the functional rehabilitation of the human body. Nothing in this Act shall be construed as authorizing a physical therapist, whether registered or not, to practice medicine, osteopathy, chiropractic, naturopathy or any other form or method of healing.

(d) The term "physical therapist" means a person who practices physical therapy under the prescription, supervision, and direction of a person licensed to practice under the Healing Arts Practice Act of the District of Columbia, approved February 27, 1929 (45 Stat. 1326), as amended.

(e) The word "State" or "States" shall be deemed to include any territory of the United States and the Commonwealth of Puerto Rico.

EXEMPTION FROM REGISTRATION

SEC. 3. This Act shall not apply to any person employed in the District of Columbia by the Federal Government or any agency thereof while such person is acting in the discharge of her official duties.

REGISTRATION

SEC. 4. (a) No person shall practice physical therapy in the District of Columbia unless (1) she is duly registered in accordance with the provisions of this Act, or (2) is exempted from such registration by the terms of this Act.

(b) No person not registered in accordance with the provisions of this Act, unless exempted from registration by the terms of this Act, shall, directly or indirectly, (1) represent herself to be so registered or (2) represent herself to be certified, licensed, or authorized to practice physical therapy.

(c) No person shall use in connection with her name the words "physical therapist", "physiotherapist", "physical therapy technician", or use the initials "P.T.", "P.T.T.", "R.P.T.", or any other letters, words, abbreviations, or insignia indicating or implying that she is a registered physical therapist, unless such person is a holder of a valid registration under this Act.

(d) Nothing in this section shall prohibit any person duly licensed or registered in the District of Columbia under any other Act from engaging in the practice for which she is duly registered or licensed.

(e) Nothing in this Act shall apply to any person licensed under the Healing Arts Practice Act of the District of Columbia, nor to any employee of any such person working under his immediate supervision and direction in his private office, provided no such employee shall hold herself out, or otherwise represent herself to be a physical therapist.

POWERS OF COMMISSIONERS

SEC. 5. The Commissioners are hereby vested with full power and authority to delegate, from time to time, to their designated agent or agents, any of the functions vested in them by this Act.

ESTABLISHMENT OF BOARD

SEC. 6. The Commissioners may establish a physical therapists examining board to perform any of the functions vested in the Commissioners by this Act, and, if so established, such board shall be composed of such persons possessing such qualifications as the Commissioner shall determine. The Commissioners are authorized to prescribe the terms of office of members of such board and to fix the compensation of such members. The Commissioners may appoint as members of such board, Federal and District government employees, and such members shall not be entitled to receive compensation as board members, and any such member shall not be debarred by such membership from employment in the Federal or District governments not inconsistent with her duties as a board member. Any board member may receive her compensation as a board member as well as any retirement pay, retirement compensation, or annuity to which she may be entitled on account of previous service rendered to the United States or the Distirct of Columbia governments.

POWERS AND DUTIES

SEC. 7. (a) The Commissioners are authorized to adopt from time to time and prescribe such rules and regulations as may be necessary to enable them to carry into effect the provisions of this Act. The Commissioners shall maintain a register of all persons registered as physical therapists. The Commissioners shall maintain a register of approved schools which they deem afford adequate training in physical therapy.

(b) The Commissioners may make such studies and investigations, and obtain or require the furnishing of such information under oath or affirmation or otherwise, as they deem necessary or proper to assist them in prescribing any regulation or order under this Act, or in the administration and enforcement of this Act, and regulations and orders thereunder. For such purposes, the Commissioners may administer oaths and affirmations, may require by subpena or otherwise the attendance and testimony of witnesses and the production of documents at any designated place. In the event of contumacy or refusal to obey any such subpena or requirement under this section, the Commissioners may make application to the municipal court for the District of Columbia for an order requiring obedience thereto. Thereupon the court, with or without notice and hearing, as it in its discretion may decide, shall make such as is proper and may punish as a contempt any failure to comply with such order in accordance with the provisions of subsection (c), section 5, of the Act of April 1, 1942 (56 Stat. 193, chapter 207; sec. 11–756(c), D.C. Code, 1951 edition).

REGISTRATION

SEC. 8. The Commissioners shall register as physical therapists all applicants who prove to the satisfaction of the Commissioners their fitness for registration under the terms of this Act. The Commissioners shall issue to each person registered a certificate of registration, which shall be prima facie evidence of the right of the person to whom it is issued to represent herself as a registered physical therapist, and authorized to practice as such under this Act.

REGISTRATION WITHOUT EXAMINATION

SEC. 9. The Commissioners shall register as a physical therapist, without examination,

any physical therapist who is at least twenty years of age and of good moral character and who presents evidence satisfactory to the Commissioners that she was, prior to the effective date of this Act, practicing physical therapy in the District of Columbia for a period of two years immediately preceding the effective date of this Act, and that she (1) has graduated from an approved school of physical therapy listed in the register of approved schools or (2) received comparable training or experience in the practice of physical therapy as determined by the Commissioners. Application for registration under this section shall be made on or before the expiration of one year from the effective date of this Act.

REGISTRATION AFTER EXAMINATION

SEC. 10. The Commissioners shall pass upon the qualifications of applicants for registration, provide for and conduct all examinations, determine which applicants have successfully passed the examination and duly register such applicants. To be eligible to be examined for registration as a physical therapist, an applicant must meet the following requirements:

(a) Be at least twenty years old.

(b) Be of good moral character.

(c) Be in good physical and mental health, as certified by a physician licensed to practice in the District of Columbia.

(d) Be a graduate of an approved school of physical therapy listed in the register of approved schools; or possess comparable educational qualifications as determined by the Commissioners.

The examinations specified in this section shall be conducted at such times and places as the Commissioners may determine, and notice of time and place of such examination shall be published not less than thirty days before the first day of each examination in one or more newspapers of local circulation.

The examination shall embrace such coverage of the following subjects to determine the applicant's qualification: The applied sciences of anatomy, neuroanatomy, kinesiology, physiology, pathology, physics; "physical therapy" as defined in this Act, applied to medicine, neurology, orthopedics, pediatrics, psychiatry, surgery; medical ethics; technical procedures in the practice of "physical therapy" as defined in this Act.

RECIPROCITY

SEC. 11. Any applicant who has practiced physical therapy and has been registered, certified, or licensed as such in any State may, upon proof of good moral character, be registered without examination, provided the applicant has graduated from a school of physical therapy approved by the Commissioners, or has received competent comparable training as determined by the Commissioners. It is intended that the standards of education and training required for registration under this section shall be substantially equivalent to those required for registration pursuant to section 10 of this Act. This section shall be construed to apply only to candidates from States which admit registered physical therapists of the District of Columbia without examination.

RENEWAL OF REGISTRATION

SEC. 12. (a) Every registered physical therapist engaged in or who proposes to engage in the practice of physical therapy in the District of Columbia is hereby required to register with the Commissioners annually. Any registrant who allows her registration to lapse by failing to renew the registration annually may be reinstated by the Commissioners by showing cause satisfactory to the Commissioners for such failure and upon payment of all required fees. The Commissioners are authorized, after public hearing, to change from time to time the period for which registration or renewal thereof may be issued.

(b) Any person registered under the provisions of this Act but not so practicing in the District of Columbia shall give written notice of such fact to the Commissioners. Upon receipt of such notice, the Commissioners shall place the name of such person upon the nonpracticing list. While remaining on such list, such person shall not be subject to the payment of any renewal fee and shall not hold herself out as a registered physical therapist nor practice as such in the District of Columbia. Application for renewal of registration and payment of renewal fee for the current year shall be made to the Commissioners by any such person desiring to resume practice as a registered physical therapist.

DENIAL, REVOCATION, AND SUSPENSION OF REGISTRATION

SEC. 13. The Commissioners are authorized and empowered to deny, revoke, or suspend any registration or certificate of renewal of registration issued by the Commissioners or applied for in accordance with the provisions of this Act if the applicant or holder thereof—

(1) has been guilty of fraud or deceit in procuring or attempting to procure any registration or renewal thereof provided for in this Act;

(2) has been convicted of a crime involving moral turpitude;

(3) is an intemperate consumer of intoxicating liquors or is addicted to the use of habit-forming drugs;

(4) has been guilty of unprofessional conduct;

(5) has willfully violated any of the provisions of this Act, or rules or regulations promulgated by the Commissioners pursuant to authority contained in this Act;

(6) is mentally incompetent;

(7) is guilty of undertaking to treat ailments of human beings other than by physical therapy as authorized by this Act, or the undertaking to practice physical therapy independent of the prescription and direction of a person appropriately licensed to practice under the Healing Arts Practice Act of the District of Columbia; or

(8) is otherwise professionally incapacitated.

Provided, That such denial, revocation, or suspension shall be made only upon specific charges in writing. A copy of any such charges and at least ten days' notice of the hearing of the same shall be mailed to the holder of or applicant for such registration, addressed to her at her last known address.

COURT REVIEW

SEC. 14. Any person aggrieved by any final decision or final order of the Commissioners denying, suspending, or revoking any registration, or renewal of registration, issued or applied for under this Act may obtain a review thereof in the municipal court of appeals for the District of Columbia, and may seek a review by the United States Court of Appeals for the District of Columbia Circuit of any judgment of the municipal court of appeals entered pursuant to its review of any such decision or order, all in accordance with subsection (f) of section 7 of the Act approved April 1, 1942, as added by the Act approved August 31, 1954 (68 Stat. 1049).

UNAUTHORIZED PRACTICE OF PHYSICAL THERAPY

SEC. 15. It shall be unlawful for any person in the District of Columbia to—

(a) sell or fraudulently obtain or furnish any diploma, license, certificate of registration, or record required by this Act, or required by the Commissioners under authority of this Act, or aid or abet in the selling, fraudulently obtaining, or furnishing thereof;

(b) practice physical therapy under cover of any diploma, certificate of registration, or record required by this Act or required by the Commissioners under authority of this Act, illegally or fraudulently obtained or signed or issued unlawfully or under fraudulent registration;

(c) use in connection with her name any designation tending to imply that she is a registered physical therapist unless duly registered under provisions of this Act;

(d) practice physical therapy during the time her registration shall be suspended or revoked.

PRACTICE OF REGISTERED PHYSICAL THERAPISTS

SEC. 16. A person registered under this Act as a physical therapist shall not treat human ailments by physical therapy or otherwise except under the prescription and direction of a person duly licensed or registered under the Healing Arts Practice Act of the District of Columbia.

ENFORCEMENT

SEC. 17. Any person who shall violate the provisions of section 4, 15, or 16 of this Act shall be guilty of a misdemeanor and shall be punished by a fine of not exceeding $500 or by imprisonment for not more than one year, or both.

CONDUCT OF PROSECUTIONS

SEC. 18. (a) Prosecutions for violations of any provisions of sections 4, 15, or 16 of this Act shall be conducted in the name of the District of Columbia in the municipal court for the District of Columbia, by the Corporation Counsel or any of his assistants.

(b) It shall be necessary to prove in any prosecution or hearing under this Act only a single act prohibited by law or a single holding out or an attempt without proving a general course of conduct in order to constitute a violation.

FEES AND CHARGES

SEC. 19. (a) The Commissioners are authorized and empowered, after a public hearing, to fix and, from time to time increase or decrease, fees for any services rendered under this Act. The Commissioners shall, pursuant to this section, increase, decrease, or fix fees in such amounts as will, in the judgment of the Commissioners, approximate the costs to the District of Columbia of administering this Act: *Provided*, That no fee shall be increased, decreased, or fixed except after a public hearing.

(b) Upon the change of a registration period as authorized by subsection (a) of section 12 the fee for registration or renewal of registration shall be prorated on the basis of the time covered.

(c) All moneys collected for fees and charges made pursuant to authority contained in this Act shall be paid into the Treasury to the credit of the District of Columbia.

SEVERABILITY

SEC. 20. If any provision of this Act, or the application thereof to any person or circumstance, is held invalid, the remainder of the Act, and the application of such provision to other persons and circumstances, shall not be affected thereby.

APPROPRIATIONS

SEC. 21. There is hereby authorized to be appropriated out of the revenues of the District of Columbia such sums as may be necessary to pay the expenses of administering and carrying out the purposes of this Act.

REORGANIZATION

SEC. 22. Nothing in this Act shall be construed so as to affect the authority vested in the Board of Commissioners of the District of Columbia by Reorganization Plan Numbered 5 of 1952 (66 Stat. 824). The performance of any function vested by this Act in the Board of Commissioners or in any office or agency under the jurisdiction and control of said Board of Commissioners may be delegated by said Board of Commissioners in accordance with section 3 of such plan.

EFFECTIVE DATE

SEC. 23. This Act shall take effect one hundred and twenty days after funds are appropriated for the purpose of administering the provisions of this Act.

Mr. McMILLAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. McMILLAN. Mr. Speaker, the purpose of this bill is to regulate the practice of physical therapy in the District of Columbia so as to accomplish the following:

First. Provide a prohibition against the practice of physical therapy in the District of Columbia by an individual unless that person is registered under the provisions of this bill or is exempt from registration by the terms of the bill; and

Second. Provide authority for the Commissioners of the District of Columbia to register as physical therapists all applicants who prove to the satisfaction of the Commissioners their fitness for registration under the terms of the bill.

The committee was informed that at the present time in the District of Columbia, a physical therapist is not required to be registered or licensed. Accordingly, it is entirely possible that any person, regardless of his professional ability, may practice physical therapy in the District. This is not the situation in the majority of the States where some form of regulatory action has been provided. A total of 38 States have laws regulating the practice of physical therapy, and 10 other States are in the process of obtaining such legislation. It is of interest to note that both of the adjoining States of Maryland and Virginia require licensing of physical therapist practicing within their jurisdictions.

The committee was also informed that modern medicine has demonstrated to an increasing degree the value of physical therapy in restoring the patient to his previous level of physical activity, or a partial restoration to the level of self-care. It has been demonstrated that many patients suffering from chronic disease or disability, when exposed to long periods of inactivity, have a disability in excess of that caused by the disease or injury per se. Inactivity predisposes muscular stiffness, weakness, and atrophy, softening of the bones, and adversely affects the patient's state of physical and emotional well-being. There is a great need to provide physical therapy treatments on a visiting basis to patients with chronic illness or post-traumatic disability who are outside of the hospitals and are in their homes or other institutions. Each year there is an increasing need for trained and well-qualified physical therapists.

It is obvious to the committee that the citizens of the District of Columbia cannot be expected to differentiate between competent and incompetent practitioners of physical therapy. The minimum standards which guarantee safe performance must be required by law in order to protect the citizens of the District of Columbia. Physical therapy treatment should only be entrusted to individuals who have the education, training, and experience that enables them to be thoroughly conversant with modern techniques, as well as precautions and contraindications.

It is contemplated that the act will be self-supporting through the charging of fees necessary to administer the act. However, it is necessary that funds be appropriated for the expenses which are entailed in administering the act since the fees collected have to be covered into the Treasury and cannot be spent until appropriated. It is estimated that the cost of administration of the act will be approximately $3,750 for the first year, and the normal yearly budget thereafter will be approximately $1,000.

This bill is not intended to and does not apply to masseurs, masseuses, or anyone employed by a health club or similar establishment, unless such person be employed as a physical therapist.

This legislation has the approval of the Board of Commissioners for the District of Columbia, the Department of Public Health for the District of Columbia, and the Physical Therapy Association.

The bill was ordered to be read a third time, was read the third time, and passed.

A similar House bill (H.R. 8984) was laid on the table.

A motion to reconsider was laid on the table.

AMENDING THE ACT TO REGULATE THE HEIGHT OF BUILDINGS IN THE DISTRICT OF COLUMBIA

Mr. McMILLAN. Mr. Speaker, I call up the bill (S. 1529) to amend the act entitled "An act to regulate the height of buildings in the District of Columbia," approved June 1, 1910, as amended.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That paragraph 3 of section 5 of the Act entitled "An Act to regulate the height of buildings in the District of Columbia", approved June 1, 1910, as amended (36 Stat. 452; 43 Stat. 961; sec. 5–405, D.C. Code, 1951 edition), is amended by striking "over eight stories in height or".

Mr. McMILLAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. McMILLAN. Mr. Speaker, the purpose of this bill is to amend the act to regulate the height of buildings in the District of Columbia, approved June 1, 1910, so as to provide a more uniform, modern height limitation on buildings in medium- and high-density apartment areas of the District of Columbia, by eliminating the eight-story height limitation on apartment buildings constructed in the District of Columbia.

The bill was introduced at the request of the Board of Commissioners. A letter dated March 28, 1961, accompanying the draft bill, setting forth in detail the views of the Board of Commissioners, is quoted in part, as follows:

The present height limitation contained in section 5 of the act approved June 1, 1910, as amended, states that "* * * no building shall be erected * * * over 8 stories or over 90 feet in height * * *." The proposed amendment would eliminate the words "over 8 stories in height or," thus leaving the requirement to read: "* * * no building shall be erected * * * over 90 feet in height." This use of height limitations expressed in terms of maximum feet rather than maximum stories is in harmony with modern zoning language and practice. Indeed, the section proposed to be amended by this bill is the only section in the act which expresses its requirements in terms of maximum stories. All other provisions refer to maximum footage.

Under the District Building Code the minimum ceiling height of a habitable story is 8 feet. Thus the proposed amendment would increase the number of stories permitted in an apartment building 90 feet high from 8 to 10, with no increase in the overall bulk of the building.

The Commissioners are informed by the District zoning authorities that an increase from 8 to 10 stories within the framework of a 90-foot apartment building would result in the following advantages:

1. Simplication in drawing and processing construction plans.
2. Lower building costs per living unit.
3. Uniformity with the requirements in special purpose districts, which presently permit 10 stories under identical bulk and height requirements.
4. Decreased lot coverage, with increased light and air.

Although the geographical areas affected by the proposed amendment comprise only about 2 percent of the District's zoned area, the Commissioners are informed by the zoning authorities that the amendment is highly desirable to implement one of the Zoning Commission's most important programs—construction of high-density apartment buildings peripheral to the central business district. Apartments of this nature, it is believed, would ease the transportation problem, combat in part the flight to the suburbs, and increase tax revenues as a result of the minimum capital outlay necessary for municipal services in apartment areas of this type.

The bill was ordered to be read a third time, was read the third time, and passed.

A similar House bill (H.R. 9009) was laid on the table.

A motion to reconsider was laid on the table.

EXEMPTING FROM TAXATION CERTAIN PROPERTY OF THE ARMY DISTAFF FOUNDATION

Mr. McMILLAN. Mr. Speaker, I call up the bill (H.R. 2838) to exempt from taxation certain property of the Army Distaff Foundation.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That parts of the tract of land known as "Poor Tom's Last Shift" described as follows: Beginning for the same at the intersection of the westerly line of Oregon Avenue, formerly Daniels Road, and southerly line of Tennyson Street, both as dedicated and shown on plat

recorded in liber 103, folio 157, of the records of the Office of the Surveyor of the District of Columbia and running thence southwesterly along said westerly line of Oregon Avenue as shown on said plat, and as shown on plat record in liber 88, folio 34, of said surveyor's office records to a point of curve; thence southwesterly still along the said westerly line of Oregon Avenue and the northwesterly line of Nebraska Avenue, both as shown on said plat recorded in liber 88, folio 34, of said surveyor's office records, on the arc of a circle deflecting to the right, the radius of which is 440 feet, an arc distance 370.23 feet to a point of tangent; thence southwesterly along said northwesterly line of Nebraska Avenue to the northerly line of Stephenson Lane, as dedicated and shown on plat recorded in liber 116, folio 175, of said surveyor's office records; thence along said northerly line of Stephenson Lane, north 65 degrees 55 minutes 50 seconds west 176.66 feet to a point of curve; thence northwesterly on the arc of a circle deflecting to the left, the radius of which is 460 feet, an arc distance of 144.87 feet to a point of tangent; thence north 83 degrees 58 minutes 30 seconds west 159.38 feet to a point of a curve; thence westerly on the arc of a circle deflecting to the right, an arc distance of 237.18 feet to the most southerly corner of the land conveyed to George L. Quinn and wife by deed dated May 26, 1941, and recorded June 3, 1941, in liber 7622, folio 349, among the land records of the District of Columbia; thence northeasterly and parallel with Twenty-ninth Street 400 feet to the most easterly corner of the land conveyed to Edwin S. Hoffman and wife by deed dated June 9, 1937, and recorded July 22, 1937, in liber 7133, folio 233, among the land records of the District of Columbia; thence northwesterly along the northeasterly line of said conveyance to Hoffman, 125 feet to the southeasterly line of Twenty-ninth Street as dedicated and shown on plat recorded in liber 102, folio 59, of said surveyor's office records; thence along the said line of Twenty-ninth Street north 44 degrees 58 minutes 30 seconds east 373.83 feet to the said southerly line of Tennyson Street, and thence east along said southerly line of Tennyson Street 726.83 feet to the place of beginning, situated at 6200 Nebraska Avenue Northwest, in the city of Washington, District of Columbia, owned by the Army Distaff Foundation, is hereby exempt from all taxation so long as the same is owned and occupied by the Army Distaff Foundation, and is not used for commercial purposes, subject to the provisions of sections 2, 3, and 5 of the Act entitled "An Act to define the real property exempt from taxation in the District of Columbia", approved December 24, 1942 (56 Stat. 1091; D.C. Code secs. 47–801b, 47–801c, 47–801e).

Mr. McMILLAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. McMILLAN. Mr. Speaker, this bill would exempt that property known for assessment and real property tax purposes as parcels 62/41, 62/64, 62/98, and 62/99, located at 6200 Nebraska Avenue NW., so long as the same is owned by the Army Distaff Foundation and is not used for commercial purposes. The exemption so conferred would be subject to the provisions of sections 2, 3, and 5 of the act entitled "An act to define the real property exempt from taxation in the District of Columbia," approved December 24, 1942 (56 Stat. 1091; secs. 47–801b, 47–801c, and 47–801e, District of Columbia Code, 1951).

The Army Distaff Foundation was incorporated on February 13, 1959, under the provisions of title 29, section 601, District of Columbia Code, 1951. Paragraph 3, subsection (a) of the certificate of incorporation of the foundation, states that the foundation was incorporated:

(a) To provide elderly persons on a nonprofit and charitable basis with housing facilities and services specially designed to meet the physical, social, and psychological needs of the aged, and contribute to their health, security, happiness, and usefulness in longer living. The corporation shall be operated exclusively for charitable purposes and no part of its net earnings shall inure to the benefit of any officer, member, or employee of the corporation, or to the benefit of any individual; and no officer, member, or employee of the corporation, and no individual shall receive or be entitled to receive any pecuniary profit from the operation of the corporation except reasonable compensation for services.

The Army Distaff Foundation on July 27, 1959, in order to accomplish the objects set out in its certificate of incorporation acquired the property described, supra. The Foundation proposes to erect on this property a three-story apartment building containing 300 units, consisting of 30 two-room units, 111 bed-alcove units, 105 single-room units, all with pullman-kitchen and bath, and 36 rooms without kitchen facilities. The main building will also include a dining room with a seating capacity of 300, a chapel for private meditation and public services, as well as an infirmary wing with resident nurses, doctors' offices, and treatment and examining rooms. Walter Reed Hospital will treat any serious cases of illness should they develop. There is a residence on the grounds which will be retained to serve as an administrative center for the proposed residence hall.

The present assessed value of parcels 62/41, 62/64, 62/98, and 62/99, which includes both lands and improvements, is $189,403. The total tax on this property at the current rate is $4,356.26. The enactment of H.R. 2838 will, therefore, considerably increase the present loss of real estate taxes to the District as a consequence of special tax-exemption statutes.

This legislation was considered at a meeting of the House District Committee on September 7, 1961, and reported by a unanimous vote of the committee.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUTHORIZING THE PHILADELPHIA, BALTIMORE & WASHINGTON RAILROAD CO. TO CONSTRUCT, MAINTAIN, AND OPERATE BRANCH SIDINGS OVER FIRST STREET SW., IN THE DISTRICT OF COLUMBIA

Mr. McMILLAN. Mr. Speaker, I call up the bill (H.R. 9080) to authorize the Philadelphia, Baltimore & Washington Railroad Co. to construct, maintain, and operate branch sidings over First Street SW., in the District of Columbia.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Philadelphia, Baltimore, and Washington Railroad Company is hereby authorized to construct, maintain, and operate at grade two branch sidings from its present tracks in square 607 over First Street to square 663 between S and T Streets Southwest, Washington, District of Columbia. Such sidings shall be constructed in accordance with plans approved by the Commissioners of the District of Columbia.

SEC. 2. Congress reserves the right to alter, amend, or repeal this Act.

Mr. McMILLAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. McMILLAN. Mr. Speaker, the purpose of the bill is to authorize the Philadelphia, Baltimore, & Washington Railroad Co. to construct in the District of Columbia two railroad sidings to provide access to square No. 663, bounded by First and One-half Streets and S and T Streets SW. Previously the railroad was provided access to the adjoining square, No. 607, immediately to the west across First Street SW., by a siding entering from tracks already in the bed of Second Street SW.

This legislation is necessary because the Commissioners of the District of Columbia, absent congressional authorization, do not have the authority to permit a railroad siding to cross a public street. Further, the use of square No. 663 is urgently needed by the railroad for ground storage of construction materials for the House of Representatives Office Building No. 3, and to replace and supplement such storage facilities lost by the railroad in acquisition of land by the Redevelopment Land Agency for the Southwest urban renewal program.

Under the terms of the bill, the sidings will be constructed in accordance with plans to be approved by the Commissioners and subject to the terms and conditions of a permit issued by them.

The committee is advised that the District of Columbia has no objection to the enactment of this legislation.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

TO AMEND THE LAW RELATING TO GAMBLING IN THE DISTRICT OF COLUMBIA

Mr. McMILLAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 4669), with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 2, line 25, strike out all after "auction." over to and including line 6 on

page 3 and insert: "The proceeds of the sale of such property shall be available, first for the payment of all expenses incident to such sale; and, second, for the payment of such liens; and the remainder shall be deposited in the Treasury of the United States to the credit of the District of Columbia. To the extent necessary, liens against said property so forfeited shall, on good cause shown by the lienor, be transferred from the property to the proceeds of the sale of the property."

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

Mr. GROSS. Mr. Speaker, reserving the right to object, just what does this bill do, if the gentleman will explain it?

Mr. McMILLAN. Mr. Speaker, I yield to the gentleman from Texas [Mr. DOWDY] the chairman of the subcommittee which handled this bill. The gentleman from Texas will explain the Senate amendment.

Mr. DOWDY. Mr. Speaker, this bill provides for the disposition of equipment that is seized in gambling raids.

Mr. GROSS. Are you going to give it to charity, or what happens to it?

Mr. DOWDY. It provides for the destruction of such parts of equipment that are illegal. The other is sold. I believe it goes into the Treasury.

Mr. GROSS. Mr. Speaker, I withdraw my reservation.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

TO AMEND THE LAW RELATING TO INDECENT PUBLICATIONS IN THE DISTRICT OF COLUMBIA

Mr. McMILLAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 4670) to amend the law relating to indecent publications in the District of Columbia, with a Senate amendment thereto, disagree to the Senate amendment, and request a conference with the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

The Chair hears none, and appoints the following conferees: Messrs. DOWDY, HARSHA, and ST. GERMAIN.

WORKWEEK OF THE FIRE DEPARTMENT OF THE DISTRICT OF COLUMBIA

Mr. JAMES C. DAVIS. Mr. Speaker, I call up the bill (S. 1292) to amend the act of June 19, 1948, relating to the workweek of the Fire Department of the District of Columbia, and for other purposes, and ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

Mr. HOFFMAN of Michigan. Mr. Speaker, reserving the right to object, does the gentleman say this is a good bill?

Mr. JAMES C. DAVIS. It has the approval of the District Committee of the House; and a similar bill has already passed the Senate.

Mr. HOFFMAN of Michigan. Does the gentleman say it is a good bill?

Mr. JAMES C. DAVIS. Yes, indeed, I do.

Mr. HOFFMAN of Michigan. I thank the gentleman.

Mr. KEARNS. Mr. Speaker, further reserving the right to object, I want to concur in what the gentleman from Georgia, [Mr. DAVIS] says, that it is an excellent bill. I think we will be very wise to pass it.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (a) of section 2 of the Act entitled "An Act to amend the Act entitled 'An Act to classify the officers and members of the Fire Department of the District of Columbia, and for other purposes', approved June 20, 1906, and for other purposes", approved June 19, 1948, as amended (sec. 4–404a(a), D.C. Code, 1951 ed.), is amended to read as follows:

"(a) The Commissioners of the District of Columbia are authorized and directed to establish a workweek for officers and members of the firefighting division of the Fire Department of the District of Columbia which will result in an average workweek of fifty-six hours in any complete work cycle: *Provided,* That no workweek shall exceed seventy hours.

"(b) The firefighting division shall operate under a two-shift system and all hours of duty of any shift shall be consecutive.

"(c) The Commissioners of the District of Columbia are further authorized and directed to establish a workweek for officers and members of the Fire Department, other than those in the firefighting division, of forty hours, and the hours of work in such workweek shall be performed on consecutive days in such workweek.

"(d) The days off duty to which each officer or member of the Fire Department is entitled shall be in addition to his annual leave and sick leave allowed by law. In the case of any shift of the Fire Department beginning on one day and extending without a break in continuity into the next day, or in the case of two shifts beginning on the same day, the Commissioners are authorized to designate the shift which shall be the workday, and the entire shift so designated shall be considered the workday for all pay and leave purposes.

"(e) If a holiday shall fall on any day off of any officer or member of the Fire Department, he shall be excused from duty on such other day as is designated by the Commissioners of the District of Columbia, and if he is required to be on duty in lieu of such day off, he shall receive compensation for such duty at the rate provided by law for duty performed on a holiday. When any shift of the Fire Department begins on the day before a holiday and extends without a break in continuity into the holiday, or begins on a holiday and extends without a break in continuity into the next day, the Commissioners of the District of Columbia are authorized to designate either of such shifts as the holiday workday, and the entire shift so designated shall be considered as the holiday workday for all pay and leave purposes. As used in this subsection the word "holiday" shall have the same meaning as such word has in the Act of October 24, 1951 (65 Stat. 607), as amended (sec. 4–808, D.C. Code, 1951 ed.), and as supplemented by the Act of January 11, 1957 (71 Stat. 3; Public Law 85–1)."

SEC. 2. Section 2 of such Act approved June 19, 1948 (62 Stat. 499; sec. 4–404a(b), D.C. Code 1951 ed.), is further amended by redesignating subsection (b) as subsection (f) and by amending the first sentence of subsection (f) as so redesignated to read as follows: "Notwithstanding the provisions of the preceding subsection, whenever the Commissioners declare that an emergency exists of such a character as to necessitate the continuous service of all or some of the officers and members of the Fire Department, the granting of days off shall be suspended during the continuation of such emergency."

SEC. 3. Subsection (e) of the first section of the Act entitled "An Act to provide a five-day week for officers and members of the Metropolitan Police force, the United States Park Police force, and the White House Police force", approved August 15, 1950 (64 Stat. 447), as amended (sec. 4–904, D.C. Code, 1951 ed.), is amended (a) by inserting "the Fire Department of the District of Columbia," after "Metropolitan Police force,"; (b) by striking "Major and Superintendent of Police," and inserting in lieu thereof "Chief of Police, the Fire Chief,"; and (c) by striking therefrom "section 5 of the Act entitled 'An Act to fix the salaries of officers and members of the Metropolitan Police force and the Fire Department of the District of Columbia', approved July 1, 1930, as amended", and inserting in lieu thereof "such section".

SEC. 4. The first section of the Act entitled "An Act to provide for granting to officers and members of the Metropolitan Police force, the Fire Department of the District of Columbia, and the White House and United States Park Police forces additional compensation for working on holidays", approved October 24, 1951 (65 Stat. 607), as amended (sec. 4–807, D.C. Code, 1951 ed.), is amended to read as follows:

"That under regulations promulgated by the Commissioners of the District of Columbia each officer and member of the Metropolitan Police force and of the Fire Department of the District of Columbia when he may be required to work on any holiday, shall be compensated for such duty, excluding periods when he is in a leave status, in lieu of his regular rate of basic compensation for such work, at the rate of twice such regular rate of basic compensation: *Provided,* That for the purpose of this Act, each such officer or member who works eight hours or less on any holiday shall be compensated for such duty in addition to his regular rate of basic compensation for such work, at the rate of one-eighth of his daily rate of basic compensation for each hour so worked, computed to the nearest hour, counting thirty minutes or more as a full hour: *Provided further,* That the total compensation to be paid any such officer or member for duty performed on a holiday shall not exceed an amount equal to twice the daily rate of pay to which such officer or member shall be entitled for performing one regular tour of duty on a day other than a holiday: *And provided further,* That no such officer or member shall be entitled to additional compensation for such holiday work for any day for which he is entitled to receive additional compensation under the provisions of subsection (e) of the first section of the Act approved August 15, 1950 (64 Stat. 447), as amended (sec. 4–904, D.C. Code, 1951 ed.). So much of the compensation for such holiday work as is in excess

of the regular pay for such day shall not be considered as salary for the purpose of computing deductions for life insurance or for computing annuity payments under the provisions of the Policemen and Firemen's Retirement and Disability Act (39 Stat. 718, 71 Stat. 391; sec. 4–521, et seq., D.C. Code, 1951 ed.), nor shall such excess compensation be subject to deduction as provided in such Act. Appropriations for personal services for the Metropolitan Police force, the Fire Department of the District of Columbia, the White House Police force, and the United States Park Police force shall be available for payment of the additional compensation authorized by this Act."

SEC. 5. Clause (D) of subsection (b) of section 405 of the District of Columbia Police and Firemen's Salary Act of 1953, as amended (67 Stat. 76; D.C. Code, sec. 4–821), is amended to read as follows:

"(D) In the case of the Metropolitan Police force, except with respect to computation of holiday pay, a biweekly rate shall be divided by the number of hours constituting the biweekly tour of duty in order to derive an hourly rate.

"(E) In the case of the firefighting division of the Fire Department of the District of Columbia, except with respect to computation of holiday pay, the weekly or biweekly rate shall be divided by 56 or 112, as the case may be, to derive an hourly rate.

"(F) In the case of officers and members of divisions of the Fire Department of the District of Columbia other than the firefighting division, except with respect to computation of holiday pay, a biweekly rate shall be divided by the number of hours constituting the biweekly tour of duty in order to derive an hourly rate."

SEC. 6. (a) For the purpose of recording annual and sick leave on an hourly basis for officers and members of the firefighting division of the Fire Department of the District of Columbia, the workday of any workweek shall be considered to be twelve hours.

(b) For the purposes of recording on an hourly basis annual and sick leave taken by officers and members of the firefighting division, the following formula shall be used:

(1) During the day shift of ten hours, one and two-tenths hours of leave shall be charged for each hour taken.

(2) During the night shift of fourteen hours, twelve-fourteenths of an hour of leave shall be charged for each hour taken, caiculated to the nearest fractional tenth.

SEC. 7. This Act shall take effect on the first day of the first full pay period which begins at least sixty days after the date of approval of this Act.

Mr. JAMES C. DAVIS. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JAMES C. DAVIS: On page 2, line 5, strike out the word "seventy" and insert "seventy-two".

The amendment was agreed to.

Mr. JAMES C. DAVIS. Mr. Speaker, the purpose of this bill, as amended and reported by the committee, is to reduce the present 60-hour workweek of officers and members of the firefighting division of the Fire Department of the District of Columbia to a 56-hour average workweek.

In recent years there has been an established national trend toward reducing the working hours of the Nation's firefighters. A survey conducted in the year 1950 of the Nation's 20 largest cities reveals that the average workweek for the firefighters was 60.5 hours. As of now, the average workweek for these same cities has been reduced to 54 hours. In the tabulation set forth below, these 20 cities are listed along with the average workweek that has been implemented for the firefighting personnel of their fire departments:

	Workweek hours
St. Louis, Mo	60
Milwaukee, Wis.[1]	63
Los Angeles, Calif	62
Houston, Tex	60
Minneapolis, Minn	60
New Orleans, La	60
Washington, D.C.	60
Cleveland, Ohio[1]	56
Baltimore, Md	56
Detroit, Mich	56
Kansas City, Mo	56
San Francisco, Calif	56
Chicago, Ill.[1]	56
Cincinnati, Ohio[1]	56
Pittsburgh, Pa.[1]	52
Boston, Mass	48
Philadelphia, Pa	48
Seattle, Wash	48
Buffalo, N.Y.[1]	44
Newark, N.J	42
New York, N.Y	40

[1] Cities (6) which have reduced firefighters' workweek hours since Apr. 1, 1959.

From the foregoing it is apparent that the proposed 56-hour work for the officers and members of the District of Columbia Fire Department will bring the Nation's Capital more favorably in balance with the cities that have already reduced the workweek of their firefighting forces.

The District's Fire Department at the present time has a total strength of 1,133 uniformed officers and privates. Of this total figure, 1,062 members are assigned to the firefighting division, and this is the class of personnel that will have their workweek reduced by the provisions of this bill. Their salaries will not be affected by the shortening of the workweek. The remaining 71 officers and privates, assigned to the nonfirefighting division of the Department, will not be affected inasmuch as they are already working a 5-day, 40-hour week. The activities of the nonfirefighting members of the force relate to communications, training, fire prevention, and maintenance.

Enactment of this bill will cost the District government $377,234—8 months—in fiscal year 1962 and $550,586 for fiscal year 1963. The major portion of the money will be needed to obtain an additional 84 men to augment the existing 1,062 officers and privates of the firefighting force as the existing 60-hour workweek is cut back to the 56-hour workweek.

The committee is of the firm opinion that the reduction of the firefighters' workweek as proposed in the bill, is highly desirable. Of particular import is the fact that the bill will remove in part an inequity that now exists in the matter of total hours worked per week by the officers and members of the District Fire Department, compared to the 40-hour week worked by the other District employees, including members of the Metropolitan Police Department.

During the hearing on the bill, which was held on April 28, 1961, the committee was made fully cognizant that firefighting entails much risk and is one of the most dangerous, hazardous, and arduous occupations. A representative of the Firemen's Association, District of Columbia Local No. 36, International Association of Firefighters, testified at the hearing in favor of this legislation, and in his testimony, attention was directed to a survey of 1,200 cities that revealed the rate of on-the-job injury of firefighters to be six times as great as that of the average American worker. A report was also presented from the Monthly Labor Review of June 1947, that disclosed firefighters led all industrial workers in deaths attributed to cardiovascular diseases. Similarly, other testimony was presented that indicated organic heart disease and cerebral hemorrhage to be a major cause of death of firefighters.

Reducing the workweek for officers and members of the District of Columbia Fire Department to 56 hours will in some measure lessen the exposure time of individual firefighters to inhalation of smoke and gases and also prolonged periods of sudden and violent exertion. In the opinion of the committee, this fact in and of itself may have a beneficial effect on both the mental and physical well-being of the firefighters.

The committee recognizes that the reduced workweek will improve the overall efficiency of firefighters while on duty, as has been the case in industry. It is a commendation of the officers and members of the District of Columbia Fire Department that while working long hours, they have always maintained a highly efficient firefighting operation. The National Board of Fire Underwriters, among major cities, has rated the District of Columbia Fire Department in class I for the past 21 years. This is, indeed, a cherished honor for at the present, only two other cities are included in this category, and one of these has just recently attained the recognition.

The committee, during the hearing on the bill, received supporting testimony for enactment of legislation to reduce the workweek of the District Fire Department, from the International Association of Fire Fighters, the District of Columbia Firemen's Association, Local No. 36, and the Greater Washington Central Labor Council, AFL–CIO. No witnesses appeared in opposition to a shorter workweek.

The committee fully recognizes the importance of a continued effort to reduce the workweek for the officers and members of the District Fire Department. The committee after careful consideration concluded that the 56-hour workweek should be enacted as of now, and that in the next session of Congress careful study should be given to a further reduction of the workweek to 48 hours. The committee thought it unwise to further burden the District government with meeting the expenses incident to any large reduction in the existing workweek of the firemen when the District is at this very time having considerable difficulty in meeting the financial requirements that are already budgeted for fiscal year 1962.

SECTION-BY-SECTION ANALYSIS

The first section reduces the workweek for the firefighting division from 60

hours to 56 hours; it reduces the maximum workweek for other divisions of the Fire Department; and it authorizes the Commissioners to designate the workday shift, and the holiday workday shift when such shifts begin on one day and end on another.

Section 2 authorizes the suspension of granting of days off when an emergency exists necessitating continuous service of all or some of the officers and members of the Fire Department.

Section 3 authorizes members of the Fire Department to volunteer to work on their days off when there are vacancies in the Department.

Section 4 deletes wording in present law so as to conform present law with provisions in the first section of the bill.

Section 5 establishes the formula for computing the hourly rate for the firefighting division of the Fire Department and a formula for the remaining divisions of the Fire Department.

Section 6 establishes a leave formula for the day and night shifts of the firefighting division so as to facilitate the administration of the leave provisions of present law.

Section 7 establishes the effective date of the act to be the first day of the first full pay period beginning at least 60 days after its approval.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 4892) was laid on the table.

JOHN PHILIP SOUSA MEMORIAL

Mr. KEARNS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. KEARNS. Mr. Speaker, I should like to address these remarks to the chairman of the House District Committee, the gentleman from South Carolina [Mr. McMILLAN]. I am wondering if I will be able to get my bill up for the John Philip Sousa Memorial. It was on the calendar 2 weeks ago and was passed over. I would certainly like to have consideration of this bill either on the Consent Calendar or otherwise before adjournment of this body.

Mr. McMILLAN. Mr. Speaker, if the gentleman will yield to me, I can assure the gentleman that nothing would give me more pleasure than to call up his bill and I shall do that as soon as I can get clearance from the Speaker. I hope that will be before adjournment.

Mr. KEARNS. Mr. Speaker, I thank the gentleman.

TO INCREASE RELIEF OR RETIREMENT COMPENSATION OF MEMBERS OF METROPOLITAN POLICE FORCE, FIRE DEPARTMENT OF DISTRICT OF COLUMBIA, ETC.

Mr. JAMES C. DAVIS. Mr. Speaker, I ask unanimous consent for the immediate consideration in the House as in Committee of the Whole of the bill (S. 1528) to increase the relief or retirement compensation of certain former members of the Metropolitan Police force, the Fire Department of the District of Columbia, the U.S. Park Police force, the White House Police force, and the U.S. Secret Service; and of widows and children of certain deceased former officers and members of such forces, department, or service.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

Mr. HOFFMAN of Michigan. Mr. Speaker, reserving the right to object, do these bills that the gentleman is calling up have his personal approval?

Mr. JAMES C. DAVIS. Yes, sir; they do. I would be glad to explain the bill, if the gentleman wishes.

Mr. HOFFMAN of Michigan. No; if they suit the gentleman, it is all right with me.

Mr. JAMES C. DAVIS. Mr. Speaker, I thank the gentleman.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the amount of relief or retirement compensation payable to each officer or member of the Metropolitan Police force, the Fire Department of the District of Columbia, the United States Park Police force, the White House Police force, or the United States Secret Service Division who retired under section 12 of the Act approved September 1, 1916 (39 Stat. 718), as amended, prior to the effective date of the Policemen and Firemen's Retirement and Disability Act Amendments of 1957, approved August 21, 1957, shall be increased 10 per centum beginning on the effective date of this Act.

SEC. 2. Each widow or child who, on or after the effective date of this Act, was receiving or is now receiving or shall hereafter be entitled to receive relief or annuity by reason of service in the Metropolitan Police force, the Fire Department of the District of Columbia, the United States Park Police force, the White House Police force, or the United States Secret Service Division, of a deceased former officer or member who died in the service of any such organization prior to the effective date of the Policemen and Firemen's Retirement and Disability Act Amendments of 1957, approved August 21, 1957 (71 Stat. 391), or who retired prior to such effective date, shall be entitled to benefits computed in accordance with the provisions of subsection (k) of section 12 of the Act approved September 1, 1916 (39 Stat. 718), as amended (sec. 4–531, District of Columbia Code, 1951 ed., supp. VIII).

SEC. 3. Nothing in this Act shall be deemed to reduce the relief or retirement compensation any person receives, or is entitled to receive, on the date of approval of this Act.

SEC. 4. The effective date of this Act shall be the first day of the first month following the date of its approval.

Mr. JAMES C. DAVIS. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. JAMES C. DAVIS. Mr. Speaker, the purpose of this bill is twofold; it will—

First. Provide a 10-percent increase of present annuity to those former members of the Metropolitan Police force, the Fire Department of the District of Columbia, the U.S. Park Police force, the White House Police force, and the Secret Service, who retired prior to October 1, 1956; and

Second. Extend the benefits of the the Policemen and Firemen's Retirement and Disability Act Amendments of 1957 to the widows and surviving minor children of deceased firemen and policemen, of the various forces, who died prior to the effective date of the 1957 amendments.

Since the present monthly rates for widows and children are $125 for widows and $25 for each child, and since these rates have remained unchanged in a decade, an adjustment for these dependents is overdue. The cost of this section of the bill is estimated to be $4,696,000 for the remainder of the potential life expectancy of widow beneficiaries. At the present time there are 643 widows and 69 dependent children. These benefits will become effective the first day of the month following the date of enactment of this act.

The increased benefits for a widow and one child would rise from the present $150 a month to $200 per month. The formula for computing the increased benefits to such widows and children, follows the civil service formula for similar situations when an employee dies in active duty status. This section of the bill would place on a complete parity the protection accorded the surviving dependents of men who died prior to the effective date of the 1957 amendments and the survivors of men who died after the effective date of the amendments.

Careful consideration was given to the proposition that the retirees who do not have the benefits of the 1957 amendments should be accorded the same benefits as those former members who retired subsequent to the effective date of the 1957 amendments. To do this, however, based on a prospective application, would involve expenditures of a magnitude of over $16 million over the life expectancy of the retirees. It was pointed out that under the equalization clause of the present retirement system, which has been in operation since 1923, automatic increases in retirement annuities occur whenever a pay raise for active members of the force is granted.

The cost of the 10-percent increase is $4,944,000. There are 960 men with 33⅓ years of service or less, 15 men with 34 years of service, 30 men with 35 years or more, who have retired on disability, who will be affected by the passage of this act. There are 64 men with less than 30 years of service, 66 men with 30 or more years of service, who retired voluntarily, who are affected by this bill, making a grand total of 1,135.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

WORK OF HOUSE DISTRICT COMMITTEE, 1ST SESSION OF THE 87TH CONGRESS

Mr. McMILLAN. Mr. Speaker, I ask unanimous consent to address the House for 5 minutes, and revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. McMILLAN. Mr. Speaker, I want to take this opportunity to thank the Members of the House and especially the members of the House District Committee, for the cooperation and assistance they have given me as chairman of the House District Committee during the 1st session of the 87th Congress. The chairman of the House District Committee, as you probably know, is under pressure at all times from the local press to pass legislation that suits them regardless of whether it suits the people of the United States and the residents of the District of Columbia.

During the present session of Congress, my committee has held more hearings and worked longer hours on District legislation than in any previous session that I can remember during the 23 years I have been a member of the House District Committee.

We have spent more than 100 hours in subcommittee and in full committee hearings during the past 8 months. The House, in my opinion, has passed some important legislation vitally affecting the District of Columbia—these include the bills to amend the Mallory ruling and the Durham rule, the voting bill and a number of other pieces of legislation now pending before the other body, including the sales tax bill which the House passed June 27, 1960 and on which no action was taken by the other body before we adjourned September 3, 1960. We again passed the sales tax bill adding 1 cent to the present 2-cent sales tax in March 1961, and during the past 3 weeks the other body passed the sales tax bill and added the following 10 new tax items:

First. Increase present 2-cent sales tax to 3 cents.

Second. Increase cigarette tax from 2 cents to 5 cents per pack.

Third. Increase tax on spirits and alcohol from $1.25 per wine gallon to $2.

Fourth. Make incorporated and unincorporated business income and franchise taxes due and payable in full at time return is filed.

Fifth. New tax on deeds submitted to the Commissioners for recordation, of five-tenths of 1 percent of the consideration for the deed, with a minimum of $1. In absence of a consideration for the deed, tax shall be based upon fair market value. Exempt from this are deeds to properties acquired by District of Columbia or U.S. Government, and properties acquired by certain parties for tax-exempt usages.

Sixth. Authority to Commissioners to increase water rates by not more than 25 percent of rates in effect on January 1, 1961, in increments as required.

Seventh. Authority to Commissioners to increase sanitary sewer service charge from present maximum of 60 percent of the water rate to a maximum of 75 percent, in increments as needed.

Eighth. Increase authorized Federal payments to the District of Columbia general fund from $32 million per year to $36 million.

Ninth. Establish in the highway fund a "Parking fee account," consisting of all parking meter revenues and money now accumulated by the Motor Vehicle Parking Agency. This money to be used to maintain District of Columbia highways, including snow and ice removal—as supplement to, not replacement of, present method of financing highway maintenance—and for acquisition of additional public parking facilities.

Tenth. Include District of Columbia in the program for aid to impacted school areas. This would bring about $5 million annually from an HEW grant.

We, of course, do not have time before adjournment to hold hearings on all 10 of the items added by the other body and the people affected by these new proposed taxes should be given an opportunity to be heard before they are required to pay an additional tax.

If the District government is so much in need of additional revenue, it seems to me that they would urge the passage of the sales tax bill which we passed here in the House in June 1960 which has been almost 14 months, and which by this time would have collected approximately $12 million. This new 1-cent sales tax increase does not cover food and I cannot see why there should be any objections on the part of the people who pay no other type of taxes in the District of Columbia and yet fill our schools and enjoy the protection of the Police and Fire Departments. I should think they would be glad to pay this 3-cent sales tax.

The press has mentioned only slightly two of the additional taxes and they are the cigarette and alcoholic beverage tax, and no liquor wholesaler or retailer has written me objecting to the additional proposed tax on alcoholic beverages. However, the press has intentionally refrained from mentioning the proposed four additional million dollars Federal payment, the $5 million impacted school area item, the additional corporation tax, and real estate sales tax as they know that these taxes would not be popular among the residents of the District of Columbia or the Members of Congress.

I have never refused to go to conference on the sales tax; however, I am of the opinion that the House does not have time to go thoroughly into the additional taxes added by the other body during the past 3 weeks. I am certain that if action had been taken on the additional taxes included by the other body during the month of March when we passed the sales tax bill, my committee would have had time to take action on the 10 additional items included in the sales tax bill.

My committee has been successful in having the House pass more than 30 important bills this year, and these have been pending before the other body for several months. You have heard no objections expressed by the press on this subject; however, when we hold up one bill in the House committee, my name is spread all over the headlines. I will give you the numbers of the bills the House has passed, for the RECORD, some time before the Congress adjourns.

Again, I want to thank every Member of the House for the wonderful cooperation they have given my committee during the 1st session of the 87th Congress.

I am amused at three news items which appeared in the Washington press Sunday, September 10, 1961. One item, written by a Washington Post reporter stated that I was holding up the voting bill. This is absolutely a false statement, as no news reporter has talked to me concerning a national voting bill. I was responsible for having the subcommittee and the full committee report this bill to the floor of the House and was successful in having the House pass this bill on August 14, 1961, and it was immediately referred to the other body for consideration.

I, of course, will immediately appoint conferees if the other body passes a different version of the bill which passed the House. This is the type of reporting we are getting here in the city of Washington, and if I could read once the truth in the Washington press concerning any legislation which comes out of the House District Committee, I think I would have heart failure.

I also noticed another item in the press written by an Evening Star reporter bearing headlines concerning a Capital transit bill which passed the Senate last week. I note that the newspaper gave only about 2 inches space on this bill when it passed the Senate, and did not even give it a title as it was mixed up in a writeup concerning other legislation which has passed the Senate.

I can see nothing unusual about the polling of the committee, as that has always been done since I have been a member of the House District Committee. The committee has always used this method of contacting members to get their views on legislation which has passed the Senate after the House District Committee's last full meeting of the session. I expect to contact the members of my committee concerning all bills which passed the other body since our last full committee meeting in an effort to find out if they desire me to call these Senate-passed bills up on the floor of the House for consideration before we adjourn.

Mr. JAMES C. DAVIS. Mr. Speaker, will the gentleman yield?

Mr. McMILLAN. I yield to the gentleman from Georgia.

Mr. JAMES C. DAVIS. With reference to the statement the gentleman just made, that one of the local papers had attacked him for holding up the voting bill, I would just like to say this: The gentleman has not held up the voting bill. It was referred by him to a subcommittee of which I had the privilege of serving as chairman. That subcommittee held detailed hearings on the bill.

We invited every interested person and every interested organization to appear before the subcommittee to state their views, and many of them did. We held open hearings for days. After that we held executive sessions, wrote up the bill, recommended it to the full committee, the full committee reported it favorably, and it passed this House promptly.

Mr. KEARNS. Mr. Speaker, I ask unanimous consent to extend my remarks at this point.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. KEARNS. Mr. Speaker, under unanimous consent from the House, I extend my remarks following the remarks of the chairman of the full Committee on the District of Columbia, the gentleman from South Carolina, the Honorable JOHN L. MCMILLAN, and those made by the chairman of Subcommittee No. 3, the gentleman from Georgia, the Honorable JAMES C. DAVIS, on which subcommittee I have the honor of serving.

Mr. Speaker, it is my privilege as second ranking member on the full Committee on the District of Columbia, to support the firm statement made by my chairman, the gentleman from South Carolina, the Honorable JOHN L. MCMILLAN, as to our position on legislation affecting the District of Columbia.

Also, I would like in behalf of the gentleman from New Jersey, the Honorable JAMES C. AUCHINCLOSS, the senior member on the committee, to express sincere faith in our chairman, the gentleman from South Carolina, JOHN L. MCMILLAN, and his untiring effort to report to the floor of the House legislation that was essential to the everyday life of our Capital City.

Then, too, I would like to pay tribute to the Members on both sides of the aisle in our committee for their respect and attention to the call of the Chair on the 26 or more bills that we reported, and especially to the gentleman from Georgia, Judge DAVIS, chairman of Subcommittee No. 3, of which I happen to be ranking member. All of these Members put forth every effort to report legislation that was most essential and to the best interests of the citizens of the Nation's Capital.

Chairman MCMILLAN pointed out that it was often a thankless job serving on the District Committee. I agree and I would like to say, as ranking member of the House Committee on Education and Labor, that had before it 54 percent of the administration's entire program, there were many times when it was a problem for me to find time to answer the call of the chairman of the District Committee or of the chairman of Subcommittee No. 3, and to be present when we had important legislation in hearings pertaining to the District of Columbia.

To me, and I am sure Chairman MCMILLAN agrees with me, the way the Congress of the United States works—if you are to be a good Congressman, find time for your assignments—report and do your job most diligently.

Therefore, in behalf of Mr. AUCHINCLOSS and all the Members of the majority and minority, I wish to state that I am personally satisfied that we have served well and have accomplished much under the able leadership of Chairman JOHN L. MCMILLAN.

INDIAN REVOLVING LOAN FUND

Mr. HALEY submitted a conference report and statement on the bill (S. 1540) to amend the law establishing the Indian revolving loan fund.

COL. JOHN R. DEANE

Mr. CAREY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, and revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CAREY. Mr. Speaker, I have no desire to prolong or revive discussion of a most regrettable incident which took place in West Berlin involving a controversial comedian. However, I notice that the Department of the Army has seen fit in the exercise of what it must consider the best dictates of military discipline to admonish the officer of a Berlin task force, Col. John R. Deane. Lest it be possible that Colonel Deane for the moment be better known for this admonition than his outstanding record of military performance I take this time to cite facts from my own personal knowledge which in my opinion mark this fine officer as one of the outstanding combat officers in any sector of our Defense Establishment. Colonel Deane was admonished for the exercise of poor judgment in a most limited instance. I have known Jack Deane since the date of his first assignment as a second lieutenant, graduate of the U.S. Military Academy. I came out of OCS and together we joined the 104th Infantry Division then forming in Oregon, soldiered together, trained together, and I had the opportunity to watch his advance from lieutenant to captain to major to lieutenant colonel, the last two ranks gained in European combat. My deep regard and respect for this officer is based upon personal observation of his exercise of judgment, devotion to duty, and valorous conduct under the most trying conditions. I do not hesitate to state that I would not be here today, nor would many of my comrades of the Timberwolf Division, were it not for the conduct of Colonel Deane. We fought side by side from Normandy to Belgium to Holland to Germany. I was with him when he received the Purple Heart and watched the removal of his unconscious body from a mine field along with that of another who did not survive. Because of these two this field mine was located and saved hundreds of lives and innumerable casualties.

I was with him and saw his performance which earned him the Bronze Star, the Silver Star, and Croix de Guerre. He has since received other decorations by reason of his outstanding command and staff performance in many echelons. I know the commanding general of our division, the great Terry Allen of Texas, shared my pride and satisfaction in the work of John Deane in combat. He is one of the best schooled officers in the Army. Although I am not a graduate of the Military Academy I know his classmates look upon him as one of their outstanding members. With him I attended service schools at Fort Benning, Ga., and elsewhere. His record at the Command and General Staff School at Leavenworth, in airborne training, in the research and development branch of the Army, as an aide to the Secretary of the Army, and on other assignments is most commendable. Those of my colleagues who have had the responsibility of acting as combat commanders in sectors of extreme tension will recognize that the visits of celebrities and VIP's directed from the rear are often an irritation and distraction for any officer whose preoccupation must be with his troops and the enemy situation. I hope the Defense Department will, in the exercise of its judgment, prevent any future occurrences by barring visits of any such persons to military officers who are often defenseless from the rear. I assure my colleagues that on his record and my personal association with John Deane as a friend and comrade of 19 years that our interests in Berlin could be no better served than by having this valorous, dedicated, and capable officer in command of this task force. I hope that when the next occasion for recognition of this fine officer arises that this admonition will be expunged and forgotten by the momentous record which he has to his credit and that his ability to serve his country in higher rank with increased responsibility will not be impaired by this unfortunate incident which was so little of his doing and by reason of which he now suffers this most deplorable, but I hope momentary, notoriety.

WE MUST MEET OUR OBLIGATION

Mr. GEORGE P. MILLER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point and include an editorial.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. GEORGE P. MILLER. Mr. Speaker, I would like to call the attention of the House to an editorial that appeared today in the New York Times. It is an editorial that shows the inherent sense of American fairness that as an American I am proud to hail in a newspaper representing an important sector of American public opinion.

Because I am convinced of the justice of the Philippine war damage claims, I have in years past sponsored bills to fulfill an obligation that we owe the Filipino people. This year I was hoping that we could wipe out that debt. The Filipinos showed their sense of honor when several months ago they paid in full their debt to us of more than $23 million, money that they borrowed from us to use in their fight against communism. We have faith in the wise leadership of President Carlos P. Garcia, who signed the law outlawing the Communist Party from the Philippines and who invited

our Government to establish our missile bases in the Philippines at a time when our NATO allies were against allowing us to have our bases in their respective territories. He has succeeded in placing his country on a sound economic basis.

The Philippine spokesman in this country, Gen. Carlos P. Romulo, has been pleading for the passage of this bill all these years. We all know him and we know what a courageous fighter he has been for freedom. He has repeatedly said—and justly—that "justice delayed is justice denied." We must not disappoint our friends. And the Filipinos should not be made to feel that we are taking them for granted. This impression must not be allowed to gain currency in the Philippines.

That is why an editorial such as that of the New York Times should reassure them that we mean to be fair to them.

AN INJUSTICE TO THE PHILIPPINES

For more than a decade the United States has failed to make good on an obligation to the Philippines for unpaid damages arising out of fighting on Philippine territory during the Japanese war.

An appropriation by Congress in 1946 fell short by $73 million of meeting the total amount of damages. Since 1950 efforts have been made to get congressional authorization for the unpaid portion; but year after year, for one reason or another, Congress has failed to complete the necessary action. This year, as a result of obstruction in Representative HOWARD W. SMITH's Rules Committee, the same old story has been repeated once again.

There is a majority in both the Senate and House for a measure sponsored by Representative ZABLOCKI, of Wisconsin, authorizing the $73 million; the White House and the State Department are emphatically for it, but Representative ZABLOCKI has been unable to get the bill out of Rules. In the recess fever now affecting Congress, the bill has once more been prevented from getting to the floor of the House by an adverse Rules Committee vote.

Philippine patience is justifiably wearing thin. What seems a small matter in this country is a serious cause of national irritation in the Philippines. An aid appropriation is not involved. The most committed and friendly ally of the United States in Asia is simply asking for a sum that we have promised and which is long overdue. Congressional negligence on this matter contrasts sharply with the prompt payment recently by the Philippines of the final $20 million installment on funds advanced by the United States to the Philippine defense forces during and after World War II.

SMALL BUSINESS ADMINISTRATION

Mr. VANIK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. VANIK. Mr. Speaker, it has just come to my attention that a former resident of Cleveland and promoter of a small business investment company known as the Cosmopolitan Small Business Investment Co., Inc., absconded with all of the assets of the small business investment company including $150,000 in Federal funds which this particular small business investment company obtained from the Federal Government through the Small Business Administration.

The Cosmopolitan Small Business Investment Co. was capitalized at $300,000 of which $150,000 was provided by the Small Business Administration. Through astounding circumstances all of the assets were placed in the custody of the promoter who departed the country and took the assets along with him.

I am shocked that this incident was possible. It seems to me that the Small Business Administration must exercise tighter controls with respect to the custody provisions for the assets of small business investment companies, particularly those which include Federal funds. Steps must be taken to insure against repetition of this unfortunate incident.

PROHIBITING ECONOMIC STRIKES

Mr. LANGEN. Mr. Speaker, I ask unanimous consent that the gentleman from Pennsylvania [Mr. KEARNS] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. KEARNS. Mr. Speaker, in 1953 and again in 1955, I introduced bills which would, in effect, prohibit economic strikes unless a majority of the affected employees voted for the strike. Today I am again introducing such a bill.

At this critical time our country can no longer afford the luxury of economic strikes which are unnecessary or against the wishes and better judgment of the employees directly involved. All too often at our missile bases and in our key industries we have seen strikes of this nature called by a union or precipitated by an employer because the will of the majority could not make itself known. The time has come to put an end to such wasteful practices.

Under the provisions of this bill, a union would be prohibited from calling an economic strike unless a majority of the affected employees vote in a secret ballot for such a strike. In the event a strike is called prior to such balloting, or in case a majority of the employees did not vote for such a strike, the employees who go on strike would lose the protection provided by the Taft-Hartley Act. In addition, the union that called such a strike would be committing an unfair labor practice. The National Labor Relations Board would have the authority to order the union to cease and desist and, if necessary, enjoin such a strike by obtaining a 10(j) injunction from the U.S. district court.

At the present time, strikes which are in violation of section 8(d) of the Taft-Hartley Act are processed in this manner by the NLRB. This bill, while providing similar penalties to those set forth in section 8(d), would be coordinated with the provisions of that section. Thus, where there is a collective bargaining agreement the employees would be prohibited from striking until after the 60-day notification period has elapsed and a secret ballot authorizing such strike has been taken.

On the other hand, if the economic demands are supported by a majority of the employees, there will be nothing to prohibit their striking. Moreover, the balloting which conclusively demonstrates such support will also strengthen the union's hand in its negotiations and will help to avoid many strikes that are now caused by an employer's miscalculation.

I believe that the enactment of this bill will signal the return of an essential democratic concept to an area where it is now all too often missing. Moreover, it should dramatically reduce the number of economic strikes that now plague and handicap us.

UNFAIR ATTACK ON LAW-ENFORCEMENT OFFICERS

Mr. LANGEN. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. BECKER] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. BECKER. Mr. Speaker, I am inserting in the RECORD today a letter I have just written to the general manager and editor of United Features Syndicate, Inc., protesting the recent installments in the "Li'l Abner" comic strip. My reason for this protest is due to the offensive, demoralizing, and grossly unfair smear of the Nation's law-enforcement officers.

This comic strip which has depicted police officers taking bribes from criminals and other corrupt practices is one of the most unfair attacks on a great group of dedicated law-enforcement officers throughout our country. Certainly there have been exceptions, but this is true in any walk of life and I do not think a responsible press, and particularly in comic strips, would inject in the minds of children a disrespect for constituted authority.

I am appalled to think that the syndicate or the numerous newspaper publishers would permit this series of scurrilous attacks on our Nation's devoted police officers, Federal, State, and local.

In New York City just this year, several police officers have died in the line of duty and over 1,500 have been attacked, brutally beaten and injured in the line of duty. I believe that more attention should be given to this aspect and the creation in comic strips of respect for law and order and I feel our society would be much bettered thereby.

It is offensive and grossly unfair and I sincerely hope that the letter I have sent protesting this present series will have the desired effect.

The letter follows:

SEPTEMBER 6, 1961.

Mr. LAURENCE RUTMAN,
General Manager and Editor,
United Features Syndicate, Inc.,
New York, N.Y.

DEAR MR. RUTMAN: I am appalled by the recent installments in the "Li'l Abner" comic strip, and I am astounded that any responsible publisher would expose them to the American public.

The conscientious, devoted men who comprise our law-enforcement agencies through-

out the country have earned fairer treatment than you and Mr. Al Capp have afforded them. It must be discouraging, indeed, for those police officers who patrol in front of your home and Mr. Capp's every night to know what little gratitude you have for their vigilance.

The experts tell us that one of the primary causes of juvenile delinquency is that the young offenders lose respect and confidence in constituted authority. I am sure you will agree that the current offerings of Mr. Capp are not doing much to preserve their respect for the integrity of authority.

Very truly yours,

FRANK J. BECKER,
Member of Congress.

THE FEDERAL ROLE IN EDUCATION: A POLICY

Mr. LANGEN. Mr. Speaker, I ask unanimous consent that the gentleman from Michigan [Mr. GRIFFIN] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. GRIFFIN. Mr. Speaker, for the good of education and the Nation, I hope that a recent vote in the House of Representatives has demonstrated to the doubtful that a significant majority in the House of Representatives—who reflect the views of the people—do not believe that the centralized Federal Government should assume a primary or major role in the financing—and control—of elementary and secondary education.

Last week the House voted to extend for 2 years the National Defense Education Act as well as Public Laws 815 and 874, which apply to federally impacted areas. However, a week earlier, the House refused, by an overwhelming vote of 242 to 169, to consider a comprehensive legislative "package" which would have put the Federal Government well on the road toward an all-out, across-the-board program of general Federal aid to elementary and secondary education.

To be sure, the resounding defeat administered to the "foot in the door" general Federal aid package can be attributed in large measure to highhanded procedural tactics which were employed by some Democratic leaders. There are those who believe that the primary purpose of the maneuver was to shift political blame. However, even though the vote may have served that purpose for some, I am convinced that the significance of the vote went beyond a slap at procedural tactics.

In my opinion, the vote in the House registered an underlying, often unexpressed—but deep-seated—conviction on the part of most Members of Congress, and most Americans, that the long-range interests of our Nation will best be served by keeping the primary responsibility for financing—and controlling—elementary and secondary education close to the people, at the State and local levels of government.

This Congress is overwhelmingly controlled by the Democratic Party. The House vote was a reaffirmation, I believe, of a view held by Thomas Jefferson and the Founding Fathers that there are at least some functions of government which are best handled by the people themselves—and should not be delegated to the centralized Federal Government.

If my analysis of the temper of Congress—and of the people—is correct, then education and the Nation as a whole would be greatly benefited by a clear and definitive statement now as to the Federal role in the field of education. Such an enunciation of fundamental policy would be most meaningful and effective if it were to come from the President, as well as from the Congress. Such a declaration should sweep away the cobwebs of confusion and uncertainty by clearly defining and delineating responsibilities in the field of education.

I believe it is time for a clear declaration of policy that in this field the Federal Government will confine its participation primarily to the level of higher education, and that the responsibility for financing and controlling elementary and secondary education does, and should continue to, rest squarely on the State and local levels of government.

Such an enunciation of policy concerning the Federal role in education could serve several important purposes: First, it would spur into action some States and school districts which have been holding back and delaying their efforts because of political promises of Federal aid; second, it would mean that the Federal Government could concentrate its assistance in the area of education where there is now the greatest need; and third, in some measure, significant Federal assistance at the level of higher education should increase the level of funds available at the State and local levels for elementary and secondary education.

As a nation, we desperately need a definitive statement of basic policy delineating the legitimate and proper role of the Federal Government in education. It is apparent that many of those who call themselves liberals do not recognize any limits or bounds concerning the ultimate Federal role in this field. On the other hand, many ultraconservatives are completely unrealistic in their demand and contention that the Federal Government should have no interest and play no part whatsoever in education.

I believe that this somewhat hazy, fuzzy philosophical impasse, which has retarded progress, could best be resolved—and the Nation could get off "dead center" on the Federal aid to education issue—if it were made clear, as matter of national policy, that the major thrust and effort of the Federal Government is to be concentrated in the area of higher education.

There are a number of good reasons why such a national policy would be sound and sensible:

First. Even if it were otherwise appropriate, the Federal Government should not, and could not, assume the gigantic burden of financing education across the board in all its phases and at all levels. The experiences of the recent past have pointed up, it seems to me, that when the Federal Government tries to be the patron of all, it can end up being the benefactor of none.

The cost of education at all levels, and in all its phases, is so great and so burdensome that it should not be shifted, gradually or otherwise, to the Federal Government which already is overburdened with costly functions, many of which cannot be handled at any other level of Government.

Second. The Federal Government may have an indirect interest in education generally, but it has a direct and immediate interest in the products of our colleges and universities. This is obvious when one considers the Federal responsibility in such fields as defense, foreign affairs, and space. From the pool of college-trained people must be recruited the men and women who undertake the tasks which have the highest national priorities.

Third. If the Federal Government does not provide some support in the area of higher education, there is grave risk that such support will not be adequately provided otherwise. In large measure, the task of providing education beyond the high school is performed by institutions which are interstate or national in character. A large percentage of college and university students come from States other than the State in which the institution happens to be located. It is not altogether logical or reasonable to expect local and State governments to provide all of the support needed by such institutions.

I believe it is significant to recognize also that the average local taxpayer feels a sense of direct responsibility to provide adequately for the local elementary school down the block which is attended by his children and his neighbors' children. But he is not so likely to feel the same sense of responsibility with respect to a college or university located in another part of the State.

It is not reasonable, I submit, to expect the States to support completely the vast research programs needed in medicine, science, and other fields, the benefits of which know no State boundaries.

Last year the U.S. Office of Education prepared a study, at the request of the then Secretary of Health, Education, and Welfare Arthur S. Flemming, setting forth the needs and goals in the field of higher education during the next 10 years.

That study documents in sharp detail an impending crisis in higher education. The inevitable consequences of the high birth rate of the midforties, producing a tidal wave of young people, may have strained our elementary and secondary schools but it threatens to inundate our colleges and universities in the next few years.

Here are a few of the facts: College enrollments are expected to increase by more than 1 million during the next 5 years. Colleges will have to recruit more new professional staff in the next 10 years than we now have in the total higher education force of teachers, researchers and administrators. Salary budgets of colleges and universities will have to increase from about $2.8 billion in 1961 to $5.8 billion by 1967. Colleges will have to spend $8.6 billion in the next

5 years on physical plant expansion, renovation and replacement alone.

Significantly, the practical political obstacles to enactment of Federal legislation in this field are not as formidable in the area of higher education. The proponents of all-out, general Federal aid, who have been "beating the drums" for many years, cannot lay their failures at the doorstep of any one political party. It is rather a reflection of the sincere doubt on the part of a majority of our citizens, represented by Members of Congress in both major political parties, concerning the wisdom of transferring to the Federal Government the responsibility of providing general support for our public elementary and secondary schools. The potential dangers—whether real or imagined—of centralized Federal control of education deeply concern many people especially when Federal programs are aimed at our youth in their formative years. The parents of the Nation—with good reason I believe—instinctively insist that control of the education of our young children should be kept close to the home.

It might be noted that the problem of racial segregation is not so much an obstacle to legislation in the field of higher education. There are now only two States in which no progress has been made in the racial desegregation of public institutions of higher education, and every State numbers at least one desegregated private college.

In addition, there is good reason to believe that the constitutional doctrine requiring separation of church and state does not loom so great as an obstacle in the path of Federal assistance at the level of higher education.

The administration's "Memorandum on the Impact of the First Amendment to the Constitution Upon Federal Aid to Education," dated March 28, 1961, contains this interesting analysis:

> There are * * * important differences between school and college, not only in terms of history and tradition but also in terms of the compulsory nature of attendance. There are differences, too, from the standpoint of the national interest involved. At the college and graduate levels the public institutions alone could not begin to cope with the number of young men and women already in pursuit of higher education, and expansion of these institutions or the creation of new ones sufficient to meet the expected increase of enrollment is out of the question. The effort which it is agreed must now be made in the field of higher education would, if confined to public institutions, force an ever more intensive selection of students and ever more concentrated effort to guide them into fields of study deemed important to the national defense and welfare. It would likely induce these institutions to overemphasize particular fields of study to the detriment of a balanced curriculum. Such warping of our educational policies is not to be contemplated lightly, and, to the extent that Congress finds it appropriate to encourage expansion of our university and college facilities, Congress must be free to build upon what we have, the private as well as the public institutions.

Against this background, I should like to suggest some specific legislative programs in the field of higher education which I believe the Congress should undertake or continue—

First. Extension of the college housing loan program.

Second. Enactment of a program of matching grants and loans for the construction of academic facilities needed to accommodate increased enrollments in colleges and universities, with special emphasis upon the establishment and development of community colleges.

Third. Continuation and revision of the National Defense Education Act, with particular emphasis upon the titles which provide for: first, student loans, a program which I helped to initiate in the Congress, and the effectiveness of which has already been demonstrated; and second, graduate fellowships, designed to increase the Nation's supply of highly trained college teachers and other manpower.

Fourth. Allowance of a reasonable tax deduction or credit for the parent who pays tuition to send his son or daughter to college.

Fifth. Allowance of a tax deduction for teachers and nurses—and perhaps some others—for reasonable expenses incurred in taking advanced or graduate work—even though such advanced study is not required in order for them to hold their positions of employment.

In a sense, it can be said that over a long period of years, the Congress by its actions—and inaction—has already carved out and indicated the role to be played by the Federal Government in the field of education. With some minor exceptions, the Federal role in education throughout our history has been largely confined to the area of higher education. Milestone examples are the Land-Grant College Act, the GI bill of rights, and the National Defense Education Act.

I do not believe that the Congress has expressed itself in this manner by accident. I suggest that it would now be helpful if there were general recognition that the principal Federal interest and responsibilities in this field lie in the area of higher education. If this were acknowledged and clearly declared, as matter of national policy, the States and local governments could then get on with the challenging task of providing adequately for elementary and secondary education without the interference and delays which accompany the repeated promises and expectation of Federal aid.

SIMPLE FAIRNESS

Mr. ROOSEVELT. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD, and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ROOSEVELT. Mr. Speaker, last week on Wednesday, September 5, the Committee on House Administration reported favorably House Resolution 397 and House Concurrent Resolution 384, which provide as follows:

H. RES. 397

Resolved, That there be printed for the use of the Committee on Un-American Activities, thirty-six thousand additional copies of a report numbered 2228, Eighty-sixth Congress, second session, prepared and released by said committee entitled "The Communist-Led Riots Against the House Committee on Un-American Activities in San Francisco, California, May 12–14, 1960."

H. CON. RES. 384

Resolved by the House of Representatives (the Senate concurring) That there be printed for the use of the Committee on Un-American Activities one hundred thousand additional copies of the report "Communist Target—Youth—Communist Infiltration and Agitation Tactics," Eighty-sixth Congress, second session.

Both of these were brought before the House on September 7 for immediate consideration and were passed.

The first report, entirely, and the second report, in great measure, are devoted to the student riot in the San Francisco city hall, May 13, 1960, during hearings of the House Committee on Un-American Activities. One of them, House Report No. 2228, contains the entire narration of the film "Operation Abolition" which, as you are all aware, has been the subject of much controversy throughout the country concerning its accuracy and some of the conclusions and opinions expressed in the film.

I rise today, not to raise a question concerning these reports in their entirety, but with regard to a specific statement of facts which is contained in both reports, and which purports to be an account of how the incident occurred which resulted in firehoses being used against the students in the San Francisco city hall on Friday, May 13, 1960. Since these reports were issued, there has been a trial by a jury in which the facts about this incident have been adjudicated. The jury determined that the incident, as contained in both these reports, did not, in fact, occur.

I am referring specifically to the following paragraph on page 11 in House Report No. 2228 which is also in the narration of the film, "Operation Abolition":

> One student provides the spark that touches off the violence when he leaps over a barricade, grabs a police officer's night stick, and begins beating the officer over the head. As the mob surges forward to storm the doors, a police inspector orders that the firehoses be turned on.

Similar language is contained in the J. Edgar Hoover report entitled "Communist Target—Youth":

> One of the demonstrators provided the spark that touched off the flame of violence. Leaping a barricade that had been erected, he grabbed an officer's night stick and began beating the officer over the head. The mob surged forward as if to storm the doors, and a police inspector ordered the firehose turned on. The water forced the crowd to the head of the balustrade, and the cold water had a sobering effect on the emotions of the demonstrators.

It is of interest to note that this particular incident is not shown in the film. Both of these reports were based on a police report made by Assistant Police Inspector Cecil Pharris, of the San Francisco Police Department. Officer Pharris testified at the trial and admitted that he did not see this alleged incident, and as a matter of fact, was not present at the time the officer was

alleged to have suffered the attack at the hands of the student, Robert Meisenbach, who was supposed to have hurdled the barricade. The officer who was the alleged victim, Patrolman Ralph E. Schaumleffel, also testified and admitted that the Hoover report and the Un-American Activities Committee reports were both wrong in their accounts.

As a matter of fact, no prosecution witness, much less any defense witness, backs up the account set forth in the two reports. At the trial both the prosecution and the defense testimony established that neither Meisenbach nor any student leaped over a barricade and attacked a policeman, that the encounter between Meisenbach and Officer Ralph Schaumleffel did not take place until after the fire hoses had been turned on the demonstrators. The jury obviously believed Meisenbach's testimony that he never hit the officer with a night stick which was the specific charge against him.

In the light of this, is it not proper, in the interests of truth and justice to the student who was tried and acquitted as well as to the other students, that these reports be changed to accurately reflect the true facts before they are released?

Chairman FRANCIS WALTER of the House Committee on Un-American Activities also admits that the following statement is incorrect:

Among the Communist leaders who had an active part in the San Francisco "abolition" campaign and the protest demonstrations was Harry Bridges, whom you see here being escorted out of the city hall by police officials moments before the rioting broke out.

In fact, Harry Bridges did not appear until after the rioting occurred and order was restored. This is acknowledged in the other report on page 8.

I am not, at this time, suggesting that these reports be changed entirely although there are a great many other statements in these reports that I challenge and have challenged as being inaccurate, distorted, and untrue. A number of newspapers throughout the country have also called upon the committee to revise the film and these reports to reflect the true facts as brought out in the Meisenbach trial. For example, the Washington Post on May 5, 1961, contained the following editorial:

FABRICATION

Another major distortion in the film "Operation Abolition" has now been firmly nailed down. The movie was put together by the House Committee on Un-American Activities by selecting and rearranging film clips taken at the time of the student riot in San Francisco just a year ago. It purports to show that the riot was instigated, organized, and led by Communists—a favorite theme of the committee which seems to feel that all criticism of its own activities is necessarily communistic. In the course of the film, the committee announcer, or narrator, says:

"One student provides the spark that touches off the violence when he leaps over a barricade, grabs a police officer's nightstick, and begins beating the officer over the head."

A great many people have wondered why none of the newsreel cameras recorded this interesting incident and why it was not shown in the movie. The answer appears to be that the incident never occurred. The student accused of assaulting the officer was tried before a jury of 12 in San Francisco; and after hearing all the evidence the jury came in on Wednesday with a verdict of acquittal. In point of fact the committee version of what happened was not supported even by the testimony of prosecution witnesses.

In addition to "Operation Abolition," the Un-American Activities Committee published a report on the student riot by J. Edgar Hoover, Director of the Federal Bureau of Investigation. The same canard is contained in this report. Mr. Hoover's account is in almost identical language:

"One of the demonstrators provided the spark that touched off the flame of violence. Leaping a barricade that had been erected, he grabbed an officer's nightstick and began beating the officer over the head."

Whether Mr. Hoover got the story from the committee or the committee got the story from Mr. Hoover makes little difference: It appears nonetheless to have been in error. Such errors of fact—exaggeration of student misbehavior or exaggeration of the participation of Communists—can lead, as we believe they did in this case, to grossly erroneous conclusions.

Let us try once more to set the record straight. Students in and around San Francisco engaged in an entirely legitimate political demonstration against the Un-American Activities Committee. The demonstration got out of hand—in some degree because of the committee's own conduct—and the students became noisy and unruly. The police, reacting with more force than patience, turned fire hoses on them.

The result was a riot. But though some Communists may have been among them and though the behavior of the students may have been reprehensible, communism had no more to do with the origin of this case than with a springtime panty raid on a girls' dormitory or the uprooting of a pair of goalposts at a football game.

The San Francisco Chronicle of May 5, 1961:

MEISENBACH TRIAL CLEARS ERRORS

Because Judge Neubarth's ground rules wisely limited the Meisenbach trial to the narrow issue of whether the University of California student did or did not beat a policeman with his own club, the public has today—almost a year afterward—a clearer idea of what happened at the city hall riot.

The jury found Meisenbach did not club the policeman. Its foreman explained that the jurors thought there was too much conflict in the prosecution's evidence to warrant any other conclusion.

In this way the jury system gives the benefit of presumption of innocence until proof of guilt removes all reasonable doubt. It is the American way—far more American than some of the past performances of the House Un-American Activities Committee—and it is very reassuring to see.

The trial served to expose two important errors in the riot report of the police, which related that Meisenbach jumped a barricade to seize Officer Schaumleffel's baton and set off the riot. It was conceded at the trial that no one jumped the barricade, and it developed that, far from having started the riot, the scuffle of Meisenbach and Schaumleffel took place after the firehose used to quell the riot had been turned off.

These errors have not remained embalmed in the police file; they have been carried from one end of the country to the other in the film, "Operation Abolition," which is said to have been seen by 10 million persons. The filmmakers perhaps cannot be blamed for having relied on an official police report, nor can Director J. Edgar Hoover of the FBI, who also hung his hat on it. But now that the errors are known, it seems the duty of the House Un-American Activities Committee to put out a new, amended version of the film, possibly to be called "Son of Operation Abolition."

The San Jose Mercury of May 5, 1961:

SO ENDS "THE RIOT"

Robert J. Meisenbach, a 23-year-old University of California senior, has placed the House Committee on Un-American Activities in a somewhat embarrassing position.

A San Francisco jury Wednesday found Meisenbach not guilty of clubbing a San Francisco police officer with the policeman's own night stick during last May's riot in San Francisco city hall.

Police and firemen turned water hoses on a group of students and others demonstrating against hearings the committee was holding at the time in city hall. Subsequently, the committee charged the demonstrations were Communist inspired and Communist led.

To bolster its position, the committee sponsored a film version of the disturbances, the now controversial "Operation Abolition." The film's narration charges that the riot was touched off when a demonstrator jumped police lines and started beating an officer over his head with his own night stick.

Some 63 demonstrators were arrested. All but Meisenbach were turned loose. He was tried on a charge of assaulting a police officer.

At his trial, both prosecution and defense testimony established that the encounter between Meisenbach and Officer Ralph E. Schaumleffel did not take place until the firehoses had been turned on the demonstrators. And the jury, obviously, believed Meisenbach's contention that he never hit the officer with the night stick, that he tossed it away as soon as it came to him in the process of being passed from hand to hand among the demonstrators.

Unless the House committee wishes to attack the integrity of the court or the jury that heard the Meisenbach case, it stands convicted of a grievous misstatement of fact regarding the manner in which the riot got underway. Such lack of regard for accuracy can only result in a further diminution of public confidence in the committee.

The House Committee on Un-American Activities will better serve the American people in their struggle against Communist subversion when it drops some of its own un-American activities—as for instance, writing history to suit its own convenience.

Americans like to think of this as a Communist rather than an American pastime.

Do we not as the House of Representatives have a responsibility to insure that any document printed with the imprimatur of this House is free of error? I think the answer must be "Yes." Simple fairness would seem to dictate that both reports should be amended to delete these statements which have now been conclusively shown to be in error.

INADEQUATE AWARD FOR DISTINGUISHED SERVICE

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Michigan [Mr. HOFFMAN] is recognized for 10 minutes.

Mr. HOFFMAN of Michigan. To our colleague, the gentleman from Michigan [Mr. FORD], the American Political Science Association at its 57th annual convention at St. Louis, Mo., awarded its citation for outstanding work in the national interest. The award was the only one given to a Republican in the House. It was a deserved citation won by our colleague for his overall service to the

party as well as a deserved tribute to his fine and helpful service on the House Committee on Appropriations.

STOP HELPING THE ARAB BOYCOTT

Mr. ROOSEVELT. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD, and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ROOSEVELT. Mr. Speaker, last Friday I sent letters to the Secretaries of State and Commerce expressing grave concern over the submissive reaction of the United States to the continuation of the Arab League nations' discriminatory boycott against Americans of the Jewish faith.

I have vehemently protested the actions of certain governmental agencies which aid and abet the Arab boycott. Through a policy of accommodation the U.S. Government has acquiesced in an invasion of American rights. Compliance with demands to separate our Jewish military personnel from our base in Dhahran, acquiescence in orders to send American surplus commodities to Arab countries in ships which do not trade with Israel, and advertising at public expense Arab calls for commercial bids which will only be accepted from U.S. business firms which are not "Jewish owned" or do not "employ a percentage of Jewish personnel," are particularly unfortunate instances of this policy.

I firmly believe that a boycott against an American business concern on the ground that it is owned or operated by persons of any particular race, religion, or ethnic origin, is contrary to American principles and traditions, and should definitely not be countenanced by governmental assistance.

We are suffering a loss which no self-respecting nation can afford—the loss of integrity and prestige incurred by submissiveness to affronts.

In concluding my letters to the Secretaries, I have urged a complete reexamination and reformulation of American policies and practices related to the Arab League nations' boycott and full implementation of the congressional mandate to utilize foreign assistance funds in a manner which will most satisfactorily give practical effect to American principles of fairness and equality.

The text of the letters to the Secretaries of State and Commerce follows:

SEPTEMBER 8, 1961.

Hon. DEAN RUSK,
Secretary of State,
Hon. LUTHER H. HODGES,
Secretary of Commerce,
Washington, D.C.

DEAR MR. SECRETARY: I am taking this occasion to express to you my profound concern and deep regret with reference to the policy and practice of the U.S. Government regarding the Arab League nations' boycott and the consequent invasion of American rights.

I vehemently protest the actions of our Government which aid and abet the discriminatory actions of the Arab League nations in their perpetration of a boycott against U.S. business firms which are "Jewish owned" or "employs a percentage of Jewish personnel." I firmly believe that a boycott against an American business concern on the ground that it is owned or operated by persons of any particular race, religion, or ethnic origin, is contrary to American principles and traditions, and should definitely not be countenanced by governmental assistance.

Regardless of the general overall intent of the Arab League's boycott, it is in effect a boycott against Americans. As a consequence of the boycott, and our policy with respect to it, we are suffering a loss which no self-respecting nation can afford—the loss of integrity and prestige incurred by submissiveness to affronts.

Through a policy of accommodation, the U.S. Government has aided and abetted practices of discrimination against our citizens and has acquiesced in the invasion of American rights. The acts against our citizens to which I refer are: The blacklisting of American companies having Americans of the Jewish faith among their officers, owners, directors, or even personnel; the denying of visas to Americans of the Jewish faith and the subjecting of such persons to indignities and affronts while passing through Arab League countries; preventing American military and civilian personnel of the Jewish faith from serving at an Air Force base built in an Arab country with American funds and maintained by the United States; and the rejecting of U.S. diplomatic personnel and aids of the Jewish faith qualified to perform duties in the league countries.

It is true that in several instances the Government has issued statements with reference to the boycott. Thus, in 1956, when the boycott was extended to companies having Jewish ownership or participation, the New York office of the U.S. Department of Commerce announced: "The United States does not recognize the boycott." But the appalling truth is that the United States has taken no effective action. Mr. Secretary, what I found intolerable under a Republican administration is even more detestable under the present administration. It is imperative that we do more than utter pious statements.

Until recent years, the resistance of the U.S. Government to practices of a foreign government discriminating against a class of Americans had been forthright, consistent, and unequivocal. For example:

When a foreign government protested the appointment of an envoy extraordinary and minister plenipotentiary of the United States, on the ground that he was married to a Jewish woman, Secretary of State Bayard, replying on behalf of our Government, declared:

"It is not within the power of the President nor of the Congress, nor of any judicial tribunal in the United States, to take or even hear testimony, or in any mode to inquire into or decide upon the religious belief of any official, and the proposition to allow this to be done by any foreign government is necessarily and a fortiori inadmissible.

"To suffer an infraction of this essential principle would lead to a disenfranchisement of our citizens because of their religious belief, and thus impair or destroy the most important end which our constitution of government was intended to secure."

Although this official resigned his commission, the U.S. Government declined to make another appointment. For several years thereafter the United States was represented in that country by a chargé d'affaires.

Citizens of the United States have justifiably come to expect that their Government would take an honorable and implacable stand against invidious discrimination against American citizens and the infringement of American rights by foreign countries. But these expectations have not been borne out in recent years. Not only have Government agencies acquiesced passively to the boycott, they have served actively, in many instances, as its instruments.

The Department of Defense has deferred to Saudi Arabia's exclusion of American Jews from the Air Force base maintained in Dhahran by the United States.

The Department of Agriculture and the Commodity Credit Corporation have assented to contracts which prohibit vessels carrying surplus commodities to Arab countries from calling at Israel water or ports. The existing law requires that half of the deliveries sent abroad must go in American bottoms. The effect of the Department's assent is that we have permitted Arab governments, by constructing a blacklist, to render certain American vessels and owners ineligible for carrying these shipments.

The situation in the Department of Commerce is equally appalling. Through the medium of publicity releases, the Department advertises calls for bids in the United States by the Arab League nations presently engaging in discriminatory purchasing practices. Such cooperation is shocking and unpardonable.

When Mr. Al S. Waxman, of Waxman Publications, Inc., Los Angeles, Calif., wrote to the Secretary of Commerce protesting these publicity releases and presenting incontrovertible evidence of discriminatory practices in the calls for bids, his communication was sent to the State Department. Mr. Waxman received a reply from Mr. Nicholas G. Thacher, Deputy Director, Office of Near Eastern Affairs, which stated, among other things, that "the U.S. Government, as a matter of settled policy, neither recognizes nor condones discriminatory procedures of foreign business firms or governments." I cannot believe that the Department of State is unaware of the boycott activities of the Arab League nations. In light of this, I cannot understand why we continue to publicize these discriminatory calls for bids. This is not only recognizing discriminatory procedures, it is condoning them with support and assistance. This is intolerable, and I vigorously protest the continuation of such practices.

On September 5, the House adopted an amendment to the foreign assistance appropriation bill which provides that "it is the sense of Congress that any attempt by foreign nations to create distinctions because of their race or religion among American citizens in the granting of personal or commercial access or any other rights otherwise available to U.S. citizens generally is repugnant to our principles; and in all negotiations between the United States and any foreign state arising as a result of funds appropriated under this title these principles shall be applied as the President may determine."

Mr. ROONEY stated that the objective of this amendment, which he introduced, was to protect American citizens against distinctions because of their race or religion by foreign nations. Mr. HALPERN, in a spirit of bipartisanship, declared that "nothing short of this amendment is satisfactory to carry out the sense of Congress as expressed heretofore in previous appropriations bills and it fulfills the principle espoused by the President linking social justice and morality to our foreign aid program. It is a clear declaration of principle and a concomitant of American aid."

Mr. Secretary, I respectfully urge a complete reexamination of U.S. policy and practice relative to our reactions to the Arab League nations' discriminatory boycott. I further urge that the United States totally abstain from any form of cooperation with

the Arab League's boycott activities, fully implement the policy established by the Congress, and, in addition, seek to use the influence of our Government to eliminate such distressing practices.

Very truly yours,

JAMES ROOSEVELT,
Member of Congress.

THE COMMON MARKET AND THE FREE WORLD: IF YOU CAN'T LICK 'EM, JOIN 'EM

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Wisconsin [Mr. REUSS] is recognized for 30 minutes.

Mr. REUSS. Mr. Speaker, the figures just reported by the Department of Commerce on the U.S. balance of payments for the second quarter of 1961 remind us that our international trade and payments problem has by no means been solved. Our second quarter figures show that our exports have declined, and our imports have risen. This makes it all the more imperative that we redouble our efforts to eliminate our basic deficit.

Methods of eliminating the basic deficit were the subject of recommendations of the Subcommittee on International Exchange and Payments, Joint Economic Committee, of which I have the honor to be chairman, in its August 23, 1961, report.

THE JOINT ECONOMIC COMMITTEE RECOMMENDATION

In accordance with policies announced by the President's balance of payments message of February 6, 1961, the United States has adopted a number of temporary measures to help reduce a basic deficit which was estimated to have been about $2 billion in 1960. While this deficit was completely eliminated in the first quarter of 1961, the balance was in part achieved by an unusually depressed level of imports, which is expected to go up as the momentum of U.S. recovery increases. Therefore, to assure long-term equilibrium in the U.S. balance of payments, a number of unilateral and multilateral programs are now underway. The most important are removing all obstacles to a continuing expansion of U.S. exports and travel to the United States, reallocating mutual defense costs, and sharing the burden of aid and future commodity stabilization arrangements for developing countries.

By international diplomacy and through such international organizations as NATO and OECD, the United States should make increased efforts to persuade other free world countries to bear a larger share of the costs of military security and foreign aid, both of which are substantial items in U.S. payments to other countries.

Export expansion will depend on the efforts of American business to offer attractive products, at competitive prices, to markets which have many other sources of supply. Growth of productivity through restoration of full employment and accelerated investment in industrial modernization would give growing competitive strength in export markets. The Government can assist in these efforts by providing information and by assuring adequate credit and insurance facilities. But the United States must also take the initiative in making certain that the formation of large regional trading areas does not discriminate unduly against U.S. and other exports to these areas. While boom conditions in the Common Market may help U.S. exports, it is of particular importance to secure a low European Common Market external tariff and a liberalized commercial policy on agricultural products and coal. Otherwise, a new source-of-payments imbalance will be introduced, with serious consequences not only for the United States but for the entire free world, particularly as the Common Market expands its membership to include other European countries. Consideration should in fact be given to forming a free world Common Market, rather than further to encourage the growth of regional groups which divide the free world.

As the subcommittee recommendations point out, the discriminatory effect of the Common Market, particularly when augmented by the members of the European Free Trade Association—EFTA—who are now attempting to joint it, presents a real obstacle to our increasing, or even maintaining, our exports.

COMMON MARKET TIMETABLE

As matters now stand, the Common Market's internal tariffs were reduced to 70 percent of their 1957 level on December 31, 1960, and will be reduced to 50 percent of that level by December 31, 1961, and to zero by December 31, 1965. The EFTA internal tariffs were reduced to 70 percent of their former level on July 1, 1961, on their way to the ultimate zero.

External tariffs of the members of the Common Market were adjusted 30 percent of the way toward a common external tariff on December 31, 1960, with the final arrival at a common external tariff now scheduled for December 31, 1969.

American exporters are waking up to the fact that the discriminatory arrangements inherent in the Common Market will have a considerable impact upon them. A description of that impact is contained in the recent publication of the Chase Manhattan Bank of New York, "the New European Market; a Guide for American Businessmen":

THE CHASE MANHATTAN BANK ANALYSIS

Economic integration will play an important part in changing the face of Europe over the next decade. It will also affect American exporters.

Changing tariff levels in both the EEC and EFTA will give preference to goods produced within each group over those produced elsewhere. In the Common Market, common agricultural and fuel policies also are likely to give a competitive advantage to EEC producers.

Freer internal trade will stimulate competition and advance the efficiency of European industry. In the past many European firms have served small protected markets, using inefficient methods and equipment. As trade barriers come down, other producers will enter these markets. Survival will depend on improved production and marketing techniques, better equipment, and greater specialization. Successful firms will serve larger markets and gain the advantages of mass production.

Economic integration will stimulate Europe's growth—as a customer as well as a competitor. As the European economy grows, its import requirements also are likely to grow. This growth of the market could more than make up for the trade diversion caused by tariff preferences.

U.S. exporters will be affected in different ways by these developments. To see where the impact is likely to be felt, consider the composition of U.S. exports to Western Europe.

About 25 percent of U.S. exports to Western Europe are raw materials: ores, textile fibers, nonmineral oils, and raw chemicals. Tariff changes in EEC and EFTA will not affect many products in this category, since duties on most of them will remain low. Industrial growth in Europe is likely to increase shipments from the United States.

Some 5 percent of U.S. exports to Western Europe are fuels: coal and petroleum products—most of which will also remain subject to low tariffs. But the prospects for U.S. fuel exports depend more on the degree of quota protection provided for Europe's high-cost coal industry and how much oil is developed in Europe and its associated oversea territories or countries. Total use of energy in Europe has been growing at a rate of 8 percent a year since 1950 and promises to keep growing rapidly in the future. European coal production is not expected to grow much. Although oil from north Africa undoubtedly will fill part of the demand and nuclear power will eventually become competitive, U.S. exports of fossil fuels probably will remain important for some time.

Another 30 percent of European imports from the United States consist of food and tobacco. Tariffs on these goods vary widely, but even more important to U.S. exporters are devices such as quotas, subsidies and administered pricing, which already provide a high degree of protection for European farmers. The EFTA virtually excludes agriculture from its agreement, and will have practically no effect on U.S. exports of food and tobacco. But the EEC's common agricultural policy will affect U.S. exports of farm goods in two ways: It will extend national preferences to producers throughout the entire EEC area, rather than in a single country; it will stimulate competition among EEC farmers and encourage more efficient production of foodstuffs inside the Six. Whether these effects will be offset by the expected rise in total demand for food and tobacco is debatable. The EEC probably will import less of some products, such as wheat, and more of others, such as soybeans.

About 40 percent of U.S. exports to Europe are manufactures—chiefly machinery, transportation equipment, and chemicals. Nearly all these products will have substantial tariffs against them, while tariffs inside EEC and EFTA will go to zero. This means, for example, that U.S. machine tools will compete with German machine tools in the French market at a 5-percent to 15-percent tariff disadvantage. At the same time, European producers are likely to enjoy cost advantages caused by increased efficiency. As a result, many American producers will find European competition increasingly difficult to meet, and some products now successfully exported to Europe may cease to move there.

SECRETARY FREEMAN IS CONCERNED

Secretary of Agriculture Orville L. Freeman expressed his concern over the

effect of the Common Market on exports of U.S. farm products in a speech at Brussels, Belgium on September 6, 1961, when he said:

American agriculture is concerned over the possibility of a restrictive import policy on the part of the Common Market which would reduce our sales to the area of wheat, rice, feed grains, livestock products, poultry, tobacco and certain fruits.

What this boils down to is that around 75 percent of U.S. exports to Western Europe—fuels, farm products and manufactures—are going to be adversely affected by the tariff discriminations against us and the rest of the free world now afoot in Western Europe.

OUR BEST EXPORT MARKET

We should note that discrimination against us by Western Europe is going to hurt our vital exports in a fast-growing area. U.S. exports to Western Europe rose from $2.7 billion in 1953, to $3.2 billion in 1954, to $4 billion in 1955, to $5 billion in 1956, to $5.5 billion in 1957, and—after a mild decline because of the European recession of 1958–59—to $6.2 billion in 1960.

But from here on out we will have to contend against a common external tariff, with substantial tariff increases for low-tariff countries like Benelux and Germany, as well as against a discriminatory preference granted internally by the Common Market. As the Chase Manhattan Bank study says:

U.S. machine tools will compete with German machine tools in the French market at a 5- to 15-percent tariff disadvantage.

We can lead a Spartan life in the United States, keep wages and prices successfully down, and make admirable productivity gains, yet see our export trade gobbled up by countries to which the Common Market accords a sweeping discriminatory advantage.

The details of its discrimination I have pointed out several times this year—CONGRESSIONAL RECORD, February 23, 1961, pages 2607–2609; August 7, 1961, pages 14798–14799.

HOW WE WILL BE HURT

Here are some examples of the tariff discrimination under which we will be staggering. Our tariff on automobiles is 8½ percent. The proposed Common Market tariff is 29 percent against the United States, contrasted with an internal tariff of zero against auto imports from France, Germany, Italy, and other European member countries.

The Common Market external tariffs on radio and TV sets will be 20 percent; automatic dishwashers, 18 percent; electric washing machines, 19 percent; most clothing, 20 to 22 percent; sheep leather, 10 percent; varnishes and lacquers, 19 percent; putty, 11 percent; oil burners, 14 percent; lifting, loading, and handling machinery, 14 percent; knitting machines, 13 percent; metal lathes, 10 percent; and office and calculating machine parts, 14 percent.

Once again, let me emphasize that the discrimination against us and the rest of the free world will be the difference between these percentages and zero, the tariff barrier affecting other Common Market members. Moreover, in many cases the Common Market external tariffs will be considerably higher than the preexisting tariffs of Germany and Benelux, the low-tariff countries which have been such good export customers of ours.

TAKE WISCONSIN, FOR EXAMPLE

Exporters in every State of the Union will be hurt by the Common Market. The prospect that confronts my own State of Wisconsin is instructive. Of the 456,000 persons employed in manufacturing in Wisconsin as of July 1, 1961, 134,000 were employed in the machinery industry. According to the 1958 census of manufacturers, Wisconsin produces nearly 35 percent of the papermaking machinery produced in the United States; nearly 11 percent of the construction machinery; 11 percent of tractors; 10 percent of the mechanical power transmission equipment; 9 percent of metal-cutting machinery; 8.5 percent of food processing machinery; 7 percent of mining machinery and equipment; 7 percent of woodworking machinery; 6.5 percent of electric motors and generators; and 6 percent of pumps and compressors. Companies like Allis-Chalmers, A. O. Smith, Harnischfeger Corp., International Harvester, J. I. Case, Caterpillar Tractor, Badger Meter, McGraw Edison, Bucyrus-Erie, Chain Belt, Cutler-Hammer, Allen Bradley, and Square-D, are all prominently identified with the export industry of Wisconsin. It is estimated that Wisconsin exports of machinery, electrical apparatus, transportation equipment, and metal manufactures came to $320 million in 1960 alone.

In addition, Wisconsin manufacturers of paper and paper products, scientific instruments, canned goods, outboard motors, air-conditioning equipment, and heating and plumbing equipment have important stakes in the export market. Wheat and feed grains pass through Wisconsin ports on their way to the outside world.

Every Member, I am sure, can cite examples of the shape of things to come as alarming for his own State as these are for Wisconsin.

WHAT WE MUST DO

It is late to be waking up to our problem, but it is not too late to do something about it—if we act quickly.

First, our officials must do their utmost to get a low Common Market external tariff schedule, and to prevent the establishment of discriminatory quotas against our goods. I am far from certain that, up to now, our representatives to GATT in Geneva who are negotiating with the Common Market have been as tough as they should be. Moreover, if they fail, they must not agree to a settlement disadvantageous to the United States, Canada, South America, Asia, and every other part of the free world not in the Common Market.

Second, and most important, is to get our free world partners to work with us to establish a common market which will not divide and discriminate—a common market not for a dog-in-the-manger grouping, but for the whole free world. As I said on the floor on August 7:

Specifically, we should consider proposing to our leading industrial trading partners represented in GATT the formation of a free world common market, in which each adhering member would agree to cut tariffs on industrial goods 10 percent a year for the next 10 years, down to zero. By thus generalizing to the whole free world the presently discriminatory tariff reductions of the Six and the Seven, we could at one stroke retain the good of the Common Market and get rid of the bad.

As with the present Common Market, agricultural goods are another matter, and there the goal should be painstaking and steady negotiation to move away from autarchy and toward comparative advantage in free world farm policy.

WE HAVE MORE TO GAIN THAN TO LOSE

The United States has much more to gain than to lose by greatly reducing industrial tariffs to zero in concert with other countries.

In the first place, the Common Market external tariff will undoubtedly average higher than the approximately 12 percent which is the present average U.S. tariff on the value of dutiable imports. We have cut our tariffs to almost one-fifth of what they were when we started tariff-cutting in 1934. The last 20 percent of the way is where we can get some reciprocal mileage.

In the second place, obtaining reciprocal tariff cuts from the Western European countries is doubly advantageous to us in a day when they are allowed to discriminate against us, as they are under the Common Market and EFTA. For example, if we can get France—among the others—to reduce her external Common Market tariff by 50 percent, she will by the same reduction reduce by 50 percent the German tariff advantage over us in France which comes from the elimination of internal Common Market tariffs.

To be sure, a continuing liberal trade policy will necessitate shifts in American production—shifts to be cushioned by trade adjustment legislation. But the West European countries have managed to shed their fears of a hugely expanded area of competition among countries with greatly different wage levels and habits of doing business. They have all gained as a result.

Today, when our Western European partners in the free world are engaged in taking a major economic step forward, the United States stands to lose its leading position as a world trader if we content ourselves with traditional thinking on commercial policy. The dogmas of the relatively quiet past are indeed insufficient for the stormy present in world trade.

THE FEDERAL MUTUAL SAVINGS BANK BILL

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. MULTER] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. MULTER. Mr. Speaker, on July 1, 1960, I joined with several of our distinguished colleagues in introducing a bill (H.R. 12913) to authorize Federal mutual savings banks. A companion bill (S. 3796) was introduced on the same day in the Senate. At that time I noted that introduction of the bill at the end of the session would afford interested groups opportunity for the careful study merited by the bill. Since then the bill has been studied by many groups, including several Federal agencies. Some have offered suggestions for amendments.

On January 3, 1961, I introduced a version of the bill (H.R. 825) substantially similar to H.R. 12913 of the 86th Congress. Subsequently, suggestions for additional changes in the bill have come from many sources. These have now been evaluated and have resulted in the revised version of the bill I am now introducing.

I should like to discuss briefly the need for Federal mutual savings banks, the major differences in this revised bill from H.R. 825, and the reasons for introducing this revised version at this particular time.

NEED FOR FEDERAL MUTUAL SAVINGS BANKS

Since 1816, mutual savings banking has contributed significantly to the economy of this Nation. Mutual savings banks are the oldest type of thrift institution in this country. Formed originally by public-spirited individuals who served as corporators and trustees, these savings banks met a need to supply safe depositories for savings of people of moderate means. Throughout the years mutual savings banks have encouraged thrift and have enabled accumulation of sums of capital available for community and national development. They continue to do so today.

Since World War II mutual savings banks have increased markedly the share of their assets invested in mortgages secured by real property. At present approximately two-thirds of the assets of mutual savings banks are invested in such mortgages, most of which are secured by homes. Mutual savings banks have been effectively active in urban renewal projects in the metropolitan areas of Boston, New York City, and Philadelphia. They also invest in Federal securities, municipal securities, and corporate securities. Through these media they help to promote employment, production, and purchasing power on a sustainable, noninflationary basis. Although mutual savings banks are located in only 17 States, their benefits extend to all 50 States both through their out-of-State investments and through the higher levels of employment and production which they make possible.

These benefits could be substantially magnified by authorizing the establishment of mutual savings banks in all States under Federal charters.

Through long experience in the encouragement of thrift, mutual savings banks have an enviable record of inducing higher per capita savings in those areas where they operate. The 10 leading States with respect to per capita holdings of thrift accounts are all mutual savings bank States. There is good reason to expect an increase in total savings in new areas to which mutual savings banking may extend through Federal chartering. Population and personal income are rising rapidly in many of these areas, along with need for capital.

Federal charters for mutual savings banks alongside State charters for such institutions would round out the pattern of dual chartering for financial institutions in the United States. This pattern already exists successfully for commercial banks, savings and loan associations, and credit unions.

To illustrate the need for the establishment of mutual savings banks throughout the Nation, I am pleased to refer to comments from various Federal agencies and private groups that have considered the bill.

Federal agencies reported to the Senate Committee on Banking and Currency as follows with respect to S. 3796, which was identical to H.R. 12913.

The Housing and Home Finance Agency stated:

> This Agency believes that legislation providing for the Federal chartering of mutual savings banks would be desirable because it would encourage an increased flow of funds into the mortgage market.
>
> It is probable that the encouragement which Federal chartering would give to the organization of additional mutual savings banks, now operating under State charters in only 17 States, would attract a portion of savings now being placed in commercial bank time deposits. This would tend to enlarge the supply of mortgage funds since mutual savings banks traditionally have invested more of their funds in mortgages than have commercial banks. Also, the anticipated geographically expanded operation should tend to improve the interregional flow of FHA insured and VA guaranteed mortgages. Finally, by increasing competition among different types of lending institutions, the net result would most likely be an increase in total savings placed with financial establishments, including those which customarily provide major sources of mortgage credit.

The Veterans' Administration also endorsed the bill, stating:

> Mutual savings banks have actively participated in the GI loan program. As of December 31, 1959, nearly 30 percent of the outstanding VA guaranteed loans were held in their portfolios. To the extent that the proposed legislation would encourage new mutual savings banks in areas where the system would attract new savings for mortgage loan investment, it would doubtless aid veterans in their search for home loan finacing.

The Board of Governors of the Federal Reserve System replied that it believes the bill merits careful consideration in determining whether it can make an important contribution to the economy. Only the Federal Home Loan Bank Board, which charters and supervises Federal savings and loan associations, questioned the advisability of the legislation. However, it is anticipated that the recent changes in membership of the Federal Home Loan Bank Board will provide an opportunity for a fresh review of this position, and a sympathetic consideration of the evidence rebutting the fear expressed by the Board that conversion of savings and loan associations to Federal mutual savings banks would be accompanied by a decline of funds flowing into the home mortgage market.

Recently, studies by economic and financial experts have concluded independently that expansion of mutual savings banks beyond present geographic confines would be in the national interest. The Commission on Money and Credit, in a report released June 20, recommended "that Federal charters be made available for mutual savings banks." In support of this recommendation the Commission's report included the following paragraph:

> At present commercial banks and savings and loan associations may obtain Federal charters. Since only 17 States now provide for the establishment of savings banks, it is not possible to establish savings banks in two-thirds of our States. Federal charters for savings banks would permit operation in any State, and this would stimulate competition and enterprise among financial institutions, improve the banking facilities in some communities, and perhaps encourage greater conventional mortgage-lending activity in all areas.

A second study, "Chicago Banking," prepared by the University of Chicago Graduate School of Business for the Chicago Association of Commerce and Industry, recommended that Illinois law be revised to allow the establishment of mutual savings banks. The authors of that study concluded that "there are no disadvantages and great potential advantages in having mutual savings banks." The report continued that restrictions on competition in financial markets "appear to have led to insufficient banking facilities, maintenance of high-cost unit, insufficient allocation of resources, unattractive savings facilities, and a restricted supply of credit on stringent terms and at high cost." Furthermore, according to the findings of the Chicago study, the highest ratio of long-term savings in local financial institutions relative to personal income was found in States having mutual savings banks.

A new mutual savings bank is now in the process of formation in Anchorage, Alaska, under State charter authority made possible by enactment of enabling legislation adopted in 1960. Our next to newest State, appreciating its need for attracting additional capital, will become the 18th mutual savings bank State. Thus, from Federal and State Governments and from private enterprise sources come evidence of the need for permitting the expansion of mutual savings banking to new geographical areas.

MAJOR DIFFERENCES FROM H.R. 825

There are few important differences between H.R. 825 and the revised version of the bill being introduced today.

The principal difference is that the new bill names the Federal Home Loan Bank Board as the chartering and supervising agency for Federal mutual savings banks instead of entrusting these functions to the new, independent agency that would have been created under the provisions of H.R. 825.

Other less important differences are as follows:

First. There has been deleted from this bill the grant of authority contained in H.R. 825 that would have permitted all Federal mutual savings banks to exercise powers generally possessed by State-chartered mutual savings banks. Consequently, Federal mutual savings banks will possess such powers as are granted them by the provisions of this bill unaugmented by the broad general grant of authority inherent in the above-mentioned provision in H.R. 825.

Second. Specific provisions have been added to assure that expenses of examination of Federal mutual savings banks by the Federal Home Loan Bank Board may be assessed against the institution being examined.

Third. Several changes have been made in the investment powers of Federal mutual savings banks. H.R. 825 contained a provision permitting the supervisory authority to expand the investment powers of such institutions beyond those expressly conferred in the bill. That provision has been deleted, leaving Federal mutual savings banks to look to the provisions of the bill for their investment powers. In view of this change, these powers of investment have been enlarged in the following respects. Federal mutual savings banks may invest in property improvement loans in addition to those insured by the Federal Housing Administration. They may also invest in obligations of federally or State-chartered mutual savings banks. They may invest in any obligations a Federal or State agency has guaranteed or insured, or has committed itself to do so.

Fourth. Specific authority is granted Federal mutual savings banks to issue certificates of deposit in $100 multiples for periods of 2 years or more and to agree to pay interest at the rate, for the term, and subject to the conditions prescribed in the certificate.

Fifth. Express language has been added to the bill to require a finding by the chartering authority that issuance of a charter to a Federal mutual savings bank will not unduly injure commercial banks accepting funds from savers on deposit, or any thrift institution, as that term is defined in the bill.

Sixth. The powers of the chartering authority to approve branches for Federal mutual savings banks have been expanded to permit such branches in States that allow chain or group banking.

Seventh. A specific definition has been inserted in the bill to clarify actions an out-of-State Federal mutual savings bank may take in the mortgage field without being considered to be doing business within the State where such actions are taken.

All these changes are designed to improve the operations and public service features of Federal mutual savings banks.

The basic pattern for such institutions laid down in H.R. 825 has been preserved. Federal mutual savings banks must apply to the Federal Home Loan Bank Board for charters and must maintain membership in the Federal Home Loan Bank System, and must obtain and maintain deposit insurance from the Federal Deposit Insurance Corporation. Savings and loan associations may convert to Federal mutual savings banks subject to the restrictions prescribed by the bill.

As amended, the bill combines the best features of State laws affecting mutual savings banks in order to encourage a strong Federal system of mutual savings banking to supplement the thriving State-chartered system that has enjoyed an enviable record of safety and contribution to community and national welfare.

WHY THE BILL IS BEING INTRODUCED AT THIS TIME

Much helpful progress has already been made in bringing toward legislative realization the goal of Federal charters for mutual savings banks. Interest in this goal is mounting among several groups. The time appears propitious to introduce this improved version of legislation designed to achieve that goal. The study of interested groups can crystallize around the specific provisions of this bill. It is my hope that it will be possible to schedule public hearings on the bill as close to the beginning of the second session of the 87th Congress as possible. The National Association of Mutual Savings Banks has been most helpful to me in striving to perfect the provisions of this proposed legislation. It would be most fitting if this gap in the dual banking system is filled in time to enable the mutual savings banking industry to join with other members of the financial fraternity in commemorating the centennial of the dual banking system in the United States in 1963.

Mr. Speaker, under previous consent of the House I insert in the RECORD immediately following my remarks a copy of the bill being introduced, together with a summary thereof.

A BILL TO AUTHORIZE FEDERAL MUTUAL SAVINGS BANKS

Be it enacted by the Senate and House of Representatives of the United States in Congress assembled, That this Act may be cited as the "Federal Mutual Savings Bank Act".

SEC. 2. DECLARATION OF POLICY.—The Congress declares that, to carry out more effectively its responsibility for promoting maximum employment, production, and purchasing power in the national economy, it must facilitate and encourage an increased flow of real savings to finance new housing and other capital formation on a sustainable noninflationary basis. The Congress further declares that the increased savings necessary to the security and welfare of the individual as well as to the Nation should be provided within the private institutional framework of our competitive economy and within the dual banking system. These objectives will be advanced by authorizing the establishment of privately managed federally supervised mutual savings banks. Consistent with these objectives, the Congress recognizes the continuing need for maintaining and strengthening the vitality of our State-chartered banking system under the supervision of the various State banking departments. Federal mutual savings banks, together with State-chartered mutual savings banks, will bring to individuals in all States the opportunity of having mutual banks of deposit available to them which are dedicated to encouraging the practice of thrift, thereby increasing the total flow of voluntary savings in the economy. The record of mutual savings banks over nearly a century and a half of providing safety, ready availability of deposits and reasonable returns on these deposits, indicates that new Federal mutual savings banks will stimulate additional savings in the areas in which they are located. The record further indicates that these institutions will devote the bulk of their accumulated savings to the sound, economical financing of housing and homeownership. Moreover, additional funds will become available to support local business enterprise, urban redevelopment, and governmental capital outlays. The welfare of the public will be enhanced not only because economic growth will be fostered by capital formation but also because the earnings of Federal mutual savings banks, after expenses and provision for necessary reserves for safety of deposits, will be distributed entirely to depositors.

SEC. 3. DEFINITIONS.—As used in this Act:

(1) The term "Board" means the Federal Home Loan Bank Board;

(2) The term "conventional loan" means a loan secured by a first mortgage or deed of trust on real property or a leasehold estate other than a loan guaranteed or insured by a Federal or State agency;

(3) The term "doing business" shall not be considered to include any one or more of the following activities:

(a) The acquisition of loans (including the negotiation thereof) secured by mortgages or deeds of trust on real property situated in the District of Columbia pursuant to commitment agreements or arrangements made prior to or following the origination or creation of such loans;

(b) The physical inspection and appraisal of property in the District of Columbia as security for mortgages or deeds of trust;

(c) The ownership, modification, renewal, extension, transfer, or foreclosure of such loans, or the acceptance of substitute additional obligors thereon;

(d) The making, collecting, and servicing of such loans through a District of Columbia concern engaged in the business of servicing real estate loans for investors;

(e) Maintaining or defending any action or suit or any administrative or arbitration proceeding arising as a result of such loans;

(f) The acquisition of title to property which is the security for such a loan in the event of default on such loan;

(g) Pending liquidation of its investment therein within a reasonable time, operating, maintaining, renting, or otherwise dealing with selling, or disposing of, real property acquired under foreclosure, sale, or by agreement in lieu thereof;

(4) The term "financial institution" means a thrift institution, a commercial bank, a trust company, or an insurance company;

(5) The term "mutual bank" means a Federal Mutual Savings Bank chartered under this Act;

(6) The term "State" includes the Commonwealth of Puerto Rico, the Virgin Islands, Guam, Samoa, and the District of Columbia;

(7) A "State of domicile" or "domiciliary State" means the State in which a mutual bank's principal office is located; and

(8) The term "thrift institution" means a State-chartered mutual savings bank, a cooperative bank, a homestead association, a mutual savings and loan association, a mutual building and loan association, or a mutual bank.

SEC. 4. CHARTERING OF MUTUAL BANKS.—(a) Upon written application by five signatories from among not less than twenty-one individuals acting in the capacity of a qualified corporators named in the application, the Board may issue a charter for a mutual bank.

(b) Such a charter shall be issued whenever the Board finds that a mutual bank will serve a useful purpose in the community in which it is proposed to be established, that there is reasonable expectation of its financial success and that its operation will not unduly injure existing thrift institutions or commercial banks accepting funds from savers on deposit.

(c) Any mutual bank shall include the words "Federal", "Mutual", and "Savings" in its title.

(d) Any mutual bank, upon being chartered, shall become a member of the Federal Home Loan Bank of the district in which it is located or if convenience shall require and the Board approve, shall become a member of the Federal Home Loan Bank of an adjoining district. Mutual banks shall qualify for such membership in the manner provided in the Federal Home Loan Bank Act with respect to other members.

SEC. 5. CORPORATORS.—(a) Each corporator of a mutual bank shall be an individual of financial responsibility and good character and shall never have been adjudged a bankrupt, and shall, within such time after his election, and in such form as the Board may prescribe, file proof of his compliance with these requirements with the Board. Without in any way limiting, by enactment of this subsection, the general regulatory power granted the Board by this or any other act, the Board is hereby expressly authorized to prescribe standards of conduct for corporators, provided that any such standards shall be no more (and may be less) restrictive than those set forth for trustees in section 6(e)(1).

(b) No person shall be a corporator of a mutual bank who is not a resident of the State in which the principal office of the mutual bank is located, except that one less than one-half of the whole board of corporators may be residents of other States.

(c) At their organizational meeting, the corporators shall adopt rules governing the conduct of their business and may amend them for time to time. Such rules shall set forth the number of corporators and shall prescribe that any number not less than one-quarter of those at the time in office shall constitute a quorum for the purpose of doing business. At such organization meeting, or any adjournment thereof, the corporators shall divide the total number of corporators into three classes of equal size, one class to serve for a term of four years, one class to serve for a term of seven years, and one class to serve for a term of ten years, so that at each election of corporators following the first meeting an equal number of corporators shall be elected. The requirements of this section shall be satisfied if the number of corporators in any class does not exceed by more than one the number of corporators in any other class. Thereafter, each corporator shall be elected for a term of ten years, and until his successor is elected and shall have qualified. Successor and additional corporators shall be elected, subject to the requirements of this section, by a majority vote of the corporators, including those whose terms are expiring, present at a duly constituted meeting. Any corporator may be removed from office for cause upon the affirmative vote of two-thirds of the whole number of corporators.

SEC. 6. TRUSTEES.—(a) The board of trustees of a mutual bank shall be elected by and from the corporators and shall consist of not less than seven nor more than twenty-five. No person shall be a trustee of a mutual bank who is not a resident of the State in which the principal office of the mutual bank is located, except that one less than one-half of the whole board of trustees may be residents of other States. The corporators shall, by majority vote of those present at their organization meeting, elect a board of trustees, in three classes in the following manner: One-third for a term of one year; one-third for a term of two years; and one-third for a term of three years. Thereafter trustees shall be elected to serve for a term of three years. The requirements of this section shall be satisfied if the number of trustees in any one class does not exceed by more than one the number of trustees in any other class. The office of any trustees shall become vacant if he shall cease for any reason to hold office as a corporator.

(b) The management and control of the affairs of a mutual bank shall be vested in the trusteees. The trustees may adopt, amend and repeal bylaws governing the affairs of the mutual bank.

(c) No person acting as trustee of a mutual bank shall hold office as trustees, director, or officer of another thrift institution.

(d) The office of a trustee shall become vacant whenever he shall have mailed to attend regular meeting of the trustees for a period of six months, unless excused during such period by a resolution duly adopted by the trustees.

(e)(1) It shall be unlawful for any trustee—

(A) to receive remuneration as trustee except reasonable fees for attendance at meetings of trustees or for service as a member of a committee for trustees;

(B) to borrow funds other than pursuant to section 11(10)(B) or in any manner become an obligor for funds borrowed from the mutual bank for which he is trustee; and

(C) to make a profit, directly or indirectly, from any property sold to or services performed for the mutual bank or in connection with any loan made by the mutual bank for which he is a trustee.

Nothing contained in this subsection shall be deemed to prohibit or in any way limit any right of a trustee who is also an officer of or attorney for the mutual bank from receiving compensation for service as an officer or attorney.

(2) Upon application by a mutual bank, exceptions may be granted to any prohibition contained in this subsection following a determination by the Board that the exception sought is equitable and in the best interests of the depositors of the mutual bank.

(3) The Board may from time to time grant, by regulation, exceptions of general application to the prohibitions contained in this subsection.

(f) No mutual bank shall deposit any of its funds except with a depositary approved by vote of a majority of all trustees of the mutual bank, exclusive of any trustee who is an officer, partner, director, or trustee of the depositary so designated.

SEC. 7. COMMENCEMENT OF OPERATION.—(a) No mutual bank may commence operations except upon approval by the Board, which shall not be granted prior to qualification by such mutual bank as an insured bank under the Federal Deposit Insurance Act. Any mutual bank may so qualify in the same general manner as is provided for a State nonmember bank under that Act. No mutual bank shall continue operations if it shall at any time cease to be so qualified.

(b) No mutual bank may commence operations until there shall have been advanced in cash to the credit of such mutual bank, as an expense fund, such sums as the Board may require. Any such sums so advanced shall be evidenced by transferable deferred payment certificates. Outstanding certificates may have such terms and be repaid pro rata in such installments, and shall be entitled to receive interest at such rate, as may be approved by the Board.

SEC. 8. RESERVE FUND.—(a) Prior to authorizing the issuance of a charter for a mutual bank, the Board shall require that there be advanced in cash to the credit of such mutual bank not less than $50,000, which shall constitute the initial reserve fund. All sums so advanced as the initial reserve fund shall be evidenced by transferable deferred payment certificates. Oustanding certificates may have such terms and may be repaid pro rata in such installments, and shall be entitled to receive interest at such rate, as may be approved by the Board.

(b) As soon as practicable following the close of each of its first 10 fiscal years, each mutual bank shall credit to the reserve fund an amount not less than 10 per centum of its net earnings before interest for such preceding fiscal year and at the close of each fiscal year following the first 10 fiscal years shall credit to the reserve fund such proportion of its net earnings for such preceding fiscal year, not exceeding 10 per centum, as the Board may by regulation prescribe; except that credits to the reserve fund shall be required only when the reserve fund shall not equal 12 per centum of deposit liabilities. A mutual bank may credit such further amounts to the reserve fund as it may determine.

(c) The reserve fund of an operating mutual bank shall be available only for the purpose of meeting losses.

SEC. 9. BORROWING.—A mutual bank may borrow funds subject to such regulations as the Board may prescribe.

SEC. 10. DEPOSITS.—(a) A mutual bank may accept any savings deposit and may issue a passbook or other evidence of its obligation to repay any such savings deposit.

(b) A mutual bank, subject to such regulations and restrictions as the Board finds to be necessary and proper, may accept deposits and issue its certificate of deposit therefor in units or denominations of one hundred dollars or multiples thereof for periods of not less than 2 years and agree to pay interest thereon at the rate, for the term and subject to the conditions specified on the face of such certificate.

(c) Each mutual bank may:

(1) reject any sums offered for deposit; and

(2) repay any deposit at any time.

(d) Except as otherwise provided in this Act, a mutual bank may pay interest on deposits from net earnings and undivided profits at such rates and at such intervals as shall be approved by its trustees.

(e) A mutual bank may at any time by resolution of its board of trustees require that up to ninety days' advance notice be given to it by each depositor before the withdrawal of any deposit or portion thereof; and whenever the board of trustees shall adopt such resolution, no deposit need be paid until the expiration of the notice period applicable thereto in accordance with such resolution. A mutual bank shall notify the Board in writing on the day of adoption of such resolution. Notwithstanding adoption of such resolution, a mutual bank may, in its discretion, permit withdrawal of all or any part of all deposits prior to the expiration of the notice period prescribed by such resolution. Any such resolution may be rescinded at any time.

(f) Whenever any mutual bank shall have been closed by action of its board of trustees or by the authority having supervision of such bank, as the case may be, on account of inability to meet the demands of its depositors, the Board shall appoint the Federal Deposit Insurance Corporation receiver for such closed mutual bank and the Federal Deposit Insurance Corporation shall accept appointment as receiver thereof. The Board and the Federal Deposit Insurance Corporation shall thereupon proceed to handle the affairs of the mutual bank in accordance with the provisions of the Federal Deposit Insurance Act applicable to a closed national bank.

(g) In order to prevent the closing of a mutual bank determined by the Federal Deposit Insurance Corporation to be in danger of closing, or in order to reopen a closed mutual bank, the Federal Deposit Insurance Corporation may exercise any or all of the authority conferred upon it by the provisions of Section 13(c) of the Federal Deposit Insurance Act.

(h) The Federal Deposit Insurance Corporation, in its own right as receiver of a closed mutual bank, may exercise any or all authority conferred upon it in either capacity by the provisions of Section 13(d) of the Federal Deposit Insurance Act.

(i) In order to facilitate the sale of the assets of an open or closed mutual bank to and assumption of its liabilities by another insured bank, as defined in the Federal Deposit Insurance Act, or to facilitate a merger or consolidation of a mutual bank with another insured bank, as so defined, the Federal Deposit Insurance Corporation may exercise any or all of the authority confererd upon it by the provisions of section 13(e) of the Federal Deposit Insurance Act, subject to the conditions therein expressed. Any mutual bank is authorized to contract for sales or loans and pledge any of its assets to secure loans effected pursuant to the provisions of said section 13(e).

SEC. 11. INVESTMENTS.—A mutual bank may invest in the following:

(1) Obligations of the United States and those for which the faith of the United States is pledged to provide for the payment of the interest and principal and obligations of any agency of the United States;

(2) Obligations of any State and those for which the faith of any State is pledged to provide for the payment of the interest and principal;

(3) Obligations issued by a city, village, town, or county in the United States or by a department, agency, district, authority, commission or other public body of the United States, or of any one or more States, but in so doing the mutual bank shall exercise the same degree of care and prudence that persons prompted by self-interest generally exercise in their own affairs;

(4) Any property improvement note issued pursuant to the provisions of title I of the National Housing Act; and other property improvement loans subject to such regulation as the Board may prescribe;

(5) Obligations of the Dominion of Canada or Provinces of the Dominion of Canada payable in United States funds;

(6) Bonds, notes, or other evidences of indebtedness which are secured by properly registered and recorded first mortgages or deeds of trust upon real property, including leasehold estates, provided the security for the loan is a first lien upon the real property or leasehold estate, and subject to the following:

(A) no investment in mortgages executed by any one mortgagor shall in the aggregate exceed 2 per centum of the assets of the mutual bank at the time the investment is made or $25,000, whichever is greater;

(B) no investment in any one mortgage shall exceed 2 per centum of the assets of the mutual bank at the time the investment is made, or $25,000, whichever is greater, or more than 80 per centum of the appraised value of a one- to four-family residence securing a conventional loan or more than 90 per centum of the appraised value of such a residence constructed within not more than ten years before the making of the loan, or more than 75 per centum of the appraised value of any other real property securing a conventional loan;

(C) no investment shall be made in a conventional loan secured by a mortgage on a one- to four-family residence unless the mortgaged property is located either within the State in which the mutual bank has its principal office or within a radius of one hundred miles of its principal office and unless the mortgage has a maturity of not longer than thirty years from the date the loan is made;

(D) no investment shall be made in a conventional loan if the aggregate unpaid principal of all conventional loans in which the mutual bank has invested exceeds 80 per centum of its assets at the time;

(E) a mutual bank may (i) participate with one or more financial institutions, trusts, or pension funds in any bond or note or other evidence of indebtedness secured by a mortgage or deed of trust which such mutual bank is authorized to invest in its own account: *Provided*, That the participating interest of such mutual bank is not subordinated or inferior to any other participating interest; and (ii) participate in the same securities with other than financial institutions, trusts, or pension funds: *Provided*, That the participating interest of such mutual bank is superior to the participating interests of such other participants;

(F) no investment shall be made in a mortgage upon a leasehold unless (i) the principal amount of the mortgage loan is not in excess of 70 per centum of the appraised value of the leasehold. and (ii) provision is made for complete amortization of the loan prior to the expiration of 80 per centum of the remainder of the term by periodic payments as the Board may prescribe; and

(G) nothing contained in this paragraph shall be deemed to prevent investment by a mutual bank in any bond, note, or other evidence of indebtedness which is guaranteed or insured by a Federal or State agency or for which a commitment to guarantee or insure has been issued by a Federal or State agency;

(7) Bankers' acceptances eligible for purchase by Federal Reserve banks;

(8) Corporate securities, but in so doing the mutual bank shall exercise the same degree of care and prudence that persons prompted by self-interest generally exercise in their own affairs, and subject to the following further conditions:

(A) no mutual bank shall invest in any corporate obligation, other than pursuant to paragraph (10), that (i) will mature by its terms within one year from the date of issuance, or (ii) if issued or made in series, or repayable in installments, will have an average maturity as of the date of issuance of less than one year; and

(B) no mutual bank shall invest in stocks an amount greater than 5 per centum of its assets or 100 per centum of its reserve fund and undivided profits, whichever is the greater; and

(9) Obligations of a mutual bank or of a State-chartered mutual savings bank;

(10) Promissory notes of the following types:

(A) any promissory note payable to the order of the mutual bank which is (i) secured by one or more mortgages in which a mutual bank may invest, if the amount so invested in any such note shall not exceed 90 per centum of the principal sum secured by such mortgage or mortgages. The assignment of every mortgage taken as security for any such note shall be recorded or registered in the office of the proper recording officer of the county in which the real property described in such mortgage is located, unless such mortgage or mortgages have been so assigned by a mutual bank; (ii) secured by any of the stocks and bonds in which a mutual bank may invest; or (iii) secured by a life insurance policy, to the extent of such policy's cash surrender value; and

(B) any promissory note payable to the order of the mutual bank which is secured by the assignmcnt of a deposit or share account in any thrift institution, if the amount of the investment in any such note is not in excess of the amount of such deposit or share account.

SEC. 12. BRANCHES.—(a) A mutual bank may, with the approval of the Board, establish and operate one or more branches in the State in which its principal office is located, but only if and to the extent that any financial institution accepting funds from savers on deposit or share accounts and chartered by such State is authorized to establish and operate branches: *Provided*, That in any State where the law expressly prohibits branches or, in the absence of any such law, the establishment and operation of branches are not in conformity with the practice within the State, if the Board determines that chain, group, or affiliated financial institutions operate within the State, a mutual bank may with the approval of the Board establish and operate one or more branches in the State.

(b) Before approving the establishment and operation of a branch office by a mutual bank, the Board shall make with respect thereto the findings required prior to the granting of a charter to a mutual bank.

(c) Notwithstanding any provision of this Act, a mutual bank resulting from conversion, consolidation, or merger may retain and operate any one or more offices in operation on the date of such conversion, consolidation, or merger, and, in addition, may retain any and all unexercised branch rights or privileges enjoyed prior to such date, but only if such office is situated, or such branch right or privilege was exercisable, within the State in which the principal office is located.

SEC. 13. CONVERSION.—(a) With the approval of the Board, and subject to all other provisions of this Act applicable to the chartering of a newly organized mutual bank, unless specifically excepted herein, any thrift institution other than a mutual bank may convert itself into a mutual bank upon the affirmative vote of not less than a majority of the votes cast by those entitled to vote upon the affairs of such thrift institution at a meeting duly called and held for that purpose, and shall thereupon possess the powers of and be subject to the duties imposed upon mutual banks under the provisions of this Act, provided that any such conversion shall not be in contravention of the laws under which the converting thrift institution is organized.

(b) The minimum requirements of twenty-one corporators and seven trustees prescribed by section 4(a) and section 6(a) shall not apply in the case of a thrift institution making application to convert to a mutual bank

(c) Before approving any such conversion, the Board shall find that the thrift institution seeking conversion has the ability to discharge the duties and conform to the restrictions upon mutual banks and has previously so conformed to the extent required by the Board. However, such institution may retain and service all accounts lawfully held by it on the date of its conversion.

(d) Any mutual bank upon affirmative vote of a majority of its corporators may convert itself into any type of thrift institution organized pursuant to Federal law or the laws of the State in which its principal office is located, but any such conversion of a mutual bank shall be subject to requisite approval of any regulatory authority having jurisdiction over the creation of the thrift institution into which the mutual bank seeks to convert and no such conversion of a mutual bank shall take place unless under the law of the State in which such mutual bank is located the type of thrift institution into which the mutual bank is seeking to convert may, without approval by any State authority, convert into a mutual bank under limitations or conditions no more restrictive than those contained in this section with respect to the conversion of a mutual bank into such a thrift institution.

(e) Any conversion pursuant to this Act shall be subject to section 18(c) of the Federal Deposit Insurance Act.

SEC. 14. MERGER AND CONSOLIDATION.—(a) (1) Subject to the provisions of section 18(c) of the Federal Deposit Insurance Act, any two or more mutual banks having their principal offices in the same State, or any one or more mutual banks and one or more State-chartered mutual savings banks having their principal offices in the same State, may, with the approval of the Board where the surviving or consolidated institution is a mutual bank or with the approval of the appropriate State authority where the surviving or consolidated institution is a State-chartered mutual savings bank and upon the affirmative vote of not less than two-thirds of the corporators of each such mutual bank, and, where applicable, upon compliance with the procedure prescribed by the State, enter into an agreement of merger or consolidation. Thereafter the merger or consolidation shall be effective in accordance with the terms of such agreement. (2) No mutual bank may participate in a merger or consolidation when the surviving or consolidated institution is to be a State-chartered mutual savings bank unless under the law of the State in which the mutual bank is located State-chartered mutual savings banks may participate, without approval by any State authority, and under limitations or conditions no more restrictive than those contained in this section, in a merger or consolidation in which the surviving or consolidated institution is to be a mutual bank.

(b) Before approving a merger or consolidation the Board shall give consideration to the purposes of this Act and the prospects of the surviving or consolidated mutual bank for financial success and its ability to discharge the duties and conform to the restrictions imposed upon a mutual bank.

(c) Upon such a consolidation or merger, the corporate existence of each of the constituent institutions shall be merged into and continued in the surviving or consolidated institution, which shall be deemed to be the same corporation as each of the constituent institutions.

(d) All rights, franchises, and property interests of the merged or consolidating mutual bank or banks or State-chartered mutual savings bank or banks shall be transferred to and vested in the surviving or consolidated institution by virtue of the merger or consolidation without the requirement under this Act of any deed or other instrument of transfer; and the surviving or consolidated institution shall be entitled to exercise all rights and privileges of the merged or consolidating mutual bank or banks or State-chartered mutual savings bank or banks in accordance with the terms of the merger or consolidation agreement.

(e) The surviving or consolidated institution shall be responsible for all debts and obligations of the merged or consolidating mutual bank or banks or State-chartered mutual savings bank or banks, in accordance with the terms of the merger or consolidation agreement.

SEC. 15. GENERAL POWERS.—(a) For the purpose of carrying out its functions under this Act, a mutual bank—

(1) shall have indefinite succession;

(2) may adopt and use a seal;

(3) may sue and be sued;

(4) may adopt, amend, and repeal rules and regulations governing the manner in which its business may be conducted and the powers vested in it may be exercised;

(5) may make and carry out such contracts and agreements, provide such benefits to its personnel, and take such other action as it may deem necessary or desirable in the conduct of its business:

(6) may service mortgages for others;

(7) may appoint and fix the compensation of such officers, attorneys, and employees as may be desirable for the conduct of its business, define their authority and duties, require bonds of such of them as the trustees may designate and fix the penalties and pay the premiums on such bonds;

(8) may acquire by purchase or lease such real property or interest therein as the trustees may deem necessary or desirable for the conduct of its business, and sell, lease, or otherwise dispose of such real property or interest therein;

(9) shall have authority, notwithstanding any provision of this or any other Act or regulation, to exercise all the powers possessed now or hereafter by any mutual savings bank chartered by the State in which the mutual bank is located.

(b) In addition to powers expressly enumerated or defined herein, a mutual bank shall have power to do all things reasonably incident to the exercise of such powers.

SEC. 16. ANNUAL REPORT.—The Board shall submit to the President for transmission to the Congress an annual report of its operation under this Act.

SEC. 17. EXAMINATION.—The Board shall conduct an examination twice in each calendar year into the affairs and management of each mutual bank for the purpose of determining whether such bank is being operated in conformity with the provisions of this Act, any rules and regulations promulgated hereunder, and sound banking practice, but the Board, in the exercise of its discretion, may waive one such examination or cause such examinations to be made more frequently if considered necessary. The waiver of one such examination as above provided shall not be exercised more frequently than once during any two-year period. The Board may accept, for any year, in lieu of such examination of any mutual bank, an examination of the mutual bank in such year by the Federal Deposit Insurance Corporation. The expenses of the Board examination herein provided for shall be assessed by the Board upon mutual banks in proportion to their assets. The assessments may be made more frequently than annually at the discretion of the Board. The annual rate of assessment shall be the same for all mutual banks except that mutual banks examined more frequently than twice in one calendar year, shall, in addition, be assessed the expenses of these additional examinations.

SEC. 18. TAXATION.—(a) No State shall impose or permit to be imposed any tax on such mutual banks or their franchise, deposits, assets, reserve funds, loans, or income greater than that imposed or permitted by such State on other similar local mutual or cooperative thrift or home financing institutions.

(b) No State other than the State of domicile shall impose or permit to be imposed any tax on franchises, deposits, assets, reserve funds, loans, or income of institutions chartered hereunder whose transactions within such State do not constitute doing business.

SEC. 19. AUTHORITY TO APPOINT CONSERVATORS AND RECEIVERS.—(a) The Board may, in its discretion, forthwith take possession of the business and property of any mutual bank, and appoint a conservator or receiver for such mutual bank whenever it shall appear that such mutual bank;

(1) has violated any provision of this Act;

(2) is conducting its business in an unauthorized, unsound, or unsafe manner;

(3) is in an unsound or unsafe condition to transact its business;

(4) has neglected or refused upon proper demand to comply with the terms of any order, rule, or regulation of the Board; or

(5) has refused to submit its records and affairs for inspection by the Board or the Federal Deposit Insurance Corporation.

(b) The Board shall appoint only the Federal Deposit Insurance Corporation as receiver for any mutual bank.

(c) At any time within ten days after the Board has taken possession of the property and business of any mutual bank, any officer of such mutual bank may apply to the United States district court for the district in which the mutual bank has its principal office for an order requiring the Board to show cause why it should not be enjoined from continuing such possession and, if a conservator or receiver has been appointed, why such appointment should not be vacated, and the district court is hereby granted jurisdiction to hear such cause, to grant such injunction, to direct the Board to surrender such possession, to vacate such appointment, and to take such other action as is necessary or appropriate to carry out the purposes of this section. Any such proceeding in the district court shall be given precedence over other cases pending therein, and shall be in every way expedited.

SEC. 20. SEPARABILITY.—If any provision of this Act or the application of such provision to any person or circumstances shall be held invalid, the remainder of this Act and the application of such provision to any other person or circumstance shall not be affected thereby.

SEC. 21. RIGHT TO AMEND.—The right to alter, amend, or repeal this Act is hereby expressly reserved.

SECTION-BY-SECTION ANALYSIS OF THE PROPOSED FEDERAL MUTUAL SAVINGS BANK ACT

Section 1, Title: Federal Mutual Savings Bank Act.

Section 2, Declaration of policy: The purpose of establishing a system of Federal mutual savings banks is to promote thrift and use the accumulated savings for home financing and other investments.

Section 3, Definitions: The following terms are defined: Board, conventional loan, doing business, financial institution, mutual bank, State, State of domicile, and thrift institution. "Thrift institution" includes mutual savings banks and mutual savings and loan associations. "Financial institution" includes thrift institutions as so defined, commercial banks, trust companies, and insurance companies.

Section 4, Chartering of Mutual Banks: Five signatories from 21 or more individual corporators may apply for a charter from the Federal Home Loan Bank Board. To issue a charter, the board must find the mutual bank will serve a useful purpose in the community, have reasonable expectation of financial success, and not unduly injure thrift institutions or commercial banks accepting savings deposits. Mutual banks must have the words Federal, mutual and savings in their titles. Each must join the Federal Home Loan Bank System.

Section 5, Corporators: Qualifications for corporators, who select trustees for their mutual bank, and their method of procedure, are prescribed. They are chosen for staggered terms of 10 years.

Section 6, Trustees: Qualifications for trustees of a mutual bank, who manage and control affairs of the mutual bank, are prescribed. The board numbers from 7 to 25. Restrictions against self-dealing are imposed. Trustees are elected by corporators for staggered terms of 3 years.

Section 7, Commencement of operation: Mutual banks must qualify for and maintain Federal Deposit Insurance Corporation insurance of deposits to commence or continue operations. Before opening, a mutual bank must have a cash expense fund in the amount required by the Board. Contributions to the fund will be evidenced by transferable deferred payment certificates.

Section 8, Reserve fund: Before obtaining a charter, a mutual bank must also have a cash initial reserve fund of $50,000 or more as fixed by the Board. Contributions to this fund will also be evidenced by transferable deferred payment certificates. For the first

10 years each mutual bank must place in its reserve fund at least 10 percent of net earnings before interest. Thereafter the percentage shall be fixed by the Board, not over 10 percent. The reserve fund need not be built higher than 12 percent of deposits. The reserve fund is usable only to meet losses.

Section 9, Borrowing: A mutual bank may borrow subject to Board regulations.

Section 10, Deposits: A mutual bank may accept or reject deposits and repay them any time. It may use a passbook or other evidence of its obligation to the depositor. It may issue certificates of deposit for 2 or more years in hundred dollar multiples and agree to pay interest at the rate specified in the certificate. It may pay interest on deposits from net earnings and undivided profits as approved by the trustee. It may invoke a 90-day advance notice of withdrawal. Any closed or weak mutual bank may be treated as specified in the Federal Deposit Insurance Act.

Section 11, Investments: A mutual bank may invest in Federal obligations, municipal securities, property improvement loans insured by FHA under its title I or subject to Board regulation, Canadian Dominion or Provincial obligations payable in U.S. dollars, bankers' acceptances, corporate securities under the prudent man rule plus stated restrictions, mutual savings bank obligations, certain promissory notes, and first mortgage loans on real property under specified restrictions on class of loan, maturity, geographical limits and loan-to-value ratio. A mutual bank may participate in mortgage loans subject to requirements as to equality or priority of lien.

Section 12, Branches: With Board approval, a mutual bank may establish branches in the State of its principal office only to the extent any State-chartered financial institution can, or in chain or group banking States that otherwise permit no branch banking. The Board must first make the findings required for issuing a mutual bank charter. A mutual bank resulting from conversion or consolidation may retain all existing offices and unexercised branch rights within the State of its principal office.

Section 13, Conversion: With Board approval and subject to new charter provisions, any thrift institution may convert into a mutual bank, under the specified procedure. Such conversion cannot contravene laws of the State under which the converting institution is organized. Minimum requirements for corporators and trustees need not apply to converted institutions. To approve conversion the Board must find the converting institution can perform the duties of and meet the restrictions on, mutual banks. A converted mutual bank may retain all accounts lawful on the date of conversion.

A mutual bank may convert into any thrift institution, with approval of the authority regulating the resulting institution. Before a mutual bank can convert to a State-chartered thrift institution, the State must allow conversion in the opposite direction on no more restrictive terms. Conversion is subject to FDIC controls under section 18(c) of the Federal Deposit Insurance Act.

Section 14, merger and consolidation: Mutual banks may merge or consolidate with each other or with State-chartered mutual savings banks in the same State (with State approval if the resulting mutual savings bank is State-chartered). The law of the State must allow State-chartered mutual savings banks to merge or consolidate with a mutual bank without State approval, before a mutual bank can merge or consolidate with a resulting State-chartered mutual savings bank. Before approving, the Board must consider the purposes of this act, the prospects of financial success and ability to perform duties and meet restrictions of a mutual bank. The corporate existence of all institutions taking part in a consolidation or merger is continued in the survivor, and all rights and obligations are automatically transferred.

Section 15, general powers: A mutual bank is expressly given general operational powers by this section. It also may exercise all powers possessed now or hereafter by mutual savings banks chartered by the State in which the mutual bank is located. A mutual bank is also given powers reasonably incident to the exercise of express powers.

Section 16, annual report: The Board must submit an annual report to the President for transmission to the Congress.

Section 17, examination: The Board must examine each mutual bank at least 3 times every 2 years, but may accept FDIC examinations instead. Expenses of examinations are to be assessed upon mutual banks in proportion to assets under a uniform annual rate, but additional examinations over two a year may be assessed against the mutual bank so examined.

Section 18, taxation: No State shall tax mutual banks higher than they do similar local mutual or cooperative thrift or home financing institutions. No State other than the State of domicile shall tax mutual banks for transactions within the State that do not constitute doing business.

Section 19, authority to appoint conservators and receivers: The Board may take over a mutual bank and name a conservator or receiver for any of the reasons listed in this section. It shall name only the FDIC as receiver. Within 10 days after takeover, any mutual bank officer may apply to the proper U.S. district court for an order to the Board to show cause why it should not be enjoined from continuing in possession. The court is empowered to vacate the appointment of a conservator or receiver if warranted. The court proceedings are entitled to precedence over other pending cases.

Section 20, separability: If any provision of the act or its application to any person or circumstance is held invalid, the rest of the act and its application to other persons or circumstances is not affected by that fact.

Section 21, right to amend: The right to alter, amend, or repeal the act is expressly reserved.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. MULTER (at the request of Mr. ALBERT) for Monday, September 11 and Tuesday, September 12, on account of Jewish holidays.

Mr. THOMPSON of New Jersey (at the request of Mr. ROGERS of Colorado) for today on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders hertofore entered, was granted:

Mr. REUSS for 30 minutes today, and to revise and extend his remarks.

Mr. BAILEY, for Thursday next for 45 minutes.

Mr. PATMAN, for 30 minutes, on Tuesday and Wednesday, to revise and extend his remarks, and to include extraneous matter.

Mr. HOFFMAN of Michigan, for 10 minutes today, and to revise and extend his remarks.

Mr. BRUCE (at the request of Mr. LANGEN) for 1 hour, on September 12.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. MACK.

Mr. DENTON and include an article on rural area development by the Department of Agriculture.

Mr. CANNON and to include certain tabulations on appropriation bills for this session of Congress.

(The following Members (at the request of Mr. LANGEN) and to include extraneous matter:)

Mr. ALGER.

Mr. MCINTIRE.

(The following Members (at the request of Mr. ALBERT) and to include extraneous matter:)

Mr. COOLEY.

Mr. CORMAN.

Mr. PUCINSKI.

Mr. HECHLER.

SENATE BILLS AND JOINT RESOLUTION REFERRED

Bills and a joint resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 476. An act to establish the Point Reyes National Seashore in the State of California, and for other purposes; to the Committee on Interior and Insular Affairs.

S. 502. An act to authorize the employment of retired personnel of the Federal Government by the Board of Education of the District of Columbia, and to authorize the employment of retired personnel of the Board of Education of the District of Columbia by the Federal Government; to the Committee on the District of Columbia.

S. 653. An act to provide for the presentation by the United States to the people of Mexico of a monument commemorating the independence of Mexico, and for other purposes; to the Committee on Foreign Affairs.

S. 914. An act to provide for more effective administration of public assistance in the District of Columbia; to make certain relatives responsible for the support of needy persons, and for other purposes; to the Committee on the District of Columbia.

S. 1563. An act to authorize the conveyance of certain lands within the Clark Hill Reservoir, Savannah River, Ga.-S. C., to the Georgia-Carolina Council, Inc., Boy Scouts of America, for recreation and camping purposes; to the Committee on Public Works.

S. 1918. An act to extend benefits of the Policemen and Firemen's Retirement and Disability Act Amendments of 1957 to widows and surviving children of former members of the Metropolitan Police force, the Fire Department of the District of Columbia, the U.S. Park Police force, the White House Police force, or the U.S. Secret Service Division, who were retired or who died in the service of any such organization prior to the effective date of such amendments; to the committee on the District of Columbia.

S. 2180. An act to establish a U.S. Arms Control and Disarmament Agency for World Peace and Security; to the Committee on Foreign Affairs.

S. 2299. An act to provide for the establishment of a juvenile division within or in connection with the District of Columbia Youth Correctional Center, and to authorize the judge of the juvenile court of the District of Columbia to commit to such juvenile division, subject to the provisions of the Juvenile Court Act, children 15 years of age,

or older; to the Committee on the District of Columbia.

S. 2397. An act authorizing the National Capital Transportation Agency to carry out part 1 of its transit development program and to further the objectives of the act approved July 14, 1960 (74 Stat. 537); to the Committee on the District of Columbia.

S.J. Res. 51. Joint resolution authorizing the creation of a commission to consider and formulate plans for the construction in the District of Columbia of an appropriate permanent memorial to the memory of Woodrow Wilson; to the Committee on House Administration.

ENROLLED BILLS SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker pro tempore:

H.R. 1021. An act to extend for 2 years the definition of "peanuts" which is now in effect under the Agricultural Adjustment Act of 1938;

H.R. 2877. An act to authorize the Director, Office of Civil and Defense Mobilization, to approve a financial contribution for civil defense purposes to the State of Oklahoma;

H.R. 6302. An act to establish a teaching hospital for Howard University, to transfer Freedmen's Hospital to the university, and for other purposes;

H.R. 6309. An act to amend title VI of the Merchant Marine Act, 1936, as amended, in order to increase certain limitations in payments on account of operating differential subsidy under such title;

H.R. 6732. An act to amend the Merchant Marine Act, 1936, as amended, to encourage the construction and maintenance of American-flag vessels built in American shipyards;

H.R. 6969. An act to amend title 38, United States Code, to increase dependency and indemnity compensation in certain cases;

H.R. 6974. An act to amend section 607(b) of the Merchant Marine Act, 1936, as amended;

H.R. 7043. An act to extend to employees subject to the Classification Act of 1949 the benefits of salary increases in connection with the protection of basic compensation rates from the effects of downgrading actions, to provide salary protection for postal field service employees in certain cases of reduction in salary standing, and for other purposes;

H.R. 7622. An act to repeal sections 1176 and 1177 of the Revised Statutes of the United States relating to the District of Columbia;

H.R. 8406. An act to further amend Reorganization Plan No. 1 of 1958, as amended, in order to change the name of the office established under such plan; and for other purposes;

H.R. 8466. An act to authorize the construction of a railroad siding in the vicinity of Taylor Street NE., District of Columbia; and

H.R. 8719. An act to amend the act of July 23, 1947, chapter 301, as amended, to extend for 2 years the authority to make temporary appointments and promotions in the U.S. Coast Guard.

SENATE ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The SPEAKER pro tempore announced his signature to enrolled bills and a joint resolution of the Senate of the following titles:

S. 48. An act to authorize the Secretary of the Army to modify certain leases entered into for the provision of recreation facilities in reservoir areas;

S. 203. An act to declare that the United States holds trust for the pueblos of Santa Ana, Zia, Jemez, San Felipe, Santo Domingo, Cochiti, Isleta, and San Ildefonso;

S. 322. An act to make certain funds available to the Nez Perce Tribe of Idaho;

S. 344. An act to amend the Seneca Leasing Act of August 14, 1950 (64 Stat. 442);

S. 541. An act to amend the Act of June 1, 1948 (62 Stat. 281), to empower the Administrator of General Services to appoint nonuniformed special policemen;

S. 685. An act to amend the Coast and Geodetic Survey Commissioned Officers Act of 1948, as amended, and for other purposes;

S. 931. An act to repeal that part of the Act of March 2, 1889, which requires that grantors furnish, free of all expenses to the Government, all requisite abstracts, official certifications and evidence of title;

S. 935. An act for the relief of certain members of the Army National Guard of the United States and the Air National Guard of the United States;

S. 1365. An act to amend the Shipping Act, 1916, to provide for licensing independent ocean freight forwarders, and for other purposes;

S. 1501. An act to authorize the Secretary of the Interior to contract for the sale, operation, maintenance, repair, or relocation of Government-owned electric and telephone lines and other utility facilities used for the administration of the Bureau of Indian Affairs;

S. 1518. An act providing for the disposition of judgment funds of the Omaha Tribe of Indians;

S. 2016. An act to give the Walker River Paiute Tribe the reserved minerals underlying its reservation;

S. 2216. An act to authorize the transfer of three units of the Fort Belknap Indian irrigation project to the landowners within the project;

S. 2224. An act to grant minerals, including oil, gas, and other natural deposits, on certain lands in the Northern Cheyenne Indian Reservation, Mont., to certain Indians, and for other purposes;

S. 2395. An act to amend the Railroad Retirement Act of 1937 to provide reduced annuities to male employees who have attained age 62, and for other purposes;

S. 2422. An act concerning the White House and providing for the care and preservation of its historic and artistic contents; and

S.J. Res. 98. Joint resolution to provide for the observance of the centennial of the enactment of the Homestead Act.

ADJOURNMENT

Mr. ALBERT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 21 minutes p.m.), the House adjourned until tomorrow, Tuesday, September 12, 1961, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1301. A letter from the Administrator, General Services Administration, transmitting the report of the Archivist of the United States on records proposed for disposal under the law; to the Committee on House Administration.

1302. A letter from the Assistant Comptroller General of the United States, transmitting our report on the audit of the helium operations of the Bureau of Mines, Department of the Interior, March 31, 1960; to the Committee on Government Operations.

1303. A letter from the Chairman, U.S. Civil Service Commission, transmitting a draft of a proposed bill entitled "A bill to provide for the payment of compensation and restoration of employment benefits to certain Federal officers and employees improperly deprived thereof, and for other purposes"; to the Committee on Post Office and Civil Service.

1304. A letter from the Attorney General, transmitting a draft of a proposed bill entitled "A bill to amend the Immigration and Nationality Act so as to remove limitations on the authority of the Attorney General to prescribe the fees to be charged for services rendered to individuals and to authorize the Attorney General to prescribe such fees administratively on a basis commensurate with the services rendered"; to the Committee on the Judiciary.

1305. A letter from the Commissioner, Immigration and Naturalization Service, U.S. Department of Justice, transmitting copies of orders entered in cases of the following aliens who have been found admissible to the United States, pursuant to the Immigration and Nationality Act; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, pursuant to the order of the House of September 7, 1961, the following conference report was filed on September 8, 1961:

Mr. SHEPPARD: Committee of conference. H.R. 8302. A bill making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1962, and for other purposes (Rept. No. 1156). Ordered to be printed.

Under clause 2 of rule XIII, pursuant to the order of the House of September 7, 1961, the following bill was reported on September 9, 1961:

Mr. BOGGS: Committee on Ways and Means. H.R. 8847. A bill to amend the Internal Revenue Code of 1954 so as to provide that certain distributions of stock made pursuant to orders enforcing the antitrust laws shall not be treated as dividend distributions but shall be treated as a return of basis and result in gain only to the extent basis of the underlying stock is exceeded; with amendment (Rept. No. 1157). Referred to the Committee of the Whole House on the State of the Union.

[*Submitted September 11, 1961*]

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ASPINALL: Committee of conference. H.R. 7916. A bill to expand and extend the saline water conversion program being conducted by the Secretary of the Interior (Rept. No. 1158). Ordered to be printed.

Mr. SELDEN: Committee on Foreign Affairs. H.R. 8895. A bill to amend the joint resolution providing for membership and participation by the United States in the Inter-American Children's Institute; without amendment (Rept. No. 1159). Referred to the Committee of the Whole House on the State of the Union.

Mr. MORRIS K. UDALL: Committee on Post Office and Civil Service. H.R. 7791. A bill to amend title 13 of the United States

Code to provide for the collection and publication of foreign commerce and trade statistics, and for other purposes; without amendment (Rept. No. 1160). Referred to the Committee of the Whole House on the State of the Union.

Mr. CELLER: Committee of conference. S. 1653. A bill to amend title 18, United States Code, to prohibit travel in aid of racketeering enterprises (Rept. No. 1161). Ordered to be printed.

Mr. HALEY: Committee of conference. S. 1540. A bill to amend the law establishing the Indian revolving loan fund. (Rept. No. 1162). Ordered to be printed.

Mr. ROONEY: Committee of conference. H.R. 7371. A bill making appropriations for the Departments of State and Justice, the judiciary, and related agencies for the fiscal year ending June 30, 1962, and for other purposes (Rept. No. 1163). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ASPINALL (by request):

H.R. 9115. A bill to provide for the satisfaction of claims arising out of scrip, lieu selection, and similar rights; to the Committee on Interior and Insular Affairs.

By Mr. DOLE:

H.R. 9116. A bill to amend the Agricultural Act of 1961 to establish a uniform base period for the 1962 wheat program; to the Committee on Agriculture.

By Mr. KEARNS:

H.R. 9117. A bill to strengthen democratic processes respecting the calling of strikes, to protect employees against unjustifiable pay losses from strikes, to protect employers from needless production interruptions arising out of strikes contrary to the wishes of employees, and to minimize industrial strife interfering with the flow of commerce and the national security by amending the National Labor Relations Act to require economic strikes to be authorized by a secret ballot; to the Committee on Education and Labor.

By Mr. MORGAN:

H.R. 9118. A bill to establish a U.S. Arms Control Agency; to the Committee on Foreign Affairs.

By Mr. VINSON:

H.R. 9119. A bill to authorize the disposition from the national stockpile of approximately 10,000 long tons of pig tin; to the Committee on Armed Services.

By Mr. WALTER:

H.R. 9120. A bill to amend the Subversive Activities Control Act of 1950 so as to require the Postmaster General in certain cases to give notice of the use of the mails for the dissemination of Communist propaganda; to the Committee on Un-American Activities.

By Mr. WEAVER:

H.R. 9121. A bill to help maintain the financial solvency of the Federal Government by reducing nonessential expenditures through reduction in personnel in various agencies of the Federal Government by attrition, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. MULTER:

H.R. 9122. A bill to authorize Federal mutual savings banks; to the Committee on Banking and Currency.

By Mr. ADDONIZIO:

H.R. 9123. A bill to authorize Federal mutual savings banks; to the Committee on Banking and Currency.

By Mr. BARRETT:

H.R. 9124. A bill to authorize Federal mutual savings banks; to the Committee on Banking and Currency.

By Mr. FINO:

H.R. 9125. A bill to authorize Federal mutual savings banks; to the Committee on Banking and Currency.

By Mr. WEAVER:

H.J. Res. 568. Joint resolution expressing a declaration of war against the 98 Communist Parties constituting the international Communist conspiracy; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BALDWIN:

H.R. 9126. A bill for the relief of Mrs. Trinidad A. Calvo; to the Committee on the Judiciary.

By Mr BELL:

H.R. 9127. A bill for the relief of Mrs. Llona Hanto; to the Committee on the Judiciary.

By Mr. GUBSER:

H.R. 9128. A bill for the relief of Sgt. Ernest I. Aguilar; to the Committee on the Judiciary.

By Mr. SCHERER:

H.R. 9129. A bill for the relief of Caroline G. Junghans; to the Committee on the Judiciary.

By Mr. MORRIS K. UDALL:

H.R. 9130. A bill to provide for the acquisition of a patented mining claim on the south rim of Grand Canyon National Park, and for other purposes; to the Committee on Interior and Insular Affairs.

SENATE

MONDAY, SEPTEMBER 11, 1961

The Senate met at 9 o'clock a.m., and was called to order by the Vice President.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer.

Father of all men, standing in the midst of swift social currents and of evil forces whose hideous cruelty stabs our anguished hearts, we confess that the world in which our lot is cast is too much for us. Because there is no solution of the world's ills, save as it springs from Thy sovereignty and from the hearts of men, we pray for ourselves—create within us clean hearts, O God, and renew right spirits within us.

Give us to see that the pride of nations, their covetousness, their greed, their assaults against the rights of others, are the very evils that seek to corrode our own souls:

Breathe on us breath of God,
Fill us with life anew,
That we may love what Thou dost love,
And do what Thou wouldst do.

In the dear Redeemer's name we ask it. Amen.

THE JOURNAL

On request of Mr. MANSFIELD, and by unanimous consent, the reading of the Journal of the proceedings of Friday, September 8, 1961, was dispensed with.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILL

Messages in writing from the President of the United States were communicated to the Senate by Mr. Ratchford, one of his secretaries, and he announced that on September 8, 1961, the President had approved and signed the act (S. 2239) to amend the act entitled "An act to incorporate the National Society of the Sons of the American Revolution," approved June 9, 1906 (34 Stat. 227), in order to remove the statutory limitation on the amount of property such society may receive, purchase, hold, sell, and convey at any one time.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. MANSFIELD. Mr. President, under the rule, there will be the usual morning hour for the transaction of routine business. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

CALL OF THE CALENDAR DISPENSED WITH

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the call of the legislative calendar under rule VIII be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. MANSFIELD, and by unanimous consent, the Committee on Interior and Insular Affairs was authorized to meet during the session of the Senate today.

Upon request of Mr. MANSFIELD, and by unanimous consent, the Subcommittee on Juvenile Delinquency of the Committee on the Judiciary was authorized to meet during the session of the Senate today.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following letters, which were referred as indicated:

DISPOSITION OF CERTAIN PIG TIN

A letter from the Acting Administrator, General Services Administration, Washington, D.C., transmitting a draft of proposed legislation to authorize the disposition from the national stockpile of approximately 10,000 long tons of pig tin (with an accompanying paper); to the Committee on Armed Services.

AMENDMENT OF IMMIGRATION AND NATIONALITY ACT, RELATING TO FEES FOR CERTAIN SERVICES

A letter from the Attorney General, transmitting a draft of proposed legislation to amend the Immigration and Nationality Act so as to remove limitations on the authority of the Attorney General to prescribe the

fees to be charged for services rendered to individuals and to authorize the Attorney General to prescribe such fees administratively on a basis commensurate with the services rendered (with an accompanying paper); to the Committee on the Judiciary.

ADMISSION INTO THE UNITED STATES OF CERTAIN DEFECTOR ALIENS

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders entered granting admission into the United States of certain defector aliens (with accompanying papers); to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. JORDAN, from the Committee on Rules and Administration, without amendment:

H.J. Res. 558. Joint resolution providing for printing copies of "Cannon's Procedure in the House of Representatives" (Rept. No. 960);

H. Con. Res. 12. Concurrent resolution authorizing the printing of additional copies of House Document 412, 85th Congress (Rept. No. 961);

H. Con. Res. 364. Concurrent resolution to print as a House document the publication "World Communist Movement—Selective Chronology, 1818–1957, Volume 1," and to provide for the printing of additional copies (Rept. No. 962);

H. Con. Res. 384. Concurrent resolution authorizing the printing of additional copies of the report "Communist Target—Youth—Communist Infiltration and Agitation Tactics" (Rept. No. 963); and

H. Con. Res. 385. Concurrent resolution authorizing the printing of a manuscript entitled "History of the House of Representatives" (Rept. No. 964).

By Mr. GRUENING, from the Committee on Interior and Insular Affairs, without amendment:

H.R. 2280. An act to provide for the withdrawal of certain public lands 40 miles east of Fairbanks, Alaska, for use by the Department of the Army as a Nike range (Rept. No. 965);

H.R. 2281. An act to reserve for use by the Department of the Army at Fort Richardson, Alaska, certain public lands in the Campbell Creek area, and for other purposes (Rept. No. 966);

H.R. 2282. An act to provide for the withdrawal from the public domain of certain lands in the Ladd-Eielson area, Alaska, for use by the Department of the Army as the Yukon Command training site, Alaska, and for other purposes (Rept. No. 968); and

H.R. 2283. An act to provide for the withdrawal from the public domain of certain lands in the Big Delta area, Alaska, for continued use by the Department of the Army at Fort Greely, and for other purposes (Rept. No. 969).

By Mr. GRUENING, from the Committee on Interior and Insular Affairs, with amendments:

H.R. 2279. An act to provide for the withdrawal from the public domain of certain lands in the Granite Creek area, Alaska, for use by the Department of the Army at Fort Greely, Alaska, and for other purposes (Rept. No. 967).

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. HUMPHREY (for himself, Mr. METCALF, Mr. MCGEE, Mr. MOSS, Mr. BURDICK, Mr. CHAVEZ, Mr. MCCARTHY, Mr. MCNAMARA, Mrs. NEUBERGER, and Mr. YARBOROUGH):

S. 2526. A bill to amend and extend the provisions of the Sugar Act of 1948, as amended; to the Committee on Finance.

(See the remarks of Mr. HUMPHREY when he introduced the above bill, which appear under a separate heading.)

By Mr. RANDOLPH:

S. 2527. A bill for the relief and benefit of Gianpietro Vittorio Monetti; to the Committee on the Judiciary.

By Mr. SPARKMAN (for himself and Mr. BUSH):

S. 2528. A bill to authorize the establishment of Federal mutual savings banks; to the Committee on Banking and Currency.

(See the remarks of Mr. SPARKMAN when he introduced the above bill, which appear under a separate heading.)

By Mr. GORE:

S.J. Res. 135. Joint resolution to waive certain provisions of the Atomic Energy Act of 1954 so as to permit the agreement for cooperation between the United States and France to be made immediately effective; to the Joint Committee on Atomic Energy.

CONCURRENT RESOLUTION

COMMEMORATION OF 100TH ANNIVERSARY OF THE EMANCIPATION PROCLAMATION

Mr. KEATING submitted a concurrent resolution (S. Con. Res. 45) requesting the President to issue a Declaration of Freedom on January 1, 1963, in commemoration of the 100th anniversary of the Emancipation Proclamation, which was referred to the Committee on the Judiciary.

(See the above concurrent resolution printed in full when submitted by Mr. KEATING, which appears under a separate heading.)

RESOLUTIONS

STUDIES AND REPORT ON LEAD, ZINC, AND CERTAIN OTHER MINERALS BY TARIFF COMMISSION

Mr. DIRKSEN (for himself, Mr. MANSFIELD, Mr. COOPER, Mr. MORTON, Mr. ALLOTT, and Mr. DWORSHAK) submitted the following resolution (S. Res. 206); which was referred to the Committee on Finance:

Whereas pursuant to a resolution of the Senate Committee on Finance, dated August 14, 1954, the United States Tariff Commission made an investigation under Section 332 of the Tariff Act of 1930, of the domestic fluorspar industry and submitted a report of the results thereof to the said committee on June 6, 1955 and the Senate of the United States subsequently on August 21, 1959, by S. Res. 163, directed the United States Tariff Commission to bring up to date said report and to submit its findings not later than February 21, 1960; and

Whereas pursuant to a resolution of the United States Senate adopted August 21, 1959, the United States Tariff Commission was directed to make a supplemental investigation of conditions in the lead and zinc industry and to bring up to date its report on lead and zinc which had previously been made on April 19, 1954; and

Whereas the industries producing manganese, cobalt, mercury, and beryllium are becoming more and more distressed and such distress could have an effect on our national security: Now, therefore, be it

Resolved, That the United States Tariff Commission is hereby directed, pursuant to section 332 of the Tariff Act of 1930, to make further studies and bring up to date the reports on lead, zinc, and fluorspar and to report to the Congress on or before January 31, 1962, and to conduct investigations of conditions in the industries producing manganese, cobalt, mercury, and beryllium and report to Congress not later than March 15, 1962.

The supplemental reports and new reports shall include a summary of the facts obtained in the investigation, including a description of the domestic industry, domestic production, foreign production, comparative costs of domestic and foreign production, including labor costs, imports, consumption, channels and methods of distribution, United States exports, and other factors affecting the competition between domestic and imported products. In the course of the investigations, the Commission shall hold hearings, giving adequate opportunity to interested parties to appear and be heard, except that in the case of lead, zinc, and fluorspar where reports are being brought up to date, the matter of further hearings shall be left to the discretion of the Tariff Commission.

THE PRESENT SITUATION IN THE CONGO

Mr. DODD submitted a resolution (S. Res. 207) establishing the Select Committee on the Congo, which was referred to the Committee on Foreign Relations.

(See the above resolution printed in full when submitted by Mr. DODD, which appears under a separate heading.)

REVISED SUGAR ACT

Mr. HUMPHREY. Mr. President, I introduce, for appropriate references, a bill to amend and extend the provisions of the Sugar Act of 1948, as amended. Other Senators joining with me in the introduction of this bill are Senators METCALF, MCGEE, MOSS, BURDICK, CHAVEZ, MCCARTHY, MCNAMARA, NEUBERGER, and YARBOROUGH.

Mr. President, the purpose of this bill is to give consideration to our domestic sugar beet producers in the United States in light of what has taken place concerning Cuban sugar. As you know, Mr. President, we used to purchase over 3 million tons a year of our domestic requirements from Cuba. The reallocation of this Cuban allotment is now taking place, and I think it is only fair and equitable that our own sugar producers, especially our beet producers, come in for some consideration. The bill I am introducing today is designed for that purpose. I intend it to be a point of departure for legislation to assist our domestic sugar beet producers.

This bill calls for an increase of 20 percent in domestic beet tonnage, from 1,800,000 to 2,600,000 tons per year.

Mr. President, each December the Secretary of Agriculture make a decision as to what our national sugar requirements will be for the coming year.

This past December it was determined that our requirements for calendar 1961 would be 10 million tons. In view of such extensive requirements, I think it is fair and proper that our domestic sugarbeet producers should be able to share to a greater extent in the reallocation of sugar quotas occasioned by the cessation of our imports from Cuba.

We extended the present Sugar Act in this session of Congress. However, it expires at the end of this fiscal year and new legislation is going to be required. This bill, in which I am being joined by a number of other Senators, represents our interest in the welfare of our domestic sugarbeet producer. He should not become the forgotten man under any new sugar legislation, and the purpose of the bill is to see that he does not.

I wish to call your attention, Mr. President, to the fact that the bill does not make any mention of sugarbeet acreage or where the acreage under this increase tonnage allocation is to be planted. This is a decision which I think should properly be arrived at by the beet producers themselves through their regional and national organizations. I feel that it is the duty of the Congress to provide for the increased tonnage, but it would be a grave error for the Congress to attempt to dictate any determination of the geographic area in the United States where these beets are to be grown.

I invite the attention of all my colleagues to this proposed legislation, and request unanimous consent that it be laid on the table for a period of 1 week so that any other interested Senators may join as cosponsors.

Mr. President, I further request unanimous consent that the text of the bill be printed at this point in the RECORD.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD, and will lie on the desk, as requested by the Senator from Minnesota.

The bill (S. 2526) to amend and extend the provisions of the Sugar Act of 1948, as amended, introduced by Mr. HUMPHREY, was received, read twice by its title, referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 202 of the Sugar Act of 1948 is amended by striking out of the table in subsection (a)

"Domestic beet area..... 1,800,000"

and inserting in lieu thereof

"Domestic beet area..... 2,160,000";

by striking out of subsections (a) and (c) thereof "four million four hundred forty-four thousand" in each place it appears therein and inserting in lieu thereof "four million eight hundred four thousand"; and by amending subparagraph (D) of subsection (a)(2) thereof to read as follows: "(D) any additional amount shall be apportioned on the basis of 1,800,000 short tons raw value for the Domestic beet sugar area and the quotas for the other areas established in paragraph (1) of this subsection as adjusted by subparagraphs (A), (B), and (C) of this paragraph (2)".

SEC. 2. Section 408(b) of such Act is amended by striking out "June 30, 1962" in each place it appears therein and inserting in lieu thereof "June 30, 1967".

SEC. 3. Section 412 of such Act is amended by striking out "June 30, 1962" and inserting in lieu thereof "June 30, 1967" and by striking out "1962" where it appears the second time and inserting in lieu thereof "1967".

SEC. 4. (a) Section 4501(c) of the Internal Revenue Code of 1954 is amended by striking out "1962" in each place it appears therein and inserting in lieu thereof "1967".

(b) Section 6412(d) of the Internal Revenue Code of 1954 is amended by striking out "December 31, 1962" and inserting in lieu thereof "December 31, 1967" and by striking out "March 31, 1963" and inserting in lieu thereof "March 31, 1968".

SEC. 5. The amendments herein shall become effective July 1, 1962 except that sections 1 and 2 hereof shall be effective upon enactment for purposes of issuing proclamations, determinations, and regulations required for the calendar year 1962.

A NEW DECLARATION OF FREEDOM

Mr. KEATING. Mr. President, January 1, 1963, will mark the 100th anniversary of the Emancipation Proclamation. In the midst of Civil War centennial ceremonies this date should inspire the most worthy and important observance of all. All too many of the celebrations to date have emphasized the bloody and divisive aspects of the Civil War struggle. A particularly ironic feature of some of these celebrations has been that the facilities themselves have been segregated, a fact which illustrates the contemporary aspects of the continuing struggle for human freedom.

We should not continue to pay elaborate attention to the bloody battles of the war and ignore its proudest and most constructive moment. Sacrifices of life and limb in battle and the bitterness that caused and resulted from the struggle were justified, if at all, only by the triumph of principle over prejudice that gained expression Lincoln's proclamation. The battles which pitted American against American were tragic. The Presidential Proclamation that ended slavery was a glorious triumph.

Let us begin to remember and build on the constructive results of the Civil War. In this vein I am today introducing a concurrent resolution calling on the President to issue a declaration for freedom on the 100th anniversary of the Emancipation Proclamation. Such a declaration by the President would be a fitting reminder to the world that America is totally committed to the cause of human freedom and justice at home as well as abroad.

Of course the struggle for equal justice will not be won simply by issuing declarations of righteous goals. But such declarations can help pave the way for more concrete achievements. I hope that in this spirit, all Members of Congress will see fit to support this resolution.

I therefore submit, for appropriate reference, a concurrent resolution requesting the President to issue a declaration of freedom on January 1, 1963, in commemoration of the 100th anniversary of the Emancipation Proclamation.

The VICE PRESIDENT. The concurrent resolution will be received and appropriately referred.

The concurrent resolution (S. Con. Res. 45) requesting the President to issue a declaration of freedom on January 1, 1963, in commemoration of the 100th anniversary of the Emancipation Proclamation, submitted by Mr. Keating, was referred to the Committee on the Judiciary, as follows:

Whereas the founders of this Nation declared their belief that "all men are endowed by their Creator with certain inalienable rights, and among these are life, liberty, and the pursuit of happiness * * * and to secure these rights Governments are instituted among men * * *"; and

Whereas these principles were reaffirmed during the Civil War by many brave men and especially by Abraham Lincoln, whose Emancipation Proclamation remains a great milestone on our Nation's road toward equal justice for all citizens; and

Whereas this Nation has since its founding been in the vanguard of nations striving to carry the torch of liberty and justice to all people throughout the world; and

Whereas significant strides in the field of civil rights have been made during recent years, particularly in the fields of public education, the Armed Forces, and Government service; and

Whereas much remains to be done, particularly in the fields of voting, housing, and employment practices; and

Whereas freedom is indivisible, and no American citizen can rest until every citizen is treated with equal dignity; and

Whereas Americans from minority groups have achieved prominence and made noteworthy contributions in all walks of life—in medicine, sports, diplomacy, and law, among others; and

Whereas members of the generation currently entrusted with the treasure that is America are striving to pass on to their children an enriched and ennobled way of life, in a country where the rights and duties of citizenship fall on the shoulders of everyone without reference to race, religion, or national origin; and

Whereas, there are many advances toward the goal of liberty and justice that cannot be made by law, but require constant moral leadership and a responsive good will on the part of everyone who lives in America; and

Whereas, in the struggle against communism which does not recognize individual rights, it is essential that our faith in human dignity and freedom be reaffirmed; and

Whereas, on January 1, 1963, this Nation commemorates the 100th anniversary of the Emancipation Proclamation; and

Whereas, while the pressing claim in 1863 was for the emancipation of the slaves, the immediate and urgent imperative in 1963 is to protect every American's enjoyment of freedom in justice and in equality which is our birthright and heritage: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that the President, on January 1, 1963, issue a declaration of freedom, reaffirming the sacred and historic principles of liberty, justice, and equality upon which this Nation was founded, and rededicating our people and our Government to the solemn responsibility of honoring and practicing those principles and of perpetuating them as our God-given heritage.

THE PRESENT SITUATION IN THE CONGO

Mr. DODD. Mr. President, I submit for appropriate reference, a resolution providing for the establishment of a select committee of the Senate for the

purpose of investigating the present situation in the Congo.

On Friday I spoke in the Senate pointing out that there is a serious danger that the Communists will take over in the Congo and thus secure for themselves a base for operations that will affect the whole of central Africa. I said that the United Nations has been preparing the way, step-by-step, for a Communist takeover in the Congo and that, in forcibly removing the officer corps of the Katanga Army and preparing the downfall of President Tshombe, the United Nations would create a vacuum that only the Communists could fill.

I said that I had reason to believe that we had only months or weeks in which to salvage this situation.

It has been suggested to me that it is not within the competence of the Senate to investigate the United Nations or United Nations policy. This may be true. But the United States has a large voice within the United Nations, and it plays a key role in determining United Nations policy. Moreover, of the hundred million dollars or more that the United Nations has already spent or budgeted in the Congo, the United States will foot the bill for more than half.

I certainly believe that it is within the competence of the Senate to investigate the general situation in the Congo as it affects the interest of the United States; to investigate the role that the United States has played in determining and participating in United Nations policy in the Congo, and to investigate what is being done with the American taxpayers' money.

Mr. President, I have made the composition of the proposed select committee as broad as possible because I feel that the Senate as a whole, as well as several standing committees of the Senate, are vitally interested in what transpires there. In the resolution as I now submit it, two members of the select committee will be chosen from the membership of the Committee on Foreign Relations; two members from the Committee on Appropriations; two members from the Committee on Government Operations; two members from the Committee on Armed Services; four members from the Senate at large without regard to committee assignments. There will, in addition, be a chairman. The bill further specifies that the said committees, to which I have referred, will be represented on the select committee in each case by a member of the majority party and a member of the minority party.

Mr. President, time is running out in the Congo. I earnestly hope that this measure can be acted on in the brief time remaining before this session of Congress adjourns.

Meanwhile, I have this morning sent telegrams to Ambassador Stevenson and to the Department of State urging them to insist within the U.N. that, until there has been an opportunity for a reappraisal of the entire situation, the U.N. Command in the Congo take no further action against white officers or white advisers in Katanga Province; that it release those officers and advisers now in custody and permit them to resume their positions; and that it take no further measures to force the submission of President Tshombe to the coalition government in Leopoldville, in which both the Vice Premier and the Minister of the Interior are both Prague-trained Communists.

Mr. President, I ask unanimous consent that the text of my resolution be printed at this point in the RECORD, together with my telegram to Ambassador Stevenson.

The VICE PRESIDENT. The resolution will be received and appropriately referred; and, without objection, the telegram will be printed in the RECORD.

The resolution (S. Res. 207) was referred to the Committee on Foreign Relations, as follows:

Resolved, That (a) there is hereby established a select committee of the Senate to be known as the Select Committee on the Congo (referred to hereinafter as the "committee"). The committee shall be composed of a chairman selected from members of the Senate who are members of the majority party, and twelve other members of the Senate selected as follows:

(1) two members chosen from the membership of the Committee on Foreign Relations, of whom one shall be a member of the majority party and one shall be a member of the minority party;

(2) two members chosen from the membership of the Committee on Appropriations, of whom one shall be a member of the majority party and one shall be a member of the minority party;

(3) two members chosen from the membership of the Committee on Government Operations, of whom one shall be a member of the majority party and one shall be a member of the minority party;

(4) two members chosen from the membership of the Committee on Armed Services, of whom one shall be a member of the majority party and one shall be a member of the minority party; and

(5) four members chosen from members of the Senate without regard to their committee assignments, of whom two shall be members of the majority party and two shall be members of the minority party.

(b) Vacancies in the membership of the committee shall not affect the authority of the remaining members to execute the functions of the committee, and shall be filled in the same manner as original appointments thereto are made.

(c) The committee shall adopt rules of procedure not inconsistent with the rules of the Senate governing standing committees of the Senate. A majority of the members of the committee shall constitute a quorum thereof for the transaction of business, except that the committee may fix a lesser number as a quorum for the purpose of taking sworn testimony.

(d) No legislative measure shall be referred to the committee, and it shall have no authority to report any such measure to the Senate.

(e) The committee shall cease to exist on February 28, 1962.

SEC. 2. (a) It shall be the duty of the committee to conduct a comprehensive study and investigation concerning the situation existing in the Congo.

(b) On or before January 1, 1962, the committee shall report to the Senate the results of its studies and investigations, together with its recommendations for any additional legislative or other measures which it may determine to be necessary or desirable for the solution of problems incident to that situation.

SEC. 3. (a) For the purposes of this resolution, the committee is authorized to (1) make such expenditures; (2) hold such hearings; (3) sit and act at such times and places during the sessions, recesses, and adjournment periods of the Senate; (4) require by subpoena or otherwise the attendance of such witnesses and the production of such correspondence, books, papers, and documents; (5) administer such oaths; (6) take such testimony orally or by deposition; and (7) employ and fix the compensation of such technical, clerical, and other assistants and consultants as it deems advisable, except that the compensation so fixed shall not exceed the compensation prescribed under the Classification Act of 1949, as amended, for comparable duties.

(b) Upon request made by the members of the committee selected from the minority party, the committee shall appoint one assistant or consultant designated by such members. No assistant or consultant appointed by the committee may receive compensation at an annual gross rate which exceeds by more than $1,200 the annual gross rate of compensation of any individual so designated by the minority members of the committee.

(c) With the prior consent of the executive department or agency concerned and the Committee on Rules and Administration, the committee may (1) utilize the services, information, and facilities of any such department or agency, and (2) employ on a reimbursable basis the services of such personnel of any such department or agency as it deems advisable. With the consent of any other committee of the Senate, or any subcommittee thereof, the committee may utilize the facilities and the services of the staff of such other committee or subcommittee whenever the chairman of the committee determines that such action is necessary and appropriate.

(d) Subpoenas may be issued by the committee over the signature of the chairman or any other member designated by him, and may be served by any person designated by such chairman or member. The chairman of the committee or any member thereof may administer oaths to witnesses.

SEC. 4. The expenses of the committee under this resolution, which shall not exceed $75,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

The telegram presented by Mr. DODD is as follows:

TEXT OF WIRE FROM SENATOR THOMAS J. DODD TO AMBASSADOR ADLAI E. STEVENSON

I am gravely concerned over reports of recent action taken by the United Nations in the Congo.

On the one hand, I am alarmed by the role of the United Nations in fostering the creation of a coalition government in Leopoldville with Antoine Gizenga as Vice Premier and Christophe Gbenye as Minister of Interior. Both of these men are Prague-trained Communists.

On the other hand, I am alarmed by the massive concentration of U.N. forces in Katanga, by the forcible arrest and deportation last week of all white officers and noncommissioned officers serving with the Katanga Army, and by the increasing number of white civilian advisers who have been ordered deported.

By thus decapitating the anti-Communist army of President Tshombe, by leaving the large pro-Communist army of Antoine Gizenga intact, and by forcing the submission of President Tshombe to the highly questionable coalition government in Leopoldville, the U.N. command, in my opinion, is preparing the way for a Communist takeover in the Congo.

I have this morning submitted a resolution calling for the creation of a select committee of the Senate to investigate the situation in the Congo.

It is the duty of the Senate to investigate and to be fully informed about the situation in the Congo as it affects American interests; the role played by the United States in determining or opposing U.N. policy; and the use being made in the Congo of the money of American taxpayers.

There have been reports in the past indicating that the Department of State was not satisfied with the U.N.'s handling of the Congo situation. I earnestly hope that the Department has not approved the recent measures to which this telegram refers. I urge you to insist within the U.N. that, until there has been an opportunity for a reappraisal of the entire situation, the U.N. command in the Congo take no further action against white officers or white advisers in Katanga Province; that it release those officers and advisers now in custody and permit them to resume their positions; and that it take no further measures to force the submission of President Tshombe to the coalition government in Leopoldville, in which the Vice Premier and the Minister of the Interior are both Prague-trained Communists.

AMENDMENT OF CIVIL SERVICE RETIREMENT ACT, RELATING TO METHOD OF COMPUTING CERTAIN INTEREST EARNINGS

The VICE PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 739) to amend the Civil Service Retirement Act, as amended, with respect to the method of computing interest earnings of special Treasury issues held by the civil service retirement and disability fund, which were, on page 1, line 3, after "That" insert "(a)"; on page 1, lines 4 and 5, strike out "70 Stat. 759 (5 U.S.C. 2267)" and insert "(70 Stat. 759; 5 U.S.C. 2267(d))"; on page 2, after line 18, insert:

(b) All special issues in which the civil service retirement and disability fund is invested in accordance with section 17(d) of the Civil Service Retirement Act as in effect prior to the enactment of this Act shall be redeemed and the moneys reinvested by the Secretary of the Treasury on or before January 1, 1962, in accordance with such section 17(d), as amended by subsection (a) of this section.

SEC. 2. (a) Paragraphs (2) and (3) of section 2(h) of the Civil Service Retirement Act, as amended (74 Stat. 302; 5 U.S.C. 2252(h)(2) and (3)), are amended to read as follows:

"(2) The Commission is authorized and directed to accept the certification of the Secretary of Agriculture or his designee with respect to service, for purposes of this Act, of the type rendered by employees described in paragraph (3) of this subsection.

"(3) Subject to the provisions of sections 4(c) and 9(f) of this Act, service rendered prior to July 10, 1960, as an employee of a county committee established pursuant to section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) or of a committee or an association of producers described in section 10(b) of the Agricultural Adjustment Act of May 12, 1933 (48 Stat. 37), shall be included in computing length of creditable service for the purposes of this Act."

(b) The amendment made by subsection (a) of this section shall become effective as of July 1, 1961.

SEC. 3. Section 11(h) of the Civil Service Retirement Act, as amended (74 Stat. 409; 5 U.S.C. 2261(h)), is amended—

(1) by inserting "(1)" immediately following "(h)"; and

(2) by adding at the end thereof the following:

"(2) Any employee—

"(A) who is separated from the service prior to July 12, 1960; and

"(B) who continues in the service after July 12, 1960, without break in service of one workday or more,

shall be granted the benefits of paragraph (1) of this subsection as if he were separated after July 12, 1960.".

SEC. 4. (a) Sections 7(d) and 7(e) of the Civil Service Retirement Act, as amended (70 Stat. 750, 751; 5 U.S.C. 2257(d) and (e)), are amended to read as follows:

"(d) If such annuitant, before reaching age sixty, recovers from his disability, payment of the annuity shall cease upon reemployment by the Government or one year from the date of the medical examination showing such recovery, whichever is earlier. If such annuitant, before reaching age sixty, is restored to an earning capacity fairly comparable to the current rate of compensation of the position occupied at the time of retirement, payment of the annuity shall cease upon reemployment by the Government or one year from the end of the calendar year in which earning capacity is so restored, whichever is earlier. Earning capacity shall be deemed restored if, in each of two succeeding calendar years, the income of the annuitant from wages or self-employment, or both, shall equal at least 80 per centum of the current rate of compensation of the position occupied immediately prior to retirement.

"(e) If such annuitant whose annuity is discontinued under subsection (d) is not reemployed in any position included in the provisions of this Act, he shall be considered except for service credit, as having been involuntarily separated from the service for the purposes of this Act as of the date of discontinuance of the disability annuity and shall, after such discontinuance, be entitled to annuity in accordance with the applicable provision of this Act. In the case of an annuitant whose annuity is heretofore or hereafter discontinued because of an earning capacity provision of this or any prior law and such annuitant is not reemployed in any position included in the provisions of this Act, annuity at the same rate shall be restored effective the first of the year following any calendar year in which his income from wages or self-employment, or both, is less than 80 per centum of the current rate of compensation of the position occupied immediately prior to retirement, if he has not recovered from the disability for which he was retired. In the case of an annuitant whose annuity is heretofore or hereafter discontinued because of a medical finding that the annuitant has recovered from disability and such annuitant is not reemployed in any position included in the provisions of this Act, annuity at the same rate shall be restored effective from the date of medical examination showing a recurrence of such disability. Neither the second nor third sentence of this subsection shall be applicable in the case of any person receiving or eligible to receive annuity under the first sentence hereof and who has reached the age of 62 years.".

(b) No annuity payment shall be made, as a result of the amendment made by subsection (a) of this section, for any period prior to January 1 of the year following the year in which this Act is enacted.

SEC. 5. Section 13(b) of the Civil Service Retirement Act, as amended (5 U.S.C. 2263(b)), is amended by adding at the end thereof the following new sentence: "A similar right to redetermination after deposit shall be applicable to an annuitant (1) whose annuity is based on an involuntary separation from the service, and (2) who is separated, on or after the date of enactment of this sentence, after a period of reemployment on a full-time basis which began before October 1, 1956.".

SEC. 6. The third sentence of section 6(f) of the Civil Service Retirement Act, as amended (5 U.S.C. 2256(f)), is amended to read as follows: "Any Member who completes twenty years of service, or who attains the age of fifty years and shall have served in nine Congresses, or who attains the age of fifty-five years and completes fifteen years of service (at least ten years of which is service as a Member), shall, upon separation from the service (other than by resignation or expulsion), be paid a reduced annuity computed as provided in section 9.".

SEC. 7. Section 6(d) of the Civil Service Retirement Act, as amended (5 U.S.C. 2256(d)), is amended—

(1) by inserting "(1)" immediately following "(d)"; and

(2) by adding at the end thereof the following new paragraph:

"(2) Any congressional employee who completes twenty years of service shall, upon involuntary separation from service as a congressional employee not by removal for cause on charges of misconduct or delinquency, be paid a reduced annuity computed as provided in section 9.".

SEC. 8. (a) The first sentence of section 9(b) of the Civil Service Retirement Act, as amended (5 U.S.C. 2259(b)), is amended by inserting ", or former congressional employee," immediately following the words "congressional employee" where first appearing in such sentence.

(b) The second sentence of such section 9(b) is amended—

(1) by inserting ", or former congressional employee," immediately following the words "congressional employee" where first appearing in such sentence;

(2) by inserting the word "and" immediately following "service," at the end of clause (1) thereof; and

(3) by striking out ", and (3) has served as a congressional employee during the last eleven months of his civilian service".

SEC. 9. Notwithstanding any other provision of law, annuity benefits under the Civil Service Retirement Act, as amended, resulting from the operation of this Act shall be paid from the civil service retirement and disability fund.

And to amend the title so as to read: "An act to amend the Civil Service Retirement Act with respect to interest earnings on special Treasury issues held by the civil service retirement and disability fund, with respect to employees of agricultural stabilization and conservation county committees, and with respect to certain other categories of persons subject to such act, and for other purposes."

Mr. JOHNSTON. Mr. President, I move that the Senate disagree to the amendments of the House, ask a conference with the House on the disagreeing votes of the two Houses thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to, and the Vice President appointed Mr. JOHNSTON, Mr. MONRONEY, Mr. CLARK, Mr. FONG, and Mr. BOGGS conferees on the part of the Senate.

CONSERVATION OF MIGRATORY WATERFOWL BY THE ACQUISITION OF WET LANDS
